There are over 1,100 miles of road in the island, and about 300 miles of railway. The railway system connects towns on the west coast and now almost encircles the Island, and penetrates the interior. A line is operated from Rio Piedras to Caguas inland. Extensions of existing lines are being undertaken, and a new line across the Island, with many branches, is projected. There are 1,344 miles of postal (government) telephone and telegraph wire. There are 80 post offices, and 72 telegraph stations.

The Porto Rican island of Vieques, 13 miles to the east, is about 21 miles long and 6 miles broad, and has about 10,000 inhabitants, who grow sugar and rear cattle. Like Porto Rico, the island of Vieques is fertile and healthy.

The island of Culebra, between Porto Rico and St. Thomas, has a good harbour and has been transformed into a naval base. It is the rendezvous of the U.S. Atlantic and Caribbean squadrons.

*British Vice-Consul.*—T. G. J. Waymouth.

### VIRGIN ISLANDS OF THE UNITED STATES.

The islands of St. Croix, St. Thomas and St. John, in the Virgin group of the Lesser Antilles, originally belonged to Denmark, by whom they were sold to the United States in 1916 for 25,000,000 dollars. Ratifications of the treaties of sale were exchanged on January 17, 1917, and the United States took possession of the islands on March 31, 1917.

The islands lie about 50 miles east of Porto Rico, have a combined area of 142 square miles (St. Thomas, 28 square miles; St. Croix, 84 square miles; and St. John, 30 square miles) and a population of 32,000.

### PHILIPPINE ISLANDS.

These islands, ceded by Spain to the United States by the treaty of peace concluded between the United States and Spain on April 11, 1899, extend almost due north and south from Formosa to Borneo and the Moluccas, embracing an extent of 16° of latitude and 9° of longitude.

*Governor-General.*—Francis Burton Harrison, appointed August 22, 1913.

*Vice-Governor.*—Henderson S. Martin, appointed November 29, 1913.

**Government.**—The whole of the Archipelago is now under civil government. The organic act of the Philippine Islands passed by the Congress of the United States on August 29, 1916, provides an autonomous form of government for the Islands. Under its provisions the Governor-General, who is the Chief Executive, the Vice-Governor, who is also the Secretary of the Department of Public Instruction, the Auditor and the Deputy Auditor are appointed by the President of the United States.

Both branches of the Legislative body—the Philippine Senate and the House of Representatives—are elective. The first Senate was inaugurated on October 16, 1916. The members of both the upper and lower houses of the Legislature are elected for terms of three years, and the Legislature elects two Resident Commissioners to the United States, who hold office for the same term. There are six Executive Departments: Interior, Public Instruction, Finance, Justice, Agriculture and Natural Resources, and Commerce and Communications. The Secretaries of Departments, appointed by the Governor-General by and with the consent of the Philippine Senate, are all Filipinos, with the exception of the Secretary of the Department of Public Instruction, who is an American.

The islands are subdivided into 36 provinces, besides the recently created Department of Mindanao and Sulu, which occupies the southernmost portion of

the Archipelago, and comprises seven more provinces, formerly subprovinces, and districts of Agusan and the Moro Province. There are two classes of provinces, viz., regular and special. Thirty-one of the provinces are regular and the rest special. The government of each of the regular provinces is vested in a provincial board composed of a governor and two members. The governor is the chief executive of the province and presiding officer of the board. He and the members of the board are all elected by popular vote. The governors of the special provinces are appointed by the Governor-General with the advice and consent of the Philippine Senate. The government of the towns is practically autonomous, the officials being elected by the qualified voters of the municipality and serving for three years. The officials consist of a president, vice-president, and councillors, the latter varying in number according to population. Local municipal government has been instituted in about 850 towns.

**Area and Population.**—The islands and islets are about 3,141 in number; the two largest are Luzon (40,969 square miles) and Mindanao (36,292 square miles), and the total area, including the Sulu Islands, is estimated at about 120,000 square miles. The population was put at 7,635,426 by the census of 1903, but, owing to the fact that the numbers of certain wild tribes were greatly underestimated, should probably have been nearly 8,000,000. In 1914 the total was estimated at 8,937,597, giving a density of population of about 74 per square mile. Approximately 1,100,000 of the population are non-Christians and more primitive than the Christianised peoples.

The capital of the Archipelago is Manila, constituted as a province, with (1914) 266,943 inhabitants. The municipal census of 1914 showed 236,940 Filipinos, 5,474 Americans (including troops), 4,406 Spaniards, 16,657 Chinese, 1,506 other Europeans, and 1,960 of other nationalities. Other towns with their estimated present population, including suburbs, are: Iloilo on Panay, 60,000; Cebu on Cebu, 60,000; Laoag, 43,000; Albay (including Legaspi), 40,000; Nueva Cáceres, 40,000; Vigan, 38,000 (all on Luzon); and Zamboanga on Mindanao, 24,000. Baguio, in the Mountain Province, Luzon, is the summer capital, corresponding to Simla in India.

Complete vital statistics are as yet restricted to Manila, which, with a resident population of 266,943, and non-resident, 5,511 (census taken 1914), had, during the year 1915, 6,820 deaths among residents (25·54 per 1,000) and 8,850 births (33·15 per 1,000). Among the American residents, however, the death-rate is only 4·74 per 1,000.

Under the Chinese-exclusion Act (applied to the Philippines in 1902) Chinese immigration is prohibited. Under the Act Chinese labourers must be registered. The total number of Chinese is now estimated at 50,000.

There are about 20,000 Americans and Europeans in the islands (including troops). The native inhabitants are mostly of the Malayan race, but there are some tribes of Negritos, numbering probably 25,000 all told.

**Justice and Defence.**—For the administration of justice there are: A supreme court, with a chief justice and six associate justices; 26 judicial districts, each with a judge of first instance, except the ninth district, which has four judges, the same covering the city of Manila. There is also one justice of the peace and one auxiliary justice for each organised municipality and for such other towns or places as may be determined by resolution of the Philippine Senate.

Public order is maintained through the municipal police and the Philippines Constabulary. The strength of the Constabulary at the close of

1916 was 361 officers and 5,200 enlisted men, distributed throughout the Archipelago. The United States maintains in the Philippine Islands a force of about 15,000 troops of the U. S. Army, and 52 companies, about 5,700, Philippine Scouts.

**Religion.**—The dominant religion of the islands is the Roman Catholic, there being in addition to an American archbishop, 4 American, and 3 Filipino bishops, 1 bishopric vacant, and 1 Italian Apostolic Delegate. In Luzon an Independent Filipino Church has come into existence. The Moros are Mohammedans, and there are pagan tribes (now numbering about 800,000) in some of the more remote regions.

**Education.**—The Archipelago is divided into 44 educational divisions. The teaching staff comprises 506 American teachers for all grades, 1,279 Filipino teachers on Insular pay, and 9,138 Filipino teachers paid by the municipalities. English is taught in all the public schools of the islands, to the number of 4,538. In 1915-16 there was an average monthly enrolment of 523,272 pupils in the public schools. The annual cost of teachers, &c., is about 3,500,000 dollars. The Philippine Normal School has been training teachers for a number of years. Five new normal schools were organised in the provinces at the beginning of the school year, 1916-17. The Philippine School of Arts and Trades at Manila and 32 provincial trade schools train students along industrial lines. The school system is centralised in and is wholly under the control of the Bureau of Education and the Secretary of Public Instruction. For higher education there is the free State supported University of the Philippines, with colleges of Liberal Arts, Medicine and Surgery, Engineering, Law, Veterinary Medicine and Agriculture, and a School of Fine Arts; School of Pharmacy, School of Education, School of Dentistry, and Conservatory of Music; the total number of students in 1916-17 was 1,705 in the collegiate departments and 808 in the School of Fine Arts.

**Finance.**—The revenues and expenditures of the central government for six fiscal years were:—

—	1911	1912	1913	1913 <sup>1</sup>	1914 <sup>2</sup>	1915
	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars
Revenues . . .	12,651,430	15,565,809	13,517,070	5,785,982	11,912,761	15,329,555
Expenditures . .	14,135,428	15,672,846	14,804,041	7,897,430	13,414,340	14,654,045

<sup>1</sup> Semi-fiscal year, July 1, to December 31.

<sup>2</sup> The Government Fiscal Year, beginning with January 1, 1914, was made coincident with the calendar year. Therefore the fiscal year pertained to the period beginning July 1 and ending June 30.

**Production and Industry.**—The principal products are rice, Manila hemp, coconut, sugar cane, corn, tobacco and maguay. The total area cultivated to these crops during 1915-16 was 6,284,825 acres, the largest single crop being rice (2,793,992 acres). The total value of these crops for this period was 80,209,530 dollars.

Agriculture is still in a somewhat primitive condition, although rapid steps are being made in its improvement, through different branches of the government. Modern sugar centrals have been installed in the largest sugar producing regions. The abacá (Manila hemp) industry has been greatly benefited through a government system of inspection and grading. A fibre grading law has been in force two years, by which the grades of Philippine fibres, especially abacá and maguay, have been standardised, and the

standards enforced by a system of inspection by Government fibre inspectors of all fibre exported from the Islands to foreign countries for the manufacture of rope, binder twine, and other similar uses. Two large modern coconut oil factories are in successful operation.

The Islands possess about 40,000 square miles of forests furnishing chiefly timber, but also gums and resins, great quantities of rattan and bamboo, tan and dye barks and dye woods. The total output of commercial timber during 1915 was about 117,137,632 board feet; of firewood about 58,790 cords. The total exports of gums and resins during 1915 amounted to 133,544 dollars. Exports of wood and manufactures of wood during the same year amounted to 299,210 dollars.

In the Philippine Islands a start has been made towards the development of the mineral resources, especially gold. Lignite and iron (magnetite and hematite) are found in several provinces. The Philippine Bureau of Science has surveyed a large deposit of iron ore in Surigao, Mindanao and estimates 500,000,000 metric tons of available ore averaging 45 to 50 per cent. iron. Gold is found in almost all the larger islands, and in some of them has been long worked by natives. It is at present one of the most important of the mineral products; the gold-mining industry is well past the experimental stage, and the production is increasing each year. That for the calendar year 1913 was valued at 868,362 dollars, for 1914 at 1,174,633 dollars, and for 1915 at 1,316,764 dollars. Silver, copper and platinum have been found. Lead and manganese deposits are being worked, sulphur will probably soon enter the export trade, and petroleum, rock salt, kaolin, and gypsum are also found in the Archipelago. The total value of minerals in 1914, was 2,301,695 dollars; and in 1915, 2,433,793 dollars.

**Commerce.**—The values of imports and exports for fiscal years ending June 30 are stated as follows in U.S. dollars :—

—	1912	1913	1914	1915	1916
Imports . . .	54,549,980	56,327,533	56,011,570	44,479,861	45,973,625
Exports . . .	50,319,836	53,683,326	51,238,948	50,915,061	61,464,081

Import duties, 1916, 5,001,290 dollars; 1915, 5,054,770 dollars. Export duties were abolished by the Tariff Act of 1913.

The chief imports and exports during the year ending June 30, 1916, were :

Imports.		Exports.	
Commodity	Value (Dollars)	Commodity	Value (Dollars)
Cotton goods . . . . .	10,393,189	Abacá (Manila hemp) . . . . .	24,575,800
Iron and steel products . . . . .	4,246,136	Sugar . . . . .	17,208,318
Meat and dairy products . . . . .	2,514,218	Copra . . . . .	6,533,265
Rice . . . . .	5,847,195	Cigars . . . . .	2,284,848
Coal . . . . .	1,484,313	Tobacco, other than cigars and cigarettes . . . . .	2,141,105
Wheat flour . . . . .	1,828,798	All other . . . . .	8,726,195
Illuminating oil . . . . .	987,463		
Leather goods . . . . .	1,047,961		
Automobiles, tyres and supplies . . . . .	1,109,034		
All other . . . . .	16,565,318		
<b>Total . . . . .</b>	<b>45,973,625</b>	<b>Total . . . . .</b>	<b>61,464,081</b>

In the fiscal year ending June 30, 1916, the commerce was mainly distributed as follows :—

Country	Imports (Dollars)	Exports (Dollars)	Country	Imports (Dollars)	Exports (Dollars)
United States . . .	23,804,367	28,838,526	France . . .	740,397	3,302,035
United Kingdom . .	2,970,277	12,990,294	Spain . . .	844,174	2,325,413
Japan . . .	4,105,568	3,973,174	British E. Indies	940,021	1,352,319
Germany . . .	188,422	—	Hong Kong . . .	159,332	3,862,889
Australasia . . .	1,199,381	776,601			
French East Indies	5,955,460	81,848			
China . . .	2,330,385	2,097,195	Total . . .	45,973,625	61,464,031

**Shipping and Communications.**—In the fiscal year ending June 30, 1916, there entered in the foreign trade a total of 723 vessels with an aggregate tonnage of 1,599,421, and cleared 731 vessels with an aggregate tonnage of 1,620,876.

On December 31, 1915, there were in operation, 693 post-offices, 311 money-order offices, 5,272 miles of insular telegraph lines, and 1,173 miles of cables, with 311 telegraph and cable offices. At the same time there were 473 postal savings banks in operation, with 54,434 accounts. The amount of deposits in the banks on December 31, 1915, was 3,508,851 pesos (Philippine currency). Of the depositors 46,492 were Filipinos.

On December 31, 1915, there were 18 newspapers and periodicals published in English, 8 in English-Spanish, 20 in Spanish, 9 in Spanish-native dialects, 22 in native dialects, 3 in Chinese, and 1 in English-German-Spanish.

When the United States entered the islands in 1898 there was but a single line of narrow gauge track running between Manila and Dagupan, a distance of about 120 miles. Additions have been made to this until the total length of lines in operation at the close of the calendar year, 1916, was 747 miles (616 miles on Luzon, 72 on Panay, and 59 on Cebu) with practically no construction work going on, but with 173 miles more to be constructed in the near future. Total length of roads (June 30, 1916), 5,454 miles, of which 2,045 miles were first-class hard-surfaced road, 1,300 miles second-class light-surfaced road, and 2,109 third-class unsurfaced road. Besides the foregoing roads there were 1,525 miles of trails passable for horses only.

**Banking and Coinage.**—There are five banks doing business in the Islands: the International Banking Corporation, Hong Kong and Shanghai Banking Corporation, Chartered Bank of India, Australia, and China, the Bank of the Philippine Islands, formerly the Banco Español Filipino, and the Philippine National Bank. The Philippine National Bank was inaugurated, under a special charter granted by the Philippine Legislature, on May 2, 1916, with an authorised capital of 10,000,000 dollars, of which 5,050,000 dollars was subscribed by the Government and of which 2,000,000 dollars was paid in during 1916. The Philippine National Bank maintains branches in Iloilo and Cebu, and during 1916 established an agency in New York City. There are also agencies in each of the capitals of the thirty-three provinces in the Philippine Islands. In addition to general banking business, the Philippine National Bank also makes loans for agricultural purposes on the security of first mortgages on the farm lands having registered titles. On November 29, 1916, the total resources of the Bank were in excess of 20,000,000 dollars. On July 1, 1916, the Bank was declared the sole Government depository.

When the United States took possession of the Islands the Mexican

dollar was the chief current coin, and fluctuations in its value caused trouble. In 1900 an order was issued making one U.S. dollar equivalent to two Mexican dollars, but before long other measures were required and Congress passed an Act making a Filipino coin, the *peso*, of the value of 50 U.S. cents, to be guaranteed by gold. This law came into force in June, 1904, and has worked satisfactorily. All amounts of money in the foregoing pages, however, are given in United States currency.

*British Consul-General.*—John B. Rentiers.

*Vice-Consul at Iloilo.*—T. H. W. Price.

*Vice-Consul at Cebu.*—J. T. Knowles.

---

### GUAM.

The Island of Guam, situated at the southern extremity of the Mariana Archipelago, in latitude 13° 26' N, longitude 144° 43' E, is the largest island of that group. It was ceded by Spain to the United States by the Treaty of Paris (December 10, 1898). It is under the jurisdiction of the Navy Department of the United States, and has been designated as a Naval Station for the purposes of government and protection. A garrison of marines, a shore naval force and a station ship are maintained here. Guam is not a saluting port.

The length of the island is 32 miles, the breadth from 4 to 10 miles, and the area about 210 square miles. Agaña, the seat of Government, is 8 miles from the anchorage in Apra Harbour. The port of entry is Piti. The number of inhabitants (exclusive of the military establishment) on June 30, 1916, was 13,491, of whom 13,285 were classed as 'natives.' The birth-rate was 46·7, and the death-rate 21·3 per 1,000. The native language is Chamorro, but Spanish and English are also spoken.

The Governor of the island, a naval officer appointed by the President, takes precedence over and is entitled to the honours due to an Admiral. The Governor is also the Military Commander of the island, Commandant of the naval station, and combines the functions of the executive, legislative and judicial power of the Government. The judiciary system comprises one police court, an Island Court, and one Court of Appeal. The Spanish Colonial laws, modified when necessary by executive general orders of the Governor, are still in force.

Elementary education is compulsory. There are 2,090 pupils registered, 1,212 of whom are of school age (7 to 12). English, handicrafts and agriculture are taught.

There is a wireless telegraph plant on the island, which is in cable telegraphic communication with all parts of the world. There is a monthly mail service per west bound U.S. army transports, from San Francisco, via Honolulu, and to Manila.

The port is closed to foreign vessels of war and commerce except in special cases. Permission to visit the island must be obtained of the Navy Department in each case.

The products of the island are maize, copra, rice, sweet potatoes, coffee, cocoa, and sugar, besides valuable timber. There are about 6,000 head of cattle, including 900 water buffaloes. The imports into the island in the year ending June 30, 1916, amounted to 329,503 dollars, and the exports to 66,568 dollars.

The official currency is that of the United States.

*Governor.*—Roy. C. Smith, Captain U.S. Navy (appointed April 5, 1916).

## SAMOAN ISLANDS.

(AMERICAN SAMOA.)

The Island of Tutuila and all other islands of the Samoan group east of longitude 171 degrees west came into the possession of the United States in February, 1900. For many years American influence had been strong in Samoa. In 1872 the harbour of Pagopago, in Tutuila, had been ceded to the United States for a naval and coaling station. In 1878 this cession was confirmed and rights of freedom of trade and extra-territorial jurisdiction in Samoa were granted. In 1889 the conference between the representatives of the United States, Germany, and Great Britain was held at Berlin, resulting in the treaty recognising the Samoan Islands as neutral territory, with an independent government, the natives being allowed to follow their own laws and customs, while for civil and criminal causes, in which foreigners were concerned, there was established a Supreme Court of Justice, in which an American citizen was the presiding judge. This arrangement continued till 1898, when disturbances regarding the right of succession to the office of king arose. In 1899 the kingship was abolished, and, by the Tripartite Treaty of November 14 of that year, accepted in February, 1900, by the United States, Great Britain and Germany renounced in favour of the United States all rights over the island of Tutuila and the other islands of the Samoan group east of 171 degrees of longitude west of Greenwich, the islands to the west of that meridian being assigned to Germany. The harbour of Pagopago had, in fact, been occupied by the United States, under already existing treaty rights, in 1898.

The Island of Tutuila, 70 miles from Apia, has an area of about 77 square miles, with a population of about 7,300. Tau and the other islets (Ofu and Olosega) of the Manua group have a united area of about 25 square miles, with about 1,800 inhabitants. Tutuila is mountainous, luxuriantly wooded and fertile. It is described as the most pleasing of the Samoan islands. The harbour at Pagopago, which penetrates the south coast like a fiord, is the only good harbour in Samoa. It is a United States naval station under a Commandant, the Government having acquired there a land area of about 40 acres.

The Commandant is also the Governor of Tutuila by commission from the President of the United States. He appoints officers and frames laws or ordinances, but native customs (not inconsistent with United States laws) are not changed without the consent of the people.

The islands are organised in three political divisions:—1, the Eastern District of Tutuila, with the islet of Aunuu; 2, the Western district of Tutuila; and 3, the District of Manua, composed of Tau and the neighbouring islets. In each District there is a native governor, under whom are native chiefs in the counties, these having the control of village chiefs. Judicial power is vested in village courts, in five judicial district courts, and in a high court.

Ordinances have been made for the regulation of police, the importation of spirits, assessment of taxes, possession of arms, and other matters. The sale of native land to whites is prohibited. Especial attention is given to the health of the natives. Systematic efforts to eradicate the hookworm and the yaws by sanitary education and treatment have met with a large measure of success.

There are four religious missions at work: The London Missionary Society, the Roman Catholic (French) mission, the Mormon mission, and the Wesleyan mission. Besides the sectarian schools, there are two non-sectarian schools: one maintained by the Island Government, and one mainly supported by natives. The non-sectarian schools are supplied with text-books, stationery,

&c., by the Island Government. There are 83 schools in the islands, attended by 1,101 boys and 861 girls.

The natives pay their taxes in copra, the amount of copra annually assessed for fiscal purposes being from 500,000 to 550,000 lbs. The annual output of copra is about 1,500 tons. At Fagatoga the natives are allowed to pay their taxes in cash. There is a native guard (Fitafitas) of about 75, including the 14 members of the native band, trained by a drill sergeant and a bandmaster of the U.S. navy. The chief island products, besides copra, are taro, breadfruit, yams, coconuts, pineapples, cranges, and bananas. Copra is the only article exported.

PART THE THIRD

OTHER COUNTRIES

## ABYSSINIA.

(ETHIOPIA.)

THE ancient Empire of Abyssinia, or 'Ethiopia,' includes the Kingdoms of Tigré, with Lasta, in the north-east; Amhara, with Gojam, in the west and centre; Shoa in the south; besides territories and dependencies as far as Kaffa in the south and Harar in the south-east, with considerable portions of the Galla and Somali Lands. The following are the provinces into which the country is divided:—(1) Harar and Dependencies; (2) Wollo; (3) Kassa and Magi; (4) Gore; (5) Tigré; (6) Damot and Gojam; (7) Equatorial Provinces; (8) Gondar; 9. Jima. The whole area is 350,000 sq. miles, with an estimated population of over 8 millions. For treaties relating to the boundaries of Abyssinia see THE STATESMAN'S YEAR-BOOK for 1907, p. 667. An agreement was reached in December, 1907, for the delimitation of the frontier towards British East Africa. The frontier follows the Dawa up to Ursulli, whence it runs mainly westwards, passing the south end of Lake Stephanie, and, after crossing the north-eastern branch of Lake Rudolf, runs mainly northwards and terminates at 6° N. 35° E. This frontier, however, is not yet finally delimited and accepted by the Abyssinians.

### Government.

By the convention of Adis Ababa of October 26, 1896, between Italy and King Menelik, the independence of Abyssinia was recognised.

Under an Agreement signed December 13, 1906, on behalf of Great Britain, France, and Italy, the three Powers undertake to respect and endeavour to preserve the integrity of Abyssinia; to act so that industrial concessions granted in the interest of one of them may not injure the others; to abstain from intervention in Abyssinian internal affairs; to concert together for the safeguarding of their respective interests in territories bordering on Abyssinia; and they make agreements concerning railway construction in Abyssinia and equal treatment in trade and transit for their nationals.

After the overthrow of Theodore, King of Amhara, by the British in 1868, the suzerain power passed to Prince Kassai of Tigré, who assumed the old title of Negus Negust ('King of Kings'), and was crowned in 1872 as Johannes II., Emperor of Ethiopia. After the death of this potentate in 1889, Menelik II., King of Shoa (born 1842), G.C.B., G.C.M.G., became the supreme ruler of Abyssinia. Menelik died in December, 1913, and was succeeded by Lij Yasu, born in 1896, son of his second daughter, Waizaro Shoa Rögga and Ras Mikael, the chief of the Wollo Gallas.

On September 27, 1916, Lij Yasu was deposed by public proclamation, and **Waizeru Zauditu**, another daughter of Menelik, born 1876, was nominated Empress, and **Taffari**, promoted to be a *Ras*, proclaimed heir to the throne. The new Empress was crowned at Adis Ababa on February 11, 1917.

The new government has been recognised by Great Britain.

The political institutions are essentially of a feudal character, analogous to those of mediæval Europe. There is a vague State Council consisting of the most important *rases*, under whom, for administrative purposes, are governors of districts and provinces and chiefs of villages. A Council of Ministers was constituted by the Emperor Menelik, Ministers being appointed for Justice, Finance, Commerce, War, Foreign Affairs, Posts and Telegraphs, Interior, and a sort of Lord Privy Seal. The most important Minister is the Minister of War. The Council met for the first time in

July, 1908, and was employed chiefly in defining the duties and powers of the various departments.

The regular army, consisting of contingents from the various provinces, numbers about 250,000 men, and is supplemented by irregulars and a territorial army. At Adis Ababa are 7 batteries of artillery and mitrailleuses taken at the battle of Adua.

Besides the chiefs and their retainers summoned in time of war, the King maintains a permanent army of *wollader* or mercenaries, all of whom are now armed with rifles instead of the national weapons—shield and lance.

### Population.

The population, which is of Semitic origin, consists of four groups—the Gallas and Somalis, in the south and south-west, the Shoans in the centre, the Tigrians in the north, and the Dankalis in the east. The Gallas comprise one-half of the entire population, and are a pastoral and agricultural people. The Shoans number 1,500,000 and furnish the ruling class. Every one is a soldier and the present ruler depends upon them to maintain his sovereignty. The Tigrians are a lighter coloured people and show their Semitic descent. They formerly furnished the rulers of Ethiopia. The Dankalis are Mohammedans, and on account of the inaccessibility of their country preserve a sort of independence, merely paying an annual sum to the Emperor as a tribute. There are also some Negroes (in the South-West), and the Falashas (of Jewish religion), with a considerable number of non-natives (Indians, Arabs, Greeks, Armenians, and a few Europeans).

Except Harar, and perhaps in the north, there are no towns in Abyssinia in our sense of the word—not even Adis Ababa, which consists of villages and suburbs scattered round the Palace. It would be about three miles in diameter. The most important towns, politically and commercially, are: Gondar, capital of Amhara, 3,000; Adua, capital of Tigré, 5,000; Aksum, ancient capital of Ethiopia, and still the seat of an Abuna, 5,000; Antalo, former capital of Tigré, 1,000; Ankober, former capital of Shoa, 2,000; Adis Ababa, present capital of Abyssinia, and Shoa 40,000-50,000 (with a foreign population of about 150, largely Indians, Greeks and Arabs); Debra-Tabor (Mount Tabor), Magdala, and Makallé; Gore, Saiyu, Nekempti, Samaré, 3,000-4,000, and Sokoto, 1,500, important trading centres; Mahdeia-Mariam (Mary's Rest), 4,000. The population of Harar is estimated at 50,000, of whom about 300 are Europeans; at Diré Dawa there are a considerable number of Europeans. Gambela, in Western Abyssinia, is a trading station leased to the Sudan Government. It is an important outlet for the trade in the West. A service of steamers is maintained from June to November with Khartum.

### Religion and Instruction.

Since the conversion of the Abyssinians to Christianity in the fourth century they have remained members of the Alexandrian Church. The Abuna, or head bishop, is always a Copt, appointed and consecrated by the Coptic Patriarch of Alexandria, but his influence is controlled by the Echeheh, a native ecclesiastical dignitary, who presides over the spirituality, numbering about 100,000 ecclesiastics. Both Copts and Abyssinians are monophysite, rejecting the decrees of the Council of Chalcedon (A.D. 451).

Education has hitherto been restricted to the teaching of the secular and regular clergy, but in October, 1907, an edict was issued enjoining compulsory education on all male children over the age of 12. This is, however, a dead letter. There is one school in Adis Ababa, directed by a few Coptic teachers, introduced by the Abuna—this is the only Abyssinian school in the country.

It has over 100 pupils, but the attendances are most irregular, and the institution is unpopular as yet with the ignorant people.

Justice is administered by the provincial governors, and *shums*, or petty chiefs, with the right of appeal to the Emperor. The legal system is said to be based on the Justinian Code.

### Agriculture.

The chief industries are pastoral and agricultural. Cattle, sheep, and goats are numerous. The horses of the country are small but hardy; mules are bred everywhere, being used as pack animals; donkeys are also small and serve for baggage animals. The soil belongs theoretically to the Negus; the idea of landed property scarcely exists among the populace, and agriculture is therefore backward. Cotton, the sugar-cane, date-palm, coffee, and vine might thrive well in many districts, but are nowhere extensively cultivated. The production of Harari coffee (long berry Mocha) is on the increase. Besides this, which is cultivated, there grows more especially in southern and western Abyssinia a wild coffee plant, yielding a berry known as Abyssinian coffee. The native produce includes hides and skins, barley, millet (dhurra), wheat, *gesho* (which serves as a substitute for hops), and tobacco, but not in sufficient quantities for export. Manufacturing industries are in a similar state. The forests abound in valuable trees and rubber. Iron is abundant in some districts and is manufactured into spears, knives, hatchets, &c. Placer gold mining and washing are carried on in many districts; coal is known to exist in the country; silver, copper, and sulphur have been found.

### Commerce.

The principal artery of trade is the French Ethiopian railroad, but caravans also do a large trade in the interior. The chief trade routes besides the railway are the following:—(1) Khartum-Gambella, Khartum-Gallabat, and Khartum-Roseires (Sudan); (2) Mombasa-Nairobi-Moyale (British East Africa); (3) Bulhar-Ogaden (British Somaliland); (4) Massowah-Asmara-Gondar, Assab-Dessie (Italian Eritrea); (5) Mogadishu-Lugh-Dolo-Arusi (Italian Somaliland).

The exports consisted mainly of hides and skins, coffee, wax, ivory, civet, and native butter. In 1913 the trade in hides and skins was very flourishing; 4,105 metric tons being exported by the railway through Addis Ababa. The imports comprised grey shirting (*abujedid*), cotton goods, arms and ammunition, provisions, liquors, railway material, sugar, and petroleum. The sugar imports increased from 477 metric tons in 1912 to 1,138 metric tons in 1913. The imports are chiefly from England, France, India, Italy and the United States. The value of exports and imports through Jibuti in 1913 was about 736,848*l.*; through Gambela and Western Abyssinia to the Sudan in 1913, 127,647*l.*; and through Somaliland in 1913, 61,700*l.* The total trade between Abyssinia and Great Britain for 5 years was as follows:—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Abyssinia .	3,631	8,609	8,106	11,220	3,260
Exports to Abyssinia .	4,926	5,620	6,187	3,769	3,774

Abyssinia has commercial treaties with Great Britain (1897) for 'most favoured nation' treatment; with Italy (1897) terminable on six months' notice; with the United States (1903) for 10 years, then subject to one year's notice; with Germany and Austria-Hungary (1905) for 10 years, then subject to one year's notice; with France (1908) for 10 years, and then subject to a year's notice.

### Communications.

Roads in Abyssinia are mere tracks, and transport is effected by means of mules, pack-horses, donkeys, and, in some places, camels. In the capital and its vicinity a few miles of metalled road have been constructed. There is a railway of a metre gauge from the port of Jibuti in French Somaliland to Diré Dawa (about 25 miles from Harar) in the south-east of Abyssinia, 187 miles. In January, 1909, a new company was formed to complete the line to Adis Ababa, taking over the portion completed on French territory. The survey for the new line has been made and the section to the Hawash River, 150 miles from Diré Dawa, and the same distance from Adis Ababa, was about 25 miles from Adis Ababa on March 1, 1915, and was expected to reach the capital itself towards the end of the year.

There are telegraph lines (1,056 miles) connecting Adis Ababa with Harar, with Sidamo, with Jibuti in French Somaliland, and with Massawa in Eritrea. Telephone lines connect Adis Ababa with Harar, also with Gore and Gambela (in the west), Jimma and Sharada (south-west), Dessie (north), and Debra Tabor and Gojam, and with Ankober, and Asmara with Adua and Barromeida.

### Money and Credit.

The Bank of Abyssinia, with authorised capital of 500,000*l.* and paid-up capital of 125,000*l.*, has its head office at Adis Ababa and agencies at Harar, Deré Dawa, Gore, Gambela and Dessie. By its constitution the Governor of the National Bank of Egypt is its President, and its governing body sits at Cairo. The current coin of Abyssinia is the Maria Theresa dollar, but a new coinage (coined at Paris) has been put in circulation, with the Menelik dollar for the standard coin. This new coin, the *talari*, or dollar, worth about 2*s.*, weighs 28·075 grammes, .835 fine. It has nominally the same value as the Maria Theresa dollar, but in the capital is disliked, and in some places is not taken at all. The Bank of Abyssinia has introduced a large stock of Menelik piastres (16 to the dollar). Other silver coins are the half, quarter, and sixteenth (*guerche* or *piastre*) of a *talari*. Copper coins are the *besa* (= one-hundredth of a dollar) and the half and quarter *guerche* found only at Harar. Various articles, however, are used as medium of exchange; bars of salt are regularly accepted as money all over the country, in two sizes, and at a fluctuating rate according to supply and cost of transport. Cartridges are also currency, although there is a dead-letter edict against them; and in most places barter prevails.

The Abyssinian *ounce* weighs about 430 grains (the weight of the Maria Theresa dollar); a *pound of ivory* contains 12 ounces; of *coffee*, 18 ounces; the Abyssinian *ferasla* contains 37½ lbs. av., or 50 lbs. Abyssinian (ivory). Grain measures are the *kunna*, about ½ bushel (the measure varies in different localities); and the *dawla*, 2½ bushels. The *mètre* is largely used at Harar; native measures are the *sínzer*, 9 inches, and the *kend* (cubit), 20 inches. A *kalad* contains in some places 60 acres, in others 96.

*Envoy Extraordinary, Minister Plenipotentiary and Consul-General.*—Capt. the Hon. W. G. Thesiger, D.S.O.

*British Consul at Adis Ababa.*—Gerald Campbell.

There is a consul also at Harrar, Gondar, Gore, and Mega.

## AFGHÁNISTÁN.

AFGHÁNISTÁN is a country of Asia lying between parallels 29° and 38° 20' of north latitude, and 61° and 72° of east longitude, with a long narrow strip extending to 75° east longitude (Wákhán). On the north-east, the boundary follows a line running generally westward from a fixed point near one of the peaks of the Sarikol Range to Lake Victoria, thence along the line of that branch of the Oxus which issues from the lake, and so, following the course of the Oxus, to Khamiáb. From Khamiáb, the line runs in a south-westerly direction to Zulfikár, on the river Hari-Rúd, and thence by Kál-i-Kalla to Hashádan, thence to the south, between Hashádan and Siah Koh, north of Bandan, the boundary is undefined. The Sistam lake and the Helmund river form the boundary between Siah Koh and Band-i-Seistan, and thence the boundary runs south in a straight line to Koh-i-Malik Siah, where the frontiers of Persia, Afghánistán and Baluchistan meet. Here the boundary turns round and runs generally eastwardly to the Khwája Amran range. The eastern and southern boundaries of Afghánistán long remained uncertain, but the basis of a delimitation was settled, in 1893, at a conference between the late Amír, Abdur Rahmán and Sir Mortimer Durand, and the boundary agreed upon, with the exception of the Khair-Asmar section, has since been demarcated. The Amír agreed that Chitral, Bajaur and Swát should be included within the British sphere of political influence, while he himself was to retain Asmar and the Kumar valley above it, as far as Arnawai; also the tract of Birmal, west of Waziristán. In the subsequent demarcation, Káfiristán was included within the countries, under Afghán control, and is garrisoned by the Amír's troops. The Amír has withdrawn his pretensions over Waziristán. Between March, 1903, and May, 1905, the boundary towards Persia was demarcated from Koh-i-Malik Siah to the Helmund, and thence to Siah Koh. In July, 1905, Sir Henry McMahon announced his award concerning disputed water rights over the Helmund river, but the award has not yet been ratified by the Persian Government.

**Habibullah Khán**, the reigning Amír, son of Amír Abdur Rahmán Khán, grandson of Amír Afzul Khán, and great-grandson of Amír Dost Mahomad Khán, was born on July 3, 1872, and succeeded on the death of his father, October 3, 1901. The Amír has five sons:—Inayatulla Khán (born Oct. 20, 1888), Hayatulla Khán (born Dec. 29, 1888), Amánulla Khán (born June 1, 1892), Kabirulla Khán (born Oct. 4, 1895), and Asadulla Jan (born May 23, 1910). Brothers of the Amír are:—Nasrulla Khán (born April 7, 1875), Aminulla Khán (born Oct. 12, 1885), Muhammad Umar Khán (born Sept. 16, 1889), Ghulám Ali Khán (born Sept. 3, 1890).

In 1896, the Amír Abdur Rahmán formally assumed the title of Zia-ul-Millat wa ud-din, 'Light of the Nation and Religion.' The present ruler has formally adopted the title of Siraj-ul-Millat wa ud-din, 'Lamp of the Nation and Religion.'

For earlier British relations with Afghánistán, see THE STATESMAN'S YEAR-BOOK for 1916, pp. 662-3.

The government of Afghánistán is monarchical under one hereditary prince, whose power varies with his own character, skill, and fortune. The dominions are politically divided into the four provinces of Kábul, Turkistán, Herat, and Kandahár, Badakhshán being now under Turkistán. Each province is under a *hákím* or governor (called Naib-ul-Hukuma), under whom subordinate officials dispense justice and collect taxes. Spoliation, exaction, and embezzlement are not infrequent.

### Area, Population, Defence.

The extreme breadth of Afghánistán from north to south is about 500 miles; its length from the Herát frontier to the Kháibar Pass, about 600 miles; the area is about 250,000 square miles. The surrounding countries are, on the north, Russian territory and Bokhara, under the influence of Russia; on the west, Persia; on the south, the British Political Agency of Baluchistán and, on the east, the mountain tribes scattered along the north-western frontier of India, and included within the sphere of British influence in the North-Western Frontier Province.

Population about 6,000,000, the dominant race being the Afghans, of whom the leading tribes are the Durrani and the Ghilzáis, who amount to about 1,625,000 souls; then follow other Afghans, and the Tájiks, Hazáras, and Aimáks, and Uzbaks. The languages spoken are Persian and Pushtoo. The only newspaper published in the country is the "Court Gazette" which appears in Kábul, the capital (population about 180,000). Other large towns are Kandahár (population 40,000), and Herát (population 20,000).

Justice in criminal cases is administered by Government officials, in civil cases by a *Kazi*, or judge, who follows the law of the Koran.

The revenue of Afghánistán is subject to considerable fluctuations. The Government share of the produce recoverable is said to vary from one-third to one-tenth, according to the advantages of irrigation. The Amír receives a subsidy from the Indian Government of Rs. 1,850,000 a year, in accordance with the treaty of 1893. His total revenue is estimated at between 12 and 13 million rupees, but this estimate is probably too low.

In addition to his regular army the Amír's military forces are largely supplemented by local levies of horse and foot. The mounted levies are simply the retainers of great chiefs, or of the latter's wealthier vassals. The foot levies are now permanently embodied, and as irregulars form an auxiliary to the regular infantry. The mountain batteries are believed to be serviceable. As engineers, the Hazára 'sappers,' who are regularly enrolled, are excellent workmen. The Afghán army is said to number between 50,000 and 60,000 men, including 16,000 cavalry and 450 guns. The real military strength of Afghánistán lies in the rugged and inhospitable nature of the country, the absence of roads, and in the capacity and aptitude of its inhabitants for guerilla warfare, which have been greatly enhanced of recent years by the wholesale importation of rifles and ammunition from the Gulf.

### Production.

Although the greater part of Afghánistán is more or less mountainous, and a good deal of the country is too dry and rocky for successful cultivation, yet there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables, and cereals. There are four classes of cultivators—1st, proprietors, who cultivate their own land; 2nd, tenants, who hire it for a rent in money or for a fixed proportion of the produce; 3rd, *bazgars*, who are the same as the *métayers* in France; and 4th, hired labourers. There are two harvests in the year in most parts of Afghánistán. One of these is sown in the end of autumn and reaped in summer, and consists of wheat, barley, *Ervum Lens*, and *Cicer arietinum*, with some peas and beans. The other harvest is sown in the end of spring and reaped in autumn. It consists of rice, millet, arzna (*Panicum italicum*), Indian corn, &c. The castor-oil plant, madder, and the assafoetida plant abound. Fruit, viz. the apple, pear, almond, peach, quince, apricot, plum, cherry, pomegranate, grape, fig, mulberry, is produced in profuse abundance.

They form the principal food of a large class of the people throughout the year, both in the fresh and preserved state, and in the latter condition are exported in great quantities.

An extremely curious variety of fat-tailed sheep is native to Afghánistán. It is characterised by the immense weight and size of its tail, caused by development of masses of fat, forming stores of nourishment which are drawn upon during the winter months, when fodder is scarce. These sheep furnish the principal meat diet of the inhabitants, and the grease of the tail is a substitute for butter. The wool and skins not only provide material for warm apparel, but also furnish the country's main article of export.

Northern Afghánistán is reputed to be tolerably rich in copper, and lead is found in many parts. Iron of excellent quality comes from Bajaur (outside Afghánistán), and the Farmúli district (or Birmal), and a gold mine is being worked under the supervision of a British mining expert at Kandahár; gold in small quantities is also brought from the Laghmán Hills and Kunar. Badakshán was famous for its precious stones, especially lapis lazuli.

Silks, felts, carpets, articles from camels' and goats' hair, are some of the principal industries. At Kábul, soap, cloth, boots, and some other articles are manufactured for local consumption, but chiefly for the army. The sheepskin coat, or *postán*, manufacture is one of the important industries. The government factories and workshops at Kábul have as their partial object public education in mechanical methods and appliances, and as a feature of such work classes are organised in different industries.

### Trade.

No accurate registration of the trade of Afghánistán has yet been obtained. The trans-frontier trade between India and Afghánistán (according to Indian statistics) was as follows in five years ending March 31 :—

	1911-12	1912-13	1913-14	1914-15	1915-16
	£	£	£	£	£
Imports into India . . . . .	636,000	847,000	860,000	806,000	1,116,000
Exports into Afghanistan . . . . .	843,500	1,660,000	1,013,000	909,000	1,021,000

Of the exports from India to Afghánistán the chief items are cotton goods, tobacco, indigo and other dyeing materials, sugar, and tea, mostly the China leaf. The imports into India include timber, fruits and vegetables, grain and pulse, ghi and other provisions, assafoetida and other drugs, spices, wool, silk, cattle, hides. Formerly the trade with Afghánistán was subject to many restrictions in the way of heavy duties and monopolies; but with the removal of some of them, the trade with India has expanded of late years, but not to such an extent as seems possible.

The imports from Bokhára are stated to amount to nearly 4,000,000 roubles, and the exports to Bokhára to as much.

The rupee is the usual currency, though Government demands are often paid in kind.

The Amír's mint at Kábul was for some years under the supervision of a European. The current coins in Kabul are Dínár, Paísa, Sháhí, Sannár or Misqáli, 'Abbási, Qarân, Rupee and Tuman. Dínár and Tuman are legendary coins intended for purposes of calculation only. Paísa and Sháhí are copper coins, and Misqáli, 'Abbási, Qarân and Rupee are silver coins.

10 Dínár = 1 Paísa or Taka.  
 5 Paísa = 1 Sháhí.  
 2 Sháhí = 1 Sannár, Saddínár or Misqáli  
 2 Sannár = 1 'Abbási.

1½ 'Abbási = 1 Qarân.  
 2 Qarân = 1 Rupee.  
 20 Rupees = 1 Tuman.

One Afghán rupee is equal to about eightpence at the present rate of exchange between Afghánistán and India.

Afghánistán is not a member of the International Postal Union, so that the sending of letters or parcels to the country is attended with some uncertainty and inconvenience. Letters, etc., from all parts of the world have to be addressed care of the Afghan postmaster, Peshawar, India, who forwards them to their respective destinations in Afghánistán. The amount of the postage for Afghánistán must either be deposited with the Afghan postmaster at Peshawar or else paid for by the recipients in Afghánistán. Letters are despatched by runners twice a week; between Peshawar and Kábul, a distance of about 180 miles, they require three days for delivery. Newspapers, books, and other bulky packages and boxes are detained at the Afghan post office in Peshawar until they can conveniently be sent in batches on horseback.

The trade routes of Afghánistán are as follows:—From Persia by Mashad to Herát; from Bokhára by Merv to Herát; from Bokhára by Karshi, Balkh, and Khulm to Kábul; from East Turkistán by Badakhshan and Kandahár to Kábul; from India by the Khaibar road to Kábul; from India by the Gomál Pass to Ghazni and Kelat-i-Ghilzai; from Chaman, the terminus of the North-Western Railway beyond Quetta, to Kandahár and thence to Kábul or Herát.

The Khaibar and Bolan roads are fit for light wheeled traffic as far as Kábul and Kandahár respectively. There is no wheeled carriage, except artillery, proper to the country, and merchandise is still transported on camel or pony back. There are practically no navigable rivers in Afghánistán, and timber is the only article of commerce conveyed by water, floated down stream in rafts. Telephonic communication exists between Jalálábád and Kábul, a distance of 100 miles, and it is being extended to Kandahár.

## ALBANIA.

(SKYPANIE.)

THE geographical district known as Albania was made up of the Turkish Provinces of Scutari and of Yanina, and of the parts of the Ottoman vilayets of Kossovo and Monastir, which bordered upon those Provinces. The Albanians are divided into two principal groups—the Ghegs, who live in the north, and the Tosks, who live in the south.

Little is known of their early history. From 1431, when the Turks captured Yanina, the Albanians remained under Turkish rule, except for two brief periods of independence, first between 1443 and 1477, under the Gheg Chieftain George Castriot, and again in the eighteenth century, under the Tosk, Ali of Tepedelen. In 1880 the short-lived Albanian League was founded, making an unsuccessful effort to obtain independence.

The Albanians have an hereditary aristocracy, and a more or less well-defined feudal system. Whilst in the north they are divided into clans or tribes, in the south the people look for guidance to a system of beys or chiefs, whose power is very considerable. The Albanian language is held by most authorities to be of Aryan origin. The dialects employed in the north and in the south are somewhat different.

The independence of Albania was proclaimed at Valona on November 28, 1912, and a Provisional Government was then formed under the leadership of Ismail Kemal Bey. On December 20, 1912, the London Ambassadorial Conference agreed to the principle of Albanian autonomy. Subsequently that Conference approximately decided the frontiers of the new country, and agreed that a European Prince be nominated to rule it. Prince William of Wied, having accepted the crown of the new country from an Albanian deputation, which offered it to him at Neuwied, on February 21, 1914, arrived at Durazzo on March 7, 1914.

The Government of the country was vested in the hands of the Prince, supported and advised by an International Commission of Control, the creation of which was agreed to by the Ambassadorial Conference in July, 1913.

After the outbreak of the European war in the latter days of July, 1914, the Prince and nearly all the members of the International Commission left Albania, which fell again into a state of anarchy. An attempt was made by Essad Pasha Topdani, who had been expelled from the country in May but who returned in September, after the departure of the Prince of Wied, to establish a military government with its seat at Durazzo, but the effort failed (October 5, 1914). Disorder continued, and eventually the Austrians overran Albania, capturing San Giovanni di Medici on January 25, 1916, and Durazzo on February 28, 1916.

**Area and Population.**—The frontiers of Albania, which were all provisional, were shown in the map of the Balkan Peninsula which accompanied THE STATESMAN'S YEAR BOOK for 1914. The estimated probable area of the country is between 10,500 and 11,500 square miles, and the population between 800,000 and 850,000 souls. The principal towns, with estimated population, are as follows:—Durazzo, the provisional capital, 5,000; Scutari, 32,000; Elbasan, 13,000; Tirana, 12,000; Agyrocastro, 12,000; Berat, 8,500; Korytza, 8,000; Valona, 6,500.

**Religion and Instruction.**—About two-thirds of the Albanians are Moslems. Of the remaining one-third the Christians in the north are for the most part Roman Catholics, and the Christians in the south are members of the Orthodox (Greek) Church. Whilst large numbers of the Mohammedans belong to the Bektashi sect, in many districts both Christian and Moslem worship may be found.

Under Turkish rule little was done for education. The only school which maintained its existence without ever being actually closed was that founded at Korytza in the year 1891, for the education of girls, by two Albanians, who worked in the interests of Protestantism and of the Albanian nationality. Mention should also be made of the Roman Catholic schools, opened in the north by the Jesuits, and the Orthodox schools, which existed in the south, and which were opened as a result of the ancient privileges possessed by the Patriarchate.

**Justice.**—The Albanians have a strict code of honour, but in the past no universal system of Justice has been in force. Whilst the South has been more or less ruled by the Ottoman code of law, the districts of the North have practically managed their own affairs according to their own ideas.

**Production and Industry.**—Great tracts of the country remain uncultivated, and the areas at present under cultivation are dealt with in such a primitive way that much will have to be done to improve and change the agricultural system of the country. There are few carriage roads, and no railways in the country; the few bridges are so unsafe that the rivers must be forded or crossed in primitive ferries.

## ARGENTINE REPUBLIC.

(REPÚBLICA ARGENTINA.)

### Constitution and Government.

ARGENTINA was discovered in 1508 by Juan Díaz de Solís and Vicente Yanez Pinzon. In 1535 Don Pedro de Mendoza was sent out by the King of Spain, and in that same year founded the town of Buenos Aires. On May 25, 1810, the population rose against the Spanish rule, and on July 9, 1816, Argentine independence was proclaimed. Between 1816 and 1852 was a period of anarchy, and in 1853 stable government was once more established.

The Constitution of the Argentine Republic bears date May 15, 1853, with modifications in 1866 and 1898. The executive power is left to a President, elected for six years by electors appointed by the fourteen provinces, equal to double the number of senators and deputies combined; while the legislative authority is vested in a National Congress, consisting of a Senate and a House of Deputies, the former numbering 30, two from the capital and from each province, elected by a special body of electors in the capital, and by the legislatures in the provinces; and the latter 120 members elected by the people. By the Constitution there should be one deputy for every 33,000 inhabitants. A deputy must be 25 years of age, and have been a citizen for four years. The deputies are elected for four years, but one-half of the House must retire every two years. Senators must be 30 years of age, have been citizens for six years. One-third of the Senate is renewed every three years. The two chambers meet annually from May 1 to September 30. The members of both the Senate and the House of Deputies each receive 18,000 pesos per annum. A Vice-President, elected in the same manner and at the same time as the President, fills the office of Chairman of the Senate, but has otherwise no political power. The President is commander-in-chief of the troops, and appoints to all civil, military, and judicial offices, and has the right of presentation to bishoprics; he is responsible with the Ministry for the acts of the executive; both President and Vice-President must be Roman Catholics, Argentine by birth, and cannot be re-elected.

*President of the Republic.*—Señor Hipólito Yrigoyen. Elected June 12, 1916.

*Vice-President.*—Señor Dr. Pelagio Luna.

The Ministry, appointed by and acting under the orders of the President, consists of eight Secretaries of State—namely, of the Interior, Foreign Affairs, Finance, War, Justice and Public Instruction, Agriculture, Marine, and Public Works.

The President has a salary of 96,000 dollars paper, and 28,800 dollars paper for official expenses; the Vice-President 36,000 dollars paper as his salary, and 24,000 dollars for official expenses, and each of the eight ministers 40,800 dollars per annum.

### LOCAL GOVERNMENT.

The Constitution, with certain small exceptions, is identical with that of the United States. Such matters as affect the Republic as a whole are under the superintendence of the Central Government. The Republic is divided into 14 provinces, 10 territories and 1 federal district (Buenos Aires). The governors of the various provinces are invested with very extensive powers, and in their constitutional functions are independent of the central executive. They are elected by the people of each province for a term varying between three and four years. The provinces elect their own legislatures, and have complete control over their own affairs. The territories

are under the supervision of governors appointed by the President. In Buenos Aires municipal government is exercised by a Mayor appointed by the President with the approval of the Senate. He is assisted by a deliberative council elected by tax-paying inhabitants of the various city parishes. This body votes on measures relating to city finance, works, and general administration, and its decisions are carried out by the executive. Other municipalities have constitutions of a similar nature.

### Area and Population.

The Argentine Republic consists of fourteen provinces, ten territories and one federal district, containing the land area and population shown below :—

Federal District, Provinces and Territories	Area : Engl. sq. miles	Population Census 1895	Population Census 1914	Pop. per sq. mile 1914
<i>Federal District.</i>				
Buenos Aires . . . . .	72	663,854	1,575,814	21,886·30
Martin Garcia Island . . . . .	—	—	783	—

Chaco . . . . .	52,741	10,422	46,274	0·87
Pampa Central . . . . .	56,320	25,914	101,338	1·79
Neuquén . . . . .	40,530	14,517	28,866	0·71
Río Negro . . . . .	79,805	9,241	42,242	0·52
Chubut . . . . .	93,427	3,748	23,065	0·24
Santa Cruz . . . . .	109,142	1,058	9,948	0·09
Tierra del Fuego . . . . .	8,299	477	2,504	0·30
Los Andes . . . . .	34,740	—	2,487	0·07
Total . . . . .	1,153,119	3,954,911	7,885,237	6·83

Of the total in 1914, 4,227,023 were males and 3,658,214 females.

The movement of population for four years is given as follows :—

	Marriages	Births	Deaths	Immigrants	Emigrants
1911 . . . . .	48,224	263,317	125,327	225,772	120,709
1912 . . . . .	51,582	272,071	120,480	323,403	120,260
1913 . . . . .	53,566	286,181	122,109	302,047	156,829
1914 . . . . .	—	—	—	115,321	178,634

In the years 1857-1915 the number of immigrants by sea was 4,709,092, comprising 2,295,019 Italians, 1,497,854 Spaniards, 215,479 French, 161,422 Russians, 136,451 Turks and Syrians, 87,264 Austrians, 62,331 Germans, 55,789 Britons, 33,340 Swiss, 27,211 Portuguese, 12,566 Greeks, 8,922 Danes, 7,692 Dutch, 6,669 North Americans. By the Constitution of the Republic, all children of foreigners born in the country are Argentine.

Population of the capital, Buenos Aires, on June 1, 1914 (census), was 1,575,814 (on September 30, 1916, it was estimated at 1,596,927); Rosario (Santa Fé), 222,592; Córdoba, 134,935; La Plata, 119,227; Avellaneda, 105,527; Tucumán, 100,080; Bahía Blanca, 62,191; Santa Fé, 59,574; Mendoza, 58,790; Paraná, 36,039; Salta, 33,636; Lomas de Zamora, 30,296; Río Cuarto, 29,574; Corrientes, 28,681; Quilmes, 28,531; Concordia, 26,780; Mar del Plata, 25,090; Santiago del Estero, 23,179; Chivilcoy, 23,230; Resistencia, 23,096; Mercedes (San Luis), 22,782; Tandil, 21,860; Junín, 21,253; Beil-Ville, 21,078; Gualeguaychú, 20,880; Pergamino, 20,249.

### Religion and Instruction.

There is no State religion, though the Roman Catholic religion is supported by the State; all other creeds are tolerated and freedom of conscience prevails. There are 1 archbishop (Buenos Aires) and 8 suffragan bishops. For the clergy there are 5 seminaries. In 1884 civil marriage was established in the Republic.

Primary education is free (subsidised by the General and Provincial Governments), secular and compulsory for children from 6 to 14 years of age. Population of school age (1913), 1,275,123, of whom 804,123 attended school. Of the total population over 6 years of age, 50·5 per cent. were illiterate. There were (1913) 7,247 primary schools, 5,894 being public, and 1,353 private, with 746,725 pupils and 22,964 teachers. The secondary or preparatory education is controlled by the general Government, which maintains 30 national colleges with 8,788 pupils and 1,050 teachers. Side by side with the Government colleges there are also 38 private institutions of the same grade, with 3,200 pupils and 398 teachers. There are 67 normal schools with 6,574 pupils and 2,248 teachers. Thirty-four schools for special instruction (commercial, industrial, artistic, also for the blind, &c.) with 6,550 pupils and 720 teachers. There are national universities at Córdoba (founded 1613), with 584 students in 1915, Buenos Aires (founded 1821), with 4,364 students, and La Plata (founded 1905), with 2,184 students, and provincial universities at Santa Fé, Tucumán (founded 1912), and Paraná. There is a well-equipped national observatory at Córdoba, and another at La Plata, museums at Buenos Aires and La Plata, and a national meteorological bureau at Buenos Aires.

For 1916 the Government budgeted for education 24,300,840 dollars on primary education; 5,136,720 dollars on secondary; 5,140,266 dollars on technical and commercial education; 10,244,064 dollars on normal schools, and 6,566,940 dollars on university education; total, 51,388,830 dollars (4,522,217l.).

In Argentina there are 795 newspapers published, 724 in Spanish, 16 in Italian, 6 in German, 9 in English, and others in Scandinavian, French, Basque, Russian.

### Justice.

Justice is administered by Federal and by Provincial Courts. The former deal only with cases of a national character, or in which different

provinces or inhabitants of different provinces are parties. The Federal Courts are the Supreme Courts, with 5 judges at Buenos Aires; 4 Appeal Courts, each with 3 judges, at Buenos Aires, La Plata, Paraná, and Cordoba, and courts of first instance in each of the provinces and territories. Each province has its own judicial system, with a Supreme Court (generally so-called) and several minor courts. Trial by jury is established by the Constitution for criminal cases, but never practised.

Finance.<sup>1</sup>

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1912	36,230,297	31,116,874	1915	46,871,521	47,631,152

Land Tax . . . . .	17,100,000	Agriculture . . . . .	11,462,098
Port Dues . . . . .	14,732,000	Public Works . . . . .	7,350,804
Miscellaneous . . . . .	72,044,500	Pensions, &c. . . . .	14,250,005
		Customs Police . . . . .	3,500,000
Total ordinary . . . . .	322,554,626	Total ordinary . . . . .	307,142,079
Extraordinary :—		Extraordinary :—	
Proceeds of Irrigation Fund . . . . .	44,518,993	Public Works . . . . .	33,538,254
Miscellaneous . . . . .	26,156,945	Subsidies . . . . .	12,250,538
Total extraordinary . . . . .	70,675,938	Total extraordinary . . . . .	45,788,792
Grand total . . . . .	393,230,564 (35,748,233l.)	Grand total . . . . .	352,930,871 (30,823,656l.)

The consolidated debt (external and internal) at the end of 1915 was as follows :—463,146,560 dollars, gold (92,629,312l.), and 169,173,340 dollars, paper (14,887,253l.).

## Defence.

## ARMY.

The army of the Argentine Republic is a National Militia, service in which is now compulsory for all citizens from their 20th to their 45th year. For the first 10 years the men belong to the 'active' army, or first line. After completing 10 years in the first line, the men pass to the National Guard and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard. The period of continuous service, or training in the ranks, is for the greater proportion of the annual contingent only 3 months; the remainder serve for 1 year. The reservists can be called out for training periodically.

The territory of the Republic is divided into 5 military districts, each of which provides on mobilisation a complete division of the first line, and also a reserve division, irrespective of the National Guard and Territorial troops. The strength of the 'active' divisions will be about 12,000 men each. The 'active' army comprises 20 infantry regiments of 2 battalions of 2 companies, 9 cavalry regiments of 4 squadrons, 5 field artillery regiments of 2 sections of 2 batteries, 1 field howitzer regiment of 3 batteries, 2 mountain artillery groups of 3 batteries each, 1 infantry company on a war footing, 1 battery of horse artillery, 1 battery of siege artillery, 1 machine-gun battery, 5 engineer battalions, and 1 railway battalion of 2 companies.

The total peace establishment of the army is about 24,000 officers and men. There is a reserve numbering 174,000.

The weapon of the Argentine infantry is at present the Mauser magazine rifle. The cavalry have a carbine of the same system. The artillery are armed with a Krupp 7.5 cm. gun.

Military budget for the year 1916 was 2,275,923*l*.

There are also 2 armoured gunboats, 2 torpedo gunboats, 11 destroyers, 8 torpedo boats, and some training and miscellaneous craft. Four powerful

destroyers which were building for Argentina in Germany were taken over at the outbreak of war.

Naval budget, 1916, 1,932,061*l*.

The personnel of the navy includes 316 executive and 97 engineer officers, and 23 electrical engineers. The total personnel varies from 5,000 to 6,000 men (these numbers include about 4,500 conscripts), who have to serve two years. There is a corps of coast artillery of 450 men, a naval school, a school of mechanics, a school for artillery, and a school for torpedo practice.

### Production and Industry.

Argentina has an area of about 728,680,000 acres, of which about 253,195,000 acres may be used for agricultural or cattle industries, the remainder being mountain, lake, river, or arid regions. Of the cultivable portion, about 10,000,000 acres require irrigation. In the territories the Federal Government has wide tracts of land amounting to 237,768,000 acres suitable in general for pastoral colonisation, and these lands are conditionally offered free, or for sale or on lease. In 1915 nearly 35,230 square miles were offered for sale.

The Argentine census of June 1, 1914, showed 1,074,964 real-estate owners in the Republic, classified as follows:—Argentini<sup>ans</sup>, 673,409; Italians, 203,500; Spaniards, 104,339; French, 22,105; Uruguayans, 13,973; Russians, 9,687; Austrians, 8,666; Ottomans, 7,709; Swiss, 4,730; Germans, 4,711; English, 4,344; others, 17,791.

The total area under cultivation in 1914 was 60,829,305 acres in the following proportion: cereals, 45·03 per cent.; industrial plants (hemp, cotton, jute, sugar, tobacco, etc.) 9·22 per cent.; trees and vegetables, 4·48 per cent. and forage, 41·27 per cent. The area and produce of principal crops are shown as follows:—

	Acreage			Produce (Tons)		
	1914-15	1915-16	1916-17	1914-15	1915-16	1916-17
Wheat.	15,464,670	16,413,150	16,088,963	4,780,000	4,698,000	2,106,000
Oats .	2,867,670	2,563,860	2,525,402	1,287,000	1,093,000	488,000
Maize .	10,381,000	9,929,000	8,966,000	8,592,000	4,093,000	1,494,000
Flax .	4,255,810	2,379,930	3,207,411	1,200,000	998,000	134,000

From January 1 to December 31, 1916, the quantities of cereals exported were as follows:—Wheat, 2,273,205 tons; flax, 638,654 tons; oats, 784,734 tons; maize, 2,864,209 tons. Cotton, sugar, wine, and tobacco are grown. The sugar industry is making great progress. In 1914 the total area under cane was 269,230 acres producing 3,653,331 metric tons of cane. The quantity of sugar manufactured was 84,069 metric tons in 1916, and 151,382 metric tons in 1915. In 1915 there were 127,422,000 gallons of wine produced in Argentina (135,896,000 gallons in 1914).

In 1915 the number of animals within the Republic was estimated at: cattle, 30,796,447; horses, 9,366,455; mules, 533,965; asses, 345,181; sheep, 81,485,149; goats, 4,563,808; pigs, 3,197,337. Buenos Aires contains over 70 per cent. of the sheep within the Republic. Many pedigree cattle and sheep are constantly being imported from Great Britain.

In the provinces of Buenos Aires, Santa Fé, and Entre Ríos, agricultural lands to the extent of 463,000 acres have been acquired by the Jewish Colonisation Association. Of this land 158,000 acres are under cultivation.

In 1914 (the last industrial census) there were 35,093 factories in Argentina, employing a total of 383,706 persons. The total capital was 105,187,596*l*.

Mining is of no great importance. Gold, silver, and copper are worked in Catamarca, and gold and copper in San Juan and La Rioja. There are no Government statistics as to mineral output.

### Commerce, Shipping.

The 'most favoured nation' treaty of 1825 with Great Britain respecting commerce, and that of 1853 respecting river navigation, are in force. All export duties are abolished from January 1, 1906.

The staple Argentine imports into the United Kingdom and the chief exports of British produce and manufactures to Argentina (Board of Trade Returns) in two years were as follows:—

Imports into U.K.	1914	1915	Exports from U.K.	1914	1915
	£	£		£	£
Wheat . . . . .	2,581,389	8,600,500	Cottons . . . . .	1,388,911	2,247,178

Oats . . . . .	1,174,415	2,964,497	Jute manuf. . . . .	193,795	321,610

Total trade between Argentina and the United Kingdom for 5 years:—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Argentina into U.K.	40,897,685	42,485,391	37,219,290	63,876,814	51,591,959
Exports to Argentina from U.K.	20,549,853	22,640,921	14,578,341	11,516,158	13,953,156

### Shipping and Navigation.

In 1916 the registered shipping consisted of 238 steamers over 100 tons, of 181,929 tons,

In 1915 the number of ocean-going vessels which entered the ports of Argentina was 54,514 with an aggregate tonnage of 22,102,030 tons, and those that cleared 53,894 with an aggregate tonnage of 21,554,307 tons.

### Internal Communications.

Railways open, June 30, 1916, 22,688 miles, of which 4,136 miles belong to the State. The capital in January, 1915, was 247,344,584*l.*; receipts in 1915, 22,948,527*l.*; expenses, 15,766,348*l.*; passengers, 75,007,232.

The Post Offices, which numbered 3,431 at the end of 1915, dealt with 933,614,722 pieces of mail matter; there were 3,365 post offices in 1914-15. The revenue of the Postal Department was 993,582*l.* for 1914-15. National telegraph lines, 23,978 miles in 1915, provincial railway and private lines bringing the total up to 43,153 miles with 131,586 miles of wire. Number of telegrams despatched (1914-15) 14,707,322.

There are 12 stations for wireless telegraphy. All ships with a crew of over 50 and touching at Argentine ports are compelled by law to be equipped with wireless telegraph.

In 1912 a bill was passed for the canalization of the Upper Uruguay; the work will be carried out by Argentina in conjunction with Brazil and Uruguay. A ferry-boat service has also been established between Paraguay and Argentina at Posadas and Encarnacion.

### Money and Credit.

The 'Banco de la Nacion Argentina,' which was established in 1891 with a capital of 4,400,000*l.*, and which now has a capital of 11,000,000*l.*, has a limited authority to lend money to the National Government, the loans to which must not exceed 20 per cent. of its capital. According to the latest census (1915) there are 143 banks within the Republic, 118 Argentine and 25 foreign. The realised capital of these 143 banks on June 30, 1913,

totalled 532,924,000 dollars, of which 38·44 per cent. was in bonds, and 61·56 per cent. in cash. The bonds and 80,971,000 dollars in cash were held by the State banks. The authorised capital of private banks was 413,110,500 dollars, subscribed to 319,218,500 dollars, and the total realised was 247,121,500 dollars. Bank reserves on June 30, 1913, were 229,524,500 dollars, with a total in circulation of notes, nickel, and copper coins of 381,601,500 dollars. The difference between the two gives 152,077,000 dollars, or approximately 40 per cent. in the hands of the public. Deposits in paper and gold totalled 781,490,000 dollars.

In 1899 a conversion law was approved by Congress fixing the value of the paper dollar at 44 cents gold. On February 24, 1916, the gold held by the Bank of the Argentine nation and the Conversion Office amounted to 245,106,497 dollars. On February 17, 1917, the Conversion Office, the Bank of the Argentine Nation, and the Argentine Legations abroad held gold to the value of 261,585,437 pesos.

On April 5, 1915, a national postal savings bank (*Caja Nacional de Ahorro Postal*) was incorporated. On April 5, 1916, it had 91,909 depositors with total deposits amounting to 1,755,931 dollars.

### Money, Weights, and Measures.

The silver *Peso nacional* or dollar of 100 *centavos* is of the value of 4s. a par. The 5-dollar gold piece (the *Argentino*) weighs 8·0645 grammes ·900 fine, and therefore contains 7·25805 grammes of fine gold. One pound sterling = 5·04 gold dollars.

The silver dollar (like the French 5-franc piece) weighs 25 grammes ·900 fine, and thus contains 22·5 grammes of fine silver. There are 50, 20, and 10-centavo silver coins, and both nickel and copper fractional money.

Professedly the standard of value is gold. The money in circulation is chiefly paper. The paper dollar, being convertible at ·44 gold dollar, is worth 1s. 8½d. (11·45 to the £).

Since January 1, 1887, the use of the French metric system is compulsory

### Diplomatic Representatives.

#### 1. OF THE ARGENTINE REPUBLIC IN GREAT BRITAIN.

*Envoy Extraordinary and Minister Plenipotentiary*.—Vacant.

*First Secretaries*.—Jacinto L. Villegas and Luis H. Domínguez.

*Attaché*.—Carlos M. Domínguez.

*Military Attaché*.—Lieut.-Colonel Enrique Peme.

*Naval Attaché*.—Captain Julian Irizar.

*Consul-General in London*.—Sergio García Uriburu.

There are Consular representatives at Belfast, Cardiff, Dublin, Dundee, Edinburgh, Glasgow, Hull, Liverpool, Manchester, Newcastle, Newport, Southampton, Swansea.

#### 2. OF GREAT BRITAIN IN THE ARGENTINE REPUBLIC.

*Envoy and Minister*.—Sir Reginald T. Tower, K.C.M.G., C.V.O.

*Secretary*.—E. Millington-Drake.

*Naval Attaché*.—Capt. E. L. D. Boyle, R.N.

*Commercial Attaché*.—Harry O. Chalkley.

*Consul*.—H. G. Mackie.

There is a Consul at Rosario, and Vice-Consuls at Bahía Blanca, La Plata, Tucumán, Santa Fé, and Villa Constitución.

## AUSTRIA-HUNGARY.

(ÖSTERREICHISCH-UNGARISCHE MONARCHIE.)

### Reigning Sovereign.

**Karl I.** (IV. in Hungary), Emperor of Austria and King of Hungary; grandson of the late Archduke Karl Ludwig and Princess Annunciata, daughter of the late King Ferdinando II. of Naples, and son of the Archduke Otto Franz Joseph; born August 17, 1887; succeeded his great-uncle, Franz Josef I., on November 21, 1916; crowned King of Hungary, and took the oath on the Hungarian Constitution, December 30, 1916; married October 21, 1911, to *Zita*, Princess of Bourbon and Parma, born May 9, 1892. Offspring (1) Archduke Franz Josef Otto, born November 20, 1912 (crown prince); (2) Archduchess Adelheid, born January 3, 1914; (3) Archduke Robert Karl Ludwig, born February 9, 1915; and (4) Archduke Felix Friedrich August, born May 31, 1916.

*Children and Grandchildren of the late Archduke Karl-Ludwig, the Emperor-King's Grandfather.*

I. Franz Ferdinand, born December 18, 1863; murdered at Sarajevo, June 28, 1914. II. Otto Franz Joseph, born April 21, 1865; married October 2, 1886, to Maria, Princess of Saxony; died November 1, 1906. Offspring (1) the Emperor Karl and (2) Maximilian Eugen Ludwig, born April 13, 1895. III. Maria Annunciata, born July 31, 1876; installed abbess at Prague, October 19, 1895. IV. Elisabeth, born July 7, 1878; married April 20, 1903, to Prince Alois of Liechtenstein.

The imperial and royal family descends from Rudolf of Habsburg, a German Count, born 1218, who was elected King of the Romans in 1273. In 1282 he bestowed the Duchy of Austria upon his son Albrecht, afterwards Roman Emperor. The male line died out in 1740 with Emperor Karl VI. (III. in Hungary), whose only daughter, Maria Theresa, gave her hand (1736) to Duke Franz of Lorraine and Tuscany, afterwards Kaiser Franz I. of the House of Lorraine, who thereby became the founder of the new line of Habsburg-Lorraine. Maria Theresa was succeeded, in 1780, by her son Joseph II., who, dying in 1790, was succeeded by his brother Leopold II., at whose death, in 1792, his son Franz II. (I. in Hungary) ascended the Imperial throne. He reigned till 1835, and, having been married four times, left a large family, whose descendants form the present Imperial House. Franz was the first sovereign who assumed the title of Emperor, or 'Kaiser,' of Austria, on being compelled by Napoleon, in 1806, to renounce the imperial crown of Rome, for more than three centuries practically in the Habsburg family. For about two years, however, he had already coupled with his title of Emperor of the Romans that of Hereditary Emperor of Austria. Franz I., as he now called himself, was succeeded by his son, Emperor Ferdinand I. (V. as King of Hungary), on whose abdication, Dec. 2, 1848, the crown fell to his nephew, Franz Josef I. whose reign lasted for sixty-eight years, and who was succeeded by his great-nephew, the present Emperor-King.

The present Emperor-King has a civil list of 22,600,000 crowns: one moiety of this sum, 11,300,000 crowns, is paid to him as Emperor of Austria, out of the revenues of Austria, and the other moiety as King of Hungary, out of the revenues of Hungary.

The following is a list of the Habsburg rulers of Austria (Dukes and from 1453 Archdukes of Austria, from 1526 also Kings of Hungary and Bohemia, from 1804 Emperors of Austria).

*House of Habsburg.*

Albrecht I. . . . .	1282	Maximilian II. . . . .	1564
*Rudolf II. . . . .	1282	Rudolf V. (II. as Emperor) . . . . .	1576
Rudolf III. . . . .	1293	Matthias . . . . .	1611
Friedrich (III. as rival Imperial claimant) . . . . .	1307	Ferdinand II. . . . .	1619
*Leopold I. . . . .	1314	Ferdinand III. . . . .	1637
*Albrecht II. . . . .	1314	Leopold I. . . . .	1658
*Rudolf IV. . . . .	1358	Joseph I. . . . .	1705
*Albrecht III. . . . .	1365	Karl II. (VI. as Emperor, III. of Hungary) . . . . .	1711
*Albrecht IV. . . . .	1395	*Maria Theresa . . . . .	1740
Albrecht V. (II. as Emperor, King of Hungary and Bohemia). . . . .	1404		
*Ladislaus (King of Hungary and Bohemia) . . . . .	1439	<i>House of Habsburg-Lorraine.</i>	
Friedrich V. (III. as Emperor) . . . . .	1457	Joseph II. . . . .	1780
Maximilian I. . . . .	1493	Leopold II. . . . .	1790
Karl I. (V. as Emperor) . . . . .	1519	Franz I. (II. as Emperor) . . . . .	1792
Ferdinand I. . . . .	1520	*Ferdinand I. (V. of Hungary) . . . . .	1835
		*Franz Josef I. . . . .	1848
		*Karl I. (IV. of Hungary) . . . . .	1916

All except those marked with an asterisk likewise filled the throne of the Holy Roman Empire.

### Political Relations between Austria and Hungary.

Austria and Hungary or, as in international relations they are officially called, the Austro-Hungarian monarchy, consists of two States, the Austrian Empire and the Hungarian Kingdom. The relation between the two States in its present form was fully regulated by the so-called Compromise (*Ausgleich*, *Kiegyezés*) of December 21, 1867. According to this agreement the two States are perfectly independent of each other, possessing each its own constitution, its legislative power and its executive departments for most branches of State affairs. There is, however, a close political connection between them through the identity of the Sovereign and the community of certain departments of State affairs.

The common head of the monarchy is the Emperor (Kaiser) of Austria and Apostolic King (Apostoli Király) of Hungary. The crown is hereditary in the Habsburg-Lorraine dynasty, passing by right of primogeniture and lineal succession to males and (on failure of males) to females (the so-called "successio mixta"). The monarch must be a member of the Roman Catholic Church. He is styled 'His Imperial and Apostolic Royal Majesty,' being 'Emperor of Austria, King of Bohemia, &c., and Apostolic King of Hungary.'

Affairs common to the two States are:—(1) Foreign affairs; (2) military and naval affairs, and (3) finance relating to common affairs. The two States administer these matters by common institutions and common ministries. The conduct of all diplomatic affairs and the diplomatic representation of the two States abroad are common to both. The greater part of the armed force and the entire navy are common, but the Austrian *Landwehr* and Austrian Levy-in-mass and the Hungarian *Honvédség* and the Hungarian Levy-in-mass, although standing in organic connection with the common army, are special institutions administered by a particular ministry of each State. The financial business is in so far common, as the costs and expenses are common, which are applied for the common institutions and their conduct; but each State provides separately for the assessment, collection, and transmission of its contribution.

Legislative power relating to common affairs (including the voting of money for common purposes) is exercised by the Parliaments of both States, but the duty of examining the requirements of the common services and advising what amount of money should be voted for each belongs to the so-called Delegations. Of these there are two, each consisting of 60 members, of whom 20 are chosen from each of the Upper Houses (the Austrian Herrenhaus and the Hungarian Főrendiház) and 40 from each of the Lower Houses (the Austrian Abgeordnetenhaus and the Hungarian Képviselőház). The members are appointed for one year. The Delegations are summoned annually by the Emperor and King, alternately at Vienna and Budapest. They deliberate independently of each other, their decisions being communicated reciprocally in writing; and if, after three such interchanges, they do not agree, then all the delegates (or an equal number of members from each Delegation) meet together, and, without discussion, settle the matter by vote.

Besides the political connection between Austria and Hungary, which is of a permanent character, there is a commercial union which is not permanent, but renewable at intervals of ten years. Under this arrangement the two States form practically one customs and commercial territory with the same coinage, weights and measures, a joint bank of issue and the same commercial (consular) representation abroad, while the monopolies and taxes connected with industrial production (salt, tobacco, spirits, beer, sugar and mineral oil) are administered on identical principles in both countries. This customs and commercial union, begun in 1867, was renewed in 1878, 1887, 1907 (December 30), and 1917 (February). In 1897 no agreement was attained; in fact, however, the commercial union was kept in vigour (maintained also legally by Hungary, by Law XXX., 1899) on the condition of reciprocity. The present agreement is for twenty years.

The three ministries or executive departments for common affairs are:—

1. The Common Ministry of Foreign Affairs and of the Imperial and Royal House.—Count Ottokar Czernin. Appointed December 22, 1916.

2. The Common Ministry of War.—General Rudolf Stöger-Steiner von Styrnstätten. Appointed April 13, 1917.

3. The Common Ministry of Finance.—Baron Stephan Burian, Privy Councillor. Born January 16, 1851. Appointed December 22, 1916.

To these departments must be added:—

The Common Court of Public Accounts.—Dr. Ernst Baron Plener, Privy Councillor, born October 18, 1841. Appointed July 10, 1895.

The Ministers are responsible for the discharge of their official functions to the Delegations.

An estimate of the different ethnical elements in the Dual Monarchy, based on the census of 1910, shows their distribution as follows:—

—	Number	—	Number
Germans . . . . .	11,987,701	Servians . . . . .	3,722,967
Magyars . . . . .	10,061,549	Rumanians . . . . .	3,224,147
Czechs . . . . .	8,403,953	Jews . . . . .	2,246,458
Poles . . . . .	4,967,984	Slovenes . . . . .	1,252,940
Ruthenians . . . . .	3,991,711	Italians . . . . .	768,422

## Common Finance.

The cost of the administration of common affairs is borne by both States in a proportion agreed on by the Reichsrath and Parliament (Országgyűlés), and sanctioned by the Emperor and King. The agreement, which expired in 1897, was renewed for ten years in 1907. According to this agreement the net proceeds of the common customs shall be applied to the common expenditure, and for the remainder Hungary shall pay as its *quota* 36·4 per cent. and Austria 63·6 per cent.

Expenditure and sources of revenue in thousands of crowns (24 crowns=1*l.*):—

—	1906	1907	1908	1909	1910	1911	1912	1913 <sup>1</sup>	1914 <sup>1 2</sup>

By law of December 24, 1867, no loans are contracted jointly by Austria and Hungary.

## Defence

### I. FRONTIER.

Austria-Hungary lies in the heart of Europe. The land frontier is formed in the W. by Bavaria, the Canton of St. Gallen, Liechtenstein, the Canton Graubünden, and Italy; in the S. by Italy, Montenegro, Turkey, Servia, and Rumania; in the E. by Rumania in the N.E. and N. by Russia; in the N. by Prussia, and in the N.W. by Saxony.

Natural frontiers are the Fichtel Mountains, the Böhmerwald, the Inn, and the Salzach towards Bavaria; the Saale, the Alps, and the Rhine towards St. Gallen; the High Alps towards Graubünden and Italy; the Lago di Garda and Carnic Alps also towards Italy; towards Turkey, the Dinaric Alps, the Unna and Save; towards Servia, Save and Danube; towards Rumania, the South-East, and East Carpathians; towards Russia, the Dniester and Vistula; towards Prussia, the Riesen and Iser Gebirge; towards Saxony, the Erz-Gebirge.

The following are the chief territorial defences:—In Galicia: Cracow, fortified and entrenched camp at Przemyśl. Hungary, on the left of the Tisza, Gyulafehérvár, Arad, and Temesvár; on the Danube, Komárom, Pétervárad, and Orsova. In Dalmatia is the coast fortification of Cattaro; in Istria, Pola, fortified naval harbour. The Alpine frontiers in Tyrol have defences on all the routes, and also between Tyrol and the Adriatic. Serajevo is a fortified place. The Austrian capital, Vienna, and the Hungarian capital, Budapest, are undefended. Pola, the chief naval port, is strongly fortified, both towards sea and land, and has been recently enlarged, so as to be able to accommodate the entire fleet. The arsenal of the imperial and royal navy is also in Pola; Trieste is the great store-house, and there is also an arsenal of the navy.

### II. ARMY.

The peculiar Constitution of the Dual Monarchy is reflected in the organisation of its military forces. The first line of the Austro-Hungarian army is under the common government, and is known as the 'Common' Army, which includes the troops raised in the newly annexed Provinces of Bosnia and Herzegovina. The Austrian Landwehr and Landsturm are, however, entirely separate from the Hungarian Landwehr (Honvéd) and the Hungarian Landsturm (Népfőlkelés). The two latter form the Hungarian national army.

Military service is compulsory and universal throughout the Empire, extending to all races, including the Mahomedans of Bosnia and Herzegovina. Liability extends from the 19th year to end of the 42nd year. Actual service usually commences in the 21st year. In the Common Army and both Landwehrs continuous service is for 2 years (3 years for cavalry and horse artillery), followed by 10 years in the reserve (7 in reserve for cavalry and horse artillery, and then 2 years in the reserve of the Landwehr). There is no Landsturm in Bosnia and Herzegovina, but the men remain in the reserve until they reach the age limit. Reservists of two years' colour service undergo 14 weeks training altogether in not more than four annual periods, those who have undergone three years' colour service only do 11 weeks in not more than three periods. After completion of his 12th year of service the soldier passes to the Landsturm, in which he remains till he has reached his 42nd birthday. The annual contingent of recruits for the Common Army is fixed at 159,500, but of these 4,000 at present go to the Navy.

Both Austrian Landwehr and Hungarian Honvédség are permanently embodied, and train their own recruits, though the peace establishments of units are lower than in the Common Army. When the young men of proper age present themselves for enrolment, those who draw the

lowest numbers are allotted to the Common Army until the required contingent is obtained. The next lowest go to the Landwehr, and the remainder of those who are physically fit are passed, with very few exceptions, to the Ersatz, or supplementary, reserve.

The Ersatz reserve is primarily intended to maintain the strength of units on field service. There are separate Ersatz reserves for the Common Army, and for each of the Landwehr forces. All undergo 8 weeks' training in their first year, and are afterwards liable to be called out for the same periods as the other reservists of the force to which they belong.

One year volunteers are admitted to the army, and many of them become reserve officers. The annual contingent for the Common Army is found at 167,263 (6,000 for the Navy). That for the Austrian Landwehr is 28,000, that for the Honvéd is 25,000.

The Empire is divided into 16 army corps districts. Each army corps district is supposed to furnish a complete army corps of 2 divisions of the Common Army, but one district has 3 divisions; the Army Corps also includes, 1 regiment of field artillery or field howitzers, 1 pioneer battalion, 1 bridging company, &c. Each of these divisions consists of 2 brigades (each of 8 battalions), 1 artillery brigade (10 batteries of 6 guns each), a regiment of cavalry, a jäger (rifle) battalion, &c. Each Army Corps district, except those including Bosnia and Herzegovina, has also 1 Landwehr or Honvéd division, but one district has 2 Honvéd divisions. The Landwehr and Honvéd consist only of infantry, cavalry and artillery. Bosnia and Herzegovina are almost entirely garrisoned by battalions detached from line regiments, while the 4 B.-H. regiments are brigaded with Austrian regiments at Vienna and elsewhere, so that the higher organisation is somewhat complicated, and the brigades are generally short of a battalion or two.

There are 6 permanent cavalry divisions (3 of these on the Russian frontier), but 8 could be mobilised in event of war; this division consists of two brigades of cavalry (24 squadrons), 3 batteries of horse artillery, and a machine gun detachment. Each army corps would have about 34,000 combatants, and each cavalry division about 4,000 combatants. The total strength of regulars in the field army may therefore be taken at 590,000 combatants. To these must be added the 8 Austrian Landwehr and 7 Honvéd divisions, about 230,000. Grand total about 820,000 combatants.

The War Minister (always a general officer of high rank) is the head of the Imperial War office, which administers the Common Army. The Austrian Defence Minister is in charge of the Austrian Landwehr and Landsturm, and the Hungarian Defence Minister (Honvéd Minister) of the corresponding Hungarian forces; they are severally responsible to the Emperor-King for efficiency, and to their respective Parliaments for administration and finance.

The following sums were budgeted for on account of the Army in 1914-15: Common Army, 21,136,200*l.*; Austrian Landwehr, 5,466,666*l.*; Hungarian Honvéd, 4,284,000*l.*; Bosnia, 363,868*l.* Total, 31,250,734*l.*

The weapon of the Austro-Hungarian infantry is the Mannlicher magazine rifle, model 95, calibre .315. The cavalry carry the Mannlicher carbine which takes the same ammunition as the rifle.

The field gun fires a shrapnel of 14½ lb. The field howitzer batteries are armed with a 10.5 cm. piece, weighing 10 cwt. and firing a 30-lb. shell. The mountain gun is the 7 cm. malleable bronze gun, weighing 257 lb., shell 10½ or 10¾ lb.; a 10 cm. mountain howitzer is being introduced. All batteries have 4 guns in peace; in war, field guns and howitzer batteries, 6 guns, mountain batteries, 4.

The following table shows the peace establishments of the Common Army, the Austrian Landwehr, and the Hungarian Honvédség, in 1913:—

	Officers and Officials	All other ranks	Horses
<b>COMMON ARMY—</b>			
Staff and Establishments . . . . .	8,782	18,698	4,266
<i>Infantry</i> : 102 regiments of 4 battalions, and 102 depot cadres . . . . .	9,600	161,987	2,030

## III. NAVY.

Estimates (expenditure), 1914, 7,408,196*l.*; 1913, 3,094,051*l.*; 1912, 2,989,884*l.*; 1911, 2,860,717*l.*. Later details of expenditure are not accessible.

The Austro-Hungarian navy has always been maintained in a state of high efficiency, and includes a flotilla of monitors for the Danube. It is administered by the Ministry of War (Naval Department). The headquarters of the fleet are at Pola, and there are other establishments upon the Dalmatian coast. The Austro-Hungarian fleet is thus constituted (the exact figures in 1917 cannot, of course, be verified, but are approximately correct):—

	Effective Aug., 1914	1916
Dreadnoughts . . . . .	4	4
Pre-Dreadnoughts . . . . .	12	12
Cruisers armoured . . . . .	3	3
Cruisers and torpedo-cruisers . . . . .	9	10
Torpedo gunboats . . . . .	3	3
Destroyers . . . . .	18	28
Torpedo boats . . . . .	68	47
Submarines . . . . .	11	12

During the war the Austrian battle fleet has been inactive in face of the blockade of a greatly superior Franco-British and Italian force, but the cruisers co-operated with the army in the occupation of Montenegro, and the submarines have been active and have scored some successes. On the other hand several of the boats have been sunk. When the Italians landed in Albania, and afterwards when the Serbian army was withdrawn, a very difficult operation, Austrian cruisers, destroyers, and submarines attempted to interfere, but were unsuccessful.

The following table shows the principal ships of the Austro-Hungarian navy in similar arrangement to that adopted for the British navy. It was stated in October, 1916, that a large Austrian ship, presumed to be one of the Dreadnoughts, had blown up in Pola harbour.

First of class laid down	Name	Displacement Tons	Water-line armament inches	Armour on guns	Principal Armament	Torpedo tubes	Indicated Horse Power	Nominal speed

<sup>1</sup> Four super Dreadnoughts were planned, but appear not to have been begun

<sup>2</sup> Believed to have been taken over and removed from Montfalcone, before the Italian occupation, for completion at Trieste or Pola. The cruisers Kaiserin Elizabeth and Zenta have been lost during the war

The personnel of the navy in 1914 consisted of about 19,000 all told.

There is a small naval service of airships and hydro-aeroplanes.

For the common customs territory the values are fixed annually by a permanent commission, comprising officials and representatives of agriculture, sylviculture, trade and industry. In general, net values are taken for imports and gross values for exports, and they must be determined at the crossing of the frontier. The commission has to fix them according to the countries of origin or of destination, and only employ averages exceptionally. Quantities are declared, but the administration may, and in the case of imports always does, check the declarations. The weight declared is either net or gross, according to the tariff regulations. The recorded country of origin is that of production, and the country of destination is that where the goods are to be consumed. When the prime origin and ultimate destination are unknown, the most distant points of transit are recorded. Trade by countries :—

Exports from United Kingdom into Austria-Hungary . . . . .	4,943,355	4,480,768	2,676,345	—	—

### Money and Credit.

The only State bank is the Austro-Hungarian, formerly the National Bank (Nemzeti bank). The bank, during the continuance of its privilege, has the exclusive right to issue bank-notes. The charter of the bank, which expired at the end of 1910, has been renewed and extended to the year 1917. Of the sum total of bank-notes in circulation, at least two-fifths must be covered by the supply of metal, silver or gold, coined or in bullion. When the amount of notes in circulation exceeds the amount necessary to cover them by 600 million crowns, the Bank pays a tax to the State of 5 per cent. The State, under certain conditions, takes a portion of the clear profits of the bank. From these profits, first 4 per cent. on the share capital is paid to the shareholders, of the remainder 10 per cent. is transferred to the reserve fund, and 2 per cent. to the pension fund. The remainder is divided into two portions: one falls to the two States; from the other the dividend to the shareholders may be made up to 6 per cent. Of whatever still remains of the latter portion, (so long as it does not exceed 7 per cent.) one-third falls to the shareholders and two-thirds to the two States. Each of them participates in these benefits each year in the proportion of the tax paid within its territory on the taxable business of the Bank.

Statistics of the Austro-Hungarian Bank in thousands of crowns:—

—	Liabilities					Assets				
	Capital	Reserve Fund	Note Circulation	Mortgages	Total including others	Cash	Discounted Bills, &c.	State Loan	Loans on real property	Total including others
1910	210,000	33,531	2,375,938	293,056	3,225,165	1,669,168	889,088	60,000	298,347	3,225,165
1911	210,000	35,563	2,540,961	291,240	3,470,667	1,685,701	1,141,833	60,000	297,806	3,470,667
1912	210,000	38,408	2,815,797	293,261	3,734,168	1,507,575	1,341,107	60,000	299,455	3,734,168
1913	210,000	32,160	2,493,641	291,738	3,813,461	1,568,518	925,998	60,000	299,885	3,813,461

The closed accounts of the Bank for 1913 showed a net profit of 46,279,600 kronen (1,928,291*l.*), the shareholders receiving 9·221 per cent. dividend. In 1914 the dividend was 7·714 per cent., in 1915, 8·786 per cent., and in 1916, 9·143 per cent. The net profit for 1914 was 31·99 million kronen; that for 1915, 42·15 million kronen.<sup>1</sup>

### Money, Weights, and Measures.

In Austria by law of August 2, 1892, and in Hungary by Law XVII of 1902, the monetary system of Austria-Hungary was reformed on a gold basis, though the standard coin, the crown (krone, korona), is not coined in gold.

The new coins with English equivalents are—

Gold :—

The hundred-crown piece (gross weight 33·8753387 grammes 0·900 fine, and fine weight 30·4878048 grams)=4*l.* 3*s.* 4*d.* (law of August 11, 1907).

The twenty-crown piece (weighing 6·775067 grammes ·900 fine, and thus containing 6·09756 grammes of fine gold) = 16*s.* 8*d.*

The ten-crown piece = 8*s.* 4*d.*

The single ducat = 11 crowns 29 heller (fillér) = 9*s.* 4½*d.*

Silver :—

Five-crown pieces = 500 heller.

Two-crown pieces (weighing 10 grammes) = 200 heller.

The single crown (weighing 5 grammes ·835 fine, and thus containing 4·175 grammes of fine silver) = 100 heller = half-a-gulden (forint) of the old coinage = 10*d.*

Nickel :—

The ten-heller (10-fillér) piece = 5 kreuzer (krajczár) of the old coinage = 1*d.*

Bronze :—

The single heller (fillér) piece = ½ kreuzer (krajczár) = ½*d.*

Iron :—

The twenty-heller (20-fillér) piece = 10 kreuzer (krajczár) of the old coinage = 2*d.* First issued on August 3, 1916.

The two-heller (2-fillér) piece = 1 kreuzer (krajczár) = ½*d.* First issued on November 10, 1916.

Silver crown-pieces are accepted to any amount at Government offices, but in general circulation they are legal tender only up to 50 crowns. The notes of the State Bank are legal tender.

The metrical system of weights and measures is now legal and obligatory in Austria-Hungary. The old weights and measures were :—

The <i>Centner</i> ( <i>másza</i> )	= 100 <i>Pfund</i> = 56·06 kg.	= 123½ lbs. avoirdupois.
„ <i>Eimer</i> ( <i>akó</i> )	„ = 56·59 litre	= 12·49 wine gallons.
„ <i>Joch</i> ( <i>holt</i> )	„ = 5,754·64 square metre	= 1·43 acre.
„ <i>Metzen</i> ( <i>mérő</i> )	„ = 61·49 litre	= 1·7 imperial bushel.

(The *Klafter* (*öl*) of wood = 6·82 cubic metre = 240 cubic feet.)

„ <i>Meile</i> ( <i>mértföld</i> ) = }	7,585·6 metres	= { 8,897 yards, or about 4
24,000 Austrian feet }		miles.

<sup>1</sup> Since July 23, 1914 no details concerning the bank have been issued, excepting only the annual net profits and the dividend. The note circulation of the bank has thus not been made public during the period of war.

## AUSTRIA.

## Constitution and Government.

## I. CENTRAL GOVERNMENT.

The political representation is twofold—(1) for all the Austrian provinces (Reichsrath); (2) for each separate province (Landtag).

The Reichsrath or Parliament consists of an Upper and a Lower House. The Upper House (Herrenhaus) is formed, 1st, of the princes of the Imperial family who are of age, 14 in number in 1913; 2nd, of a number of nobles—81 in the present Reichsrath—possessing large landed property, in whose families by nomination of the Emperor the dignity is hereditary; 3rd, archbishops, 10 in number, and bishops, 7 in number, who are of princely title inherent to their episcopal seat; and 4th, of any other life-members nominated by the Emperor, on account of being distinguished in art or science, or who have rendered signal services to Church or State—159 in 1911. (Under law of January 26, 1907, the number of these members must not exceed 170, nor be less than 150.)

Under the Electoral Law of January 26, 1907, the Lower House (Abgeordnetenhaus) is elected on the basis of universal, equal, and direct suffrage. Entitled to vote for a deputy are all Austrian male citizens over 24 years of age who have resided for at least a year in the place of election. The electoral districts are in most provinces composed, as far as possible, of uniform nationality, and are divided from each other, according to their character, as urban (industrial) or rural. In general there is only one deputy to be elected for one electoral district; but in 36 districts of Galicia, two for each. In these 36 districts the principle of the single vote is followed, inasmuch as each qualified elector has only the right to one vote, though two deputies are to be chosen. The candidate who receives more than half the number of votes recorded is regarded as the first deputy, and the one who receives more than a fourth of the votes, as the second. For the deputies of these electoral districts, there are elected, at the same time, substitutes who, in case of failure of the deputy's mandate, enter the House, so that for one of these districts a new election is held only when the mandates of both deputies fail. By this system the national minorities in those parts of Galicia which have a mixed Polish-Ruthenian population have their representation assured. In Moravia, the population entitled to vote is divided, as in elections for the provincial Landtag, according to nationality, so that German and Bohemian electors choose their deputies separately. In Lower Austria, Upper Austria, Salzburg, Carniola, Moravia, Silesia, Vorarlberg and Bukowina, under provincial laws each elector is obliged to appear at the election for a member of the Reichsrath, and present his electoral ticket, the penalty for neglect of this obligation being a fine of from one to fifty kronen.

The total number of members is distributed as follows: Lower Austria 64, or 1 for every 55,185 subjects of the State; Upper Austria 22, or 1 for 38,773; Salzburg 7, or 1 for 30,677; Styria 30, or 1 for 48,139; Carinthia 10, or 1 for 39,620; Carniola 12, or 1 for 73,833; Trieste 5, or 1 for 45,902; Görz and Gradisca 6, or 1 for 43,454; Istria 6, or 1 for 67,261; Tyrol 25, or 1 for 37,865; Vorarlberg 4 or 1 for 36,352; Bohemia 130, or 1 for 52,074; Moravia 49, or 1 for 53,516; Silesia 15, or 1 for 50,443; Galicia 106, or 1 for 75,714; Bukowina 14, or 1 for 57,150; Dalmatia 11 or 1 for 58,697; Total 516, or 1 for 55,372. The duration of the Lower House of the Reichsrath is for the term of six years. Members of the Lower House receive 20 crowns (16s. 8d.) for each day's attendance, with an indemnity for travelling

expenses. In case of dissolution new elections must take place within six months. The Emperor nominates the president and vice-president of the Upper House of the Reichsrath, while those of the Lower House are elected by the members. It is incumbent upon the head of the State to assemble the Reichsrath annually. All constitutional matters concerning rights, duties and interests that are common to all provinces of Austria Proper must be regulated by the Reichsrath. To give validity to bills passed by the Reichsrath, the consent of both Chambers is required, as well as the sanction of the head of the State. The members of both the Upper and the Lower House have the right to propose new laws on subjects within the competence of the Reichsrath.

Lower House (June, 1911): German Nationalists, 100; Christian Socialists (German), 73; German Social Democrats, 49; United Bohemian Club, 84; Bohemian Social Democrats, 25; Poles, 70; Polish Social Democrats, 9; Ukraine Union, 28; Creatio-Slavonian Club, 27; Dalmatians, 7; Union-latina, 21; Independents, 23. The House has not been in Session since March, 1914.

The Ministry for Austria Proper is as follows (appointed December 3, 1916):—

Premier and Minister of Agriculture.—Count Heinrich *Clam-Martinič*.

Minister of the Interior.—Baron Erasmus von *Handel*.

„ of Finance.—Dr. Alexander von *Spitzmüller*.

„ of Commerce.—Dr. Carl *Urban*.

„ of Justice.—Baron Josef von *Schenk*.

„ of Instruction.—Baron Max von *Hussarek*.

„ of Railways.—Baron Zdenko von *Forster*.

„ of National Defence.—General Baron Friedrich von *Georgi*.

„ of Labour.—Baron Ottokar von *Trnka*

„ of Provisioning.—Major Anton *Höfer*. (Appointed January 6, 1917.)

Ministers without Portfolio.—Dr. Josef Maria *Baernreiter* and Dr. Michael *Bobrzyński*.

The Ministers are responsible for acts committed in the discharge of their official functions.

## II. PROVINCIAL GOVERNMENT.

The Provincial Diets are competent to legislate in all matters not expressly reserved for the Reichsrath. They have control over local representative bodies, and the regulation of local affairs affecting taxation, the cultivation of the soil, educational, ecclesiastical, and charitable institutions and public works. In Tyrol and Vorarlberg they have the regulation of the defence of the province, and consent to the employment of the local militia (*Landeschützen*) in another province of the Monarchy. Each Provincial Diet consists of one assembly, composed (1) of the archbishop and bishops of the Catholic and Orthodox Greek Churches; (2) the rectors of Universities [in Galicia, also the Rector of the technical High School of Lemberg and the President of the Academy of Sciences of Cracow (Krakau)]; (3) the representatives of great estates, elected by all landowners paying land taxes of not less than 100, 200, 400, or 500 crowns, according to the provinces in which their estates are situated; (4) the representatives of towns, elected by those citizens who possess municipal rights or pay a certain amount of direct taxation; (5) the representatives of boards of commerce and industry, chosen by the respective

members; (6) representatives of the rural communes, elected by all inhabitants, who pay a small amount of direct taxation. The election is in Tyrol, Silesia, Galicia, and Dalmatia indirectly (by deputies called *Wahlmänner*), in other lands directly. In Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Carniola, Triest and district, Görz and Gradiska, Istria, Vorarlberg, Moravia, and Bukowina, there is, besides, a general electoral class in which every qualified male subject of the State over 24 years of age, who has been domiciled for the required time has a vote. Where a general electoral class exists, persons authorised to vote in the other electoral classes are authorised to vote also in the general electoral classes; this is not the case with respect to votes for the Landtag, in Styria, Vorarlberg, and in the cities of Vienna and Triest. In Moravia, under the arrangement made by the Provincial Diet, November 27, 1905, the proportional system was introduced for the electoral classes of the great landowners and the chambers of commerce and industry; the other electoral classes (towns, country parishes, and general electoral classes) are divided into constituencies according to nationality, German and Bohemian electoral districts being formed, so that German and Bohemian voters choose their representatives separately.

The strength of the seventeen separate Diets is shown in the following table:—

	No. of Members		No. of Members
Lower Austria . . . . .	127	Tyrol . . . . .	68
Upper Austria . . . . .	69	Vorarlberg . . . . .	26
Salzburg . . . . .	39	Bohemia . . . . .	242
Steiermark (Styria) . . . . .	87	Moravia . . . . .	151
Carinthia . . . . .	43	Silesia . . . . .	31
Carniola . . . . .	50	Galicia . . . . .	161
Trieste . . . . .	80	Bukowina . . . . .	63
Görz and Gradiska . . . . .	30	Dalmatia . . . . .	43
Istria . . . . .	47		

The deputies to the Provincial Diets are elected for six years. The Diets are summoned annually.

The Provincial Council (*Landesausschuss*) is an executive body composed of the president of the Diet (called *Landmarschall* in Lower Austria and Galicia; *Oberstlandmarschall* in Bohemia; *Landtagspraesident* in Dalmatia; *Landeshauptmann* in the other lands, nominated by the Emperor) and other members elected.

### III. LOCAL GOVERNMENT.

Each commune has a council to deliberate and decide, and a committee to administer all its affairs. The members of the council are elected for three (in Galicia for six) years. All who have a vote are eligible if of age. In the towns with special statutes a corporation takes the place of the communal committee.

District representative bodies are, in Styria (Steiermark), Bohemia, and Galicia, interposed between the communal bodies and Provincial Diets. They deliberate and decide on all affairs affecting the interests of the district (*Bezirk*). They consist of the representatives (1) of great estates, (2) of the most highly taxed industries and trades, (3) of the towns and markets, (4) of the rural communes (*Landgemeinden*). Members are elected for three years in Galicia for six. A committee of this body (called the *Bezirksausschuss*, administers the current affairs of the district.

# Area and Population.

## I. PROGRESS AND PRESENT CONDITION.

The following is the civil population of Austria at the last 4 censuses :—

—	Population	Absolute increase	Yearly increase per cent.
1880	21,981,821	1,764,290	0·76
1890	23,707,906	1,726,085	0·76
1900	25,921,671	2,213,765	0·90

In 1910 there were in Austria 583,126 foreigners, of whom 301,088 were Hungarian, 4,153 Bosnian and Herzegovinian, 126,382 German, 79,062 Italian, 40,576 Russian, 8,434 Swiss, 3,571 Rumanian, 3,109 American, 3,111 British, 2,928 French, 2,921 European Turkish, 1,995 Montenegrin, 1,366 Serbian, 1,256 Greek, 813 Bulgarian, 666 Liechtensteiners, and 2,383 of other nationalities.

## II. MOVEMENT OF POPULATION.

Births, deaths, and marriages:—

Year	Total Births	Stillborn	Illegitimate	Marriages	Deaths	Surplus of Living Births
1907	966,911	24,742	121,396	209,514	629,913	312,256
1908	965,593	24,218	119,594	213,670	627,771	313,604
1909	965,096	23,857	118,553	213,083	646,122	295,117
1910	946,820	23,275	115,869	214,970	602,046	321,499
1911	920,945	22,243	109,011	217,373	628,305	270,397
1912	925,682	22,317	110,657	212,187	592,426	310,981
1913 <sup>1</sup>	863,690	—	—	195,524	589,794	275,036
1914 <sup>2</sup>	506,838	—	—	122,377	359,811	147,027

<sup>1</sup> Living births only.<sup>2</sup> Exclusive of Galicia, Bukowina and Dalmatia.

The rate of illegitimacy varied in 1910 from 37·3 per cent. in Carinthia, 25·5 and 24·2 in Salzburg and in Styria, 22·6 in Lower Austria, to 7·7 in Tyrol, 6·5 in Carniola, and 3·9 in Dalmatia.

## EMIGRATION STATISTICS.

Year	Austrians	Austrians and Hungarians	To United States	To Canada	To Brazil <sup>1</sup>	To Argentina
1909	129,808	250,530	170,191	20,123	4,065	4,552
1910	138,915	270,060	258,737	10,240	2,920	4,542
1911	91,868	163,962	159,057	17,420	3,352	6,945
1912	131,227	247,466	178,882	24,394	3,045	6,545
1913	194,462	309,950	254,825	29,460	1,560	24,085

<sup>1</sup> So far as data are available.

Of the total emigrants to the United States the Austrians numbered in 1912, 85,854; in 1913, 137,245; to Canada, in 1912, 23,472; in 1913, 27,846; and to Argentina, in 1912, 5,832; in 1913, 3,202.

## III. PRINCIPAL TOWNS.

Estimated population, June 30, 1914 (in thousands):—

## AUSTRIA:—

Vienna . . . . .	2,149·8	Pola . . . . .	59·3	Salzburg . . . . .	37·3
Prague and environs . . . . .	541·5	Innsbruck . . . . .	57·3	Reichenberg . . . . .	37·1
Trieste . . . . .	246·5	Przemysł . . . . .	57·0	Tarnopol . . . . .	35·2
Lemberg . . . . .	212·0	Budweis . . . . .	46·3	Stanislaw . . . . .	34·4

		Tarnów . . . . .	38·7	Trient . . . . .	31·5

### Religion.

The leading principle is religious liberty, and the independence of the Church as regards the State, saving the rights of the sovereign arising from ecclesiastical dignity.

The Minister for Ecclesiastical Affairs will grant legal recognition to any religious bodies if their doctrine worship, constitution, and designation contain nothing illegal or immoral (Statute of May 20, 1874). In January, 1916, the religion of Islam received official recognition.

The Catholic Church has 7 Latin archbishoprics, 1 Greek-Ruthenian, and 1 Armenian archbishopric, 23 Latin and 2 Greek-Ruthenian bishoprics. The Greek Oriental or Orthodox Church has 1 archbishopric and 2 bishoprics. Protestants have 6 superintendents of the Augsburg confession, 3 of the Helvetic, and 1 of the mixed. The following figures relate to 1910 :—

Priests, secular :—

Roman Catholic Church	18,755 <sup>1</sup>	Members of orders <sup>2</sup> :—	
Greek Catholic Church	2,763	Male	10,903
Greek Oriental Church	565	Female	26,554
		Protestant clergy	366
		Jewish congregations	562

<sup>1</sup> Including Armenian Catholics. <sup>2</sup> Including Greek Catholics and Oriental Catholics.

Population according to religion, 1910 :—

	In 1,000's	per cent. of pop.		In 1,000's	per cent. of pop.
Roman Catholics	22,530	78·8	Evangelical	589	2·1
Greek Catholics	3,417	12·0	Other Christian sects	7	0·0
Armenian Catholics.	2	0·0	Jews	1,314	4·6
Old Catholics	21	0·1	Others	25	0·1
Greek Oriental	666	2·3			
Armenian Oriental	1	0·0	Total	28,572	100·0

### Instruction.

The educational organisation of Austria comprises :—

- (1) Elementary schools; (2) Gymnasias and Realschulen; (3) Universities and colleges; (4) Technical high schools; (5) Mining high schools; (6) Veterinary high schools; and (7) Schools for special subjects.

Attendance is compulsory at the elementary schools from 6 to 14 in Austria generally; in Krain, Istria, Galicia, and Dalmatia, 6 to 12; Bukovina, 13. Of these schools there are two grades. The cost of erecting and maintaining elementary schools, and the payment of the teaching staff falls ultimately on the communes or the land. In only a few special cases are elementary schools supported by the State.

Latest statistics of elementary schools :—

Year	Elementary Schools	Teachers	Pupils	Children of School Age	Training Colleges
1910 <sup>1</sup>	23,847 <sup>2</sup>	108,006	4,520,138	4,818,870	142
1911 <sup>1</sup>	24,226 <sup>3</sup>	110,607	4,533,734	4,885,504	148
1912 <sup>1</sup>	23,247 <sup>4</sup>	107,374	4,471,393	4,917,724	149

<sup>1</sup> End of the calendar year.

<sup>3</sup> Including 1,261 private schools.

<sup>2</sup> Including 1,245 private schools.

<sup>4</sup> Including 1,285 private schools.

In 8,508 of the elementary schools (1912) the language used was German; in 5,367 Czéch (mainly in Bohemia, Moravia, and Silesia); and in 7,809 other Slav dialects; 697 Italian, 185 Rumanian, 5 Magyar, and 4 in other languages; and in 278 more than one language.

Secondary education is provided in the Gymnasia and Realschulen. The curriculum of the former extends over eight years; of the latter, over seven. They are, so far as they are public, maintained by the State, by separate provinces, by the larger communes, or (in the case of denominational schools) by ecclesiastical foundations, &c., with sometimes a subvention from the State. Private middle schools of a semi-official kind are included in the following table; these are under the same regulations as public schools:—

	Gymnasia		Realschulen	
	No.	Pupils <sup>1</sup>	No.	Pupils <sup>1</sup>
1913-1914 . . . . .	370	111,861	148	48,892
1914-1915 . . . . .	372	111,640	148	47,755
1915-1916 . . . . .	376	84,907	148	41,220

<sup>1</sup> Including 40 gymnasia for girls, having 5,871 pupils in 1913-14; 40 with 5,997 in 1914-15; and 41 with 4,818 in 1915-16.

In 146 Gymnasia (1915-16) the language used was German, in 73 Bohemian, in 107 Polish, in 9 Italian, in 16 Ruthenian, in 2 Slovenish, in 7 Serbo-Croatian, and in 16 two languages were used. There were also 75 'Lyceums' (secondary schools for girls) with 10,528 pupils.

There are eight universities maintained by the State. The number of teachers and of students in summer 1916:—

Universities	Teachers	Students	Universities	Teachers	Students
Vienna, German	638	3,472	Cracow, Polish .	195	1,281
Prague { German	174	638	Lemberg, ,, .	186	1,174
{ Bohemian	249	1,891	Innsbruck, German	115	584
Graz, German .	168	647	Czernowitz, ,,	67	188

There were (1913-1914) 49 theological colleges—viz.: 43 Roman Catholic, 2 Greek Catholic, 1 Armenian Catholic, 1 Greek Oriental, 1 Protestant, and 1 Jewish, with a total of 1,945 students.

Government technical high schools, teachers and pupils in winter 1915-16:—

	Teachers	Students		Teachers	Students
Vienna . . . . .	183	639	Brünn { German	102	115
Graz . . . . .	54	80	{ Bohemian	73	133
Prague { German .	86	146	Lemberg . . . . .	98	167
{ Bohemian	151	848	Vienna agr. high		
			school . . .	86	186

At Vienna there is also (1910-11) an Export Academy with 30 teachers and 453 students; at Vienna and Lemberg are Veterinary high schools with

79 teachers and 738 students; at Leoben and Pribram montanist high schools with 53 teachers and 540 students. There are also Academies of Art in Vienna (22 teachers, 258 students), in Prague (18 teachers, 133 students), and in Krakau (11 teachers, 176 students). Besides these there are an Academy of Music and Dramatic Art (formerly the 'Conservatorium') with 88 teachers and 884 students, and a Consular Academy in Vienna (32 teachers, 44 students).

There are (1913-14) besides 3,202 technical institutes, training in mining, agriculture, industries of all kinds, art, music, commerce, &c., with 306,903 students.

### Justice and Crime.

In Austria the ordinary judicial authorities are:—

(1) The Supreme Court of Justice and Court of Cassation (Oberste Gerichts-und Kassationshof) in Vienna. (2) The 9 higher provincial courts (Oberlandesgerichte). (3) The 72 provincial and district courts (Landes- und Kreisgerichte), and, in connection with these, the jury courts (Geschworenengerichte). (4) The 968 county courts (Bezirksgerichte).

There exist also special courts for commercial (3 courts, and 3 county courts), for industry (20 courts), shipping, revenue, military, and other matters.

In case of conflict between different authorities the Court of the Empire (Reichsgericht) in Vienna has power to decide. Private persons can in certain cases appeal against the decisions of magistrates to the High Court for Administrative Affairs.

Convictions.	1909	1910	1911	1912
Of crimes. . . . .	37,139	30,716	27,694	29,644
Of less serious offences . . . . .	9,152	5,731	7,002	6,931
Of misdemeanours . . . . .	552,592	539,471	567,496	562,044
Number of prisoners in penal establishments (Strafanstalten) at end of year :				
Males . . . . .	7,303	7,287	7,193	—
Females . . . . .	761	693	624	—

### Pauperism.

The right to poor relief is defined by an imperial statute, but the regulations for the apportionment of the cost are made by the separate provinces. The funds first available are the public funds for the support of the poor (Localarmenfonde and Armeninstitute, the latter existing now only in Styria, Vorarlberg, Moravia, and Tyrol), derived from endowments, voluntary contributions, the poor's third of the property left by intestate secular priests, and certain percentages on the proceeds of voluntary sales. In some provinces the poor's funds are augmented from other sources, *e.g.* theatre money (Spectakelgelder), hunting licences, dog certificates, and in some large towns percentages on legacies over a fixed amount. When, in any given case, these funds are exhausted, the commune of origin (Heimatgemeinde) must make provision. Those who are wholly or partially unfit for work may be provided for in such manner as the commune judges propose. Besides poor-houses and money relief, there exists in many provinces the practice of assigning the poor—in respect of board and lodging—to each of the resident householders in fixed succession (Einlegesystem).

In some provinces unions (Verbände) have been formed by statute to undertake certain burdens as to poor relief. In Lower Austria the care of

the poor is incumbent partly on the communes and partly on the District Unions (Bezirksarmenverbände). By the erection of houses for forwarding vagrants to their proper communes (Schubstationen), a great step was taken towards the suppression of begging and vagrancy.

### Finance.

Expenditure and revenue (24 crowns = £1) in 1,000 crowns :—

	1908	1909	1910	1911	1912	1913
Expenditure . . . . .	2,796,924	3,650,968	3,564,068	3,472,606	4,123,072	3,137,202

New Buildings, &c. . . . .	9,419,642	—
Board of Control . . . . .	370,100	—
Pensions . . . . .	67,259,424	140,018,371
Total . . . . .	1,564,458,879 (65,185,786 <i>l.</i> )	3,460,726,156 (144,196,965 <i>l.</i> )

<sup>1</sup> Before 1914 the Austrian financial year ran from January to December; from 1915 onwards it runs from July 1.

<sup>2</sup> No later budgets have been formally presented, as Parliament has not met since March, 1914. An Imperial rescript has fixed the budget for each period of six months, the last bearing date December 30, 1916, being for the first half year of 1917.

The special debt of Austria on July 1, 1916, amounted to 36,027,834,685 crowns (1,501,159,778*l.*), being made up of 24,552,502,438 crowns of war debt and 11,475,332,247 crowns of other debt. The annual charge for interest on this amount was 1,478,048,139 crowns (61,585,339*l.*)

## Production and Industry.

### I. AGRICULTURE AND FORESTRY.

The cultivation of the soil furnishes employment to nearly half the population. The proportion of productive land is greatest in Dalmatia, Silesia, Moravia, Bukowina, Bohemia, and Galicia; least in Salzburg and Tyrol.

Cultivated area, 1912 :—

	Hectares	Percentage of cultivated area
Arable land . . . . .	10,631,450	37.5
Gardens . . . . .	339,280	1.2
Pastures and meadows . . . . .	7,185,837	25.4
Vineyard . . . . .	224,293	0.8
Woodland . . . . .	9,782,167	34.5
Lakes and fishponds . . . . .	100,741	0.4
Olive, mulberry land, &c. . . . .	41,176	0.2

28,804,053

The statistics of the leading crops are shown for three years :—

Crops	Acreage			Produce		
	1911	1912	1913	1911	1912	1913

Vineyards . . . . .	548,221	554,604	540,186	84,406,388	87,837,206	95,762,656

In Austria in 1910 there were 1,802,848 horses, 9,160,009 cattle, 2,428,101 sheep, 6,432,080 pigs, and 1,256,778 goats.

The produce of silk-cocoons in Austria was in 1905, 2,164,645; in 1912, 2,185,470 kilogrammes, in 1913, 1,645,623 kilogrammes.

In 1910 of the 9,768,290 hectares under forest, 5,860,687 hectares were under pines.

## II. MINING.

Mines are worked for common coal in Silesia, Bohemia, Moravia, Galicia, Coast Land and Lower Austria; for brown coal in Bohemia, Styria, Lower Austria, Carinthia, Upper Austria, Carniola, Coast Land, Tyrol, Silesia, Galicia, Dalmatia, and Moravia; for gold ore in Bohemia. Iron ore is worked in Styria, Bohemia, Carinthia, Galicia, Salzburg, Moravia, Carniola, and Silesia; silver ore in Bohemia; quicksilver in Carniola; copper ore in Salzburg, Carinthia, Bohemia, and Tyrol; lead ore in Carinthia, Tyrol, Galicia, Bohemia, and Styria; zinc in Carinthia, Tyrol, Galicia, Silesia, Styria, and Bohemia; sulphur in Bukowina, Bohemia, Silesia, Styria, Tyrol; manganese in Bukowina and Carniola; graphite in Bohemia, Lower Austria, Styria, Moravia; petroleum and ozokerit in Galicia; while the largest production of salt is from Galicia, Upper Austria, Styria, and the Coast Land.

In mining (exclusive of petroleum, &c.) there were employed in Austria in 1912, 133,384 men, 5,532 women, 5,921 juveniles, together with 5,689 overseers; total, 150,526; in smelting, in 1912, 8,161 men, 139 women, 314 juveniles; total, 8,614; in salt works, in 1912, 6,578 men, 305 women, 229 juveniles; total, 7,112.

Value of the chief mineral and furnace products in thousands of crowns (24 crowns = 1*l.*):—

—	Common Coal	Lignite	Raw Iron	Lead	Quick-silver	Zinc	Silver	Copper
1890 .	60,802	55,278	54,621	2,799	3,193	2,936	6,395	1,204
1900 .	95,591	112,634	82,304	4,722	2,495	3,164	3,908	1,538
1910 .	139,438	136,117	120,234	5,610	3,423	6,641	4,320	2,018
1913 .	172,334	149,472	143,456	10,706	3,175	10,367	5,264	5,486

The total value of mining and furnace products in five years was as follows in Austria in crowns:—

—	1909	1910	1911	1912	1913
Mining products <sup>1</sup>	317,501,821	315,484,476	320,107,395	352,545,531	371,442,426
Furnace <sup>1</sup>	137,235,740	143,951,194	155,669,109	179,212,612	181,607,752

<sup>1</sup> Exclusive of salt and petroleum, &c

Quantities and values of the leading minerals and metallic products, 1913 :

Minerals	Ores, &c.		Metals produced	
	Metric tons	Crowns	Metric tons	Crowns
Gold . . . . .	35,954	719,880	283 <sup>1</sup>	919,778

Coal . . . . .	16,459,888	172,334,415	—	—

<sup>1</sup> Kilogrammes.

In 1916, 17,601,707 metric tons of coal (16,083,000 metric tons in 1915), 23,199,894 metric tons of lignite (22,027,100 in 1915), and 2,584,673 metric tons of coke (1,907,000 in 1915) were produced in Austria.

The Steel production of Austria totalled in 1915, 1,978,802 metric tons as against 1,538,771 metric tons in 1914.

### III. SEA FISHERIES.

Years	No. of Boats		Value caught in crowns		No. of Fishers	
	Summer	Winter	Summer	Winter	Summer	Winter
1909-1910	5,363	4,785	6,626,019	3,225,155	19,049	15,882
1910-1911	5,758	5,324	5,642,720	3,213,527	19,433	16,594
1911-1912	5,962	5,260	6,671,484	3,721,192	20,333	16,498

### IV. MANUFACTURES.

In 1913 there were 17,034 factories in Austria. Of these 3,082 manufactured pottery and glass, 2,756 textiles, 2,370 foods and delicacies, 1,669 woodwork and cane, 1,644 metal, 1,182 machinery and 1,004 chemicals.

There were in the year 1913, 1,069 breweries, producing 21,081,648 hectolitres of beer. In 1912-13 there were 37,879 distilleries which produced 1,602,656 hectolitres of alcohol. In 1913 beet sugar was manufactured in 186 factories employing 72,960 persons and the total production was 1,107,052 metric tons, and in 1913 37 tobacco factories with 37,660 work-people, produced 40,275 metric tons of tobacco to the value of 163,599,718 crowns.

## Shipping and Navigation.

Commercial marine of Austria, January 1 :—

—	Vessels. 1913	Tonnage. 1913	Crews. 1913	Vessels. 1914	Tonnage. 1914	Crews. 1914
Sea-going vessels	192	407,016	5,378	198	451,150	5,787
Coasting vessels.	1,603	35,428	4,878	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>
Fishing vessels, &c. . . . .	14,969	28,808	35,311	— <sup>1</sup>	— <sup>1</sup>	— <sup>1</sup>
Total . . .	16,764	471,252	45,567	—	—	—

<sup>1</sup> Details unobtainable owing to the war conditions.

Of the total (1913) 394 of 422,368 tons were steamers, and 16,370 of 48,884 tons were sailing vessels.

The progress of navigation is shown as follows for Austria alone :—

Year	Entered		Cleared	
	No.	Tonnage	No.	Tonnage
1912	167,113	25,566,314	167,122	25,569,882
1913	173,511	27,877,722	173,377	27,857,112
1914	132,365	19,350,194	132,000	19,071,589

Of the vessels entered and cleared, an average of 92 per cent. and 93 per cent. of the tonnage were Austrian, Italy coming next, and Greece third. At Trieste in 1914, 10,686 vessels of 3,871,346 tons entered, and 14,186 vessels of 5,475,445 tons cleared.

### Internal Communications.

In 1913 the total length of navigable rivers and canals in Austria was for rafts only, 2,390 miles; for vessels and rafts, 1,646 miles; of which 974 miles were navigable for steamers.

The river traffic during three years was as follows :—

Year	Danube Steam Navigation Company			Vereinigte Elbeschiffahrts Gesellschaften-Aktien- gesellschaft.		
	Steam- boats	Tow- boats	Passen- gers (including military)	Goods and Luggage shipped, in metre- centners.	Steam- boats	Tow- boats
1913	142	868	2,205,460	23,109,560	116	353
1914	149	858	2,046,286	17,602,780	—	—
1915	139	859	2,141,105	9,806,940	—	—

The following are railway statistics of Austria in 1913: State lines, 8,244 miles; private companies' lines worked by the State, 532 miles; private companies' lines worked by themselves, 5,673 miles; of foreign companies in Austrian territory, 63 miles, making a total of 14,512 miles; in 1915, 14,747 miles.

The following table shows the traffic on the Austrian railways :—

—	1909	1910	1911	1912
Passengers (in 1,000's)	241,956	227,800	276,643	290,851
Goods carried (in 1,000 tons)	152,186	137,560	146,127	159,210
Receipts (in 1,000L.)	38,089	38,708	43,605	47,368
Working expenses (1,000L.)	30,989	31,437	32,536	35,284

There were, in 1915, 10,126 post offices. Work of the Post Office :—

	1914	1915
No. of postal orders issued	35,402,137	36,923,025
Value in crowns	1,810,783,093	2,036,690,613
No. of postal orders cancelled	36,187,661	40,043,000
Value in crowns	1,894,211,525	2,256,151,174
No. of telegrams despatched	21,047,517	22,599,626
Length of telegraph lines (in miles).	29,554	30,226
wires	153,221	160,725
No. of local telephone systems	1,475	1,486
No. of inter-urban telephone systems	950	958
No. of "                  " calls	6,325,705	7,168,987
Total number of employees	70,171	75,560

In 1914 there were in Austria 1,475 urban telephone systems with 314,792 miles of wire and 950 inter-urban circuits with 10,331 miles of line and 54,098 miles of wire; 396,888,039 conversations were held.

### Money and Credit.

The following table shows the issues from the Austrian mint and the value of notes now in circulation :—

—		1909	1910	1911	1912	1913
		Crowns	Crowns	Crowns	Crowns	Crowns

<sup>1</sup> 691 at the end of 1913.

## HUNGARY.

## Constitution and Government.

## I. CENTRAL AND PROVINCIAL GOVERNMENT.

The Constitution of the eastern part of the monarchy, or the kingdom of Hungary, including Hungary Proper and Croatia-Slavonia, dates from the occupation of the country by the Magyars, about 891. The first king, Saint Stephen, was crowned in 1000. The first charter or constitutional code is the 'Bulla Aurea' of King Andrew II., granted in 1222, which defined the form of government as an aristocratic monarchy. The Hungarian Constitution has been repeatedly suspended and partially disregarded, until, at the end of the armed struggle of 1849, it was decreed to be forfeited by the nation. This decree was repealed in 1860; and the Emperor-King Francis Joseph I. on June 8, 1867, swore to maintain the Constitution, and was crowned King of Hungary.

The Hungarian Parliament (Országgyűlés) has legislative authority for Hungary, and for Croatia and Slavonia in matters which concern these provinces in common with Hungary Proper. It consists of an Upper House (Főrendiház) and a Lower House (Képviselőház).

The House of Magnates, reformed by an Act passed in 1885, now includes the archdukes who have attained their majority (18 years), those Hungarian princes, counts and barons—if of age (24 years) and paying at least 6,000 crowns a year land tax—whose families possess the right of hereditary peerage (designated by Act of 1885 or having received it since by a special Act); 38 archbishops, bishops, and other dignitaries of the Roman Catholic and Greek Churches; 12 ecclesiastical and lay representatives of the Protestant Confessions; life peers appointed by the Crown not exceeding 50 in number; life peers elected, once for all, by the Upper House; 17 members *ex officio*, being State dignitaries (*barons regni*) and high judges; and lastly, 3 delegates of Croatia-Slavonia, and the Governor of Fiume. In the session of 1912–13 the number of archdukes was 15, and there were 227 hereditary peers holding the property qualification; and 61 life peers appointed by the Crown or chosen by the House of Magnates.

The Lower House or House of Representatives is elected by the vote of all male citizens, of 20 years of age, who pay a small direct tax on house property or land, or on an income varying with occupation; but in all cases low. Certain large classes—professional, scientific, learned, and others—are entitled to vote without other qualifications. The number of the electorate was in 1912 in Hungary Proper, 1,221,415, or 24·9 per cent. of the total civil male population over 20 years. New elections must take place every five years. By the electoral law now in force, the House of Representatives consists of 453 members, of whom 413 are deputies of Hungarian towns and districts, and 40 delegates of Croatia and Slavonia.

Members of the Lower House receive 4,800 crowns (200*l.*) a year, with an allowance of 1,600 crowns (66*l.* 13*s.*) for house rent.

The Parliament is summoned annually by the King at Budapest. The language of the Parliament is Hungarian; but the representatives of Croatia and Slavonia may speak their own language.

Lower House (June 1910):—"National party of work," 255; Independents (in their two sections—Kossuthites, 53; and Justhists, 38), 91; other parties (Social Democrats, Christian Socialists, Farmers), 67.

The executive power of the kingdom is in a responsible ministry, consisting of a presidency and nine departments, namely:—

The Presidency of the Council.—Count Stephen *Tisza*, Privy Councillor, born April 22, 1865; appointed June 10, 1913.

1. The Ministry of Finance.—John *Teleszky*, Privy Councillor, born September 15, 1868; appointed April 22, 1912.

2. The Ministry of the King's Person (*ad latus*).—Erwin Baron *Rosznér-Rosneck*, Privy Councillor.

3. The Ministry of National Defence (Honvédelem).—Alexander von *Szurmayer*, Field-Marshal; appointed February 19, 1917.

4. The Ministry of the Interior.—John *Sándor*, Privy Councillor, born November 14, 1860, appointed June 13, 1913.

5. The Ministry of Education and of Public Worship.—Dr. Adalbert *Fankovich*, Privy Councillor, born April 29, 1865; appointed February 26, 1913.

6. The Ministry of Justice.—Dr. Eugen *Balogh*, Privy Councillor, born May 14, 1864; appointed January 4, 1913.

7. The Ministry of Industry and Commerce.—Baron John *Harkányi*, born April 6, 1859; appointed July 13, 1913.

8. The Ministry of Agriculture.—Baron Emeric *Ghillányi*, Privy Councillor, born 1860; appointed June 10, 1913.

9. The Minister for Croatia and Slavonia.—Emmerich von *Hidvéghety*, appointed January 21, 1916.

The provinces of Croatia and Slavonia have autonomy for home affairs, public instruction, and justice.

The Croatian-Slavonian Provincial Diet meeting annually at Zágráb (Agram), consists of 90 members, elected for five years, representing 21 town districts and 69 rural districts, and of personal voters (not more than half). The electors must have a low property qualification, be of certain professions, or pay a small tax. Personal voters are certain ecclesiastical and political dignitaries, and the members of certain noble families (Magnates) possessing the right by inheritance or by royal nomination. They must pay at least 2,000 crowns of land tax.

At the head of the autonomous provincial government, which has three departments (Interior, Public Instruction and Worship, and Justice), is the Ban, who is responsible to the Provincial Diet and to the Hungarian Prime Minister.

Ban.—Baron Iván *Skerlecz*, Privy Councillor, appointed November 27, 1913.

## II. LOCAL GOVERNMENT.

In Hungary a distinction is observed between communes which are large or small, or may be townships with regular magistrates, and municipalities, which are regarded as communes of a higher order. The communal electoral right is possessed by every male inhabitant over twenty years of age who for two years has paid the State tax. The representative body is composed half of members elected for six years, and half of persons who pay the highest-taxes. The committee consists of members appointed, in the towns for six years, in the rural communes for three years, with officials appointed for life. The counties and cities invested with similar rights are independent municipalities. Each has its council constituted similarly to the representative body of the communes; and the members are elected also for six years. All electors for the Parliament are qualified to vote. In Budapest they must be able to read and write. The executive is in the hands of the official body of the municipality, who sit and vote with the council.

In Croatia and Slavonia each county has an assembly similar to the Hungarian local representative bodies. The electoral qualification is the same as for the Diet. The municipalities within the county

(except Zágráb and Eszék) send delegates, and the higher county officials also sit and vote. In the rural communes the representative body is the council, elected for three years; in the towns for four years. In the former the executive is in the hands of the magistrates; in the latter, of the municipal council.

### Area and Population.

#### I.—PROGRESS AND PRESENT CONDITION.

The Hungarian dominions, including Croatia and Slavonia, have an area of 325,711 square kilometres, or 125,609 English square miles. At the last four census enumerations the total (civil and military) population was as follows :—

Year	Population	Absolute increase	Yearly increase per cent.
1880	15,739,259	—	—
1890	17,463,791	1,724,532	0·99
1900	19,254,559	1,790,768	0·93
1910	20,886,487	1,631,928	0·85

The following table gives further details :—

Provinces	Area : English square miles	Population, Dec. 31			Population per sq. mile 1910
		1890	1900	1910	
Civil population :					
Hungary Proper . .	109,188	15,162,988	16,721,574	18,142,200	1 6
Croatia and Slavonia .	16,421	2,186,410	2,400,766	2,602,544	159
Hungary . .	125,609	17,349,398	19,122,340	20,744,744	165
Population in active military service :					
Hungary Proper . .	—	98,876	116,681	122,333	—
Croatia and Slavonia .	—	15,517	15,538	19,410	—
Hungary . .	—	114,393	132,219	141,743	—
Total population :					
Hungary Proper . .	109,188	15,261,864	16,838,255	18,264,533	167
Croatia and Slavonia .	16,421	2,201,927	2,416,304	2,621,954	160
Total Hungary . .	125,609	17,463,791	19,254,559	20,886,487	166

In 1910, there were 10,345,333 males and 10,541,154 females.

The ethnical elements of the total population on the basis of language were as follows in 1900 and 1910 (in Hungary including Croatia and Slavonia):—

—	1900	1910	—	1900	1910
Hungarian (Magyar) . .	8,742,901	10,050,575	Ruthenian . . . .	429,447	472,587
German . . . .	2,135,181	2,037,435	Croatian . . . .	1,682,104	1,833,162
Slovak . . . .	2,019,641	1,967,970	Servian . . . .	1,048,645	1,106,471
Roumanian . . . .	2,799,479	2,949,032	Others . . . .	397,761	460,255

The Hungarians in Hungary Proper in 1900 numbered 8,651,520 (51·4 per cent.); and in 1910, 9,944,627 (54·5 per cent.); persons speaking the Hungarian language in Hungary Proper, in 1900, 10,036,249 (59·6 per cent.); and in 1910, 11,820,416 (64·7 per cent.).

There were 278,130 foreign residents in Hungary at the end of 1910, of whom 235,475 were Austrian, 8,655 Germans, 10,612 Italians, 5,640 from Bosnia and Herzegovina, 1,055 French, 2,389 Russians, 998 Swiss, 1,042 British, 1,674 Turks, and 10,590 others.

Population (1910) according to occupations: *see STATESMAN'S YEAR BOOK* for 1916, p. 709.

The town population of Hungary in 1890 numbered 2,821,563; in 1900 3,431,641; and in 1910, 3,959,289.

## II. MOVEMENT OF POPULATION.

Births, deaths and marriages:—

Year	Total Births (including Still-births)	Stillborn	Illegitimate (including Still-births)	Marriages	Deaths (including Still-births)	Surplus of Births over Deaths
1911	747,916	15,149	69,439	193,482	539,645	208,271
1912	782,231	16,340	72,230	182,373	508,062	274,169
1913	751,517	—	—	195,030	500,875	250,642

Births in 1914, 630,407; in 1915, 423,000; in 1916, 333,551. Deaths in 1914, 435,433; in 1915, 469,902; in 1916, 428,057.

The percentage of stillborn to total births in Hungary is 2·1 in 1912. The rate of illegitimacy is 9·2 per cent. of the whole.

Emigration statistics for 6 years:—

Year	Total emigrants	To America	To Rumania	Year	Total emigrants	To America	To Rumania
1908	52,942	38,214	6,457	1911	64,057	53,502	5,586
1909	113,315	101,421	6,639	1912	104,663	92,664	7,291
1910	96,324	85,248	5,451	1913	81,301	69,263	7,845

## III. PRINCIPAL TOWNS, WITH POPULATION.

1910			1910			1910		
Budapest	880,371		Kolozsvár	60,808		Makó		34,918

## Religion.

There is perfect equality among all legally recognised religions. These are:—The Roman and Greek Catholic, the Evangelical (Augsburg and Helvetian), the Unitarian, the Greek-Oriental, the Gregorian-Armenian, the

Baptist (since 1905), the Jewish, and the Mohammedan (since 1916). Each has the independent administration of its own affairs.

The following figures relate to 1912:—

Priests secular (not including bishops, canons, vicars, provosts, &c.):—		Members of orders:—	
		Roman Catholic	Male
Roman Catholic Church	6,665	Catholic	Female
Greek Catholic Church	2,424	Greek Catholic (male)	
Greek Oriental Church	2,861	Greek Oriental (male)	
		Protestant clergy	
		Jewish clergy	

The following table gives the division of the total population according to religion on the basis of the census of 1910:—

Religion	Number	Per cent. of pop.
Roman Catholics	10,888,138	52·1
Greek Catholics	2,025,508	9·7
Evangelical Helv.	2,621,329	12·6
Evangelical Augs.	1,340,143	6·4
Greek Oriental	2,987,163	14·3
Unitarians	74,296	0·3
Jews	932,458	4·5
Others	17,452	0·1
Total	20,886,487	100·0

### Instruction.

Public education in Hungary comprises the following grades:—(1) Infant schools; (2) elementary schools; (3) middle or secondary schools, gymnasia and realschools (in Croatia and Slavonia, realgymnasia); (4) preparatory and training institutions for infant-school teachers and male and female teachers; (5) academies (high schools) of law; (6) institutions for religious education; (7) universities; (8) polytechnica (technical high schools). The schools for special subjects, such as agricultural, industrial, commercial, mining, and military schools, are for the greater part administered by the competent ministries, while the philanthropic and artistic schools are placed under the authority of the Ministry of Public Instruction.

The progress of elementary education in Hungary in two intercensal periods is shown in the following statement:—

Civil Population	1890	1900	1910 <sup>1</sup>
Read and write	7,326,372	9,483,930	1,775,204
Read only	557,854	507,034	
Neither read nor write	9,465,172	9,131,376	9,111,283
Total	17,349,398	19,122,340	20,886,487

<sup>1</sup> Civil and military population.

School attendance is compulsory for children of six to twelve years, the industrial law of 1884 requires special courses for apprentices; and by the law of 1891, children from three to six years of age may be sent to infant schools, unless otherwise provided for.

Every parish or commune is bound to maintain an infant school. There were in 1912 altogether 2,885 infants' schools with 252,756 infants, and 10 training colleges for nurses.

Primary education is of three grades:—(1) Elementary schools; (2) high

primary schools for boys and girls separately, with, respectively, a three and two years' course for commercial or industrial education, and closely associated with the sixth class of the elementary school ; (3) the so-called 'burgher' schools (Polgári iskolák) for boys and girls separately, with, respectively, a six and a four years' course, are connected with the fourth class of the elementary school. There are also high schools for girls mostly supported by the State.

Every parish or commune is bound to have a school if the number of children of school age is thirty. For the support of the elementary schools every commune can levy an additional tax of 5 per cent. on the direct State taxes.

In the gymnasia and realschools (in Croatia and Slavonia, the realgymnasia) the curriculum extends over eight years. They are maintained by the State, by the larger communes, or (in the case of the denominational schools) by ecclesiastical foundations, with sometimes a subvention from the State. There were in 1911-1912, 192 gymnasia, with 3,971 teachers and 66,863 pupils ; 43 real schools, with 1,044 teachers and 14,938 pupils.

There are five universities maintained by the State, each comprising four faculties, viz., theology, law, medicine, philosophy (the university of Zágráb is without the faculty of medicine) : the university of Budapest, with 412 professors, &c., and 6,962 students ; the University of Kolozsvár, with 137 professors and 2,157 students ; the University of Zágráb (Agram), with 97 professors and 1,096 students in 1912, and the Universities of Pozsony (Pressburg) and Debreczen—the last two having been founded in 1912. There are also 47 theological colleges, viz., 29 Catholic, 4 Greek Catholic, 4 Greek Oriental, 9 Protestant, and 1 Jewish, with a total of 296 professors and 2,007 students ; and 10 law schools with 123 professors and 1,386 students. The technical high school (polytechnicum) in Budapest has 169 professors and 1,868 students. There were, in 1912, 66 institutes for agriculture, 673 for industries of all kinds, 187 for commerce, 55 for art and music, 6 for mining, 15 for military training, with 35,634 students and 3,568 teachers. There were of the 673 industrial schools, 599 for apprentices, with 4,378 teachers and 101,999 pupils ; of the 187 commercial schools, 99 for apprentices, with 522 teachers and 6,743 pupils. The number of pupils at elementary schools was 2,754,422 ; at middle schools, 86,378 ; at higher city schools (polgári iskolák), 98,125. Of the school children (in proper Hungary) 1,088,943 were Magyar (Hungarian). Of the 20,255 elementary schools, 13,270 were Magyar ; 458 German ; 403 Slovaks ; 2,257 Rumanian ; 1,821 Croatian and Sero ; other languages, 79. The number of teachers in elementary schools was 36,870.

In 1912, 2,067 periodicals of various kinds were published in Hungary, 416 being political papers. Of the whole, 1,550 were in Hungarian (81·02 per cent. in Hungarian proper), 76 in Hungarian with another language, 167 in German, the rest being in Slovakish, Croatian, Servian, Ruthenian, French, Italian, &c.

### Justice and Crime.

In Hungary the ordinary judicial authorities are :—

The Royal Supreme Court (kir. Kuria) in Budapest and the Supreme Court of Justice (Table of Septemvirs) in Zágráb (Agram), of the highest instance in all civil and criminal matters ; 12 Royal Tables (királyi táblák) of second instance. As courts of first instance, 76 county courts (törvényszékek) with collegiate judgements ; 458 district courts (járásbíróságok) with single judges ; 15 jury courts, (sajtóbíróságok) for press offences, besides an army special court.

There are 11 penal establishments in Hungary for males, and 1 for females.

There have been convicted in Hungary proper for offences falling under the competence of the county courts and of the district courts 125,465 persons in 1911; and 128,435 in 1912; for offences within the competence of the administrative authorities, 543,764 in 1911, and 619,390 in 1912. In Croatia-Slavonia the number of the convicted at the county courts was 3,223 in 1911; at the district courts 30,368 in 1911.

### Pauperism.

In Hungary poor relief falls within the province of the Ministry of the Interior, but in the main is left to communal administration. In the smaller communes orphans and the indigent are cared for by official guardians and overseers while in the larger there are poor-houses, the funds being mostly derived from fines and taxes. The number of asylums for paupers and orphans is about 300. The Church and charitable societies also render assistance, and several millions of crowns are annually bestowed in legacies and gifts towards benevolent purposes.

### Finance.

Expenditure and revenue in thousands of crowns:—

	1910	1911	1912	1913 1	1914 2	1914-15

## Production and Industry.

### I.—AGRICULTURE AND FORESTRY.

The cultivation of the soil is the chief industry of Hungary, since (if we include the forests) it furnishes employment to 68·4 per cent. of the population. According to the census of 1900, 12,977,419 persons are supported by agriculture properly so-called ; 11,864 persons by dairy work, sheep breeding, and poultry ; 43,954 persons by market gardening and horticulture ; 132,399 by forestry, the chase, and charcoal-burning, and 9,447 by other agricultural occupations.

The total area of all the holdings in 1912 was 32,494,267 hectares (80,260,239 acres), and the different branches of culture were distributed as follows :—

Branch of culture (1912)	Hectares	Percentage of area
Arable land . . . . .	14,003,348	43·09
Gardens . . . . .	431,277	1·33
Meadows . . . . .	3,156,335	9·71
Pastures . . . . .	3,941,734	12·13
Vineyards . . . . .	321,386	0·99
Woodlands . . . . .	8,884,033	27·34
Reed-bank . . . . .	63,831	0·20
Infertile area . . . . .	1,692,323	5·21
Totals . . . . .	32,494,267	100·00

The estimated production of crops in Hungary in 1915 is as follows :—Wheat, 81,111,000 cwts., or 43·9 per cent. above last year's production ; rye, 22,735,000 cwts., an increase of 7·2 per cent. ; barley, 23,790,000 cwts., a decrease of 14·9 per cent. ; oats, 22,891,000 cwts., a decrease of 7·4 per cent. ; and maize, 92,835,000 cwt., an increase of 7·8 per cent.

The fruit crops of Hungary in 1913 are estimated as follows, in pounds :—Apples, 88,184,000 ; apricots, 23,659,800 ; grapes (for table), 22,046,000 ; peaches, 6,613,800 ; pears, 24,250,600 ; plums, 110,230,000 ; quinces, 1,102,300.

In 1912 the tobacco crop grown on 121,730 acres yielded 67,993 metric tons. The wine production in 1913 was 145,296,300 gallons. The sugar yield in 1916–17 was 2,120,000 metric cwts, the beet yield being 14,960,000 metric cwts. Hops in 1915 grown on 7,062 acres produced 4,667,000 pounds ; in 1914, the quantity was 5,333,000 pounds.

In Hungary there were (April, 1913) 2,005,019 horses, 905 mules, 16,157 asses, 6,206,867 cattle (including 161,683 buffaloes), 6,659,858 sheep, 6,824,657 pigs, 268,752 goats, and 607,986 beehives. The export of horses, cattle, and sheep far exceeds the imports.

In silk culture 66,280 families were engaged in 1912, compared with 1,059 in 1879. The produce of cocoons (1912) was 1,298 metric tons, the value being 110,819*l*.

In Hungary proper the inhabitants of 11,392 communes were engaged (1912) in rearing bees, which produced 2,679 metric tons of honey, and 163 metric tons of wax, of the value of 125,238*l*.

There are 64 agricultural institutions in Hungary with (1912) 2,408 pupils.

The total area under forest was in Hungary (1912), 8,948,875 hectares, of which 2,308,195 hectares are under oak, 4,695,883 hectares under beech, and 1,944,797 hectares under pine. The forests are mostly situated in the Carpathians and between the rivers Drava and Save.

## II.—MINING.

In Hungary were employed in mining and smelting works (1912) 72,352 men, 1,429 women, and 4,400 children, total, 78,181 persons; in salt works, 2,438 men, 1 woman, and 411 children, total, 2,850 persons.

Value of the principal mineral and furnace products in thousand crowns:

Mineral and furnace products	Thousand crowns				
	1910	1911	1912	1913	1914
Gold . . .	9,960	10,469	9,354	9,586	8,804
Silver . . .	1,079	907	1,023	820	830
Iron ore . . .	13,628	13,334	15,379	5,816	4,228
Pig iron . . .	40,987	43,848	46,447	51,116	40,254
Coal . . .	16,679	15,481	16,904	14,430	13,448
Lignite . . .	71,494	77,200	80,697	88,256	81,715

The steel production of Hungary totalled in 1915, 638,267 metric tons (623,468 in 1914).

## III.—MANUFACTURES.

In 1911-12 there were 84 breweries which brewed 64,589,575 gallons of beer; 58,587 distilleries, which produced 26,054,180 gallons of alcohol; 25 active sugar factories employing 20,763 workpeople, and yielding 424,048 metric tons of sugar. The number of tobacco manufactories (tobacco manufacturing being a State monopoly) was (in 1912) 22, occupying 20,309 workpeople and producing 637 million cigars and 2,374 million cigarettes. The number of mills (including Croatia and Slavonia) was (1906) 20,726, of which 2,040 were steam-mills, 183 mills driven by steam and water, 16,590 water-mills 562 motor mills, 700 wind-mills, and 651 tread-mills.

## Commerce.

The special commerce of Hungary for five years was as follows (in thousands of pounds sterling):—

—	1911	1912	1913	1914 <sup>1</sup>	1915 <sup>1</sup>
Imports . . .	1,000 <i>l</i> .	1,000 <i>l</i> .	1,000 <i>l</i> .	1,000 <i>l</i> .	1,000 <i>l</i> .
Exports . . .	86,755	92,173	84,535	42,620	27,033
	76,270	82,960	78,193	35,512	28,233

<sup>1</sup> First six months only.

## Chief imports and exports (in thousands of crowns):—

Imports	1912	1913	Exports.	1912	1913
Cotton and cotton wares	311,298	280,081	Cereals, flour, &c. . . .	637,004	562,684
Machinery and instruments . . . . .	120,682	78,960	Fruit, vegetables and plants . . . . .	56,626	74,818
Wool and woollen goods.	167,464	154,507	Live-stock . . . . .	304,477	321,236
Iron and ironware . . . . .	146,244	116,570	Beverages . . . . .	88,477	72,327
Leather and leather goods	129,681	123,907	Animal products . . . .	87,776	92,490
Wood, coal and peat . . . .	123,505	129,554	Sugar . . . . .	111,595	109,097
Made-up goods . . . . .	123,192	118,747	Wood, coal and peat . . .	93,881	90,177
Metal and metal goods . . .	76,005	63,628	Matches and fuses . . .	13,173	15,309
Cereals, flour, &c. . . . .	90,958	72,053	Grease . . . . .	43,558	46,350
Grease . . . . .	23,685	20,384	Leather and leather goods	37,304	36,368
Silk and silken goods . . . .	56,228	52,935	Iron and ironware . . . .	30,389	28,918
Precious metals . . . . .	77,818	68,746	Chemical substances . . .	29,495	27,437

In Hungary the values are fixed annually by a permanent commission, comprising merchants and a few representatives of industry and agriculture, with the approval of the Ministries of Finance, Commerce, Agriculture, and other authorities. In general, gross values are taken, and they are determined according to the value the goods represent at crossing of the frontier.

## Shipping and Navigation.

The commercial marine of Hungary in 1912:—

	Number of vessels	Tonnage	Crews
Sea-going vessels . . . . .	68	127,965	1,518
Coasting-vessels . . . . .	160	10,730	753
Fishing vessels, &c. . . . .	305	594	860
Total . . . . .	533	139,289	3,131

Of the total number of vessels 133 of 137,416 tons were steamers, and 400 of 1,873 tons were sailing vessels.

The progress of navigation is shown as follows:—

Year	Entered		Cleared	
	No.	Tonnage	No.	Tonnage
1910	35,120	4,552,114	35,113	4,566,755
1911	37,250	4,664,645	37,210	4,651,998
1912	33,771	4,713,866	33,779	4,728,424

## Internal Communications.

In 1913 the total length of navigable rivers and canals in Hungary was 3,727 miles, of which 2,177 miles were navigable for steamers.

The river traffic of Hungary during five years was as follows:—

Year	Number of steamboats <sup>1</sup>	Number of passengers carried <sup>2</sup>	Goods carried in tons <sup>2</sup>
1910	149	2,175,481	4,150,424
1911	166	2,443,353	4,744,130
1912	190	2,443,221	5,095,321

<sup>1</sup> Exclusive the Danube Steam Navigation Company.

<sup>2</sup> Inclusive the Hungarian traffic of the Danube Steam Navigation Company.

In 1912, the public roads of the Kingdom of Hungary had a length of 59,431 miles.

The following are railway statistics for 1912:—

Length of lines:—State lines, 5,061 miles (5,495 miles, December 31, 1915); Companies' lines worked by the State, 6,170 miles; Companies' lines worked by companies, 2,102 miles; total length, 13,333 miles, in 1915, 13,671 miles. Capital expenditure (1,000*l.*), 194,906; passengers carried (1,000's), 164,008; goods carried (1,000 tons), 83,629; receipts (1,000*l.*), 24,050; working expenses (1,000*l.*), 15,171. For the year 1915-16, the revenue from passenger traffic was 11,225,328*l.* and from goods traffic, 13,926,877*l.*

The following are statistics of the Hungarian post-office for three years:—

—	1912	1913	1914
Number of offices . . . . .	6,489	6,610	6,774
Letters and post-cards (1,000's) . . . . .	605,974	647,649	689,535
Newspapers (1,000's) . . . . .	221,045	—	—
Samples and printed packets (1,000's) . . . . .	126,886	141,726	152,455
Money and postal orders (1,000's) . . . . .	31,617	35,157	32,460
„ „ value (1,000 <i>l.</i> ) . . . . .	79,579	—	—
Parcels and money letters (1,000's) . . . . .	39,665	—	49,250

In 1914 there were in Hungary 5,380 telegraph offices and 16,740 miles of telegraph line with 103,540 miles of wire; number of messages, 15,470,000. In 1914 there were 2,535 urban telephone systems, with altogether 17,475 miles of line and 251,342 miles of wire, by which 212,382,000 conversations were held.

### Money and Credit.

Coinage of the Hungarian mint (in thousands of crowns):—

—	1908	1909	1910	1911	1912
	1,000 crowns	1,000 crowns	1,000 crowns	1,000 crowns	1,000 crowns
Gold :					
20-crown . . . . .	2,770	9,175	1,705	1,256	4,218
10-crown . . . . .	5,090	5,738	13,618	18,284	7,386
Silver . . . . .	9,715	5,295	1,207	6	12,006
Nickel . . . . .	4,036	1,722	4	5	5
Bronze . . . . .	330	382	107	6	4

On December 31, 1912, there were in Hungary 2,033 savings-banks and other banks with a total nominal capital of 1,641,054 crowns; mortgage-banks with nominal capital of 15,200,000 crowns; and 3,964 co-operative banks.

The following are statistics of the post-office savings-banks:—

—	1909	1910	1911	1912
No. of banks . . . . .	4,487	4,487	4,555	4,588
Depositors at end of year . . . . .	727,146	775,970	823,251	836,143
Value of deposits at end of year, in crowns . . . . .	98,554,000	107,853,000	116,522,000	108,295,000

## Diplomatic Representatives.

Diplomatic relations were broken off between the two countries by the declaration of war by Great Britain on Austria-Hungary on August 12, 1914. At that date His Excellency Count Albert Mensdorff-Pouilly-Dietrichstein was Austrian Ambassador in London, and the Rt. Hon. Sir Maurice de Bunsen, G.C.M.G., G.C.V.O., C.B., British Ambassador in Vienna.

## BOSNIA AND HERZEGOVINA.

**Government.**—The Provinces of Bosnia and Herzegovina were, by the Treaty of Berlin (July 13, 1878), handed over to the Austro-Hungarian Government for administration and military occupation. By autograph letter of October 5, 1908, addressed to the Premiers of the two States, the sovereignty of the Emperor-King Francis Joseph I. was extended over these two provinces. The direction of their administration is exercised by the Bosnian Bureau, entrusted to the common Austro-Hungarian Finance Minister in Vienna in the name of the Emperor-King.

*Common Minister of Finance and Administrator.*—Baron Stephen Burian.

*Governor* (resident in Sarajevo).—General Stephen von Sarkotich.

The chief authority in the province itself, with its seat in Sarajevo, is the provincial government (*Landesregierung*), in six departments, for internal affairs, finance, justice, matters of political economy, instruction and public works. For administration purposes there are 6 district (*Kreis*) and 54 county (*Bezirk*) authorities. The new Constitution was proclaimed on February 20, 1910. The Diet chosen by universal suffrage is competent to deal with provincial finance, taxes, railways, police, public works and civil and criminal law, subject to Austrian or Hungarian veto. There are 3 divisions of the electorate. The electors of the First Division are subdivided according to their qualification and the nature and amount of the taxes paid and in all three divisions the number of representatives in the Diet is fixed according to the number of the inhabitants professing each religion. The Jews have 1 seat, the Roman Catholics 16, the Mohammedans 24, and the Orthodox 31 seats. The Government appoints, besides, 20 members, 4 representing the authorities, 16 others being spiritual heads of the Orthodox, the Mohammedan, the Roman Catholic, and the Jewish religious organisations; total, 72 elected members and 20 nominated. The President and Vice-Presidents of the Assembly are appointed by the Emperor each Session, each religion being represented and holding the Presidency in turn.

**Area and Population.**—Bosnia and Herzegovina contain six districts (*Kreise*), with an area of 19,768 square miles. Population, 1910, 1,898,044 (994,852 males and 903,192 females). Estimated population, Dec. 31, 1912, 1,962,411, of whom there were: Mohammedans, 626,649; Servian Orthodox, 856,158; Roman Catholic, 451,686; Evangelical, 6,734; Greek Catholic, 8,605; Jews, 12,798; There was an increase in 1910 of 329,952 on the census of 1895, or 21·04 per cent.

The nationality is Croato-Servian, only in the greater towns there are Spanish Jews, and here and there gipsies and colonists of different nationality. The most populous towns are the capital, Sarajevo, with 51,919; Mostar, 16,392; Banja Luka, 14,800; and Tuzla, 11,333 (1910).

Vital statistics for 3 years were as follows :—

Year	Marriages	Births		Deaths	Net Increase
		Living	Dead		
1911	20,763	76,693	213	49,622	27,071
1912	16,323	81,994	178	48,416	33,578
1913	—	82,333	210	54,473	27,860

Of the number of living births (1913), 43,427 were boys and 38,906 girls.

**Instruction.**—In 1912 there were 6 gymnasia, 2 *Realschule*, 1 military college, 11 advanced schools for girls, 9 commercial schools, 544 elementary schools, 1,246 lower and 94 reformed Mohammedan schools, 1 Servian Orthodox, and 1 Roman Catholic seminary for priests, 38 Mohammedan schools for higher religious instruction, 3 training colleges for teachers, and a college for Mohammedan judges. Technical and industrial schools exist in most of the larger towns, and in the village schools the teaching of practical agriculture has been introduced. Elementary education is free, and under certain circumstances compulsory.

**Justice.**—There is an upper court of justice in Sarajevo, the 6 district (Kreis) courts and 53 county (Bezirk) courts of first instance. In every district court (Kreisgericht) and county court (Bezirksgericht) there are 2 assessors taken from the people to advise the judge in criminal causes

**Finance.**—The provisional budget estimates for 1916-17 were :—Revenue, 118,596,602 crowns ; total expenditure, 118,573,512 crowns.

The chief items of revenue are receipts from tobacco and railways ; those of expenditure are for railways, public worship and instruction, and troops.

**Production and Industry.**—The agricultural population in 1910 numbered 1,668,587 or 87·9 per cent. of the whole, but agriculture is still in a low state of development, though the soil is very fertile. Forest land occupies 49·8 per cent. of the whole area. Tobacco, an important crop, is a Government monopoly. In 1912, 1,648 metric tons of tobacco (value, 3,678,379 crowns ; 24 crowns = *fl.*) were exported. Maize (217,000 tons in 1912), wheat (81,000 tons in 1912), barley (62,000 tons in 1912), oats (69,000 tons in 1912), rye (11,000 tons in 1912), millet and buckwheat, potatoes (95,000 tons in 1912), flax, and hemp are cultivated. Both provinces have superabundance of fruit. In 1911 about 13,000 tons of dried plums and marmalade were exported, valued at 7,560,851 crowns.

The wine produced in Herzegovina is of good quality. Sugar-beet is cultivated, and there is a sugar factory at Usora, near Doboj. Silk-culture has been introduced. Timber is exported. Cattle-grazing and sheep-farming are important. In Bosnia and Herzegovina in 1910 there were 221,981 horses, 1,308,930 cattle, 1,393,068 goats, 2,499,422 sheep, and 527,271 swine.

Minerals are abundant ; mining is now carried on (mainly by the Government) for iron and copper, manganese, chromium, quicksilver, and coal. In 1915 the output of coal was 7,988,916 metric cwt. (8,068,310 in 1914), of iron ore 1,104,095 metric cwt. (1,788,301 in 1914), of manganese

104,221 metric cwts. (41,200 in 1914), of pig iron 257,009 metric cwts. (440,780 in 1914), of steel ingots 189,333 metric cwts. (285,203 in 1914), of rolled iron 140,192 metric cwts. (227,793 in 1914). There are salt-pits at Tuzla, and an ammoniac soda factory. In 1915 the output of salt was 1,465,354 hectolitres (1,577,248 in 1914). The total value of the output of the mining industry in 1915 was 7,700,000 crowns (6,670,000 in 1914). There are various factories for chemicals, sugar, timber, plum drying, matches, and sundry minor products.

**Commerce and Communications.**—Bosnia and Herzegovina belong to the Austro-Hungarian customs territory; their export to Austria-Hungary and foreign countries in 1912 was estimated at 130,179,153 crowns, and their import at 174,713,655 crowns.

A law providing for the exclusive application of the metric system passed through the Diet in November, 1910. Before that date, from 1878 onwards, the metric system of weights and measures was in use side by side with the Turkish system.

There were in 1915 956 miles of railway. There were in 1914 2,202 miles of telegraph lines, and 6,625 miles of wire. Post- and telegraph-offices, 249; messages, 1,383,600. The telephone service had in 1914, 119 miles of line and 990 miles of wire.

In 1914 there were transmitted 35,831,000 letters and postcards, and 11,342,000 pieces of printed matters, samples, and newspapers.

A post-office savings bank for Bosnia-Herzegovina was opened in July, 1911.

Military service is compulsory over 21 years of age. The native troops comprise 4 infantry regiments, 4 battalion *cadre* of reserve, 4 sections of train, 1 battalion of jägers, with a total of 7,200 men, on peace footing.

## BELGIUM.

(ROYAUME DE BELGIQUE.)

### Reigning King.

**Albert**, born April 8, 1875, son of the late Prince Philippe de Saxe-Coburg and Gotha and of Flanders (died November 17, 1905), and of the late Princess Marie de Hohenzollern-Sigmaringen (died Nov. 27, 1912); married Oct. 2, 1900, to Princess *Elizabeth of Bavaria*; succeeded his uncle Leopold II., Dec. 17, 1909.

*Children of the King.*—(1) Prince *Leopold*, Duke of Brabant, born Nov. 3, 1901. (2) Prince *Charles*, Count of Flanders, born Oct. 10, 1903. (3) Princess *Marie-José*, born Aug. 4, 1906.

*Sisters of the King.*—(1) Princess *Henriette*, born Nov. 30, 1870; married Feb. 12, 1896, to Prince Emmanuel of Orleans, Duke of Vendôme. (2) Princess *Josephine*, born Oct. 18, 1872; married May 28, 1904, to Prince Charles of Hohenzollern.

*Aunt of the King.*—Princess *Charlotte*, sister of Leopold II., born June 7, 1840; married July 27, 1857, to Archduke Maximilian of Austria, elected Emperor of Mexico July 10, 1863; widow June 19, 1867.

King Albert has a civil list of 3,300,000 francs.

The Kingdom of Belgium formed itself into an independent State in 1830, having from 1815 been a part of the Netherlands. The secession was decreed on October 4, 1830, by a Provisional Government, established in consequence of a revolution which broke out at Brussels, on August 25, 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on June 4, 1831; he ascended the throne July 21, 1831. By the Treaty of London, Nov. 15, 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, April 19, 1839, which established peace between King Leopold I. and the King of the Netherlands, that all the States of Europe recognised the Kingdom of Belgium.

On the outbreak of the Great War (July, 1914), Germany invaded Belgium. On August 20, 1914, the Germans occupied Brussels, Antwerp on October 9, 1914, and Ostend on October 15, 1914. The Belgian Government on October 13 withdrew to Le Havre, in France, where it was assured full sovereign rights and the complete exercise of its authority and governmental duties.

Germany has taken over the civil government of the occupied territory.

### Constitution and Government.

According to the Constitution of 1831 Belgium is 'a constitutional, representative, and hereditary monarchy.' The legislative power is vested in the King, the Senate, and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his ministers, who thus becomes responsible for it. The King convokes, prorogues, and dissolves the Chambers. In default of male heirs,

the King may nominate his successor with the consent of the Chambers. If the successor be under eighteen years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

The Senate consists of members elected for eight years, partly directly and partly indirectly. Their total number is 120, of whom 27 are elected by the Provincial Councils. The number elected directly is equal to half the number of members of the Chamber of Representatives, and is proportioned to the population of each province. The constituent body is similar to that which elects deputies to the Chamber, except that the minimum age of electors is fixed at thirty years. In the election of members both of the Senate and Chamber of Representatives directly, the principle of proportional representation of parties was introduced by Law of December 29, 1899. In 1912-13 the number of electors for the Senate was 1,483,994, of whom 761,864 had each one vote, 402,444 two votes, and 319,686 three votes. Senators elected indirectly are chosen by the provincial councils, two for each province with less than 500,000 inhabitants; three for each with a population up to 1,000,000; and four for each with over 1,000,000. No one, during two years preceding the election, must have been a member of the council appointing him. All senators must be at least forty years of age, and those elected directly must pay not less than 1,200 francs in direct taxes, or own immovable property in Belgium yielding an income of 12,000 francs. In provinces, however, where the number eligible for the Senate would be less than one in 5,000 of population, the list is extended to this proportion by admission of the most highly taxed. Sons of the King, or failing these, Belgian princes of the reigning branch of the Royal Family are by right Senators at the age of eighteen, but have no voice in the deliberations till the age of twenty-five years.

The members of the Chamber of Representatives are all elected directly by the electoral body. Their number at present, 186 (law of May 2, 1912), is proportioned to the population, and cannot exceed one for every 40,000 inhabitants. They sit for four years, one-half retiring every two years, except that after a dissolution a general election takes place. Every citizen over twenty-five years of age, domiciled for not less than one year in the same commune, and not legally disqualified, has a vote. Every citizen over thirty-five years of age with legitimate issue, and paying at least 5 francs a year in house tax, has a supplementary vote, as has also every citizen over twenty-five years of age owning immovable property to the cadastral value of 2,000 francs, or having a corresponding cadastral income from such property, or who for two years has derived at least 100 francs a year from Belgian funds either directly or through the Savings Bank. Two supplementary votes are given to citizens over twenty-five years of age who have received a diploma of higher instruction, or a certificate of higher secondary instruction, or who fill or have filled offices or are engaged in private professional practice, implying at least average higher instruction. No person has more than 3 votes; failure to vote is a misdemeanour, punishable by law. In 1912-13 the number of electors for the Chamber was 1,745,666, of whom 1,005,094 had one vote, 412,721 two votes, and 327,851 three votes. Deputies must be not less than twenty-five years of age, and resident in Belgium. Each deputy has an annual indemnity of 4,000 francs (160*l.*), and a free pass all the year over Government and Companies railways between his residence and the place of Session.

The Senate and Chamber meet annually in the month of November, and must sit for at least forty days; but the King has the power of convoking them on extraordinary occasions, and of dissolving them either simultaneously

or separately. In the latter case a new election must take place within forty days, and a meeting of the Chambers within two months. An adjournment cannot be made for a period exceeding one month without the consent of the Chambers. Money bills and bills relating to the contingent for the army originate in the Chamber of Representatives.

The Executive Government consists of 10 departments, under the following Ministers:—

*Prime Minister and Minister of War.*—Ch. de Broqueville. Appointed November 11, 1912.

*Minister of Education.*—P. Poulllet. Appointed June 17, 1911.

*Minister of Interior.*—Paul Berryer. Appointed September 5, 1910.

*Minister of Agriculture and of Public Works.*—G. Hellegatte. Appointed November 11, 1912.

*Minister of Foreign Affairs.*—Baron Beyens. Appointed July 26, 1915.

*Minister of Justice.*—H. Carton de Wiart. Appointed June 17, 1911.

*Minister of the Colonies.*—J. Renkin. Appointed October 30, 1908.

*Minister of Industry, and Labour.*—H. Hubert. Appointed May 2, 1907.

*Minister of Finance.*—A. Van de Vyvere. Appointed November 11, 1912.

*Minister of Railways, Marine, Posts and Telegraphs.*—P. Segers. Appointed November 11, 1912.

*Ministers without Portfolio.*—Count Goblet d'Alviella, P. Hymans, and E. Vandervelde. Appointed December 20, 1915.

Besides the above responsible heads of departments, there are a number of 'Ministres d'Etat,' without portfolio, called on special occasions by the sovereign.

The Ministry of Marine was created in November, 1912.

#### *Local Government.*

The provinces and communes (2,632 in 1911) of Belgium have a large amount of autonomous government. The provincial electors are the same as those who elect the senators directly, the qualifications of the communal electors are also the same, except that these must have been domiciled at least three years in the commune, and a supplementary vote is given to owners of real property yielding an income of at least 150 francs. No one has more than 4 votes. In communes with over 20,000 inhabitants there are councillors elected directly, by single vote, by citizens enrolled on the communal electoral lists, and possessing the qualifications requisite for electors to the Councils of Industry and Labour; half the councillors are appointed by the working-men electors, and half by the electors who are industrial heads (chefs d'industrie). In communal elections vote by ballot is suppressed, except when there is a single mandate to be conferred. Candidates obtaining an absolute majority are declared elected; others have seats allocated in accordance with the system of "Proportional Representation." In the year 1912-13 there were 1,483,994 provincial and 1,344,565 communal electors. To be eligible to the Provincial or Communal Council, persons must be twenty-five years of age and domiciled in the province or commune. Half the Provincial Council is renewed every four years, and it meets fifteen days each year. There is a permanent deputation of six members elected, which is presided over by the Governor of the province. All provincial and communal interests, including local finances, are under the care of the Council, as far as they are not provided for in the general administration. The Communal Councils are elected for eight years, half

being renewed every four years. In each commune there is a college composed of the burgomaster, president, and a certain number of aldermen, corresponding almost to the permanent deputation of the Provincial Council, and both are the organs of the central administration.

### Area and Population

Belgium has an area of 29,451 square kilometres, or 11,373 English square miles. The following table shows the population at various dates :—

Census Years	Population	Total Increase	Increase per cent. per annum	Census Years	Population	Total Increase	Increase per cent. per annum
1866	4,827,833	298,372	·65	1890	6,069,321	549,312	·99
1876	5,336,185	508,352	1·05	1900	6,693,548	624,227	1·03
1880	5,520,009	183,824	·85	1910	7,423,784	730,236	1·09

Area and population of provinces :—

Provinces	Area : Eng. sq. miles	Population		Population per sq. mile, 1910
		Census Dec. 31, 1910	Estimated Dec. 31, 1912	
Antwerp (Anvers)	1,093	968,677	1,004,909	884
Brabant	1,268	1,469,677	1,522,941	1,158
Flanders	West	874,135	884,777	699
	East	1,120,335	1,134,079	967
Hainaut	1,437	1,232,867	1,247,042	857
Liège	1,117	888,341	896,649	798
Limbourg	931	275,691	284,171	296
Luxembourg	1,706	231,215	232,900	135
Namur	1,414	326,846	364,319	231
Total	11,373	7,423,784	7,571,387	652

In 1910 there were 3,680,790 males and 3,742,994 females, or 98 males for every 100 females. In 1912 there were 3,756,872 males, 3,814,505 females. Of the population in 1910 (exclusive of children under 2 years of age), 2,833,334 spoke French only, 3,220,662 Flemish only, 31,415 German only, 871,288 French and Flemish, 74,993 French and German, 8,652 Flemish and German, and 52,547 spoke all three languages. Civil condition of the population in 1910 :—

—	Unmarried	Married	Widowed	Divorced
Males	2,169,253	1,370,778	134,345	6,414
Females	2,092,618	1,371,102	270,929	8,345

In 1910 there were 254,547 foreigners (121,684 males and 132,863 females) in Belgium. Of these 70,950 were Dutch, 80,765 French, 57,010 German

10,367 Luxembourgais, 6,974 British, 4,498 Italian, 5,927 Austro-Hungarian, 7,491 Russian, 2,335 Swiss, and 8,238 of other nationalities.

Statistics for occupations in 1900 (the latest available) will be found in THE STATESMAN'S YEAR BOOK for 1913.

Births, deaths, and marriages :—

Year	Total Living Births	Still-born	Illegitimate (Living)	Illegitimate per 100 Births	Deaths	Marriages	Surplus of Births over Deaths
1910	176,413	8,008	10,837	6.14	112,826	58,776	63,587
1911	171,802	7,557	10,767	6.27	122,843	59,370	48,959
1912	171,167	7,789	—	—	113,378	61,278	58,809

Divorces : 1907, 841 ; 1908, 892 ; 1909, 1,039 ; 1910, 1,089 ; 1911, 1,081.

The following table shows the immigration and emigration :—

	1908	1909	1910	1911	1912
Immigration . . . . .	38,155	39,488	44,950	41,062	42,980
Emigration . . . . .	32,294	39,190	38,854	33,007	35,775
Excess of immigration . . . . .	+5,861	+4,298	+6,096	+8,055	+7,205

The most important towns, December 31, 1912 :—

Brussels and suburbs <sup>1</sup> . . . . .	663,647	Verviers . . . . .	45,964	Namur . . . . .	32,453
Antwerp (Anvers) . . . . .	312,884	Bruges . . . . .	53,635	Ostend . . . . .	43,002
Liège . . . . .	170,634	Louvain . . . . .	42,482	St. Nicolas . . . . .	35,128
Ghent (Gand) . . . . .	167,477	Seraing . . . . .	41,833	Alost . . . . .	35,603
Mechlin (Malines) . . . . .	59,735	Tournai . . . . .	37,349	Mons . . . . .	27,805
		Courtrai . . . . .	36,029	Charleroi . . . . .	29,452

<sup>1</sup> The suburbs comprise 8 distinct communes.

## Religion.

Of the inhabitants professing a religion the majority is Roman Catholic. But no inquisition on the profession or faith is now made at the censuses, and therefore, the last available figures, those of 1891, are the only clue to the numbers of the three dominant faiths. According to these there were :— Protestants and Anglicans 27,900 ; Jews, 13,200. There are, however, statistics concerning the clergy, and according to these there were in 1913 :— Roman Catholic higher clergy 85 ; inferior clergy, 5,694 ; Protestant pastors, 33 ; Jews (rabbis and ministers) 14. The State does not interfere in any way with the internal affairs of either Catholic or Protestant Churches. There is full religious liberty, and part of the income of the ministers of all denominations is paid from the national treasury.

In 1911 there were six Roman Catholic dioceses, 200 deaneries, 6,476 Catholic churches and chapels, 6 large and 11 small seminaries. In 1900 there were 2,474 convents, of which 291, with 6,237 inmates, were for men, and 2,183, with 31,668 inmates, for women.

The Protestant (Evangelical) Church is under a synod.

### Instruction.

Of the four universities Ghent and Liège are State, Brussels and Louvain free.

Universities 1911-12	Students of					Total
	Theology	Jurisprudence	Philosophy	Medicine	Sciences	
Brussels . . .	—	199	144	278	297	918
Ghent . . .	—	200	86	150	99	535
Liège . . .	—	468	175	241	915	1,803
Louvain . . .	90	675	422	599	314	2,100

Attached to the universities are various special technical schools, 2,801 students in 1911-12. There are 6 commercial high schools; the Royal Academy of Fine Arts at Antwerp, 686 students in 1911; 84 schools of design, 15,427 students; royal conservatoires and other schools of music 20,545 students in 1911. Public schools, 1911:—

—	No.	Pupils	—	No.	Pupils
Royal Atheneums and colleges . . .	35	8,062	Middle-class normal schools	4	207
Middle-class schools (male) . . .	90	19,222	Primary normal schools . . .	57	4,697
Middle-class schools (female) . . .	44	9,777	Primary schools . . .	7,590	934,830
			Infant „ . . .	3,186	275,911
			Adult „ . . .	4,940	246,292

There are many private or free schools—infant, primary, and adult schools mostly under ecclesiastical care.

Each commune must have at least one primary school. The cost of primary instruction devolves on the communes, with subsidies from the State and provinces. The total sum spent on elementary education in 1910 was 57,887,553 francs.

The proportion of the population (deduction made of children of less than 8 years), who could not read or write at the census of 1910 was 13·1 per cent.; in 1900 was 19·1 per cent.; in 1890, 25·0 per cent.; in 1880, 30·26 per cent. In 1913, of the 67,396 young men called out for military service, 4,207, or 9·24 per cent., could neither read nor write; in 1900 the corresponding percentage was 10·10; and in 1890, 15·92.

### Justice and Crime.

Judges are appointed for life. There is one Court of Cassation, three Courts of Appeal, and Assize Courts for criminal cases. There are 26 judicial districts, each with a Court of first instance. In each of the 222 cantons is a justice and judge of the peace. There are, besides, various special tribunals. There is trial by jury. The Gendarmerie (3,523) and the Garde Civique (46,417) are used for the maintenance of internal order.

The mean number of inmates of the various classes of prisons were :—

—	1906	1907	1908	1909	1910	1911
Central prisons .	746	745	734	738	740	721
Secondary „ .	4,009	4,189	4,175	4,165	3,633	4,104
Reformatories <sup>1</sup> .	190	168	142	144	136	136

<sup>1</sup> The figures show only the number of children in the correctional branch of the State charity schools annexed to the Ghent central prison.

### Pauperism.

There are numerous private charitable associations, but the only public charity institutions are refuges, *dépôts de mendicité*, hospitals, and the *bureaux de bienfaisance*, under the Communal Councils, while the provinces contribute to maintain certain classes of hospitals, refuges, or almshouses, and asylums. The communes must furnish assistance to their paupers. The charity institutions received in donations and legacies 1,904,130 francs in 1911; Outdoor relief is provided under certain conditions. Statistics of *dépôts de mendicité* for the reception of beggars and vagabonds (adults) :—

Year	Total Entries	Mean Population	Year	Total Entries	Mean Population
1908	4,635	5,421	1910	4,597	5,676
1909	4,751	5,724	1911	4,280	5,645

### State Finance.

Revenue and expenditure in thousands of francs :—

Years	Revenue			Expenditure		
	Ordinary	Extra-ordinary	Total	Ordinary	Special	Total
	1,000fr.	1,000fr.	1,000fr.	1,000fr.	1,000fr.	1,000fr.
1910	682,487	132,918	815,405	672,954	156,502	829,456
1911	695,252	42,771	738,023	689,166	121,761	810,927
1912	755,685	21,816	777,501	749,255	146,518	895,773
1913	788,614	19,174	807,788	787,856	140,663	928,519
1914	807,314	—	—	806,754	—	—

For the proposed budget for 1914 see THE STATESMAN'S YEAR-BOOK for 1916, p. 733.

National liabilities (consolidated debt) on January 1, 1914 :—

	Francs
Share of the Netherlands debt at 2½ per cent. .	219,959,632
Loans at 3 per cent. . . . .	3,523,067,806
Total. . . . .	3,743,027,438 (149,721,098 <i>l.</i> )

Almost the entire debt was raised for and devoted to works of public utility. There is a sinking fund for all descriptions of the debt, except the 2½ per cent. old debt. The debt charge amounted to 127,487,910 francs (5,099,516*l.*) in 1914.

The estimated revenue of the German Governor-General for 1916 amounted to 248,649,935 francs, and the expenditure to 274,480,435 francs, leaving a deficit of 25,830,500 francs.

### Defence.

According to the new Military Law passed in 1913, the Belgian Army is recruited by means of annual calls to the Colours and by voluntary engagements, the former consisting of 49 per cent. of those inscribed on the rolls. Military service is compulsory for those called to the Colours.

The young men of the contingent serve for 15 months in the infantry, fortress artillery and engineers: for 21 months in the field artillery: and for 24 months in the cavalry. The total length of service is for 8 years in the active army, followed by 5 years in the reserve.

The reserve cannot be called out for active service except in the event of war or if the country is threatened. The 11th, 12th and 13th Classes are not mobilized except in case of absolute necessity and are employed in the defence of fortified places and in the non-combatant services.

The passage of one Class to the following one, and the sending of the soldiers on leave take place on December 15, viz., 3 months after the expiration of the year of military service. In the event of war or if the Country is in danger the King may call out as many of the Classes on leave that he considers necessary, commencing with the last class sent on leave. He may also suspend the granting of leave to the soldiers and volunteers of the different categories.

During the war voluntary enlistment has been greatly extended and compulsion has been enforced on men between the ages of 18 and 40.

Reservists of the active army are subject to recalls to the Colours of 4, 6 or 8 weeks, according to the branch of the service to which they belong. These recalls take place during the 2nd, 3rd or 4th year of service.

The field army consists of 6 army divisions and of 2 cavalry divisions.

The army divisions consist of a varying number of mixed brigades (infantry, artillery, machine guns and cavalry) of the divisional cavalry, divisional cyclists, artillery groups, field telegraph and searchlight units, engineer companies and a divisional transport corps.

The cavalry divisions normally consist of 2 brigades of 2 regiments, cyclists, machine gun sections, horse artillery batteries, field telegraph units, pioneer pontoon cyclists, and a divisional transport corps.

The Grand General Staff, in addition, has at its disposal heavy artillery units, trench mortars, aviation, aerostation, telegraph, bridging equipment, railway and engineer units.

The army estimates for 1914 amount to 101,096,455 francs (4,043,850*l.*). A portion of the total is assigned for aviation purposes. Belgium has no navy.

### Production and Industry.

#### I. AGRICULTURE.

In each province there is an official Agricultural Commission, delegates from which, along with specialists, form a supreme council of agriculture.

Of the total area, 2,945,589 hectares, 1,736,174 are under cultivation, 521,495 under forest, 190,444 fallow or uncultivated, the rest roads, marshes, rivers, &c.

The following figures show the yield of the chief crops for three years:—

Crop	Acreage			Produce in cwts.		
	1911	1912	1913	1911	1912	1913

<sup>1</sup> Tons.

The average value of the total products of the forests is about 21,653,482 francs.

On December 31, 1913, there were 267,160 horses, 1,849,484 horned cattle, and 1,412,293 pigs.

## II. MINING AND METALS AND OTHER INDUSTRIES.

Of the more important industries the following may be mentioned: artificial silk, motor cars, glass, iron and steel, lace (particularly hand-made lace), linen, and gloves.

1,550 quarries in 1912, workmen 35,532, value of products 69,758,300 francs; workmen engaged in metallic mines 264; iron ore produced in 1900 247,890 tons, valued at 1,320,000 francs; in 1912, 167,370 tons, valued at 736,600 francs. Coal mines in 1912, 209, of which 126 were worked: workpeople, 1910, 143,701; 1911, 142,580; 1912, 145,670. Production of coal:—

	1907	1908	1909	1910	1911	1912
Tons (1000)	23,705	23,558	23,517	23,916	23,053	22,972
Value in 1000 frs.	399,657	308,579	837,906	348,877	340,279	380,444

In 1915 the production of coal amounted to 14,244,173 metric tons (22,841,000 in 1913); of briquettes, 1,202,625 metric tons (2,600,000 in 1913); and of coke, 484,481 metric tons (3,400,000 in 1913).

Iron ore, from Luxemburg, was imported to the value of 9,224,891 francs in 1910; 8,231,724 francs in 1911; 9,165,390 francs in 1912.

Pig and manufactured iron produced:—

	1908	1909	1910	1911	1912
Pig iron					
Tons	1,270,050	1,616,370	1,852,090	2,046,280	2,301,290
Value (1,000 fr.)	85,883	100,582	120,761	133,664	160,836
Manufactured iron					
Tons	306,650	316,990	299,500	290,270	334,750
Value (1,000 fr.)	41,584	45,653	39,494	37,487	46,025
Steel ingots					
Tons	1,198,000	1,580,850	1,892,160	2,192,630	2,515,040
Value (1,000 fr.)	107,095	128,950	161,606	201,705	242,377
Steel rails, &c.					
Tons	989,400	1,264,650	1,334,550	1,654,960	1,903,270
Value (1,000 fr.)	137,835	167,457	192,220	210,370	257,819

In 1913, 2,466,700 metric tons of pig-iron were produced.

In 1911 there were 89 sugar manufactories, produce 234,764 tons of raw sugar; 21 refineries, output 121,226 tons; 125 distilleries, output 73,864 kilolitres of alcohol at 50° G.-L.

In 1911, 616 fishing vessels caught fish to the value of 6,381,939 francs.

## Commerce.

## SPECIAL COMMERCE.

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1911	180,333,920	143,213,985	1913	183,345,000	143,973,000
1912	198,320,368	158,059,142	1914 <sup>1</sup>	92,126,000	74,159,000

<sup>1</sup> First 6 months.

Special imports, 1912 (4,958,009,199 francs), included imports by sea, 2,943,215,000 francs, by land, railway, canals and rivers, 1,855,257,000 francs; exports, by sea, 1,497,512,000 francs, by land, railway, canals and rivers 2 370,067,000 francs.

Imports for home consumption, exports of Belgian origin, and transit trade, in millions of francs :—

—	1906	1907	1908	1909	1910	1911	1912
	Million frs	Million frs	Million frs	Million frs	Million frs	Million frs	Million frs
Imports .	3,454.0	3,773.6	3,327.4	3,704.3	4,265.0	4,508.5	4,958.0
Exports .	2,793.8	2,848.1	2,506.4	2,809.7	3,407.4	3,580.3	3,951.5
Transit .	2,268.8	2,343.0	2,021.0	2,290.3	2,287.2	2,298.0	2,437.3

The customs receipts amounted, in 1910 to 67,376,434 francs; in 1911, 65,425,120 francs (2,617,004l.); in 1912, 74,460,572 francs (2,978,420l.). The commercial treaty of 1862 provided for the "most favoured nation" treatment between Great Britain and Belgium. This treaty terminated in 1878, but since then the system in force under the treaty has been continued by an arrangement terminable after 3 months' notice.

The amount of revenue collected by means of a tariff on imported goods is very small, and when compared with the value of the entire imports it will be found that the average duty charged in relation to the entire imports amounts to less than 1.5 per cent. The customs tariff is intended more as a protection to home industries than as a means of revenue production.

Leading articles of special commerce for 2 years in thousands of francs :—

Imports		1912	1913	Exports		1912	1913

The vessels entered and cleared in 1912 were as follows :—

Nationality	Entered		Cleared	
	No.	Tonnage	No.	Tonnage
Belgian . . .	1,962	1,856,832	1,961	1,871,603
British . . .	5,152	7,079,203	5,145	7,037,734
German . . .	1,768	4,269,515	1,748	4,239,807

## Internal Communications.

The total length of the roads in Belgium (1911) was as follows :— State roads, 5,072 miles ; provincial roads, 987 miles ; conceded roads, 140 miles ; by-roads, 19,347 miles ; total, 25,446 miles. The majority of the roads are paved with stone.

The total length of navigable waterways (rivers and canals) in 1911 was 1,238 miles.

The length of railways (1912) :— State lines, 2,708 miles ; private lines, 190 miles ; light railways, 2,503 miles ; total, 5,401 miles (5,335 in 1911).

Passengers conveyed by State railways in 1912, 191,814,188, by companies 19,232,932. Gross receipts 1912 for the State 331,120,556 francs ; for companies 35,219,722 francs ; expenses for the State 229,672,818 francs ; for the companies 14,588,366 francs. The first cost of State railways to end of 1912, 2,860,257,106 francs ; net receipts 101,447,738 francs ; financial charges 105,616,663 francs.

The work of the Post Office in Belgium in four years was as follows :—

—	1909	1910	1911	1912
Private letters . . .	193,620,497	208,696,675	218,176,673	222,026,772
Official letters . . .	35,473,873	36,091,149	37,392,456	37,822,707
Post-cards . . .	112,601,424	119,736,212	123,255,448	125,215,102
Printed matter . . .	220,865,628	246,988,121	261,797,474	278,355,172
Newspapers . . .	160,521,278	171,964,993	180,198,608	188,088,611

On December 31, 1912, there were 1,708 post offices in Belgium. The gross revenue of the Post Office in the year 1912 amounted to 43,419,097 francs, and the expenditure to 23,912,334 francs.

The telegraphs in Belgium carried 24,886,700 despatches, private and official, in the year 1912. In 1912 the total length of public telegraph lines was 4,985 miles, and the length of wires 26,365 miles, exclusive of railways and canal telegraphs. There were in 1912, 1,679 telegraph offices. Receipts in 1912 (telegraphs and telephones), 21,352,631 francs; expenses (telegraphs and telephones), 17,544,592 francs.

In 1912 there were 262 urban telephone systems with 163,212 miles of wire, and the inter-urban systems had 26,366 miles of wire; total number of conversations 135,200,472 in 1912.

### Money and Credit.

No gold has been minted since 1882, and no silver 5-franc pieces since 1876.

The one bank of emission in Belgium is the National Bank, instituted 1850. By law of March 26, 1900, its constitution was modified, and its duration extended to January 1, 1929. Its capital and reserve amounted in 1912 to 90,693,280 francs. It is the cashier of the State, and is authorised to carry on the usual banking operations. Its situation on December 31 of the years 1914 and 1915, was:—

	Francs 1911	Francs 1915
Coin (gold and silver) and bullion . . . . .	293,360,604	507,306,592 <sup>1</sup>
Note circulation . . . . .	1,614,844,992	1,318,874,768

During the German occupation the Société Générale de Belgique has been recognised as the national bank of issue, and its note issue is shown as follows:—

	Francs March 8, 1917	Francs March 23, 1916
Coin (Belgian and German) . . . . .	12,867,542	189,794,415
Note circulation . . . . .	855,860,095	641,235,939

There are joint-stock and private banks, also agricultural banks, credit unions, and popular banks. The following are statistics of the State savings-banks:—

Year	Offices	Depositors	Amount of Deposits at end of year	Year	Offices	Depositors	Amount of Deposits at end of year
			Francs				Francs
1909	1,206	2,710,112	920,145,054	1911	1,266	2,901,793	1,007,933,463
1910	1,217	2,808,549	964,668,344	1912	1,286	3,013,296	1,057,758,520

### Money, Weights, and Measures.

The *Franc* . . . . . Par value 25·22½ to £1 sterling  
Belgium belongs to the Latin Monetary Union.

The weights and measures are those of the metric system.

<sup>1</sup> This sum included 262,775,929 francs in gold and German currency to the value of 242,329,040 francs.

## Diplomatic Representatives.

### 1. OF BELGIUM IN GREAT BRITAIN.

*Envoy and Minister.*—Paul Hymans : appointed February, 1915.

*Counsellor of Legation.*—G. de Ramaix.

*First Secretaries.*—Charles Maskens and Count Philippe de Beaufort.

*Second Secretary.*—Count G. de Hemricourt de Grunne.

*Attachés.*—Harold Bernard and Prince Reginald de Croy.

*Head of the Belgian Military Mission, attached to the Legation.*—General Count de Jonghe d'Ardoye.

*Military Attaché.*—Major R. Maton, C.B.

*Consul-General in London.*—E. Pollet.

There are Consular representatives of Belgium in the following towns:—

Aberdeen, Arbroath, Belfast, Berwick, Birmingham, Bradford, Bristol, Cardiff, Cowes, Dartmouth, Dover, Dublin, Dundee, Edinburgh, Falmouth, Glasgow, Goole, Grimsby, Guernsey, Harwich, Hull, Leith, Leeds, Lerwick, Limerick, Liverpool, London, Manchester, Middlesbrough, Milford Haven, Newcastle, Plymouth, Portsmouth, Queenstown, Ramsgate, Sheffield, Southampton, Sunderland, Swansea, Yarmouth, and other places.

### 2. OF GREAT BRITAIN IN BELGIUM.<sup>1</sup>

*Envoy and Minister.*—Hon. Sir F. H. Villiers, G.C.V.O., K.C.M.G., C.B., appointed October, 1911.

*Secretary.*—Lord Kilmarnock.

*Honorary Attaché.*—C. K. Webber.

There is a Consul-General and three Vice-Consuls at Antwerp, and Vice-Consuls at Bruges, Brussels, Charleroi, Ghent, Liège, Ostend, and Spa.

## BELGIAN CONGO

(CONGO BELGE.)

**Constitution and Government.**—The Congo Independent State was founded in 1885 by Leopold II., King of the Belgians, and the State was placed under his sovereignty, but its perpetual neutrality, in accordance with the provision of Chapter III. of the General Act of Berlin (1885), was guaranteed. [Concerning this Act, see STATESMAN'S YEAR-BOOK for 1908—p. 874.]

The annexation of the State to Belgium was provided for by treaty of November 28, 1907, which was approved by the chambers of the Belgian Legislature in August and by the King on October 18, 1908. The Minister for the Colonies is appointed by the King, and is a member of the Council of Ministers. He is President of the Colonial Council, consisting of 14 members, 8 of whom are appointed by the King, and 3 chosen by the Senate and 3 by the Chamber of Representatives. One of those appointed by the King, and one chosen by the Legislative Chambers, retire annually, but may be reappointed. The King is represented in the Colony by a Governor-General, assisted by several vice-Governors-General. The budget is presented annually to the Chambers, and voted by them; the financial accounts have to be verified by the Court of Accounts. An annual report on the Congo Administration has to be presented to the Chambers along with the budget.

The Annexation has been recognised by all the Powers.

*Governor-General.*—M. Henry (appointed January 4, 1916).

*Deputy Governor-General of Katanga.*—M. de Meulemeester (appointed 1916).

*Deputy Governor-General of the Eastern Province.*—J. P. Malfeyt (appointed November 7, 1913).

The precise boundaries of the Congo Colony were defined by the neutrality declarations of August, 1885, and December, 1894, and by treaties with Germany, Great Britain, France, and Portugal.

The territory is divided into twenty-two administrative districts (March 28, 1912):—Lower Congo, Middle Congo, Kwango, Lake Leopold II., Equator, Lulonga, Bangala, Ubangi, Sankuru, Kasai, Lower Uele, Upper Uele, Ituri, Stanleyville, Aruwimi, Iowa, Kivu, Maniema, Lomami, Tanganika—Moero, Lulua, and Upper Lnapula. The last four districts form the sub-government of Katanga, with its capital at Elisabethville; the first ten districts form the government general of Belgian Congo, with Boma as its capital, and the remaining eight districts form the sub-government of the Eastern Province, with its capital at Stanleyville. At the head of each district there is a commissioner. In 1916 there were altogether about 182 posts and stations at which 2,250 European officials were employed.

**Area and Population.**—The area of the Colony is estimated at 909,654 square miles, with a population of Bantu origin officially estimated at 7 millions. Sir H. Johnston's estimate is 15½ millions, and another estimate is 9 millions. The European population in January, 1915 (exclusive of Katanga and Kivu), numbered 3,525. Of these, 2,135 were Belgian, 440 Portuguese, 204 English, 127 Dutch, 108 Italian, 104 American, 89 Swedish, 74 French, 40 Swiss, 37 Greeks, 27 Luxemburgers, 24 Norwegian, 14 Danish, 8 Russians, and 131 others.

The native languages comprise many dialects, every tribe having its own. Kiswahili is the language spoken by the natives who have been under Arab influence. Bangala is the commercial language on the upper Congo; Fiote is used on the lower Congo. The religion of the natives consists of a gross fetichism, but mission work is actively carried on. There are 149 mission stations, with 571 missionaries, of whom 350 are Catholic and 221 Protestant. In education they co-operate with the Government, which has formed colonies where children are collected and taught.

**Finance.**—Revenue and expenditure for five years in pounds sterling :—

—	1912	1913	1914	1915	1916 <sup>1</sup>
	£	£	£	£	£
Revenue . . . . .	1,814,004	1,616,724	1,218,050	1,218,050	1,281,963
Expenditure . . . . .	2,661,556	2,037,322	2,077,440	2,077,440	2,190,236

<sup>1</sup> Estimates.

For 1916 the receipts and expenditure were estimated as follows :—

Receipts	Francs	Expenditure	Francs
Customs . . . . .	5,999,200	Interior . . . . .	28,756,951
Direct taxes . . . . .	9,480,000	River navy . . . . .	3,233,295
Transports, &c. . . . .	2,938,000	Posts and Telegraphs . . . . .	1,137,296
Taxes on ivory . . . . .	1,708,600	Religion and Education . . . . .	2,356,630
Mines . . . . .	7,031,107	Public Debt and Savings Bank . . . . .	18,872,845
Various . . . . .	3,915,575	Mines . . . . .	2,583,250
Posts and telegraphs . . . . .	976,500	Coinage . . . . .	50,000
		Various . . . . .	3,765,645
<b>Total</b>	<b>32,049,032</b> (1,287,963 <i>l.</i> )	<b>Total . . . . .</b>	<b>54,755,912</b> (2,190,236 <i>l.</i> )

## DEFENCE—JUSTICE—PRODUCTION—COMMERCE, ETC. '21

The total public debt of the Belgian Congo amounts (1912) to 278,747,200 francs (1,149,888*l.*).

**Defence.**—The Colony possesses a force of native troops amounting to about 12,000 men. They are all infantry and are organised in 26 independent companies. The force is recruited by voluntary enlistment. The officers and non-commissioned officers (400) are Europeans, for the most part Belgians. The term of service is seven years, and the recruits are trained in seven camps of instruction before being drafted to their companies. The Territorial police number about 6,000 men.

**Justice.**—There are 7 courts of first instance, 15 county courts, and 2 courts of appeal (one at Boma and the other at Elisabethville). There are altogether 75 magistrates in the Congo.

**Production.**—The four chief products in the order of their importance are rubber, palm-nuts and palm-oil, white copal and cocoa. Ivory is also abundant; 401,838 pounds were exported in 1915 (596,896 pounds in 1914). Coffee grows freely, and the cultivation of cocoa is successful. Rice, cotton, and tobacco are grown in a great number of the native villages. Plantations of rubber, cacao, and coffee have been established by the Government. Cattle thrive satisfactorily in all districts where there is no tsetse fly, notably in the highlands of Katanga and Kivu. There are no native industries and few skilled workmen. Mining flourishes, the chief minerals being gold and copper. Other minerals are known to exist—coal, iron, tin and manganese—but as yet these have not been obtained in paying quantities. The gold mines in 1915 employed some 8,000 natives; the output was 3,720 pounds. The most important mines in the Congo are the copper mines near Kambove, operated by the Union Minière. The total output in 1915 was 14,040 tons of copper.

**Commerce and Shipping.**—The value of the commerce for five years was as follows:—

Years	Imports		Exports	
	Special	General	Special	General
	£	£	£	£
1911	1,945,315	2,331,602	2,163,697	3,158,215
1912	2,154,713	2,474,567	2,365,015	3,338,597
1913	2,863,631	3,484,715	2,234,990	2,868,923
1914	1,196,062	1,444,760	2,114,991	2,448,442
1915	506,322	734,457	903,929	1,020,167 <sup>1</sup>

<sup>1</sup> Estimated.

The chief imports for 1914 and 1915 and the exports for 1913 and 1914 were:

	Imports			Exports	
	1914	1915		1913	1914
	Francs	Francs		Francs	Francs
Arms, ammunition, &c.	505,561	71,387	Rubber . . .	27,520,355	10,630,804
Steamers and ships	1,070,192	129,900	Ivory . . .	11,675,421	7,091,904
Machinery	1,038,719	1,340,834	Palm-nuts . .	4,343,564	3,623,479
Iron, steel, copper	1,156,609	80,752	Palm-oil . . .	1,341,845	1,573,988
Wines, spirits . .	2,155,094	817,008	Copal . . .	8,934,528	6,203,757
Provisions . . .	2,983,892	4,778,145	Gold, crude .	5,999,627	3,195,434
Cottons . . .	4,019,880	2,253,611	Copper, ore and crude . .	684,788	15,519,996

Of the special imports (1914) the value of 22,309,228 francs came from Belgium ; 5,344,918 francs from Great Britain ; 3,001,982 francs from Germany ; 886,711 francs from France, 682,446 francs from Holland, 2,954,871 francs from the United States, and 4,460,614 francs from Rhodesia. Of the special exports the value of 36,196,208 francs went to Belgium ; 11,346,915 francs to Great Britain ; 546,711 francs to neighbouring Portuguese possessions ; 39,978 francs to British East Africa, and 801,713 francs to Holland.

According to the Board of Trade Returns the imports into the United Kingdom from the Belgian Congo in 1916 amounted to the value of 3,189,084*l.* ; and the exports of British produce and manufactures to the Belgian Congo, to 833,680*l.*

At the port of Boma in 1915 of sea-going vessels there entered 64 of 170,041 tons. In the coasting trade there entered 206 vessels of 22,327 tons. There is regular steam communication every three weeks with Antwerp and frequent steam communication with Liverpool, Rotterdam, Lisbon, and Bordeaux.

The administration possesses 17 steamers on the Lower Congo, and 44 on the Upper Congo.

**Internal Communications.**—The Congo is navigable for about 100 miles from its mouth to Matadi, and on this section 17 steamers belonging to the State ply. Above this, for over 200 miles, are numerous rapids, which render the river unnavigable as far as Stanley Pool (Léopoldville). Above the Pool there are about 1,600 miles of navigable water, as far as Stanley Falls, while several of the great tributaries are navigable over a considerable extent of their course.

The total length of railways on January 1, 1916, was 1,020 miles, made up as follows :—The Matadi-Leopoldville line, 248 miles ; the Mayumbe railway (Boma to Tshela), 70 miles ; the Stanleyville-Ponthierville line, 77 miles ; the Kindu Congolo line, 220 miles ; the Bukama to Luena 25 miles, from the Rhodesian frontier to Lubudi *via* Elisabethville, 370 miles ; the Katanga branch line to Lubumbashi, 1 mile ; to Mikola, 9 miles. Two sections of the Cape-to-Cairo railway are included in the system. The distance from Elisabethville, Katanga, on the Cape-to-Cairo Railway, to Cape Town is about 2,300 miles.

The total length of the Great Lakes Railway is 165 miles. It was completed in March, 1915, and links up the whole of the Upper Congo with the railway from Dar-es-Salaam to Udjidi.

From Leopoldville a public transport service on the Upper Congo has been organised by the Government, 41 steamers being employed for this purpose.

An important development in 1911 was the construction of a pipe line from Matadi to Leopoldville, 246 miles long, for the purpose of transporting crude oil for the use of river steamers. It has a diameter of 4 inches, with 8 pumping stations capable of delivering 50,000 tons of oil at Leopoldville, the terminus. The concession is for 50 years, at the expiration of which period all the pipe lines, with the material, except the vessels and stores of petroleum, will pass into the hands of the Congo Government.

In 1915 there were 51 post offices, 26 telegraph and telephone offices. In 1915 in the internal service 574,522 letters, papers, &c., were transmitted ; and in the external, 905,801 were handled. The Congo is included in the Postal Union. Telegraph lines connect Banana with Coquilhatville, 800 miles ; Boma with Tshela, 85 miles ; Stanleyville and Ponthierville, 79

miles; Kasongo and Uvira (Lake Tanganyika), 265 miles; Kindu and Kongolo, 219 miles; Kabalo and Lake Tanganyika, 169 miles; and Sakania and Tshilongo, 450 miles. Total length, 2,067 miles. There are at present 14 stations of wireless telegraphy in the Belgian Congo—at Banana, Boma, Kinshasa, Coquilhatville, Lisala, Basoko, Lusambo, Stanleyville, Kindu-Lukuga, Kongolo, Basankusu, Kikondja, and Elisabethville. All these posts communicate with each other. It is hoped to establish a direct communication between Brussels and Boma.

Two banks are in existence the “Banque du Congo Belge,” and the “Banque Commerciale du Congo,” both with branches in all the commercial centres.

The currency of the Congo is that of Belgium and is now generally used, even by the natives. It consists of 20 and 10 franc pieces in gold; 5, 2 and 1 franc pieces and 50 cent. pieces in silver; 25, 10 and 5 cent. pieces (perforated) in nickel; and 2 and 1 cent. pieces (perforated) in copper. Banknotes of 20, 100 and 1,000 francs issued by the Banque du Congo Belge were put in circulation during the year 1912. Gold disappeared from circulation almost immediately upon the outbreak of war, and silver was hoarded to such an extent that it became necessary for the Banque du Congo Belge to issue bank notes for nominal values of 1 and 5 francs, a large emission of which was made on October 15, 1914.

The Metric System was introduced by law on August 17, 1910.

*British Consul.*—A. F. Wallack (at Boma).

There are British Vice-Consuls at Katanga, Léopoldville, Stanleyville, Elisabethville, and Kasai District.

## BHUTÁN.

A State in the Eastern Himálayas, between 26° 45' and 28° N. latitude, and between 89° and 92° E. longitude, bordered on the north and east by Tibet, on the west by the Tibetan district of Chumbi and by Sikkim, and on the south by British India. Extreme length from east to west 190 miles; extreme breadth 90 miles. Area about 20,000 square miles; population estimated at 250,000.

The original inhabitants of Bhután, the Tephús, were subjugated about two centuries ago by a band of military colonists from Tibet. In 1774 the East India Company concluded a treaty with the ruler of Bhután, but since then repeated outrages on British subjects committed by the Bhután hill men have led from time to time to punitive measures, usually ending in the temporary or permanent annexation of various *duars* or submontane tracts with passes leading to the hills. In November 1864 the eleven western or Bengal *duars* were thus annexed. Under a treaty signed in November, 1865, the Bhután Government was granted a subsidy of Rs. 50,000 a year on condition of good behaviour. By an amending treaty concluded in January, 1910, under which the Bhután Government surrendered the control of its foreign relations to the British Government, the subsidy has been increased to Rs. 1,00,000 a year. This gives the Indian Government an effective control over the State, while the occupation of two strong positions at Baxa and Diwángiri, within a few miles of their frontier, serves as a material guarantee against further aggression.

The form of Government in Bhután, which existed from the middle of the sixteenth century until 1907, consisted of a dual control by the clergy

and the laity as represented by Dharma and Deb Rájás. In 1907 the Deb Rájá, who was also Dharma Rájá, resigned his position, and the Tongsa Penlop, **Sir Ugyen Wangchuk**, K.C.S.I., K.C.I.E., was elected as the first hereditary Maharaja of Bhután.

Chief towns: Punakhá, the winter capital, a place of great natural strength; Tásichozong (Tashichödzong), the summer capital, Páro, Angdubhorang (Wangdupotang), Tongsa, Taka, and Biagha.

The people are nominally Buddhists, but their religious exercises consist chiefly in the propitiation of evil spirits and the recitation of sentences from the Tibetan Scriptures. Tásichozong (Tashichödzong), the chief monastery in Bhután, contains 300 priests.

Beyond the guards for the defence of the various castles, there is nothing like a standing army.

The chief productions are rice, Indian corn, millet, lac, wax, different kinds of cloth, musk, ponies, chowries, and silk. The State is now beginning to realise the necessity of encouraging foreign capital for industrial enterprises such as mines, tea gardens, and the working of its extensive and valuable forests. Muzzle-loading guns and swords of highly-tempered steel are manufactured.

Trade with India was as follows :—

—	1911-12	1912-13	1913-14	1914-15	1915-16
	£	£	£	£	£
Exports to India .	46,060	100,000	140,000	145,000	107,000
Imports from India .	281,800	74,600	120,000	117,000	74,000

## BOLIVIA.

(REPÚBLICA BOLIVIANA.)

## Constitution and Government.

THE Constitution of the Republic of Bolivia (so named in 1825) bears date October 28, 1880. By its provisions the executive power is vested in a President, elected for a term of four years by direct popular vote, and not eligible for re-election; there is a Congress of two chambers, called the Senate and the Chamber of Deputies. The suffrage is possessed by all who can read and write. There are 16 Senators (2 for each Department) elected for six years, and 70 Deputies elected for four years. Both Senators and Deputies are elected by direct vote of the people. Of the Senators one-third retire every two years; of the Deputies one-half retire every two years. Senators receive a salary of 750 bolivianos (60*l.*) per month during the sittings, which, as a rule, last for 60 days, but may be extended to 90 days, and Deputies receive £3 for each day they attend. Extraordinary sessions may be held for special purposes. There are a President, two Vice-Presidents and a ministry, divided into six departments—of Foreign Relations and Warship; Finance; Government and Public Works; Justice and Industry; War and Colonisation; and Education and Agriculture.

*President of the Republic.*—Señor Dr. *Ismael Montes*, elected for the term 1913-17 (42,000 bolivianos). Installed August 15, 1913.

*President-Elect.*—Señor José *Gutierrez Guerra* (1917-21).

The supreme political, administrative, and military authority in each department is vested in a prefect. The Republic is divided into 8 departments, 3 territories, 65 provinces, 683 cantons and 24 sub-cantons, administered respectively by prefects, sub-prefects, corregidores and alcaldes. Prefects and sub-prefects are appointed by the President of the Republic; corregidores and alcaldes by the sub-prefects of the provinces. The capital of each department has its municipal council; the subdivisions have municipal boards, and the still smaller subdivisions have municipal agents. The territories in the north-west of the Republic and in the Chaco and Oriente are governed by three officials, called *delegados nacionales*.

The following table shows area and population of the different political divisions (the capitals of each are given in brackets):—

Departments and Territories	Area : square miles	Census 1900	Estimated 1915	Per square mile 1915
La Paz (La Paz) . .	40,686	445,616	726,357	9.60
Cochabamba (Cochabamba) . . .	25,288	328,163	584,901	19.33
Potosí (Potosí) . . .	45,031	325,615	530,748	7.70
Santa-Cruz (Santa-Cruz) . . . . .	144,941	209,592	341,640	1.70
Chuquisaca (Sucre) . .	36,132	204,434	338,226	1.03
Tarija (Tarija) . . .	31,567	102,887	164,704	1.68
Oruro (Oruro) . . . .	20,657	86,081	140,891	5.25
El Beni (Trinidad) . .	95,354	32,180	52,450	3.60
El Chaco (Jacuiba) . .	46,561	—	13,085	82.5
Colonial Territories, (Cobija) . . . . .	27,938	10,000	51,963	3.09
Total . . . . .	514,155	1,744,568	2,889,970	3.38

The Indian population in 1900 was 920,864, or 50·9 per cent. of the whole: the mixed was 486,018, or 26·7 per cent.; the white was 231,088, or 12·7 per cent.; the negro, 3,945, or 0·21 per cent.; and the unclassified, 170,936, or 9·4 per cent. Of the population not under 7 years of age, 564,000 were engaged in agriculture; 399,037 in the industries; 55,521 in commerce; 49,647 in the liberal professions; 36,285 in domestic service; 12,625 in mining, and 3,106 in artistic professions. The foreign population numbered 7,425, of whom 2,072 were Peruvian. The admission and settlement of immigrants are facilitated under the regulations published in March, 1906.

The boundary disputes of Bolivia with Brazil and with Chile were settled by treaties of November, 1903 and October, 1904. That with Peru was settled by direct negotiations between Bolivia and Peru (1911-12); that with Paraguay, which has been the subject of long negotiations, is as yet without result.

The estimated population (1915) of La Paz is 100,097; Cochabamba, 31,014; Potosí, 29,795; Sucre (the capital), 29,686; Tarija, 10,159; Oruro, 22,573; Santa Cruz, 7,734; Trinidad, 6,096; Cobija, 500; Jacuiba, 1,014.

### Religion, Instruction, and Justice.

The Roman Catholic is the recognised religion of the State; the exercise of other forms of worship is permitted. The religious orders have 17 convents (9 for males and 8 for females); the male members number about 230, the female 280; there are about 567 secular clergy. In 1900 the non-Catholic population numbered 24,245. The Church is under an archbishop (resident in Sucre) and 3 bishops (La Paz, Cochabamba, and Santa Cruz). The maintenance of the Church costs the State 121,108 bolivianos a year, 23,820 bolivianos being devoted to the propagation of the faith among the Indians. By a law of March 19, 1912, all marriages must be celebrated by the civil authorities.

Primary instruction, free and obligatory, is under the care of the municipalities. In 1915 (including industrial, parish, and private schools) there were 426 elementary schools with 3,960 teachers and 51,162 pupils. For secondary instruction there were 21 colleges, 5 clerical institutions, and 5 private lyceos with, in all, 180 teachers and 2,598 pupils. For superior instruction there are 19 establishments with 78 professors and 1,291 students. At Sucre and La Paz are the only two universities which possess more than one faculty; at both degrees may be obtained in law, medicine, and theology; at La Paz there is also a faculty of commerce. In some departmental capitals are schools of commerce, and at La Paz the military college. At some places are rural schools for the natives, and in 1911 a normal college for training teachers of Indians was established at La Paz. A normal school for training teachers generally was established at Sucre in 1909, and had 157 students in 1915. In all the departmental capitals there are public libraries; at La Paz there is a museum; at Oruro and Potosí are mineralogical museums. The State spent 2,562,468 bolivianos in 1916 for educational purposes.

The judicial power resides in the Supreme Court, in superior district courts, and in the courts of local justices. The Supreme Court sitting in the Capital of the Republic has 7 judges; the district courts (one in each department) have each 5 judges, except that in El Beni, which has 3 members; the local tribunals have judges of instruction and parish alcaldes. Public justice is directed by an Attorney-General and by district and local attorneys. The administration of justice is free.

## Finance.

The revenue of Bolivia is derived mainly from customs duties, spirit duties, tin, silver, gold, wolfram, antimony and other minerals, rubber export, patents, and stamps. From Jan. 1, 1912, onward, a tax of 3 per cent. is imposed on the liquidated profits of all mineral enterprises the gross value of whose 'production and exportation' exceeds 8,000*l.* yearly. The chief branches of expenditure are finance, war, and public works. The ordinary revenue and expenditure for 6 years were as follows (12½ bolivianos = 1*l.*):—

—	Revenue	Expenditure	—	Revenue	Expenditure
	£	£		£	£
1911.	1,353,241	1,452,226	1914 <sup>1</sup>	1,840,000	1,840,000
1912	1,613,168	1,298,736	1915 <sup>1</sup>	1,358,864	1,718,315
1913	1,761,509	1,777,784	1916 <sup>1</sup>	1,282,760	1,805,867

<sup>1</sup> Estimates.

The public debt of Bolivia on June 30, 1916, amounted to 53,211,355 bolivianos, of which 36,340,595 bolivianos were external debt, and 16,870,760 bolivianos were internal debt. The foreign debt included the following items:—Morgan loan outstanding, 5,124,929 bolivianos; French loan of 1910, 17,486,750 bolivianos; French loan of 1913, 12,117,250 bolivianos.

## Defence.

The law of December 15, 1915, provides for a permanent force of 3,577 men. Military service is compulsory for all males from the 19th to the 50th year.

The army is a militia, with a total service in the first line of 6 years, of which about 1 year is spent in the ranks. For the next 5 years (from age of 25 to that of 30) the Bolivian soldier belongs to the 'ordinary reserve.' After this the men pass to the 'extraordinary reserve' for 10 years, and finally complete their service by 10 years in the Territorial Guard.

The permanent army consists of 4 infantry regiments of 500 men each; a cavalry regiment 500 strong; a mountain artillery regiment of 300 men; a field artillery regiment of the same strength, one with 4 batteries of the Schneider-Canet system; further a machine-gun regiment of 150 men; making a total of 4,000, including officers, officials and men.

In addition to the above troops there are small bodies of infantry of from 100 to 200 men (called *columnas*) at the chief towns of departments, which can be expanded to battalions, if necessary. There also exist other units, for garrisoning the North, the North West, the South West, and the East, consisting of 300 men each.

The infantry armament is the Mauser (Bolivian Model) rifle of 1898.

## Production and Industry.

It is estimated that about 4,940,000 acres are under cultivation, but agriculture is in a backward condition. Irrigation by means of artesian wells is being attempted in some regions. Wheat, maize, barley, beans, potatoes, are produced mostly for local consumption, and coffee, coca, quina, &c., are exported to Chile and Argentina. Cocoa and coffee are grown on the slopes of La Paz and Cochabamba; coffee and other products are grown in El Bení and Santa Cruz. Rubber is produced on 40,642,000 acres in

the National Territories, and in the Departments of El Beni and Santa Cruz, and parts of La Paz and Cochabamba. Bolivia ranks as the second rubber exporting country of South America, coming next to Brazil, with an annual output of over 2,000 tons. The quantity exported in 1914 was 4,484 metric tons, value 8,280,370 bolivianos. Other vegetable products in 1914 amounted to 675,035; animal products, 238,869; manufactured articles, 286,684 bolivianos. The public lands of the State have an area of about 245,000 square miles, of which 104,000 square miles are reserved for special colonisation.

The number of cattle was (1912), 734,266; sheep, 1,499,114; horses, 98,846; mules, 44,584; asses, 172,959; goats, 467,950; pigs, 114,146; llamas, 414,047; alpacas, 112,083; vicuñas, 200; domestic fowls, 78,477.

The mineral wealth of Bolivia includes silver, copper, tin, lead, zinc, antimony, bismuth, wolfram, gold, and borate of lime. Bolivia produces one quarter of the total tin output of the world, standing next to the Malay Peninsula in the production of this metal.

The following table shows the comparative weights and values of mineral exports for 1914 and 1915:—

	1914		1915	
	Quantity	Value	Quantity	Value
	Kilogs.	Bolivianos	Kilogs.	Bolivianos
Tin ore . . . . .	37,259,617	42,479,837	36,492,235	44,885,450
Copper ore . . . . .	4,793,166	2,073,429	17,944,954	9,634,428
Copper bars . . . . .	3,874,272	2,369,806	5,867,844	4,400,833
Wolfram . . . . .	276,316	428,300	792,511	1,497,845
Lead ore . . . . .	1,554,570	155,457	2,207,753	353,239
Antimony ore . . . . .	186,077	80,616	17,923,048	13,442,286
Bismuth ore . . . . .	437,751	3,376,991	662,547	3,670,453
Molybdenum ore . . . . .	—	—	5,191	19,157

Large deposits of common salt are found near Lake Poopó and in the South of Bolivia. In 1911 large tracts of land were taken up for the production of petroleum, especially near Calacoto, on the Arica-La Paz railway. In the east of the Republic there is said to be a part of an immense oilfield, stretching from near the Orinoco to the Argentine Republic, portions of which are now being prospected.

### Commerce.

Bolivia having no seaport, imports and exports pass chiefly through Arica, Mollendo, Antofagasta, and the river-ports of Suarez on the Paraguay, Montes on the Iténez, Villa Bella on the Madeira, and Bahía on the Upper Acre. The Argentine route through Salta is now little used. The chief imports are provisions, hardware, wines and spirits, cotton, woollen, linen and silk goods, and ready-made clothes. The import trade is chiefly in the hands of Germans, but English goods are largely introduced. The chief exports are silver, tin and rubber. The value of imports and exports for five years are given as follows (12·5 bolivianos = £1):—

	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . . . .	4,125,582	3,960,719	4,555,236	3,180,897	1,805,965
Exports . . . . .	7,510,248	7,209,838	7,967,792	5,184,091	9,422,703

The values of imports (dutiable and duty-free) are determined according to the appraisement in force; those of exports, by declarations of the exporters, based on current prices at the place and time.

The principal imports are cottons, woollens, cattle, provisions, machinery and hardware, wines, spirits, clothing.

The following table gives the comparative value of the imports and exports in 1914 and the imports alone in 1915 for principal countries :—

	1914		1915
	Imports	Exports	Imports
	£	£	£
Germany . . . . .	850,024	637,099	86,061
United Kingdom <sup>1</sup> . . . . .	624,700	6,869,146	290,730
United States . . . . .	370,940	253,317	381,303
Belgium . . . . .	184,505	253,780	73,917

<sup>1</sup> Including specie.

Total trade between U.K. and Bolivia (Board of Trade figures) for 5 years :—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Bolivia to U.K.	1,620,052	2,250,092	1,602,860	1,001,279	1,129,751
Exports to Bolivia from U.K.	330,144	360,465	254,239	173,258	294,102

In July, 1912, a Commercial Treaty was ratified between Great Britain and Bolivia. (Signed August, 1911.)

### Communications.

In 1915 the total length of line open in Bolivia was 970 miles. The principal line is the Antofagasta and Bolivian Railway, from Antofagasta, on the Pacific coast, to Ollague, thence to Oruro, thence to Viacha, thence to La Paz (735 miles). Under the Bolivian-Chilian treaty of October 24, 1904, the Arica-La Paz line (208 miles, of which 186 miles are in Bolivia) was built from La Paz via Lluta with Tacora and to Corocoro. The Bolivian section was handed over to the government of Bolivia on May 3, 1913. It is expected that the proposed Pan-American Railroad will follow the shore line of Lake Titicaca from Guaquin to Viacha, and thence to the Argentine border by way of Uyuni, Tupiza, and La Quiaca, a total distance in Bolivia of 529 miles, of which 361 are already in operation.

Traffic on Lake Titicaca and on the Bolivian rivers is carried on by steamers, which belong to private owners.

There are about 2,304 miles of cart roads connecting the more important towns.

In Bolivia there are 317 post offices with 732 officials. In 1914, 5,215,501 pieces of postal matter were handled. The postal expenses amounted to 595,942 and the receipts to 280,593 bolivianos. In 1914 Bolivia received 2,016,240 bolivianos in money orders.

In 1912 there were 2,730 miles of state telegraph lines, and 1,080 miles

of private lines, making a total of 3,810 miles, of which 476 miles were added during 1911. All the departmental capitals are connected by telegraph. There is telegraphic communication with foreign countries by the lines of the Central and South American Telegraph Company; the Southern railway telegraph lines of Peru; the West Coast of America Telegraph Company; and also by way of Tupiza and Buenos Aires. Wireless telegraphic stations are being erected at La Paz, Villa Bella, Cobija, Trinidad, Santa Cruz, Puerto Suarez, and Yacuiba. Despatches (1913) sent, 461,000; received, 524,283. Cost of administration, 803,678 bolivianos; receipts, 363,585.

A contract has been made between the Bolivian Government and Marconi's Wireless Telegraph Company for the establishment of wireless telegraphy in Bolivia.

### Money, Weights, and Measures.

The net earnings of the Banco de la Nacion (State bank) in 1916 were 2,268,238 bolivianos. After its fusion with the Industrial Bank, the capital of the National Bank is 1,517,000*l*.

On September 14, 1906, a monetary law was passed providing for the adoption of a gold standard. The unit of account is the gold peso of one-fifth of a pound sterling weighing 1·5976 grams, ·916 fine, thus containing 1·464466 grams of fine gold. There are two gold coins struck, British and Peruvian pounds and half pounds; there is no Bolivian gold yet in circulation. Silver coins, ·900 fine, are pieces of 50 and 20 centavos. Nickel coins, pieces of 10 and 5 centavos. Gold is legal tender to any amount and English and Peruvian gold coins of corresponding value have legal currency, the rate of exchange being fixed at 12·5 bolivianos = 1*l*. Silver is legal tender up to 10 pesos, and nickel up to 1 peso. Silver and nickel coins are being minted. In 1909 silver coin to the value of 1,000,000 bolivianos (50 and 20 centavo pieces) were coined for Bolivia at Birmingham. There are also paper notes of 1, 5, 10, 20, 50 and 100 Bolivianos. By a new law the banknote issue is confided to the Banco de la Nacion Boliviana alone, the other banks are to call in their present issue by July 1, 1916. The bank named is by the same law authorised to raise its capital to 4,000,000*l*, and may issue notes up to 150 per cent. of its capital. 30 per cent. of the note issue must be covered in gold, and, after 1918, the percentage is to rise 2 per cent. annually up to 50 per cent. On July 31, 1915, the notes in circulation of all the banks were to the value of 23,002,036 bolivianos, the gold reserve against this being 56·17 per cent. of the total.

The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed. The quintal is equal to 101½ lbs.

### Consular Representatives.

#### 1. OF BOLIVIA IN GREAT BRITAIN.

*Envoy Extraordinary and Minister Plenipotentiary.*—Col. Pedro Suarez (appointed May 3, 1913).

#### 2. OF GREAT BRITAIN IN BOLIVIA.

*Envoy Extraordinary and Minister Plenipotentiary.*—Cecil W. G. Gosling.

There are Consular representatives at La Paz, Oruro, Sucre, Santa Cruz, Uyuni and Cochabamba.

## BRAZIL.

(ESTADOS UNIDOS DO BRAZIL.)

### Constitution and Government.

BRAZIL became a Portuguese settlement in 1500. On the French invasion of Portugal, in 1807, the Portuguese Royal family fled to Brazil; in 1813 the colony was declared 'a kingdom.' The Portuguese Court having returned to Europe in 1821, a national congress assembled at Rio de Janeiro, and on May 13, 1822, Dom Pedro, eldest surviving son of King João VI. of Portugal, was chosen 'Perpetual Defender' of Brazil. He proclaimed the independence of the country on September 7, 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on October 12 following. In 1831 he abdicated the crown in favour of his only son, Dom Pedro II. (born 1825, died 1891), who reigned as Emperor until November 15, 1889, when by a revolution he was dethroned, and he and his family exiled, and Brazil declared a Republic under the title of the United States of Brazil.

According to the constitution adopted by the National Congress on 24 February, 1891, the Brazilian nation is constituted as the United States of Brazil comprising twenty States, one National Territory and one Federal District. Each of the old Provinces forms a State, administered at its own expense without interference from the Federal Government save for defence, for the maintenance of order, and for the execution of the Federal laws. Fiscal arrangements in such matters as import duties, stamps, rates of postage, and bank-note circulation belong to the Union; but export duties are the property of the various States.

The legislative authority is exercised by the National Congress with the sanction of the President of the Republic. Congress consists of the Chamber of Deputies and the Senate. It meets annually on the 3rd of May, without being convoked, unless another day be fixed by law, and sits four months, but may be prorogued or convoked extraordinarily. No member of Congress, after his election, can contract with the executive power or accept any commission or paid office, except such as are diplomatic or military or imposed by law. If, in ordinary circumstances, the acceptance of diplomatic or military office would cause the loss of the legislative services of a member, the permission of the Chamber is required. Nor can any member of Congress take part in the administration of any company which receives a subsidy from the Federal Government. Deputies and Senators are paid, and neither can be Ministers of State, and retain at the same time their seats in Congress. Deputies must have been Brazilian citizens for four years. Senators must be over thirty-five years of age and must have been citizens for six years.

The Chamber of Deputies consists of 212 members elected for three years by direct vote (providing for the representation of the minority), in a proportion not greater than one to every 70,000 of population as shown by a

decennial census, but so that no State will have less than four representatives. It has the initiative in legislation relating to taxation, and in proceedings against the President of the Republic and Secretaries of State.

Senators, 63 in number, are chosen by direct vote, three for each State, and for the Federal district, for nine years, and the Senate is renewed to the extent of one-third every three years. The Vice-President of the Republic is President of the Senate.

The executive authority is exercised by the President of the Republic. He must be a native of Brazil, over thirty-five years of age. His term of office is four years, and he is not eligible for the succeeding term. The President and the Vice-President are elected by the people directly, by an absolute majority of votes. The election is held on the 1st of March in the last year of each presidential period in accordance with forms prescribed by law. No candidate must be related by blood or marriage, in the first or second degree, to the actual president or vice-president, or to either who has ceased to be so within six months.

The President appoints and dismisses ministers, is in supreme command of the army and navy, and, within certain limits, has the power to declare war and make peace. He (with the consent of Congress) appoints the members of the Supreme Federal Tribunal and the diplomatic ministers. No minister can appear in Congress, but must communicate by letter, or in conference with commissions of the Chambers. Ministers are not responsible to Congress or the Courts for advice given to the President of the Republic.

The franchise extends to all citizens not under twenty-one years of age, duly enrolled, except beggars, 'illiterates,' soldiers actually serving, and members of monastic orders, &c., under vows of obedience.

*President of the Republic.*—Senhor Wenceslao Braz, elected March 1, 1914.

*Vice-President.*—Senhor Urbano dos Santos, elected March 1, 1914.

There are 7 Secretaries of State at the head of the following Departments:—

1. Finance, 2. Justice, Interior and Public Instruction, 3. War, 4. Marine, 5. Foreign Affairs, 6. Communications and Public Works, 7. Agriculture, Industry, and Commerce.

## I. LOCAL GOVERNMENT.

Each State must be organised under the republican form of government, and must have its administrative, legislative, and judicial authorities distinct and independent. The governors and members of the legislatures must be elective; the magistrates must not be elective nor removable from office save by judicial sentence. The Federal executive cannot intervene directly in the local government of the States. Each State is governed by its own Constitution and laws which must agree with the constitutional principles of the Union. In cases of the infringement of the principles of the Federal constitution by the constitutions, laws or authorities of any State, the Federal Government, after due process of Federal law, has the power to interfere even by force of arms, if necessary. The Federal District is administered by a council elected by the citizens of the District, the municipal executive authority being exercised by a Prefect appointed for four years by the President of the Republic. There are in Brazil 3,161 municipalities and 3,161 parishes.

## Area and Population.

Following are the census returns of 1900 and estimated population in 1912 (capitals of States in brackets) :—

States	Area : sq. miles.	Population		
		1900 (Census)	1912 (Estimate)	Per sq. mile 1900
Alagôas (Maceió) . . .	22,583	649,273	848,526	28·7
Amazonas (Manáos) . . .	732,439	249,756	378,476	0·3
Bahia (San Salvador) . . .	164,643	2,117,956	2,746,443	12·8
Ceará (Fortaleza) . . .	40,247	849,127	1,179,197	21·1
Espírito Santo (Victoria) . . .	17,312	209,783	362,402	12·1
Goyaz (Goyaz) . . .	288,536	255,284	428,661	0·9
Maranhão (St. Luiz). . .	177,561	459,308	683,645	2·8
Matto Grosso (Cuyabá) . . .	532,683	118,025	191,145	0·2
Minas Geraes (Belo Horizonte) . . .	221,951	3,594,471	4,628,553	16·2
Pará (Belém) . . .	443,903	445,356	809,886	1·0
Parahyba (Parahyba) . . .	28,854	490,784	630,171	17·0
Paraná (Curitiba) . . .	85,451	327,136	554,934	3·8
Pernambuco (Recife) . . .	49,573	1,178,150	1,649,023	23·7
Piauí (Terezina) . . .	116,523	334,328	441,350	2·9
Rio de Janeiro (Nietheroy) . . .	26,634	926,035	1,325,927	34·7
Rio Grande do Norte (Natal). . .	22,195	274,317	424,308	12·3
Rio Grande do Sul (Porto Alegre). . .	91,333	1,149,070	1,682,736	12·5
Santa Catharina (Florianopolis) . . .	28,632	320,289	463,997	11·2
São Paulo (S. Paulo) . . .	112,307	2,279,608	3,700,350	20·3
Sergipe (Aracajú) . . .	15,093	356,264	426,234	23·6
Federal District . . .	538	746,749	975,818	1,359·2
Acre Territory . . .	—	—	86,638	—
Total . . .	3,218,991	17,371,069	24,618,429	5·4

In 1900 the population consisted of 8,825,636 males and 8,492,920 females.

In 1915 the population was estimated at 26,542,402, and the area 3,290,564 square miles.

The Acre Territory (not included in the census results) has an area of about 74,000 sq. miles. For this territory Brazil paid to Bolivia 2,000,000*l.* in 1902. In 1909 the Territory petitioned to be received into the Brazilian Union as a State.

In 1911 the population of Rio de Janeiro was estimated at 1,128,637; in 1906, 811,265; São Paulo (1911), 450,000; of Bahia, 290,000; of Pernambuco, 150,000; Belém, 200,000; Porto Alegre, 100,000; Manáos, 50,000; Nietheroy, 35,000; Santos, 35,000; Ceará, 33,000; Maceió, 33,000; Parahyba, 32,000; São Luiz, 32,000.

The number of immigrants into Brazil from 1820 to 1915 was 3,363,456. In 1915 there were 30,287 immigrants, of which the majority, 15,118, were Portuguese; Spaniards, 6,895; Italians, 5,779; Russians (mostly

Poles), 640; Syrians, 514; Austro-Hungarians, 104; English, 311; Japanese, 65; French, 410. Of the total 17,709 were subsidized.

A boundary treaty with Colombia was signed on April 24, 1907; with Peru on September 8, 1909; and with Uruguay on May 7, 1913.

### Religion.

The connection between Church and State has been abolished, and absolute equality declared among all forms of religion. The Government left to the Church all religious buildings and their properties and income. All churches are perfectly free; religious orders are allowed and are prosperous. All but about 100,000 of the population are Catholics.

There is a Cardinal whose seat is at Rio de Janeiro and who acts as an Archbishop, an archbishop at Bahia, one at Rio de Janeiro, one at San Paulo, one at Pará, and one at Mariana (Minas). There are 25 suffragan bishops. For instruction of the clergy there are 11 seminaries.

### Instruction.

Education is free but not compulsory. The Union Government undertakes to provide, in part, for higher or university instruction within the Union, but there are institutions of this nature maintained, some by the States, and some by private associations; while primary and training schools are maintained and supervised, either by the States or by the municipalities. There is, in fact, no university in Brazil, though several are in process of formation; but there are 25 faculties which confer degrees. In Rio de Janeiro are also the military college, the preparatory school of tactics, and the naval school. At the Capital are maintained by the Federal Government a school for the blind and another for the deaf and dumb. The Federal Government maintains also a School of Arts and a National Institute of Music in the Capital, there being similar academies of music in the States of Maranhão, Pará, São Paulo, and several in the State of Rio de Janeiro. In Maranhão, Bahia, and Curitiba there are schools of Fine Arts. There are engineering polytechnics at Rio de Janeiro, São Paulo, and Porto Alegre, and one mining school at Ouro Preto. There are, besides, 28 industrial schools, 11 agricultural and 9 commercial institutions for tuition. There are faculties of law at Recife, São Paulo, Ceará, Goyaz, Pará, Bahia, Bello Horizonte, Porto Alegre, and Rio de Janeiro (2); faculties of medicine at Rio de Janeiro, São Paulo, Curitiba, Bahia, and Porto Alegre; colleges of pharmacy at Ouro Preto, Belem, Juiz de Fora, Porto Alegre, and São Paulo; schools of odontology at Rio de Janeiro, Bello Horizonte, Porto Alegre and also attached to the colleges of medicine and pharmacy; engineering colleges at Rio, Ouro Preto, Bahia, Recife, Porto Alegre, and São Paulo.

There were in 1910 in the various States, 12,221 primary schools with 634,539 (352,418 boys and 282,121 girls) pupils and 8,064 teachers. Of the total number 6,918 are government schools, 2,608 municipal, and 2,695 private. But on April 5, 1911, a decree was issued for the reform of the school system, a feature of which is that a Board of Education has entire control over all schools. There are also 327 secondary schools with 30,258 pupils. For teachers' diplomas there are 29 colleges. In recent years public instruction has made great progress.

Brazil has many public libraries. The National Library in Rio contains more than 400,000 books and manuscripts. There is also a National Museum, an Academy of Fine Art, and a Botanical Garden.

# Justice and Crime.

There is a supreme Federal court of Justice at Rio de Janeiro; and Federal judges in each State. Justice is administered in the States in accordance with State law, by State courts, but in Rio de Janeiro Federal Justice is administered. Judges are appointed for life. There are also municipal magistrates and justices of the peace, who are elected for four years, and whose chief function is to settle cases up to a certain amount.

A new Civil Code came into force on January 1, 1917.

# Finance.

Revenue and expenditure (gold milreis=2s. 3d.; paper milreis = 1s. 4d).

	Revenue		Expenditure	
	(Gold) £	(Paper) £	(Gold) £	(Paper) £
1913	15,271,875	27,178,067	11,041,312	35,195,200
1914	8,988,975	18,272,266	9,439,650	40,920,000
1915	10,574,875	23,658,266	9,090,450	34,850,400
1916 <sup>1</sup>	10,821,090	22,330,066	9,491,072	27,017,737
1917 <sup>1</sup>	14,437,710	22,675,888	11,084,956	27,161,748

<sup>1</sup> Estimates.

The principal items of revenue and expenditure for 1917 were estimated as follows:—

Revenue	Gold milreis	Paper milreis	Expenditure	Gold milreis	Paper milreis
Import duties, etc.	70,400,000	57,000,000	Ministry of Justice and Internal		
Consumption taxes.	—	102,488,333	Affairs	10,422	45,560,014
Circulation taxes	270,000	35,500,000	Ministry of Foreign		
Tax on incomes	—	24,870,000	Affairs	2,462,736	1,123,600
Tax on lotteries	—	1,400,000	Ministry of Marine	180,000	36,816,870
Other revenue	—	5,260,000	Ministry of War	50,000	64,264,690
National patrimony and industries	4,292,320	100,182,000	Ministry of Agri- culture	51,680	15,242,086
Extraordinary and resources	47,747,684	—	Ministry of Trans- portation and Public Works	22,125,408	120,538,170
	122,710,204	327,300,333	Ministry of Fi- nance	73,652,690	123,875,400
Less 5 per cent. in gold of customs set aside for redemp- tion purposes	6,400,000	—			
Total general revenue	116,310,204	327,300,333			
Revenue with spe- cial application	12,025,000	12,838,000			
Total revenue	128,335,204	340,138,333	Total expenditure	98,532,945	407,426,790

The consolidated foreign debt of Brazil on December 31, 1916, amounted to 112,832,968*l*. The consolidated internal debt amounted (March 31, 1916) to 808,725,100 milreis, and the internal floating debt to 252,183,000 milreis. Paper money in circulation on December 31, 1916, 1,122,559,761 milreis.

For the indebtedness of the individual states see below. In 1915 it amounted to 50,394,200*l*. In addition the debt of the municipalities amounts to 11,563,902*l*.

The external debt of each of the States of Brazil for 1915 was as follows :—

State	External Debt	State	External Debt
	£		£
Alagoas . . . . .	—	Parahyba . . . . .	—
Amazonas . . . . .	2,955,100	Paraná . . . . .	2,200,000
Bahia . . . . .	3,875,228	Pernambuco . . . . .	2,368,033
Ceará . . . . .	600,000	Piauí . . . . .	—
Espírito Santo . . . . .	1,170,290	Rio de Janeiro . . . . .	3,000,000
Goyaz . . . . .	—	Rio Grande do Norte . . . . .	350,000
Maranhão . . . . .	720,000	Rio Grande do Sul . . . . .	—
Mato Grosso . . . . .	—	Santa Catharina . . . . .	216,333
Minas Geraes . . . . .	6,800,000	São Paulo . . . . .	20,328,710
Para . . . . .	2,040,506	Sergipe . . . . .	—

On July 24, 1912, a bill was introduced into the Senate, making it necessary for the States to obtain the Federal authorization before contracting any loans.

### Defence.

Under the military law of January, 1908, military service is obligatory on every Brazilian from 21 years of age to 45. The terms of service are 2 years in the ranks, 7 in the reserve, 7 in the Territorial Army, and 8 in the National Guard. The reservists are called up for training annually for 4 weeks, besides which there is rifle practice once a month. The men in the territorial army also have an annual training of 2 to 4 weeks. The army consists of 15 regiments of infantry each of 3 battalions, and 12 battalions of rifles, of 12 regiments of cavalry of 4 squadrons, and 5 regiments of 2 squadrons, 5 regiments of field artillery of 9 batteries each with 4 guns, 9 horse artillery batteries, 5 howitzer batteries, 6 mountain batteries, 5 battalions of engineers, and 9 battalions of garrison artillery. The country is divided into 13 territorial districts, each generally containing one rifle battalion: they also supply men for 5 "strategical" brigades and 3 cavalry brigades, all stationed in the south near the frontiers of the three southern republics. Each "strategical" brigade consists of 3 infantry regiments, 1 cavalry regiment, 1 field artillery regiment, 1 howitzer battery. A cavalry brigade consists of from 2 to 3 regiments. The total peace strength is at present 25,000. There is also a gendarmerie 20,000 strong. Infantry are armed with the Mauser rifle, the field and horse artillery have a Krupp 12 pr. The military budget for 1915 was £7,254,139.

Ships of the Brazilian navy are as follows :—

Laid down	Name	Displacement	Armour		Principal Armament	Torpedo Tubes	H.P.	Nominal speed
			Belt	Gun				
1907	DREADNOUGHTS.							
	(Minas Geraes . . . . .)	19,281	9	12	12—12in., 22 4·7in.	—	23,500	21
	(São Paulo . . . . .)							
1898	COAST DEFENCE SHIPS.							
	(Deodoro . . . . .)	3,200	14	8	2 9·2in., 4 4·7in.	—	3,400	14
	(Floriano . . . . .)							
1907	PROTECTED CRUISERS.							
	(Bahia . . . . .)	3,500	—	—	10 4·7in.	—	18,000	
	(Rio Grande do Sul . . . . .)							
1895	Barrozo . . . . .	3,450	—	—	6 6in., 4 4·7in.	2	7,500	20

There are 2 river monitors (*Maranhao* and *Pernambuco*), 5 torpedo gunboats (*Tupy*, *Timbira*, *Tamoyo*, *Gustavo Sampaio*, and *Tiradentes*), 10 Yarrow destroyers, 4 first-class torpedo boats, a mine ship, 3 submarines, and a submarine salvage vessel.

There are three naval arsenals—at Rio de Janeiro, Pará, and Ladario de Matto Grosso (this latter a river arsenal).

### Production and Industry.

Brazil is an agricultural country, though only a small fraction of its soil has been brought under culture. Agricultural industries are encouraged by the State governments. Coffee is the chief product cultivated, and after that sugar, tobacco, and cotton, mate (Paraguay tea), india-rubber, timber, cocoa, and nuts. The four states of São Paulo, Rio de Janeiro, Espírito Santo, and Minas Geraes, the combined areas of which cover about one-eighth of the entire area of the Republic, are the principal districts for coffee growing. Four-fifths of the coffee of the world comes from these parts; more than half of the world's supply from São Paulo alone. The average annual crop of Brazil may be estimated at about 12 million sacks (1 sack = 132 pounds). In 1915 the estimated produce was 9,497,553 bags. India Rubber is the other great natural product of the country. About one half of the world's supply comes from Brazil, the principal rubber-growing districts being Ceara, Manaus, and Pará. In 1915, the rubber crop was 35,305 tons (39,115 tons in 1914). The 1916 crop was about 37,000 tons. In 1914-15, the estimated production of sugar was 5,190,000 bags. Cocoa is produced in many States but chiefly in Espírito Santo, and Bahia, where also the tobacco industry flourishes. In Pernambuco there are 47 sugar factories, in Campos (Rio de Janeiro) 40, in Bahia 12, and in other parts of Brazil 15. The average annual production may be taken as 300,000 tons. The cultivation of rice is extending.

The census of cattle for 1913 showed that there were in Brazil 30,705,080 cattle; 18,399,000 swine; 10,653,000 sheep; 7,289,050 horses; and 3,208,000 mules.

Both the forests and mines of Brazil are of value, but little has been done to make use of them. The mines, with certain reservations, belong to the proprietors of the soil. Coal deposits exist in Rio Grande do Sul, Santa Catharina, Paraná, and São Paulo, much of the coal being of inferior quality. Gold is found; diamond districts are Diamantina, Graão Mogol, Chapada Diamantina, Bagagem, Goyaz, Matto Grosso, and other States. Petroleum also exists in workable quantities. Manganese ores are worked in Rio de Janeiro and Minas Geraes. The greater part of the world's supply of monazite comes from Brazil. Other mineral exports are mica and talc, copper ore, platinum, rock crystal, agate, but all of these are found in small quantities.

The most important manufacturing industry in Brazil is cotton weaving, which in the past 25 years has developed to such an extent that all but the finer grades are made in this country, and the importation of cotton goods from Europe is decreasing. There are important woollen factories for cloths, flannels, rugs, felts, &c., at Rio de Janeiro, Nietheroy, Maranhão, Porto Alegre, and Rio Grande do Sul. The manufacture of silk is also being encouraged; the Federal Government grants premiums to silk cocoon producers. There are 2 silk mills at Petropolis near Rio. In Rio de Janeiro flour milling is important, wheat being imported chiefly from the Argentine and Uruguayan Republics, but the imports of wheat flour are very large, mostly from the Argentine Republic. Brewing, being protected, is prosperous. Altogether there are 11,335 factories in Brazil, with a capital of 665,676,000

milreis, an annual output of 741,536,000 milreis, and 151,841 employees. Efforts are being made to establish a fishing industry.

In the southern States of Brazil there are prosperous German, Russian and Italian colonies. In Rio Grande do Sul there are about 200,000 Germans; in Paraná, 180,000, and in Santa Catharina, 85,000. The colonies maintained by the Union are the nineteen following:—Affonso Penna (founded in 1908), in the State of Espírito Santo; Visconde de Maua (1908) and Itatiaya (1908) in the State of Rio de Janeiro; João Pinheiro (1910) and Inconfidentes (1910) in that of Minas Geraes; Bandeirantes (1908) and Monção (1910) in that of S. Paulo; Ivahy (1907), Tayo (1908), Iraty (1908), Vera-Guarany (1909), Senador Correia (1907), Jesuino Marcones (1907), Cruz Machado (1910), Apucarana (1912), and Yapo (1913), in Paraná; Anniapolis (1908), Senador Esteves Junior (1910) and Rio Branco (1913), in Santa Catharina. On December 31, 1915, the population of these Colonies was 113,328.

### Commerce.

Imports and exports (excluding specie) conversions at current rates varying from 11½*d.* to 16*d.* per milreis (paper):—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports . . . . .	63,424,637	67,166,000	35,473,000	30,088,000	40,287,000
Exports . . . . .	74,649,143	64,849,000	46,527,000	52,970,000	55,010,000

Principal exports in 1915 and 1916 were (metric ton = 2,204·6 lbs.):—

	Quantities 1915	Quantities 1916	Value 1915	Value 1916
			£	£
Coffee (Sacks) . . . . .	17,061,000	13,039,000	32,190,000	29,279,000
Rubber (Metric tons) . . . . .	35,165	31,495	7,040,000	7,496,000
Tobacco " . . . . .	27,096	21,293	1,162,000	1,529,000
Sugar " . . . . .	59,074	53,824	756,000	1,286,000
Yerba Maté " . . . . .	75,885	73,542	1,856,000	1,838,000
Cocoa " . . . . .	44,980	42,720	2,894,000	2,500,000
Cotton " . . . . .	5,228	1,071	287,000	121,000
Leather " . . . . .	38,324	46,390	2,956,000	3,887,000
Hides " . . . . .	4,572	3,758	741,000	818,000

The distribution of the imports and exports in 1914 and 1915 was as follows:—

From or to	Imports		Exports	
	1915	1916	1915	1916
	£	£	£	£
United Kingdom . . . . .	6,596,647	8,206,070	6,405,000	6,410,000
Germany . . . . .	464,400	17,730	—	—
United States . . . . .	9,651,262	15,840,408	22,147,000	25,828,000
France . . . . .	1,486,575	2,095,388	6,035,000	8,885,000
Portugal . . . . .	1,490,287	1,872,026	486,000	213,000
Austria-Hungary . . . . .	39,712	304	—	—
Belgium . . . . .	51,750	57,958	—	—
Argentina . . . . .	4,786,087	5,675,353	22,677,000	3,354,000
Uruguay . . . . .	446,300	656,807	914,000	1,471,000
Holland . . . . .	206,775	241,446	3,371,000	1,685,000
Italy . . . . .	1,827,050	1,410,512	1,664,000	8,401,000

The chief articles of commerce between the United Kingdom and Brazil (Board of Trade statistics) in two years were:—

Imports into U.K. from Brazil	1914	1915	Exports from U.K. to Brazil	1914	1915
	£	£		£	£
Rubber . . . . .	3,433,581	3,240,929	Coal, cinders, &c. . .	1,260,529	646,798
Raw cotton . . . .	1,715,400	230,018	Cottons and yarn . .	1,035,174	1,138,344
Coffee . . . . .	954,247	1,703,325	Machinery . . . . .	789,130	310,160

Total trade between United Kingdom and Brazil for 5 years:—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Brazil into U.K.	9,360,139	10,008,367	7,978,632	8,256,879	9,035,123
Exports to Brazil from U.K.	12,657,830	12,465,115	6,265,453	5,151,470	6,716,852

### Shipping and Navigation.

In 1915 there entered the ports of Brazil 22,059 steam and sailing vessels of 19,494,771 tons, and cleared 22,504 steam and sailing vessels of 19,471,800 tons. Of those entering, 1,581 with a tonnage of 5,053,950 were British.

The merchant navy in 1916 consisted of 377 steamers of 290,637 tons net, and 290 sailing vessels of 60,728 tons net. All coasting and river vessels must be Brazilian. The Brazilian Lloyd, for coasting trade, maintains a monthly service between Rio de Janeiro and New York, and has also inaugurated a service between Liverpool, Portugal and Brazil.

### Internal Communications.

Brazil possessed on December 31, 1915, railways of a total length of 16,294 miles open for traffic. Of this total 2,929 miles of railway are owned and administered by the Government. The entire system, when complete, will join up the railways of Brazil with those of Uruguay, Argentina and Paraguay.

The telegraph system of the country is under control of the Government. In 1915 there were 22,757 miles of line. There were 725 telegraph offices. The number of messages was 3,853,405.

The Post Office carried (1915) a total of 7,915,124 postal letters, cards, etc. There were 3,603 post-offices in 1915.

A wireless system is now in process of completion. Fifteen new stations were erected along the Amazon and Paraguay rivers, and 5 on the coast.

A decree was issued in 1913 adopting the standard time and longitude of Greenwich (instead of that of Rio de Janeiro) as from January 1, 1914.

### Money and Credit.

The *Caixa de Conversão* was founded in 1906, and up to May, 1910, it received gold in exchange for notes at the rate of 1s. 3d. per milreis. It then suspended operations, having in deposit at that date 20,000,000*l.*, the maximum fixed by law. On January 23, 1911, it recommenced operations, Congress having fixed the maximum deposit at 60,000,000*l.* at the exchange of 1s. 4d. per milreis. On December 31, 1916, it had gold to the value of 5,015,397*l.* The obligation to exchange notes is suspended to December 31, 1917.

At the end of December, 1915, the activities of the banks of Brazil totalled at 3,609,479 milreis (end of 1914, 3,399,831 milreis). They held gold to the value of 1,818,756 milreis (1,737,438 in 1914); and their reserve funds to 43,925 milreis (40,507 in 1914).

The value of the currency milreis fluctuates; in 1900 the average rate of exchange was  $9\frac{3}{4}d.$ ; in 1910,  $16d.$ ; in 1911-12,  $16\frac{3}{4}d.$ ; in 1914,  $12\frac{1}{2}d.$ ; in 1915, between  $14\frac{1}{2}d.$  and  $11\frac{3}{4}d.$ , and in 1916,  $12\frac{1}{2}d.$  and  $11\frac{1}{4}d.$

### Money, Weights, and Measures.

#### MONEY.

The unit is 1 real (*pl.* reis); bronze coins, 20 and 40 reis (100 reis =  $1\frac{1}{2}d.$ ); nickel coins, 100, 200, and 400 reis (400 reis =  $6\frac{1}{2}d.$ ); silver, 500, 1,000, and 2,000 reis. The *Milreis* of 1,000 *Reis* is of the par value of 2s. 2'934*d.* (practically 27*d.*).

#### WEIGHTS AND MEASURES.

The French metric system, which became compulsory in 1872, was adopted in 1862, and has been used since in all official departments. But the ancient measures are still partly employed in certain rural districts of the interior. They are:—

The <i>Libra</i>	.	.	.	=	1·012 lbs. avoirdupois.
„ <i>Arroba</i>	.	.	.	=	32·38 „ „
„ <i>Quintal</i>	.	.	.	=	129·54 „ „
„ <i>Alqueire</i> (of Rio)	.	.	.	=	1 imperial bushel.
„ <i>Oitava</i>	.	.	.	=	55·34 grains.

### Diplomatic and Consular Representatives.

#### 1. OF BRAZIL IN GREAT BRITAIN.

*Envoy and Minister.*—Antonio da Fontoura Xavier (appointed October 13, 1914).

*Councillor of Legation.*—A. de Mello Franco.

*Secretaries.*—S. Rangel de Castro and Octavio Fialho.

*Archivist.*—George R. Moore.

*Consul-General in Liverpool.*—Sully José de Souza.

*Consul in London.*—Helio Lobo.

There are Consular representatives at Belfast, Birmingham, Bristol, Cardiff, Cork, Cowes, Dover, Dublin, Dundee, Edinburgh, Falmouth, Glasgow, Hull, Leith, Limerick, Manchester, Milfordhaven, Newcastle, Plymouth, Portsmouth, Southampton.

#### 2. OF GREAT BRITAIN IN BRAZIL.

*Envoy and Minister.*—Arthur Peel, appointed March 20, 1915.

*Secretaries.*—H. T. Beresford-Hope and R. C. Parr.

*Commercial Attaché.*—Ernest Hamblock.

There are Consular representatives at Rio de Janeiro (C.G.), Bahia, Pará, Pernambuco, Rio Grande do Sul, Santos, Ceará, Maceió, Maranhão, Porto Alegre, Manaus, São Paulo, Corumbá, Morro Velho, Victoria, Aracaju, Ilheus, Porte Velho, Cabedello, Parahyba, Parnahyba, Rio Grande do Norte, Carityba, Sta. Catarina, and São Francisco.

## BULGARIA.

(BULGARIYA.)

### Reigning King.

**Ferdinand**, youngest son of the late Prince Augustus of Saxe-Coburg and Gotha, and the late Princess Clémentine of Bourbon-Orléans (daughter of King Louis Philippe), born February 26, 1861, was elected Prince of Bulgaria by unanimous vote of the National Assembly, July 7, 1887; assumed the government August 14, 1887, in succession to Prince Alexander, who had abdicated September 7, 1886. His election was confirmed by the Porte and the Great Powers in March, 1896. Married (1) April 20, 1893, to Marie Louise (died January 31, 1899), eldest daughter of Duke Robert of Parma; (2) February 28, 1908, to Princess Eleonore of Reuss Köstritz.

*Children of the King* (all of first marriage).—(1) Prince *Boris*, born January 30, 1894 (heir-apparent); (2) Prince *Cyril*, born November 17, 1895; (3) Princess *Eudoxia*, born January 17, 1898; and (4) Princess *Nadejda*, born January 30, 1899.

On July 10, 1911, the Grand Sobranje confirmed the title of 'King' (Czar). According to the Constitution the Sovereign must profess the Orthodox religion, excepting the case of the present King, and must reside permanently in the country. The royal title is hereditary.

The civil list is fixed at 1,250,000 leva (frances), besides 830,000 leva for the maintenance of palaces, &c.

### Constitution and Government.

The Principality of Bulgaria was created by the Treaty of Berlin, signed July 13, 1878. It was ordered by the Treaty that Bulgaria should be constituted an autonomous and tributary Principality under the suzerainty of His Imperial Majesty the Sultan with a Christian Government and a national militia. The Prince of Bulgaria should be freely elected by the population and confirmed by the Sublime Porte, with the consent of the Powers. On October 5, 1908, Bulgaria declared her independence. The difficulty as to compensation to the Turkish Government in respect of railway claims was arranged by an understanding between the Turkish Government and the Oriental Railways Company, and the Powers have recognised Bulgarian independence, and the title of 'King of the Bulgarians' assumed by Prince Ferdinand.

Eastern Rumelia (since its union with Bulgaria also known as Southern Bulgaria) was created by the Treaty of Berlin, signed July 13, 1878. It was to remain under the direct political and military authority of the Sultan, under conditions of administrative autonomy, with a Governor-General nominated by the Porte. On September 18, 1885, the Government was overthrown by a revolution, and the union of the province with Bulgaria proclaimed. On April 6, 1886, the Sultan agreed that the government of Eastern Rumelia should be confided to the (then) Prince of Bulgaria as Governor-General.

On September 30, 1912, Bulgaria allied with Serbia, Greece and Montenegro commenced war on Turkey (First Balkan war), which was ended by the Treaty of London on May 30, 1913, by which Turkey ceded to the Allies all its European territory west of a line drawn from Midia on the Black Sea to Enos on the Aegean, and also Crete.

The Balkan League broke up almost immediately after the signing of the Treaty of London, owing to disagreements among the allies as to the division of the territory ceded to them, and on June 29, 1913, war broke out among the allies (second Balkan War). On July 10, 1913, Rumania intervened to impose peace on the allies and to exact for herself from Bulgaria an extension of her frontier. Peace came finally on August 10

(July 26 old style), 1913, by the Treaty of Bukarest, between Bulgaria on the one hand, and Rumania, Serbia, Greece and Montenegro on the other.

For frontier arrangements agreed to by the Treaty of Bukarest and the Turko-Bulgarian Treaty, *see* THE STATESMAN'S YEAR-BOOK for 1915 p. 759, and the maps in THE STATESMAN'S YEAR-BOOK for 1914.

By the Constitution of 1879, amended May, 1893, and June, 1911, the legislative authority was vested in a single Chamber, called the Sobranje or National Assembly. The members of it are elected by universal manhood suffrage at the rate of one member to every 20,000 of the population. Those residing in the city where the National Assembly sits receive 15 leva (12s.) a day (including Sundays and holidays) during session; others, 20 leva (16s.) a day with travelling expenses. All over 30 years of age who can read and write (except the clergy, soldiers on active service, persons deprived of civil rights, &c.) are eligible as representatives. The duration of the Assembly is four years, but it may be dissolved at any time by the King, when new elections must take place within two months. Laws passed by the Sobranje require the assent of the King. Questions concerning the acquisition or cession of territory, changes in the constitution, a vacancy on the throne, or the appointment of a regent have to be decided by a Grand Sobranje, elected for the special purpose in a manner similar to that in which the ordinary Sobranje is elected, but with double the number of members.

Sobranje (elected March 10, 1914); 128 Ministerialists, 51 Agrarians, 21 Socialists, 28 Democrats, 9 Nationalists, 5 Radicals, 3 Zankovists; total, 245 (207 in Old Bulgaria and 41 in the new territories).

The executive power is vested in a Council of eight Ministers nominated by the King. The present cabinet, first appointed July 20, 1913, and re-appointed January 5, 1914, is as follows:—

*Premier, Minister for Foreign Affairs and of the Interior.*—M. Rudoslavoff.

*Minister of Finance.*—M. Toncheff.

*Minister of Justice and Minister of Education.*—M. Pecheff.

*Minister of War.*—General Naïdenoff.

*Minister of Commerce.*—M. Bakaloff.

*Minister of Public Works.*—M. Petcoff.

*Minister of Agriculture.*—M. Dincheff.

*Minister of Posts and Railways.*—M. Kosnitchki.

### Area and Population.

The estimated area of Bulgaria (1914) is 43,305 English square miles, and the estimated population, 4,752,997. Of the new population 227,598 were Bulgarians, 75,337 Pomatz, 275,498 Turks, and 58,709 Greeks.

By a census taken on December 31, 1910, the population of the whole kingdom was ascertained to be 4,337,516 (2,206,691 males and 2,130,825 females), as against 4,035,575 (2,057,092 males and 1,978,483 females) in 1905. Bulgaria before 1913 was divided into 12 districts (including the 3 districts of Eastern Rumania).

Area and population of districts, according to census of December 31, 1910:

—	Area	Popula- tion	—	Area	Popula- tion
	sq. miles			sq. miles	
1. Bourgas . . .	5,409	351,508	8. Roussé (Rustchuk)	2,135	406,309
2. Varna . . .	2,554	329,612	9. Sofia . . .	1,832	481,598
3. Vidin . . .	3,255	237,571	10. St. Zagora . .	6,540	442,969
4. Vratza . . .	773	312,400	11. Tirnovo . . .	2,502	448,197
5. Kustendil . .	807	231,522	12. Choumen . . .	2,691	282,601
6. Plovdiv (Philippo- polia) . . .	8,238	447,309	Total (1910) . .	38,647	4,337,516
7. Pléven . . .	1,851	865,868	Total (1912) . .	—	4,432,427

The population divided according to nationality, was as follows in 1910 3,203,810 Bulgarians; 488,010 Turks, 75,773 Rumanians, 63,487 Greeks; 98,004 Gipsies, 37,663 Jews, 3,863 Germans, 3,275 Russians, and 61,690 of other nationalities. The present capital is the city of Sofia, with a population (census, 1910) of 102,812. The other principal towns with population in 1910, are Philippopolis 47,981; Rustchuk, 36,255; Varna, 41,419; Shumla, 22,225; Slivno (Sliven), 50,598; Plevna (Pleven), 23,049.

The movement of population in the principality in three years has been :—

Years	Marriages	Living births	Still-births	Deaths	Surplus of births
1909	38,927	172,571	1,547	113,203	59,368
1910	38,917	179,563	1,549	99,941	79,622
1911	41,271	175,708	1,365	94,144	81,564

### Religion and Instruction.

The national faith is that of the Orthodox Greek Church, though, in 1870, in consequence of its demand for and acceptance of religious autonomy, the Bulgarian Church was declared by the Patriarch of Constantinople to be outside the Orthodox communion. The church is governed by the Synod of Bishops. There are 11 Eparchies or Bishopries. The clergy, both Orthodox and of other religious bodies, are paid by the State and also receive fees for services at burials, marriages, &c. Of the population in 1910, 3,643,951 belonged to the Orthodox Church, 602,101 were Mahomedans, 40,070 were Jews, 32,130 were Catholics, 12,270 Gregorian Armenians, 6,252 Protestants. The Mahomedans are mostly in the northern and eastern provinces.

There is a university at Sofia, with three faculties—History and Philology, Physics and Mathematics, and Law. In 1911-12 it was attended by 2,260 students, of whom 217 were women, and there were 70 professors and lecturers.

In 1911-1912 the Bulgarian and other secondary schools were as shown in the following table. The non-Bulgarian schools were Turkish, Greek, Jewish, Armenian, American, French and German :—

Description of Schools	Schools	Teachers		Pupils	
		Male	Female	Male	Female
Gymnasias	47	567	300	10,625	5,862
Lower Middle Class	316	2,111	—	38,973	16,539
Special Technical and Other Schools	155	—	—	4,749	4,744

In 1913-14 there were 4,589 elementary schools with 5,769 male and 5,031 female teachers and 290,800 boys and 213,963 girls.

For education the State grants a yearly subvention which provides for half the cost (two-thirds in the case of the elementary schools), the remainder being provided in towns by the municipalities and in villages by the communal authorities. Education is free and nominally obligatory for a period of four years (8-12). The richer parents are, however, required to pay 20 leva (16s.) a year for each of their children attending the higher schools. There are free public libraries at Sofia, Philippopolis, Varna, and Rustchuk.

### Finance.

The estimated revenue and expenditure of Bulgaria for 6 years were as follows (25 leva = £1):—

—	1912	1913	1914	1915 & 1916	1917 <sup>2</sup>
	£	£	£	£	£
Revenue . . .	7,610,920	5,765,344	10,279,800	11,027,195	17,519,134
Expenditure . . .	7,557,200	4,732,832 <sup>1</sup>	10,270,504	11,014,648	17,519,134

<sup>1</sup> Excluding the expenditure for the war.

<sup>2</sup> Estimates.

For 1917 the chief sources of revenue were: direct taxes, 3,446,094*l.*; indirect taxes, 6,750,400*l.*; monopolies, 2,640,000; posts, telegraphs, and railways, 2,197,200*l.*; State domains, 932,840*l.*

Debt on May 31, 1916, 67,910,278*l.* as follows:—6 per cent. loan of 1892, 2,526,720*l.*; 5 per cent. loan of 1902, 3,887,000*l.*; 5 per cent. loan of 1904, 3,733,200*l.*; 4½ per cent. loan of 1907, 5,401,600*l.*; 4¾ per cent. loan of 1909 (to the Russian Government), 3,226,357*l.*; 4½ per cent. loan of 1909, 3,837,600*l.*; the 6 per cent. loan of 1914, 900,932*l.*; East Rumelian debt, 930,770*l.*; floating debt, 40,984,252*l.*

### Defence.

Service is universal and compulsory. Mahomedans are exempted, but like all others exempted, pay a tax. Service in the ranks commences at the age of 20, and is now for 2 years in the infantry, and for 3 years in the other arms. Reserve service is for 18 years in the infantry, and 16 years in the other arms. The reservists are liable to be called out for 3 weeks training annually.

After completion of his reserve service, the Bulgarian soldier passes to the Opolchenie (Territorial Army), serving in the first ban for 4 years (infantry), or 5 years (all other arms). Finally the men of all arms pass for 2 years to the second ban, thus completing a total service of 26 years.

At present the Bulgarian infantry is organised in 36 regiments of 2 battalions, each of 4 companies; and the artillery in 9 regiments of 2 divisions each of 3 batteries of 4 guns, 12 mountain batteries, and 3 battalions of fortress artillery. On mobilisation each infantry regiment expands to four battalions, and each artillery regiment forms a third division of 3 batteries. Further, from the large number of reservists of each regiment is formed a reserve regiment of 4 battalions, and a depot battalion.

There is one guard cavalry regiment of 3 squadrons, 4 line regiments of 4 squadrons, and 6 of 3 squadrons. On mobilisation, all regiments are raised to 4 squadrons and a depot squadron. There further are 3 battalions of pioneers, 1 railway battalion, 1 pontoon battalion, 1 telegraph battalion, etc.

The Opolchenie forms on mobilisation 36 battalions of the first ban, and 36 half-battalions of the second ban.

The reservists not required to complete the field units join the depots and are available to make good the waste of war.

Bulgaria is divided into 9 military districts, each of which supplies a complete division to the field army, besides a portion of the independent cavalry, fortress artillery and engineers, mountain artillery, etc., and of reserve troops. The strength of the divisions in peace (8 battalions, 6 batteries, etc.) is small; but in war, besides the expansion above mentioned, a third (reserve) brigade is added, enabling additional divisions to be created—there were fourteen mobilised in the summer of 1913. The peace strength of

the Bulgarian army is about 3,900 officers and 56,000 all other ranks, but the field army amounts to about 280,000 men besides line of communications, troops, &c.

The Bulgarian infantry is armed with the Mannlicher magazine rifle, calibre .315. Cavalry have the Mannlicher carbine. The field gun is the Schneider Q.F. gun of 7.5 cm. calibre. The mountain batteries are armed with the light Krupp 7.5 cm. Q.F. guns.

### Production and Industry.

Agriculture is the chief occupation of the people. Land is held in absolute freehold by the owners and there is a land tax. The communes hold pasture-land and wood-land in perpetuity and pay no rent, and over such lands the members of the communes have grazing and wood-cutting rights.

About five-sevenths of the population are engaged in agriculture, most of them being small proprietors holding from one to six acres. The total area of (old) Bulgaria comprised 23,797,000 acres, of which, in 1913, 8,212,649 acres were cultivated. Of the new area 986 sq. miles are cultivated land.

The acreage and yield of the principal crops for 2 years are shown as follows:—

	Area in Acres		Produce in Cwts.	
	1913	1914	1913	1914
Wheat . . . . .	2,539,150	2,669,137	24,392,102	14,141,166
Barley . . . . .	508,075	539,782	4,949,152	4,013,710
Oats . . . . .	390,150	383,165	2,721,498	2,345,586
Rye . . . . .	494,180	533,485	4,474,870	3,685,598
Maize . . . . .	1,465,850	1,584,740	15,472,246	15,780,978

The harvest of 1916-17 produced of wheat 1,040,700 metric tons; rye, 215,650 metric tons; barley, 320,900 metric tons; oats, 107,000 metric tons.

In 1910 there were in Bulgaria 8,669,260 sheep, 1,464,719 goats, 1,606,363 head of cattle, 527,311 pigs, 478,222 horses, 118,488 asses, and 12,238 mules.

All minerals belong by law to the State. Besides the coal mines at Pernik, worked by the Government, coal of good quality has also been found in Balkans near Trevna, and several working concessions have been granted. About 1,000,000 cubic metres of stone are quarried annually. Iron is found in large quantities; gold, silver, lead, manganese and copper also exist in the country. The chief manufactures are woollen goods, cottons, cord, and cigarettes. There are 388 State-encouraged industrial institutions.

### Commerce.

The foreign trade follows three main routes:—The Black Sea, the Danube, and the mainland railway.

Imports and exports for 6 years:—

—	1900	1910	1911	1912	1913	1914
	£	£	£	£	£	£
Imports .	6,417,185	7,094,268	7,973,792	8,524,408	6,850,042	9,659,600
Exports .	4,457,347	5,162,088	7,385,356	6,257,264	3,728,185	6,177,000

The following table shows the trade by principal countries for 1913 and 1914:

Country	Imports		Country	Exports	
	1913	1914		1913	1914
	£	£		£	£
U. Kingdom . . .	675,235	1,379,000	U. Kingdom . . .	318,008	756,680
Austria-Hungary .	2,194,505	2,530,640	Austria-Hungary .	576,464	430,160
Belgium . . .	164,709	200,040	Belgium . . .	602,419	144,740
Germany . . .	1,483,168	2,188,640	France . . .	203,408	873,800
France . . .	517,364	701,040	Germany . . .	675,366	806,400
Italy . . .	263,558	611,960	Turkey . . .	169,135	447,840
Turkey . . .	255,165	441,840	Rumania . . .	—	135,320

The chief imports in 1914 were: cattle, 117,160*l.*; cereals, 245,920*l.*; metals, 1,030,200*l.*; machinery, implements, &c., 896,360*l.*; textiles, 2,876,760*l.*; hides, skins, leather, &c., 649,840*l.* The chief articles of export were: wheat, maize, live stock, silk cocoons, hides, skins, &c., attar of roses. Other exports are fruit, timber, and tobacco.

A commercial Convention, specifying maximum rates of duties leviable on British imports into Bulgaria, fixing the dues leviable on merchandise, &c., landed at Bulgarian ports, and providing for the most favoured nation treatment between Bulgaria and Great Britain, was signed at Sofia on December 9, 1905.

Total trade between United Kingdom and Bulgaria (Board of Trade Returns) for 5 years:—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Bulgaria into U.K.	491,484	40,782	195,143	41,974	800
Exports to Bulgaria from U.K.	1,002,423	471,579	857,856	85,505	—

### Shipping and Communications.

The number of vessels entered at the ports of Bulgaria in 1913 was 11,755 of 3,132,481 tons, and 11,710 of 3,108,505 cleared. The chief ports are Varna and Bourgas on the Black Sea, and Rustchuk, Sistor, Vidin on the Danube.

In 1916, Bulgaria (including Eastern Rumelia) had 1,675 miles of railway belonging to the State, and 149 miles belonging to private companies; total, 1,824 miles. Railways connect Sofia with the general European system.

There were, in 1914, 3,692 miles of State telegraph lines with 11,627 miles of wire and 436 telegraph offices; the messages in 1914 were 2,794,980. There were, in 1914, 57 telephone systems with 1,554 miles of line and 11,997 miles of wire. Number of conversations, 14,070,876. There were 2,515 post offices, and the number of letters carried in 1914 was 28,999,000; postcards, 22,905,000; newspapers, &c., 6,233,000.

### Money and Credit.

There is a National Bank of Bulgaria, with headquarters at Sofia and branches at Philippopolis, Rustchuk, Varna, Burgas, Tirnovo and 59 agencies in the different towns of Bulgaria; its capital is 20,000,000 leva, provided by the State with a reserve fund of, 1911, 7,323,671, and it has authority to issue both gold notes and silver notes. The latter were issued for the first time in December, 1899; on December 31, 1916, the note issue amounted to 369,828,941 leva. Three foreign banks, one German (Banque de Crédit, capital 9,000,000 frs.), one Austro-Hungarian (Banque Balkanique, capital 4,000,000 frs.), and the other French (Banque Générale de Bulgarie, capital 2,000,000 frs.) have been founded, having their head-

quarters at Sofia and branches at Varna, Philippopolis, Rustchuk, and Burgas. There is a State Agricultural Bank for making advances on personal security, with an aggregate capital of 45,450,340 leva on December 31, 1913, and power to borrow from the National Bank.

There are a few Bulgarian gold coins, of the value of 100, 20, and 10 leva (francs), but the gold circulation is supplied by foreign 10 and 20 franc pieces. There are silver coins of  $\frac{1}{2}$  lev, and 1 lev, 2, and 5 leva (francs); nickel coins of 2 $\frac{1}{2}$ , 5, 10, and 20 stotinki (centimes); the notes of the National Bank circulate at par.

The metric system is in general use. On April 1, 1916, the Gregorian Calendar came into force in Bulgaria.

### Diplomatic and Consular Representatives.

Diplomatic relations were broken off between Great Britain and Bulgaria on October 13, 1915, when Great Britain declared war on Bulgaria.

## CHILE.

(REPÚBLICA DE CHILE.)

**Constitution and Government.**

THE Republic of Chile threw off allegiance to the Crown of Spain by the declaration of independence of September 18, 1810, finally freeing itself from Spanish rule in 1818. The Constitution voted by the representatives of the nation on May 25, 1833, with a few subsequent amendments, establishes three powers in the State—the legislative, the executive, and the judicial. The legislative power is vested in the National Congress, consisting of the Senate and the Chamber of Deputies. The Senate is composed of 37 members popularly elected by provinces for the term of six years, in the proportion of one Senator for every three Deputies; while the Chamber of Deputies composed of 118 members chosen directly by departments for a period of three years, consists of one representative for every 30,000 of the population, or a fraction not less than 15,000; the present number of deputies was determined in 1910 on the basis of the census results of 1907. Both bodies are chosen by the same electors. Electors must be 21 years of age, and able to read and write. The executive is exercised by the President of the Republic elected for a term of five years, by indirect vote, the people nominating, by ballot, delegates who appoint the President. A retiring President is not re-eligible. In legislation the President has a modified veto; a bill returned to the chambers with the President's objections may, by a two-thirds vote of the members present (a majority of the members being present), be sustained and become law. The day of a Presidential election is June 25 of the last of the five years of a Presidency.

*President of the Republic.*—Señor Dr. Juan Luis Sanfuentes. Assumed office December 23, 1915.

The salary of the President is fixed at 1,384L., with 923L. for expenses.

The President is assisted in his executive functions by a Council of State of five members nominated by the President, and six members chosen by the Congress, and a Cabinet or Ministry divided into six departments, viz., Interior, Foreign Affairs, Justice and Public Instruction, Finance, Defence, Industry, Public Works and Railways.

**LOCAL GOVERNMENT.**

For the purposes of local government the Republic is divided into Provinces, presided over by *Intendentes*; and the Provinces into Departments, with *Gobernadores* as chief officers. The Departments constitute one or more municipal districts each with a council or municipality of 9 members, inhabitants popularly elected for three years. The police of Santiago and of the capitals of departments is organised and regulated by the President of the Republic at the charge of the national treasury.

**Area and Population.**

The Republic is divided into 23 provinces, subdivided into 80 departments, and 1 territory (Magallanes). Departments and territories are subdivided into 896 sub-delegations and 3,209 districts.

In 1884 the provinces of Tarapacá and Tacna were ceded to Chile by Peru. The cession of Tacna was originally for ten years, at the end of which period a *plebiscite* of the province would decide to which country it should belong. As the *plebiscite* has not yet been taken, the provinces are still occupied by Chile.

## Area and population of the provinces on December 31, 1915:—

Provinces	Area : Sq. Miles	Popula- tion 1915	Pop. per Sq. Mile	Provinces	Area : Sq. Miles	Popula- tion 1915	Pop. per sq. Mile
Tacna .	8,999	46,250	5.14	Ñuble .	3,498	175,885	50.23
Tarapacá .	16,689	125,961	7.54	Concepción .	3,313	238,767	72.06
Antofagasta	46,408	128,017	2.78	Arauco .	2,189	63,449	28.97
Atacama .	30,711	67,027	2.18	Biobío .	5,353	104,785	19.56
Cochimbo .	14,098	185,073	13.19	Malleco .	3,303	118,491	35.87
Aconcagua	5,406	139,914	25.88	Cautín .	6,381	174,620	27.86
Valparaíso	1,775	331,284	186.68	Valdivia .	8,991	153,841	17.11
Santiago .	5,893	598,477	101.55	Llanquihué .	34,778	128,045	3.68
O'Higgins	2,168	97,456	44.95	Chiloé .	6,979	96,810	13.86
Colchagua	3,851	160,058	41.56	Magallanes territory .	65,355	23,090	0.35
Curicó .	3,045	109,806	36.06				
Talca .	3,864	133,996	34.67				
Maule .	2,812	124,620	44.31				
Linares .	3,969	115,796	29.17	Total .	289,829	3,641,477	12.57

Many islands to the north, west, and south belong to Chile. The coast line is about 2,485 miles in length.

In 1885 the population numbered 2,527,300; in 1895, 2,712,145. In 1907 (last census), 3,249,279 (1,624,221 males and 1,625,058 females).

The population of the principal towns in 1915 was:—Santiago, 408,247; Valparaíso, 191,078; Concepción, 72,127; Iquique, 45,750; Talca, 39,744; Chillan, 39,929; Antofagasta, 37,219; Viña del Mar, 30,861; Curicó, 19,825; Temuco, 27,120; La Serena, 17,818; Talcahuano, 21,339; Valdivia, 20,068. The great majority of the population is of European origin. The indigenous inhabitants are of three branches, the *Fuegians*, mostly nomadic, living in or near Tierra del Fuego; the *Araucans* (101,118) in the valleys or on the western slopes of the Andes; the *Changos*, who inhabit the northern coast region and work as labourers.

Births, marriages, and deaths, exclusive of still-births:—

Year	Births	Marriages	Deaths	Surplus of Births
1911	133,468	19,184	107,816	25,652
1912	135,373	21,258	103,905	31,468
1913	140,525	21,341	107,200	33,325
1914	136,550	19,002	100,059	36,491
1915	136,597	19,150	96,716	39,881

Immigration is small, but is encouraged by the Government. The number of immigrants engaged by the Government in 1913 was 1,142; in 1914, 360. The total number of immigrants between 1905 and 1914 was 25,544. Colonies (agricultural settlements) are encouraged, and their number and importance are increasing.

### Religion.

The Roman Catholic religion is maintained by the State, but according to the Constitution all religions are respected and protected. There is one archbishop (Santiago), three bishops, and two vicars apostolic. There were in 1914, 317 parishes in the Republic, 520 churches, and 878 chapels.

### Instruction.

Education is gratuitous and at the cost of the State, but is not compulsory. Professional and secondary instruction is provided in the Universities (one belonging to the State, The University of Chile, the other The Catholic University) and the National Institute of Santiago, and in the lyceums and colleges established in the capitals of provinces, and in some departments. In the State University the branches included are theology, law, and political science, medicine and pharmacy, physical and mathematical sciences, philosophy, literature, and the fine arts. In 1915, in the 2 Universities there were 4,343 matriculated students. There were in 1915, 2,920 public primary schools with 308,113 pupils, and 494 private primary schools with 61,513 pupils; 16 public and 2 private normal schools with 2,125 and 196 pupils respectively; 86 public and 117 private secondary schools with 27,016 and 15,822 pupils respectively; 11 public and 10 private commercial schools with 3,231 and 1,628 pupils respectively. There are besides agricultural schools, schools of mines, and professional schools. Other educational institutions are the Paedagogic Institute, the National Conservatory of Music, the National Observatory School of Arts and Trades, Institute for Deaf Mutes, School for the Blind and public museums. The National Library contains 182,020 volumes. The cost of maintaining the public primary schools in 1915 was 635,753L.

There were in 1915, 397 newspapers and journals published in Chile, including 80 dailies and 171 weeklies.

### Justice, Crime, Pauperism.

There are, in addition to a High Court of Justice in the capital, seven Courts of Appeal distributed over the Republic, Tribunals of First Instance in the departmental capitals, and subordinate courts in the districts. On January 1, 1916, there were 2 central prisons with 1,462 inmates (all men), 20 penitentiaries with 1,083 inmates (1,023 men and 60 women), 82 prisons, and 18 houses of correction for women with 7,291 inmates, and 3 reformatory schools, with 278 inmates (196 boys and 82 girls).

The police number 9,719 (756 officers).

At 103 hospitals in Chile in 1914 there were admitted 109,868 patients; there are also 2 lunatic asylums with 3,807 inmates; 85 shelters with 22,828 inmates, and 162 dispensaries ministering to 884,941 people.

### Finance.

In recent years the revenue and expenditure (ordinary and extraordinary) was as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1912	15,800,000	16,560,000	1915	9,340,733	9,937,438
1913	15,733,702	16,160,760	1916 <sup>1</sup>	9,668,750	13,211,059
1914	10,577,689	13,160,038	1917 <sup>1</sup>	9,721,000	9,572,076

<sup>1</sup> Estimates.

The actual receipts and expenditure for 1915 (in pounds sterling) was as follows :—

Receipts	Amount	Expenditure	Amount
	£		£
Customs duties . . .	6,854,805	Interior . . . . .	1,531,146
Internal taxes . . .	1,382,590	Foreign Affairs, Public	
Other receipts . . .	1,096,338	Worship, & Colonization	228,522
		Justice . . . . .	327,114
		Instruction . . . . .	1,163,515
		Treasury . . . . .	3,412,391
		War . . . . .	1,473,842
		Navy . . . . .	1,003,603
		Industry & Public Works	705,179
		Railways . . . . .	108,319
		Other expenditure . .	33,807
<b>Total . . . . .</b>	<b>9,340,733</b>	<b>Total . . . . .</b>	<b>9,987,438</b>

The following table gives in detail the amounts required for the several departments according to the 1917 Budget :—

Departments	Paper pesos	Gold pesos	Departments	Paper pesos	Gold pesos
Interior . . . . .	47,056,819	464,240	Navy . . . . .	17,741,449	19,486,283
Foreign Relations, etc. . . . .	2,826,545	1,036,860	Industry and Public Works	16,219,818	41,217
Justice . . . . .	10,724,503	—	Railways . . . . .	9,345,233	1,833
Public Instruction	31,741,262	246,313			
Treasury . . . . .	15,181,059	49,040,566	<b>Total . . . . .</b>	<b>194,284,356</b>	<b>70,825,014</b>
War . . . . .	43,437,668	507,702			

In 1915 the customs revenue was 129,905,168 gold pesos and 134,164,858 paper. In 1915 the customs revenue totalled 91,397,396 gold pesos.

On January 1, 1916, the external debt amounted to 32,556,380*l*. The internal debt amounted to 155,616,000 pesos gold (38,722,733 pesos currency).

### Defence.

The Chilean Army is a national militia in which all able-bodied citizens are obliged to serve. Liability extends from the 18th to the 45th year, inclusive. Recruits are called up in their 20th year, and are trained for one year. Afterwards they serve for 9 years in the reserve of the active army, after which they belong till the completion of their 45th year to the second reserve. The latter is organised as a second-line army.

Chile is divided into 4 zones or military districts, each of which furnishes a complete division on mobilisation. There are 48 battalions of infantry, 1 regiment of railway workers, 1 battalion of telegraphers, 8 regiments of cavalry, 2 batteries of horse artillery, 32 batteries of field artillery, 8 batteries of mountain artillery, 2 battalions of fortress artillery, and 8 battalions of engineers. The total strength of the active army is 994 officers and 19,971 men.

The infantry are armed with the Chilean Mauser rifle (1895), calibre 7 mm., and the cavalry with a carbine of similar pattern and lance. The field artillery are armed with Q.F. Krupp guns.

Military budget for 1915 was 1,613,217. The peace establishment for 1913 was fixed at 114,693.

The principal vessels of the Chilean fleet are as follows :—

Name	Launched	Displacement, Tons	Extreme Armouring, Inches	Main Armament	Torpedo Tubes	Indicated Horse-Power	Nominal Speed
<i>Pre-Dreadnoughts.</i>							
Capitan Prat . . .	1890	6,966	12	6 9·4-in. ; 8 4·7-in.	4	12,000	18·3
<i>Armoured Cruisers.</i>							
Esmeralda . . .	1896	7,030	6	2 8-in. ; 16 6-in.	3	18,000	23·0
O'Higgins . . .	1896	8,500	7	4 8-in. ; 10 6-in.	3	16,000	21·2
<i>Protected Cruisers.</i>							
Blanco Encalada . .	1893	4,420	—	2 8-in. ; 10 6-in.	5	14,500	22·0
Pres. Errazuriz . .	1890	2,080	—	4 6-in. . . . .	3	5,400	19·0
Zenteno . . .	1896	3,600	—	2 6-in. ; 10 6-in.	3	6,500	18·0
Chacabuco . . .	1898	4,300	—	2 8-in. ; 10 4·7-in.	5	15,000	24·0

There are also 3 torpedo gunboats, 10 destroyers, and 6 modern torpedo-boats. Also a mine ship, a training ship, and a hospital ship. Total strength of navy 6,000 officers and men.

Two Dreadnoughts building in England were purchased into the British Navy when war broke out, and 2 submarines were taken over by Canada.

### Agriculture and Industry.

There are three zones in Chile—the arid zone in the north, the agricultural zone in the centre, and the forest zone in the south. Agriculture and mining are the principal occupations. Total area of agricultural land is 95 million acres ; of forest area, 39,362,100 acres. Chile produces annually large quantities of cereals, besides excellent wine, fruit, and vegetables. The principal crops of the harvest for 3 years are shown as follows :—

	Acreage			Produce in Cwts.		
	1912-13	1913-14	1914-15	1912-13	1913-14	1914-15
Wheat . . .	1,044,760	1,018,382	1,072,982	11,998,716	8,787,852	10,179,080
Barley . . .	132,490	132,625	140,961	2,001,170	2,380,157	1,640,320
Oats . . .	94,717	121,615	151,602	1,289,780	1,267,815	2,029,834
Maize . . .	65,890	58,609	79,683	836,712	752,791	920,946

Vines . . .	117,635	162,902	175,861	33,680,710 <sup>2</sup>	45,981,056 <sup>2</sup>	68,230,207 <sup>2</sup>

<sup>1</sup> Tons.

<sup>2</sup> Gallons of wine.

On December 31, 1914, the live stock of Chile comprised 458,285 horses, 41,837 mules, 1,943,954 oxen, 4,545,088 sheep, and 229,416 pigs.

Dairy farms and the production of butter and cheese are on the increase. In Patagonia and Tierra del Fuego large tracts of country are devoted to sheep-farming. Extensive natural forests are found, the largest being found

in the provinces of Valdivia (1,885,406 acres), Llanquihué (1,406,024 acres), and Chiloé (1,188,572 acres). The wealth of the country, however, consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapacá.

The number of work-people employed in mineral workings in 1914 was 71,106, of whom 43,979 worked at nitrate of soda workings, 8,105 at coal mines, and 11,142 at copper mines.

The metals obtained were gold, silver, copper, cobalt, and manganese; the non-metallic substances being coal, nitrate, borate, salt, sulphur, and guano. Iron-ore deposits are found in the province of Coquimbo, estimated at over 200,000,000 tons. All the coal mines of Chile are situated south of Valparaíso. The value of mineral output in 1915 was 22,945,979*l*. (nitrate alone, 15,139,384*l*.).

Production and exportation of nitrate in recent years are stated as follows :—

Years	Production	Exported	Years	Production	Exported
	Metric tons	Metric tons		Metric tons	Metric tons
1910	2,465,415	2,335,941	1913	2,772,254	2,738,339
1911	2,521,023	2,449,515	1914	2,468,356	1,846,783
1912	2,585,850	2,493,082	1915	1,755,291	2,023,294

### Commerce.

Imports and exports (including re-exports) (special trade, including bullion and specie) (1 peso = 18*d*.) :—

—	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . .	26,174,277	25,084,107	24,713,836	20,231,752	11,490,866
Exports . .	25,455,702	28,742,095	29,723,283	22,475,658	24,560,936

The following table shows in gold pesos the principal imports and exports for 1914 and 1915 (1 peso = 18*d*.) :—

Imports.	1914	1915	Exports, (including re-exports.)	1914	1915
	Pesos	Pesos		Pesos	Pesos
Animal products.	15,769,101	12,255,874	Animal products	21,824,705	28,737,600

Oats . . .	276,121	525,374	New ships . . .	307,553	—

Total trade between Chile and United Kingdom for 5 years:—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Chile to U.K. . .	4,982,185	5,359,335	5,347,456	9,585,247	12,408,713
Exports to Chile from U.K. . .	6,159,159	6,010,481	3,759,633	1,791,181	4,037,368

### Shipping and Navigation.

The commercial navy of Chile consisted, in 1914, of 92 steamers of 43,983 tons net and 35 sailing vessels of 25,020 tons net. The shipping entered and cleared at the ports of Chile in 1914 was as follows:—Entered, 11,279 steam vessels of 20,550,543 tons, and 730 sailing vessels of 1,057,991 tons; cleared, 11,239 steam vessels of 20,666,607 tons, and 679 sailing vessels of 7,388,503 tons. Of the total entered, 2,278 steamers, and of those that cleared, 1,988 of 6,326,494 tons, were British.

### Communications.

In 1915 there were in Chile 20,776 miles of public road, and 528 miles of navigable river, and 668 miles of navigable lakes.

In 1915 the total length of railway lines open for traffic was 5,015 English miles, of which 3,236 belonged to the State.

The post-office in 1914 dispatched 65,874,911 postal packets, of which 4,487,363 were sent abroad. There were 1,099 post-offices, besides letter boxes.

The length of telegraph lines at the end of 1914 was 18,181 miles, of

line and 32,942 miles of wire. In 1914 there were 946 telegraph offices; 12,596,236 messages were sent. The length of telephone line was 44,149 miles, and of wire 55,589 miles (1914). Number of subscribers, 17,497.

Work has progressed on the several wireless stations now under construction along this coast, which with those now completed will form a chain composed of Arica, Antofagasta, Coquimbo, Valparaiso, Talcahuano, Valdivia, Puerto Montt, and Punta Arenas. A wireless station is also being erected on the Juan Fernandez Islands, about 400 miles west and south of Valparaiso.

### Money and Credit.

In 1912 a law was promulgated establishing a Bank of Issue (Caja de Emission). There are a number of joint-stock banks of issue with agencies in Chile. Their joint capital amounted on June 31, 1915, to 86,397,392 gold pesos, and their reserve funds to 29,389,845 gold pesos. The largest of the banks is the Bank of Chile with a paid-up capital of 30,000,000 pesos. The banks are required to guarantee their note issue by depositing gold, Government notes, or securities in the Treasury. There are also land banks which issue scrip payable to bearer and bearing interest, and lend money secured as a first charge on landed property and repayable at fixed periods. The National Savings Bank of Chile (Caja Nacional de Ahorros) at the end of 1914 had in operation 120 establishments throughout the country. The number of deposit accounts on December 31, 1914, was 396,488 (359,622 on December 31, 1913) and the deposits amounted to 62,327,057 pesos paper (57,032,670 pesos on December 31, 1913).

The currency is mostly paper; the time fixed for the conversion of legal tender paper money has been deferred till January 1, 1919. Under the law which came into force on September 12, 1907, the President in 1907 issued 30,000,000 pesos in legal tender paper money. In 1915, 22,429 gold coins of the value of 448,580 dollars gold pesos were struck, and 9,901,075 silver coins of the value of 6,306,047 dollars currency.

### Money, Weights, and Measures.

According to the Act of 1895, the coinage of Chile is as follows:—Gold coins are 20, 10, 5 peso pieces, called respectively *Condor*, *Doblon*, and *Escudo*. The 10-peso gold piece weighs 5.99103 grammes .916 fine and therefore contains 5.49178 grammes of fine gold. Silver coins are the *peso*, weighing 9 grammes, 0.720 fine, and the fifth, tenth, and twentieth of a peso. Bronze coins (95 of copper to 5 of nickel) are the *centavo* and 2½-, 2-, and ½-centavo pieces. The monetary unit is the twentieth part of a condor or the (uncoined) gold peso, of the value of 1s. 6d. Its use is obligatory in transactions with the Customs Department of the Government; it serves, too, as the basis of perhaps the larger half of the trade in imported merchandise, though the actual gold coin is not in these cases usually tendered. A forced paper currency is in general use, the paper peso varying considerably in relative value, and representing (1916) about 9½. The English sovereign has a legal value of 13½ pesos.

The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent.

### Diplomatic and Consular Representatives.

#### 1. OF CHILE IN GREAT BRITAIN.

*Envoy and Minister.*—Agustin Edwards (February 21, 1911).

*First Secretaries.*—Emilio Edwards and Manuel Salinas.

*Second Secretaries.*—Ricardo Pepper and Raul Cousiño.

*Financial Attachés*.—Luis Waddington and Augusto Villanueva.

*Naval Attaché*.—Lieut.-Commander Luis Barrie.

*Attachés*.—Julio Bittencourt, Horacio Sandford, and Santiago Monk.

*Consul in London*.—Vicente Echeverría Larraín.

There are Consular representatives at Belfast, Cardiff, Dublin, Edinburgh, Glasgow, Hull, Liverpool (C.G.), Nottingham, Queenstown, Sheffield, Southampton and many other places.

## 2. OF GREAT BRITAIN IN CHILE.

*Envoy and Minister*.—Sir F. W. Stronge, K.C.M.G.

*Naval Attaché*.—Commander E. Speranza, R.N.

*British Consul-General* at Valparaíso.—A. Maclean, C.M.G.

There are Consular representatives at Coquimbo (C.), Antofagasta (C.), Arica (V.C.), Caldera, Coronel, Iquique (C.), Lota, Junín (V.C.), Pisagua (V.C.) Punta Arenas (V.C.), Talcahuano (V.C.), Tocopilla. Tomé.

## CHINA.

(CHUNG-HUA MIN-KUO.)

### Government.

On February 12, 1912, China, the oldest of Monarchies, became a Republic.

The Chinese Imperial family was of Manchu origin, dating from 1644, and was styled *Ta Ch'ing Ch'ao* ('Great Pure Dynasty'). The last Emperor, P'u-yi, was the tenth of the line; but the official genealogy is carried back six generations earlier than the real founder, and P'u-yi's will be the sixteenth name in the canonized series of *Ta Ch'ing* Emperors. He was born on February 11, 1906, succeeded his uncle the Emperor Kuang-Hsü on November 14, 1908, and abdicated on February 12, 1912. He retains the title of Manchu Emperor, but with his death the title will cease. For account of the Revolution of 1911, see STATESMAN'S YEAR-BOOK for 1912, pp. 699-701.

The Government is composed of a President, a Vice-President, and a bi-cameral legislature consisting of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members.

The settlement at the close of the Revolution, which united the Northern and Southern Provinces into the Republic of China, included among its terms the permanent union of North and South, the abdication of the Emperor, the election of Yuan-Shih-k'ai as President, and the acceptance of a Provisional Constitution as fixed by the revolutionary government of Nanking. Under this Constitution a Provisional Parliament was assembled in Peking, and in due time passed fundamental laws for the election of a bi-cameral legislature, at the same time determining its powers and functions. This Parliament met on April 8, 1913, and appointed a Committee to draft a Permanent Constitution for the Republic. The Committee sat from July 21 to October 25, and completed a draft of the Constitution consisting of 113 Articles. Of these only the Articles dealing with the election and term of office of President and Vice-President were passed by Parliament and became law. By virtue of these Articles, Yuan Shih-k'ai was elected President on October 6 for the term of five years, being eligible for re-election for one further period of five years.

The rebellion along the Yangtse River, the complicity therein of many of the Radical Members of Parliament who were members of the Nationalist Party (*Kuo Min Tang*), and the impossibility of effecting a compromise between the President and Parliament as to the relations between the Executive and the Legislature, provided the opportunity for the President to dissolve the *Kuo Min Tang*, and expel its members from Parliament, thus leaving the Legislature unable to function from lack of a quorum. This was followed by a Presidential Mandate on January 11, 1914, dissolving, or rather suspending Parliament.

In the meantime there had been formed the Political Council to act as an advisory council for the President, and to draft important legislative enactments, thus in a measure taking the place of the lapsed Parliament. The members of this Council were appointed by the President. It was dissolved in the early summer of 1914, having completed its work. The Political Council created a Constitutional Council, with the function of preparing legislative measures of a Constitutional character, and this Constitutional Council drew up a new Constitution, which was promulgated by the President on May 1, 1914, revoking and taking the place of the Provisional Constitution made at Nanking.

The Constitutional Council also drafted regulations for a Council of State (*Tsan Ch'eng-yuan*), which was authorised by a Presidential Mandate on May 24, 1914. Its members, who numbered from 50 to 70, were appointed by the President. In the summer of 1915, with the approval of the President, there was called into existence a body known as the *Ch'ou An hui* (Peace-planning Society), the real object of which was the restoration of a Constitutional Monarchy with the then President (Yuan Shih-k'ai) as first Emperor of a new dynasty. Active propaganda was started throughout the country. When the movement promised success a Citizens' Convention numbering 1,993 representatives was convened by the Council of State with a view of determining whether China should remain a Republic or become a Monarchy. Carefully selected in obedience to the wishes of the President, the citizens of this Convention, voting not in one body gathered in Peking, but separately each in his own province, voted unanimously in favour of the restoration of the Monarchy, with Yuan Shih-k'ai as the first Emperor of a new dynasty.

On December 11, 1915, the State Council were able to announce to the President that it was the unanimous wish of the citizens of China that the form of government should be changed, and that the President should be elevated to the Throne. The President in due course accepted the responsibility and became Emperor-elect. Within a few days the storm broke. On December 23, 1915, Yunnan province revolted, and other Southern provinces followed. The movement grew in strength. An attempt was made to restore peace, first by the postponement, later by the abandonment, of the restoration of the Monarchy. All overtures of Yuan Shih-k'ai to meet the views of the revolutionaries were rejected. They claimed that the President had violated his Presidential oath, that he had been guilty of high treason, that having ceased to be President he could not re-elect himself as President, and that the *de jure* President was Li Yuan-hung, the Vice-President. Continued strife was prevented by the opportune death of Yuan Shih-k'ai early in the morning of June 6, 1916.

Li Yuan-hung in accordance with the Constitution became President; the Provisional Constitution of Nanking of March 10, 1912, was restored; Parliament, which had been suspended by the action of Yuan Shih-k'ai in depriving it of the necessary quorum, was revived, and formally opened on August 1, and has since been engaged in revising the draft of the Permanent Constitution of China which had been prepared during 1913 for its consideration by a Committee of Parliament before Parliament was suspended. As it exists at present the draft of this Permanent Constitution consists of 113 articles. No article can become law until it has received the assent of a three-fourths majority in a combined sitting of not less than two-thirds of the members of both Houses of Parliament.

*President of the Republic.*—Li Yuan-hung (Hupei). Born October 19, 1863. President June 6, 1916. Term of office expires October 6, 1918. Resides at Peking.

*Vice-President.*—Fêng Kuo-chang (Chihli). Born January 7, 1858. Elected October 30, 1916. Holds military command over three provinces. Resides at Nanking.

Executive authority is provisionally vested in a Premier nominated by the President and a Cabinet of nine Ministers nominated by the Premier. All appointments require the sanction of both Houses of Parliament.

*Premier.*—Tuan Chi-jui (Anhui).

*Minister of Foreign Affairs.*—Wu Ting-fang (Canton).

*Minister of Finance.*—Li Ching-Shi.

*Minister of Navy.*—Ch'êng Pi-Kuang (Canton).

*Minister of War.*—Tuan Chi-jui (Anhui).

*Minister of Agriculture and Commerce.*—Ku Chung-hsiu (Chihli).

*Minister of Justice.*—Chang Yüeh-tsêng (Yunnan).

*Minister of Education.*—Fau Yuan-lien (Hunan).

*Minister of Home.*—Fau Yuan-lien (acting).

On August 1, 1912, Dr. G. E. Morrison was appointed Political Adviser to the President of the Republic. Other Foreign Advisers have since been appointed. There are also many foreigners in the government employ in the various departments. According to the latest information the total is 3,948 persons, whose nationalities are as follows:—British, 1,105; French, 1,603; German, 533; Russian, 463; American, 174; Japanese, 207; Italian, 75; Austrian, 59; Belgian, 171; others, 158.

The Republic has adopted a new flag on which the old yellow dragon has been replaced by five stripes—crimson, yellow, white, blue and black—to denote the five races comprised in the Chinese people, Mongol, Chinese, Manchu, Turki (Mohammedan natives of Chinese Turkestan), and Tibetan.

#### LOCAL GOVERNMENT.

Under the monarchy each of the 22 provinces was ruled by a Viceroy placed over one, two, or three provinces, or by a Governor over a single province, either under a Viceroy or depending directly on the central government. There were thus 9 Viceroys and 3 Governors equal in rank to Viceroys. Each Viceroy or Governor was assisted by various other high officials, such as the Treasurer, the Judicial Commissioner, and the Commissioner of Education. In August, 1910, in addition, a Commissioner for Foreign Affairs was appointed to each of the more important provinces, to rank immediately after the Treasurer—a step which marked the growing importance of foreign relations in Chinese eyes. Each province was subdivided into prefectures ruled by prefects, and each prefecture into districts, each with a district magistrate. Two or more prefectures were united into a tao, or circuit, the official at the head of which being called a Taotai. Each town and village had also its unofficial governing body of 'gentry.' An Edict of July 22, 1908, instituted Provincial Assemblies, and the first meetings were held on October 14, 1909. The reforms of the late dynasty also instituted representative legislative assemblies in districts, towns and villages.

At the beginning of the Republic many of the Provinces under the rule of their Military Governors or *Tutuhs*, who in nearly every instance was a native of the province, were fast slipping from the control of the Central Government. Time, and the collapse of the rebellion in 1913, has enabled Peking to regain and strengthen its authority. The President, on May 23, 1913, issued mandates fixing and promulgating the official systems of Province, Circuit, and District. In each Province there is a supreme Civil Governor appointed by the President, and controlling both the civil officials of the whole Province, as well as the police and militia. He is assisted by his Chief of the Administrative Department, which is divided into sections—General, Interior, Education, and Industry—each presided over by a subordinate official. A similar arrangement is carried down through the Circuit (*Tao*), and District (*Hsien*). The Intendant of the Circuit (*Tao-Yin*) is the chief administrative official of the Circuit and under the control of the Governor, and the Magistrate of the District is the District administrative chief under the control of the Intendant. Thus the whole provincial and local administration is brought under control, and is responsible directly or

indirectly to the Central Government. The former *Tutuhs* have no civil powers, and have been appointed to the military command (*Chiang-chun*) of various military districts, under the direct control of the Central Government.

The Provincial Assemblies which were suspended early in 1914 have been re-established.

### Area and Population.

The following table gives a statement of the area and population of the Chinese Republic according to figures published in the Government Gazette, February 27, 1911. In 1912, Mr. Rockhill, formerly American Minister at Peking—a recognised authority—after careful inquiry, came to the conclusion that “this document, though showing complete ignorance of the methods now nearly universally followed in vital statistical reports, throws considerable light on the question of China’s population, and seems entitled to more confidence than the enumerations which have heretofore appeared.” He believed that the population of China, Manchuria and Chinese Turkestan, i.e., the Chinese Republic exclusive of Tibet and Mongolia, appeared to be in round numbers 325,000,000, new information having confirmed the opinion reached by him in former studies of the same subject that the population of China “is much smaller than we have been led to believe, and that in the last century it has been increasing very slowly if at all.”

The 18 Provinces of China Proper	Area: English square miles	Population (Estimated)	Capital (Seat of Tutuh)
Chihli . . . . .	115,800	22,970,000	Tientsin
Shantung . . . . .	55,970	25,810,000	Chi-nan
Shansi . . . . .	81,830	9,420,000	T'ai-yuan
Honan . . . . .	67,940	22,375,000	K'ai-feng
Kiangsu . . . . .	38,600	13,380,000	Nanking
Anhui . . . . .	51,810	14,075,000	Anch'ing
Kiangsi . . . . .	69,480	16,255,000	Nanch'ang
Chéukiang . . . . .	36,670	13,950,000	Hangchow
Fukien . . . . .	46,320	8,560,000	Foochow
Hupei . . . . .	71,410	21,260,000	Wuchang
Hunan . . . . .	83,380	20,580,000	Ch'angsha
Shensi . . . . .	75,270	6,725,000	Hsian
Kansu . . . . .	125,450	3,810,000	Lanchow
Szechwan . . . . .	218,480	51,500,000	Ch'engtu
Kwangtung . . . . .	99,970	23,700,000	Canton
Kwangsi . . . . .	77,200	5,425,000	Kuei-lin
Kweichow . . . . .	67,160	9,265,000	Kuei-yang
Yunnan . . . . .	146,680	8,053,000	Yunnan
Total . . . . .	1,532,420	302,110,000	
<i>New Dominion:—</i>

<sup>1</sup> The seat of the Bogdo Khan.

<sup>2</sup> The seat of the Dalai Lama.

The Island of Formosa was ceded to Japan in accordance with the terms of the Treaty of Shimonoseki ratified and exchanged at Chefoo on the 8th of May, 1895. The formal transfer of the Island was effected on the 2nd of June, 1895.

In November, 1897, the Germans seized the Port of Kiao-Chao, on the east coast of Shantung, and in March, 1898, obtained from the Chinese a 99 years' lease of the town, harbour, and district together with preferential rights of railway construction in the Province and exclusive rights of mining along the course of certain specified railways. On August 16, 1914, Japan with the approval of Great Britain called upon Germany "to deliver to the Japanese authorities without condition or compensation the entire leased territory of Kiao-Chao with a view to its eventual restoration to China." Compliance with this advice was required within one week. No answer having been given the leased territory was invaded by Japanese and British forces, and after feeble resistance capitulated on November 7, 1914. The Japanese assumed possession of all administrative authority previously exercised by the Germans in the fortified area in civil offices, on the railway to Ch'ianfu, the capital, and in mining affairs. They will retain possession until the future status of the port is finally determined at the end of the present war.

By agreement with the Chinese Government, dated March 27, 1898, Russia took possession of Port Arthur and Talienwan and their adjacent territories and waters, on lease for the term of 25 years, with option of extension by mutual agreement. In 1900, in consequence of the 'Boxer' uprising, Russia occupied Manchuria. Japan, after long and unsuccessful efforts to induce Russia to withdraw, broke off diplomatic relations, and on February 8, 1904, commenced hostilities. The war, in the course of which Japan proved victorious both on land and at sea, was brought to an end by the Treaty of Portsmouth signed September 5, 1905. Under this Treaty Russia and Japan agreed to evacuate Manchuria, except the territory affected by the lease of Kwantung (or the Liao-tung Peninsula), where Japan succeeds to the leasehold and other rights of Russia. The exclusive administration of Manchuria (with the exception mentioned) was to be restored to China. By treaty of December 22, 1905, China agreed to the transfer to Japan from Russia of the lease of the Liao-tung Peninsula and the control of the railway from Port Arthur to Chang-chun (Kwan-ch'êngtzu), and conceded to Japan the right to construct a railway from Antung to Mukden, and agreed to open 16 Manchurian ports and cities to foreign commerce. On January 18, 1915, the Japanese unexpectedly submitted to China a series of 21 demands of a comprehensive nature relating to Shantung province, the Yangtse Valley, Fuhkien province, South Manchuria, and Eastern Inner Mongolia. The demands were in five sections, the fifth section, containing the most far-reaching provisions, being withheld from the allied Powers. Negotiations followed, and after the delivery of an ultimatum on May 7 Japan obtained from China assent to four sections of her demands, the clauses under section 5 being postponed for future negotiation. The main conditions of this Agreement, which was signed at Peking May 25, 1915, are (1) the Chinese Government undertakes to give full assent to all matters hereafter agreed upon between Japan and Germany relating to the disposition of German rights and interests in the province of Shantung, (2) the Japanese Government, after the termination of the present war, will restore to China the leased territory of Kiaochoa, (3) the lease of Port Arthur and the term of the South Manchuria Railway are extended for 99 years, and (4) Japanese subjects are free to reside, travel, and engage in business in South Manchuria subject to the police laws and ordinances and taxation of

China, and to prospect and work mines there ; they shall be given preference in regard to railways and finance in South Manchuria and in Eastern Inner Mongolia. Japanese are also given preference in South Manchuria in the employment of foreign advisers or instructors, political, financial, military, or police.

In July, 1910, a convention was signed between Russia and Japan agreeing to co-operate to maintain the 'status quo' in Manchuria in accordance with the treaties and conventions already made. For such period as Russia should hold Port Arthur, Great Britain was, by agreement with China, April 2, 1898, to hold Wei-Hai-Wei in the province of Shantung. For defensive purposes Great Britain on June 9, 1898, obtained a 99 years' lease of territory on the mainland opposite the island of Hong Kong.

The Chinese Government granted to the French in April, 1898, a 99 years lease of the Bay of Kuang-Chau-Wan, on the coast of the peninsula, between Hong Kong and the Island of Hainan, and in November, 1899, the possession of the two islands commanding the entrance of the bay. This territory has been placed under the authority of the Governor-General of French Indo-China.

Peking, the capital of China, according to a census undertaken by the Minister of the Interior (1912) has an estimated population of 692,500.

According to the estimate of the Customs authorities, in 1915 the total number of foreigners resident in China was 163,827, made up as follows :—

Japanese . . .	101,589	American . . .	4,716	Portuguese . . .	3,300
Russian . . .	56,230	French . . .	1,649	Other nationalities	2,539
British . . .	8,641	German . . .	3,740		
					Total . . . 182,404

## Religion.

Three religions are acknowledged by the Chinese as indigenous and adopted, viz. Confucianism, Buddhism, and Taoism.

Under the monarchy the Emperor was considered the sole high priest of the Empire, and could alone, with his immediate representatives and ministers, perform the great religious ceremonies. No ecclesiastical hierarchy is maintained at the public expense, nor any priesthood attached to the Confucian religion. A proposal to make Confucianism the State religion of China was negatived by the Constitutional Committee who, however, agreed that Confucianism shall be the basis of the Ethical teaching in National Education.

With the exception of the practice of ancestral worship, which is everywhere observed throughout the Empire, and was fully commended by Confucius, Confucianism has little outward ceremonial. The study and contemplation and attempted performance of the moral precepts of the ancients constitute the duties of a Confucianist.

Buddhism and Taoism present a very gorgeous and elaborate ritual in China, Taoism — originally a pure philosophy—having abjectly copied Buddhist ceremonial on the arrival of Buddhism 1,800 years ago. Probably all Chinese (not Mahometans or Christians) profess and practise all three religions. The bulk of the people, however, are Buddhist.

Mohammedans are found in every province of China, being most numerous in Kansu, Hsin Chiang, Chihli, and Yunnan. From evidence collected in 1909 Mr. M. Broomhall estimated that the Moslem population of China numbers between 5,000,000 and 10,000,000.

Roman Catholicism has had a footing in China for more than three centuries. At the end of 1916 it numbered 50 Bishops (China proper 42,

Manchuria 3, Mongolia 4, Tibet 1), 1,437 European priests, 828 Chinese priests, and 1,790,220 native Christians.

Protestant Missions date from 1807. In 1915 they were served by a foreign force numbering 5,338, including 383 physicians, 1,092 ordained ministers, 142 nurses. Native Christians numbered 526,108. Attached to Protestant Missions in 1915 were 24 colleges of university standing, 120 normal and training schools, 29 theological schools, 216 middle schools, 464 higher elementary schools, 4,748 lower elementary schools. Under Christian instruction were 169,797 pupils. Foreign Protestant Medical Missionaries at 330 hospitals and 223 dispensaries attended during the year 104,418 in-patients and 1,535,834 out-patients.

The Russian Orthodox Mission dates from 1685, when the Chinese conquered Albazin fortress on the river Amur, taking 45 Russians prisoners and bringing them to Peking. One was a priest, Father Maximus Leontieff. Until 1860 the members of the Mission acted as the official representatives of the Russian Government. At the end of 1915 the Mission, which is under a Bishop resident in Peking, consisted of a monastery, a hermitage, a nunnery, 5 convents, and 32 churches, and numbered 5,587 baptised Chinese adherents.

Most of the aboriginal hill-tribes are still nature-worshippers, and ethnically are distinct from the prevailing Mongoloid population. There is also a poverty stricken group of a few families of Chinese Jews in K'aifeng, capital of Honan.

### Instruction.

For many centuries education of a purely Chinese type was general, and led through an intricate system of public examinations to all classes of employment under the State. Being confined in its scope to the study of Chinese classical literature, this form of education was gradually undermined by the influence of increasing intercourse with other countries, until it was completely swept away by a Decree of September 3, 1905, abolishing the historic system of examinations.

Since that date an enormous impetus has been given to the new educational movement, schools for the teaching of 'western learning' springing up in every town throughout large portions of the Empire.

The education policy of the government divides the education of the country into secondary and primary, the former being directly under the central government, the latter under the provincial. Universities with their preparatory colleges, technical colleges, and higher normal schools come directly under the Board of Education of the Central Government; middle schools, lower normal schools, and primary schools, while conforming to the general plan of the Central Government are managed and financed by the provincial governments. There are to be four universities, one each in the north, centre, west and south with a preparatory college attached; capital cities of provinces will have technical colleges in law, industry, and medicine, and higher normal schools. Each district city will have its middle school and lower normal school, while primary schools will be established throughout the country. Primary education is to be compulsory. Under the new plan there are already 34 technical colleges (law, industry, &c.) operating in various capital cities, and 6 higher normal schools have been established. In Peking there is a Higher Normal School for girls. Financial stringency has hitherto delayed the carrying out of the plan of primary education.

The Peking Government University was established in 1909. There are courses in Chinese literature, law, political science and economics, pure

science and mathematics, civil and mining engineering and agriculture. There is also a preparatory department. The combined institution has 1,500 students and a staff of ninety professors and teachers. Foreign professors and western educated Chinese are employed in this institution and its preparatory department. There is a tendency to displace foreign teachers by Chinese educated in Europe, America, and Japan.

By the energy of a British medical missionary, an important medical school was founded in Peking in 1906, for the training of Chinese medical students. The expenses of the foundation were met by public subscription among Chinese and foreigners. The Government has undertaken to recognise the diplomas to be issued by this school of medicine, which is known as the Union Medical College, and has given an annual grant towards its expenses. This grant ceased in 1915 when the work of the College was taken over by the China Medical Board of the Rockefeller foundation which had been established in November, 1914, 'to undertake a systematic work for the improvement of medical conditions in China.' Large grants have been made by the Rockefeller foundation to the Shantung Christian University at Tsinanfu, to the Hunan-Yale Medical College at Changsha, and to the Harvard Medical School of China at Shanghai. Co-operating in every way with the Missionary Societies the foundation is designed to render far-reaching service to the extension of western medical science in China. At Tientsin there are a Chinese University and preparatory department with 12 foreign and 7 Chinese professors, an Anglo-Chinese College, an industrial school under Japanese tuition, general medical colleges, and various private and mission schools.

There are numerous Protestant and Catholic mission schools and colleges at Shanghai and other ports, where the English and French languages and lower branches of western science are taught. It is estimated that altogether some 58,600 educational institutions of all grades (military and naval schools included), are to be found in China, with an aggregate enrolment of 1,600,000 students. Well-organised movements directed towards the union of Protestant Missions for combined medical and educational work and the prevention of over-lapping have been successful in several of the chief centres of missionary activity.

The engagement of America to return to China the surplus of her indemnity of 1900, amounting to 1,756,900*l.*, produced an undertaking from China to spend this amount in preparing and sending students to the United States there to receive their education. More than three hundred students, including a few women, have already been sent. A modern university for Chinese with British professors has been successfully established in Hongkong, and attracts students from many parts of China. In Japan, at the end of 1916, 121 Chinese were attending the Imperial University, 544 at other Government Institutions, while those at private schools numbered several thousand.

Translations of foreign standard works are gradually reaching the most distant parts of the Empire, with the effect that the desire for western knowledge becomes year by year more evident among the people. The Chinese Government has of late years established schools with and without foreign instructors in connection with the different arsenals and military establishments, and steps are being taken for the gradual re-organisation of military instruction which will be strongly centralised. A noteworthy feature has been the establishment of the National Medical Association of China, a purely Chinese Organisation of nearly one hundred Chinese physicians educated in western science and pledged to 'expedite the spread of modern

medical science in China, and to arouse interest in public health and preventive medicine among the people.'

Fifty Chinese newspapers are published in Shanghai, more than 60 in Peking and Tientsin, while every capital city in the interior has several daily journals. The influence wielded by the Press is growing daily. Altogether there are over 300 daily, weekly, or monthly journals in China. Foreign residents in China are served by a number of excellent papers in English, published in Peking, Tientsin, Shanghai and Hankow. Two German papers with a meagre circulation are published. There are three French daily papers. Peking has three English daily papers and one French.

### Justice.

Under the old system justice was badly administered. Extraction of confession by torture, bribery, and extortion, were essential features of judicial administration. All Treaty Powers therefore claimed the right of extra-territorial jurisdiction over their own nationals in China. All Treaty Powers still retain this right, and will only relinquish it "when they are satisfied that the state of the Chinese laws, their method of administration, and other considerations warrant them in so doing."

The new *régime* has introduced changes in the judicial system, and there has been considerable improvement in the administration of justice. The provisional Criminal Code has been increasingly enforced since 1912 with satisfactory results. It requires to be passed by Parliament before it shall be formally put into force. Meanwhile a Commission for the Codification of the Civil Code has been appointed. For the present four kinds of courts are established: (1) The High Court of Justice (*Ta Li Yuan*) which is the Supreme Court of Appeal. It is divided into Civil and Criminal Courts, a bench consisting of five Judges. (2) Provincial High Courts (*Kao Teng Shen Pan Ting*) in each of the provincial capitals. These decide important civil and military cases and hear appeals from District Courts. (3) District Courts. These deal with ordinary cases, civil and criminal, and hear appeals from the Courts of First Instance, and (4) Courts of First Instance, one in each *hsien*, a single magistrate sitting.

Great Britain and the United States have special courts in China, the one, His Majesty's Supreme Court for China at Shanghai (established 1865), and the other, the United States Court for China (established 1906).

The first trial by jury in the annals of China took place on March 23, 1912.

### Finance.

The budget for the year ending June 30, 1917, was as follows:—

Revenue		Taels	Expenditure		Taels
Land Tax . . . .		90,115,784	Ministry of Foreign Affairs . .		4,446,548
Customs . . . .		73,056,663	„ Interior . . . .		42,570,109
Salt Tax . . . .		96,767,010	„ Finance . . . .		61,792,970
Tax on Merchandise . .		42,719,194	„ War . . . .		156,606,047
			„ Navy . . . .		7,304,135
			„ Justice . . . .		9,337,156
			„ Education . . . .		4,433,898
			„ Agriculture and Commerce . .		2,784,790
			„ Communications . .		1,533,606
			Mongolian and Tibetan Affairs . .		1,044,216
Total ordinary (including miscellaneous Taxes) . .		388,009,660	Total ordinary . . . .		291,803,470
Total extraordinary . .		84,828,024	Total extraordinary . .		181,085,114
Grand total . . . .		472,838,584	Grand total . . . .		472,888,584

The collection of the revenue on the Chinese foreign trade and the administration of the lights on the coast of China are under the management of the Chinese Maritime Customs, an institution, founded by Sir Robert Hart, which has a large staff of Foreign and Chinese subordinates, the various nationalities of the Foreign employees bearing approximate relation in number to the amount of trade of their respective countries. By agreement, dated February 13, 1898, China undertook that the post of Inspector-General must be held by a British subject so long as British Foreign Trade predominates. By Decree of May 9, 1906, the customs service, hitherto supervised by the Board of Foreign Affairs, was placed under the control of two Chinese high officials, forming a new department known as the *Shui Wu Ch'u*, or Revenue Council. Since November, 1901, the Native Customs at the Treaty Ports, hypothecated for the service of the Boxer indemnity, have been under the Maritime Customs.

All Customs Revenue is paid into Foreign Banks designated for the purpose by the Bankers' Commission, who allot therefrom the payments for the service of Foreign loans secured on the Customs Revenue and the Boxer Indemnity, which is also secured on the Customs.

The Customs Tariff is five per cent. *ad valorem*, these duties in 1902 being converted into specific duties on the basis of prices ruling in the three years prior to the Boxer outbreak, namely, 1897, 1898, 1899. In October, 1913, China formally gave notice of her desire to revise the tariff according to the prices now ruling and to make the tariff, which at present is somewhat less than four per cent. *ad valorem*, an effective five per cent. as provided by Treaty.

On November 22, 1912, an Audit Bureau was established, charged with auditing the expenditures and revenues of the Central and Provincial Governments. On Jan. 15, 1913, an inspectorate-general was established for the Salt Gabelle. The net salt revenue for 1916 was 72,440,590 dollars (69,277,536 dollars in 1915). Surplus in 1916, 52,226,000 dollars.

The receipts from maritime customs and from opium likin in the last 5 years were (in Haikwan taels):—

Year	Customs	Opium likin	Total	Total	Exchange
	Taels	Taels	Taels	£	Pence
1911	32,615,669	3,564,156	36,179,825	1,871,085	32½
1912	35,526,495	4,424,117	39,950,612	6,006,629	36½
1913	40,150,720	3,819,133	43,969,853	6,641,280	36½
1914	37,313,312	1,598,213	38,917,525	5,410,620	32½
1915	35,808,542	939,164	36,747,706	4,765,719	31½

In 1916, 37,750,000 taels were collected for the Chinese customs.

The foreign debt secured on Imperial revenue outstanding December 31, 1916, amounted to 171,906,000£, of which 157,617,000£ were owing by the Central Government and 14,289,000£ by the Provincial Government. The debt is distributed as follows:—

Debt due to	By Central Government	By Provincial Government	Debt due to	By Central Government	By Provincial Government
	£	£		£	£
United Kingdom	42,454,000	2,338,000	United States	3,907,000	3,738,000
Germany	29,706,000	1,600,000	Belgium	2,907,000	21,000
France	6,784,000	462,000	Other countries	44,315,000	5,788,000
Russia	15,887,000	—			
Japan	11,967,000	342,000	Total	157,617,000	14,289,000

## Defence.

### ARMY.

The task of creating an army on modern lines was inaugurated by Imperial decree in January, 1905, and in October, 1907, an edict was issued ordering the formation of 36 divisions in the various provinces of the Empire by 1912. Recruiting for this new army, which is called the *Lu Chun*, was on a principle of modified conscription. The terms of service were 3 years with the colours, 3 in the first reserve, and 4 in the second reserve, or 10 years in all. On January 1, 1916, a modified form of conscription came into force.

These 36 divisions were to have an establishment of about 10,000 combatants each. In 1909 recruiting was furthermore commenced for a division of Military Guards. At the outbreak of the Revolution in 1911 13 divisions were practically complete and the formation of 19 more had been begun. A division consisted of 2 brigades of infantry, one regiment of cavalry, one regiment of artillery and 9 batteries, 1 Sapper battalion and 1 transport battalion, besides medical and other units, &c. In all the number was nominally about 250,000, actually it was about 180,000. Northern troops have so far shown superiority over the southern troops both in training and armament. No organisation is as yet complete for the second reserve. Besides the *Lu Chun*, provincial militia were still in existence. They were the remains of a force which the *Lu Chun* had superseded, and were being organised to form a civil police under the control of the Provincial Viceroy. They consisted only of mounted troops and infantry and some old fashioned artillery.

Theoretically all military forces are under the control of the Ministry of War and are paid by the Central Government, the authority of the Ministry being delegated in each province to specially appointed Military Commissioners. Provincial Civil Governors have no authority over the military *Lu Chun*, but can call for their services when needed; they have control of the police and of the provincial militia, both of which bodies are paid from the provincial revenues.

Officially it is stated that at the end of 1916 there were under arms under the direct control of the War Office 16 divisions in addition to one division of Guards, numbering in all 204,000 men, and 52 mixed brigades numbering 337,000 men, and under the control of three semi-independent provincial generals, there were 38,000 troops paid by the Central Government. In addition to these there are large bodies of troops in Yunnan and Ssuch'uan over whom the Central Government has somewhat lax control.

### NAVY.

The largest vessel in the Chinese navy is the protected cruiser *Hai Chi*, of 4,300 tons displacement and 24 knots original speed, carrying a main armament of 2 8-in. guns, 10 4.7-in. guns and 5 above-water torpedo tubes. There are also three 3,000-ton cruisers, *Hai Yung*, *Hai Shew*, and *Hai Chen*, each of 19.5 knots speed, carrying main armaments of 3 6-in. and 8 4.1-in. guns, together with 1 submerged and 2 above-water torpedo tubes. All the above vessels were acquired during the years 1897 and 1898. There are, in addition, a number of antiquated cruisers, torpedo boats and three modern 800-ton gun-vessels built in Japan for the Yang-tse. The Chinese dockyard at Kiangnan is building sea-going gunboats similar to those acquired from Japan in 1912-13.

Various naval programmes have been proposed during the past decade, but no important extensions have been effected. Towards the end of the Ching Dynasty a special Naval Commission was appointed having as its

head Prince Tsai H'sun, the then Minister of Navy and brother of the ex-Prince Regent. An extensive tour was undertaken with the object of studying naval conditions abroad, on the termination of which a small programme was drawn up and orders placed for the construction of different types of war vessels. Under this programme the following cruisers, especially adapted for the training of cadets, have been added to the fleet :—The *Ying Swee* and the *Chao Ho*, both built in England, each having a displacement of about 2,600 tons and a contract speed of 20 knots. The main armaments consist of 2 6-in. and 4 4-in. guns. There are, in addition, a number of torpedo-boat destroyers built in Germany, Austria and Italy, 2 light-draught river gun-boats built in Germany, and 2 sea-going gunboats built in Japan.

There are no naval bases of any importance, but the provision of such facilities is contemplated. Existing dockyards are inadequate for the requirements of the present fleet, and their plant is obsolete, but the Kiangnan Dock Co. and the Yang-tse yard at Hankow have building and repairing facilities. The number of the personnel cannot be stated exactly. Practical experience demonstrates that the Chinese bluejacket with training and discipline can rank with any bluejacket in the world.

### Production and Industry.

*Agriculture.*—China is essentially an agricultural country, and the land is all freehold held by families on the payment of an annual tax. The holdings are in general small; the implements used are primitive; irrigation is common. Chinese agriculture is intensive rather than extensive. Rotation of crops is practised. Horticulture is a favourite pursuit, and fruit trees are grown in great variety. Vegetable culture has reached a high state of perfection. Wheat, barley, maize, and millet and other cereals, with pease and beans, are chiefly cultivated in the north, rice, sugar, and indigo in the south. Treaties forbid the export of grain with the exception of the Soya Bean, the chief product of Manchuria, of which in 1915, 614,250 tons were exported as beans and 695,600 tons as beancurd, of a total value of 4,850,000*l*.

Cotton is grown widely even as far north as the southern part of Chihli, the chief area of production being the Yangtse valley. Estimated crop in 1915-16, 600,000,000 pounds.

Under the restrictive measures formulated in the anti-opium decree of September 20, 1906, and repeatedly renewed with greater stringency, the cultivation of the poppy was rapidly restricted throughout China. The anti-opium campaign culminated on May 8, 1911 in the signature of an agreement with the British Government whereby the import of Indian opium into China was to be reduced in the same proportion as the diminution of the cultivation of native opium, the importation and cultivation to cease in 1917.

Tea is cultivated exclusively in the west and south, in Fukien, Hupeh, Hunan, Kiangsi, Chekiang, Anhui, Kwangtung, and Szechuen. The exportation of tea (especially black leaf), owing to the competition of Ceylon and Indian teas, has steadily declined during recent years.

Silk culture is one of the most successful industries of China, about 27 per cent. of the world's supply of raw silk is from China, the most serious rivals being Japan with 28 and Italy with 25 per cent.

*Manufacture.*—An important feature in the development of the Chinese industries is the erection of cotton and wool mills, and of silk.

filatures in Shanghai, Canton and elsewhere. At the end of 1914, 45 mills with 1,250,000 spindles were working in China. At the large centres flour and rice mills are beginning to supersede native methods of treating wheat and rice. At Hanyang, near Hankow, are large Chinese iron-works, supplied with ore from mines at Ta-yeh, about 60 miles distant. These works were able to turn out about 300 steel rails a day, but a large amount of machinery was destroyed during the Revolution, and the works are not yet in proper running order.

*Mining.*—Most of the 18 provinces and the 3 provinces of Manchuria contain coal, and China may be regarded as one of the first coal countries of the world. The coal fields cover an area of 133,513 acres and the total coal output in 1915 was 18,000,000 tons. Iron ores are abundant in the anthracite field of Shansi, where the iron industry is ancient, in Chihli, in Shantung and other provinces, and iron (found in conjunction with coal) is worked in Manchuria. The annual production of iron ore is about 468,638 tons. The Tayeh iron deposits, near Hankow, are among the richest in the world, producing in 1915, 545,819 tons. On the Upper Yangtse and in Shensi province petroleum is being worked. Copper ore is plentiful in Yunnan where the copper-mining industry has long existed. Tin is the most important mineral export. It is mined in Yunnan, and through Mengtsz it reaches Hong Kong, whence it is shipped to foreign countries. The output of tin in 1915 was 7,943 tons. Antimony ore is exported from Hunan, in 1915, 23,172 tons were produced. The annual output is about 28,316 tons. The annual output of gold is 71,582 ounces; of silver, 107,155 ounces; of lead, 13,527 tons; of copper, 10,963 tons. Yunnan Province is one of the richest copper districts in the world.

### Commerce.

Foreign trade of China (exclusive of bullion):—

—	1911	1912	1913	1914	1915
	£	£	£	£	£

Exports . . .	50,704,816	56,542,957	60,915,941	47,116,453	54,321,069

Trade by principal countries in 1915 and 1914 :—

	Imports		Exports	
	1914	1915	1914	1915
	£	£	£	£
United Kingdom . .	14,340,661	10,192,671	3,012,594	5,624,401
Hong Kong . . .	22,754,829	19,250,318	12,764,632	13,500,538
India . . .	5,348,396	5,285,180	926,167	1,030,064
Russia and Siberia . .	2,995,218	2,208,215	5,670,866	7,703,262
France . . .	638,268	736,671	3,124,515	4,181,783
Germany . . .	1,927,541	20,809	1,404,150	10
Italy . . .	106,109	53,714	722,636	1,211,368
United States . . .	5,573,655	4,804,072	5,447,652	7,857,205
Japan . . .	16,493,897	16,430,845	8,675,169	10,807,567

The imports into China from Hong Kong come originally from, and the

exports from China to that colony are further carried on to, Great Britain, Germany, France, America, Australia, India, the Straits, and other countries.

The share of the British Empire in the foreign trade of China in 1914 was 41·96 per cent., Japan coming second with 24·30 per cent., and Germany third with 7·06 per cent.

The chief imports and exports for 2 years were as follows:—

Imports	1914	1915	Exports	1914	1915
	£	£		£	£
Opium . . . . .	5,134,889	3,203,292	Beans and beancake . . . . .	6,823,746	5,136,048
Cotton goods . . . . .	24,510,603	19,862,410	Cotton, raw and waste . . . . .	2,013,136	1,820,978
Woollen goods . . . . .	454,581	224,362	Oils, vegetable . . . . .	1,717,391	2,150,614
Metals . . . . .	3,907,837	2,393,448	Sesamum seed . . . . .	873,855	1,243,455
Rice . . . . .	3,003,446	3,285,805	Silk, raw & manuf'd . . . . .	10,939,727	13,071,161
Cigarettes . . . . .	1,841,721	1,615,858	Cow and buffalo hides . . . . .	1,857,158	2,181,044
Coal . . . . .	1,164,604	1,050,893	Tin . . . . .	1,097,051	1,199,195
Fish . . . . .	1,813,457	1,931,345	Tea . . . . .	5,012,845	7,201,208

Of the tea in 1915, 15,820,933 lbs. were exported to Hong Kong, 22,666,533 lbs. to the United Kingdom, 155,045,600 lbs. to Russia and Siberia, and 18,356,266 lbs. to the United States. The total export of tea to foreign countries has been as follows:—1885, 283,833,466; 1895, 248,757,333; 1905, 182,573,064; 1914, 199,439,700; 1915, 237,647,066 lbs.

In addition to her overseas trade China has an extensive coast and river trade, in which under "Inland Waters Steam Navigation Regulations," steamers under foreign flag are allowed to participate. In 1915 1,417 vessels were registered, of which 233 were foreign, and 1,184 Chinese.

All treaties with China contain provision for most-favoured nation treatment. Dairen is the customs port for all the leased territory and has out-stations at Kinchow, Pulantien, Pitzewo, and Port Arthur. Net Value of Trade at each Port in 1915:—

Imports from China into U.K. . . . .	4,933,015	4,671,608	4,718,854	7,084,852	8,354,787
Exports to China from U.K. . . . .	10,780,012	14,845,269	13,914,437	8,545,505	10,698,727

### Shipping and Navigation.

During 1915, 206,887 vessels of 90,663,005 tons entered and cleared Chinese ports. Of these 3,148 of 804,414 tons, were American; 33,339 of 37,675,657 tons, British; 537 of 561,955 tons, French; 979 of 58,263 tons, German; 20,141 of 23,873,016 tons, Japanese; 4,873 of 1,922,055 tons, Russian; and 141,965 of 24,159,009 tons, Chinese. Of the total tonnage in 1915, 103,963 were steamers with a tonnage of 84,641,227, and 102,924 were sailing vessels with a tonnage of 6,021,778.

The nationality of the vessels (direct foreign trade) was mainly as follows:—

Nationality 1915	Entrances		Clearances	
	No.	Tons	No.	Tons
British . . . . .	4,791	4,241,367	4,834	4,839,378
American . . . . .	307	198,208	311	205,570
French . . . . .	191	234,810	190	234,239

Portuguese . . . . .	392	96,183	392	75,888
Russian . . . . .	763	413,572	772	435,117
Chinese . . . . .	28,279	2,613,947	26,236	2,561,760
Total (all Nationalities)	37,599	12,028,320	35,617	12,100,590

### Internal Communications.

China is traversed in all directions by numerous roads, and, though few are paved or metalled, and all are badly kept, a vast internal trade is carried on partly over them, but chiefly by means of numerous canals and navigable rivers. In February, 1898, the Chinese Government agreed that all internal waterways should be open both to foreign and native steamers "under Regulations to be subsequently drawn up," which regulations materially restricted the advantages sought for.

Chinese railway history began in 1876 when the Woosung line, built by foreign enterprise, was opened. In 1911 an Edict was issued commanding that all trunk lines of railway should revert to Government and that provincial control should cease. At the beginning of 1914 there were 5,960 miles of railway open to traffic in China (including about 1,800 miles in Manchuria), of which about 1,300 miles have been constructed by British enterprise and British capital. There are 2,273 miles under construction. The receipts from all the railways for the year ending June 30, 1915, amounted to 50,933,059 taels; the expenditure, 36,566,916 taels.

China has a fairly well developed telegraph service. Telegraphs connect all the principal cities of the Empire, and there are lines to all the neighbouring countries. The telegraph lines (end of 1914) have a length of 36,339 miles, with 49,963 miles of wire; there are 561 offices. The administration is now completely under government control. Five foreigners (Danes) are employed in the Telegraphs. There is also a Danish Telegraph Adviser in the Ministry of Communications and a Danish Expert in Wireless Telegraphy. Wireless Telegraph Stations have been installed at Kalgan, Peking, Hankow, Nanking, and Shanghai and Canton. Since 1912 uniform telegraph charges have been introduced, but the rates are higher than in any other country in the world.

The postal work of China, formerly carried on by the Government Courier

service and the native posting agencies, was gradually taken in hand by the Chinese Imperial Post Office, begun in 1897 under the management of the Maritime Customs. By Edict of November 6, 1906, the control of the Postal Service was transferred to the Ministry of Communications, and the transfer was actually effected in July, 1911. The work of the Post Office extends over the 18 Provinces of China proper, the New Dominion and Manchuria, which have been divided into postal districts, or sub-districts. The Postal Service with Tibet has been suspended. In 1915 there were 8,511 post offices open, and the number of postal articles handled was 773,183,122. China has postal conventions with India, France, Japan, Germany, Hongkong, Natal, and Russia, and in 1914 joined the postal union.

### Money and Credit.

There are four varieties of banking institutions in China. The first are the large foreign banks in the open ports, some of which are among the most powerful banking institutions in the world. The second are the national banks established directly or indirectly by the Chinese Government for its own fiscal purposes and serving as an adjunct in some ways to the Chinese treasury on the one hand and foreign banking and financial interests on the other, the chief of such institutions now being the Bank of China, which was established by presidential mandate in 1913. Besides these there are two further classes of banks, one embracing the larger institutions, which do a proper banking business, i.e., deal in loans and discounts and handle exchange as a more or less secondary matter; and the smaller native banks doing some business in loans and dealing in dollars, silver and subsidiary coins, and buying and selling exchange in small amounts on interior points.

The Bank of China has an authorised capital of 60,000,000 dollars and a paid-up capital of 10,000,000 dollars partly subscribed by the Chinese Government, and partly by the merchant classes. In Peking there are two departments—the head offices for the whole of China and the Peking branch; in all, there are about 200 branches and sub-branches. The Bank of Communications has an authorised capital of 10,000,000 taels, about half of which is paid-up. It acts as the agent for the Ministry of Communications in the collection of railway, telegraph, and postal funds. This Bank has in all about 80 branches and sub-branches. The head office is in Peking. It was created a National Bank in 1915. In 1916 the Min-Kuo Industrial Bank was established with a capital of 20,000,000 dollars.

A Government savings bank was opened on October 23, 1914.

### Money, Weights, and Measures.

#### MONEY.

The sole official coinage and the monetary unit of China has been hitherto the copper cash, of which about 1,220 = 1 haikwan tael, and about 35 = 1 penny. A coin recently issued in great numbers by the provincial mints is the 'hundredth of a dollar.' This coin, of which the issue to the end of 1906 is computed to have been 12,500,000,000, has been readily accepted, but latterly at rates corresponding closely to the intrinsic value of the metal in it. The face value of the coin is about  $\frac{1}{100}$ d.; the intrinsic worth about  $\frac{1}{100}$ d. The use of silver bullion, or sycee, as the medium of exchange, is not now much less common, but the circulation of the dollar is certainly extending. The haikwan (or customs) tael was equal in value in 1912 to 36½d.

The dollar (of the same weight and touch as the Mexican dollar) is now current in all the provinces, even in out-of-the-way districts. Notes for cash are also much in vogue. But there is unparalleled currency confusion. It

is recognised by the Chinese Government that currency reform is the most pressing need of the country.

In the treaty of September 5, 1902, China agreed with Great Britain to take the necessary steps to provide a uniform national coinage which should be legal tender for all purposes throughout the Empire, and an Imperial Decree was issued in October 1908, commanding the introduction of a uniform tael currency, of which the unit must be a silver tael coin of .98 touch weighing 1 K'up'ing or Treasury-scale tael or ounce. This decree was cancelled by a further decree of May 25, 1910, establishing the silver dollar (yuan) of .90 touch and weighing .72 Treasury-weight tael as the unit of currency. The touch and weight of the silver subsidiary coins (50c., 20c., 25c., and 10c.) was also definitely specified, while provision was made for further subsidiary coins (5c. nickel, 2c., 1c.,  $\frac{1}{2}$ c., and  $\frac{1}{10}$ c. copper) of touch and weight to be laid down later. The minting of these silver coins has begun, but very few are as yet in circulation. By the law of May, 1910, the several mints have been brought under the Central Government, and are no longer practically private ventures of provincial governors. All coins are now minted at the Imperial Mint in Tientsin and at branch mints in Hankow, Chengtu and Mukden. The K'up'ing tael weighs 575.642039 grains, somewhat less than the Haikwan tael which weighs 581.47 grains. A decree for uniform weights and measures was issued Oct. 9, 1907, whereby the K'up'ing or Treasury scale was made the standard weight.

10 <i>Fên</i>	.	.	= 1 <i>Chien</i> (Mace).
10 <i>Chien</i>	.	.	= 1 <i>Liáng</i> (Tael) = $1\frac{1}{4}$ oz. avoirdupois by treaty
16 <i>Liáng</i>	.	.	= 1 <i>Chín</i> (Catty) = $1\frac{1}{3}$ lbs.     "     "
100 <i>Chín</i>	.	.	= 1 <i>Tan</i> (Picul) = $133\frac{1}{3}$ lbs.     "     "

## CAPACITY.

10 <i>Ko</i>	.	.	= 1 <i>Sheng</i> .
10 <i>Sheng</i>	.	.	= 1 <i>Tou</i> (holding from $6\frac{1}{2}$ to 10 <i>Kín</i> of rice and measuring from 1.13 to 1.63 gallon). Commodities even liquids, such as oil, spirits, &c., are commonly bought and sold by weight.

## LENGTH.

10 <i>Fen</i>	.	.	= 1 <i>Ts'un</i> (inch).
10 <i>Ts'un</i>	.	.	= 1 <i>Ch'ih</i> (foot) = 14.1 English inches by treaty.
10 <i>Ch'ih</i>	.	.	= 1 <i>Chang</i> = 2 fathoms
1 <i>Lí</i>	.	.	= approximately one-third of a mile.

In the tariff settled by treaty between Great Britain and China, the *Chih* of  $14\frac{1}{2}$  English inches has been adopted as the legal standard. The standards of weight and length vary all over the Empire, the *Chih*, for example, ranging from 9 to 16 English inches, and the *Chang* (= 10 *Chih*) in proportion; but at the treaty ports the use of the foreign treaty standard of *Chih* and *Chang* is becoming common.

## Diplomatic Representatives.

### 1. OF CHINA IN GREAT BRITAIN.

*Envoy and Minister.*—Sao-Ke Alfred Sze. Appointed June 19th, 1914.

*Councillor of Legation.*—Sir John M'Leavy Brown, C.M.G.

*First Secretary.*—Tsung-Yee Lo.

*Second Secretary and Acting Consul-General.*—Yun-Siang Tsao.

*Third Secretaries.*—Mao Yu Cheng and Yatson Chichung Yen.

*Attachés.*—Hsiaoehang Sze-Ping and Tsin Tsung Chang.

### 2. OF GREAT BRITAIN IN CHINA.

*Envoy and Minister.*—The Rt. Hon. Sir John Jordan, G.C.I.E., K.C.B., K.C.M.G. Appointed October 26, 1906.

*Counsellor of Legation.*—Beilby F. Alston, C.B.

*First Secretary.*—Miles W. Lampson, M.V.O.

*Second Secretary.*—R. H. Hoare.

*Naval Attaché.*—Commander Hutton, R.N.

*Chinese Secretary.*—S. Barton, C.M.G.

*Commercial Attaché.*—William P. Ker, C.M.G.

*Judge.*—Sir H. W. de Saumarez (at Shanghai).

There are British Consular representatives at Peking, Amoy, Canton (C.G.), Changsha, Chefoo, Cheng-tu (C.G.), Chinkiang, Chung-king, Foo-chow, Hang-chow, Hankow (C.G.), Harbin, Ichang, Kiukiang, Kiungchow, Mukden (C.G.), Newchwang, Nanking, Pakhoi, Shanghai (C.G.), Swatow, Teng-Yueh, Tien-tsin (C.G.), Wuchow, Wuhu, Yunnan-fu (C.G.).

## Chinese Dependencies and Frontier Provinces.

**Manchuria**, lying between the province of Chihli and the Amur river, and extending from the Hingan mountains eastwards to Korea and the Ussuri river, has an area of about 363,610 square miles and a population probably of about 20,000,000, but variously estimated at from 5,750,000 to 29,400,000. It consists of 3 provinces, Sheng-King or Feng-tien (area, 56,000 sq. miles; pop. 10,312,241), capital Mukden; Kirin (105,000 sq. miles; pop. 6,000,000), capital Kirin; and Heilung-chiang or the Amur province (203,000 sq. miles: pop. 1,500,000) with Tsitsihar (population 30,000) for its capital. The population given above for Fengtien provinces is from an official Chinese statement of November, 1908, which also gives the agricultural population as, 2,520,145, and the cultivated area as 4,333,333 acres, but these figures must be taken with reserve. The chief towns are Mukden, the capital, with about 158,132 inhabitants; Newchwang (50,000) standing about 30 miles up the Liao river, at the mouth of which is the port of Ying-tse (60,000) often called Newchwang. Besides Newchwang, Mukden, An-tung, Tatung-kan, Tichling, (28,492) Tungchiangtzu, (7,299) and Fakumen, (19,432) are open to commerce. Other important towns are Hsin-min-fu (20,000), Liao-yang (40,000), Feng-hwang-cheng (25,000), and Taonanfu, a town rapidly risen to importance, on the border of Eastern Mongolia. In Kirin province is the town of Chang-chun (Kwangchengtze), with 80,000 inhabitants. It is proposed to establish a university in Manchuria.

There is no longer a Manchu population in Manchuria. A few scattered communities alone remain. Within quite recent years Manchuria has been colonised by Chinese from the Northern Provinces of China and the immigration still continues by road and sea. Owing to the development of the Soya Bean industry and the improved railway facilities, Manchuria has grown more rapidly in wealth than any other part of China. Its soil is

one of the richest in the world. As cultivation has extended, the climate has become more equable, and warmth remains longer in the soil. Millet, beans, wheat, and rice are the principal crops.

The Russian lease of Port Arthur and Talién-wan, and the southern extremity of the Liao-tung peninsula and the South Manchurian Railway were transferred to Japan by the Portsmouth Peace Conference, September 5, 1905. On December 22, 1905, China gave official recognition to this transfer and granted Japan the right to extend the railway from Mukden to Antung at the mouth of the Yalu river, where it connects with the Korean railway. In 1912 a branch line (78 miles) from Changchun, the northern terminus of the Japanese South Manchurian Railway to Kirin, constructed by joint Japanese and Chinese enterprise, was opened to traffic. Other branch lines westwards, constructed under similar conditions, are contemplated.

The Manchurian Railways extend from Shan-hai-kwan at the Great Wall northwards to Mukden (via Hsüminfu or by an alternative route via Newchwang) and thence to Changchun and Harbin. From Mukden southwards, the railway extends to Port Arthur and Dalny, with a branch to the Fushun collieries. At Harbin, on the Sungari River, the South Manchuria system connects with the Trans-Manchurian line, which running for 960 miles through Manchuria connects Vladivostock with Trans-Baikalia. There is a branch to Tsitsihar, and connection with Blagovestchensk is contemplated.

In 1915, the imports of Manchuria amounted to 12,671,183*l.*, and the exports to 28,415,343*l.*

**Tibet**, extending from the Pamir region eastwards between the Himalayan and Kwen-lun mountains to the frontiers of China, has an area of 463,200 square miles with a population estimated at 6,500,000. The only census ever taken was by the Chinese in 1737 and showed a population of 316,300 lamas (monks) and 635,950 laity. Lhasa, the capital, has from 15,000 to 20,000 inhabitants. The country being bleak and mountainous and strangers having been jealously excluded, wide regions are still unexplored.

Chinese authority was in the past represented by two *Ambans* who had charge, respectively, of foreign and military affairs. There were three Chinese commandants of troops at Lhasa, Shigatse, and Dingri where the permanent military force of about 4,600, provided by China, were mostly quartered. There were a few other Chinese officials, but the civil and religious administration of the country was left almost entirely to Tibetans. The head of the government is the Dalai Lama, who resides at the Po-ta-la (or palace) near Lhasa. He acts through a minister or regent appointed from among the chief Tibetan Lamas and assisted by five ministers. Early in 1908 the territory of Western Ssüchüan and the adjoining territory of Eastern Tibet were united into a new province, Hsi-Kan, with Batang, re-named Baanfu, as capital.

According to a provisional agreement of April 27th, 1914, between the Dalai Lama, the Chinese and the Indian Governments, Tibet is for administrative purposes defined as Outer and Inner Tibet, in accordance with boundaries shown on a map affixed to the Agreement, Inner Tibet being that portion of Tibet adjacent to China. It stipulates that Tibet forms part of Chinese territory, and is under Chinese suzerainty. It recognises the autonomy of Outer Tibet, engages on the part of England and China to abstain from interference in the administration of Outer Tibet; China undertaking not to convert Tibet into a Chinese Province, and engaging that Outer Tibet shall not be represented in any future Chinese Parliament.

China engages not to send troops into Outer Tibet, nor to station civil or military officers, nor establish Chinese colonies in that region. Any troops or officials remaining in Outer Tibet at the date of signature, shall be withdrawn within three months. A Chinese high official may be stationed as in the past at Lhasa, with an escort not exceeding 300 men. The British Agent at Gyantse may visit Lhasa with his escort should occasion require.

The action of the Chinese representative in initialling this provisional Convention was repudiated by China, and under instructions he abstained from signing the final Convention which in the same terms was duly signed by the British and Tibetan authorities on July 3rd, 1914. In accordance with the notification conveyed to the Chinese Government by the British Government, China, so long as she declines to sign this Convention, is deprived of all advantages and privileges secured to her under the Convention.

China's refusal to sign is based upon her objection to the inclusion of Chiamdo in Outer Tibet, and the inclusion of Litang and Batang, which she claims to be part of Suchuan Province, in Inner Tibet. China's representative has returned to Peking. The Convention and Exchange of Notes referred to, signed by the British and Tibetan representatives on July 3rd, 1914, have not yet been officially made public.

On January 21, 1912, a treaty between Tibet and Mongolia, negotiated by the Russian Buriat Lama Dorjeiff, whose earlier negotiations with Russia had been the immediate cause of the British advance into Tibet, was signed, the principal provisions of which being that each country recognises the independence of the other. They both undertake to promote and spread Buddhism, and to open their frontiers for mutual trade and intercourse.

The prevailing religion is Lamaism, a corrupt form of Buddhism, but along with it there exists the Bon, or Shamanistic, faith. In some places agriculture is carried on, barley and other cereals as well as pulse and vegetables being grown. In some favoured regions fruits, including peaches and even grapes, are produced. In other places the pursuits are pastoral, the domestic animals being sheep and yak (often crossed with Indian cattle), while in some regions there are buffaloes, pigs, and camels. Wool-spinning, weaving, and knitting are common, and there are many hands skilful in making images and other decorations for religious edifices. The chief minerals worked are gold, borax, and salt. There is a large trade with China and considerable traffic across the Indian frontier.

The trade between India and Tibet has to be carried through lofty passes between 14,000 and 18,000 feet high, most of which are practically impassable during seasons of heavy rain and snow. Sheep and also crosses between yaks and ordinary cattle are used as beasts of burden. The most important route into Tibet from India is from Siliguri, near Darjeeling in northern Bengal, and across the small Frontier State of Sikkim to Gyantse and Yatung in Tibet, the two leading trade marts authorised by the existing Convention. The other chief means of access to Tibet are from Almora in the northern part of the United Provinces, and from Simla over the Simla-Tibet road to Gartok in western Tibet, which is at about 14,200 feet elevation above the sea. From Almora to Gartok the direction is almost due north, and from Simla to Gartok is almost due east. The trade between India and Tibet was as follows:—

	1912-13	1913-14	1914-15	1915-16
	£	£	£	£
Imports into India <sup>1</sup>	167,000	220,000	234,000	255,000
Exports to Tibet <sup>2</sup>	87,000	133,000	119,000	127,000

<sup>1</sup> Mainly raw wool (166,000l. in 1915-16). <sup>2</sup> Largely cotton piece goods (41,000 in 1915-16).

For the removal of hindrances to the Indian trade a treaty was made with China (as suzerain of Tibet) in 1890, supplemented by a second treaty in 1893, but the hindrances still remained. Consequently, in 1904, the Indian Government sent a mission with an escort to arrange matters directly with the Tibetan Government. The mission met with a good deal of armed opposition, but at length, on September 7, a convention was executed at Lhasa. The convention provides for the re-erection of boundary stones (alluding to former pastoral disputes) on the Sikkim frontier; for marts at Yatung, Gyangtze, and Gartok for Tibetan and British merchants; for the demolition of forts on the trade routes; for a Tibetan commissioner to confer with British officials for the alteration of the objectionable features of the treaty of 1893; for the settlement of an equitable customs tariff; for the repair of the passes and the appointment of Tibetan and British officials at the trade marts. China, as the suzerain power of Tibet, paid an indemnity of 2,500,000 rupees (166,666*l.*), and the evacuation of the Chumti valley by the British began in February, 1908. Further, no Tibetan territory may be sold, leased or mortgaged to any foreign Power, nor may Tibetan affairs, or Tibetan public works, be subject to foreign management or interference without the consent of the British. The adhesion of China to this convention was secured by an agreement signed at Peking on April 27, 1906. Under the Convention of August 31, 1907, Great Britain and Russia agree not to enter into negotiation with Tibet except through the Chinese Government, nor to send representatives to Lhasa. But this engagement does not affect the provisions of the British-Tibetan convention of September 7, 1904, ratified by China in 1906. Negotiations were begun at Simla in Sept. 1907, for the conclusion of Trade Regulations between India and Tibet, and were brought to a satisfactory conclusion in April, 1908.

The province of **Sin-Kiang**, consisting of Chinese Turkestan, Kulja, and Kashgaria comprises all Chinese dependencies lying between Mongolia on the north and Tibet on the south. It is now regarded as a separate province, its Civil Governor residing at Tihuaifu (Urumchi), the capital. Its area is estimated at about 550,340 square miles and population at about 1,200,000. The inhabitants are of various races, known as Turki (Kashgari, Kalmuk, Kirghiz, Taranchi, etc.), mostly Mohammedan and Chinese, who have of recent years greatly increased in numbers. The chief towns are Tihuaifu, Kashgar, Yarkand, Khotan, and Aksu. The country is administered under Chinese officials, residing at Tihuaifu, the subordinates being usually natives of the country. In regions about the Kashgar and Yarkand rivers the soil is fertile, irrigation is practised, and cereals, fruits and vegetables are grown. Other productions of the country are wool, cotton, and silk. Jade is worked, and in some districts gold is found. The whole territory is yearly increasing in population and prosperity.

### Mongolia.

*Emperor* — **Jebsun Dampa Hutuktu** (Venerable Sacred Saint).

The Cabinet is made up as follows:—

*President of the Council of Ministers of Mongolia*.—Khan of Sainmoin, *Nannan Surun*.

*Minister of the Interior*.—Tchin Susuktu Chin Wang (Prince of First Rank), Lama, *Tsening Chimet*.

*Minister of Foreign Affairs*.—Daidje (Chieftain) Wang (Prince), *Hunda Dorje*.

*Minister of War*.—Erdeni Dalai Chün Wang (Prince of Second Rank), *Gombo Surun*.

*Minister of Finance.*—Tushetu (or Chiün Wang), *Dorje Tsak.*

*Minister of Justice.*—Erdeni Chiün Wang (*Namsarai*).

The vast and indefinite tract of country called **Mongolia** stretches from the Kinghan mountains on the east to the Tarbagatai mountains on the west, being intersected towards its western end by the Altai mountains and the Irtysh river. On the north it is bounded by Siberia and on the south by the outer Kan-su and other regions which are united into Sin-Kiang. The area of Mongolia is about 1,367,600 square miles, and its population about 2,600,000. A wide tract in the heart of this region is occupied by the Desert of Gobi which extends south-westwards into Chinese Turkestan. The inhabitants are nomadic Mongols and Kalmucks who range the desert with camels, horses, and sheep. Even in fertile districts they are little given to agriculture. But of recent years there has been a great extension of Chinese immigration, and a large area of what was known as Mongolia, extending from China proper and Manchuria to the Gobi Desert, is now indistinguishable from Chinese territory. Chinese settlers are gradually invading the Gobi Desert. Irrigation alone is needed. The chief town or centre of population is Urga, 170 miles due south of Khiakta, a frontier emporium for the caravan trade carried on with China across the Gobi Desert, goods being easily transported to the Siberian frontier town of Kiakhta, which stands about 100 miles from the south end of Lake Baikal. Imports at Urga in 1908 amounted to about 1,560,000*l.*, and the exports to about 990,000*l.* Chief exports were wool, skins and hides, furs, horns, &c. The commerce between Mongolia and China has been interrupted for nearly a year.

Goods entering or leaving Mongolia from or to China have to pay a duty of 10 per cent., *ad valorem*. Trade with Russia is free. Further trade with Russia will be stimulated by the railway now being constructed from the Trans-Siberian Railway to Kiakhta on the Mongolian frontier, the intention being subsequently to extend the railway to Urga.

Shortly after the outbreak of the Chinese Revolution, Outer Mongolia declared its independence and proclaimed the Hutuktu (living Buddha) as Emperor. Its autonomy was recognised by the Russian Government, and on November 3, 1912, a Convention and a Protocol was signed at Urga by the Russian Envoy and the Cabinet of the Hutuktu. By this Convention the Russian Government undertook to assist Mongolia to maintain the autonomous *régime* she has established, to support her right to have a national army, and to admit neither the presence of Chinese troops on her soil nor the colonization by the Chinese of her territory. The Mongolian Sovereign and Government will assure to Russian subjects and Russian commerce as in the past the full enjoyment of their rights and privileges as enumerated in the Protocol, and it is clearly understood that no other foreign subjects in Mongolia shall be granted fuller rights than those accorded to Russian subjects.

On November 5, 1913, after prolonged negotiations, an agreement was reached in Peking between Russia and China, whereby Russia recognised Outer Mongolia as part of Chinese Territory under Chinese Suzerainty, and China recognised the autonomy of Outer Mongolia. Both countries agreed not to send troops to Outer Mongolia other than as consular or official guards, and not to colonise its territory. Autonomous Outer Mongolia is defined as the territory formerly under the jurisdiction of the Chinese authorities at Kobdo, Uliasutai and Urga. Frontiers and other questions were settled at a tripartite conference between Mongolians, Chinese, and Russians, which were concluded in June, 1915.

In October, 1913, a war loan of 2,000,000 roubles was granted to the Mongolian Government by Russia. The advance was secured on certain revenues from districts near Kobdo, where Russian tax-collectors have already begun operations. In December, 1914, a Mongolian Bank was established. The capital has been fixed at 1,000,000 rubles, and the directorate of the bank is to be in Petrograd, with branches at Urga, Uliasutai, and Kobdo. The Mongolian Government is to receive 15 per cent. of the net annual profits, and will possess the right to purchase the bank upon the expiry of 50 years from the date of the commencement of operations.

In September, 1914, an agreement between Russia and the Urga Government was signed at Kiakhta with regard to railways in Mongolia. By the terms of the agreement Russia recognises the right of Mongolia to construct its own territorial railways, the plans for which are to be determined jointly by Russia and Mongolia. Russia is to lend its co-operation in finding capital for the railways. Mongolia engages to consult the Russian Government before granting any concession for domestic railways, so that the projected railways may not be "prejudicial to Russian economic and strategic interests." On the same date a concession was granted by Mongolia to the Russian Administration of Posts and Telegraphs for the construction of a telegraph line from the boundary of Mondî in the Irkutsk district to the Mongolian town of Uliasutai.

From March, 1915, Mongolia has a legal currency of its own. The Russian Government has granted to the Siberian Trading Bank the right to issue in Mongolia money coined in the Russian mint. On one side of the coins the value is impressed in the Russian language and a corresponding impression in Mongolian is on the reverse side. For exchange purposes the money will be equal to the Russian rouble (par value, 2s. 1½d.).

Buddhist Lamaism is the prevalent form of religion, the Lamas having their residence at Urga and other centres.

## COLOMBIA.

(LA REPÚBLICA DE COLOMBIA.)

### Constitution and Government.

THE Republic of Colombia gained its independence of Spain in 1819, and was officially constituted December 27, 1819. It split up into Venezuela, Ecuador, and the Republic of New Granada, February 29, 1832. The Constitution of April 1, 1858, changed the Republic into a confederation of eight States, under the name of Confederation Granadina. On September 20, 1861, the convention of Bogotá brought out the confederation under the new name of United States of New Granada, with nine States. On May 8, 1863, an improved Constitution was formed, and the States reverted to the old name Colombia—United States of Colombia. The revolution of 1885 brought about another change, and the National Council of Bogotá, composed of two delegates from each State, promulgated the Constitution of August 4, 1886. The sovereignty of the States was abolished, and they became simple departments, with governors appointed by the President of the Republic, though they have retained some of their old rights, such as the management of their own finances. At present there are 14 departments, 2 "Intendencias," and 7 commissaries.

The legislative power rests with a Congress of two Houses, called the Senate and the House of Representatives. The Senate contains 34 Senators elected indirectly by electors specially chosen for the purpose. The House of Representatives consists of 92 members elected by the people in 17 electoral circumscriptions (one for every 50,000 of population). Senators are elected for 4 years, Representatives for 2 years.

The President is elected by direct vote of the people for a term of 4 years, and his salary is 18,000 gold dollars per annum. Congress elects, for a term of one year, two substitutes, one of whom, failing the president during a presidential term, fills the vacancy.

*President of the Republic.*—Don José Vicente Concha. Elected February 9, 1914. Holds office from August 7, 1914, to August 7, 1918.

The ministries are those of the Interior, Foreign Affairs, Finance, Treasury, War, Public Instruction, Commerce and Agriculture, and Public Works.

### Area and Population.

The area of the Republic is estimated at about 440,846 square miles. It has a coast line of about 3,100 miles, about equally divided between the Caribbean Sea and the Pacific Ocean. The area and population of the 14 departments and 4 intendencias was, according to the census of 1912 (March 5), as follows (the capitals in brackets):—

	Area sq. miles	Census Population, 1912			Per sq. mile
		Male	Female	Total	
<i>Departments.</i>					
Antioquia (Medellin) . . . . .	22,752	356,969	382,465	739,434	32
Atlántico (Barranquilla) . . . . .	1,008	54,939	59,948	114,887	114
Bolívar (Cartagena) . . . . .	22,320	205,080	215,650	420,730	19
Boyacá (Tunja) . . . . .	16,460	276,551	809,948	586,499	35
Caldas (Manizales) . . . . .	7,380	170,495	170,703	341,198	46
Cauca (Popayán) . . . . .	20,403	103,468	108,288	211,756	10
Cundinamarca (Bogotá) . . . . .	8,046	338,472	375,496	713,968	88
Huila (Neiva) . . . . .	8,100	73,689	84,502	158,191	19
Magdalena (Santa Marta) . . . . .	19,080	70,608	78,939	149,547	7
Nariño (Pasto) . . . . .	9,360	142,099	150,436	292,535	31

Santander Sur (Bucaramanga) . . . . .	17,865	191,398	208,686	400,084	22
Tolima (Ibagué) . . . . .	10,080	136,191	146,235	282,426	28
Valle (Cali) . . . . .	3,887	104,705	112,454	217,159	55
Total Departments. . . . .	182,006	2,324,186	2,508,649	4,832,735	26.5
<i>Intendencias.</i>					
Choco (Quibdó) . . . . .	68,127	32,235	35,892	68,127	—
Meta (Villavicencio) . . . . .	—	14,784	14,525	29,309	—
<i>Commissaries.</i>					
Arauca (Arauca) . . . . .	—	2,466	2,456	4,922	—
Caquetá (Florencia) . . . . .	—	12,471	12,063	24,534	—
Guaviara (Puerto Estrella) . . . . .	—	23,632	29,381	53,013	—
Juradó (Pizarro) . . . . .	—	1,134	1,073	2,207	—
Putumayo (Mocoa) . . . . .	—	15,776	15,604	31,380	—
Urabá (Acandí) . . . . .	—	3,299	3,177	6,476	—
Vaupés (Calamar) . . . . .	—	2,961	2,584	5,545	—
Total Intendencias and Commis- saries . . . . .	258,840	111,758	119,755	231,513	—
Prison population . . . . .	—	3,147	3,646	6,793	—
Grand Total . . . . .	440,846	2,439,051	2,632,050	5,071,101	11.5

This excludes about 30,000 uncivilised Indians. On December 4, 1903, Panama asserted its independence and was formed into a separate Republic. On April 6, 1914, Colombia signed a treaty with the United States, at Bogotá, agreeing to recognise the independence of Panama and receiving in return 25 million dollars (5 millions sterling) and certain rights in the Panama Canal zone. (See Introduction of THE STATESMAN'S YEAR BOOK, 1915.)

The capital, Bogotá (pop. 121,257, 50,557 males and 71,700 females), lies 8,600 feet above the sea. The chief commercial towns are Barranquilla (48,907, 22,446 males and 26,461 females), connected with the coast at Puerto Colombia by 17 miles of railway; Manizales (34,720, 17,131 males and 17,589 females); Cartagena (36,632, 17,210 males and 19,422 females); Medellín (71,004, 31,270 males and 39,734 females) a mining centre; Cali, 27,747 (12,465 males and 15,282 females); Bucaramanga (19,735, 8,574 males and 11,161 females); Cúcuta (20,364, 10,414 males and 9,950 females), the last two being coffee centres.

Most of the boundary line with Brazil is still undefined, and there are frontier difficulties with Peru, Ecuador and Venezuela.

### Religion and Instruction.

The religion of the nation is Roman Catholicism. There are 4 Catholic archbishops, viz. of Bogotá, Cartagena, Medellín, and Popayán, the first having 4 suffragans and the other three 2 a-piece. One of the suffragan sees is Panamá, belonging to ecclesiastical province of Cartagena, and now also to the Republic of Panamá. Other forms of religion being permitted, so long as their exercise is 'not contrary to Christian morals nor to the law.'

There is a Ministry of Public Instruction which has the supreme direction of education throughout the Republic, and is divided into 5 sections: primary, secondary, professional, artistic and industrial. Education is stated to be in a satisfactory condition, there being 5,137 primary schools with 325,756 pupils (176,468 boys and 149,288 girls) and 5,733 teachers (1,759 men and 3,974 women) in 1916. Nearly all the schools for secondary education, maintained or assisted by the nation, are entrusted to religious corporations of the Catholic Church. In 1916 there were 344 secondary and professional schools with 29,138 pupils (16,622 boys and 12,516 girls). There were also 43 art and trade schools with 2,380 pupils. The oldest University is that of Bogotá (founded 1572). This and the School of Mines at Medellín are national institutions. The other Universities are departmental. They are the Universities at Medellín (founded 1822), of Cartagena, of Popayán, and of Pasto. In 1914 these together had 1,576 students. For the working class there are many schools of arts and trades directed by the Salesian Fathers. There are other schools or colleges open, under religious orders, and the school of fine arts has been reopened. In 1914 there were 28 normal schools with 1,728 students (649 men and 1,079 women), and schools of mining at Medellín and Pasto. Primary education is gratuitous but not compulsory. In 1914, 3,445,225 pesos were spent on education, of which 849,400 pesos were paid by the State and the remainder by the Departments and Municipalities. The Republic possesses a national library, museum, and observatory at Bogotá.

### Finance.

Revenue and expenditure for 6 years in gold pesos:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1911	11,531,589	11,832,900	1914	13,649,582	14,771,575
1912	13,217,759	14,205,366	1915	12,054,914	12,824,935
1913	17,385,922	15,531,642	1916 <sup>1</sup>	14,860,000	17,115,265

<sup>1</sup> Estimates.

The budget estimates for the year ending June 30, 1916, were as follows:—

Revenue	Gold Pesos	Expenditure	Gold Pesos
Salt Tax . . . . .	1,180,000	Ministry of Interior . . . . .	5,517,927
Railways . . . . .	154,000	Ministry of Foreign Affairs . . . . .	345,189
Telegraphs . . . . .	550,000	Ministry of Finance . . . . .	1,165,166
Customs . . . . .	6,600,000	Ministry of War . . . . .	2,495,574
Consular Dues . . . . .	300,000	Public Instruction . . . . .	1,103,454
Stamps . . . . .	850,000	National Debt Service . . . . .	4,606,761
Succession Duties . . . . .	140,000	Public Works . . . . .	945,887
		Agriculture & Commerce . . . . .	209,529
Total (including all revenues) . . . . .	14,860,000	Total (including all expenditure) . . . . .	17,115,265

The external debt on January 1, 1917, amounted to 3,817,787 $\frac{1}{2}$ ., made up as follows:—Consolidated external debt of 1896, 2,078,400 $\frac{1}{2}$ .; five per cent. Government bonds of 1906, specially secured on the Bogota-Sabana Railway, 278,880 $\frac{1}{2}$ .; six per cent. external gold loan of 1911, 286,480 $\frac{1}{2}$ .; six per cent. external debt of 1913, 1,174,027 $\frac{1}{2}$ .

The internal debt on July 1, 1916, was 4,557,781 gold pesos.

### Defence.

Military service is compulsory, from 1 to 1 $\frac{1}{2}$  years. The permanent army consists of 3 divisions of 2 brigades of 2 regiments of infantry; total 12 infantry regiments; 1 cavalry regiment of 4 squadrons; 1 artillery section; 1 engineer battalion; 1 transport battalion of 3 companies. The peace effective is about 6,000. In war time every fit Colombian is compelled to serve, and the war effective is about 50,000. The infantry are armed with rifles of the improved Remington pattern, with the French Gras rifle, and with the 88 pattern Mauser.

The Colombian navy consists of the following vessels:—On the Atlantic, 3 cruisers; on the Pacific, 2 cruisers, 2 gunboats, 1 troopship, 2 tugs; on the river Magdalena, 1 gunboat. The ships are all old, and of little or no fighting value.

### Production.

Colombia is rich in minerals, and gold is found in all the departments. In 1915 gold was exported to the value of 5,453,148 gold pesos, silver to the value of 114,747 gold pesos, and platinum to the value of 549,854 gold pesos. The mines are in Antioquia, Cauca, Bolivar, Tolima, and Narino. The number of gold mines known in Colombia is as follows: Antioquia 12,181, Narino 2,452, Caldas 2,610, Tolima 502, Cauca 641. Other minerals, more or less worked, are copper, lead, mercury, cinnabar (14 mines), manganese (7 mines), emeralds (32 mines). The emerald mines of Muzo and Coscuez belong to the Government. No statistics of their output are published, but they are said to yield 1,000,000 pesos worth of stones per annum. Nearly all the emeralds mined to-day come from Colombia. The Pradera iron works north-east of Bogotá have a capacity of 30 tons of pig iron daily, and manufacture wrought iron, rails, sugar mills, castings, &c. In the immediate neighbourhood of the works are coal, iron, limestone, sand, manganese, and fireclay deposits, which render the locality highly favourable for the development of metallurgical industries. The salt mines at Zipaquirá, north of Bogotá, are a government monopoly and a great source of revenue, supplying most of the interior departments. The maritime departments use sea salt evaporated at the numerous natural salt pans along the coast. In several of the departments there are extensive deposits of coal and petroleum. On the coasts there are valuable pearl fisheries which the Government desires to concede for a term of years.

Only a small section of the country is under cultivation. Much of the soil is fertile, but of no present value, from want of means of communication and transport. Coffee is the staple product, but transport is difficult. Tobacco is also grown, and for this Germany in the past was the best market. Cotton is produced in Magdalena, Bolivar, Antioquia and Santander, and is beginning to be cultivated in Boyaca, Tolima, and Cundinamarca. Cocoa, sugar, vegetable ivory, tagua (or vegetable ivory nut), and dyewoods are produced, besides wheat, maize, plantains, &c. Banana cultivation is extending, and near Santa Marta a large amount of capital is invested in this industry. The rubber tree grows wild, and its cultivation has

begun. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant on the Magdalena river, but little or no wood of any sort is exported. The Panama hat industry is making great strides; some 86 per cent. of the hats manufactured are sent to the United States. The total number of factories in Colombia in 1915 was 121, in which 12,406,000 dollars were invested. The principal manufacturing centres are Bogotá, Medellín, Barranquilla, and Cartagena.

### Commerce.

Imports and exports for 6 years :—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1910	3,475,008	3,557,861	1913	5,397,480	6,863,163
1911	3,621,773	4,475,179	1914	4,125,846	6,526,517
1912	4,792,924	6,644,349	1915	3,568,079	6,315,825

Trade by principal countries for 2 years in pesos gold :—

Imports	1914	1915	Exports	1914	1915
United States	6,486,794	8,661,780	United States	18,272,332	21,945,602
United Kingdom	6,346,385	5,369,668	United Kingdom	5,874,512	3,692,207
Germany	2,570,424	—	Germany	1,779,393	—
France	1,249,374	478,479	France	457,922	253,986
Italy	625,492	168,411	Italy	21,078	236,269

The principal articles of export (1915), were coffee, 16,247,671 gold pesos; hides, 3,730,221; bananas, 1,977,140; gold, 5,453,148.

About 67 per cent. of the coffee exported from Colombia goes to the United States; cotton to Liverpool or Havre. The chief imports are flour, lard, petroleum, and cotton goods from the United States; and cotton goods from Great Britain.

Total trade between United Kingdom and Colombia for 5 years :—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Colombia into U.K.	1,198,010	1,088,717	1,090,164	1,189,684	194,962
Exports to Colombia from U.K.	1,433,877	1,692,541	1,165,891	1,047,677	1,653,392

### Shipping and Communications.

In 1911 the merchant shipping of Colombia consisted of 1 steamer of 457 tons and 4 sailing vessels of 1,121 tons. At Cartagena in 1910 there entered 257 vessels of 585,706 tons, and at Puerto Colombia 327 vessels of 737,639 tons. The ports of Colombia are in regular communication with those of European and American countries by means of 7 lines of mail steamers, 3 of which are British and the others German, French, Spanish, and Italian.

The total length of railways open in Colombia in 1915 was 708 miles belonging to 9 companies and 2 States. Of the total, 466 miles have a gauge

of 3 ft. ; the rest a metre gauge. Number of passengers carried (1912), 1,350,548 ; tons of freight, 383,930. The roads of Colombia are generally simple mule tracks, but the Government continues to improve the main roads, which can be used now by automobiles. There are many cart roads besides. Much of the inland traffic is by river, and the work of clearing and canalising the lower and upper Magdalena is being carried on. That river is navigable for 900 miles ; steamers ascend to La Dorada, 592 miles from Barranquilla. Tributaries supply 215 miles more of navigable water, and on these rivers 42 steamers, with a total tonnage of 7,331, regularly ply.

Postal facilities between Barranquilla and foreign countries are stated to be excellent, but as to internal services there are no recent statistics. In 1915, in the internal service there were 3,417,564 letters and post-cards transmitted, and 2,389,786 packets of printed matter, samples, and business papers. Number of offices, 843. A British river-transport company has contracted with the Government to convey mails and passengers to and from the interior every three days. Other companies, British, German, and native, ply on the rivers.

There were 12,000 miles of Government telegraph lines in July, 1915 ; number of offices, 625 ; 2,875,306 telegrams were despatched in 1915, and 66,825 cablegrams were sent.

### Money, Weights, and Measures.

The redemption of the paper currency and the restoration of metallic money is now taken in hand by the Government. The sovereign is received by the Government in all transactions as the equivalent of 5 gold pesos. By a special law the exchange between the paper currency and the gold currency has been fixed at 10,000 per cent., so that the value of the paper peso is 1 cent gold.

Under the Law of June 12, 1907, the monetary unit is a gold dollar equal to one-fifth of a pound sterling and of proportionate weight, the fineness being the same. Gold coins are 2½ and 5 dollars. Silver coins are (900 fine) the half-dollar, the peseta, and the real ; the silver coinage being legal tender for amounts not exceeding 10 dollars gold. Nickel coins for 1, 2, and 5 pesos (cents.) are legal tender up to 2 dollars gold, each peso paper being reckoned as worth 1 centavo gold (as stated above). Colombia has no gold coinage beyond the British £1 and 10s. pieces, but coining has already begun at the Mint in Medellin, the first gold having been coined on August 11, 1913. In December, 1916, a law was promulgated authorising the Government to coin gold pieces in the mints of Bogotá and Medellin free of charge. In 1915 there were in circulation paper of a gold value of 10,056,300 dollars ; silver, 7,004,700 dollars ; nickel, 997,700 dollars ; gold, 85,000 dollars ; and American and English money, 6,356,300 dollars, making a total of 24,500,000 dollars.

There are 24 banks in the Republic. Their joint capital amounted on December 31, 1915, to 8,605,277 pesos gold.

The metric system was introduced into the Republic in 1857. In custom-house business the kilogramme, equal to 2,204 avoirdupois pounds, is the standard. In ordinary commerce the arroba, of 25 Colombian pounds, or 12½ kilos ; the quintal, of 100 Colombian pounds, or 50 kilos ; and the carga, of 250 Colombian pounds, or 125 kilos, are generally used. The Colombian libra is equal to 1·102 pound avoirdupois. The Colombian vara or 80 cm., is still in some cases the measure of length used for retailing purposes, but in liquid measure the French litre is the legal standard.

## Diplomatic and Commercial Representatives.

### 1. OF COLOMBIA IN GREAT BRITAIN.

*Minister and Envoy.*—Dr. Ignacio Gutiérrez-Ponce (January 13, 1915).

*Secretary of Legation.*—Eduardo Pérez-Triana.

*Attachés.*—Francisco Becerra, and Santiago Pérez O'Day.

There are consuls or vice-consuls at Liverpool, Southampton, Birmingham, Cardiff, Dundee, Glasgow, Newcastle, and Manchester.

### 2. OF GREAT BRITAIN IN COLOMBIA.

*Envoy Ex't., Min. Plen. and Consul-General.*—Percy C. Wyndham. Appointed May, 1911.

Consul at Barranquilla, and vice-consuls at Bogotá, Carthagena, Honda, Medellín, and Santa Marta, and consular agents at Tunaco and Buenaventura.

## COSTA RICA.

(REPÚBLICA DE COSTA RICA.)

### Constitution and Government.

THE Republic of Costa Rica, an independent State since the year 1821, and forming part from 1824 to 1829 of the Confederation of Central America, is governed under a Constitution promulgated on December 7, 1871, and modified very frequently since that date. Practically there was no constitution, but only dictatorships, between 1870 and 1882. The legislative power is vested in a Chamber of Representatives called the Constitutional Congress, and made up of 43 deputies, being one representative to every 8,000 inhabitants. By the Election Law of August 18, 1913, universal suffrage was adopted for all male citizens who are of age and able to support themselves, except those deprived of civil rights, criminals, bankrupts and the insane. Voting for President, Deputies and Municipal Councillors is public, direct and free. The members of the Chamber are elected for the term of four years, one-half retiring every two years. The executive authority is in the hands of a president, elected for the term of four years.

*President of the Republic.*—Alfredo Gonzalez. (Elected for four years from May 8, 1914.)

The administration normally is carried on by six Secretaries of State, who are appointed by, and responsible to, the President. They are the Secretaries respectively of the Interior and Police; of Foreign Affairs, Justice, and Public Worship; of Public Instruction; of War and Marine; of Finance and Commerce; and a Secretary of Public Works under the control of Secretary of Finance and Commerce.

On December 20, 1907, the 5 Central American States, by their representatives at a conference at Washington, signed (among other treaties) a treaty of peace by which all the States agree to submit disputed matters to a Court of Arbitration, the judges of which will be appointed by the Congress of each country, the decisions of this Court to be binding on all parties.

### Area and Population.

The area of the Republic is estimated at 23,000 English square miles, divided into seven provinces, San José, Alajuela, Heredia, Cartago, Guanacaste, Punta Arenas, and Limon. The last Census was taken in 1892. According to the estimate for December 31, 1915, the population was 430,701, made up as follows:—

Province	Population	Province	Population
San José . . .	131,332	Guanacaste . .	40,806
Alajuela . . .	101,783	Punta Arenas .	22,203
Heredia . . .	46,162	Limon . . .	23,756
Cartago . . .	64,659	Total . . .	430,701

There are about 3,500 aborigines (Indians).

The vital statistics for three years were as follows :—

	Marriages	Births	Deaths	Increase	Immigration	Emigration
1913	2,226	17,746	9,382	8,364	13,980	11,652
1914	2,178	18,633	9,482	9,151	8,955	8,900
1915	1,929	18,700	9,545	9,255	3,880	4,860

The population of European descent, many of them pure Spanish blood, dwell mostly around the capital, the city of San José (35,654, or with suburbs, 47,495), and in the towns of Alajuela (6,481), Cartago (12,905), Heredia (8,200), Liberia (2,529), Punta Arenas (5,029), and Limon (6,742). There are some 18,000 coloured British West Indians, mostly in Limon Province, on the banana farms.

For the purpose of public health the country has been divided into 26 districts, superintended by medical men paid by the national Treasury. The Rockefeller Institute has established a branch in Costa Rica to combat ankilostomiasis, and the Medical Officer in charge is giving most valuable advice and work to the Costa Rican authorities.

### Religion and Instruction.

The Roman Catholic is the religion of the State, but there is entirely religious liberty under the Constitution. The Bishop of San José is a suffragan of the Archbishop of Guatemala. Elementary instruction is compulsory and free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In 1915, there were open 419 elementary schools; the teachers numbered 1,489, and the enrolled pupils 34,703, the average attendance being 32,059. For secondary instruction there are at San José a lyceum for boys with 327 pupils in 1915, and a college for girls with 190 pupils. A normal school was established in 1915 at Heredia. The towns of Cartago, Alajuela, and Heredia, have each a college. For professional instruction there is a Medical Faculty, and also schools of Law, Pharmacy, and Dentistry.

Spanish is the universal language of the country.

### Justice.

Justice is administered by the Supreme Court of Justice, two Appeal Courts, and the Court of Cassation. There are also subordinate courts in the separate provinces, and local justices throughout the Republic. Capital punishment cannot be inflicted. In 1915 there were 8,762 convictions of misdemeanour, and 1,848 of crime.

### Finance.

The revenue and expenditure for five years have been (in colones, worth about 22·9*d.*, £1 = Colones 10·45) as follows :—

	1913	1914	1915	1916 <sup>1</sup>	1917 <sup>1</sup>
	£	£	£	£	£
Revenue . . . . .	919,861	823,128	606,167	723,732	748,500
Expenditure . . . . .	986,012	932,750	876,166	859,503	906,338

<sup>1</sup> Estimates.

The revenue is chiefly derived from customs, liquors, and railways, posts, and telegraphs. The largest items of expenditure are finance, public instruction, and internal development.

The foreign debt of the Republic outstanding on December 31, 1915, was 3,378,185*l.*, made up of gold refunding bonds, 1911, of 2,000,000*l.* (1,586,600*l.* issued) and the French Loan of 1912, of 35,000,000 francs (1,378,185*l.* outstanding). The coupons have been paid up to date, and the London agents had 7,312*l.* in hand, and the Paris Bankers 735*l.* (18,398 francs) for 1916 coupons. Of the balance of the Gold Refunding Bonds of 1911, not issued, viz. : 413,340*l.*, 50,000*l.* was deposited with the National City Bank of New York for security of a credit of 150,000 dollars, 27,040*l.* was returned to the Government by the London agents and is in possession of the Government, 3,500*l.* was bought by the Government in 1915, and 332,800*l.* was deposited with the International Bank of Costa Rica as reserve for note issue ; 3,250*l.* of old bonds were exchanged during 1915 at value of 1,455*l.* The internal debt on December 31, 1915, was made up of 285,213*l.* bonds at 6 per cent., 19,674*l.* at 12 per cent., and the floating debt of 633,301*l.* repayable at dates not yet due. It consists of (1) Municipal funds derived from sale of State lands granted to them by Government (no interest paid on these). (2) Funds of Charitable Societies. (3) Loans of banks and private persons, not yet due.

### Defence.

Costa Rica has an army, including reserve and national guard, of 52,208 officers and men. The active army numbers 38,946, and consists of 3 brigades, 1 battalion, 3 companies, and 135 unclassified soldiers. The peace strength is 1,000 men, and the war strength is estimated at 50,000 militia, as every male between 18 and 50 may be required to serve. The Republic has also 1 motor launch on the Atlantic side and 1 on the Pacific side for Revenue purposes.

### Production and Industry.

There are thousands of square miles of public lands in Costa Rica that have never been cleared, on which can be found quantities of virgin rosewood, cedar, mahogany, and other cabinet woods. The principal agricultural products are coffee (16,843,782 kilos. were exported in 1915-16, about half to the United Kingdom, and 12,206,357 kilos. in 1914-15 ; and bananas 95,400 acres (9,521,648 bunches valued at 911,162*l.* in 1915, 10,162,912 bunches in 1914, 11,170,812 in 1913). There is a brisk banana trade with New Orleans, Mobile, New York, and Boston, and also between Limon and Bristol and Manchester. Gold and silver were mined in 1915 to the amount of 161,174*l.* ; in 1914 to 177,714*l.* ; and in 1913 to 204,295*l.* Maize, sugar-cane, rice, and potatoes are commonly cultivated. The distillation of spirits is a government monopoly. The live stock consists of 332,980 cattle, 52,030 horses, 63,434 pigs, besides mules, sheep, and goats. Several districts are auriferous, and mining is carried on in the Abangarez, Barranca, and Aguacate districts ; 4 mining companies are crushing.

There are officially enumerated 3,296 factories and industries in the Republic, including coffee-drying establishments, starch, broom and wood-work factories.

### Commerce.

The value of imports into and exports from Costa Rica in 5 years (including coin and bullion) was as follows (in sterling 1 colon = 22.9d.):—

—	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . .	1,825,829	2,087,189	1,787,335	1,554,083	923,890
Exports . . .	1,836,546	2,050,523	2,124,107	2,735,272	2,052,082

The imports (1915) include 6,738/. coin, and the exports (1915), 159/. coin.

For 1915 and 1914 the value of the chief imports and exports was as follows:—

Imports	1914	1915	Exports	1914	1915
	£	£		£	£
Cotton goods . .	184,115	112,632	Bananas . . .	972,528	911,162
Wheat . . .	75,454	66,588	Coffee . . .	959,687	767,672
Coal . . .	51,494	22,011	Gold, silver and concentrates from		
Flour . . .	38,962	46,196	mines . . .	182,868	166,695
Lard . . .	42,172	29,728	Hides and skins .	24,482	32,952
Drugs . . .	33,741	23,852	Timber . . .	25,479	10,162
Rice . . .	32,994	22,359			

Of the import value in 1915, 617,227/. (67.30 per cent.) was from the United States, 115,128/. (12.55 per cent.) from the United Kingdom, 52,448/. (5.72 per cent.) from Spanish America, 28,320/. (3.09 per cent.) from Italy. Of the value exported, 1,001,334/. (48.70 per cent.) went to the United States, 913,357/. (44.52 per cent.) to the United Kingdom, 2,721/. (0.15 per cent.) to Germany, 12,960/. (0.65 per cent.) to France, and 56,598/. (2.77 per cent.) to Spanish America.

Total trade between the United Kingdom and Costa Rica (Board of Trade Returns) for 5 years:—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Costa Rica into U.K. .	1,317,154	1,424,102	1,684,126	1,569,500	1,518,625
Exports to Costa Rica from U.K. .	236,242	236,357	186,563	97,432	138,650

### Shipping and Communications.

There are no official figures available as regards Costa Rica shipping. On the Atlantic coast there are several small sailing vessels and power launches, and on the Pacific coast some motor launches.

In 1915 there entered the ports of the Republic 413 vessels (86 British, 21 Norwegian and 221 United States), of 901,093 tons, and cleared 419 (87 British, 21 Norwegian and 221 United States) vessels, of 906,880 tons. Limon is visited regularly by steamers of 3 shipping companies (1 British, 1 American and 1 Italian) connecting it with ports of Europe and America. Since the war, German, French and Spanish lines ceased calling at Limon. The American line are steamers of the United Fruit Company, formerly under

British flag, now transferred to American flag. Three lines visit the Pacific port of Punta Arenas.

The railway system connects San José with the Atlantic port, and has been extended to connect the capital with the Pacific port. The length of railway is about 385 miles—the San José to Limon main line, 104 miles (Costa Rica Railway), and the San José to Punta Arenas main line, 76 miles (State owned); the system is being extended into the banana lands. The branch line of railway south of the Baganito River is being extended to Estrella River, in the direction of the Panama frontier, and only 20 miles now divide the terminals of the two railways belonging to the United Fruit Company. When these two terminals are joined up, through rail communication will be established between Port Limon and the new port of Almirante in Panama. At San José there is an electric tramway of  $8\frac{1}{2}$  miles.

In 1915 there were 208 post offices. The number of postal packets despatched and received was 8,614,340.

There are (1915) telegraph wires of a total length of 15,170 English miles, with 147 telegraph offices. The number of messages was 711,052. The telephone lines had a length of about 640 miles. Wireless telegraphy is working from Limon to Bocas del Toro (Panama) 60 miles, and to Bluefields, in Nicaragua, and to Colon, in Republic of Panama. Limon has a radius of 300 miles. The Government has a small wireless station at Colorado (mouth of R. San Juan, near Nicaraguan border).

### Money, Weights, and Measures.

In October, 1914, the Banco Internacional de Costa Rica was established as a Government Bank of Issue. It is authorised to issue up to 4,000,000 colones in notes to bearer (guaranteed by Government 6 per cent. Bonds and by un-issued balance of Costa Rica Gold Refunding Bonds of 1911 for an equal amount). There are 3 other banks in Costa Rica, the Anglo-Costa Rican Bank (founded 1863) and the Bank of Costa Rica (1877), with a capital of 1,200,000 and 2,000,000 colones respectively, and the Mercantile Bank of Costa Rica (1908) with a capital of 1,500,000 colones. A branch of the Royal Bank of Canada was opened in August, 1915. Banks of issue must keep a reserve in gold equal to 40 per cent. of their note circulation. The total notes in circulation on February 3, 1915, were 221,728 colones of the three banks named, 4,000,000 colones of the Banco Internacional de Costa Rica, and 1,987,440 colones of the Commercial Bank of Costa Rica which became bankrupt in February, 1915. The three private banks had total reserves on February 3, 1915 (latest available figures) of 2,692,412 colones.

On October 26, 1896, an Act was passed for the adoption of a gold standard, the monetary unit to be the gold *colon*, weighing 778 grammes, 900 fine (value about 22·9*d.*). The U.S. gold dollar is worth 2·15 colones and the English sovereign, 10·45 colones. The new silver coinage consists of fractions of the colon, viz., 50, 25, 10, and 5-cent pieces 900 fine silver, which are legal tender up to 10 colons, copper being legal tender up to 1 colon. Foreign gold is legal, but not foreign silver.

The metric system is now in use; the following are the old weights and measures:—

The <i>Libra</i>	.	.	.	.	=1·014 lb. avoirdupois.
„ <i>Quintal</i>	.	.	.	.	=101·40 lbs. „
„ <i>Arroba</i>	.	.	.	.	=25·35 „
„ <i>Fanega</i>	.	.	.	.	=11 bushels (imperial bushel).

The old weights and measures of Spain are in use in the country districts but the introduction of the French metric system is legally established and in general use.

## Diplomatic and Consular Representatives.

### 1. OF COSTA RICA IN GREAT BRITAIN.

*Envoy Extraordinary and Minister Plenipotentiary in London.*—W. de la Guardia (May 30, 1913).

*Secretaries.*—Victor M. and Guillermo de la Guardia.

## CUBA.

### Constitution and Government.

Cuba, after having been continuously in Spanish possession from its discovery, was by the peace preliminaries and by the definitive treaty signed by the Peace Commissioners at Paris, December 10, 1898, relinquished by Spain, and thus has the position of an independent nation. The direct armed interposition of the United States in the struggle against Spanish domination has, however, brought the island into close association with the United States Government. On November 5, 1900, a convention met to decide on a constitution, and on February 21, 1901, a constitution was adopted, under which the island has a republican form of government, with a president, a vice-president, a Senate, and a House of Representatives. The United States legislature passed a law authorising the President of the United States to make over the government of the island to the Cuban people as soon as Cuba should undertake to make no treaty with any foreign power endangering its independence, to contract no debts for which the current revenue would not suffice, to concede to the United States Government a right of intervention, and also to grant to it the use of naval stations. On June 12, 1901, these conditions were accepted by Cuba, on February 24, 1902, the President and Vice-President of the Republic were elected, and on May 20 the control of the island was formally transferred to the new Cuban Government. Under treaties signed July 2, 1903, the United States has coaling stations in the Bay of Guantánamo and Bahía Honda, for which they pay 2,000 dollars annually. The connection between Cuba and the United States was rendered still closer by the reciprocal commercial convention which came into operation on December 27, 1903.

In August, 1906, an insurrection broke out, and a United States Commission undertook the provisional government. On January 24, 1909, the provisional government came to an end, and the new president assumed office.

*President.*—General Mario G. Menocal (inaugurated May 20, 1913; second term expires May 20, 1921)

There is a Cabinet consisting of the Secretaries of State, of Justice, of the Interior, of Finance, of Agriculture, Commerce, and Labour, of Public Instruction, of Public Works, and of Sanitation and Charity.

The National Congress is made up of a Senate (24 members, 4 for each province) and a House of Representatives (114 members, 1 for every 25,000 of the inhabitants).

### Area and Population.

Cuba has an area of 44,164 square miles, with a population, according to the enumeration of November, 1916, of 2,627,536. The area, population, and density of population of each of the six provinces were as follows:—

Province	Area	Population in 1916	Pop. per sq. mile
	Square miles		
Havana . . . . .	3,174	688,057	216.77
Pinar del Río . . . . .	5,212	269,166	51.67
Matanzas . . . . .	3,260	280,353	85.99
Santa Clara . . . . .	8,266	595,229	72
Camagüey . . . . .	10,076	103,201	18.87
Oriente . . . . .	14,227	604,530	42.40
Total . . . . .	44,215	2,627,536	59.65

The population in 1916 has increased 116,488 over that of 1915. The whites formed 71·9 and the coloured 28·1 of the total population.

The movement of population for 3 years was as follows:—

Year	Births	Marriages	Deaths	Surplus of Births over Deaths
1913 . . .	62,093	13,437	33,284	28,809
1914 . . .	85,317	—	35,887	49,430
1915 . . .	57,648	12,152	35,086	45,496

In 1915 there were 79,233 immigrants as follows: 53,072 men, 17,456 women, and 8,705 children; and 44,831 men, 14,205 women, and 6,397 children emigrated.

The chief towns are (population in 1916) Havana, 359,259; Santiago de Cuba, 63,041; Matanzas, 56,468; Cienfuegos, 82,092; Camagüey, 93,057; Cárdenas, 32,513; Santa Clara, 57,767; Sancti Spiritus, 58,843; Guantánamo, 60,216; Pinar del Río, 52,472; Manzanillo, 62,485.

### Instruction.

According to the census returns for 1907, 31 per cent. of the population could not read; 69 per cent. could read. Education is obligatory since 1880, but the law was not enforced until 1899 when the present elementary and secondary school systems were established. Each municipality was required to have a school board, and every town to have schools at which the attendance of children should be compulsory. On June 30, 1915, there were 2,686 school houses, with 4,525 class rooms and 4,931 teachers; 289,692 pupils were enrolled in the public schools (149,013 boys and 140,679 girls); the average attendance being 183,947.

The secondary and higher instruction is given by the Government in accordance with the bye-laws of the Constitution. It maintains six secondary schools, one in each of the six provinces. They are called "Institutes for Secondary Instruction." Annexed to these Institutes are the Special Schools of Land Surveying. The Institute of Havana has no School of Surveying, but has a number of other schools, such as the School of Commerce, of Navigation, of Stenography and Typewriting. The number of students in the various Institutes is 2,087 (1915-1916).

University instruction is given at the University of Havana, which is divided into the three Faculties of Liberal Arts and Science, of Medicine and Pharmacy, and of Law. Congress regulates and dictates the laws in reference to the different courses of studies. The number of students in the University of Havana in the session 1915-16 was 1,432.

### Finance, Defence.

The Budget for the fiscal years commencing July 1, 1916 and 1917, and ending June 30, 1917 and 1918, shows estimated receipts 41,828,580 dollars; expenses 40,262,905 dollars, leaving a surplus of 1,565,674 dollars.

The principal items of estimated income were:—Customs Revenue, 29,100,000 dollars and Consular Fees, 670,000 dollars. The principal items of estimated expenditure were:—Home Affairs, 11,044,249 dollars, Finance Department, 2,861,018 dollars, Instruction, 6,196,420 dollars, and Public Works, 5,101 665 dollars.

The debts of the Republic of Cuba (November 16, 1916) were (according to the President's message) as follows:—

	dollars
Exterior Debt, 1904, 5 per cent. . . . .	28,808,000
„ „ 1909, 4½ „ . . . . .	16,500,000
„ „ 1914, 5 „ . . . . .	10,000,000
Total Exterior Debt . . . . .	55,308,000
Interior Debt, 5 per cent. . . . .	10,615,400
Total Debt . . . . .	65,923,400
	(£13,184,680)

For the preservation of order in the Republic and in accordance with the law reorganising the army, the latter is now composed of 444 officers and 11,000 enlisted men. The navy consists of one cruiser, one school ship and eighteen revenue cutters.

### Production and Industry.

The staple products of Cuba are tobacco and sugar, but coffee, cocoa, cereals, and potatoes are grown, and a considerable trade is done in fruits and minerals. In 1912-13 the sugar crop was 2,443,986 tons; that for 1913-14 was 3,597,732, that for 1914-15, 2,592,667 tons; and that for 1915-16, 3,007,915 tons. In 1914-15 there were 177 sugar mills. Rice growing has recently been started. The principal fruits exported were pineapples, bananas, and coconuts.

Cuba's production of rum in 1915 was 696,067 gallons, and in 1914, 420,517 gallons; of alcohol, 2,021,116 gallons in 1915, and 649,722 gallons in 1914.

On December 31, 1915, the live stock in the island consisted of 3,703,928 head of cattle, 720,040 horses, 54,264 mules, and 2,882 asses.

Cuba has forest lands, many of which are in private ownership, but the forests belonging to the State have an area of about 1,250,000 acres. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins, and oils. Cedar is used locally for cigar-boxes, and mahogany is exported. Many other hard woods are used for railway sleepers, carts, ploughs and other local purposes.

In the district of Santiago de Cuba, copper, manganese, and iron mines are worked. The iron mines employ over 4,000 workmen, and supply on an average 50,000 tons of ore per month to the United States. Gold is found but little worked. There are rich beds of asphalt which are not largely worked.

### Commerce.

The value of the imports and exports for 5 years (ending June 30) were as follows:—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports . . .	25,180,448	28,765,374	23,800,282	31,089,644	34,361,811
Exports . . .	34,595,666	33,025,000	35,510,790	50,858,353	60,384,510

The imports and exports were distributed as follows :—

Countries	Imports from		Exports to	
	1914	1915	1914	1915
	Dollars	Dollars	Dollars	Dollars
United States . . . . .	60,304,589	104,723,108	148,263,623	203,164,414
Other American Countries . . . . .	7,981,507	8,022,586	3,180,412	3,356,875
United Kingdom . . . . .	12,379,048	15,287,998	15,811,983	33,033,016
Spain . . . . .	9,957,403	10,817,435	2,768,873	8,021,230
France . . . . .	4,731,822	5,197,110	2,397,539	1,135,404
Germany . . . . .	5,034,119	799,903	2,354,067	7
Total (including all other countries) . . . . .	119,001,410 (23,800,282L.)	155,448,233 (31,089,644L.)	177,553,951 (35,510,790L.)	254,291,763 (50,858,353L.)

The principal exports are sugar and tobacco; in 1915 the one formed 77 per cent. and the other 9·6 per cent. of the total exports. In 1915, sugar was exported to the value of 39,504,200L., and tobacco to the value of 4,882,800L. The principal imports are cotton goods (2,237,181L. in 1915), machinery (2,865,075L. in 1915), and cereals (3,874,756L. in 1915).

Total trade between Cuba and the United Kingdom (Board of Trade returns) for five years :—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Cuba into U.K. . . . .	2,548,153	3,674,896	4,316,842	8,240,109	12,962,092
Exports to Cuba from U.K. . . . .	2,552,913	2,214,3·6	1,594,886	1,781,640	2,069,386

### Shipping and Communications.

In 1913-14, 17,264 vessels entered and 17,285 cleared. British vessels, 268 of 508,050 tons entered the Port of Havana and 266 of 510,639 tons cleared (1912). In Cuba there were, in 1916, 2,359 miles of railway—the United Railways of Havana, 705 miles; Cuba Railroad, 589 miles; Cuban Central Railway, 349 miles, and Western Railway of Havana, 147 miles. The lines now connect the principal towns and seaports from Pinar del Rio in the west, to Santiago de Cuba in the east. The larger sugar estates have private lines connecting them with the main lines. Several important railway extensions are projected. The question of the nationalization of the railways is (1917) under consideration. There are 1,162 miles of cart roads open to traffic. There are (1915) 658 post offices, 226 telegraph offices, and nine wireless stations operated by the Government.

On November 7, 1914, a law was published authorising a new coinage issue in Cuba with a gold peso of 1·6718 grammes (1·5016 grammes fine) as the monetary unit. The gold coins are the 20, 10, 5, 4, 2 and 1 peso pieces; the 20, 10 and 5 pesos pieces are of the same weight and value as the corresponding United States gold coins. Silver is coined in pieces of 1 peso, 40 cents, 20 cents, and 10 cents, while nickel coins of 5, 2, and 1 cent pieces are also issued.

The coinage of gold is unlimited, but silver must not be minted to the value of more than 12,000,000 pesos. The extent of the nickel coinage is to

be determined by the National Executive. The United States coinage will still remain legal tender.

The total amount minted since coinage was first commenced is as follows : gold, 5,200,000 dollars ; silver, 6,237,000 dollars ; and nickel, 648,120 dollars ; making in all 12,085,130 dollars. The recoinage of Spanish and French gold amounted to 9,212,250 dollars. Cuba thus possesses a stock of national coin of all kind and denomination amounting to 21,297,380 dollars, of which 14,412,250 dollars is in gold.

A proposal is under consideration to establish a national bank.

The metric system of weights and measures is in use.

## Diplomatic and Consular Representatives.

### 1. OF CUBA IN GREAT BRITAIN.

*Envoy and Minister*.—General Carlos García Velez (June 11, 1912).

*Secretaries of Legation*.—Miguel Angel Campa, Anselmo Diaz de Villar, and Dr. Calixto J. Whitmarsh.

*Attaché*.—Dr. Luis Mazon

*Consuls in London*.—Gustavo Navarrete.

There is a Consul-General in Liverpool, and Consuls in Birmingham, Glasgow, Hull, and other towns.

### 2. OF GREAT BRITAIN IN CUBA.

*Envoy and Minister*.—Stephen Leech.

*British Vice-Consuls at Havana*.—H. D. R. Cowan and G. F. Plant.

There is a British Consul at Santiago, and Vice-Consuls at Cienfuegos and Cardenas.

## DENMARK.

(KONGERIGET DANMARK.)

### Reigning King.

**Christian X.**, born September 26, 1870; son of King Frederik VIII. and Queen Louisa; married April 26, 1898, to Princess *Alexandrine* of Mecklenburg; succeeded to the throne on the death of his father, May 14, 1912.

#### *Children of the King.*

- I. Prince Christian *Frederik*, born March 11, 1899.
- II. Prince Knud, born July 27, 1900.

#### *Brothers and sisters of the King.*

I. Prince *Karl*, born August 3, 1872; elected King of Norway, under the title of Haakon VII., November 1905; married July 22, 1896, to Princess Maud Alexandra of Great Britain; offspring Prince Alexander (now Crown Prince Olav of Norway), born July 2, 1903.

II. Prince *Harald*, born October 8, 1876; married April 28, 1909, to Princess Helena of Sonderburg-Glücksborg; offspring Princess Feodora, born July 1, 1910; Princess Caroline Mathilde, born April 27, 1912; Princess Alexandrine Louise, born December 12, 1914.

III. Princess *Ingeborg*, born August 2, 1878; married August 27, 1897, to Prince Charles of Sweden.

IV. Princess *Thyra*, born March 14, 1880.

V. Prince *Gustav*, born March 4, 1887.

VI. Princess *Dagmar*, born May 23, 1890.

The crown of Denmark was elective from the earliest times. In 1448, after the death of the last male scion of the Princely House of Svend Estridsen the Danish Diet elected to the throne Christian I., Count of Oldenburg, in whose family the royal dignity remained for more than four centuries, although the crown was not rendered hereditary by right till the year 1660. The direct male line of the House of Oldenburg became extinct with the sixteenth king, Frederik VII., on November 15, 1863. In view of the death of the king without direct heirs, the Great Powers of Europe, 'taking into consideration that the maintenance of the integrity of the Danish Monarchy, as connected with the general interests of the balance of power in Europe, is of high importance to the preservation of peace,' signed a treaty at London on May 8, 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg, and to the direct male descendants of his union with the Princess Louise of Hesse Cassel, niece of King Christian VIII. of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction July 31, 1853.

King Christian X. has a civil list of 1,000,000 kroner. Annuities to other members of the royal house amount to 174,000 kroner.

Subjoined is a list of the Kings of Denmark, with the dates of their accession, from the time of election of Christian I. of Oldenburg:—

#### *House of Oldenburg.*

	A. D.		A. D.
Christian I. . . . .	1448	Christian V. . . . .	1670
Hans . . . . .	1481	Frederik IV. . . . .	1699
Christian II. . . . .	1513	Christian VI. . . . .	1730
Frederik I. . . . .	1523	Frederik V. . . . .	1746
Christian III. . . . .	1533	Christian VII. . . . .	1766
Frederik II. . . . .	1559	Frederik VI. . . . .	1808

*House of Schleswig-Holstein-Sonderburg-Glücksburg.*

Christian IX., 1863.      Frederik VIII., 1906.      Christian X., 1912.

**Constitution and Government.**

The present Constitution of Denmark is founded on the 'Grundlov' (charter) of June 5, 1915. This may in many respects be said to be a further development along the lines laid down in the 'Grundlov' of June 5, 1849, the charter which introduced the Constitution in Denmark. According to the 'Grundlov' of 1915, the executive power is vested in the King and his responsible ministers, and the right of making and amending laws in the Rigsdag, or Diet, acting in conjunction with the sovereign. The King must be a member of the Evangelical Lutheran Church, which is declared to be the religion of the State. The Rigsdag comprises the Folkething and the Landsting, the former being a House of Commons, the latter a Senate. The Folkething consists of 140 members returned in direct elections by universal suffrage for the term of four years. The franchise is enjoyed by all citizens of good reputation, male and female (of an age gradually decreasing from thirty years at present to twenty-five), who are not in receipt of poor-relief. All voters are eligible for election to the House. Of the 140 members the capital has to elect 24 by the list system of Proportional Representation. Outside the capital 92 members are elected in single-member constituencies by simple majority, and furthermore 23 additional seats are to be allotted to candidates of those parties who have obtained less than their proportional share. The additional seats are to be had by those non-elected candidates having received the most votes. One member is elected in the Faroe Islands by simple majority. The Landsting consists of 72 members. The franchise is enjoyed by all electors to the Folkething, of thirty-five years of age, and residing in the electoral district. All former privileges for the largest taxpayers have been abolished by the 'Grundlov' of 1915. The election is indirect and exclusively proportional. Fifty-four of the 72 members are elected by the Andra (Hare) method of Proportional Representation in large electoral districts, mostly embracing 10 to 12 members. The remaining 18 members are to be elected on the principle of Proportional Representation by the members of the outgoing House. Fifty-four members of the Landsting are re-appointed in two sections, each including about 27, and sitting eight years. As for the remaining 18 members, they are all to be elected for the same period of eight years. Both the members of the Landsting and of the Folkething receive payment for their services at the rate of 10 kroner (11s. 1d.) per day. Members must accept payment. They also receive second-class free passes on the railways.

The Rigsdag must meet every year on the first Tuesday in October. To the Folkething all money bills must in the first instance be submitted by the Government. The Landsting, besides its legislative functions, has the duty of appointing from its midst every four years judges who, together with the ordinary members of the Høiesteret, form the Rigsret, a tribunal who can alone try parliamentary impeachments. The ministers have free access to both of the legislative assemblies, but can only vote in that chamber which they are members.

The executive (appointed June 21, 1913), acting under the king as president, and called the State Council—Statsraadet—consists of the following ten departments:—

1 and 2. *The Presidency of the Council and Ministry of Justice.*—Carl Theodor Zahle.

3. *Ministry of Foreign Affairs.*—Erik Scavenius.

4. *Ministry of the Interior.*—Ove Rode.

5. *Ministry of Defence*.—Peter Munch.
6. *Ministry of Finance*.—Edvard Brandes.
7. *Ministry of Public Instruction*.—Sören Keiser-Nielsen.
8. *Ministry of Ecclesiastical Affairs*.—Thorvald Povlsen.
9. *Ministry of Agriculture*.—Kristjan Pedersen.
10. *Ministry of Public Works*.—Jens Hassing Jørgensen.
11. *Ministry of Commerce and Navigation*.—Christopher Hage.
12. *Ministers for Iceland*.—Jon Magnússon, Björn Kristjánsson and Sigúrdur Jonsson.
13. *Ministers without Portfolio*.—J. C. Christensen, C. M. Rottbøll and J. A. M. Stauning.

The ministers are individually and collectively responsible for their acts, and if impeached, and found guilty, cannot be pardoned without the consent of the Folkething.

Landsting, elected 1915 :—24 Right, 24 Left, 4 Socialists, 6 Radicals, 4 Independents, and 4 vacant seats.

Folkething, elected May, 1915 :—42 Left, 27 Radical Left, 32 Socialists 8 Right (Conservatives), and 5 Independents.

For administrative purposes Denmark is divided into 18 counties (Amter), each of which is administered by a Governor (Amtmand). Moreover, the county is a municipal division with a county council superintending the rural municipalities (about 1,200). There are 77 urban municipalities with a mayor and a town council. Rural as well as urban municipal councils are elected direct by universal suffrage and Proportional Representation. Copenhagen forms a district by itself, and has its own form of administration.

The chief of the dependencies of the Crown of Denmark, Iceland, has its own constitution and administration, under a charter which came into force August 1, 1874. By the terms of this charter, modified by two laws of October 3, 1903, the legislative power is vested in the Althing, consisting of 40 members, 34 elected by popular suffrage, and 6 nominated by the king. A minister for Iceland nominated by the king, and residing at Reykjavik is the responsible head of the administration. The offices of the governor and the two Amtmands have been abolished.

### Area and Population.

The following table gives the area and population of Denmark in 1916:—

Divisions	Area 1911 English sq. m.	Population 1916	Population 1916 per sq. m.
City of Copenhagen (Kjöbenhavn) } without suburbs . . . . }	27	506,390	18,015
Islands in the Baltic . . . .	5,117	1,161,163	226
Peninsula of Jutland . . . .	9,898	1,253,809	136
Færoe Islands . . . . .	540	19,617	36
Total . . . . .	15,582	2,940,979	180

The population (excluding the Faeroes) consisted of 1,415,822 males and 1,505,540 females in 1916. The total population at the census of 1916 was 2,921,362, showing an increase during 1911—16 of 1.16 per cent. per annum. In Denmark proper the town population has increased from 1,109,726 in 1911 to 1,209,975 in 1916; while the rural population has increased from 1,647,350 in 1911 to 1,711,387 in 1916. The population

is almost entirely Scandinavian; in 1911, of the inhabitants of Denmark proper, 96·66 per cent. were born in Denmark, 0·07 per cent. were born in the Colonies, 0·15 per cent. in Norway, 1·45 per cent. in Sweden, 0·97 per cent. in Sleswig, 0·47 per cent. in other parts of Germany, and 0·23 per cent. in other foreign countries. The foreign-born population was thus 3·27 per cent. of the whole.

According to the occupation the population of Denmark in 1911 was classified thus:—

Immaterial Production . . . . .	142,233	Day labourers . . . . .	50,416
Agriculture and Forestry . . . . .	969,227	Domestic servants . . . . .	127,745
Dairy work . . . . .	13,996	Capitalists and rural pensioners . . . . .	117,237
Fishing . . . . .	34,489	Public assistance (including the aged) . . . . .	64,707
Business and industry . . . . .	739,058	Profession not indicated . . . . .	39,498
Railways, posts, telegraphs, telephones, Land transports, and navigation . . . . .	163,904		
Commerce, circulation, & hotel-keeping . . . . .	294,566	Total . . . . .	2,757,076

The population of the capital, Copenhagen (Kjöbenhavn), in 1916 was 506,390, or with suburbs, 605,772; Aarhus, 65,858; Odense, 45,303; Aalborg, 38,102; Horsens, 25,149; Randers, 24,428.

The following table gives the total number of births, deaths, and marriages, with the surplus of births over deaths, for three years:—

Years	Total Births (living)	Still Births	Marriages	Deaths	Surplus of Births over Deaths
1913	72,465	1,734	20,460	35,364	37,101
1914	73,294	1,729	19,757	35,919	37,375
1915	70,190	1,773	18,987	37,175	33,015

Of the births in 1913, 11·47 per cent. were illegitimate; in 1914, 11·45; in 1915, 11·67. In 1913 there were 801 divorces; in 1914, 887; in 1915, 878.

Emigrants, chiefly to the United States, 8,846 in 1913; 6,203 in 1914; and 3,302 in 1915.

### Religion.

The established religion of Denmark is the Lutheran, which was introduced as early as 1536. The affairs of the National Church are under the superintendence of seven bishops, the Bishop of Roeskilde being metropolitan. The bishops have no political character. Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

According to the census of 1911 there were 2,732,792 Protestants, 9,821 Roman Catholics (under a Vicar Apostolic resident in Copenhagen), 256 Greek Catholics, 5,164 Jews, 9,043 other or of no confession.

### Instruction.

Elementary education has been widely diffused in Denmark since the beginning of the last century, and in 1814 it was made compulsory. The school age is from 7 to 14. The public schools, maintained by communal rates, are, with the exception of a few middle-class schools, free. Of public elementary schools there are 3,458 (63 in the capital, 156 in other towns, and 3,239 in rural districts), with 896,000 pupils in the year 1915; 5 of these are grammar schools, 77 *Mellemskoler* (middle-class schools), 13 grammar schools are Government schools. Of private schools there are 27 grammar schools and 111 *Mellemskoler*. These 13 Government schools and 138 private schools,

together with other private schools, in 1915 had an attendance of 55,537 pupils. For higher instruction there are furthermore: a veterinary and agricultural college at Copenhagen with 55 professors and teachers and 396 pupils; 19 agricultural or horticultural schools; 70 *folkehøjskoler* or popular high schools (adult schools with about 7,000 pupils); a college of pharmacy (founded 1892) with 9 teachers and 90 students; a school for dentists with 18 teachers and 130 pupils; a Royal academy of arts (founded 1754) with 22 teachers and 303 pupils; a Polytechnic Institution (founded 1829) with 70 professors and teachers and about 900 students. The *folkehøjskoler* are all private, but to them and the agricultural schools the State annually makes a grant of about 28,000*l*. To the grammar and *Mellemskoler* grants are made amounting annually to about 33,000*l*. The University of Copenhagen, founded in 1479, has 5 faculties, to all of which women are admitted on equal terms with men. It has 100 professors and teachers, and about 2,900 students.

### Pauperism and Old Age Pensions.

Ordinary *poor relief* is regulated by the law of April 9, 1891 (and its amendments) under which in 1911, 134,053 (4·84 per cent. of the population) were relieved at a cost of 696,665*l*.

Another law of 1891 concerning *Old Age Pensions* has been extended by enactments of 1902 and 1908 so as to provide for, and to regulate assistance granted to the aged poor. Recipients must be over 60 years of age, of good character, and must have, for the preceding 5 years, had their domicile in the country without receiving public charity. The assistance granted may be in money, or in kind, or by abode in an hospital. It must be sufficient for maintenance and for attendance in case of illness. The estimate of the poverty of the recipient does not include private assistance unless amounting to over 100 kroner (about 5*l*. 13*s*.) a year. The subvention is paid by the commune of domicile and half of it is refunded by the State. For the year ending March 31, 1916, 87,375 persons were relieved, of whom 67,424 were principals and 19,951 dependants. The total expenditure was 987,166*l*, of which one half was expended by the State.

According to a law of 1913 assistance without the loss of civil rights is granted to children living with their widowed-mothers. The expenditure (divided between the municipalities and the State) amounted in 1915–16 to 966,000 kroner.

### Justice and Crime.

The lowest courts of justice in Denmark are those of the hundred or district magistrates (*herredsfogder* and *birkedommere*) and town judges (*byfogder*). From these courts an appeal lies to the superior court (*Overret*), or court of second instance, in Viborg with 9 judges, and in Copenhagen with 20 judges. The Copenhagen superior court, however, is identical with that of the civic magistrates. The supreme court (*Højesteret*) or court of final appeal, with a chief justice, 12 puisne judges, and 11 special judges sits in Copenhagen. Judges under 65 years of age can be removed only by judicial sentence.

In 1914, 3,298 men and 558 women were convicted of crimes and delicts; 46,778 persons were convicted of minor offences. On March 31, 1915, 888 men and 78 women were in the penitentiaries of Denmark.

### Finance.

By the terms of the Constitution of Denmark the annual financial budget called the '*Finanslovsforslag*,' must be laid on the table of the

Folkething at the beginning of each session. As to the annual financial accounts called 'Statsregnskab,' the Constitutional Charter prescribes them to be examined by four paid revisers, two of whom are elected by the Folkething and two by the Landsting. Their report is submitted to both Chambers which, after due consideration, pass their resolution generally to the effect that they have no remarks to make on the balance-sheet.

The following shows the actual revenue and expenditure for the five years ending March 31 and the estimates for 1916-17 (18.16 kroner=1L.):—

Year	Revenue		Expenditure	
	Current	From State Capital	Current	For increase of State Capital
	£	£	£	£
1911-12 . . . .	5,599,453	3,882,400	6,043,866	3,594,775
1912-13 . . . .	6,343,088	4,433,489	5,907,319	4,644,504
1913-14 . . . .	6,881,940	233,838	6,189,136	676,980
1914-15 . . . .	6,765,932	1,971,908	8,673,898	914,323
1915-16 . . . .	7,898,820	4,575,039	10,291,495	1,779,730
1916-17 <sup>1</sup> . . .	9,143,012	990,523	6,664,311	1,110,189

<sup>1</sup> Budget estimates.

The following is an abstract of the Budget for 1917-18:—

Current revenue	Kroner	Current expenditure	Kroner
Balance of domain revenues . . . .	1,272,363	Civil list and appanages . . . .	1,174,000
Balance of State undertakings . . . .	10,762,735	Rigsdag . . . .	808,000
Interest on outstanding debt . . . .	4,691,869	Interest and expenses on State debt . . . .	18,130,604
Balance of funds, etc. . . .	658,004	Council of State . . . .	152,160
Direct and indirect taxes . . . .	142,793,025	Ministry of Foreign Affairs . . . .	1,097,702
Balance of lotteries . . . .	1,509,033	Ministry of Public Worship and Instruction . . . .	18,829,947
Separate revenues . . . .	1,494,067	Ministry of Justice . . . .	10,611,632
		Ministry of Interior . . . .	18,389,402
		Ministry of Agriculture . . . .	4,910,458
		Ministry of War . . . .	16,752,357
		Ministry of Marine . . . .	10,226,000
		Ministry of Finance . . . .	10,330,174
		Ministry of Public Works . . . .	2,050,017
		Ministry of Commerce and Navigation . . . .	1,922,754
		Pensions . . . .	4,920,900
		Iceland . . . .	264,000
		Greenland and West Indies . . . .	58,329
Total revenue . . . .	163,184,696 (9,065,783L.)	Total expenditure . . . .	120,628,437 (6,701,579L.)

In the budget no provision is made for the extraordinary expenses caused by the European War. In 1914-15 the actual expenses for the Ministry of War were 54,344,412 kr.; the Ministry of Marine, 16,290,552 kr.; and in 1915-16, 68,636,113 kr. and 20,374,038 kr. respectively.

An important feature in the administration of the finances of the kingdom is the maintenance of a reserve fund of a comparatively large amount. On March 31, 1911, it was 994,345L.; 1912, 985,789L.; 1913, 869,622L.; 1914, 866,040L.; 1915, 803,576L.; 1916, 675,572L. The object of the reserve fund is to provide means at the disposal of the Government in the event of sudden occurrences.

The public debt of Denmark has been incurred in part by large annual deficits in former years, before the establishment of parliamentary govern-

ment, and in part by railway undertakings and the construction of harbours, lighthouses, and other works of public importance. The following table gives the national liabilities from 1911 to 1916 :—

Year ending March 31	Capital of Debt	Year ending March 31	Capital of Debt
	£		£
1911	18,658,889	1914	19,922,957
1912	19,359,000	1915	21,813,118
1913	19,638,737	1916	25,608,619

The debt is divided into an internal and a foreign. The total foreign debt amounted in 1916 to 14,797,679*l*. The debt is at 3, 3½, and 4 per cent.

The investments of the State on March 31, 1916, including the reserve fund, the State railways, and the domains, amounted to 42,205,886*l*.

The revenue and expenditure, and the property and debt of Copenhagen and of the provincial towns and places and rural communes, were as follows (year ending March 31) :—

—	Revenue	Expenditure	Property	Debt
	£1,000	£1,000	£1,000	£1,000
Copenhagen (1916)	2,982	2,507	14,087	13,012
Provincial Towns and Places (1915)	2,686	2,667	10,610	7,526
Rural Communes (1915)	2,208	2,217	5,131	2,721

### Defence.

The Danish army is a *national militia*, resembling in some respects the Swiss army. Every able-bodied Danish subject is liable to serve in the army or navy, except the inhabitants of Iceland, and the Faroe Islands. Exemptions in Denmark are few, even clergymen having to serve.

Service commences at the age of 20 and lasts for 16 years. For the first 8 the men belong to the active army, and for the second 8 years to the extra, or territorial, reserve. At the time of joining, the recruits are continuously trained for 165 days in the infantry, 280 days in the field artillery, 1 year in the garrison artillery, and 200 days in the cavalry. The engineers have 7 months', and the train 2 months' continuous training. In the case of about one fourth of the men, their initial training is prolonged by periods ranging from 2½ to 8½ months, according to the arm of the service to which they belong. Subsequent training for all arms only takes place once or twice in the remaining six or seven years of army service, and then only for 25 or 30 days on each occasion. The peace strength of the active army is about 820 officers and 12,900 men.

The country is divided into two territorial commands; one including Copenhagen and the first and second Zealand brigades; the other comprising the Funen brigade, and first and second Jutland brigades. There are 15 regiments of infantry each of 3 or 4 battalions making 53 battalions altogether, also 4 regiments of cavalry, 2 regiments of field artillery with 20 four-gun batteries altogether, 4 garrison artillery battalions, and 3 battalions of engineers. The field army would apparently consist of 5 mixed brigades, with a fighting strength of about 50,000 men.

There are two special corps of infantry and garrison artillery, formed from *reservists*, for the defence of Copenhagen and the island of Bornholm.

The Danish infantry is armed with the Krag-Jorgensen magazine rifle, calibre 8 mm. Mounted troops have the Remington carbine. The field artillery has been rearmed with a Krupp gun, firing a 14·88 pound shell.

The War strength of the Danish army in 1914 was 1,600 officers and 83,734 non-commissioned officers and men, and about 13,000 recruits are trained yearly. The military budget for 1916-17 amounts to 980,493*l*.

The Danish fleet is maintained for purposes of coast-defence. It consists of four monitors, *Peder Skram*, *Olfert Fischer*, *Herluf Trolle*, and *Niels Juels*, each carrying a pair of 9·4-inch and 4 6-inch guns; a smaller monitor, *Skjold* (launched 1896), with one 9·4 and three 4·7-inch guns; 2 small cruisers, *Hejmdal* and *Gejser*, 2 minelayers, 6 destroyers and 3 building, 16 torpedo boats; 8 submarines. This is the effective fleet.

It is reinforced by the old battleship *Iver Huitfeldt*, and a small cruiser, the *Valkyrien*, 5 old torpedo boats, and several gunboats.

### Production and Industry.

The soil of Denmark is greatly subdivided, owing partly to the state of the law, which interdicts the union of small farms into larger estates, but encourages, in various ways, the parcelling out of landed property, and leaves the tenant entire control of his land so long as the rent is paid.

Of the total area of Denmark 80 per cent. is productive; about one sixth of the unproductive area is peat bogs. Of the productive area 6 per cent. is forest, and of the remainder less than one half is arable, and the remainder pasture and meadows. The area under the chief crops in 1916, and the production in 1914-1916, were as follows:—

Crops	Area	Production		
	1916	1914	1915	1916
	Acres	Bushels	Bushels	Bushels
Wheat . . . . .	153,507	5,605,981	7,733,000	5,856,000
Barley . . . . .	640,642	20,137,861	25,091,000	21,636,000
Oats . . . . .	1,054,930	37,458,212	41,533,250	40,995,000
Rye . . . . .	486,882	9,578,113	12,597,750	10,246,000
Mixed grain . . . .	462,517	15,910,836	17,781,500	17,135,000
Potatoes . . . . .	160,402	36,179,000	—	—

On February 1, 1917, there were in Denmark proper 538,000 horses (525,785 on May 15, 1915), 2,453,000 head of cattle (2,417,125 on May 15, 1915), 270,000 sheep (533,137 on May 15, 1915), and 1,981,000 swine (1,918,975 on May 15, 1915). On July 15, 1915, there were in addition 15,153,999 hens, 1,020,303 ducks, and 162,123 geese.

In 1914 there were exported 95,710 horses, and 188,858 head of cattle.

According to statistics gathered on May 26, 1914, there are 82,442 industrial factories and shops in Denmark, employing altogether 346,000 persons, of whom 229,000 were skilled labourers. Of the total establishments 15,400 factories used mechanical power. In 1915 there were in Denmark 22 distilleries (Copenhagen 5), whose output of brandy reduced to 100° amounted to 14,622,959 litres. In 1915 there were produced 107,700,000 litres of excisable beer, and 134,800,000 litres small beer, not excisable. In the same year 125,200 tons of beet-sugar were produced at 9 sugar factories, and 52,810 tons of margarine were manufactured at 49 factories.

In the Danish fisheries the total value of the fish caught was, in 1912, 917,824*l.*; 1913, 965,025*l.*; 1914, 960,730*l.*; 1915, 1,473,616*l.*

### Commerce.

The following table shows the value, according to official returns, of the imports and general exports (excluding precious metal) for six years (18.16 kroner = 1*l.*):—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1909	40,279,833	33,782,278	1912	45,417,697	37,893,748
1910 <sup>1</sup>	35,244,900	30,448,600	1913	47,103,420	39,720,800
1911	38,505,000	34,517,000	1914 <sup>2</sup>	44,182,666	48,101,444

<sup>1</sup> From 1910 all goods transhipped are excluded from the figures.

<sup>2</sup> Later figures have not been issued (May, 1917).

The exports of home produce in five years were, in sterling:—1910, 26,965,200*l.*; 1911, 29,552,000*l.*; 1912, 33,151,543*l.*; 1913, 35,098,850*l.*; 1914, 43,345,888*l.*

In 1914 the general imports and exports, and the special imports and exports (imports for consumption and exports of Danish produce or manufacture) were as follows (18.16 kroner = 1*l.*):—

1914	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 kroner	1,000 kroner	1,000 kroner	1,000 kroner
Food substances . . . . .	220,899	184,437	734,399	694,937
Personal and domestic . . . . .	68,936	61,123	12,946	3,878
Fuel . . . . .	68,344	68,263	99	3
Fodder, manure, seeds . . . . .	96,228	93,778	9,985	7,177
Raw products . . . . .	340,811	310,186	110,017	74,231
Total . . . . .	795,288	717,787	867,446	780,226

The principal articles of import and export, with their respective values, were as follows:—

	1913				1914			
	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner
Colonial goods . . . . .	45,681	40,047	15,259	9,306	45,139	39,577	21,258	14,920
Beverages . . . . .	5,670	5,552	2,013	1,819	4,978	4,810	2,215	1,983
Textile manufac- tures . . . . .	59,664	51,796	10,188	1,074	56,219	49,259	10,539	2,422
Metals and hard- ware . . . . .	75,603	71,215	12,786	8,058	71,997	66,868	13,106	7,562
Wood & manu- facture . . . . .	47,858	46,993	2,750	1,722	43,554	42,419	2,940	1,563
Coal . . . . .	60,529	60,413	127	—	50,699	59,633	80	—
Animals . . . . .	10,213	10,042	68,805	68,726	18,302	17,842	161,020	160,534
Provisions, eggs, &c. . . . .	56,150	26,316	490,298	450,418	51,917	23,261	530,254	499,625
Cereals, &c. . . . .	116,844	115,465	14,813	13,370	87,439	86,460	16,967	15,919

The following table shows the distribution of Danish foreign trade :—

Countries	Imports (General)		Exports (General)	
	1913	1914	1913	1914
	Kroner	Kroner	Kroner	Kroner
Germany . . .	328,308,000	264,653,000	178,694,000	301,424,000
United Kingdom . . .	134,562,000	145,137,000	410,418,000	431,605,000
Sweden . . .	71,104,000	83,097,000	31,083,000	37,960,000
Norway . . .	8,755,000	17,475,000	19,300,000	22,843,000
United States . . .	86,979,000	84,292,000	7,853,600	11,661,000
Rest of America . . .	26,030,000	15,914,000	6,641,000	4,112,000
Russia . . .	59,411,000	40,490,000	19,275,000	14,006,000
Holland . . .	21,208,000	22,551,000	4,123,000	2,241,000
Belgium . . .	10,275,000	8,534,000	3,052,000	1,480,000
France . . .	20,935,000	17,512,000	3,342,000	6,415,000
Danish Colonies . . .	13,563,000	13,812,000	7,510,000	8,312,000

The treaties of Commerce and Navigation between Great Britain and Denmark, made in 1661 and 1670 and confirmed in 1814, provide for the 'most favoured nation' treatment.

The values of imports, whether subject to duty or duty-free, and of exports, always duty-free, are determined by the Statistical Department in communication with commercial firms, who state the average values of the various articles of merchandise. The quantities are verified by the Customs authorities. The countries where the goods have been bought and to which they are sold are recorded. The general trade comprehends all imports and exports; the special trade only imports for consumption, and exports of home produce. Usually the Customs authorities easily ascertain whether imports and exports belong to the general or the special trade, but sometimes the amount of imports for home consumption is determined merely by the excess of imports over exports.

The chief imports into and domestic exports from the United Kingdom from and to Denmark in two years (Board of Trade Returns) were :—

Imports into U. K.	1914	1915	Exports to Denmark	1914	1915
	£	£		£	£
Butter . . .	11,038,637	10,221,398	Coal . . .	2,056,678	2,582,261
Eggs . . .	2,546,979	1,863,527	Cottons . . .	580,099	848,973
Bacon . . .	9,936,454	9,128,847	Iron-work . . .	354,306	384,783

Total trade (Board of Trade returns) between Denmark and the United Kingdom for 5 years :—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Denmark to U. K.	22,119,910	23,830,633	25,376,023	22,569,927	21,944,779
Exports to Denmark from U. K.	5,588,892	5,792,257	5,837,553	7,778,962	11,430,010

### Shipping and Navigation.

On December 31, 1915, Denmark (without colonies) possessed 3,666 vessels of 587,556 registered tons in her merchant marine, of which 664 of 432,076 tons were steamers. In 1915, 29,758 vessels of 4,147,585 tons cargo entered the Danish ports from foreign countries, and 30,489 vessels of 1,412,671 tons cleared.

### Internal Communications.

Denmark proper (exclusive of Copenhagen) has (end of 1915) 4,214 miles of road, besides 23,375 miles of by-ways. There are (1915) railways of a total length of 2,475 English miles open for traffic in the kingdom. Of this total, 1,262 English miles belong to the State. The total value of the State railways (road, buildings, cars, etc.) up to March 31, 1915, was 316,546,588 kroner (17,585,921/). The railways have a gauge of 4 ft. 8½ inches, except 128 miles of which the gauge is 3 ft. 3¼ inches.

The Post Office in the year 1915-16 carried 202,581,134 letters and post-cards, and 173,999,390 samples and printed matter. There are 1,187 post-offices. The State telegraphs in 1915-16 carried 4,560,275 messages, of which 1,221,280 were internal; exclusive of 219,732 official telegrams. The length of State telegraph lines (March 31, 1916) was 2,302 English miles; number of offices 186. At the same date the railway telegraphs had 406 offices. On March 31, 1916, the length of telephonic wires of the State and the private companies was 366,403 English miles. In the year 1915-16 there were 308,894,527 telephonic conversations.

### Money and Credit.

On July 31, 1916, the accounts of the National Bank balanced at 405,014,548 kroner. The assets included 140,603,372 kroner in bullion and specie. The liabilities included 270,000,000 kroner note issue, 27,000,000 kroner of capital, and 8,320,144 kroner reserve fund. In Denmark there are about 146 other banks for commercial, agricultural, industrial, and other purposes. On March 31, 1915, there were 513 savings banks, with 1,393,889 depositors, and deposits amounting to 857,976,138 kroner, or about 616 kroner to each account.

The nominal value of the coin minted (including recoinage of worn pieces) in Denmark since 1873 is given as follows:—

Years ending March 31	Gold	Silver	Bronze	Total
	Kroner	Kroner	Kroner	Kroner
1873-1915 . . . . .	100,262,530	28,520,940	2,260,285	140,043,755
1916 . . . . .	10,649,040	2,300,200	143,452	13,092,692
Total . . . . .	119,911,570	30,821,140	2,403,737	153,136,447

### Money, Weights, and Measures.

The monetary unit, the *Krone* of 100 öre, is of the value of 1s. 1½d., or about 18 kroner to the pound sterling.

Gold coins are 20 and 10-kroner pieces. The 20-kroner piece weighs 8·870 grammes .900 fine, and thus contains 8·0645 grammes of fine gold.

The 2-kroner silver piece weighs 15 grammes .800 fine, and thus contains 12 grammes of fine silver. There are also 1 and 2 öre pieces of iron.

The standard of value is gold. Silver is legal tender up to 20 kroner.

The use of the metric system of weights and measures, under the law of May 4, 1907, became obligatory in Denmark in public offices on April 1, 1910, and generally on April 1, 1912.

## ECUADOR.

(REPÚBLICA DEL ECUADOR.)

### Constitution and Government.

The Republic of Ecuador was constituted May 11, 1830, in consequence of a civil war which separated the members of the original Republic of Colombia, founded by Simon Bolivar, by uniting the Presidency of Quito to the Vice-Royalty of New Grenada, and the Captaincy-General of Venezuela, when they threw off the Spanish yoke. Under the present Constitution, promulgated December 23, 1906, the executive is vested in a President, elected for the term of four years, while the legislative power is given to a Congress of two Houses; the first consisting of thirty-two senators, two for each province (chosen for four years), and the second of 48 deputies, on the basis of one deputy for every 30,000 inhabitants, chosen for two years; both elected by adults who can read and write. The Congress meets on the 10th of August of every year at Quito, the capital, without being summoned by the Government. The election of the President takes place in a direct manner by the people. Under the present constitution there is no election for Vice-President. In case of death, or other cause of vacancy in the office of President, he is replaced (1) by the President of the Senate of the Last Congress, and (2) if he should also fail, by the President of the Chamber of Deputies.

*President of the Republic.*—Señor Dr. Alfredo Baquerizo *Moreno*. (Assumed office on September 1, 1916. Born in 1861.)

The President, who receives a salary of 24,000 sucres a year, theoretically exercises his functions through a Cabinet of five ministers (Interior, Foreign Affairs, Public Instruction, Finance and War) who, together with himself, may be impeached by Congress. Each minister receives a salary of 9,800 sucres a year. The President has the power of veto, but if Congress insist on a vetoed bill becoming law, he has no alternative but to give his assent to it. He may summon an Extraordinary Congress for a specified purpose, but he cannot dissolve the Chambers or shorten their sittings.

The Council of State is formed by the President of the Supreme Court of Justice, who presides over it; the Clerk of the Court of Accounts; the five Ministers who can report but not vote; two Senators; two Deputies; and three citizens elected annually by Congress and who, in order to be eligible, must have the qualifications necessary for being a Senator.

By the terms of the Constitution privileges of rank and race are not allowed to exist within the Republic, but this does not include the Chinese, and in recent contracts with the Government provision is generally made that Chinese and Turks are not to be employed. Chinese immigration is restricted. Most of the Indians are virtually in bondage; peonage and debt servitude exists in its worst forms on the landed estates. By an edict of 1896 the Indians are exempted from paying tribute, and are admitted to citizenship.

The Provinces are administered by Governors, appointed by the Government; their subdivisions, or cantons, by political chiefs; and the parishes by political lieutenants. The Galapagos Archipelago is under the administration of a Territorial Chief, whose functions are the same as those of a Provincial Governor.

### Area and Population.

The area of Ecuador is about 116,000 square miles, divided into seventeen provinces. The bulk of the population is Indian; inhabitants

of pure European blood are few; those of mixed blood are estimated at about 400,000. Included in the above statement are the Galapagos or Tortoise Islands, with an area of 2,400 square miles, and a population of about 400.

There are boundary disputes between Ecuador and Colombia, and Ecuador and Peru. Neither has yet been settled.

The population of the Republic (1903) was distributed as follows among the provinces (capitals in brackets):—

Provinces	Population	Provinces	Population
Azuay (Cuenca) . . .	132,400	Loja (Loja) . . .	66,000
Bolívar (Guaranda) . .	43,000	Manabí (Puertoviejo) .	64,100
Cañar (Uzogues) . . .	64,000	Oriente (Archidona) . .	80,000
Carchi (Tulcán) . . .	36,000	Oro (Machala) . . .	32,600
Chimborazo (Riobamba)	122,000	Pichincha (Quito) . . .	205,000
Esmeraldas (Esmeraldas)	14,600	Los Ríos (Babahoyo) . .	32,800
Galapagos (San Cristóbal)	400	Tungurahua (Ambato) . .	103,000
Guayas (Guayaquil) . .	150,000		
Imbabura (Ibarra) . . .	68,000	Total . . .	1,323,900
Leon (Latacunga) . . .	109,600		

Estimated population 1915 : 2,000,000.

The chief towns are the capital, Quito (70,000), Guayaquil (105,000), Cuenca (50,000), Riobamba (18,000), Ambato, Loja, and Latacunga (each about 10,000), Bahía (8,000), Esmeraldas (4,000).

### Religion and Instruction.

According to the Constitution no religion is recognised but the Roman Catholic, which has one archbishop (Quito) and six suffragan bishops. Its income, in substitution for tithes, is annually provided for in the estimates. In 1904 a law was passed and promulgated placing the Church and its property under the control of the State, and forbidding the foundation of new orders or the entrance of foreign religious communities into the country. All members of the Episcopate are required to be Ecuadorian citizens. Civil marriages are obligatory in accordance with regulations prescribed by law of December, 1902.

Public instruction was organised in 1897 and improved in 1912. Primary education is gratuitous and obligatory. Higher education is carried on in the Central University at Quito (founded in the eighteenth century by the Dominicans), which has the faculties of medicine, pharmacy, science, and law; at the Guayas University, in Guayaquil, and at the Azuay University, in Cuenca. The two latter have faculties of medicine, pharmacy, and jurisprudence. There is also a law college at Loja. There are 12 schools for higher education, with (1913) 1228 pupils, and (1913) 1,266 primary schools, with 65,531 pupils. There are commercial and technical schools in Quito and Guayaquil, and, in 1900, English began to be taught in the normal schools, about a dozen American teachers being employed. Now, however, German teachers have replaced the Americans, and the reorganization of education is in the hands of a German Mission, whose members were specially chosen by the German Emperor. They have been in Ecuador since 1914. Total cost of education (1912-13), 122,309*l*.

### Justice and Crime.

The appellate courts are the Supreme Court in Quito, which is the highest tribunal and consists of 5 justices elected by Congress for a term of 6 years. The six superior courts are located at Quito, Guayaquil, Cuenca, Riobamba, Loja and Portoviejo. The first two are composed of 6 judges, the remainder of 3 judges each, all elected by Congress for 6 years. The Court of Accounts is empowered to audit and investigate all public accounts. In the Republics there are 33 cantonal and 359 parochial justices, and 85 solicitors admitted to practice.

### Finance.

Of the total revenue about 70 per cent. is derived from customs duties; 15 per cent. from taxes on cocoa, real estate, white rum, and tobacco; 6 per cent. from salt and the remainder mostly from excise, rents of State property, and the postal department. The revenue and expenditure for recent years are given as follows in sterling (1 sucre = 24*d.*), but the figures are not to be taken as representing the exact state of affairs:—

—	1912	1913	1914	1915 <sup>1</sup> 2	1916 <sup>1</sup> 2	1917
	£	£	£	£	£	£
Revenue	1,997,279	2,012,989	1,630,245	2,099,645	2,099,645	1,612,245
Expenditure	1,994,976	2,150,280	1,900,574	2,076,045	2,076,045	1,610,687

<sup>1</sup> Estimates.

<sup>2</sup> As Congress failed to pass the Budgets for 1915 and 1916, the Budget of 1915 has been re-enacted for each of these years.

The principal items of revenue are: Import duties (612,837*l.* in 1917), export duties (342,060*l.* in 1917), and Stamp duties (51,484*l.* in 1917). The chief items of expenditure are: Government, army and navy, education,

On January 1, 1916, the foreign debt amounted to 3,139,837*l.* and the internal debt to 1,712,749*l.* Ecuador has been in default on her foreign obligation since the opening of the war in Europe, and even in July, 1913, considerable arrears of interest were owing, principally to English creditors.

### Defence.

The Ecuadorian regular army has an establishment of 7,810 officers and men. This force is composed of 13 battalions of infantry, 1 regiment of cavalry, and 12 batteries of artillery, besides some departmental troops which form the active army. The reserve army is not as yet organised, although there is a law regulating recruits and reserves, but it has not been put in force. The regular infantry have the Mauser rifle; the artillery have old-fashioned Krupps. Military service is supposed to be obligatory from 18 to 32 years of age in the army, and from 32 to 45 in the national guard.

The Navy consists of three vessels, the *Libertador Bolivar*, a torpedo gunboat of 800 tons, the *Cotopaxi*, an old destroyer, the *Tarqui*, and *La Patria*.

### Production and Industry.

Ecuador is divided into two agricultural zones: the coast regions and the lower river valleys, where tropical farming is carried on; and the hill country, the foothills, and the high mountain valleys, adapted to grazing, dairying, and the production of hay, grain, and the fruits and vegetables of temperate climes. The staple produce of Ecuador is cocoa, which is

grown in Los Rios and other provinces near the coast. The total production of cocoa in 1914 amounted to 92,213,874 lbs. valued at 1,438,536*l*. The largest cocoa estate in the country has been taken over by an English company. Coffee is also grown; the exports were 4,850,088 pounds, valued in 1913 at 100,074*l*. Rubber plantations have been formed in the Balzar and Tenguel districts and in Manabí and Esmeraldas, with more than a million trees. The rubber exports in 1913 amounted to 35,751*l*. But rubber is rapidly declining on account of the destructive methods employed in its collection. Other products are tagua (ivory nuts), exports 1913, 423,606*l*.; tobacco, the annual yield of which is about 3,000 pounds; and sugar. Mangrove bark (for tanning), alligator skins, and kapok (silk cotton tree fibre, *Bombax ceiba*) are exported in small quantities.

Ecuador is auriferous, but mining companies have had little success. At Pillzhum in Cañar rich silver ore is found, but is not now worked. Petroleum is found; the oil-fields of Santa Elena are being worked by two British Companies. The country is known to be also rich in copper, iron, lead and coal; and sulphur exists in great quantities in the Chimborazo district and in the Galapagos Islands.

Excepting the inter-Andean plateau and a few arid spots on the Pacific coast, Ecuador is a vast forest. Roughly estimated, 10,000 square miles on the Pacific slope extending from the sea to an altitude of 5,000 feet on the Andes, and the Amazon Basin below the same level containing 80,000 square miles, nearly all virgin forest, are rich in dyewoods, cinchona trees, and other valuable timber.

Panama hats are made almost exclusively in Ecuador, the principal centres being Monticristo, Jipijapa and Cuenca. The value of exports of hats in 1913, 225,501*l*. The Government of Ecuador attempted to monopolise the hat business for its own people by placing a heavy export duty on "paja toquilla," but large quantities of the material still go to Peru; and Payta, Peru, where little "toquilla" is grown, is a strong competitor of Ecuador in the manufacture of Panama hats. There are flour mills, 13 sugar works, breweries, and chocolate factories.

### Commerce.

The value of imports and exports for five years is given as follows in sterling (10 sucres = £1):—

	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports .	2,364,013	2,130,568	1,752,517	1,666,471	1,730,070
Exports .	2,807,046	2,743,573	3,131,413	2,590,424	2,653,306

In 1915 the chief exports were cocoa, 1,993,814*l*.; tagua, or ivory nuts, 108,147*l*.; hats, 97,069*l*.; coffee, 95,185*l*.; hides, 59,429*l*.; rubber, 40,350*l*. Of the imports in 1915, the value of 659,253*l*. was from the United States; 688,774*l*. from Great Britain; 10,441*l*. from Germany; 50,678*l*. from France.

The chief articles of import from Ecuador into Great Britain in 1914 consisted of cocoa of the value of 633,441*l*.; coffee, 8,671*l*.; straw hats, 67,083*l*. The chief exports of British produce to Ecuador in 1914 were cotton goods, to the value of 205,132*l*.; woollens, 42,651*l*.; iron, wrought and unwrought, 27,818*l*.

Total trade between Ecuador and the United Kingdom for five years (according to Board of Trade returns):—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Ecuador into U.K. .	421,093	467,737	766,069	969,173	1,018,848
Exports to Ecuador from U.K. .	555,093	414,641	434,955	422,794	493,171

### Shipping and Internal Communications.

Communications by sea, especially with Peru and the South, has been considerably interfered with not only on account of the war, but owing to quarantine regulations made in Peru consequent on the recrudescence of Yellow Fever in Guayaquil. In 1915 there entered at Guayaquil 188 vessels of 321,643 tons (121,934 tons British), and cleared 190 vessels of 328,533 tons (127,761 tons British). Guayaquil is visited by the steamers of three European lines passing through Magellan's Straits, as well as by steamers plying only on the Pacific coast.

The roads of the country are mostly bridle-roads only, and often impassable for half the year. The one highway is from Quito towards Guayaquil, for a distance of 115 miles, but the work of thus connecting the capital and the port has long been discontinued. There is river communication throughout the principal agricultural districts on the low grounds to the west of the Cordillera by the rivers Guayas, Daule, and Vinces (navigable for 200 miles by river steamers in the rainy season), and other small affluents thereof. Navigation of these inland waters is carried on by about 17 American and Ecuadorian-built side-wheel and screw steamers, 20 steam yachts or tow-ferry boats, many small steam launches, and a large fleet of gasoline launches, canoes, and other small craft.

A railway is open from Duran (opposite Guayaquil) to Quito. Length of line about 280 miles (1915). The journey from Guayaquil to Quito takes two days, with a stop at Riobamba where the passengers spend the night; 12 hours trip first day and 9 hours second day. Railways for the development of local trade have been undertaken by several local authorities.

The total length of telegraph line (1915) is about 4,360 miles, Quito being connected with Guayaquil and the coast, with the Republics of Colombia and Peru, and by cable with the rest of the world. There are 204 telegraph stations through which 400,000 messages were sent. In 1915 there were 2,926 telephone instruments in Ecuador (2,250 in Guayaquil) and 2,815 miles of wire. Wireless telegraphy has been installed. At present there are only in operation two stations in Guayaquil. Further stations are projected at Puna, Puerta, Bolivar and Bahia.

On January 1st, 1915, there were 194 post offices in the country, handling 5,480,951 pieces of postal matter.

### Money and Credit.

Ecuador having no mint, the coin of the country is minted in England, the United States, and Peru.

There are three banks authorised to issue notes for circulation, viz., the Banco del Ecuador, capital 3,000,000 sucres, the Banco Comercial y Agrícola, capital 5,000,000 sucres, and the Banco del Pichincha. On December 31, 1914, the Banco del Ecuador had a bank-note issue of 244,715*l.* and the Government owed it 301,007*l.*; the Banco Comercial had a note issue of 599,273*l.* and the Government debt to it totalled 602,211*l.*; and the Banco del Pichincha had a note issue of 178,193*l.* and a Government debt of 20,075*l.*

Other banks are the Banco Hipotecario, with a capital of 1,000,000 sucrés, and the Banco Territorial, with a capital of 750,000 sucrés. These are only mortgage loan banks. The Commercial Bank of Spanish America has a branch established in Guayaquil, and, besides doing a foreign exchange business, also exports products of the country and imports merchandise from Europe.

### Money, Weights and Measures.

A law passed in 1898 provided for a gold standard, which was established on June 4, 1900. The new coinage consists of: the gold *condor* of 10 sucrés weighing 8.136 grams, and containing 7.3224 grams of fine gold (equivalent to the English sovereign), the silver *sucré* and its sub-divisions, and nickel and copper pieces. The *sucré*, so called from the likeness of Marshal Sucre (a former President) imprinted on the coin, is legal tender only up to 10 sucrés.

By a law of December 6, 1856, the French metrical system of weights and measures was made the legal standard of the Republic; but is not adopted by commerce. The quintal is equivalent to about 101 pounds.

### Diplomatic and Consular Representatives.

#### 1. OF ECUADOR IN GREAT BRITAIN.

*Minister*.—Don Enrique Dorne y de Alúas. (Resides in Paris.) Appointed 1916.

*Secretary*.—Gonzalo Zaldumbide.

*Attaché*.—R. Coronel.

*Consul-General*.—A. Zaldumbide (London).

#### 2. OF GREAT BRITAIN IN ECUADOR.

*Envoy Extraordinary and Minister Plenipotentiary*.—E. A. Rennie, M. V. O. (who is also Minister at Lima, Peru, where he resides).

*Chargé d'Affaires and Consul-General in Quito*.—L. J. Jerome.

*Consul at Guayaquil*.—H. W. Wilson.

### Statistical and other Books of Reference concerning Ecuador.

## FRANCE.

### Constitution and Government.

#### I. CENTRAL.

SINCE the overthrow of Napoleon III. on September 4, 1870, France has been under a Republican form of government, confirmed on February 25, and July 16, 1875, by a constitutional law, which has been partially modified in June, 1879, August, 1884, June, 1885, and July, 1889. It vests the legislative power in the Chamber of Deputies and the Senate, and the executive in the President of the Republic and the Ministry.

The President is elected for seven years, by an absolute majority of votes, by the Senate and Chamber of Deputies united in a National Assembly, or Congress. He promulgates the laws voted by both Chambers, and ensures their execution. He selects a Ministry from the two Chambers, but may, and sometimes does, choose ministers who are not members of either Chamber (*e.g.* a general as Minister for War, an admiral as Minister of Marine, a civilian as Minister for Foreign Affairs); he appoints to all civil and military posts, has the right of individual pardon, and is responsible only in case of high treason. The President concludes treaties with foreign Powers, but treaties which affect the area of France or of French colonies must be approved by the Legislature, and he cannot declare war without the previous assent of both Chambers. Every act of the President has to be countersigned by a Minister. With the consent of the Senate he can dissolve the Chamber of Deputies. In case of vacancy, the two Chambers united immediately elect a new President.

*President of the Republic.*—M. Raymond Poincaré; born 1858; elected President, January 17, 1913.

The Ministers or Secretaries of State, the number of whom varies, are usually, but not necessarily, members of the Senate or Chamber of Deputies. The President of the Council (Premier) chooses his colleagues in concert with the President of the Republic. Each Minister has the direction of one of the great administrative departments and each is responsible to the Chambers for his acts, while the Ministry as a whole is responsible for the general policy of the Government.

The Ministry consists of the following members, appointed March 20, 1917 :—

*Prime Minister and Minister of Foreign Affairs.*—M. Ribot (Senator).

*Minister of Justice.*—M. René Viviani (Deputy).

*Minister of the Interior.*—M. Malvy (Deputy).

*Minister of War.*—M. Painlevé (Deputy).

*Minister of Marine.*—Admiral Lacaze.

*Minister of Finance.*—M. Thierry (Deputy).

*Minister of Colonies.*—M. Maginot (Deputy).

*Minister of Public Instruction.*—M. Steeg (Senator).

*Minister of Public Works.*—M. Desplas (Senator).

*Minister of Commerce, Industry, and Posts and Telegraphs.*—M. Clémentel (Deputy).

*Minister of Agriculture.*—M. Fernand David (Deputy).

*Minister of Labour.*—M. Léon Bourgeois (Senator).

*Minister of Supplies.*—M. Viollette (Deputy).

*Minister of Munitions.*—M. Albert Thomas (Deputy).

The War Committee of the Cabinet consists of MM. Ribot, Thomas, Painlevé, Thierry, Maginot, and Admiral Lacaze.

The following is a list of the Sovereigns and Governments of France, from the accession of the House of Bourbon :—

<i>House of Bourbon.</i>		<i>Second Republic.</i>	
Henri IV. . . . .	1589-1610	Provisional Government, Feb—Dec. . . . .	1848
Louis XIII., 'le Juste' . . . .	1610-1643	Louis Napoléon . . . . .	1848-1852
Louis XIV., 'le Grand' . . . .	1643-1715		
Louis XV. . . . .	1715-1774	<i>Second Empire.</i>	
Louis XVI. (died 1793) . . . .	1774-1792	Napoléon III. (died 1873) . . .	1852-1870
<i>First Republic.</i>		<i>Third Republic.</i>	
Convention . . . . .	1792-1795	Government of National Defence . . . . .	1870-1871

The Chamber of Deputies is elected for four years, by manhood suffrage, and each citizen 21 years old, not actually in military service, who can prove a six months' residence in any one town or commune, and not otherwise disqualified, has the right of vote. Deputies must be citizens and not under 25 years of age. The manner of election of Deputies has been modified several times since 1871. The *scrutin de liste*, under which each elector votes for as many Deputies as the entire department has to elect, was introduced in 1871. In 1876 it was replaced by the *scrutin d'arrondissement*, under which each department is divided into a number of *arrondissements*, each elector voting for one Deputy only; in 1885 there was a return to the *scrutin de liste*, in 1889 the uni-nominal vote was reintroduced. In 1889 it was enacted that each candidate is bound to make, within the fortnight which precedes the elections, a declaration as to his being a candidate for a given constituency, and for one constituency only—all votes which eventually may be given for him in other constituencies being reckoned as void. Multiple elections and elections of persons previously condemned by the law courts are thus rendered impossible. The Chamber verifies the powers of its members. In each constituency the votes are cast up and the Deputy proclaimed elected by a commission of Councillors-General appointed by the prefect of the department. The Chamber is now composed of 602 Deputies; each *arrondissement* elects one Deputy, and if its population is in excess of 100,000, it is divided

into two or more constituencies. In 1901 there were 10,863,421 inscribed electors; in 1898 there were 10,231,532, and 7,657,429 voted.

Chamber of Deputies, elected May 10, 1914 :—Organised Radicals, 136, Democratic Left, 102, Organised Socialists, 102, Alliance Démocratique, 100, Progressionists and Federated Republicans, 54, Action Libérale, 34, Independent Socialists, 30, Right, 26, Independent, 18, making a total of 602.

The Senate is composed of 300 members, elected for nine years from citizens 40 years old, one-third retiring every three years. The election of the Senators is indirect, and is made by an electoral body composed (1) of delegates chosen by the Municipal Council of each commune in proportion to the population; and (2) of the Deputies, Councillors-General, and District Councillors of the department. Besides the 225 Departmental Senators elected in this way, there were, according to the law of 1875, 75 Senators elected for life by the united two Chambers; but by the Senate Bill of 1884 it was enacted that vacancies arising among the Life Senatorships would be filled by the election of ordinary nine-years Senators, the department which should have the right to the vacant seat to be determined by lot. The Princes of deposed dynasties are precluded from sitting in either House.

The Senate and Chamber of Deputies assemble every year on the second Tuesday in January, unless a previous summons is made by the President of the Republic, and they must remain in session at least five months out of the twelve. The President is bound to convoke them if the demand is made by one-half of the number of members composing each Chamber. The President can adjourn the Chambers, but the adjournment cannot exceed the term of a month, nor occur more than twice in the same session.

Bills may be presented either in the Chamber or Senate by the Government, or on the initiative of private members. In the first case they are remitted to the bureaux for examination; in the second, they are first submitted to a commission of parliamentary initiative. Financial laws must be first presented to and voted by the Chamber of Deputies.

The Senate, constituted as a High Court of Justice, tries cases of attempt against the safety of the State or of plotting to change the form of government.

Senators and Deputies are paid 15,000 francs (600*l.*) a year from January 1, 1907, and the Presidents of the two Chambers receive, in addition, 72,000 francs (2,840*l.*) for the expense of entertainment. Members of both Chambers travel free on all railways by means of a small annual payment. The dotation of the President of the Republic is 600,000 francs (24,000*l.*), with a further allowance of 600,000 francs for his expenses. On January 1, 1905, a fund was instituted for pensions to ex-Deputies, or their widows and orphans. It is supported by contributions from Deputies (deducted from their pay) as well as by gifts and legacies.

France has, besides, a special institution under the name of *Conseil d'État*, which was introduced by Napoleon I., and has been maintained since. It is presided over by the Minister of Justice or (in his absence) by a vice-president, and is composed of Councillors, Masters of Requests (*Maîtres des Requêtes*), and Auditors, all appointed by the President of the Republic. Its duty is to give opinion upon such questions, chiefly those connected with administration, as may be submitted to it by the Government. It is judge in the last resort in administrative suits, and it prepares the rules for the public administration.

## II. LOCAL GOVERNMENT.

For administrative purposes France is divided into 86 departments, or 87 if the 'territory of Belfort' (remnant of the department of Haut-Rhin) be considered as a separate department. Since 1881 the three departments of Algeria are also treated, for most purposes, as part of France proper. The department has representatives of all the Ministries, and is placed under a Prefect, nominated by Government, and having wide and undefined functions. He is assisted by a Prefecture Council, an administrative body, whose advice he may take without being bound to follow it. The Prefect is a representative of the Executive, and, as such, supervises the execution of the laws, issues police regulations, supplies information on matters which concern the department, nominates subordinate officials, and has under his control all officials of the State. There is a Sub-Prefect in every *arrondissement*, except in those containing the capitals of departments and the department of the Seine.

The unit of local government is the *commune*, the size and population of which vary very much. There were, in 1911, 36,241 communes. Most of them (31,873) have less than 1,500 inhabitants, and 19,269 have even less than 500; while 134 communes only have more than 20,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 10 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 4 years by Frenchmen after 21 years and 6 months' residence; but each act of the Council must receive the approval of the Prefect, while many must be submitted to the Council General or even to the President of the Republic, before becoming lawful. Even the commune's quota of direct taxation is settled by persons (*répartiteurs*) chosen by the Prefect from among the lists of candidates drawn up by the Municipal Council.

Each Municipal Council elects a Mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the Prefect.

In Paris the Municipal Council is composed of 80 members; each of the 20 *arrondissements* into which the city is subdivided has its own Mayor. The place of the Mayor of Paris is taken by the Prefect of the Seine, and, in part, by the Prefect of Police. Lyons has an elected Mayor, but the control of the police is vested in the Prefect of the department of the Rhone.

The next unit is the *canton* (2,915 in France), which is composed of an average of 12 communes, although some of the largest communes are, on the contrary, divided into several cantons. It is a seat of a justice of the peace, (*juge de paix*) but is not an administrative unit.

The district, or *arrondissement* (362 in France), has an elected *conseil d'arrondissement*, with as many members as there are cantons, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General. That body stands under the control of the Sub-Prefect. A varying number of *arrondissements* form a department, which has its *conseil général* renewed by universal suffrage to the extent of one-half every three years (one Councillor for each *canton*). These *conseils* deliberate upon all economical affairs of the department, the repartition of the direct taxes among the *arrondissements*, the roads, normal schools, and undertakings for the relief of the poor. Their decisions are controlled by the Prefect, and may be annulled by the President of the Republic.

## Area and Population.

## I. PROGRESS AND PRESENT CONDITION.

The legal population at the date of the last two enumerations was :—

Departments	Area : Engl. sq. miles	Population		Population 1 square mile 1911.
		March, 1906	March, 1911	
Ain . . . . .	2,248	345,856	342,482	153·8

Between the years 1811 and 1820 the average annual surplus of births over deaths was 5.7 per thousand of population; between 1851 and 1860 it was 2.4; and between 1881 and 1885 it was 1.6. The average number of births per marriage was (1881-85) about 3; in 1891 it was 2.1.

In the following table, the third, fourth, and fifth columns give [in brackets] for the first five censuses the population, its density, and its average annual increase *on the present territory of France*, and are thus comparable with the data for the censuses posterior to the loss of Alsace and Lorraine.

Dates	Area : sq. miles	Domiciled Population	Inhabitants per sq. mile	Annual Increase per 10,000 inhabitants
1801	207,765	27,349,003 [26,930,756]	131 [130]	—
1821	—	30,461,875 [29,871,176]	146 [144]	57 [55]
1841	—	34,230,178 [33,400,864]	164 [161]	62 [58]
1861	212,659	37,386,313 [35,844,902]	176 [173]	37 [36]
1866	—	38,067,064 [36,495,489]	178 [176]	40 [36]
1872	207,054	36,102,921	174	—96 <sup>1</sup> [—17]
1876	—	36,905,788	178	54
1881	—	37,672,048	182	41
1886	—	38,218,903	184	29
1891	—	38,342,948	185	6·5
1896	—	38,517,332	186	4·5
1901	—	38,961,945	188	—
1906	—	39,252,267	189	—
1911	—	39,601,509	189	—

<sup>1</sup> Decrease.

In 1911, the foreign nationalities most numerous represented were : English, 40,378 ; Belgians, 287,126 ; Germans, 102,271 ; Austrians, 14,681 ; Swiss, 73,422 ; Italians, 419,234 ; Spaniards, 105,760 ; Russians, 35,016 ; total, 1,159,835.

The active population of 1911 was returned under the following occupations : Fisheries, 55,000 ; agriculture and forestry, 8,517,000 ; mines and quarries, 246,000 ; manufacturing industries, 5,746,000 ; transport, &c., 1,543,000 ; commerce, 2,053,000 ; liberal professions, 550,000 ; domestic service, &c., 929,000 ; public service (including the army), 1,292,000 ; total, 20,931,000, of whom 7,719,000 were of the female sex.

## II. MOVEMENT OF THE POPULATION.

### *Births, Deaths, and Marriages.*

Year	Marriages	Living Births	Illegitimate Living Births	Deaths	Surplus of Births over Deaths	Still-born
1910	307,710	774,390	66,978	702,972	+71,418	36,009
1911	307,788	742,114	—	776,983	—34,869	33,840
1912	311,929	750,651	—	692,740	+57,911	34,312
1913	298,760	745,539	—	703,638	+41,901	34,119
1914 <sup>1</sup>	169,011	594,222	—	647,549	—53,327	26,551
1915 <sup>1</sup>	—	382,466	—	646,301	—261,285	—

<sup>1</sup> For 1914 the figures are for 77 departments only, and for 1915 for 76 departments.

In 1913 the average birth rate for all France (living births) was 1·88 per cent. of population. The departments in which the rate was highest were Pas-de-Calais, 2·66 per 100 ; Finistère, 2·59 per 100 ; Morbihan, 2·48 per 100. It was lowest in Gers, 1·29 ; and Lot-et-Garonne, 1·34. The marriage rate in 1913 was 1·51 per cent., and the death rate 1·75. In 1910 the living births comprised 395,669 male and 378,721 female births, or 1,046 male to 1,000 female.

The number of divorces was 12,975 in 1910, 13,058 in 1911, 14,579 in 1912, 15,076 in 1913, and 7,884 in 1914.

### III. PRINCIPAL TOWNS.

The following towns, according to the census of 1911, have each a total population over 35,000 :—

Paris . . . 2,888,110	Rennes . . . 79,372	Lorient . . . 49,039
Marseille . . . 550,619	Grenoble . . . 77,438	Caen . . . 46,934
Lyon . . . 523,796	Dijon . . . 76,847	Clichy . . . 46,676
Bordeaux . . . 261,678	Tours . . . 73,398	Bourges . . . 45,735

On March 5, 1911, the urban population was 17,508,940, and rural 22,093,318.

In 1911 the number of communes and the resident population were as follows :—

Communes with Population	Number 1911	Population 1911
Not over 500 . . . . .	19,270	5,138,621
501- 1,000 . . . . .	9,409	6,505,288
1,001- 2,000 . . . . .	4,845	6,677,471
2,001- 3,000 . . . . .	1,260	3,044,441
3,001- 4,000 . . . . .	512	1,760,004
4,001- 5,000 . . . . .	276	1,246,602
5,001- 10,000 . . . . .	371	2,537,425
10,001- 20,000 . . . . .	164	2,315,820
20,001- 30,000 . . . . .	54	1,323,111
30,001- 50,000 . . . . .	41	1,555,783
50,001-100,000 . . . . .	24	1,720,397
Over 100,000 . . . . .	15	5,777,295
Total . . . . .	36,241	39,602,258

For fiscal and electoral purposes the population of each commune is divided into *agglomerated*, *scattered*, and *separated (comptée à part)*; the first two constitute the municipal population, and the third consists of garrison, college, prison, and hospital population. Different from this is the distinction between urban and rural population, a commune being

urban where the agglomerated population is over 2,000, and rural where under 2,000.

### Religion.

No religion is now recognised by the State.

Under the law promulgated on December 9, 1905, the Churches were separated from the State, the adherents of all creeds were authorised to form associations for public worship (*associations cultuelles*), and the State, the Departments and the Communes were relieved from payment of salaries. As transitory measures, ecclesiastics over 45 years of age and of over 25 years of service remunerated by the State were entitled to a pension, and all other ecclesiastics were to receive a grant during a period of from four to eight years. All buildings actually used for public worship and as dwellings in that connection were to be made over, after an inventory was taken, to the associations for public worship: the places of worship for the total period of the existence of these associations, the ecclesiastical dwellings for a time.

The law of January 2, 1907, provides (among other things) that, failing *associations cultuelles*, the buildings for public worship, together with their furniture, will continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion; but, in each case, there is required an administrative act drawn up by the *préfet* as regards buildings belonging to the State or the Departments, and by the *maire* as regards buildings belonging to the Communes. Forms of the documents necessary under the new law have been supplied by the Government.

There are 17 archbishops and 67 bishops of the Roman Catholic Church in France, not including Algeria or the colonies. The Protestants of the Augsburg Confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is at Paris.

The Associations law, passed July 1, 1901, requires religious communities to be authorised by the State, and no monastic association can be authorised without a special law in each particular case. Before the passing of that law there were 910 recognised associations, and 753 not recognised; the establishments, mostly not recognised, numbered 19,514, and their members 159,628 (80,136 men and 129,492 women). After the passing of the law, of the 753 associations not recognised, 305 dissolved themselves and 148 asked for authorisation, which was refused by the Chambers to the majority of them.

### Instruction.

The Minister of Instruction, seconded by the Government educational bureaux and inspectors-general, directs public and controls private schools. The Superior Council of 58 members has deliberative, administrative, and judiciary functions, and a Consultative Committee advises respecting the working of the school system, but the inspectors-general are in direct communication with the Minister. For local educational administration France is divided into 17 circumscriptions, called Academies, each of which has an Academic Council whose members comprise a certain number elected by the professors or teachers. The Academic Councils deal with all grades of instruction. Each is under a Rector, and each is provided with academy inspectors, one for each department except Nord which has two (one being for primary instruction), and Seine which has eight (one being director of primary instruction), besides primary inspectors of schools, usually one for each *arrondissement*, 20 inspectors (male or female) for the department of the Seine. Each department has a council for primary educational matters,

the prefect being president, and this body has large powers with respect to the inspection, management and maintenance of schools and the opening of free schools.

Since 1878 primary instruction has been entirely reorganised and great progress has been made. The law of August 9, 1879, rendered obligatory for each department the maintenance of two primary normal schools, one for school-masters, the other for school-mistresses; there are two higher normal schools of primary instruction: one at Fontenay-aux-Roses for professors for normal schools for school-mistresses, the other at St. Cloud for professors for normal schools for school-masters. The law of June 16, 1881, made instruction absolutely free in all primary public schools; that of March 28, 1882, rendered it obligatory for all children from 6 completed to 13 years of age. The law of October 30, 1886, is the organic law of primary instruction now in force; it established that teachers should be lay; for infant schools it substituted *écoles maternelles* instead of *salles d'asile*; it fixed the programmes of instruction, and established freedom of private schools under the supervision of the school authorities. The laws of July 19, 1889, and July 25, 1893, March 1 and Dec. 30, 1903, and April 22, 1905, determined the payment of the teachers, who are nominated by the préfet on the recommendation of the Academy inspector under the authority of the minister, and who (except in towns of more than 150,000 inhabitants) are paid directly by the State, which itself receives the eight 'additional centimes' for primary instruction, formerly collected on behalf of the communes and departments.

The following table shows the condition of primary instruction in 1911-12 and 1912-13.

France and Algeria.				
Description of Schools	1912-13	1913-14 <sup>5</sup>

<sup>1</sup> Masters. <sup>2</sup> Mistresses. <sup>3</sup> Boys. <sup>4</sup> Girls.				
<sup>5</sup> Excluding the occupied departments.				

In the infant schools the number of pupils was 753,708 in 1901-02; and 608,319 in 1912-13 owing to the closing of many clerical private infant schools.

The pupils of superior public primary schools and of supplementary courses (which are comprised in the total of pupils of primary instruction) were (public and private schools) in 1901-02 68,611 (40,644 boys and 27,967 girls), and in 1912-13 106,564 (56,005 boys and 50,559 girls).

Courses of instruction for adults are conducted in the evening by teachers in their schools, and the number of adult pupils was estimated in 1911-12 at 52,797, and for 1912-13, 54,493. Besides, there are many popular lectures.

Pupils on leaving primary schools can obtain a certificate; in 1913 212,934 pupils (112,252 boys and 100,682 girls) obtained the certificate of primary instruction, and 6,397 pupils (3,924 boys and 2,473 girls) that of higher primary instruction. In 1913, 2·5 per cent. of the conscripts could neither read nor write, as compared with 2·9 per cent. in 1912. In 1910 2·1 per cent. of the men married and 3·2 per cent. of the women signed the register with a cross.

In 1913 there were granted 7,237 elementary licences (brevets élémentaires) to school-masters and 16,180 to school-mistresses; 1,753 higher licences to masters, and 4,697 to mistresses (brevets supérieurs); 1,922 certificates of *pædagogic* efficiency to masters, and 3,485 to mistresses.

The number of primary normal schools (exclusive of Fontenay and St. Cloud) is 84 for school-masters, and 82 for school-mistresses (France and Algeria). The number of pupil-teachers in primary normal schools in 1913-14 was 4,650 men and 4,863 women.

The cost of public primary instruction was: in 1877 for France, 89½ million francs (over 3½ millions sterling) of which 22 millions (or 880,000*l.*) from the State; in 1897 for France and Algeria, 200 millions (8 millions sterling) of which 130 millions (or 5½ millions sterling) from the State. In 1913 the cost to the State was about 225 million francs, or 10½ millions sterling, exclusive of 10 millions for the cost of school building.

*Secondary Instruction: Boys.*—Secondary instruction is supplied in two types of schools—by the State in the lycées, and by the communes in the colleges, by associations and by private individuals in free establishments (*écoles libres*). The course of study extends over 7 years, 4 in the first cycle, and 3 in the second, with four different courses of study; 1, Latin, Greek; 2, Latin, sciences; 3, Latin, living languages; 4, sciences, living languages.

The number of public secondary schools for boys and the number of pupils for 3 years were as follows:—

Public Institutions: France and Algeria	1913		1914 <sup>1</sup>		1915 <sup>1</sup>	
	No.	Pupils	No.	Pupils	No.	Pupils
<i>Lycées</i>	112	62,579	104	48,092	104	53,028
Communal colleges.	231	37,324	211	29,719	211	28,608

<sup>1</sup> Excluding the occupied departments.

In the *lycées* 74·4 per cent. of the boys received secondary instruction, 25·6 per cent. were in the elementary or primary classes. In the colleges there were 13,545 boarders and 23,779 day-pupils, the proportions were 58·7 per cent. in the secondary classes properly so-called, 28·1 per cent. in the elementary, preparatory and infant classes, and 13·2 per cent. in the agricultural, commercial and industrial classes.

*Girls.*—The following table shows the condition of the institutions for girls:

Institutions	1914		1915		1916	
	No.	Pupils	No.	Pupils.	No.	Pupils
<i>Lycées</i> (France) .	52	14,917	52	18,056		19,635
Colleges (France and Algeria) .	70	7,843	75	9,708	52	10,876
Secondary courses (France and Algeria) .	47	3,773	48	4,636	75	5,225
Total . . .	169	26,533	175	32,400	174	35,736

In 1912 the expenditure of the *lycées* for boys amounted to 44·7 millions francs; that of the *lycées* for girls to 5·5 millions; nearly 5 millions was devoted to scholarships and prizes to *lycées* for boys and girls. In Paris and a number of provincial towns there are courses of secondary instruction for girls, either private or organised by the communes. Secondary instruction is also given to girls in a great number of day schools and boarding schools, lay and clerical. Many of the clerical institutions for girls as well as for boys have been transformed into lay institutions.

*Higher Instruction* is supplied by the State in the universities and in special schools, and by private individuals in the private faculties and schools. The freedom of higher instruction was established by the law of July 12, 1875, modified by that of March 18, 1880, which reserved to the State faculties the exclusive right to confer degrees. A decree of December 28, 1885, created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of July 10, 1896.

The faculties are of four kinds: 14 faculties of Law (Paris, Aix, Bordeaux, Caen, Dijon, Grenoble, Lille, Lyon, Montpellier, Nancy, Poitiers, Rennes, Toulouse, and Algiers), which had (Jan. 15, 1914), from 7,569 (Paris) to 321 (Caen) matriculated students; 8 faculties of Medicine (Paris, 4,975; Montpellier, Bordeaux, Lille, Lyon, Toulouse, Nancy, 358, and Algiers, 212); 16 faculties of Sciences (Paris, 1,972; Besançon, Bordeaux, Caen, 99; Clermont, Dijon, Grenoble, Lille, Lyon, Marseille, Montpellier, Nancy, Poitiers, Rennes, Toulouse, and Algiers); 16 faculties of letters (at the towns last named) having from 4,960 (Paris) to 101 students; 8 higher pharmacy schools and mixed faculties of medicine and pharmacy; 15 schools with full functions and preparatory schools of medicine and pharmacy, with from 637 to 8 students. The following statement shows the number of students by faculties or schools in January, for 3 years:—

Students of	1914	1915	1916
	State Institutions.	State Institutions	State Institutions.
Law . . . . .	16,465	8,213	3,503
Medicine . . . . .	8,533	2,229	2,544
Sciences . . . . .	7,330	2,731	2,727
Letters . . . . .	6,586	1,916	2,417
Pharmacy . . . . .	1,337	339	525
Schools of Medicine and Pharmacy . . . . .	1,786 <sup>1</sup>	803 <sup>2</sup>	850 <sup>3</sup>
Total . . . . .	42,087	11,231	12,566

<sup>1</sup> 1,512 medicine, 274 pharmacy.

<sup>2</sup> 715 medicine, 88 pharmacy.

<sup>3</sup> 719 medicine, 131 pharmacy.

In 1914 the total number of students in the public establishments was 42,037, of whom 35,849 were French, and 6,188 foreigners; 4,254 were women (2,547 French, and 1,707 foreign). The numbers comprise not only matriculated students (among whom are students by correspondence), but also non-matriculated students.

There are free faculties: at Paris (the Catholic Institute of Paris comprising the law and advanced scientific and literary studies); Angers (theology, law, sciences, letters, agriculture); Lille (theology, law, medicine and pharmacy, sciences, letters, social sciences and politics); Lyon (theology, law, sciences, letters); Marseille (law); Toulouse (the Catholic Institute with theological, literary, and scientific instruction). There is, besides, in Paris a large institution for free higher instruction, the *École libre des Sciences Politiques*.

The State faculties confer the degrees of bachelor, of licentiate, and of doctor. Admission to degrees (*agrégations*) is by special competition, which lead to the title of *professeur* in secondary and in higher instruction.

The other higher institutions dependent on the Ministry of Public Instruction are the *Collège de France* (founded by Francis I. in 1530), which has courses of study bearing on various subjects, literature and language, archæology, mathematical, natural, mental and social science (political economy, &c.); the Museum of Natural History giving instruction in the sciences and nature; the *École Pratique des Hautes Études* (history and philology, mathematical and physico-chemical sciences, and the sciences of nature and of religion), having its seat at the Sorbonne; the *École Normale Supérieure*, which prepares teachers for secondary instruction and, since 1904, follows the curricula of the Sorbonne without special teachers of its own; the *École des Chartes*, which trains the archivist paleographers; the *École des Langues Orientales vivantes*; the *École du Louvre*, devoted to art and archæology; the *École des Beaux-Arts*, and the Bureau des Longitudes, the Central Meteorological Bureau; the Observatoire of Paris; and the French Schools at Athens, Rome, Cairo and Indo-China, besides a school for Morocco.

Outside Paris there are eight observatories (Meudon, Besançon, Bordeaux, &c.). The observatory at Nice is dependent on the Academy of Sciences.

*Professional and Technical Instruction.*—The principal institutions of higher or technical instruction dependent on other ministries are: the Conservatoire des Arts et Métiers at Paris (with 20 evening courses on the applied sciences and social economy), the *École Centrale des Arts et Manufactures*, the *École des Hautes Études Commerciales*, 12 higher schools of commerce with about 600 pupils, dependent on the Ministry of Commerce; the National Agronomic Institute at Paris, the Veterinary school at Alfort, a school of forestry at Nancy, national agricultural schools at Grignon, Rennes, Montpellier, 46 practical schools of Agriculture, &c., dependent on the Ministry of Agriculture; the *École Polytechnique*, the *École Supérieure de Guerre*, the military school at St. Cyr, the *École de Cavalerie* at Saumur, and other schools dependent on the Ministry of War; the Naval School at Brest dependent on the Ministry of Marine; the School of Mines at Paris, the School of Bridges and Roads at Paris, with other schools dependent on the Ministry of Public Works; the School of Mines at St. Etienne, and the Schools of Miners at Alais and Douai; the *École Coloniale* at Paris dependent on the Ministry of the Colonies. The *École des Beaux Arts*, the *École Nationale des Arts Décoratifs*, and the Conservatoire de Musique et de Déclamation depend on the department of the Under Secretary for the Fine Arts, which is attached to the Ministry of Public Instruction. In the provinces there are National schools of fine arts, and schools of music, and also several municipal schools as well as free subventioned schools, etc.

Technical schools of a somewhat lower grade (dependent on the Ministry of Commerce) are very numerous, comprising six national schools of arts and trades (Aix, Angers, Chalons, Cluny, Lille, Paris), two schools of horology, four national professional schools, 33 practical schools of commerce and industry (of which seven are for girls), 20 practical schools of industry; there are also 35 schools of industries, with 5,550 pupils; 13 municipal professional schools in Paris, with 1,385 pupils, and about 370 private schools, with 92,000 pupils.

### Justice and Crime.

The Courts of lowest jurisdiction in France are those of the Justices of Peace (*juges de paix*, one in each *canton*) who try small civil cases and act also as judges of Police Courts, where all petty offences (*contraventions*) are disposed of. The Correctional Courts pronounce upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They have no jury, and consist of 3 judges belonging to the civil tribunals of first instance. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who may either dismiss the case or send it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge. The Court of Assizes is assisted by 12 jurors, who decide by simple majority on the fact with respect to offences amounting to crimes. The highest courts are the 26 Courts of Appeal, composed each of one President and a variable number of members, for all criminal cases which have been tried without a jury; and one Court of Cassation which sits at Paris, for all criminal cases tried by jury, so far as regards matters of law.

For civil cases, wherein the amount in dispute is between 200 and 1,500 francs, there is, in each *arrondissement*, a tribunal of first instance; above these are the Appeal Courts and the Court of Cassation. For commercial cases there are, in 226 towns, Tribunals of Commerce and Councils of experts (*prud'hommes*). In the towns are police courts. Throughout France there were 2,889 justices of the peace in 1913, 22 being in Paris.

All Judges are nominated by the President of the Republic. They can be removed only by a decision of the Court of Cassation constituted as the *Conseil Supérieur* of the magistracy.

The agencies for the prosecution of misdemeanours and crimes in 1913 appeared as follows:—Gendarmes, 21,160; commissaires de police, 929; agents de police, 17,149; gardes champêtres, 31,197; private sworn gardes, 47,898; forest gardes, 7,310; fishery police, 2,417; railway police, 269.

The following table shows the number of persons convicted (exclusive of convicts under 16 and certain others) before the various courts in five years:—

Year	Assize Courts	Correctional Tribunals	Police Courts
1909	1,975	198,837	512,825
1910	1,967	198,952	459,739
1911	1,919	217,623	476,962
1912	2,180	224,806	530,312
1913	1,988	215,861	566,232

In 1913, 1,136 boys and 190 girls of 13 years of age, 3,603 boys and 634 girls from 13 to 16 years, 6,552 boys and 1,079 girls from 16 to 18 years, and 23,385 boys and 3,258 girls from 18 to 21 years of age were tried in the French courts. On December 31, 1913, there were 3,134 male and 922 female inmates of the various establishments for the education of criminal children, excepting the private institutions located in Paris. Of the above,

2,680 boys and 756 girls were inmates of public institutions, and 454 boys and 166 girls inmates of private establishments. In the Paris institutions on the same date there were 157 boys and 40 girls.

The French penal institutions consist, first, of Houses of Arrest (3,375 *chambres de sûreté* and *dépôts de sûreté* in 1911). Next come Departmental Prisons, also styled *maisons d'arrêt, de justice* and *de correction*, where both persons awaiting trial and those condemned to less than one year's imprisonment are kept, as also a number of boys and girls transferred from, or going to be transferred to, reformatories. The reformatories are 14 for boys and 7 for girls, 10 for boys and 3 for girls being public, and 4 for boys and 4 for girls being private. The Central Prisons (*maisons de force et de correction*), where all prisoners condemned to more than one year's imprisonment are kept, provided with large industrial establishments for the work of prisoners, are 9 for men and 2 for women.

All persons condemned to hard labour and many condemned to 'reclusion' are sent to New Caledonia or Guiana (military and *récidivistes*); the *dépôt de forcés* of St. Martin-de-Ré is a *dépôt* for transferred hard-labour convicts. Of 764 prisoners detained in this *dépôt* in 1911, 724 were sent to Guiana (507 to hard labour and 317 to relegation).

### Pauperism and Relief of Old Age.

In France the poor are assisted partly through public 'bureaux de bienfaisance' and partly by private and ecclesiastical charity. They are partly under the care of the communes and partly of the departments, both of which contribute, and ultimately under the supervision of Government. The funds of the 'bureaux de bienfaisance' are partly derived from endowments, partly from communal contributions, and partly from public and private charity. In 1912, 19,366 bureaux expended 54,628,000 francs and assisted 1,260,000 persons excluding 92,000 persons in Paris. Public assistance is rendered to poor or destitute children. At the end of 1912 the institutions for this purpose contained 231,300 children; the expenditure during the year amounted to 42,321,000 francs. In 1912 the hospitals for the sick, infirm, aged, or infants, numbered 1,892; they contained 231,517 beds, and at the end of the year had 68,700 patients, besides 75,540 aged and infirm inmates; their expenditure for 1912 amounted to 204,406,000 francs. In the same year 987,000 persons received gratuitous medical assistance at home and 185,000 in hospitals, the expenditure for such purposes amounting to 29,000,000 francs. At the end of 1912 the asylums for imbeciles, national, departmental, and private, had 77,237 patients.

An Act was passed in 1905 for the relief of the aged poor, the infirm, and the permanently incurable, age limit, 70; but by the amendment of the Act, April 5, 1910, this was reduced to 65. The same amendment provided for limited help being given to those between the ages of 65 and 70. On December 31, 1912, there were 310,000 such persons in receipt of the limited assistance, the total expenditure for 1912 having been 9,189,000 francs. The Act of 1910 provided that the cost of the scheme should be borne by the communes, the departments, and the State. The number of persons registered for relief has risen from 511,446 on December 31, 1908, to 599,061 on December 31, 1911, and to 644,461 on December 31, 1912. The cost to the State alone for 1910 was 48,000,000 francs; for 1911, 49,600,000 francs; and for 1912, 55,500,000 francs. In addition, contributions of the departments and communes totalled 46,500,000 francs in 1911, and 50,793,000 francs in 1912; but it has to be remembered that the increased expenditure under this law is in part balanced by the diminished activities of the 'bureaux de bienfaisance' in assisting invalids under 60 years of

age. The Old-Age Pensions Law of April 5, 1910, as amended on February 27, 1912, provides for all wage-earners old-age pensions towards which both employers and workers contribute. Contributions are to be paid up to the 60th year of the worker's life, and the State will contribute 100 francs. This sum will be increased by one-tenth for every insured worker who has brought up 3 children of the age of 16. On December 31, 1913, 8,011,138 persons were registered under the scheme.

### Finance.

#### I. STATE FINANCE.

The following tables show the budget estimates of the revenue and expenditure voted for 1916 as compared with those voted for 1915:—

Sources of revenue	1915	1916
	Francs	Francs
Direct contributions . . . . .	543,929,156	492,015,839
Taxes assimilated to direct contributions . . . . .	64,877,570	48,703,402
Total, direct and assimilated . . . . .	613,806,726	540,719,241
Registration . . . . .	463,594,500	524,617,000
Stamps . . . . .	146,167,500	157,688,000
Tax on bourse operations . . . . .	1,312,000	2,342,000
Tax on income from personality . . . . .	157,782,000	181,432,500
Customs . . . . .	764,144,000	1,399,421,000
Indirect contributions . . . . .	477,069,000	472,902,000
Mineral oil . . . . .	227,600	462,000
Sugar, salt . . . . .	236,617,000	204,051,000
Tobacco monopoly . . . . .	502,349,000	559,692,000
Matches . . . . .	40,839,000	43,083,000
Mechanical lighters . . . . .	950,000	727,000
Gunpowder . . . . .	3,091,000	9,481,000
Posts, telegraphs, telephones . . . . .	259,861,000	328,900,000
Various (mint, railways, &c.) . . . . .	565,200	779,500
Total direct taxes and monopolies . . . . .	3,084,483,300	3,885,509,000
Domains and forests and various receipts . . . . .	185,681,100	240,204,000
Total budget . . . . .	3,883,971,126 (155,358,844l.)	4,125,713,000 (165,028,520l.)

Branches of expenditure	1915	1916
	Francs	Francs
Finance:—Public debt . . . . .	1,827,393,673	3,005,017,827
President Chamber, Senate . . . . .	20,145,038	20,217,388
Finances . . . . .	438,041,954	541,472,584
Justice . . . . .	58,002,623	55,154,180
Foreign Affairs . . . . .	32,695,592	53,926,127
Interior . . . . .	716,242,008	836,589,047
War . . . . .	16,178,118,293	25,061,634,829
Marine . . . . .	707,641,282	777,937,220
Merchant Marine . . . . .	83,177,900	72,743,887
Instruction . . . . .	358,644,472	367,899,031
Fine Arts . . . . .	20,465,195	18,752,400
Commerce and Industry . . . . .	135,151,211	14,508,750
Posts and Telegraphs . . . . .	405,524,777	416,040,656
Labour, &c. . . . .	165,079,845	150,779,987
Colonies . . . . .	153,578,887	193,314,109
Agriculture . . . . .	65,838,473	57,539,698
Public Works . . . . .	607,809,214	667,115,103
Total . . . . .	21,981,462,479 (878,458,500l.)	32,313,632,928 (1,292,545,316l.)

The following figures do not include the *budget sur ressources spéciales*, and represent the actual verified revenue (inclusive of loans) and expenditure for 4 years :—

Years	Receipts	Expenditure	Surplus	Deficit
	Francs	Francs	Francs	Francs
1909	4,140,912,961	4,186,090,463	—	45,177,502
1910	4,273,890,789	4,321,918,609	—	48,027,820
1911	4,689,045,845	4,547,915,741	141,130,104	—
1912	4,857,491,193	4,742,756,094	113,735,099	—

The accounts of revenue and expenditure of the Government officials are examined by a special administrative tribunal (*Cour des Comptes*), instituted in 1807.

The French National debt has grown from 28·5 millions sterling in 1800 to 50·9 millions in 1815, 236·5 millions in 1848, 498 millions in 1871, 1,302 millions in 1912, (32,557,899,787 francs) and the interest from 1·5 millions in 1800 to 51·4 millions in 1912.

On January 1, 1914, the capital of the debt of France stood provisionally as follows :—

Ministry of Finance :—		Capital
		Francs
Rentes, 3 per cent., not redeemable . . . . .		21,922,217,434
Rentes, 3 per cent., redeemable by annuities . . . . .		3,338,516,000
Treasury debt . . . . .		421,150,000
Annuities to railways . . . . .		1,168,757,460
Roads and school buildings . . . . .		24,619,035
Short-dated Treasury bills . . . . .		208,690,780
Repurchase of canal concessions . . . . .		3,823,010
Annuity for redemption of Rentes of 1901 . . . . .		243,243,287
Annuity " " July, 1909 . . . . .		5,558,705
Total . . . . .		27,336,875,711
Ministry of Instruction :		
Debt for school buildings—		
For higher instruction . . . . .		1,297,906
For secondary instruction . . . . .		3,532,063
For primary instruction . . . . .		7,280,829
Total . . . . .		12,110,798
Ministry of Public Works, &c. :—		
Annuities to railways . . . . .		1,029,314,000
Various Railway Debts and including that for the Western Railway . . . . .		3,070,537,000
Social Insurance (Ministry of Labour) . . . . .		11,559,200
Total . . . . .		4,107,410,200
Total general debt . . . . .		31,456,396,709
Floating debt (1st October, 1914) . . . . .		1,432,412,800
Grand total . . . . .		32,888,809,509
		(1,315,552,380l.)

The following table shows the interest and annuities to be paid under the various heads of the public debt, according to the budget voted for 1914 :—

	Francs
Consolidated debt . . . . .	657,666,523
Redeemable debt: interest and amortisation . . . . .	310,320,865
Annuities . . . . .	340,431,880
Total . . . . .	1,308,419,268
	(52,336,770l.)

On December 31, 1913, the value of French Treasury Bonds in circulation was 16,338,932*l.*, as against 875,324*l.* in 1912 and 4,300,792*l.* in 1911.

The total credits voted since the war began were as follows :— For the last 5 months of 1914, 8,898,583,901 francs ; for 1915, 22,804,486,525 francs ; for 1916, 32,343,944,923 francs ; to March 31, 1917, 8,624,062,890 francs ; total, 72,671,078,239 francs. Of the total 51,409,834,474 francs were for defence.

By September 30, 1916, the floating debt amounted to 18,890,567,000 francs ; loans, 3,239,302,000 francs ; consolidated debt, 11,925,865,000 francs ; advances by the banks of France and Algeria, 8,620,000,000 francs.

## II. LOCAL FINANCE.

For 1913 the revenue of the departments of France, excluding a balance of 129,707,700 francs, from 1912, amounted to 612,780,517 francs (24,511,220*l.*), and the expenditure to 614,007,335 francs (24,560,293*l.*). The departmental debt stood at 1,142,446,145 francs (45,697,845*l.*). For 1913 the ordinary revenue of the communes amounted to 1,071,386,513 francs (including 411,497,580 francs for Paris) and expenditure to 1,039,638,411 francs (including 411,497,580 for Paris), while the debt on December 31, 1912, amounted to 4,854,570,298 francs (including 2,958,557,668 francs, the debt of Paris). For the year 1914, the revenue of the City of Paris was estimated at 482,613,372 francs (19,304,532*l.*), and the expenditure at the same amount.

## Defence.

### I. LAND DEFENCES.

France has a coast line of 1,760 miles, 1,304 on the Atlantic and 456 on the Mediterranean. Its land frontier extends over 1,575 miles, of which 1,156 miles are along the Belgian, German, Swiss, and Italian frontiers, and 419 along the Spanish frontier.

The fortified places are specially administered by a 'service des fortifications.' Paris, which is considered as the centre of defence, is surrounded by a wall which has 97 bastions, 17 old forts, and 38 new advance forts or batteries, the whole forming two entrenched camps at St. Denis and Versailles.

The strong places of first class, each of them with numerous forts, are :—On the German frontier, Verdun, Toul, Epinal, Belfort, forming an advanced line ; Maubeuge, La Fère, Reims, Langres, Dijon, Besançon, in a second line. On the Italian frontier, Briançon and Grenoble are the chief places, with Lyon in the rear. There are also a few isolated 'forts d'arrêt' near Nancy, Lunéville, Remiremont, Nice, &c. On the coast Toulon, Rochefort, Lorient, Brest, and Cherbourg are naval harbours surrounded by forts. In recent years, most second class and third class fortresses have been dismantled or at least 'déclassés.'

### II. ARMY.

The French Army consists of the national army, styled the 'Metropolitan' Army, and the Colonial Army. Both are under the War Minister, but the estimates for colonial troops abroad are included in the budget of the Minister for the Colonies. The considerable forces maintained in Algeria and Tunis, however, are all regarded as belonging to the Metropolitan Army, and their cost is included in the War Minister's budget.

Military service in France is compulsory, and it is universal in the fullest sense of the term, no exemptions being allowed except for physical disability. Liability to service extends from the age of 20 to the age of 48. According to the law of 1913 the term of service in the ranks of the first line, or 'active' army, is 3 years, and the men join at the age of 20. The soldier then belongs to the reserve for 11 years ; after which he passes to the territorial army for 7 years ; finally completing his service with 7 years in the territorial reserve,

Men of the reserve of the active army are called up for training and manœuvres twice in their period of reserve service, for 4 weeks on each occasion. The men of the territorial army have only 1 training of 2 weeks, and those of the territorial reserve no periodical training.

There are no "one year volunteers" in France, but voluntary engagements for 3, 4, or 5 years are encouraged, especially for the colonial army.

Owing to the length of the reserve service the number of reservists per battalion is very large (2,000 or more.) On mobilisation, therefore, the reserve not only brings its unit to war strength, but every battalion and regiment forms a corresponding reserve unit, and there is still a certain surplus left for the dépôt. In peace time the troops on the eastern frontier have a considerably higher establishment than the remainder.

Two infantry regiments make a brigade (usually 6, but sometimes 7 or 8, battalions); 2 brigades a division; and 2 divisions an army corps. French batteries have only 4 guns each. Each division has a field artillery regiment of 9 batteries (36 guns), while the corps artillery consists of 9 field and 3 howitzer batteries: altogether 30 batteries to the corps. In addition there are 6 'reinforcing batteries' to each corps, which only exist as a cadre till mobilisation; if they can be placed rapidly on their war footing it gives a total of 144 guns to the corps. To an army corps in the field are also attached a cavalry brigade of 2 regiments, 1 chasseur battalion, some companies of engineers, &c. There are also 42 heavy batteries, of 2 guns each, to be distributed amongst the army corps.

A cavalry division is nominally composed of 3 brigades of 2 regiments each, with a division of horse artillery of 2 batteries, in all 24 squadrons, and 12 guns. There are 10 permanent cavalry divisions.

The mobilised strength of a normal army corps would be nearly 33,000 combatants. The strength of a cavalry division of 6 regiments would be about 4,700 combatants.

The Aeronautical Corps is organised in three territorial groups consisting of from 2 to 4 companies with from 2 to 5 detached sections with the troops. There are at present 27 sections of 8 aeroplanes each, 10 cavalry sections of 3 aeroplanes each, and 11 fortress sections of 8 aeroplanes each, representing a total establishment of 334 aeroplanes. There are 14 dirigibles in charge of the Aeronautical Corps.

The French army is localised and territorialised. There are 21 army corps 'regions' including Algeria (the 19th); the division in occupation of Tunis is furnished by Algerian troops. Each region, Algeria excepted, furnishes a complete army corps; also a variable number of units of cavalry, garrison artillery, &c. Each of the 8 infantry regiments of an army corps is recruited from its regimental district; but there is also an additional regiment (the 'regional' regiment) which is recruited, like the chasseur battalions, the cavalry, &c., from the region at large. The regional regiments, and also the chasseur battalions, are usually stationed out of their own regions, in the neighbourhood of the eastern frontier. The 6th army corps (Chalons) and the 7th (Besançon) are by this means augmented to 3 divisions, and there is a brigade of 3 regional regiments and 2 chasseur battalions at Lyons. This is the general arrangement: there are certain variations which need not be detailed. Information regarding the distribution of the troops in N. Africa is given under *Algeria*.

The *Reserve Troops* form divisions corresponding to those of the first line. Therefore usually two in each region. There are in all 36 reserve divisions, of approximately the same composition and strength, on mobilisation, as the first line divisions. The reserve formations of the regional regiments, of the foot artillery, and of the engineers, are available for garrisoning the fortresses.

The *Territorial Army* similarly consists of 36 divisions, and garrison troops. The Algerian troops have their own reserve formations, and also territorial reserve cadres for 10 battalions of Zouaves, 6 squadrons of Chasseurs d'Afrique, 9 field batteries, &c.

The surplus men of the reserve and territorial army would be called to the dépôts, as required, after mobilisation has taken place, and would be drafted to make good the losses of the army in the field.

The military *Customs Corps* of 38 battalions, and a large number of *Chasseurs Forestiers* are recruited from men who have been passed into the territorial army. They could be employed as garrison troops, if necessary.

The *Gendarmerie* is a force of military police, recruited from the army, but performing civil duties in time of peace. There is a legion in each army corps region, and some regions have more than one legion. The total strength is about 21,700 men, of whom about half are mounted. It is proposed to create a mobile gendarmerie, to deal with strikes and riots, so as to avoid the necessity for calling out troops on such occasions.

The *Garde Républicaine* is also a police force, and performs duties in Paris similar to those performed by the gendarmerie in the departments. Its strength is nearly 3,000, of whom about 800 are mounted.

The *Colonial Army* is entirely distinct from the Metropolitan, and consists partly of white troops and partly of native troops. The colonial troops are recruited, for the most part, by voluntary enlistment, or by voluntary transfers from the Metropolitan Army, but compulsion can be used for native corps in West Africa if sufficient volunteers do not come forward. The colonial troops at home consist of 12 regiments of infantry, each of 3 battalions, and 3 regiments of artillery, each of 12 batteries (6 field and 6 garrison). These are all *permanently* stationed in France in peace time.

The troops in the Colonies according to the Budget estimate for 1912 consist of 3 battalions of the Foreign Legion (in Indo-China),<sup>1</sup> 13 battalions and 4 companies of colonial infantry, 32 batteries of artillery (field, mountain, and garrison), 1 squadron of native cavalry, 3 companies of native sappers, and 49 battalions of native infantry (12 Senegal Tirailleurs, 3 squadrons Confins Sahariens, 12 Tonkinese, 9 Malagasy, and 4 Annamite Tirailleurs, 3 battalions of West African natives, and 6 battalions in French Congo). The batteries of artillery are of 'mixed' type, half to two-thirds of the rank and file being natives. In the native corps the officers, and most of the non-commissioned officers, are French.

The following table shows in round numbers what in the latter part of 1914 was the distribution of both Metropolitan and Colonial troops between (1) France, (2) Algeria and Tunis, and (3) the French colonies (excluding administrative corps).

	Metropolitan Army		Colonial Army		Total
	Europeans	Natives	Europeans	Natives	
France . . . . .	620,000	—	28,000	—	648,000
Algeria and Tunis . . . .	53,000	30,000	—	—	83,000
French Colonies . . . . .	—	—	19,000	40,000	59,000
Total . . . . .	673,000	30,000	47,000	40,000	790,000
	703,000		87,000		

<sup>1</sup> The Foreign Legion consists of 2 regiments, each of 4 battalions. The headquarters of both regiments are in Algeria (q.v.).

The total number of troops maintained by France in oversea garrisons is about 134,000, of whom 75,000 are Europeans.

The *field army* of France may be reckoned at 19 army corps (two of 3 divisions), the Lyons brigade of 14 battalions, and 10 cavalry divisions. Total about 800,000 combatants. There are also 36 complete divisions of reserve troops and some reserve cavalry, amounting to about 500,000 men. Total strength about 1,300,000 combatants. It is, of course, uncertain how the reserve divisions may be employed, but it is conceivable that all the two-division army corps would be raised to three-divisional strength by the incorporation of reserve divisions. It would also appear that in a war requiring France to put forward her whole strength, two additional army corps, each of two divisions, could be provided by the Algerian troops and the troops of the Colonial Army in France. These corps, with an Algerian cavalry division, would add about 80,000 men, making a grand total of about 1,380,000 combatants.

The administration of the French army consists of a general staff and a number of departments, all under the War Minister. In the consideration of general questions the War Minister is assisted by a council, called the Conseil Supérieur de la Guerre, consisting of himself as president, and 12 generals of rank, including the Chief of the General Staff (the Generalissimo of the Army in case of war) and the Chief of the Staff of the Army.

The peace establishments of the Metropolitan Army and of the Colonial Army in France according to the budget estimate for 1914 are : Metropolitan Army, 818,532 ; Colonial troops in France, 27,656 ; total, 846,188.

The military budget of France for 1914 shows an estimated expenditure of 1,026,820,073 francs (41,072,800*l.*), for the Metropolitan Army ; 54,794,069 francs (2,191,760*l.*) for the Colonial troops in France ; 122,045,570 francs (4,881,820*l.*) for armament, works and buildings, and stores. Total, 1,203,659,712 francs (48,146,388*l.*).

The French War Office has recently issued a memorandum giving the exact figures of all French troops now with the colours. The Active Army consists of the 1914, 1915, 1916 and 1917 contingents, the last having been called up a year before the usual date. The reserve of the Active Army includes men of the contingents 1903 to 1913. The Territorial troops are composed of contingents from 1896 to 1902. Finally the contingents from 1890 to 1895 constitute a Territorial Reserve, with some men from the 1887 to 1899 contingents.

The arm of the French infantry is the Lebel magazine rifle : calibre .315. The cavalry carry the Lebel carbine. The present French field gun is the 7.5 cm. (2.95 in.) Q.F., shielded, gun, model '97. The howitzer batteries are armed with 12 cm. (4 in.), or 15.5 cm. (6.2 in.) pieces.

#### NAVY.

The Navy Estimates for 1914 amounted to 585,157,691 francs (23,406,307*l.*) ; in 1913 the vote was 513,542,521 francs (20,531,700*l.*). Later particulars of expenditure are not available.

The French navy is under the supreme direction of the Minister of Marine, who is assisted by a Chief of the Staff. Under the Minister the latter has charge of all the work of the department having reference to construction, maintenance, commissioning, and the mobilization of the fleet, and particularly of all that concerns preparation for war. He is chief of the Military Cabinet, while the Civil Cabinet, devoted to administrative work, is directly under the Minister. There are two sub-chiefs of the staff, of whom one is in charge of various sections, and the other of the work of the Military Cabinet.

The central administration also embraces the directorates of *personnel*, *matériel*, and artillery, the inspectorate of works, the finance department, the services of submarine defences, hydrography, and other special branches. In addition to these are the Superior Council of the Navy, and the committee of inspectors-general, with a series of particular inspectorates, the council of works, and a number of special and permanent technical and professional committees. For purposes of administration the French coasts are divided into five maritime arrondissements, having their headquarters at the naval ports of Cherbourg, Brest, Lorient, Rochefort, and Toulon, at each of which the Government has important shipbuilding establishments. At the head of each arrondissement is a vice-admiral, with the title of Maritime Prefect, who is responsible for the port administration and the coast defences, mobile and fixed. The chief torpedo-stations are Dunkirk, Cherbourg, Brest, Lorient, Rochefort, Toulon, Corsica, Bizerta, Oran, Algiers, and Bona. The naval forces in peace time are the Mediterranean squadron, the northern squadron in the Channel, and the divisions of the Atlantic, the Pacific, the Far East, Cochin China, and the Indian Ocean; with ships on local stations.

The French navy is manned partly by conscription and partly by voluntary enlistment. By the channel of the 'Inscription Maritime,' which was introduced by Colbert, and on the lists of which are the names of all male individuals of the 'maritime population'—that is, men and youths devoted to a seafaring life, from the 18th to the 50th year of age—France is provided with a reserve of 114,000 men, of whom about 25,500 usually serve with the fleet. The time of service in the navy for the 'Inscrits' is the same as that in the army, with similar conditions as to reserve duties, furloughs, and leave of absence for lengthened periods.

During the war the French fleet has worked in complete co-ordination with the British navy. It assisted rapidly in asserting command of the Mediterranean, whereby the French troops were brought back from Algeria, according to the pre-arranged plan of operations. It shared to the full in the organisation and transport of troops for the Dardanelles and Gallipoli expedition, and took an active part in all the operations. A great military force, with every necessary supply on an enormous scale, was despatched to the Dardanelles and afterwards to Salonika. Meanwhile, the fleet had speedily adapted itself to the new conditions of the war, and conducted an efficient blockade of the Adriatic until the Italian navy came into the war. The German and Austrian flags disappeared from the sea. In this arduous work there were some losses and brilliant successes, like the sinking of the Austrian submarine U3 by the destroyer *Bisson*, and the torpedoing of enemy destroyers by the submarine *Papin*. The French navy has also assisted in the patrolling of the Channel, and has played a part in many quarters of the globe.

A summary of French ships is as follows:—

	Complete at end of		
	1915	1916	1917
'Dreadnoughts'	7	11	12
Pre-Dreadnought battleships <sup>1</sup>	21	20	19
"    armoured cruisers	19	18	18
Protected cruisers	16	16	16
Torpedo gunboats, etc.	7	11	11
Destroyers	87	84	About 90
Torpedo boats	150	154	" 160
Submarines	90	90	" 100

<sup>1</sup> Six of these, the *Danton* class, may be called 'Semi-Dreadnoughts.'

The tables which follow of the French armour-clad fleet and first-class cruisers are arranged chronologically, like the similar tables for the British navy. The ships named in italics will probably not be ready for sea by end of the present year, certainly not the four last-named.

1914	Three new . . .	4,500	—	—	—	—	—	—

In addition are the battleship *Brennus*, 11,190 tons, completed 1893, and the armoured cruiser *Bruxis*, 4,753 tons, completed 1896. Minor cruisers include the aerial dépôt ship *Poudre*, the *Descartes*, 3,988 tons (designed 1892), 4 6·4in., 6 5·5in. guns, present speed about 15 knots; 3 *Friant* type, 4,000 tons (designed 1891), 6 6·4in., 4 4in. guns, speeds about 17 knots; *Lavoisier* and *D'Estrées*, 2,300 tons (designed 1892), 4 5·5in., 2 4in. guns, speeds about 20 knots; also 2 old cruisers, and a few gunboats, etc.

The ships and vessels lost in the war are the *Danton* (Diderot class, sometimes regarded as Dreadnoughts) sunk by torpedo in the Mediterranean, March 19, 1917; pre-Dreadnoughts *Bouvet* (Dardanelles) and *Suffren* (lost with all on board between Gibraltar and Lorient, cause unknown), armoured cruisers *Léon Gambetta* (Strait of Otranto), *Charnier* (coast of Syria), gunboat *Zélée*, 5 destroyers, 8 submarines. The Germans claim to have sunk a small cruiser named the *Rigel*, Oct., 1916.

## Production and Industry.

### I. AGRICULTURE.

Of the total area of France (132,381,447 acres) 24,716,752 acres were under forests in 1912, and 9,483,625 acres were returned as moor and uncultivated land, and 98,181,070 acres, of which 59,127,750 acres were arable, were returned as under crops, fallow and grass. The following tables

show the area under the leading crops and the production (1 metric ton = 2205 lbs.) for three years :—

Crop	Area (1,000 acres)			Produce (metric tons)		
	1914	1915	1916	1914	1915	1916
Wheat . . . . .	15,150	13,722	13,007	7,693,000	6,063,000	5,841,100
Mixed Corn . . . . .	297	267	252	135,400	109,800	111,460
Rye . . . . .	2,645	2,337	2,302	1,114,700	842,000	916,600
Barley . . . . .	1,800	1,592	1,565	975,800	692,100	857,900
Buckwheat . . . . .	1,130	—	—	532,400	—	—
Oats . . . . .	8,977	8,157	7,787	462,060	346,260	412,800
Maize . . . . .	1,140	—	—	57,230	—	—
Potatoes . . . . .	3,720	3,367	3,260	11,992,700	9,399,000	9,131,100
Beetroot, sugar . . . . .	335	190	190	3,751,000	1,148,100	1,900,900
Tobacco . . . . .	37	20	17	24,200	9,200	15,400

The following are the official estimates of acreage sown in 1917 :—Wheat, 10,568,634 ; mixed corn, 239,711 ; rye, 2,045,629 ; barley, 270,245 ; oats, 1,607,636.

The annual production of wine and cider appears as follows :—

Year	Under Vines, acres	Wine produced thousands of gallons	Wine Import, thousands of gallons	Wine Export, thousands of gallons	Cider produced 1,000's of gallons
1900	3,974,970	1,441,330	114,760	41,010	647,000
1913	3,846,342	986,606	167,420	36,498	661,870
1914	3,811,555	1,316,849	151,008	15,388	375,760
1915	3,807,982	448,819	184,866	22,286	649,154
1916	3,771,630	792,386	186,717	15,137	141,013

In 1915 there were 1,455,003 vine-growers returned and the vintage was valued at 938,446,000 francs (37,537,840*l.*).

The results for 1915 of the harvests of the principal fruits are as follows : Cider apples, 4,482,367 metric tons ; table apples, 206,361 tons ; table pears, 65,621 tons ; chestnuts, 147,088 tons ; walnuts, 49,360 tons ; olives, 38,755 tons ; peaches, 13,633 tons ; apricots, 7,076 tons ; cherries, 38,890 tons ; plums, 25,995 tons ; prunes, 16,258 tons ; oranges, 222 tons ; mandarins, 121 tons ; lemons, 150 tons ; strawberries, 9,088 tons.

On July 1, 1916, the numbers of farm animals were : Horses, 2,317,205 ; mules, 102,969 ; asses, 316,559 ; cattle, 12,723,946 ; sheep and lambs, 12,079,211 ; pigs, 4,448,366.

Silk culture, with Government encouragement (*primes*), is carried on in 24 departments of France—most extensively in Gard, Drôme, Ardèche, and Vaucluse.

Silk production for 3 years :—

Year	Number of producers	Quantities of eggs put into incubation	Total production	Total value of produce.
		25 grams	Kilogs.	Francs.
1914 . . .	88,825	108,943	5,067,392	19,908,930
1915 . . .	48,327	49,132	1,738,504	4,306,888
1916 . . .	52,756	—	2,797,295	11,878,352

## II. MINING AND METALS.

In France there were in 1912, 38,551 mines and quarries in work, with 375,240 workers, including 331,414 adults and 43,667 children. The annual yield of all the conceded mines was valued at 675,198,405 francs (26,807,936*l.*) as against 13,884,630*l.* in 1894. The output of non-conceded mines in 1910 was valued at 7,670,907 francs (306,836*l.*).

The following are statistics of the leading mineral and metal products of conceded mines, in metric tons: —

Year	Coal and Lignite	Iron Ore	Pig Iron	Finished Iron and Steel	Worked Steel
	<i>Metric Tons</i>	<i>Metric Tons</i>	<i>Metric Tons</i>	<i>Metric Tons</i>	<i>Metric Tons</i>
1910	38,349,942	14,046,982	4,038,497	526,000	2,323,500
1912	41,145,178	19,160,407	4,939,314	525,000	4,428,219
1913	40,843,618	21,714,000	5,311,316	406,000	4,635,166

In 1914 the coal output amounted to 29,786,505 metric tons, and in 1915 to 19,908,892 metric tons.

In 1912, the production of ores was : lead and silver, 13,953 metric tons ; zinc, 45,929 tons ; copper, 242 tons ; antimony, 11,018 tons ; arsenic and gold, 165,380 tons ; manganese, 5,576 tons ; and salt, 1,098,515 tons. In 1912 the output of quarries (for building stone, slate, cement, phosphates, &c.) amounted to the value of 293,623,038 francs (11,744,929*l.*).

## III. MANUFACTURES.

For the numbers of persons employed in the more important industries in 1906, *see* THE STATESMAN'S YEAR BOOK for 1916, page 877.

The values of the yearly imports and exports of woollens and silks in million francs are seen from the subjoined table :—

Years	Woollens				Silks	
	Imports		Exports		Imports	Exports
	Yarn	Cloth	Yarn	Cloth	Tissues	Tissues
1913	6·337	50·603	101·803	220·249	49·386	385·774
1914	4·350	47·136	51·079	154·232	31·418	310·059
1915	32·141	381·242	393	13·433	22·168	329·317

*Sugar.*—In 1915-16 there were 64 sugar works, employing 12,177 men, 757 women, and 228 children. The yield of sugar during the last 12 years (expressed in metric tons of refined sugar) was :—

Years	Tons	Years	Tons	Years	Tons	Years	Tons
1903-04	727,268	1906-07	682,851	1909-10	733,902	1912-13	877,656
1904-05	562,736	1907-08	656,832	1910-11	650,488	1914-15	802,961
1905-06	984,672	1908-09	723,081	1911-12	465,377	1915-16	135,899

*Alcohol.*—In 1906, 59,616 thousands of gallons of alcohol were produced; in 1911, 53,130; in 1912, 68,347; in 1913, 60,145; in 1914, 31,994; and in 1915, 36,705 thousands of gallons.

#### IV. FISHERIES.

In the French fisheries, including those of Algeria, the following are statistics for 4 years :—

Year	No. of persons employed	Sailing boats	Tonnage	Steamers	Tonnage	Value of products
						Francs
1909	159,899	29,598	196,707	269	35,807	134,865,728
1910	128,869	23,283	206,129	454	38,000	140,288,211
1911	137,057	28,236	199,856	649	47,778	139,568,367
1912	154,931	28,505	216,905	946	54,555	143,008,160

Statistics of the French cod fisheries, at Iceland, in the North Sea, and at Newfoundland, are given as follows for 1912 :—

Cod fishery	Boats		Fishers	Produce		Value of produce
				Cod	Oil	
	No.	Tons		Tons	Barrels	1,000 Francs
Iceland . . .	111	20,461	2,764	13,519	2,262	7,139
North Sea . .	46	1,229	423	889	61	302
Newfoundland .	254	66,193	7,422	27,663	13,222	18,180
Totals . . .	411	87,883	10,609	41,871	15,545	25,521

The chief produce of the inshore fisheries, in weight and value, in 1912, was as follows :—

—	Tons	1,000 Francs	—	Tons	1,000 Francs
Herring . . .	21,352	6,121	Tunny fish . .	3,859	5,242
Mackerel . .	10,063	5,652	Lobsters . . .	1,789	4,546
Sardines . .	15,038	9,914	Oysters <sup>1</sup> . . .	285,276,846	1,217
Anchovies and Sprats . .	3,934	2,063	Mussels . . .	298,249	1,048
				(hectolitres)	

<sup>1</sup> Pieces.

#### Commerce.

In French statistics General Trade includes all goods entering or leaving France, while Special Trade includes only imports for home use and exports of French origin.

The *Commission Permanente des Valeurs* annually determines the values (called actual values) which represent the average prices of the different articles in the Customs list during the year. The values fixed at the end of one year and applied to that year retrospectively, are applied also during the following year, at the end of which the provisional results thus obtained are revised according to new values definitely fixed by the Commission. Thus each year there are published first the provisional and later the definitive

commercial statistics. The customs entries show the country of origin of imports and that of ultimate destination of exports. For years (provisional for 1916) the values were :—

Years	General Commerce		Special Commerce	
	Imports	Exports	Imports	Exports <sup>1</sup>
	1,000L.	1,000L.	1,000L.	1,000L.
1913	428,964	370,408	336,840	252,560
1914	—	—	256,086	194,753
1915	—	—	441,432	150,211
1916	—	—	606,376	194,854

<sup>1</sup> Excluding postal packets, the value of which in 1913 was 22,640,000L. ; in 1914, 13,924,000L. ; in 1915, 7,184,000L. ; and in 1916, 9,772,000L.

The chief subdivisions of the special trade were :—

—	Imports (1,000,000L.)			Exports (1,000,000L.)		
	1914	1915	1916	1914	1915	1916
Food products . . . . .	72	133	163	26	25	19
Raw materials . . . . .	140	186	261	52	30	52
Manufactured goods . . . . .	48	122	182	113	75	148
Total . . . . .	260	441	606	191	150	194

The chief articles of import and export (special trade) were in millions of francs (25 fr. = £) :—

Imports	1914	1915 <sup>1</sup>	Exports	1914	1915 <sup>1</sup>
Wine . . . . .	220.9	262.0	Textiles, woollen . . . . .	154.2	13.4
Wool . . . . .	544.2	166.8	"    silk . . . . .	310.1	329.3
Cereals . . . . .	655.4	800.2	"    cotton . . . . .	280.9	152.4
Raw silk . . . . .	268.1	299.8	Wine . . . . .	132.6	104.9
Raw cotton . . . . .	335.5	396.6	Raw silk and yarn . . . . .	133.3	125.4
Timber and wood . . . . .	119.0	51.0	Raw wool . . . . .	260.1	20.1
Hides and furs . . . . .	176.5	72.0	Paris goods, &c., &c. . . . .	131.9	103.8
Coal and coke . . . . .	432.5	474.8	Leather . . . . .	101.9	41.9
Coffee . . . . .	201.4	239.2	Linen yarn . . . . .	24.0	2.9
Oil seeds . . . . .	323.4	253.7	Metal goods and tools . . . . .	87.9	32.2
Chemical products . . . . .	108.4	118.6	Butter . . . . .	55.6	62.5
Petroleum . . . . .	120.3	121.6	Ornamental feathers . . . . .	42.5	29.1
Machinery . . . . .	216.0	132.5	Automobiles . . . . .	123.6	51.6
Raw caoutchouc & gutta-percha . . . . .	71.2	81.9	Skins and furs . . . . .	118.5	54.1
Copper . . . . .	141.9	201.2	Refined sugar . . . . .	50.8	47.7
Flax . . . . .	69.6	2.1			

<sup>1</sup> Provisional figures.

The chief imports for home use and exports of home goods are to and from the following countries, in millions of francs :—

Countries	Imports			Exports		
	1913	1914	1915	1913	1914	1915
United Kingdom	1,113·1	855·9	1,914·4	1,453·8	1,162·7	862·9
Belgium . . . . .	556·2	317·6	15·8	1,108·4	601·6	27·5
Spain . . . . .	281·5	193·1	461·1	151·2	112·3	108·1
United States . . . . .	894·7	794·9	2,272·9	422·6	376·7	380·9
Germany . . . . .	1,068·8	614·4	5·3	866·7	511·2	—
Austria-Hungary . . . . .	103·4	62·2	2·5	43·8	31·9	—
Italy . . . . .	240·5	173·6	335·0	305·7	215·4	265·3
Argentina . . . . .	369·2	230·5	353·4	199·9	93·3	80·8
Russia . . . . .	458·1	318·7	50·7	83·2	60·0	50·6
Algeria . . . . .	330·8	313·0	436·0	552·5	444·6	291·9

Other countries . . . . .	2,578·9	2,175·8	1,829·7	1,037·2	780·9	592·5
Total . . . . .	8,421·3	6,402·2	8,074·5	6,880·2	4,868·8	3,022·3

The treaty of 1826 provides for 'the most favoured nation treatment' between the United Kingdom and France in matters of navigation, and that of 1882 (which includes Algeria), in matters of commerce, customs duties, &c. ; in 1897 the treaties in force between the United Kingdom and France were extended to include Tunis.

The following table gives the declared value, in pounds sterling, of the staple articles consigned to the United Kingdom from France in four years :—

Staple Imports into U.K.	1912	1913	1914	1915
	£	£	£	£
Apparel, &c. . . . .	1,924,097	1,871,810	1,325,778	634,383
Silk manufactures . . . . .	4,341,883	4,488,506	3,758,553	3,848,908
Woollen „ . . . . .	3,579,867	3,493,968	3,015,012	168,325
Lace „ . . . . .	897,391	1,066,107	832,484	618,400
Butter . . . . .	1,559,452	1,505,442	1,674,155	2,275,676
Wine . . . . .	2,429,376	2,123,099	1,684,083	1,267,010
Sugar . . . . .	281,458	357,274	41,125	612
Gloves. . . . .	590,657	572,704	471,961	559,251
Motor-cars . . . . .	2,707,414	2,378,258	1,795,631	916,323

The total quantity of wine imported into the United Kingdom from France in 1914 was 2,613,871 gallons; in 1915, 2,290,832 gallons.

The following table exhibits the value of the principal articles of British produce consigned from the United Kingdom to France in four years :—

Staple Exports from U.K.	1912	1913	1914	1915
	£	£	£	£

### Shipping and Navigation.

On December 31, 1913, the French mercantile navy consisted of 15,824 sailing vessels, of 601,983 tons net, with crews 67,453, and 1,895 steamers of 980,433 tons, and crews numbering 18,552, plus 12,725, mechanics and drivers.

Of the sailing vessels 132 of 11,388 tons net were engaged in the European seas, and 235 of 345,193 tons net in ocean navigation; of the steamers 291 of 318,915 tons net were engaged in European seas, and 234 of 595,724 tons net in ocean navigation. The rest were employed in the coasting trade, in port service, or in the fisheries.

At the Quinquennial Census, June, 1912, of ships sailing on inland waters, the total was 15,141, of which 12,483 were French, 2,168 Belgian, 475 German, and 15 Dutch. These ships had a population of 44,724 (17,875 men, 10,457 women, and 16,392 children).

In 1912 and 1913 the navigation at the French ports was as follows :—

## Internal Communication.

### I. RIVERS, RAILWAYS, ETC.

On January 1, 1912, there were in France 23,899 miles of national roads, in addition to the vicinal roads.

Navigable rivers (1911), 5,450 miles ; actually navigated, 3,822 miles ; canals, 3,104 miles ; actually navigated, 3,052 miles ; rivers navigable for rafts, 1,908 miles.

By a law of 1842, the construction of railways was left mainly to companies, superintended, and if necessary assisted, by the State ; which now constructs lines which the companies work, and works on its own account one important State system. There are lines of local interest subventioned by the State or by the departments. The concessions granted to the six great companies expire at various dates from 1950 to 1960 ; the periods of State guarantee of four of them terminate at the end of 1914, and of the others in 1934 and 1935.

The length of line open for traffic in 1915 was 25,471 miles of lines, made up as follows :—

—	Miles	—	Miles
State :		Paris Belt Line . . . .	19.9
Old system . . . . .	1,875.3	Grand Belt Line . . . .	77.7
Purchased system . . . .	3,750.5		
Nord (Northern) . . . . .	2,471.3	Total . . . . .	24,774.0
Est (Eastern) . . . . .	3,085.1		
Paris-to-Orleans . . . . .	4,853.5	Secondary companies (mostly	
Paris-Lyon-Mediterranean	6,109.9	departmental railways)	839.5
Midi (Southern) . . . . .	2,530.8	Non-concessionary roads . .	19.9
		Grand Total. . . . .	25,633.4

In 1915 the total receipts were 49,406,200*l*.

On December 31, 1913, the length of tramways worked was 6,360 miles.

## II. POSTS AND TELEGRAPHS.

In 1914, France had 15,769 post-offices. The receipts on account of posts, telegraphs, and telephones, amounted to 402 million francs ; the expenditure to 358 million francs. The number of letters, &c., carried in 1914 was :—

—	Internal	International		Transit (1913)
		Dispatched	Received	
	millions	millions	millions	millions
Letters . . . . .	1,145	87	81	135
Post-cards . . . . .	325	5	5	2
Other packages . . . . .	1,325	97	48	142
Total . . . . .	2,795	189	134	279

The total length of the telegraphic lines in 1913 was 120,471 miles, with 451,195 miles of wire. There were 23,117 telegraph offices, of which 19,461 belonged to the State, and the remainder to railway companies and private persons. In 1913 there were despatched 67,771,000 telegrams, of which 51,410,000 were internal, 10,261,000 international, 2,124,000 in transit, and 3,976,000 were official.

In 1913 there were in France 11,451 urban telephone systems with 36,100 miles of line and 790,173 miles of wire ; number of conversations in 1913, 388,966,000. There were 20,331 inter-urban circuits with 72,181 miles of line, and 387,641 miles of wire ; conversations in 1913, 45,327,000. In 1913 the gross telephone receipts were 65,800,000 francs.

## Money and Credit.

The nominal value of the French money coined in France during the last 3 years was :—

Year	Gold	Silver	Nickel and Bronze	Total
	Francs	Francs	Francs	Francs
1913 . . . . .	246,281,160	21,654,148	1,580,150	269,515,458
1914 . . . . .	160,769,990	31,598,209	1,235,680	193,598,959
1915 . . . . .	—	86,328,362	87,166,055	87,200,022

The ordinary savings-banks numbered 550 (with 1,859 branch offices) on December 31, 1914; the number of depositors was 8,659,551, to the value of 4,011,424,748 francs. The National savings-banks, on December 31, 1914, held deposits and interest amounting to 1,807,554,495 francs due to 6,555,992 depositors, or on the average 275·71 francs to each depositor.

The Bank of France, founded in 1806, has the monopoly of emitting bank notes.

The situation of the bank on February 25, 1915, and on April 13, 1916, and March 29, 1917, was:—

	Feb. 25, 1915.	April 13, 1916.	March 29, 1917.
Cash:	£	£	£
Gold . . . . .	169,556,040	195,732,520	208,003,840

Treasury accounts current . . . . .	2,792,040	1,483,760	6,947,960
Other accounts current . . . . .	66,095,640	52,066,320	101,625,480

### Money, Weights, and Measures.

The *Franc* of 100 *centimes* is of the value of 9½*d.* or 25·225 francs to the pound sterling.

Gold coins in common use are 20 and 10 franc pieces. The 20 franc gold piece weighs 6·4516 grammes 900 fine, and thus contains 5·80645 grammes of fine gold. Silver coins are 5, 2, 1, and half franc pieces and 20-centime pieces. The 5-franc silver piece weighs 25 grammes ·900 fine, and thus contains 22·5 grammes of fine silver. The franc piece weighs 5 grammes ·835 fine, and contains 4·175 grammes of fine silver. Bronze coins are 10 and 5 centime pieces. There are also 25 centime metal pieces.

There is a double standard of value, gold and silver, the ratio being theoretically 15½ to 1. Of silver coins, however, only 5-franc pieces are legal tender, and of these the free coinage has been suspended since 1876.

The present monetary convention between France, Belgium, Italy, Switzerland, and Greece is tacitly continued from year to year, but may be denounced by any of the contracting States, and, if denounced, will expire at the end of the year, which commences on January 1, following the denunciation. According to its terms, the five contracting States have their gold and silver coins respectively of the same fineness, weight, diameter, and current value, and the allowance for wear and tear in each case is the same. The coinage of 5-franc pieces, both gold and silver, is temporarily suspended, and the issue of subsidiary silver is, with certain exceptions for special reasons, limited to 7 francs per head of the population of each State (but 6 francs for Greece). Each Government, in its public offices, accepts payments in the silver 5-franc pieces of each of the others, and in subsidiary silver to the amount of 100 francs for each payment. Each State engages to exchange the excess of its issues over its receipts of subsidiary silver for gold or 5-franc silver pieces, and at the termination of the convention each is bound to resume also its 5-franc silver pieces, and to pay in gold a sum equal to the nominal value of the coin resumed. The following are the total issues of the five States, authorised by the convention of 1897:—France, 394 millions of francs; Italy, 232·4; Belgium, 46·8; Switzerland, 28; Greece, 15.

The monetary system of the Union has been adopted, either wholly or partially, in Spain, Rumania, Bulgaria, Servia, Russia, Finland, and many of the South American States.

<i>Gramme</i> . . . =	15·43 gr. tr.	<i>Mètre</i> . . . =	39·37 inches.

## Diplomatic Representatives.

### 1. OF FRANCE IN GREAT BRITAIN.

*Ambassador*.—M. Paul Cambon, G.C.V.O. (appointed December 9, 1898).

*Councillor*.—M. A. de Fleurian, C.V.O.

*Second Secretaries*.—Baron Prosper de Barante, Comte de Montholon, and M. Roger Cambon.

*Third Secretaries*.—M. A. Thierry, L. de Lagarenne, and A. Delens.

*Attaché*.—Vicomte de Ribes.

*Military Attaché*.—Lieut.-Col. Vicomte de la Panouse, C.V.O., C.B.

*Naval Attaché*.—Commander Baron M. de Lostende.

*Commercial Attaché*.—M. J. Périer, C.B.

*Secretary-Archivist*.—J. Knecht.

*Consul-General in London*.—M. Gaston Kahn.

There are also French Consuls at—Cardiff, Dublin, Edinburgh, Glasgow, Liverpool, Manchester (V.C.), Newcastle, Southampton (V.C.), and other places.

### 2. OF GREAT BRITAIN IN FRANCE.

*Ambassador*.—Lord Bertie of Thame, P.C., G.C.B., G.C.M.G., G.C.V.O., Appointed January, 1903.

*Counsellor*.—George D. Grahame, M.V.O.

*Secretaries*—Eric C. E. Phipps, Hon. Patrick Ramsay, C. M. Palairret, N. M. Henderson, and E. St. J. Monson.

*Naval Attaché*.—Commander Fitzmaurice Acton, R.N.

*Military Attaché*.—Col. Herman Le Roy Lewis, C.B., D.S.O.

*Commercial Attaché*.—Sir H. Austin-Lee, K.C.M.G., C.B.

*Hon. Attaché*.—Lord Berwick.

*Consul-General*.—W. R. Hearn.

There are British Consuls at Ajaccio, Bordeaux, Brest, Calais, Cherbourg, Dunkirk, Havre (C.G.), Lyon, Marseille, Nantes, Nice, Rouen, and other towns.

## ANDORRA.

The republic of Andorra, which is under the joint suzerainty of France and the Spanish Bishop of Urgel, has an area of 191 square miles and a population of 5,231. It is governed by a council of twenty-four members elected for four years by the heads of families in each of the six parishes. The council elect a first and second syndic to preside; the executive power is vested in the first syndic, while the judicial power is exercised by a civil judge and two magistrates (*viguier*s). France and the Bishop of Urgel appoint each a magistrate and a civil judge alternately. The republic pays an annual due of 960 francs to France and 460 francs to the Bishop. A permanent delegate, the Prefect of the Pyrénées Orientales, moreover, has charge of the interests of France in the republic.

## Colonies and Dependencies.

The colonies and dependencies of France (including Algeria and Tunis) have an area roughly estimated at about 4,000,000 square miles with a population of about 44,600,000. Algeria, however, is not regarded as a colony but as a part of France, and Tunis and Morocco are attached to the Ministry of Foreign Affairs. The administration of the colonies is directed or controlled by the Ministry of the Colonies, which was organised as a separate department in 1894. Most of them enjoy some measure of self-government and have elective councils to assist the governor. The older colonies have also direct representation in the French legislature, Réunion, Martinique and Guadeloupe sending each a senator and two deputies; French India a senator and a deputy; Senegal, Guiana, and Cochin-China each a deputy, while most of the others are represented on the "Conseil Supérieur des Colonies." This council consists of the senators and deputies of colonies, delegates from other colonies, and officials and other persons appointed on account of their special knowledge or qualifications. Some only of the colonies have a revenue sufficient for the cost of administration. In the budget estimates of 1914 the expenditure of France directly on the colonial service was estimated at 110,918,291 francs (exclusive of a large expenditure on Algeria). Of this

expenditure 1,274,654 francs were for civil administration ; 93,291,007 francs for military services, and 7,491,539 francs for penitentiary services. The French Ministries of War and Marine have also to bear heavy colonial expenses not included in the budget relating to the colonies.

The area and population of the colonial domain of France in 1913, as given in the Report of the Budget Commission on the Budget for 1914 are as follows :—

	Year of Acquisition	Area in Square Miles	Population
<i>In Asia :—</i>			
India . . . . .	1679	196	273,000
Annam . . . . .	1884	309,980	14,500,000

## ASIA.

## FRENCH INDIA.

The chief French possession in India is Pondicherry. It was founded by the French in 1674, taken by the Dutch in 1693, and restored in 1699. The English took it in 1761, restored it in 1765, re-took it in 1778, restored it a second time in 1785; retook it a third time in 1793, and restored it in 1814.

As established by the treaties of 1814 and 1815, the French possessions in India, consist of five separate colonies, which cover an aggregate of 50,803 hectares (about 196 square miles), and had in 1915 the following estimated populations:—

*Pondichéry . . . . .	47,185	Modéliarpeth . . . . .	15,740	Nodoukadou . . . . .	7,305
Oulgaret . . . . .	24,345	Anacoupom . . . . .	10,868	Cotchéry . . . . .	6,028
Villenour . . . . .	18,392	*Karikal . . . . .	18,806	*Chandernagar . . . . .	27,644
Tiroubouvané . . . . .	18,382	Tirnoular . . . . .	10,583	*Mahé . . . . .	10,819
Bahour . . . . .	18,048	Grande Aldée . . . . .	7,961	*Yanaon . . . . .	5,011
Vettapacom . . . . .	13,527	Neravy . . . . .	6,184	Total . . . . .	266,828

In 1915 the population of the Provinces was as follows:—Pondichéry, 166,437; Karikal, 56,867; Chandernagar, 27,644; Mahé, 10,819; Yanaon, 8,011; Total, 269,828.

The colonies are divided into five *dépendances* (the chief towns of which are marked with an asterisk in the above table) and seventeen communes, having municipal institutions. There is also an elective general council. The Governor of the colonies resides at Pondichéry. The colonies are represented in the Parliament at Paris by one senator and one deputy. At Pondichéry the birth-rate in 1915 was 34·5, and the death-rate 38·8 per 1,000. There were in 1915-16, 59 primary schools and 3 colleges, all maintained by the Government, with 302 teachers and 9,096 pupils. Local revenue and expenditure (budget of 1916) 1,834,722 rupees; expenditure of France (budget of 1916), 230,000 francs. Outstanding debt, January 1, 1916, 354,183 francs. The principal crops are paddy, ground-nut, and ragi. There are at Pondichéry 5 cotton mills, and at Chandernagar 1 jute mill; the cotton mills have, in all, 1,622 looms and 171,213 spindles, employing 7,335 persons. There are also at work 2 oil

factories and a few oil presses for ground nuts, 1 ice factory and a cocoatine factory. The chief exports from Pondichéry are oil seeds. At the ports of Pondichéry, Karikal, and Mahé in 1915 the imports amounted to 6,187,351 francs, and the exports to 21,155,197 francs. At these three ports in 1915, 263 vessels of 339,131 tons entered and 253 of 396,578 tons cleared. Pondichéry is visited by French steamers sailing monthly between Colombo and Calcutta in connection with the Messageries Maritimes. Railway open, 43 miles, Pondichéry to Villapuram, and Peralam to Karikal.

## FRENCH INDO-CHINA.

### CENTRAL GOVERNMENT.

French Indo-China, with an area of about 256,000 square miles and a population in 1914 of 16,990,229, of whom 23,700 were European (excluding military forces), consists of 5 States: the Colony of Cochín-China, the Protectorates of Annam, Cambodia, Tonking and Laos; and Kwang-Chau-Wan leased from China as well as the territory around Battambang, which was ceded by Siam in 1907. The whole country is under a Governor-General, assisted by a Secretary-General, and each of the States has at its head a functionary bearing the title of Resident-Superior, except in the case of Cochín-China, which, being a direct French Colony while the others are only Protectorates, has a Governor at its head.

Throughout the country there are native tribunals from which there is an appeal to courts at Saigon and Hanoi. In these appeal courts European judges, in matters affecting natives, are assisted by Annamite mandarins. In 1905 the penal system was reformed, punishment by torture (the *cangue*, &c.) being abolished.

There is a common budget for the whole of Indo-China, and also a separate budget for each of the States. The Provinces, about 120 in number, have also their budget, as have the municipalities. The general budget is supported by receipts from customs, Government monopolies, indirect contributions, posts, telegraphs, and railways in all the countries of the union, and besides maintaining these, provides for military and judicial services, public works, and other matters relating to the whole of the union. For 1917 the revenue and expenditure of the general budget balanced at 42,399,800 piastres. The outstanding debt of Indo-China on January 1, 1915, amounted to 345,913,000 francs.

The military force, totalling about 25,514, are commanded by the Commandant-Superior, a general of division with the same rank as army corps generals in France. The naval force comprises a gun-boat, 3 destroyers, several torpedo-boats, two submarines, and a despatch vessel.

Indo-China is largely an agricultural country, rice being the principal product and maize the second. The country also has coal, lignite, antimony, tin, wolfram and zinc mines. Total mineral production in 1914, 20,696 tons; in 1915, 34,535 tons (coal not included). Exports of coal in 1915, 484,496 tons.

In 1887 the French possessions in Indo-China, including Annam, Tonking and Cambodia, were united into a Customs Union. The total value of the imports in 1915 was 6,483,784*l.*, and the exports 15,449,568*l.* The chief export is rice, forming about 70 per cent. of the total (1,085,600 tons in 1915). Other exports are fish, pepper, hides, coal, cotton, rubber and sugar.

Into Great Britain in 1915 the imports from Indo-China amounted to 217,632*l.* (chiefly rice).

In 1914, 2,214 vessels of 2,480,700 metric tons entered, and 2,175 vessels

of 2,310,804 tons cleared. Of those entered 307 of 779,738 tons were French, 397 of 845,422 tons were English, and 114 of 165,068 tons were German.

The oldest railway in Indo-China is that from Saigon to Mytho. In recent years there has been rapid development of the railway system. Total length of line at end of 1915, Government lines, 747 miles; private lines, 246 miles; total, 993 miles. There are tram lines and light railways at Hanoi and Saigon. Within the union there are (1912) 8,719 miles of telegraph line with 376 telegraph offices, and 12 urban and 5 inter-urban telephone systems with (together) 270 miles of line. There are 363 post offices (1912).

The Bank of Indo-China, with an authorised capital of 48 million francs and reserve and redemption funds amounting to 33,500,000 francs, has till 1920 the privilege not only of making advances on security, but also of engaging in financial, industrial, or commercial enterprise in Indo-China and New Caledonia. For French Indo-China there is a coinage of silver pieces, piastres,  $\frac{1}{2}$ -piastres,  $\frac{1}{4}$ -piastres, and  $\frac{1}{16}$ -piastres; the piastre (since 1895) weighs 27 grams, and the fractional coins in proportion; the piastre and  $\frac{1}{2}$ -piastre are '900 fine, but the  $\frac{1}{4}$ - and  $\frac{1}{16}$ -piastre (since 1898) only '835 fine. The piastre is usually worth rather less than 24d. There are two bronze coins, one equal to the 100th and the other the 375th part of a piastre.

*Acting British Consul at Saigon.*—S. G. Gorton.

*British Vice-Consul at Saigon.*—J. L. O'Connell.

*British Vice-Consul at Haiphong.*—J. Giqueaux.

#### STATES AND PROTECTORATES.

### Cochin-China.

The area of French Cochin-China is estimated at 20,000 square miles. The whole is divided into 17 provinces. The towns of Saigon and Cholon have been formed into municipalities. The Colonial Council contains 18 members. The colony is represented in France by one deputy. The population consists mainly of Annamites, Cambodians, Mois, Chams, Chinese, and a few Indians, Malays, Tagals, and foreigners. In 1914 the total population was put at 3,050,785, of whom 11,251 were Europeans (excluding the military forces). Saigon had, in 1915, a population of 100,000, of whom 6,560 were Europeans, exclusive of 2,200 troops; the town of Cholon has about 168,100 inhabitants, of whom about 76,000 were Chinese. There are about 380 schools, with 800 teachers, and 19,000 pupils. There are many establishments for medical aid.

The total area is put at 5,011,277 hectares (1 hectare = 2·47 acres) of which 1,522,666 hectares are cultivated, and 3,488,611 hectares uncultivated (1,748,694 hectares being forest). The chief culture is rice, to which 1,358,706 hectares are devoted; production in 1914-15, 2,051,292 tons of paddy. The planting of rubber has been undertaken in recent years. Some 70,000 hectares have been taken up for this purpose of which 17,238 hectares are planted with 5,180,280 trees in 1915. Other crops are maize, beans, sweet potatoes, earth-nuts, cotton, sugar-cane, tobacco, coffee, coco-nuts, betel-nuts, pepper, oranges, bananas, &c. The farm animals comprise 11,243 horses, 241,744 buffaloes, 109,071 cattle, 709,380 pigs, 3,492 sheep and goats.

River and coast fishing is actively carried on; there are about 73,520 boats on the rivers, and 3,000 on the coast; the fishery products are valued at 2,800,000 francs yearly. There are 9 rice mills in Saigon and Cholon, turning out each from 450 to 900 tons a day. In these towns are also 2 saw-mills, 2 soap factories, and a varnish factory. Commerce is mostly in the

hands of Europeans and Chinese, but about 22,000 Annamites are small traders. The chief exports are rice, fish and fish oil, pepper, cotton, copra, silk, shrimps, isinglass, hides, cardamoms. During 1915, 649 steamers of 1,496,253 tons entered at the port of Saigon, of which 223 (576,836 tons) were British. The vessels of the Messageries Maritimes and of the Chargeurs Réunis Companies visit Saigon regularly. There is also constant communication with Hong Kong and Singapore by British and German vessels. (For railways see Indo-China.) At Saigon there are 5 banks or bank-agencies. The total exports in 1915 amounted to 7,796,240*l.*, and imports to 4,576,204*l.*

In 1916 the local budget balanced at 7,924,100 piastres.

### Annam.

French intervention in the affairs of Annam, which began as early as 1787, was terminated by a treaty, signed on June 6, 1884, and ratified at Hué on February 23, 1886, by which a French protectorate has been established over Annam. The King **Khai-Dinh**, who succeeded to the throne in 1916, governs the country, assisted by a Council of Ministers, in accordance with the wishes of the French Government. The ports of Tourane, Qui-Nhon, and Xuan Day are opened to European commerce, and the customs revenue conceded to France; French troops occupy part of the citadel (called Mang-Ca) of Hué, the capital (population 60,611). Bin-Dinh, the largest town, has 74,400 inhabitants. Annamite functionaries, under the control of the French Government, administer all the internal affairs of Annam. The area of the protectorate is about 52,100 square miles, with a population in 1914 of 5,200,000, including 2,117 Europeans (exclusive of the military forces). The population is Annamite in the towns and along the coast, and consists of various tribes of Moïs in the hilly tracts. There are 5 high schools with 23 teachers and 596 pupils; and 46 primary schools for boys with 132 teachers and 2,620 pupils, and 7 primary schools for girls with 12 teachers and 232 pupils. Local budget, 1916, balanced at 4,451,863 piastres. The Phanrang river has been utilised to irrigate about 10,000 acres, and similar works, on a smaller scale, have been carried out in Central Annam. The productions are rice, maize and other cereals, the areca nut, mulberry, cinnamon, tobacco, sugar, betel, manioc, bamboo, excellent timber, also caoutchouc, cardamoms, coffee, dye, and medicinal plants. Raw silk is produced, amounting annually to about 800,000 kilogrammes, one-third of which is exported, and the remainder used in native manufactures. There are about 215,000 head of cattle in Annam and cattle rearing is of some importance. There are iron, copper, zinc, and gold in the province of Quang-nam; the mines are worked by natives. At Nongson, near Tourane, coal mines are worked. In North, Central, and Southern Annam there are salt works. Imports in 1915, 144,244*l.*; exports, 393,579*l.* The chief imports are cotton-yarn, cottons, tea, petroleum, paper goods, and tobacco; chief exports, sugar, rice, cotton and silk tissues, and paper. In 1915, 27 ships (14 Japanese, 5 Norwegian, 3 English, 2 French), of a total tonnage of 32,817, cleared the port of Tourane.

### Cambodia.

Area, 45,000 square miles; population in 1914, 1,634,252, of whom 1,092 were Europeans (excluding the military forces). The present King, **Sisowath**, in 1904 succeeded his late brother, Norodom, who had recognised the French protectorate in 1863. The country is divided into 57 provinces. The two chief towns are Pnom-Penh (population 62,255), the capital of the territory, and Kampot, a seaport but not accessible for sea-going vessels. The budget

for 1916 balanced at 5,572,000 piastres, including a sum of 525,000 piastres allowed for the civil list of the king and princes. There are 50 schools with 3,681 pupils. The chief products are rice, betel, tobacco, indigo, sugar tree, and silk tree, pepper, maize, cinnamon, coffee. Pepper is grown by 61 villages with 4,780 planters, the production being over 750,000 kilogrammes annually. Cotton growing is extending; the production is estimated at 9,000 tons, the whole of which is exported. Cattle breeding is a flourishing native industry. Salt is worked. There is a cotton-ginning mill at Khsach-Kandal, near Pnom-Penh. The external trade is carried on mostly through Saigon in Cochinchina. The imports comprise salt, wine, and textiles; the exports comprise salt fish, cotton, tobacco, rice, also boats. In 1914, 294 vessels of 42,033 tons, and in 1915, 307 vessels of 45,093 tons engaged in foreign trade visited the ports of Cambodia.

### Tonking.

This territory, annexed to France in 1884, has an area of 46,400 square miles, and is divided into fourteen provinces, with 8,000 villages and a population in 1911 of 6,119,720, of whom 6,132 were Europeans (exclusive of military forces). The King of Annam was formerly represented in Tonking by a viceroy, but, in July, 1897, he consented to the suppression of the vicereignty and the creation of a French residency in its place. Chief town Hanoi, an agglomeration of many villages, with a population of 150,000 in 1915. This town on January 1, 1902, became the capital of Indo-China, instead of Saigon. There are 38 schools with (1912) 7,891 pupils. In 1902 a school of medicine for natives was opened at Hanoi. The local budget for 1916 balanced at 9,806,357 piastres. The chief crop is rice, exported mostly to Hong-Kong; in 1915, 48,470,400 francs' worth was exported. Other products are maize, sugar-cane, silk, cardamoms, cotton, coffee, various fruit trees, and tobacco. About 500,000 kilogrammes of raw silk are produced annually, of which 300,000 kilogrammes are used in native weaving and the remainder exported.

In 1915, the imports were valued at 1,580,400*l.*, and the exports at 3,233,600*l.* Chief imports are metals and metal tools and machinery, yarn and tissues, beverages; chief exports, rice, maize, and animal products. The principal port is Haiphong, which is visited regularly by the steamers of two French lines. In 1915, 873 vessels of 999,465 tons gross entered and cleared this port, 270 vessels (317,055 tons) being British. In 1915, the foreign imports amounted to 26,641,600 (25,529,400 francs in 1914), and the exports 135,159,400 francs in 1915). The transit trade to and from Kwangsi is small, but the transit trade with Yunnan is considerable and increasing since the completion of the railway which now connects Haiphong and Yunnanfu.

The **Laos** territory, under French protectorate since 1893, is estimated to contain 98,000 square miles, and in 1914 there were 640,877 inhabitants. The capital is Vientiane. In the country there are three protected states, Luang Prabang, which has a capital of the same name, the residence of the King, who is assisted in his government by a French Administrator; the other protected states are Bassac and Muong Sing. The soil is fertile, producing rice, cotton, indigo, tobacco and fruits, and bearing teak forests, from which the logs are now floated down the Mekong to Saigon. Gold, tin, lead and precious stones are found, and concessions have been granted to several French mining companies. But there are serious difficulties with the natives and for commercial purposes the country is almost inaccessible. It can be entered only by the Mekong, which is

barred at Khone by rapids. A railway, four miles in length, has been constructed across that island, and by means of it several steam launches have been transported to the upper waters, where they now ply. A telegraph line connects Hué in Annam with the towns on the Mekong, and these with Saigon. The cost of the Laos administration is borne by Cochinchina (to the extent of six-thirteenths), Tonkin and Annam (five-thirteenths), and Cambodia (two-thirteenths). The local budget for 1916 balanced at 1,577,650 piastres.

In 1900 the territory of **Kwang Chau Wan** on the coast of China, leased from China in 1898, and increased in 1899 by the addition of 2 islands in the bay, was placed under the authority of the Governor-General of Indo-China. The territory has been divided into 3 administrative circumscriptions, but the Chinese communal organisation is maintained. Its area is about 190 square miles and its population about 168,000. The imports are chiefly cotton yarns, opium, petroleum; the exports are straw sacks, swine, mats. The port is a free port. The territory is regularly visited by the vessels of two French companies. Official buildings, a post office, roads, &c., have been or are being constructed. The local budget for 1917 balanced at 429,700 piastres.

## ALGERIA.

(L'ALGÉRIE.

## Government.

The government and administration of Algeria are centralised at Algiers under the authority of the Governor-General, who represents the Government of the Republic throughout Algerian territory. With the exception of the non-Mussulman services of Justice, Public Instruction, Worship, and the Treasury, which are under competent ministers, all the services are under his direction. He has to prepare a special budget for Algeria, he grants concessions for works, and he contracts loans in the name of the Colony.

The budget of Algeria which, since 1901, has been entirely distinct from that of France, comprises under revenue the imposts of every sort which are collected within the Colony and under expenditure the whole of the civil disbursements. The expenditure on War and Marine is still at the cost of the mother country, as is also the burden of guarantees of interest on railways up to 1926. The budget, prepared by the Governor under the control of the Minister of the Interior, is discussed and voted by the Financial Delegations and the Superior Council. These Delegations were instituted in 1898 to enable the body of tax-payers to state their views on questions of imposts by means of elected delegates. There are three Delegations representing respectively the French colonists, the French tax-payers other than colonists, and the Mussulman natives. The Superior Council is composed of elected members and of high officials. Lastly, the Governor is assisted in the exercise of his functions by a purely consultative council of government.

The French Chambers have alone the right of legislating for Algeria, while such matters as do not come within the legislative power are regulated by decree of the President of the Republic. Each department sends one senator and two deputies to the National Assembly.

*Governor-General.*—M. C. Lutaud, appointed March 22, 1911.

## Area and Population.

The census of March 4, 1906, showed a population (including the military forces) amounting to 5,231,850 on an area of 184,474 sq. miles. Since 1901 the area has been increased by the acquisition of new territories in the south, and now extends to about 343,500 sq. miles. The colony has been organised in 2 great divisions called respectively Northern and Southern Algeria. Northern Algeria consists as formerly of Civil Territory and Territoire de Commandement, but the Civil Territory has been extended, while the Territoire de Commandement has been diminished and will before long be completely merged in the Civil Territory. Northern Algeria contains 17 arrondissements and 269 communes and 74 are mixed communes. Southern Algeria consists of the 4 Territories of Ain Sefra, Ghardaia, Tougout, and the Saharan Oases, organized under decree of August 14, 1905. These territories contain 12 communes of which 5 are mixed and 7 native.

\* See Morocco.

Population, including military forces, on March 5, 1911 :—

	Municipal Population			Population numbered separately			Grand Total
	Euro-pean	Native	Total	Euro-pean	Native	Total	
Northern Territory	746,510	4,259,474	5,005,984	40,038	23,500	63,538	5,069,522
Southern Territory	5,533	481,052	486,585	3,441	4,280	7,721	494,306
Grand Total	752,043	4,740,526	5,492,569	43,479	27,780	71,259	5,563,828

Population according to Departements and Territories in 1911 :—

Northern Algeria (Departements-)	Population	Southern Algeria (Territories)	Population
Alger . . . . .	1,720,881	Ain Sefra . . . . .	146,999
Oran . . . . .	1,230,195	Ghardaia . . . . .	141,377
Constantine . . . . .	2,118,446	Touggout . . . . .	165,551
		Saharan Oases . . . . .	40,379
Total . . . . .	5,069,522	Total . . . . .	494,306

The total population in 1891 was 4,124,732, in 1896, 4,429,421. In 1911, the native population numbered 4,411,276; French, 492,650; naturalised Jews and their offspring, 70,271; Tunisians, 2,375; Moroccans, 23,115; Spaniards, 135,150; Italians, 36,791; other foreigners 20,927. Of the municipal population of Northern Algeria, 2,484,400 were males, and 2,236,574 were female.

In 1912 there were 41,917 marriages, 160,499 births, and 95,104 deaths.

The chief towns with the total communal population in 1912 were: Alger, 172,397; Oran, 123,086; Constantine, 65,173; Bône, 42,039; Sidi-bel-Abbes, 30,942; Tlemçen, 39,874; Mostaganem, 23,166; Mascara, 24,254; Blida, 35,461; Philippeville, 27,137; Sétif, 26,261.

### Religion and Instruction.

The native population is entirely Musulman, the Jews being now regarded as French citizens. The Roman Catholic Church has an archbishop and 2 bishops, with 386 officiating clergymen. There are 21 Protestant pastors and 7 Jewish rabbis sharing in Government grants.

At Algiers (city) there is an institution for higher instruction attended in 1913 by 796 students (334 for Law, 137 Medicine and Pharmacy, 127 Science, 198 Letters); Professors (1911), 102. There are higher Musulman schools (*médersas*) at Algiers, Tlemçen, and Constantine, where 227 pupils in 1913 were prepared for native employments. In Algeria there are 22 establishments for secondary instruction with (1913) 6,686 pupils (4,976 boys and 1,710 girls). In 1913 there were 1,268 primary and infant schools, public and private, with 3,249 teachers and 145,933 pupils, inclusive of 226 Musulman schools. There were four normal schools for men teachers with 25 professors and 110 students (70 Musulman), and six normal schools for women teachers with 22 professors and 218 students.

### Crime.

There is an Appeal Court at Algiers, and in the arrondissements are 16 courts of first instance. There are also commercial courts and justices of the

peace with extensive powers. Criminal justice is organised as in France for Europeans. Since 1902 there have been criminal courts and special repressive tribunals for trying natives accused of crime. In 1913, 5,066 persons were arrested for various crimes. On December 31, 1913, the number incarcerated was 7,077, including 33 females.

Musulman justice is administered to natives by the Cadis in the first instance with an appeal to French courts.

### Finance.

The natives pay only direct taxes. The departments of War and Marine are excluded from the estimates, but the proceeds of the Military tax, the Government monopolies, and some other revenues are paid to France. The total expenditure (including military and extraordinary disbursements) exceeds the Algerian revenue by about 75,000,000 francs.

The budget estimates for five years were as follows :—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Revenue . . .	5,806,681	6,289,012	6,854,580	6,804,132	5,216,101
Expenditure . . .	5,806,239	6,287,876	6,853,024	6,801,420	5,215,553

The details of the 1916 budget were as follows :—

Revenue		Expenditure	
	Francs.		Francs.
Taxes (direct) . . .	13,775,046	Administration, debt . . .	34,519,685
Taxes (indirect) . . .	59,676,195	Interior . . .	29,780,107
State domain . . .	10,198,645	Native affairs . . .	6,495,337
Monopolies, &c. . .	10,496,319	Finance . . .	11,616,371
Various . . .	6,253,198	Posts and Telegraphs . . .	14,944,867
Receipts <i>d'ordre</i> . . .	26,079,849	Public Works . . .	21,439,099
Extraordinary . . .	2,697,283	Agriculture, &c. . .	4,004,104
Special revenues . . .	1,226,000	Various . . .	4,801,893
		Extraordinary . . .	2,697,283
Total . . .	130,402,535 (5,216,101.)	Total . . .	130,388,836 (5,215,553.)

For the Southern Territories in 1916 the revenue was put at 5,130,992 francs, and the expenditure at 5,035,996 francs.

### Defence.

The military force in Algeria constitutes the XIXth Army Corps, consisting of 3 divisions. French residents are under the same obligation to serve as in France; natives are under the obligation to serve 3 years with the colours and 7 in the Reserve, but the total number taken is fixed, and there is a ballot, substitution being allowed. The troops are permanently stationed in North Africa, but they belong to the 'Metropolitan,' not to the Colonial Army. There are 3 regiments of zouaves, each of 5 battalions, and 2 battalions of African light infantry, each of 5 companies; 3 regiments of cavalry (*Chasseurs d'Afrique*), of 5 squadrons; 9 field batteries, 4 mountain batteries, and 2 garrison battalions; also about 12 companies of engineers. These are all European troops and in the case of the artillery and engineers

their recruiting dépôts are in France. The Foreign Legion of 2 regiments, of 4 battalions is recruited from foreigners of any nationality, but officered chiefly by Frenchmen; the headquarters of both regiments are in Algiers, but battalions are sent to any colony where they may be required. The Natives are 3 regiments of Algerian Tirailleurs each of 6 battalions (one has now 8), and 3 regiments of Spahis (Arab cavalry) each of 5 squadrons. The officers and a proportion of the non-commissioned officers of the native regiments are French. Some of the troops ordinarily belonging to Algeria are in Morocco, and these are not counted above.

The troops in Tunis form a fourth division, headquarters at Tunis. The Algiers divisions each consist of only one infantry and one cavalry brigade, with a field artillery division of 3 batteries. The division, in Tunis, has 2 infantry brigades, a cavalry brigade, and 6 field batteries. The battalions of garrison artillery are at Algiers and Bizerta, and the headquarters of 2 engineer battalions are at the same places. The strength of the troops in Algeria, according to the budget estimate for 1914, is 63,827 of all ranks.

### Agriculture and Industry.

There exists in Algeria a small area of highly fertile plains and valleys in the neighbourhood of the coast, mainly owned by Europeans, which is cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, &c., but the greater part of Algeria is of limited value for agricultural purposes. The northern portion is mountainous and generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is very inaccessible.

The soil is, under various systems, held by proprietors, by farmers, and by Métayers or Khammés. Most of the State lands have been appropriated to colonists. The population engaged in agriculture in 1909 was 3,322,520; 213,756 being Europeans. The chief cereal crops are wheat, barley, oats, maize, potatoes, beans, and dira. Flax, tobacco and silk are also cultivated.

In 1916 the yield of wine was 193,187,852 gallons. The orange, date, mandarine, citron, banana, pomegranate, almond, fig, and many other fruits grow abundantly. The production of olive oil is an important industry. Cotton in 1915 was sown on 246 acres. Forests cover 6,559,490 acres, and, for the most part, belong to the State and communes. The greater part is mere brushwood, but on 645,000 acres are cork-oak trees, from which, in 1913, 11,694 tons of cork were obtained. The dwarf-palm and alfa are worked on the plains. Timber is cut for firewood, also for industrial purposes, for railway sleepers, telegraph poles, &c., and for bark for tanning. Considerable portions of the forest area are also leased for tillage, or for pasturage for cattle, sheep, or pigs. The forest revenue annually amounts to over 240,000*l*.

In 1911 there were in Algeria 226,764 horses, 192,484 mules, 279,315 asses, 1,113,952 cattle, 8,528,610 sheep, 3,861,847 goats, and 110,012 pigs.

There are extensive fisheries for sardines, allaches, anchovies, sprats, tunny-fish, &c., and also shell-fish. In 1912, 5,392 persons, and 1,410 boats of 4,406 metric tons were employed in fishing, and the fish taken were valued at 205,610*l*.

In 1914, 96 mines (out of 186 concessions) were worked for iron, zinc, lead, mercury, copper, antimony, and petrol. The output in 1913 was as

follows: iron ore, 1,432,748 tons; zinc and lead ore, 118,884 tons; phosphate rock, 370,934 tons; mercury, 300 tons; petroleum, 67 tons.

### Commerce.

The foreign trade of Algiers in recent years has been as follows (in 1,000*l.* sterling):—

—	Imports	Exports	—	Imports	Exports
1911	22,607	20,537	1914	20,964	14,084
1912	26,785	21,843	1915	18,749	21,479
1913	26,692	20,046	1916	21,355	21,355

Of the imports in 1916 the value of 15,629,520*l.* came from France; of the exports the value of 19,722,240*l.* went to France.

Chief imports and exports in thousands of francs for 2 years:—

Imports	1915	1916	Exports	1915	1916
Cottons . . . . .	60,336	89,168	Sheep . . . . .	43,512	32,047
Woolens . . . . .	7,881	2,184	Hides and skins . . . . .	8,602	9,158
Clothing and linen . . . . .	10,659	20,708	Wool . . . . .	19,708	11,395
Skins and manuf. thereof . . . . .	13,963	19,695	Wheat . . . . .	34,818	23,689
Machinery and parts . . . . .	11,195	11,743	Oats . . . . .	11,644	24,816
Other metal work . . . . .	10,445	10,276	Barley . . . . .	7,358	34,117
Furniture and wood work . . . . .	27,322	17,440	Olive oil . . . . .	7,401	11,071
Toys, brushes, &c. . . . .	8,982	6,307	Cork . . . . .	4,934	6,659
Paper, &c. . . . .	20,221	22,751	Wine . . . . .	207,623	259,584
Coal . . . . .	18,986	19,548	Phosphates . . . . .	5,647	9,505
Sugar . . . . .	23,167	21,874	Iron ore . . . . .	11,626	13,330
Vegetable oil . . . . .	10,889	5,635	Zinc ore . . . . .	4,199	7,244
Iron and steel . . . . .	4,788	7,094	Fruit . . . . .	15,224	17,383
Coffee . . . . .	13,794	14,387	Tobacco, cigars, &c. . . . .	21,235	22,279

In 1915 the receipts of the customs authorities amounted to 31,964,082 francs (1,278,563*l.*); in 1916, to 38,041,036 (1,521,641*l.*).

Total trade between the United Kingdom and Algeria (Board of Trade returns) for 5 years:—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Algeria into U.K. . . . .	1,403,205	1,311,599	1,134,572	1,511,887	2,295,887
Exports to Algeria from U.K. . . . .	986,901	1,340,498	968,361	1,414,818	2,158,891

### Shipping and Communications.

In 1916, in the French and Foreign trade, 2,457 vessels of 2,297,243 tons net entered Algerian ports.

On January 1, 1913, the mercantile marine of Algiers consisted of 1,012 vessels of 34,665 tons net.

Algiers is now the most important coaling station in the Mediterranean.

National roads have a length of 1,826 miles.

In 1913 there were 2,793 English miles of railway open for traffic (exclusive of lines on Tunisian territory).

The postal receipts in 1913 were 6,025,642 francs, and there were 702 post offices. The telegraphic receipts were 2,301,359 francs, and those from telephones 1,650,846 francs. The total for the three services was 9,977,847 francs.

In 1913, 106,150 letters, 7,722 post cards, 2,727 picture post cards, and 31,634 newspapers were handled by the post office.

The telegraph of Algeria consisted in 1914 of 8,977 miles of line and 24,550 miles of wire, with 634 offices. Telephone urban systems, 4,690 miles of line; inter-urban, 7,903 miles of line. Number of subscribers (January 1, 1914), 7,458.

The Bank of Algeria, whose privilege has been extended to the end of 1920, is a bank of issue, with a capital of 20,000,000 francs, but its note circulation must not in any case exceed 150,000,000 francs. Several co-operative agricultural banks, assisted by Government funds, are in operation. There are in Algeria 7 savings banks with, on December 31, 1909, 19,427 depositors, the amount due to depositors being 6,786,367 francs.

### FRENCH EQUATORIAL AFRICA (FRENCH CONGO).

The French Congo extends along the Atlantic coast between Kamerun and the territories of the Belgian Congo, with the exception of the Spanish territory on the coast from the Muni river on 1° N. lat. to Kamerun, and inland to the meridian of 11° 20' E. of Greenwich, and the Kabiinda region, which is Portuguese. Inland it is bounded by the Congo and Ubanghi rivers and stretches northwards to the Bahr-el-Ghazal and Lake Chad. French acquisition began on the Gabun river in 1841; Libreville was founded in 1849; Cape Lopez was gained in 1862, and the French possessions extended along the coast for about 200 miles. Since then the territories have been increased by exploration and military occupation and their limits have been defined in a series of international conventions. By a convention, dated November 14, 1911, France agreed to cede certain parts of the colony to Germany in return for German recognition of the French protectorate in Morocco. The total area ceded is about 107,270 square miles with a population of about 1,000,000. Sleeping sickness is very prevalent in the district and is fast decimating the population. At the same time Germany ceded to France from her Kamerun territory 6,450 square miles. (See map in the STATESMAN'S YEAR BOOK for 1912.)

The area is about 669,000 square miles containing a population estimated in 1915 at 9 millions of negro and other races. By decree of January 15, 1910, the French Congo is divided into three circumscriptions which form three colonies, viz.:—the Gabun Colony (capital Libreville), the Middle Congo Colony (capital Brazzaville), and the Ubangi-Shari Colony (capital Bangui). The three Colonies have each a Lieutenant-Governor; they all have financial and administrative autonomy, and each has an administrative council; the Chad Territory, which was formerly a dependency of the Ubangi-Shari Colony, was, by decree issued on April 12, 1916, made a separate colony, and is administered by an administrator.

By decrees issued on January 15, 1910, the name of the French Congo was changed into French Equatorial Africa, which extends over the Gabun, the Middle Congo, the Ubangi-Shari Colonies, and Chad Territory.

The Lieutenant-Governors are under the Governor-General of French Equatorial Africa, having his headquarters at Brazzaville, who is assisted by a Secretary-General and a Council of Government. There is a general budget for the whole of French Equatorial Africa, and also separate budgets for the colonies. Local revenues accrue chiefly from customs duties; there are native poll taxes. The sale of alcohol to natives is restricted. For 1916 the budgets showed the following figures: General budget, 3,690,000 francs;

loan fund, 1,253,101 francs. The colonial budgets were as follows: Gabun, 1,990,000 francs; Middle Congo, 1,968,689 francs; Ubangi, 1,915,000 francs; Chad Colony, 1,900,000 francs. In the colony there are (1916) 45 mission schools for boys and 10 for girls, with about 3,600 pupils (724 being girls), and 94 public schools with about 3,900 pupils.

There is considerable shipping at Port Gentil and Libreville, the chief ports; but at Loango steamers must anchor about three miles off the coast. All three ports are visited by the vessels of the Chargeurs Réunis, and the steamers of the Elder Dempster Line. In 1913, 193 vessels of 437,855 tons entered the ports of the French Congo. The total imports were valued in 1913 at 21,181,768 francs, and the exports at 36,669,037 francs. Whale fishing commenced in 1912. The military force of the colony (1914) consisted of 7,145 men, of whom 530 are Europeans.

The Central African telegraph line connects Brazzaville with Loango, and is in communication with the English Atlantic cable. Wireless telegraphy connects Brazzaville and the head of the Southern Railway in the Loango Region, a distance of 300 miles, and also Brazzaville and Leopoldville. In the Chad region there are several stations connecting Fort Lamy, Ati, Faya, and Maô. A line has been laid to connect Brazzaville with Bangui, and another to connect Bangui with Fort Lamy. The total length of line in operation (end of 1914) is about 2,366 miles.

On the north-east of Lake Chad is the state of Kanem, which was completely subjected to France in 1903, and is now only a district of the Shari territory with Maô for its capital. Wadai, to the east of Kanem, with an area of about 170,000 square miles, and a semi-civilised population of about 1,000,000, accepted the French Protectorate in the summer of 1903. In 1911 a French force occupied Arada, some miles to the north of the capital, Abeshr, which is in communication with Benghazi, on the coast of Tripoli, by caravans, and in 1913 Ain-Galakka.

## MADAGASCAR.

### Government.

The last native sovereign of Madagascar, Rànavàlona III. (born 1861), succeeded in 1883. The French having claimed a portion of the north-west coast as ceded to them by local chiefs, hostilities were carried on in 1882-84 against the Hovas, who refused to recognise the cession. In 1885 peace was made, Diégo Suarez being surrendered to France. A French Resident-General was received at the capital, and the foreign relations of the country were claimed to be regulated by France. By the Anglo-French agreement of August 5, 1890, the protectorate of France over Madagascar was recognised by Great Britain; but the Native Government steadily refused to recognise any

protectorate. In May, 1895, a French expedition was despatched to enforce the claims of France, and on October 1, the capital having been occupied, a treaty was signed whereby the Queen recognised and accepted the protectorate. By a unilateral convention made in January, 1896, Madagascar became a French possession, and by law promulgated August 6, 1896, the island and its dependencies were declared a French colony.

On February 27, 1897, the Queen was deposed by the Resident-General, and on March 11 she and her family were deported to the island of Réunion; whence, in March, 1899, she was transferred to Algiers.

*Acting Governor-General.*—M. H. Garbit (1914).

A Consultative Council of Administration has been established at Antananarivo. The Colony is not represented in the French Parliament, nor has it any elective assembly. The administrative system is based on the autonomy of the different races. The administrators appoint as local governors and chiefs of districts usually those who have been chosen by popular vote. Natives are employed to a large extent in subordinate positions both in the civil and military administration.

### Area and Population.

Madagascar is situated on the south-eastern side of Africa, from which it is separated by the Mozambique Channel, the least distance between island and continent being 240 miles; greatest length, 980 miles; greatest breadth, 360 miles. The area is estimated at 228,000 square miles. The census of June 1, 1911, showed a population of 3,153,511, of whom 13,115 were French, 2,568 were of other European birth, 4,480 were Hindus, 649 Chinese, 644 were African, and 3,072,381 were Malagasy (1,301,716 male and 1,388,665 female). Estimated population on January 1, 1916, 3,512,690 (14,390 French and 2,710 foreigners).

The Malagasy races or tribes are very numerous, the more important being the Hova (847,480), the Betsiléo (408,024), the Betsimisáraka (288,159), the Tanala (156,720), the Sakalava (155,126), and the Bara (140,450). Hindus, Chinese, Arabs, and other Asiatics carry on small retail trade. The most intelligent and enterprising tribe is the Hova, whose language, allied to the Malayan and Oceanic tongues, is understood over a large part of the island. The people are divided into a great many clans, who seldom intermarry.

The slave trade was nominally abolished in 1877; slavery in Imerina and in all parts under French authority was abolished by proclamation on September 27, 1896. The system of forced labour in the public service was abolished on January 1, 1901, but the personal tax due from 16 or 60 years of age, formerly 5 francs, has been increased to 10, 15, in some provinces 20, and in Antananarivo to 30 francs. The populations of the chief towns were: The capital, Antananarivo, in the interior, 63,115, Fianarantsoa 8,231, Tamatave 8,647, Andovoranto 1,322, Majunga 7,205, Diégo Suarez 10,377, Ambositra 3,580, Tulcar 2,467, Mananjary 8,927, Maroantsiha, 3,294. The principal ports are Tamatave, on the east coast, and Majunga on the north-west coast, Diégo Suarez in the north, and Tulcar in the south-west.

In 1896 Diégo-Suarez (a French colony from 1885), the island of Nossi Bé (area 130 sq. m.) on the west coast, and the island of Ste. Marie on the east coast (area, 64 sq. m.), and in 1914 the Comoro Islands, were placed under the authority of the Governor-General of Madagascar.

### Religion, Education, Justice.

Up to 1895 a large portion of the Hova and of the other tribes in the central districts had been Christianised. The Christian population was estimated at 450,000 Protestants, and 50,000 Roman Catholics. There are many missionary societies at work, French (Catholic and Protestant), British (the London Missionary Society, the Friends' Mission, and the Anglican Mission); there is also a Norwegian Lutheran Mission, French Catholic missions had 258 members (67 female); Protestant and Anglican missions had 177 (78 female). The outlying tribes are still mostly heathen.

Education is compulsory from 8 to 14 years of age. On January 1, 1916, there were 687 official schools and 418 private schools with 105,108 pupils (68,122 boys and 36,986 girls). The Government spent 59,715*l.* on education in 1916. Children are required to learn the French language.

For the administration of French justice there are a *Parquet* consisting of a *Procureur-Général* and other officials, a court of appeal, 4 courts of first instance in the principal towns, and justice of peace courts at 17 centres. For native justice there are tribunals in the districts and provinces, and the natives have the right of appeal from lower to higher tribunals, and finally to the Governor-General.

### Finance.

The local revenue of Madagascar is derived chiefly from direct taxation (including a poll tax and taxes on land and houses), from customs and other indirect taxes, from colonial lands, from posts and telegraphs, markets, and miscellaneous sources, and from subventions granted by France. The chief branches of expenditure are general administration, public works, the post office, and the public debt. For 1916 the local budget balanced at 1,284,928*l.*

The colony has since 1897 contracted debt to the amount of 4,200,000*l.* at the average yearly rate of interest of 3·02 per cent. Of this debt the amount outstanding was on Jan. 1, 1912, 98,220,000 francs. The loans were made for the purpose of public works or for the conversion of loans for that purpose.

### Defence.

The troops in Madagascar (including the forces at Diégo-Suarez) consist of 2,411 Europeans, and 6,376 natives. The police and militia are maintained on the local budget. Up to March, 1916, Madagascar had sent to France 200 officers, 500 non-commissioned officers, and 5,000 men, of which 3,500 of the reserve; also 5 battalions of native tirailleurs and 1,000 men specially engaged as tailors, bootmakers, etc.

### Production and Industry.

In 1896, on the completion of the French occupation of the Island, the Malagasy system of land tenure was modified; foreigners were permitted to acquire land, and registration of land was begun. Government lands, urban or non-urban, are let or sold to private persons, or to companies for agriculture, pasturage, or mining. On December 31, 1914, there were 2,290,046 acres of land under cultivation by natives and 1,868,354 acres by Europeans. The chief products are sugar, coffee, manioc, cotton, cacao, vanilla, tobacco, butter beans, cloves, mulberry trees, and rubber trees. Sericulture is encouraged. The forests abound with many valuable woods, while caoutchouc, gums, resins, plants for textile, tanning, dyeing, and medicinal purposes abound. The principal article at present produced in the island is caoutchouc.

Cattle breeding and agriculture are the chief occupations of the people; there were on December 31, 1915, 6,606,336 cattle in the island; 2,717 horses; 764 asses and mules; 299,315 sheep; 173,926 goats; 570 ostriches, and 666,175 pigs.

Silk and cotton weaving are carried on, and the manufacture of textures from the raphia palm-fibre, and of metal work. Works for the preparation of sugar, rice, soap, beer, &c., are being undertaken by Europeans.

Of minerals, gold, iron, copper, lead, silver, zinc, antimony, manganese, nickel, sulphur, graphite, lignite (March, 1912), and also coal have been found. In 1915 metals and minerals were produced as follows: gold, 66,283 ozs.; graphite, 15,000 tons; and corundum, 334 tons. The output of precious stones in 1915 was 224 pounds.

### Commerce.

The trade of Madagascar has been as follows in five years :—

—	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . . . .	1,790,555	2,001,394	1,869,900	1,894,266	1,750,694
Exports . . . . .	1,901,413	2,393,772	2,242,200	1,857,330	2,642,644

The chief articles of import and export in 1914 and 1915 were the following :—

Imports	1914	1915	Exports	1914	1915
	£	£		£	£
Cottons . . . . .	527,625	531,629	Gold dust . . . . .	188,209	242,368
Beverages . . . . .	153,996	134,807	Cattle . . . . .	33,945	29,079
Machinery . . . . .	74,247	38,923	Tanning bark . . . . .	26,417	6,840
Metals . . . . .	102,911	48,489	Rice . . . . .	25,285	148,196
Cement . . . . .	20,292	19,555	Hides . . . . .	391,557	515,739
Lime . . . . .	7,621	12,104	Rafia fibre . . . . .	93,922	100,052
Clothing . . . . .	42,171	49,039	Wax . . . . .	59,939	72,589

The trade in 1914 and 1915 was distributed as follows :—

From or to	Imports		Exports	
	1914	1915	1914	1915
	£	£	£	£
France . . . . .	1,199,480	955,978	1,241,334	1,094,926
French Colonies . . . . .	87,019	199,333	81,566	127,308
United Kingdom . . . . .	141,448	198,779	208,278	197,364
British Possessions . . . . .	81,763	182,930	77,090	159,795
Germany . . . . .	24,281	762	209,445	—

### Shipping and Communications.

Tamatave, the principal seaport of the island, is visited by the steamers of two French shipping companies, and the principal ports are connected with each other by steamers plying monthly. In 1915, 4,050 vessels of 1,706,293 tons entered and 4,125 vessels of 1,709,964 tons cleared at the ports of Madagascar. Of the total tonnage entering 2,971 vessels of 1,617,479 tons were French, 666 vessels of 63,426 tons were British.

There are as yet but few roads in Madagascar in the European sense of the word. At the end of 1915 there were 1,543 miles of metalled roads. The transport of mails and passengers by motor-cars is being extended. A fortnightly service of motor-cars has been established between Antananarivo and Marinarivo (61 miles), and a service—twice weekly—between Antananarivo and Fianarantsoa, the capital of the southern provinces (259 miles), and Mananzary on the east coast (328 miles). Waggon roads have been made from Tamatave to Antananarivo, from Antananarivo to Majunga, and between most of the chief military posts. The through railway line between Antananarivo and Tamatave (229 miles) was opened for traffic in March, 1913. A railway is being constructed between Antananarivo and Antsirabi (noted for its thermal springs), 107 miles south of Antananarivo, 11 miles of which were opened for traffic in January, 1916.

A branch line of the Tamatave railway, from Moramanga to the Antsihanaka province, is open for traffic as far as Andaingo, a distance of 52 miles. It will probably be completed as far as Lake Alaotra in 1917.

There is postal communication throughout the island. The telegraph line has (December 31, 1915) a length of 4,166 miles, and 6,083 miles of wire. In 1915, 145,539 telegrams were sent. There is cable communication to Mozambique, Mauritius, Réunion, and Aden. In 1915 there were 107 miles of urban telephone line, 1,023 miles of inter-urban circuits, and three Government wireless telegraph stations.

### Money and Banks.

The Comptoir National d'Escompte de Paris has agencies at Antananarivo, Tamatave, Diégo-Suarez, Mananzary, Majunga and Tuléar; in 1911 the Bank of Madagascar, with headquarters in Paris, was opened at Tamatave with a capital of 600,000 francs.

The only legal coin is the silver 5-franc piece, with its silver sub-divisions, as well as copper coins of 5 and 10 centimes, but the Italian 5-lire piece and Belgian, Greek, and other coins of equal value are also in circulation. French Bank notes of 5, 10, 20, 50 and 100 francs are also in circulation, as well as postage stamps affixed to cardboards, for smaller values, viz., 10, 25 and 50 centimes, and 1 and 2 francs.

### MAYOTTE AND THE COMORO ISLANDS.

The archipelago of the Comoro Islands, comprises Mayotte, Anjouan, Grande Comore and Mohéli. Before 1912, Anjouan, Mohéli and Grande Comore were only under French protection; Mayotte alone being a colony. But by a law of July 25, 1912, and a decree of February 23, 1914, the whole archipelago has become a colony, attached to the general government of Madagascar, of which it forms a twenty-third province, the 'Province des Comores.'

The island of Mayotte (140 square miles) had a population (1915) of 13,500 inhabitants. There is an increasing emigration to Zanzibar and Madagascar. In 1914 there were two schools with 2 teachers and 60 pupils. The chief product was formerly sugar, but the cultivation of vanilla has now superseded that of the sugar cane. There are now only two sugar works and two distilleries for rum. Besides vanilla and sugar, cacao, aloes and perfume plants (citronella, ylang-ylang, patchouli, &c.) are cultivated.

Grand Comore, Mohéli, Anjouan, and a number of smaller islands, have an area of about 650 square miles and population in 1914 of 84,117. Vanilla,

cacao and perfume plants are successfully cultivated. Grande Comore has a fine forest and exports timber for building and for railway sleepers.

Imports into Mayotte and Comores in 1915 amounted to 24,017*l.*, exports to 106,991*l.* The principal imports were cotton fabrics, metals, and rice; the principal exports, hides, sugar, and vanilla.

## Consular and other Representatives

### OF GREAT BRITAIN IN MADAGASCAR.

*Consul at Antananarivo.*—A. C. Charlton.

*Vice-Consul at Tamatave.*—C. Bang.

There is also a Vice-Consul at Majunga and a Consular agent at Diégo Suarez.

### RÉUNION.

Réunion (or Bourbon), about 420 miles east of Madagascar, has belonged to France since 1767. It is administered by a Governor assisted by a Privy Council, and an elective Council-General, and is represented in the French Parliament by a Senator and two Deputies. It has an area of 970 square miles and population (1912) of 173,822, of whom 159,218 were Europeans; there were also 8,341 British Indians, 1,868 natives of Madagascar, 2,927 Africans, 884 Chinese, 584 Arabians. The chief towns are: St. Denis, with 23,972 inhabitants in 1912; St. Pierre, 29,481; St. Paul, 18,646; St. Louis, 13,346. The towns are under the French municipal law. Réunion has a grammar school with 25 teachers and 400 pupils. Primary education is given in a training school with 45 pupils and 7 teachers, and 163 elementary schools with 373 teachers and 16,339 pupils (1915). The chief port, Pointe-des-Galets, is connected by a coast railway of 80 miles with St. Benoit on the one hand, and St. Pierre on the other. In 1888 this railway was taken over by the State. The chief productions are sugar, rum, coffee, tapioca, vanilla, spices. The chief imports are rice, grain, &c.; the chief exports are sugar and rum. Total value of imports in 1915, 565,879*l.*; of exports, 943,931*l.* In 1915, 103 vessels of 244,535 tons entered, and 105 vessels of 248,843 tons cleared at the ports of the island. The Tamatave-Réunion-Mauritius Telegraph Cable is open for traffic. On December 31, 1913, there were 221 miles of telegraph line and 66 miles of telephone line (with 106 stations) on the island. The budget for 1916 balanced at 4,756,830 francs. The debt was 1,122,500 francs. The currency of Réunion consists of local bank notes and token nickel coinage. It has nominally the same value as that of France.

**St. Paul and Amsterdam**, small islands in the Indian Ocean, belong to France.

**Kerguelen**, a desolate island, about 50 S. lat. and 70 E. long., was annexed by France in 1893.

*British Consul at Réunion.*—M. J. T. Piat.

### FRENCH SOMALI COAST.

The Somali Coast Protectorate lies between the Italian Colony of Eritrea and British Somaliland, the inland boundary towards Abyssinia being, by convention of March 20, 1897, at a distance of 90 kilometres (about 56 miles) from the coast. The territory has an area of about 5,790 square miles, and the population was estimated in 1910 at about 208,000. It is administered by a Governor with a Privy Council. The port of Obock was acquired for France in 1862, but it was not till 1884 that its active occupation began. In 1884 Sagallo and Tajurah were ceded to France; in 1885, Ambado; in 1888 the territory was delimited by agreement with Great Britain; in 1888 a port was created at Djibouti, now the seat of government.

Djibouti has (1912) 16,535 inhabitants, of whom 556 are European (303 French). The natives are made up as follows (1912): Issas, 3,358; Danakils, 1,733; Arabs (foreign subjects) 4,172; Arabs (French subjects), 1,128; Somalis, 5,550. In 1902 a French mission school for boys and one for girls were opened at Djibouti with 50 pupils. The local budget for 1915 balanced at 2,150,000 francs. The country has scarcely any industries, but with the coast fisheries and inland trade there is considerable traffic. The salt mines, opened in 1912, produced in 1914, 4,995 metric tons of salt. The chief imports are cotton goods, butter, sugar, galvanised iron; the chief exports were coffee, ivory, hides and skins. The total imports in 1915 amounted to

24,106,230 francs, and the total exports to 40,996,039 francs. The export of the products of Abyssinia in 1915 amounted to 22,828,532 francs. Merchandise imported at Djibouti, destined for Abyssinia, amounted to 14,327,801 francs. Much of the traffic with Abyssinia which formerly passed by Zailah now goes by Djibouti by railway to Diré-Dawah. The French Somaliland has about 492 miles of railway from Djibouti to Addis Abeba. [See also under *Abyssinia*.] The vessels of 3 French, 4 English, 1 Russian, and 1 Italian shipping companies visit Djibouti, which is also in communication with Aden by means of French and English steamboats for local traffic. In 1915 there entered at Djibouti 255 steam merchant vessels of 513,030 tons.

### FRENCH WEST AFRICA AND THE SAHARA

A treaty of October 19, 1906, determines the course of the Anglo-French boundary from the Gulf of Guinea to the Niger. The delineation of the boundary was completed in 1912, and approved by the two governments 1914. The British government has leased to France for purposes of commerce two pieces of land, one on the right bank of the Niger between Lealaba and the confluence of the rivers Moussa and Niger, and the other on one of the mouths of the Niger, each to form one block of from 25 to 120 acres with a river frontage not exceeding 436 yards; the lease, at first, to be for 30 years. It is further stipulated that, within the boundaries indicated in the convention, British and French as regards persons and merchandise shall enjoy for 30 years the same treatment in all matters of river navigation, of commerce, and of tariff and fiscal treatment and taxes of all kinds.

Under the Anglo-French Convention of April 8, 1904, the river port of Yarbata on the Gambia (belonging to the British colony of Gambia), with all its landing places, was ceded to France, and, if this port should prove inaccessible to sea-going merchantmen, access to the river will be granted to France at an accessible point lower down. At the same time the Los Islands were ceded to France.

By an agreement, dated July 6, 1911, between England and France, the boundary line between French Guinea and Sierra Leone was readjusted.

By a Convention between Great Britain and France the former recognised the right of France to all territory west of the Nile basin, which practically includes the whole of the **Sahara** (exclusive of the Libyan Desert), and the State of **Wadai**. The French Sahara may be roughly estimated at about 1½ million square miles.

French West Africa comprises the following colonies:—(1) Senegal, (2) French Guinea, (3) the Ivory Coast, (4) Dahomey, (5) Upper Senegal-Niger (French Sudan), and (6) Civilian Territory of Mauritania.

In 1912 the Military Territory of the Niger was placed under a Commissioner, whose headquarters were at Zinder, the capital.

Over the whole of French West Africa there is a Governor-General, who is assisted by a Council, the seat of the general government being at Dakar. The five Colonies are each under a Lieutenant-Governor, subject to the direction of the Governor-General, who has been relieved of the direct administration of any portion of his Government, and is free to devote the whole of his attention to directing and controlling the common interests of all the Colonies. To facilitate this object a General Budget has been created, drawn up by the Governor-General, which provides for all the services which are common to all the Colonies, and the funds for which are provided by the customs and shipping dues of each of the Colonies, which have now only their internal revenues to depend upon for their local budgets, which have, however, been relieved of the cost of all the general services.

The approximate area and population of French West Africa is (1915) shown as follows :—

Colony	Area (in Square Miles)	Population				Total
		Non-African Races		African Races		
		French	Foreign	French	Foreign	
Senegal . . . .	74,000	4,229	646	1,239,503	3,601	1,247,979
Guinea . . . .	93,000	1,082	84	1,808,893	2,520	1,812,579
Ivory Coast . . . .	125,000	910	136	1,416,013 <sup>1</sup>	—	1,417,029
Dahomey . . . .	39,000	617	118	910,902	212	911,749
Upper Senegal and Niger (Sudan) . . . .	301,000	1,134	45	5,597,589	214	5,598,973
Military territory of the Niger . . . .	502,000	79	—	850,000	15	850,094
Mauritania . . . .	344,000	163	1	600,000	—	600,164
Total . . . .	1,478,000	8,905	1,030	12,422,921	6,562	12,438,567
		9,935		12,429,483		

<sup>1</sup> Both French and Foreign.

The general budget of the Colonies for 1917 amounted to 24,172,000 francs. The outstanding debt of French West Africa on January 1, 1912, amounted to 199,000,000 francs. The military forces consist of 13,500 men, of whom 1,500 are Europeans. The police force numbers 3,000.

Schools are at work for elementary primary, superior and commercial primary, and technical education, with a central normal school for training native teachers for the village schools, and a certain number of professional schools in the different colonies, with a central professional training school at Gorée (near Dakar). Over 13,000 children are receiving elementary instruction, about 3,000 of the pupils being girls.

The imports into French West Africa are mostly food substances, tissues, mechanical implements, and beverages; the exports from these colonies are chiefly fruits, oils and oil seeds, as well as rubber, cotton, cacao and timber. The following is a comparative table of values of the imports and exports during 1914 and 1915 for each of the colonies :—

Colonies	Imports		Exports	
	1914	1915	1914	1915
	£	£	£	£
Senegal . . . .	3,202,746	2,850,569	3,217,895	3,231,792
Upper Senegal and Niger . . . .	223,715	187,427	95,785	67,995
French Guinea . . . .	369,627	937,572	456,121	650,619
Ivory Coast . . . .	455,427	286,470	342,601	287,160
Dahomey . . . .	475,219	425,250	518,114	526,571
Military Terr. of the Niger . . . .	40,024	54,116	24,384	64,813
Total . . . .	4,766,658	4,191,404	4,654,900	4,828,950

In 1915, 1,844 vessels of 3,348,248 tons entered the ports of French West Africa.

The use of French weights and measures, and money, is compulsory throughout French West Africa.

*Governor-General of French West Africa.*—M. van Vollenhoven.  
Appointed May 10, 1917.

The colony of **Senegal** consists of:—

1. The four municipal communes of St. Louis, the capital of the Colony (population, 1913, 23,300, French, 1,052); Dakar, a fortified naval station, and the seat of the Government General of French West Africa (population, 23,833, French, 2,597); Rufisque (population, 12,520, Europeans, 314); and Goree (population, 899, Europeans, 67). The total area is 438 square miles. The natives of these towns are French citizens, and have the right of vote.

2. The territories of direct administration, in which the Government exercises absolute authority, which consist of:—

The district of Tivaouane and one kilometre on each side of the Dakar-St. Louis Railway.

A rectangle with a front of two kilometres and a depth of one kilometre around the posts of Richard Toll, Dagana, Podor, Saldé, Matam, and Bakel on the river Senegal; Kaolack, Fatick, and the island of Foundiounge in the Sine-Saloum; Sedhiou, Ziguinchor, and the island of Carabane on the river Casamance; and Portudal, Nianing, and Joal on the sea coast east of Rufisque.

In these territories the natives are not French citizens, and are not electors; they numbered (1913) 1,220,657.

The former Protectorate has been restored to the Colony, but with a separate budget. The total population of Senegal in 1913 was put at 1,282,566 (including 4,390 Europeans), and the area 74,012 sq. miles.

The Colony is represented in the French Parliament by a deputy, elected by the four communes. The budget of the directly administered territory provided for 1917, 6,491,025 francs. The local budget for 1917 was 2,381,000 francs.

All towns having a sufficiently numerous European or assimilated native population have urban schools giving the same instruction as the French primary schools, modified to suit local requirements. At Dakar there is a superior technical school common to all the colonies. At St. Louis are a superior commercial primary school also common to all the colonies, and a normal school for the training of native teachers, and of interpreters, kaidis (native judges), and chiefs' sons. There is a Mussulman superior school at St. Louis with 20 pupils. A large hospital for natives is in construction at Dakar.

The natives cultivate ground-nuts, millet, maize, and some rice; other products are castor beans, some coco-nuts, gum from the Sahara, and rubber from the Casamance river. Ground-nuts form the bulk of the exports. A salt industry is being developed.

Native industries comprise weaving, pottery, brick-making and jewellery.

The chief imports are cottons, foodstuffs, metal-work, coal. The chief exports are oil-seeds and rubber.

There are 1,494 miles of telegraph and about 100 miles of telephone lines. A submarine cable from Brest to Dakar was completed in April 1905, so that the French West African Colonies are now independent of foreign cables. There are three other cables, one Spanish one French West African, and the third belonging to a South American company.

One railway connects Dakar, Rufisque and St. Louis (165 miles); another Kayes to the Niger (344 miles); a third, Thiés to Kayes (215 miles); a fourth, Kayes to Ambidedi (27 miles).

There is a river service on the Senegal from St. Louis to Kayes, the former capital of Senegambia-Niger (490 sea miles), during the rainy season, and extensive works for the improvement of the river have been carried out. The

Senegal is closed to foreign flags. Dakar, the principal port, is in regular communication with French ports by the steamers of 4 French lines, and with Liverpool by a British line. In 1915, 1,007 vessels of 2,227,150 tons entered the port of Dakar. Works are in progress for the extension and deepening of the harbour, the erection of sheds and workshops, and the construction of a large dry dock. The Bank of West Africa (established June 29, 1901), with a capital of 5,895,000 francs, and reserve funds 254,000 francs, was founded in 1901 for the purpose of carrying on financial, industrial, or commercial operations; with it the Bank of Senegal at St. Louis has been fused.

*H. B. M.'s Consul-General at Dakar* (for French Western Africa, including the Sudan).—Captain C. Braithwaite Wallis.

*Vice-Consul.*—P. H. Starmont.

**French Guinea** lies on the coast between Portuguese Guinea and the British colony of Sierra Leone, and extends inland so as to include the territories of Dinguiray, Sigüiri, Kouroussa, Kankan, Kissidugo, Beyla, Macenta and N'zerékoro. The area is about 95,000 square miles, and the population was, in 1914, 1,810,059, including 1,166 Europeans (1,089 French). A regular system of Government lay schools has recently been introduced all over French West Africa. The principal product is rubber, others are palm oil and nuts, millet, earthenuts, gum, and coffee, which is grown in the Rio Nunez region. There is an experimental garden near Konakry (the capital) where the culture of bananas, pineapples, rubber trees, and other plants is being tried. Futa Jallon contains cattle in abundance. In 1914 there were 400,000 cattle, 150,000 sheep, 140,000 goats, and 3,000 horses. Gold is found in the river Tinkisso and in the Bouré and Siecke districts. Imports in 1916, 9,689,291 francs; exports, 16,240,488 francs. The principal exports were rubber, cattle, ground nuts, and palm-kernels. A network of roads is being made to connect with the railway station from Konakry to the Niger. The French Guinea railway which runs from Konakry on the coast to the Niger at Kourassa (366 miles long) was opened in January, 1911, and in August, 1914, was continued to Kankan (412 miles from Konakry). The jetty, 1,066 feet long, at Konakry has been completed. In the colony there are 2,556 miles of telegraph and 43 miles of telephone line, with 6 miles of submarine line. The Colony is connected by cable with France and Pernambuco; also with Freetown, Monrovia, and Grand Bassam. Konakry is visited regularly by the steamers of two French and one English company. The budget of the colony provided for 1917 the sum of 6,945,100 francs.

The **Ivory Coast** lies between Liberia and the British Gold Coast Colony, and, including the kingdom of Kong, extends inland to the military territories of the French Sudan. The French obtained and asserted rights on the coast about 1843, but did not actively and continuously occupy the territory till 1883. Area about 130,000 square miles; population, 1,530,754; Europeans about 1,163. The seat of administration is now Bingerville, formerly called Adjamé (European population, 130), where extensive building operations are now in progress. There are a number of official schools and also some Catholic private schools. The principal centres of population and trade are Grand Bassam, with a lagoon forming an excellent harbour of refuge, Assinie, Grand Lahou, Sassandra, Tabou; and, in the interior, Abijeau, Boumké, Aboisso, Dimbokro, Tiassali, Bonduku, and Korhogo. The natives cultivate maize, plantains, bananas, pine-

apples, and other fruits; European coffee culture is successful, especially in Elima near Assinie; coco-nuts and rubber are collected. The mahogany forests inland are worked; gold is found near Grand Bassam in Baouli, on the Comoe River and on the Bia River. The ports of the Colony are visited by the liners of two French, one British (Elder, Dempster), and one Belgian shipping company. From Abijeau, on the north side of the lagoon, a railway has been constructed, running between Abijeau and Bounké (197 miles). There were at the end of 1916 2,042 miles of telegraph and 142 miles of telephone lines with 5 miles of submarine wires. Telegraph lines connect the principal towns and extend to adjoining colonies. Telephonic communication exists between Bassam and Bingerville and other places. The budget of the colony for 1917 provided for a revenue of 7,032,318 francs.

**Dahomey** stretches from the coast between Togoland on the west and the British possessions of Lagos and Nigeria on the east, and extends northwards to the French Military Territories. France obtained a footing on the coast in 1851, and gradually extended her power until in 1894 the whole kingdom of Dahomey was annexed. The colony has only about 70 miles of coast, but opens out northwards into a wide hinterland. The colony is divided into 15 circles. The circles of Fada N'Gourma and Say (comprising about 24,000 square miles) were, in March, 1907, transferred to the Upper Senegal and Niger Colony. The population in 1915 was 900,000, including 983 Europeans. The seat of government is Porto Novo (the chief business centre), which has about 20,000 inhabitants. Village, regional, and urban schools are instituted under the new West African educational system. The natives are of pure Negro stock, and belong to the Fon branch of the Ewe family. They are industrious agriculturists in the coast region, and grow maize, manioc, yams, and potatoes. The forests contain baobab trees and coco-nut and oil palms. These furnish the chief exports—kernels and oil. Cotton cultivation has recently been successfully introduced in the central provinces. At Porto Novo there is an experimental farm. The principal imports were cottons, machinery, liquors, and tobacco; the chief exports were maize, palm kernels, palm oil, copra; the exports of kola nuts and of rubber are decreasing. There are few roads in the colony, but in the last four years they have been greatly improved. A new metalled road (310 miles in length) for motor traffic runs from Savé to the Niger. At Kotonou an iron pier has been erected, and from that port a railway runs into the interior to Savé (156 miles) with a branch line to Whydah and Segborué in Lake Aheme (20 miles). The line is intended to run to Chaoru (400 miles). The gauge is a metre. Line open (1912), 192 miles; under construction, 125 miles. A metre gauge railway has also been constructed from Porto Novo to Pobé (50 miles) along the Lagos frontier. A telegraph line connects Kotonou with Abomey, the Niger, and Senegal. In the colony there are 1,389 miles of telegraph line, and 70 miles of telephone line. French and English coins are in circulation. On coins other than French there is an import duty of 25 per cent. The budget of the colony for 1916 provided for the sum of 4,963,265 francs. The local budget for 1917 was 4,583,265 francs.

The **Colony of Upper Senegal-Niger** was formed in 1904 from the Territories of Senegambia and the Niger, less the Senegal Protectorate, which was restored to Senegal.

The Colony is bounded on the north by the Algerian sphere; on the west by Mauritania, the Falémé river, and the frontier of French Guinea; on the

south by the frontiers of the Ivory Coast, Gold Coast, Togoland, and Dahomey, and now includes Fada-N'Gourma and Say, and on the east by the Military Colony of the Niger. It therefore includes the valley of the Upper Senegal, more than two-thirds of the course of the Niger, the whole of the countries enclosed in the great Bend, and a large part of the Sahara to the Algerian sphere of influence. The area is about 568,273 square miles with a population in 1914 of about 5,778,296, natives and 1,269 Europeans.

At the same time that this Colony was formed the Military Territories, which now form an integral part of it, were broken up. The Second Military Territory, which included nearly all the country within the Bend, was handed over to the Civil administration, and the First (Timbuktu) has been incorporated in Upper Senegal-Niger, and is administered by a colonel under the authority of the Lieutenant-Governor. The Third (Zinder-Chad) Territory has been constituted an autonomous unit.

The whole of Upper Senegal-Niger is under civil administration, with the same judicial and educational systems as the other Colonies comprised in the Government General. The budget of the colony for 1916 provided for 9,977,000 francs.

The most important and populous towns in the Upper Senegal-Niger are: Ouaghadougou (19,332 inhabitants), Bobo-Dioulasso (8,736 inhabitants), Bamako, the capital, (7,052 inhabitants), Sikasso (7,408 inhabitants), Segou (8,405 inhabitants), Kayes (8,952 inhabitants), Djenné (6,552 inhabitants), Timbuktu (6,699 inhabitants), Goundam (3,200 inhabitants), Dori (3,400 inhabitants). All the principal towns have regional or urban schools. At Bamako is a professional school and a school for sons of chiefs. There is a Mussulman superior school at Timbuktu with 67 pupils and one *médersa* (official).

The natives cultivate ground nuts, millet, maize, rice, cotton; other products are rubber and kariti. Large stocks of cattle abound in the colony.

Native industries comprise pottery, brick-making, jewellery, weaving, leather-making. Chief imports are cottons, food stuffs, metal work. Chief exports are ground nuts, cattle, rubber, skins and wool.

There is a very complete system of telegraph throughout the Colony from Kayes to Niamey, Zinder, and Lake Tchad. There were at the end of 1912, 4,050 miles of telegraph line and 74 miles of telephone line.

The Senegal-Niger Railway goes from Kayes to Koulikoro, a distance of 349 miles. Small steamboats perform the service from Koulikoro to Timbuktu, so that it is now possible to perform the whole journey from Europe to Timbuktu by rail and steamer.

A telegraph line is shortly to connect Timbuktu with Algeria.

**Mauritania**, formed into a Protectorate in May, 1903, and converted into a special "Civilian Territory," under the command of a Commissioner of the Government-General, in October, 1904, consists of the districts of Trarza, Brakna, Gorgol, Assaba, Tichit, Adrar, Levrier Bay, and Tagant, with a total area of 344,967 square miles. The northern limit of the Territory is approximate, and the foregoing area is obtained by taking the latitude 23° 3' N. as the northern boundary. The population in 1915 was about 600,000, of whom the great majority were nomad Moors. The budget of the Protectorate for 1917 was 1,775,000 francs.

Early in 1916 the region of Tibesti, recently occupied by the French, was attached, administratively, to French West Africa. It forms a part of the Military Territory of the Niger.

## TUNIS.

(AFRIKIYA.)

**Government.**—**Sidi Mohamed Ben Nasr Bey**, born 1855, son of Mohamed Pasha Bey, nephew of Sidi Ali, former Bey of Tunis; succeeded his cousin, Sidi Mahomed el Hadi, May 12, 1906. The heir-presumptive is *Sidi Mohamed Ben Mamoun Bey*, born 1858.

The reigning family of Tunis, occupants of the throne since 1705, descend from Husseim ben Ali, commonly believed to be a native of the Isle of Crete, who made himself master of the country, acknowledging, however, the suzerainty of the Sultan of Turkey.

After the French invasion of the country in the spring of 1881, the treaty of Kasr-es-Said (May 12, 1881), confirmed by convention signed June 8, 1883, placed Tunis under the protectorate of France. The government is carried on under the direction of the French Foreign Office, which has a special department for Tunisian affairs, under the control of a French Minister Resident-General, who is also Minister of Foreign Affairs, and a ministry of 9 heads of departments, 7 of the ministers being French and 2 Tunisian. The country is divided into 13 districts (contrôles civils), 2 military circles, and 1 military post; the district governors (contrôleurs) are French; the subordinate officials (Kaidés and Sheiks) are Native. French tribunals administer justice between subjects of European powers, and also between them and natives; there are Native courts for cases between natives. In 1914 the Tunisian penal law was codified. French administration in Tunis has been confirmed by conventions with all the European Powers regulating the status and the conditions of trade of their respective citizens within the Regency.

*French Resident-General.*—Gabriel Alapetite.

**Area and Population.**—The present boundaries are: on the north and east the Mediterranean Sea, on the west the Franco-Algerian province of Constantine, and on the south the great desert of the Sahara and the Turkish Pashalik of Tripoli. Area about 50,000 English square miles, including that portion of the Sahara which is to the east of the Beled Djerid, extending towards Gadamés. Population, in 1911, about 1,780,527, but no proper census has ever been taken. The majority of the population consists of Bedouin Arabs and Kabyles (1,730,144 in 1911) with 50,383 Jews. The French population in 1911 was estimated as 46,044, exclusive of the army of occupation. The foreign population in 1911 was estimated as 126,265, of whom 109,143 were Italian, 12,410 Anglo-Maltese, 1,329 Spaniards, 752 Greeks, and 587 Turks. It is difficult accurately to amend these figures to date. The French, and later the Italian, population has been largely affected by mobilisation. Foreigners of enemy denomination either left in time or were arrested and interned locally or in Algeria. Many neutrals regained their own countries.

The capital, the city of Tunis, had a population of 164,608 Moslems, and 43,000 Jews, besides 69,475 French, Italians, and Maltese. By means of the canal, which was opened in 1893, Tunis is directly accessible to ocean-going vessels.

The bulk of the population is Mohammedan under the Sheik-ul-Islam, and the revenue from the "Habus" lands, like that from the "Wakf" lands in Egypt, is applied to religious, educational, and charitable purposes. There are about 35,000 Roman Catholics, under the ministration of the Archbishop

of Carthage, and about 25 other clergymen. The Greek Church (400), the French Protestants, and the English Church are also represented, and there are 30 English Protestant missionaries at work.

**Education.**—Within the Regency there are about 179 public schools, 5 lycées and colleges, and 21 private schools; total, 205. At all the schools there are 25,531 pupils, of whom 15,543 were boys. Of the total number of pupils, 6,569 are French; 4,993 Mussulman; 5,990 Jews; 6,068 Italian; 1,634 Maltese; 277 others. In the Great Mosque at Tunis there is a Mohammedan university. In the city are 86 and in the interior 1,214 Mussulman primary schools, some of them assisted by Government funds. Many private schools have recently sprung up at Tunis and Sfax. The abolition of congregational teaching decreed in France has been extended to the Regency as regards French children. The Italian Government and certain Italian societies still maintain Italian schools at Tunis and other large towns.

**Finance.**—The ordinary receipts and expenditure for the year 1915 were as follows:—

Receipts		Expenditure	
	£		£
Taxation:—		Beylical Civil List . . . . .	73,352
Direct . . . . .	457,207	Residency and direct services . . . . .	76,543
Indirect . . . . .	703,220	Charges on Public Debt . . . . .	490,893
Monopolies:—		Departments:—	
Tobacco . . . . .	160,903	Finance . . . . .	570,366
Others . . . . .	92,962	Post Office . . . . .	148,444
Post Office, Telegraphs, &c. . . . .	109,419	Local Administration . . . . .	289,197
Royalties and Miscellaneous . . . . .	551,035	Agriculture and Commerce . . . . .	62,231
		Education . . . . .	167,955
		Public Works . . . . .	408,169
		Army . . . . .	24,138
	2,374,755		£2,311,288

At the end of the year 1915 the Tunisian Public Debt amounted to about 360,000,000 francs (90,000,000*l.*). The yearly charge for interest (at 3, 3½, and 4 per cent. due on the various loans—1892, 1902, 1903, 1907, and 1912) together with sinking fund is 490,893*l.* In normal conditions, the 1903 loan(640,000*l.*) will be extinguished in 1968, and the rest in 1988.

**Defence.**—The army of occupation, which, in 1913, numbered 17,514 men, including 600 officers, has, since the outbreak of war in 1914, varied in strength according to circumstances. It consisted, at that time, of a nucleus of French troops supported by native regiments (*tirailleurs* and *spahis*). Of the latter, which were supplied by a system of local conscription, not all were permanently employed in the Regency itself. It may be sufficient to say, at the present time, that while the army of occupation has been maintained at the strength considered desirable, no less than 20,000 native troops have been serving in Europe under the French colours since the beginning of the war.

**Production and Industry.**—The chief industry is agriculture, and large estates predominate. The area of wheat in 1915 was 1,125,000 acres; the production was 300,000 tons. The area in 1915 of barley was 1,050,000 acres, and the production 250,000 tons; and of oats the area was 150,000 acres, and the production 50,000 tons. The total area of vineyards in 1913 was 44,213 acres, and 6,600,000 gallons of wine produced; there were also 11,772,199 olive trees and 6,006,000 gallons of olive oil produced. In the south of Tunis there are about 2,188,598 date palms. Other products

are almonds, oranges, lemons, shaddocks, pistachios, alfa grass, henna, and cork. The cork forests in the north-west have an area of 348,270 acres; the quantity of cork exported in 1913 amounted to 103,006 tons. Considerable areas of agricultural land have been acquired either on lease or by purchase by immigrants. In 1912 the total area occupied by French colonists was 1,791,000 acres, by Italians 211,000 acres, and by other Europeans 108,500 acres.

In 1913 there were 32 mines worked. These are being developed, and the output steadily increases. Lead-ore, zinc-ore, and iron are all found. By far the greatest development has been in phosphates, the output of which is increasing yearly. In 1912, 1,882,100 tons, valued at 1,720,000*l.*, were produced; in 1913, 2,071,500 tons, valued at 1,820,880*l.*

In 1913 the farm animals were:—horses, 29,503; asses, 84,220; mules, 23,503; cattle, 157,071; sheep, 843,067; goats, 561,737; camels, 123,915; pigs, 15,052.

Native industries are the spinning and weaving of wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery (in ancient style), and matting; tanning and silk weaving are declining.

The fisheries are in the hands of Italians and Tunisians. In 1913, 3,350 boats (10,377 tons) were engaged in this industry, with a total of 13,200 men. Sardines, anchovies, allaches, tunny (6,256 tons of fish, valued at 273,404*l.* in 1913) were caught.

### Commerce.

**Commerce.**—The imports and exports in recent years have been to the following amounts (including precious metals):—

	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . . . .	4,867,337	6,251,760	5,770,187	5,299,513	4,289,860
Exports . . . . .	5,744,028	6,186,208	7,146,544	4,264,925	5,021,476

Imports and exports in 1915 were:—

Imports		Value	Exports		Value.
	Quantity			Quantity	
	metric tons	£		metric tons	£
Grain . . . . .		255,011	Wheat and oats		604,422
Flour . . . . .		315,642	Barley . . . . .	82,460	692,662
Hardware . . . . .	2,485	89,856	Esparto grass . . . . .	32,333	97,000
Machinery . . . . .	1,707	92,945	Iron ore . . . . .	285,737	160,013
Coal . . . . .	127,255	311,516	Lead ore . . . . .	22,483	266,546
Sugar . . . . .		272,438	Phosphates . . . . .	1,114,069	1,024,943
Hides . . . . .	605	132,366	Raw wool . . . . .	2,112	134,734
Cotton & woollen yarn . . . . .	1,118	43,255	Olive oil . . . . .		386,709

The distribution of the trade in 1915 was as follows:—

Country			Country		
Imports		Exports	Imports		Exports
	£	£		£	£
France . . . . .	1,918,205	2,447,297	Malta . . . . .	15,361	146,444
Algeria . . . . .	547,071	126,659	United States . . . . .	139,729	7,207
Italy . . . . .	530,236	903,712	Egypt . . . . .	11,213	108,235
United Kingdom . . . . .	649,780	733,880	Morocco . . . . .	71,862	14,638
Tripoli . . . . .	42,419	171,453	Other countries . . . . .	202,490	94,735
Spain . . . . .	61,494	127,201			
			Total Trade	4,289,860	5,021,467

In the year 1913 there entered the ports of the Regency 12,287<sup>1</sup> vessels of 4,666,220 tons ; and cleared 12,138 of 4,651,722 tons.

Good roads to the length of 1,987 miles have been constructed between 1882 and 1912.

Length of railways, 1,428 miles on January 1, 1914.

There were in 1912, 2,854 miles of telegraphs and 9,982 miles of wire ; 216 telegraph offices ; messages (1912), 1,577,162. In 1912 urban telephone systems had 682 miles of line ; inter-urban systems had 2,545 miles of wire. There were in 1912, 431 post offices ; letters sent and received, internal service, 35,711,624 ; external service, 43,834,856.

**Money, Weights, and Measures.**—The Banque d'Algérie has begun operations in the Regency and issues Tunisian bank notes.

The legal coinage since 1892 consists of pieces similar to the French, the pieces being coined in France.

The ounce = 31·487 grammes ; the multiples of the ounce are the various denominations of the *liottolo*, which contains from 16 to 42 ounces.

The *Kuffs* (of 16 *whibas*, each of 12 sahs) = 16 bushels.

The principal measure of length is the *pik* : the *pik Arbi* for linen = 5392 yd. ; the *pik Turki* for silk = 7058 yd. ; the *pik Andoulsi* for cloth = 7094 yd.

French weights and measures have almost entirely taken the place of those of Tunis, but corn is still sold in *kaffis* and *whibas*.

*British Consul-General at Tunis.*—Ernest J. L. Berkeley, C.B. ; appointed July 1, 1899.

*Vice-Consul.*—C. A. Goodwin.

Vice-Consuls at Bizerta, Sfax, and Susa, Consular Agents at Mehdia, Monastir, Gabes, and Gerba.

<sup>1</sup> Of these 4,278 (4,520,330 tons) were *steam* vessels, of which 4,271 (4,511,640 tons) cleared again. The remainder were *sailing* vessels.

## AMERICA.

### GUADELOUPE AND DEPENDENCIES.

Guadeloupe, situated in the Lesser Antilles, consists of two islands separated by a narrow channel, that on the west being called Guadeloupe proper or Basse-Terre, and that to the east, Grande-Terre, with a united area of 722 square miles. ; it has five dependencies consisting of the smaller islands, Marie Galante, Les Saintes, Désirade, St. Barthélemy, and St. Martin, the total area being 688 square miles. It is under a governor and an elected council, and is represented by a senator and two deputies. Population (1912) 212,430, of whom 3,461 were born in France and 12 306 were foreigners. Instruction (1913-14) is given in 1 *lycée* with 301 pupils, a secondary course for girls at Pointe-à-Pitre, with 130 pupils, and 114 public and private elementary schools. The public elementary schools have 235 teachers and 13,611 pupils, and the private have 615. The seat of government is Basse-Terre (8,656 inhabitants). Pointe-à-Pitre (22,664 inhabitants) has a fine harbour. Revenue and expenditure balanced at 4,670,290 francs in the local budget of 1915. Outstanding debt, January 1, 1915, 3,848,817 francs.

Chief products are sugar, coffee, and cacao. For local consumption there are grown bananas, sweet potatoes, manioc, tobacco, indian corn, and vegetables. The area of the colony is 439,660 acres, divided as follows, in acres :— Sugar cane, 64,220 ; coffee, 12,350 ; cacao, 9,880 ; products for local use, 41,165 ; forests, 78,000 ; arable land not cultivated, 113,425 ; and waste land, 113,620. The forests, covering 178,140 acres of mountainous district, are interspersed with valuable timber, which is little worked. In 1914, 334 vessels of 285,235 tons cleared the ports of the colony. Guadeloupe is in direct communication with France by means of two steam navigation companies. Within the islands traffic is carried on by means of roads. The Bank of Guadeloupe, with a capital of 3,000,000 francs, and reserve funds amounting to 843,746 francs, advances loans chiefly for agricultural purposes, even on the security of jewellery. There is also another bank, the Banque de Commerce, but while this is a private institution, the Banque de la Guadeloupe has a semi-official character. Silver coin has disappeared from circulation ; nickel treasury tokens (bons) of 1 franc and of 50 centimes are authorised up to a total emission of 1,000,000 francs.

*British Vice-Consul at Guadeloupe.*—J. E. Devaux.

### GUIANA.

The colony of French Guiana is administered by a Governor, assisted by a Privy Council of 5 members. The colony has a Council-General of 16 members elected by French citizens resident in Guiana, and is represented in the French Parliament by one deputy. Area about 32,000 square miles, and population, 1911, 49,009. Cayenne, the chief town and only seaport, has a population of 13,527, and the other 14 communes have 12,798. These figures are exclusive of the population of the penal settlement, and of the floating population of miners without any fixed abode. At Cayenne there are a court of first instance, a court of appeal, and justices of the peace, with jurisdiction in other localities. The military force consists of 150 European officers and men. On December 31, 1915, there were 33 primary schools with 2,205 pupils, and 7 Congregational schools with 453 pupils. The penal settlement also has 4 schools with 290 pupils. There is a secondary school at Cayenne, which has also a local museum and a library. Local budget for 1915 balanced at 3,782,133 francs. There is little agriculture in the colony ; only about 8,800 acres are under cultivation. The crops consist of rice, maize, manioc, cocoa, coffee, sugar-

cane, indigo, tobacco, and gutta percha. The most important industry is gold-mining (placer); the quantity of gold declared produced was, in 1909, 127,416 oz., in 1910, 123,168 oz.; in 1911, 125,235 oz.; in 1912, 127,809 oz.; in 1914, 105,600 oz. Silver, iron, and phosphates are also worked. The exports consist of cocoa, phosphates, various woods, gold, rosewood essence, and hides. The total imports in 1915 were valued at 10,171,597 francs, and the exports at 11,371,905 francs. There are three ports—Cayenne, Saint-Laurent-du-Maroni, and Oyapoc. Cayenne is visited once a month by a cargo boat of the Compagnie Général Transatlantique. There is also steamboat communication between the capital and the other towns. There are a few roads connecting the capital with various centres of population in the interior.

Since 1855 Guiana has had a penal settlement for habitual criminals and convicts sentenced to hard labour. On December 31, 1915, the penal population consisted of 4,297 transported and 12 undergoing seclusion; 2,877 relegués, and 1,382 freed.

The Bank of Guiana, with a capital of 600,000 francs, with statutory reserve fund amounting to 300,000 francs, advances loans for agricultural and other purposes.

#### MARTINIQUE.

The colony is under a Governor, a General Council, and elective municipal councils. It is represented by a senator and two deputies. Area 385 square miles, divided into 31 communes; population in 1912, 194,000. The military force consists of 17 officers and 394 men. There is a law school (at Fort-de-France) with 56 students; 2 secondary schools, with 671 pupils; a normal school with 27 pupils; primary schools, with 17,500 pupils (including 7 private schools). Chief commercial town, Fort-de-France (population, 29,019). Sugar and cocoa are the chief productions, then come coffee, tobacco, and cotton. There are 15,000 hectares under the food-producing crops. Tobacco culture is under special regulations. There are 35 sugar works and 87 rum distilleries. In 1915 sugar to the value of 916,484*l.*, rum to the value of 580,963*l.*, and cocoa to the value of 47,721*l.* were exported. The total imports in 1915 were valued at 898,565*l.* and the exports at 1,678,294*l.* Vessels entered in 1915, 407 of 461,829 tons. The island is visited regularly by the steamers of French and American companies. For local traffic there are subsidised mail coaches and motor cars; and subsidised steamers ply on the coast. The colony is in telegraphic communication with the rest of the world by telegraph cables. The Bank of Martinique at Fort-de-France with a capital of 3,000,000 francs advances loans for agricultural and other purposes.

*British Consul at Martinique.*—H. J. Meagher.

#### ST. PIERRE AND MIQUELON.

The largest islands of two small groups close to the south coast of Newfoundland. Area of St. Pierre group, 10 sq. miles; population in 1911, 4,209; area of Miquelon group, 83 sq. miles; population, 443; total area, 93 sq. miles; total population, 4,652. Since May, 1906, an Administrator organizes and regulates the various branches of the public service. He is assisted by a consultative council of administration and municipal councils. Chief town, St. Pierre. Primary instruction is free. There are 3 public schools for boys, and 3 for girls, with (in all) 16 teachers and 340 pupils. There are, besides, infant schools, 'salles d'asile,' frequented by 125 children. There are a private boarding school and two private schools with 385 pupils.

The islands, being mostly barren rock, are unsuited for agriculture. The chief industry is cod-fishing, which has steadily declined. In 1915 there were 21 local smacks engaged in fishing on the Newfoundland banks, the average catch per vessel being 2,771 metric cwts. The "Metropolitan" (French) fleet numbered 227 vessels and had 6,736 men engaged in the work in 1914. The imports comprise textiles, salt, wines, foodstuffs, meat; and the exports, cod, dried and fresh, and fish products. In 1915 971 vessels of 73,166 tons entered and 969 of 72,918 tons cleared at the Islands. The imports were valued at 102,953*l.* and the exports at 356,756*l.* in 1915, the latter consisting mainly of dried codfish. St. Pierre is in regular steam communication with New Sydney and Halifax; and is connected by telegraph cable with Europe and the American continent. Local budget for 1915, 631,093.61 francs. Expenditure of France (budget 1915), 189,526 francs. Debt outstanding January 1, 1915, 500,000 francs (lent in 1900 by the Crédit algérien).

*British Consul*.—Mr. P. J. F. Staniforth.

## AUSTRALASIA AND OCEANIA.

### NEW CALEDONIA AND DEPENDENCIES.

New Caledonia is administered by a Governor assisted by a Privy Council consisting of the Secretary-General, the Procureur-Général (the head of the Judicial administration), the Superior Commandant of the Troops, the Director of the Penitentiary administration, the head of the Department of Domains and Colonisation, and two notables of the colony appointed by the President of the Republic. The colony has also an elective Council-General. Nouméa, the capital, has a municipality; other centres of population are locally administered by municipal commissions. The colony contains a penal settlement at Nou Island. Since 1896, however, no convicts have been sent thither, and the convict element in the population is quickly decreasing.

The island is situated between the 20° 1' and 22° 26' parallels south latitude, and 161° 30' and 144° 40' east longitude. It has a total length exceeding 148 miles and an average breadth of 31 miles. Area, 7,650 square miles. According to the census of March 5, 1911, the population was 50,608, of whom 13,138 were free, 5,671 of convict

origin, and 28,075 black. On January 1, 1916, the population of convict origin totalled 2,680. Nouméa had (1915) 10,000 inhabitants, of whom 8,000 were free. The immigrants from France are not numerous. Other immigrants are Javanese, Tonkinese, Indians, and islanders from the New Hebrides to the number of 3,000. Primary instruction is provided in public and also in private elementary schools, the latter being assisted by the municipalities. In 1915 there were 58 public and private primary schools with 2,282 pupils (1,080 being girls), and 67 native schools with 2,100 pupils. In Nouméa the "Collège La Pérouse" gives classical tuition to 94 pupils and professional instruction (iron and wood) to 43 pupils. Local budget for 1915, receipts and expenses, 4,337,000 francs. In 1915 the military force consisted of 400 Europeans. Of the total area more than half is mountainous or not cultivable; about 1,600 square miles is pasture land; about the same area is cultivated or cultivable; and about 500 square miles contain forest which is being worked. The land is divided into 3 domains: that of the state (in which gratuitous concessions may be made); that of the penal establishment (about 400 square miles); and that of the native reserve. The chief agricultural products are coffee, coprah, cotton, manioc (cassava), maize, tobacco, bananas, pine-apples. There are 200,000 cattle and about 5,000 sheep. Local industries are developing; there are a grain storage and cleaning dépôt, meat preserving works, barking mills for coffee and cotton, and two blast furnaces melting nickel ore. About 199,798 hectares of mining land are owned, and 97,660 hectares have been granted for prospecting. In 1915 the mineral export comprised nickel ore, 48,576 metric tons; chrome ore, 57,46 tons. The value of the mineral export was 165,250*l*. The blast furnaces produced 5,530 tons of nickel, valued at 4,200,000 francs. The imports in 1915 were valued at 465,000*l*., and the exports at 640,000*l*. The imports comprise wine, coal, flour, rice; the exports, minerals, coffee, copra, rubber, guano. In 1915, 91 vessels of 102,568 tons entered and 97 of 109,339 tons cleared at the ports of New Caledonia. Nouméa is connected three times monthly with Sydney in N. S. Wales by regular steamers sailing monthly, and by other vessels sailing irregularly. There is a mail service by steamer along the coast. A railway from Nouméa to Bourail (90 miles) is under construction; it is open for traffic to Paita (about 20 miles). Harbour improvements are in progress; a pier and a slip are being constructed, dredging operations are about to begin, and a wharf and a dry dock are contemplated. There are 580 miles of telegraph line and 115 of telephone line.

Dependencies of New Caledonia are:

1. The Isle of Pines, 30 miles to the south-east, with an area of 58 square miles and a population of about 600.
2. The Wallis Archipelago, north-east of Fiji, with an area of 40 square miles and about 4,500 inhabitants. The islands were placed under the French protectorate in 1887. There is a French Resident, and the archipelago is in regular communication with Nouméa.
3. The Loyalty Islands, 60 miles east of New Caledonia, consisting of 3 large islands, Maré, Lifou, and Uvéa, and many small islands with a total area of about 800 square miles. The chief culture in the islands is that of coconuts; the chief export, copra and rubber.
4. The Huon Islands, 170 miles north-west of New Caledonia, a most barren group.
5. Futuna and Alafi, south of the Wallis Islands, with about 1,500 inhabitants, were annexed by France in 1888.

The **New Hebrides**, in accordance with the Anglo-French convention of February (ratified in October), 1906, are jointly administered by the High Commissioners of His Britannic Majesty and the French Republic. In 1914 an Anglo-French conference was appointed to devise means of remedying the defects of the condominium. There are French and English courts, and a mixed court with a judge foreign to both nations. Maize, coffee, vanilla, coconut trees are grown. In some places sulphur is abundant.

*British Consul at Nouméa.*—H. C. Venables.

### FRENCH ESTABLISHMENTS IN OCEANIA.

These, scattered over a wide area in the Eastern Pacific, are administered by a governor with an Administrative Council consisting of certain officials, the *maire* of Papeete, and the Presidents of the Chambers of Commerce and Agriculture. The establishments consist of the **Society Islands**, the most important of which are Tahiti and Moorea, the former with an area of about 600 square miles and 11,691 inhabitants, the latter with an area of 50 square miles and 1,564 inhabitants. Other groups are the **Marquezas Islands**, with a total area of 480 square miles and 3,424 inhabitants, the two largest islands being Nukahiva and Hivaoa; the **Tuamotu group**, consisting of two parallel ranges of islands from King George's Island on the north to Gloucester Island on the south, their total population being 3,828; the **Leeward Islands** (*Iles sous le Vent*), of which the more important are Huahiné (pop. 1,230), Raiatéa and Tahaa (pop. 3,347), and Bora-Bora-Maupiti (pop. 1,295); the **Gambier, Tubuai, and Rapa Islands**; the Gambier group (of which Mangareva is the principal) having six square miles of area and 1,533 inhabitants; the Tubuai (or southern) Islands, of which Rurutu is the largest, Raiavavae (or Vavitu), Rimatara, and, far to the south, Rapa, having together an area of 115 square miles and about 2,550 inhabitants. The total area of the Establishments is estimated at 1,520 square miles, and their population on December 29, 1911, at 31,477, of whom 26,219 were natives. There were 28,875 French, 2,656 other Europeans, and 975 Chinese. In 1903 it was decreed that separate islands or groups should no longer be regarded as distinct Establishments, but that all should be united to form a homogeneous colony.

The most important of the islands is **Tahiti**, whose chief town is Papeete with 3,617 inhabitants, of whom 1,909 are French. A higher primary school, with a normal school, has been established at Papeete, and there are 6 primary schools, each with about 100 pupils, in various islands, besides 4 Catholic and 2 Protestant mission schools. Pearls and mother-o'-pearl are important products. The island is mountainous and picturesque with a fertile coast-land bearing coconut, banana, and orange trees, sugar-cane, vanilla, and other tropical fruits, besides vegetables grown in temperate climates. Cotton, coffee, and tobacco are now little cultivated. The chief industries are the preparation of copra, sugar, and rum. Value of imports (1913) 337,078*l.*, exports, 340,718*l.* The chief imports are tissues, wheat, flour, metal work. The chief exports are copra, mother-o'-pearl, vanilla, coconuts and oranges. In 1914 the total shipping consisted of 164 vessels of 527,385 tons; the greater part of the tonnage represents visits of steamers connecting the islands with New Zealand. The New Zealand company (with a French subvention) has a monthly service connecting San Francisco, New Zealand and Australia with Papeete, the Tuamotu Islands, the Marquezas, and the Leeward Islands. The shipping between the islands is carried on by sailing boats, of which, in 1914, there entered 239 with a tonnage of 15,409 (value

of cargo, 137,961*l.*), and cleared 268, tonnage 10,146 (value of cargo, 167,310*l.*).

*British Consul at Tahiti.*—A. Richards.

## GERMAN EMPIRE.

(DEUTSCHES REICH.)

### Reigning Emperor and King.

**Wilhelm II.** German Emperor, and King of Prussia, born January 27, 1859, became German Emperor June 15, 1888 (see *Prussia*).

#### *Heir Apparent.*

Prince *Friedrich Wilhelm*, born May 6, 1882, eldest son of the Emperor-King (see *Prussia*).

The present German Empire is essentially different from the Holy Roman Empire which came to an end in 1806, amid the convulsion of the Napoleonic wars, and of which Austria was the leading member. The East Frankish or Germanic throne, after the extinction of the Karling line, was filled by election, though with a tendency towards the hereditary principle of succession. At first the King and Emperor was chosen by the vote of all the great Princes of the realm; but the mode came to be changed in the thirteenth century, when a limited number of princes, fixed at seven for a time, and afterwards enlarged to eight (nine from 1692 to 1777), assumed the privilege of disposing of the crown, and, their right being acknowledged, were called Electors. The election of Wilhelm I., King of Prussia, as German Emperor (1871) was by vote of the Reichstag of the North German Confederation, on the initiative of all the reigning Princes of Germany. The Imperial dignity is hereditary in the House of Hohenzollern, and follows the law of primogeniture.

Since Charles the Great was crowned by the Pope at Rome Emperor of the West in the year 800, there have been the following German Kings and Roman Emperors, those never crowned or called Emperor being marked with an asterisk :—

#### *House of Charles the Great.*

Karl I., 'Der Grosse' . . .	800-814
Ludwig I., 'Der Fromme' . .	814-840
Ludwig II., 'Der Deutsche' .	843-876
Karl II., 'Der Kahle' . . .	876-877
Karl, 'Der Dicke' . . .	881-887
Arnulf . . . . .	887-899
*Ludwig III., 'Das Kind' . .	899-911

#### *House of Franconia.*

*Konrad I. . . . .	911-918
--------------------	---------

#### *House of Saxony.*

*Heinrich I., 'Der Vogelsteller' . . . . .	919-936
Otto I., 'Der Grosse' . . .	936-973
Otto II. . . . .	973-983
Otto III . . . . .	983-1002
Heinrich II. 'Der Heilige' .	1003-1024

#### *House of Franconia.*

Konrad II., 'Der Salier' . .	1024-1039
Heinrich III. . . . .	1039-1056
Heinrich IV. . . . .	1056-1106
Heinrich V. . . . .	1106-1125

*House of Saxony.*

Lothar II., 'Der Sachse' 1125-1137

*House of Hohenstaufen.*

\*Konrad III. . . . . 1138-1152  
 Friedrich I., 'Barbarossa' 1152-1190  
 Heinrich VI. . . . . 1190-1197  
 \*Philipp and rivals . . . 1198-1208  
 Otto IV. of Brunswick . . 1208-1215  
 Friedrich II. . . . . 1215-1250  
 \*Konrad IV. . . . . 1250-1254  
 \*Wilhelm of Holland . . . 1254-1256

*The Great Interregnum.*

\*Richard of Cornwall . . . 1256-1272

*House of Habsburg.*

\*Rudolf I. . . . . 1273-1291

*House of Nassau.*

 Joseph I. . . . . 1705-1711  
 Karl VI. . . . . 1711-1740

*House of Bavaria.*

Karl VII. . . . . 1742-1745

*House of Habsburg-Lorraine.*

Franz I. . . . . 1745-1765  
 Joseph II. . . . . 1765-1790  
 Leopold II. . . . . 1790-1792  
 Franz II. . . . . 1792-1806

Confederation of the Rhine 1806-1815  
 German 'Bund' . . . . . 1815-1866  
 North German Confedera-  
 tion . . . . . 1866-1871

*House of Hohenzollern.*

Wilhelm I., 'Der Grosse' 1871-1888  
 Friedrich III. 1888 (March-June 15)  
 Wilhelm II. . . . . 1888 (June 15)

<sup>1</sup> Maximilian I., in 1508, took the title of Emperor Elect. From Ferdinand I. to Francis II. all the Emperors, as never crowned by the Roman Pontiff, took formally the title of Emperor Elect (Erwählter Römischer Kaiser).

## Constitution and Government.

The Constitution of the Empire bears date April 16, 1871. By its terms, all the States of Germany 'form an eternal union for the protection of the realm and the care of the welfare of the German people.' The supreme direction of the military and political affairs of the Empire is vested in the King of Prussia, who, in this capacity, bears the title of *Deutscher Kaiser*. According to Art. 11 of the Constitution, 'the Emperor represents the Empire internationally,' and can declare war if defensive, and make peace, as well as enter into treaties with other nations, and appoint and receive ambassadors. But when treaties relate to matters regulated by imperial legislation, and when war is not merely defensive, the Kaiser must have the consent of the Bundesrat, or Federal Council, in which body, together with the Reichstag, or Diet of the Realm, are vested the legislative functions of

the Empire. The Emperor has no vote on laws passed by these bodies. The Bundesrat represents the individual States of Germany, and the Reichstag the German nation. The 61 members of the Bundesrat are appointed by the Governments of the individual States for each session, while the members of the Reichstag, 397 in number (about one for every 131,640 inhabitants) are elected by universal manhood suffrage and ballot, for the term of five years. By a law passed in 1906, members of the Reichstag are paid 3,000 marks (150*l.*) for the session with deduction of 20 marks (1*l.*) for each day's absence; they have free passes over German railways during session. The duration of the legislative period is five years. The various States of Germany are represented as follows in the Bundesrat and the Reichstag:—

States of the Empire	Number of Members in Bundesrat	Number of Deputies in Reichstag
Kingdom of Prussia . . . . .	17	236
„ „ Bavaria . . . . .	6	48
„ „ Saxony . . . . .	4	23
„ „ Württemberg . . . . .	4	17
Grand-Duchy of Baden . . . . .	3	14
„ „ Hesse . . . . .	3	9
„ „ Mecklenburg-Schwerin . . . . .	2	6
„ „ Saxony . . . . .	1	3
„ „ Mecklenburg-Strelitz . . . . .	1	1
„ „ Oldenburg . . . . .	1	3
Duchy of Brunswick . . . . .	2	3
„ „ Saxe-Meiningen . . . . .	1	2
„ „ Saxe-Altenburg . . . . .	1	1
„ „ Saxe-Coburg-Gotha . . . . .	1	2
„ „ Anhalt . . . . .	1	2
Principality of Schwarzburg-Sondershausen . . . . .	1	1
„ „ Schwarzburg-Rudolstadt . . . . .	1	1
„ „ Waldeck . . . . .	1	1
„ „ Reuss Aelterer Linie . . . . .	1	1
„ „ Reuss Jüngerer Linie . . . . .	1	1
„ „ Schaumburg-Lippe . . . . .	1	1
„ „ Lippe . . . . .	1	1
Free town of Lübeck . . . . .	1	1
„ „ „ Bremen . . . . .	1	1
„ „ „ Hamburg . . . . .	1	3
Reichsland of Alsace-Lorraine . . . . .	3	15
Total . . . . .	61	397

State of the parties in the Reichstag on March 1, 1917:—

Centre Party, 91; Social Democrats, 89; National Liberals, 44; Radicals, 46; Conservatives, 45; the German Party, 26; Poles, 18; Social Democratic Labour Union<sup>1</sup>, 19; and Independents, 15.

The total number of electors to the Reichstag inscribed on the lists at the general election of 1912 was 14,442,387, while the number of actual voters

<sup>1</sup> Broke away from the Social Democratic Party on March 24, 1916.

was 12,260,731 (4,250,399 Socialists, 1,996,848 Centre Party, 1,662,670 National Liberals, 1,497,041 Radicals and 1,126,270 Conservatives).

Both the Bundesrat and the Reichstag meet in annual session, convoked by the Emperor. The Emperor has the right to prorogue and dissolve the Reichstag after a vote by the Bundesrat. Without consent of the Reichstag the prorogation may not exceed thirty days; while in case of dissolution new elections must take place within sixty days, and a new session must open within ninety days. All laws for the Empire must receive the votes of an absolute majority of the Bundesrat and the Reichstag. The Bundesrat is presided over by the Reichskanzler, or Chancellor of the Empire, and the President of the Reichstag is elected by the deputies.

Since the foundation of the Empire there have been five Chancellors:— (1) Prince Bismarck, 1871–90; (2) Count Caprivi, 1890–94; (3) Prince Hohenlohe, 1894–1904; (4) Prince Bülow, 1904–1909; (5) Dr. von Bethmann-Hollweg, 1909.

The laws of the Empire, passed by the Bundesrat and the Reichstag, to take effect must be promulgated by the Emperor, and the promulgation, like all other official acts of the Emperor, requires the counter-signature of the Chancellor of the Empire. All the members of the Bundesrat have the right to be present at the deliberations of the Reichstag.

The following are the imperial authorities or Secretaries of State: they do not form a Ministry or Cabinet, but act independently of each other, under the general supervision of the Chancellor.

1. *Chancellor of the Empire*.—Dr. von Bethmann-Hollweg.

2. *Secretary for Foreign Affairs*.—Herr Dr. Artur Zimmermann. Appointed November 21, 1916.

3. *Imperial Home Office* and '*Representative of the Chancellor*.'—Herr Dr. Karl Helfferich.

4. *Imperial Admiralty*.—Admiral Eduard von Capelle. Appointed March 16, 1916. *Admiral Commanding-in-Chief*.—Heinrich, Prince of Prussia.

5. *Imperial Secretary of Justice*.—Herr Dr. Lisso.

6. *Imperial Treasury*.—Count Siegfried von Roedern.

7. *Imperial Post-Office*.—Herr Kraetke.

8. *Secretary for the Colonies*.—Herr Dr. Solf.

Acting under the direction of the Chancellor of the Empire, the Bundesrat represents also a supreme administrative and consultative board, and as such has twelve standing committees—namely, for army and fortifications; for naval matters; tariff, excise, and taxes; trade and commerce; railways, posts, and telegraphs; civil and criminal law; financial accounts; foreign affairs; for Alsace-Lorraine; for the Constitution; for the Standing orders; and for railway tariffs. Each committee consists of representatives of at least four States of the Empire; but the foreign affairs committee includes only the representatives of Bavaria, Saxony, Württemberg, and two other representatives to be elected every year.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITIONS.

The following table gives the area and population of the twenty-five States of Germany in the order of their magnitude, and of the Reichsland of Alsace-Lorraine, as returned at the census of Dec. 1, 1910:—

States of the Empire	Area English sq. miles	Population Dec. 1, 1910			Pop. per sq. mile 1910
		Male.	Female.	Total	
Prussia . . . . .	134,616	19,847,725	20,317,494	40,165,219	224·0
Bavaria . . . . .	29,292	3,379,580	3,507,711	6,887,291	234·4
Württemberg . . . . .	7,534	1,192,392	1,245,182	2,437,574	323·2
Baden . . . . .	5,823	1,059,579	1,083,254	2,142,833	367·9
Saxony, Kingdom of . . . . .	5,789	2,323,903	2,482,758	4,806,661	829·5
Mecklenburg-Schw. . . . .	5,068	317,964	321,994	639,958	126·2
Hesse . . . . .	2,966	639,198	642,853	1,282,051	439·0
Oldenburg . . . . .	2,482	244,018	239,024	483,042	194·3
Brunswick . . . . .	1,418	242,783	251,556	494,339	348·6
S'x'ny, Gd. Duchy of . . . . .	1,397	204,375	212,774	417,149	298·6

Saxe-Meiningen . . . . .	953	136,614	142,148	278,762	291·5
Anhalt . . . . .	888	161,134	169,994	331,128	373·9
Saxe-Coburg-Gotha . . . . .	764	125,330	131,847	257,177	337·0
Saxe-Altenburg . . . . .	511	106,278	109,850	216,128	423·3
Lippe . . . . .	469	73,254	77,683	150,937	321·4
Waldeck . . . . .	433	30,544	31,163	61,707	142·5
Schwarzburg-Rud. . . . .	363	49,335	51,367	100,702	277·5
Schwarzburg-Sond. . . . .	333	44,149	45,768	89,917	270·2
Reuss Junr. Branch . . . . .	319	74,345	78,407	152,752	478·9
Schaumburg-Lippe . . . . .	131	23,400	23,252	46,652	352·5
Reuss Elder Branch . . . . .	122	34,781	37,988	72,769	595·2
Hamburg . . . . .	160	504,902	509,762	1,014,664	6,973·1
Lübeck . . . . .	115	56,911	59,688	116,599	1,013·3
Bremen . . . . .	99	148,529	150,997	299,526	3,017·6
Alsace-Lorraine . . . . .	5,604	965,625	908,389	1,874,014	333·9
Total . . . . .	208,780	32,040,166	32,885,327	64,925,993	310·4

Estimated population on June 30, 1914, 67,812,000.

The population of the lands now included in the German Empire (without Heligoland) was 24,831,396 in 1816, and 31,589,547 in 1837, showing an average annual increase of nearly 1·3 per cent. The following table shows the actual increase in population at various periods, with the annual rate of increase per cent. The small increase in 1867-71 is explained by the intervention of the war with France.

Year	Increase	Annual Rate per cent.	Year	Increase	Annual Rate per cent.
1867	3,220,083	0·97	1890	2,572,766	1·07
1871	970,171	0·60	1895	2,851,431	1·12
1875	1,668,568	1	1900	4,087,277	1·51
1880	2,506,701	1·14	1905	4,274,311	1·46
1885	1,621,643	0·7	1910	4,284,504	1·36

<sup>1</sup> Since 1835.

The increase of population during 1905-10 was greatest in Bremen, Hamburg, Oldenburg, Lübeck, Prussia, Hesse, Baden and Saxony, and least in Anhalt, Brunswick, and Mecklenburg-Schwerin.

The number of households in 1910 was 14,346,692 (in 1905, 13,274,531). Of the total population in 1895, 50·2 per cent., in 1900, 54·4 per cent., in 1905, 57·4 per cent., in 1910, 60·0 per cent., lived in towns of 2,000 inhabitants and above. Of every 100 inhabitants there lived in—

—	No. of Towns	1900	No. of Towns	1905	No. of Towns	1910
Large towns <sup>1</sup>	33	16·2	41	19·0	48	21·3
Medium „	194	12·6	208	12·9	223	13·4
Small „	864	13·5	945	13·7	1,028	14·1
Country „	2,269	12·1	2,386	11·8	2,441	11·2
Other places	73,599	45·6	72,811	42·6	72,199	40·0

<sup>1</sup> For the official signification of these names see under *Principal Towns*.

With respect to conjugal condition, the following was the distribution in 1910 :—

—	Males	Females	Total
Unmarried	19,516,340	18,591,604	38,107,944
Married	11,608,028	11,621,685	23,229,713
Widowed	866,676	2,583,872	3,450,548
Divorced and separated	49,122	88,666	137,788

For the occupation-census of June 12, 1907, see THE STATESMAN'S YEAR-BOOK for 1914, page 890 ; and for foreigners in Germany at the 1910 census, see THE STATESMAN'S YEAR-BOOK for 1916, page 934.

## II. MOVEMENT OF THE POPULATION.

The following table shows the movement of the population of the Empire during five years :—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1910	496,396	1,982,836	58,058	183,700	1,103,723	879,113
1911	512,819	1,927,039	56,310	179,584	1,187,094	739,945
1912	523,491	1,925,883	56,247	177,056	1,085,996	839,887
1913	513,283	1,894,598	55,845	183,857	1,060,798	833,800
1914	460,608	1,874,389	55,793	—	1,108,352 <sup>1</sup>	766,037

<sup>1</sup> Exclusive of military casualties.

Of the children born in 1913, 974,894 were boys, and 919,699 girls.

In the various German States in 1913 the movement of population was as follows :—

States	Marriages	Births			Deaths
		Total	Still-born	Illegitimate	
Prussia	323,709	1,209,518	35,975	97,884	656,490
Bavaria	48,438	207,457	5,433	25,495	126,186
Saxony, Kingdom of	40,307	127,482	4,497	19,906	73,009
Württemberg	17,733	70,068	1,838	6,015	40,711
Baden	15,284	59,752	1,485	4,975	34,930
Hesse	9,621	33,291	994	2,763	17,840
Mecklenburg-Sch.	5,093	16,176	515	2,332	10,623
Saxony Grd. Duchy of	3,464	11,802	370	1,467	6,737

States	Marriages	Births			Deaths
		Total	Still-born	Illegitimate	
Mecklenburg-Str.	800	2,750	66	399	1,888
Oldenburg	4,010	15,854	417	910	6,751
Brunswick	4,127	11,659	351	1,418	7,416
Saxe-Meiningen	2,213	8,109	251	973	4,407
Saxe-Altenburg	1,689	6,040	217	716	3,470
Saxe-Coburg-Gotha	2,117	7,277	223	805	3,985
Anhalt	2,841	8,310	251	1,024	5,096
Schwarzburg-Sond.	762	2,717	111	291	1,489
Schwarzburg-Rudol.	803	2,677	75	328	1,466
Waldeck	456	1,565	48	78	867
Reuss, Elder Branch	640	1,764	75	202	1,140
Reuss, Younger Branch	1,302	4,075	117	573	2,338
Schaumburg-Lippe	417	1,107	29	51	567
Lippe	1,283	4,333	142	206	2,062
Lübeck	976	2,532	76	342	1,768
Bremen	2,666	8,132	229	835	4,509
Hamburg	9,392	24,237	790	3,334	14,602
Alsace-Lorraine	13,170	45,614	1,273	3,267	30,501
Empire.	513,283	1,894,598	55,848	178,579	1,060,798

The number of divorces in the German Empire was in 1911, 15,780, being 24.1 per 100,000 inhabitants; in 1912, 16,911 or 25.6; in 1913, 17,835, or 26.6.

The following table shows the annual number of German emigrants for five years:—

Year	Total	Destination					
		European Countries	United States	Brazil	Other American Countries	Africa	Australia
1910	25,531	77	22,773	353	2,184	16	128
1911	22,620	98	18,969	363	3,065	18	246
1912	18,545	90	13,706	225	1,198	4	322
1913	25,843	68	19,124	140	6,120	32	350
1914	11,803	51	9,614	77	1,241	8	232

<sup>1</sup> All to Great Britain.

From the various German States in 1913 and 1914 the number of emigrants was as follows:—

States	Number		States	Number	
	1913	1914		1913	1914
Prussia	12,772	6,083	Anhalt	47	16
Bavaria	2,218	1,206	Schwarzburg-Sond.	15	13
Saxony	998	615	Schwarzburg-Rudol.	21	7
Württemberg	685	322	Waldeck	9	14
Baden	605	296	Reuss, Elder Branch	31	4
Hesse	145	96	Reuss, Younger Branch	49	18
Mecklenburg-Schwerin	106	59	Schaumburg-Lippe	4	3
Grand Duchy of Saxony	86	41	Lippe	38	6
Mecklenburg-Strelitz	7	5	Lübeck	36	20
Oldenburg	306	131	Bremen	366	156
Brunswick	70	43	Hamburg	989	522
Saxe-Meiningen	50	8	Alsace-Lorraine	517	249
Saxe-Altenburg	22	5	Not stated	5,616	1,840
Saxe-Coburg-Gotha	35	20		25,843	11,803

## III. PRINCIPAL TOWNS.

German towns are officially distinguished as large towns (with 100,000 inhabitants and upwards); medium towns (20,000-100,000 inhabitants); small towns (5,000-20,000 inhabitants), and country towns 2,000-5,000 inhabitants). In 1905, only 1 town had over 1,000,000 inhabitants; 10 others over 250,000; 30 others over 100,000; 43 between 50,000 and 100,000; and 137 between 20,000 and 50,000. According to the results of the census of December 1, 1910, the population of the principal towns at that date was:—

Town	State	Pop. (1910)	Town	State	Pop. (1910)
Berlin . .	Prussia .	2,071,257 <sup>1</sup>	Posen . .	Prussia .	156,691

### Religion.

The Constitution provides for entire liberty of conscience and for complete social equality among all religious confessions. The relation between Church and State varies in different parts of the Empire. The Jesuit order is interdicted in all parts of Germany, and all convents and religious orders, except those engaged in nursing the sick and purely contemplative orders, have been suppressed. There are 5 Roman Catholic archbishoprics, 14 suffragan bishoprics, and 6 bishoprics immediately subject to Rome; there are 3 apostolic vicariates. The 'Old Catholics' have a bishop at Bonn.

The following are the results of three religious censuses:—

Creed	1900	Per Ct. of Pop.	1905	Per Ct. of Pop.	1910	Per Ct. of Pop.
Protestants . .	35,231,104	62·5	37,646,852	62·1	39,991,421	61·6
Catholics . . .	20,327,913	36·1	22,109,644	36·5	23,821,453	36·7
Other Christians	203,793	0·4	259,717	0·4	283,946	0·4
Jews . . .	586,833	1·0	607,862	1·0	615,021	1·0
Others and unclassified	17,535	0·03	17,203	0·03	214,152	0·3

Roman Catholics in 1905 were in the majority in only three of the German States, Alsace-Lorraine, Bavaria, Baden; and formed more than 20 per cent. of the population in only four others, Oldenburg, Württemberg, Hesse, Prussia.

### Instruction.

Education is general and compulsory throughout Germany. The laws of Prussia, which provide for the establishment of elementary schools (*Volkschulen*), supported from the local rates, in every town and village, and compel all parents to send their children to these or other schools, have been adopted, with slight modifications, in all the States of the Empire. The school age is from six to fourteen.

The following table shows for the different German States the number of elementary public schools, the teachers employed in them and children attending them, according to a school census taken in 1911 :—

States	Schools	Teachers		Pupils		Total
		Males	Females	Males	Females	
Prussia . . . . .	38,684	91,643	24,650	3,292,877	3,279,263	6,572,140

Empire . . . . .	61,557	148,217	39,268	5,157,446	5,152,503	10,309,949

There were also, in 1911, 480 private schools with 11,894 boys and 14,257 girls who received instruction similar to that given in the Public Elementary Schools.

The system of secondary education is also practically homogeneous. Above the elementary schools rank the middle schools of the towns, the *Bürger-schulen* and *Höhere Bürgerschulen*, which fit their pupils for business life. Children of the working classes may continue their education at the *Fortbildungs-Schulen* or continuation schools, which are open in the evening or other convenient time. The *Gymnasien* are the most fully developed classical schools, preparing pupils in a nine years' course for the universities and the learned professions. The *Progymnasien* differ from these only in not having the highest classes. In the *Realgymnasien*, Latin, but not Greek, is taught, and what are usually termed 'modern subjects' have more time devoted to them. *Realprogymnasien* have a similar course, but have no class corresponding to the highest class in the preceding. In the *Oberrealschulen* and *Realschulen* Latin is wholly displaced in favour of modern languages. The teachers in German schools are required to hold a Government certificate, and to have undergone a year's probation. Higher schools for girls are called *Höhere Töchterschulen*. Besides these there are numerous *Gewerbeschulen* or technical schools, *Polytechnica*, normal schools, seminaries, and the universities.

In 1911 (the latest available figures) the number of secondary schools was as follows :—For boys, Gymnasia, 524, with 9,769 teachers and 160,287 pupils; Realgymnasia, 223, with 3,708 teachers and 70,375 pupils; Oberrealschulen, 167, with 3,473 teachers and 75,832 pupils; Progymnasia,

81, with 570 teachers and 9,509 pupils; Realschulen, 411, with 4,265 teachers and 89,968 pupils. For girls, Gymnasias, 39, with 1,039 teachers and 22,137 pupils; High schools, 789, with 11,359 teachers and 212,324 pupils.

There are 11 fully-equipped Technical High Schools, with the power of granting degrees. They are all aided by the States to which they respectively belong. The statistics for the winter half-year 1914-15 are as follows:—

Schools	Teaching Staff	Students	Schools	Teaching Staff	Students
Berlin . . . .	176	2,417	Aachen . . . .	84	714
Munich . . . .	74	729	Brunswick . . . .	55	209
Darmstadt . . . .	88	999	Danzig . . . .	57	821
Karlsruhe . . . .	91	1,096	Breslau . . . .	42	298
Hanover . . . .	80	1,309			
Dresden . . . .	73	1,328	Total (1914-15)	901	10,824
Stuttgart . . . .	81	904	.. (1916-17)	—	10,546

Of the students, 9,725 were fully qualified students; 63 were women.

For instruction in agriculture there are Agricultural High Schools at Berlin (153 students in 1916-17), Hohenheim (166), Bonn-Poppelsdorf (442), and Weißenstephan near München (85); at 8 of the universities there are Agricultural Institutes; at Weißenstephan (Bavaria) an agricultural and brewing academy; in Prussia 16 secondary agricultural schools, and in other German States 6; in Prussia 26 farming schools, in other States 19; in Prussia 118 lower agricultural winter schools, and in other States 77; besides many schools for special agricultural instruction (in Prussia alone, 1,320). Other technical schools are 5 Veterinary High Schools with 373 students in 1914-15; 15 schools of mining; 15 schools of architecture and building; 4 academies of forestry; 27 schools of art and art-industry (*Kunst* and *Kunstgewerbe-Schulen*); 429 commercial schools (including 6 commercial colleges with the right of granting degrees); about 100 schools (including universities) for textile manufactures; 12 for special metal industries; 12 for wood working; 4 for ceramic industries; 11 for naval architecture and engineering; 8 for ships' engineers; 19 for navigation; and 11 public music-schools. There are also numerous smaller as well as private music and other schools, and a large number of artisans' or trade schools. There is a naval academy and school at Kiel, and military academies at Berlin and Munich; besides 47 schools of navigation, 9 military schools, and 9 cadet institutions.

In 1913 the proportion of illiterates among the recruits was '04 per cent.

There are 22 universities in the German Empire, besides the Lyceums, at Braunsberg, Bamberg, Dillingen, Eichstätt, Freising, Passau and Regensburg, which have only faculties of theology (Roman Catholic) and philosophy, the academy at Posen, and the Colonial Institute at Hamburg.

The following table gives the date of foundation, the number of teachers and students for the winter half-year, 1914-15.

Universities	Professors and Teachers	Students				
		Theology	Jurisprudence, &c.	Medicine	Philosophy	Total
Berlin (1810) . . .	502	497	1,501	1,997	4,040	8,035

<sup>1</sup> Including the students of mathematics and natural science.

<sup>2</sup> Including the students of the faculty of political science and forestry.

<sup>3</sup> Including the students of mathematics, natural science, political science and forestry.

In four universities, namely, Freiburg, München, Münster, and Würzburg, the faculties of theology are Roman Catholic; four are mixed, both Protestant and Roman Catholic—Bonn, Breslau, Strassburg, and Tübingen; and the remaining thirteen are Protestant. Frankfurt has no theological faculty.

In the winter half-year 1916-1917 there were entered at the 22 German Universities altogether 60,041 students, as against 53,300 in the winter of 1915-16, and 57,000 in the summer of 1916. Of the total 54,284 are men and 5,757 women; 1,200 of the men and 200 of the women were foreigners. But the actual number in residence was 12,657 men and 5,651 women.

### Justice and Crime.

A uniform system of law courts exists throughout the Empire, though, with the exception of the Reichsgericht, all courts are directly subject to the Government of the special State in which they exercise jurisdiction, and not to the Imperial Government. The appointment of the judges is also a State and not an Imperial function. The Empire enjoys uniform codes of commercial and criminal law.

The lowest courts of first instance are the *Amtsgerichte*, each with one or more judges, competent to try petty civil and criminal cases. The *Landgerichte* exercise a revising jurisdiction over the *Amtsgerichte*, and also a more extensive original jurisdiction in both civil and criminal cases, divorce cases, &c. In the criminal chamber five judges sit, and a majority of four votes is required for a conviction. But in the courts with appellate jurisdiction only three judges sit. Jury courts (*Schwurgerichte*) are also held periodically, in which three judges preside; the jury are twelve in number. The first court of second instance is the *Oberlandesgericht*. In its criminal senate, which also has an original jurisdiction in serious cases, the number of the judges is seven. There are twenty-nine such courts in the Empire. The total number of judges on the bench in all the courts above mentioned was 10,594 (Jan. 1, 1915). In Bavaria alone there is an *Oberstes Landesgericht*, with 22 judges, with a revising jurisdiction over the Bavarian *Oberlandesgerichte*. The supreme court is the *Reichsgericht*, which sits at Leipzig. The judges, 100 in number, are appointed by the Emperor on the advice of the Bundesrat. The court exercises an appellate jurisdiction over all inferior courts, and

also an original jurisdiction in cases of treason. It has 5 criminal and 7 civil senates.

The following table shows the number of criminals convicted for five years :—

Year	Persons convicted		Total	Conviction per 10,000 inhabitants	Juveniles	Previously convicted
	Males	Females				
1909	458,304	85,879	544,183	120·8	49,697	249,737
1910	459,492	86,926	546,418	119·1	51,325	247,480
1911	463,368	89,192	552,560	119·8	50,889	249,321
1912	489,532	91,953	581,185	123·9	54,958	260,728
1913	—	—	561,805	—	54,172	—

### Pauperism.

The general principles as to poor-relief in all the German States, except Bavaria and Alsace-Lorraine, are laid down by the Imperial law of June 6, 1874, amended by the law of March 12, 1894. The territory under this law is divided into local unions (*Ortsarmenverbände*) and provincial unions (*Landarmenverbände*). Usually a local union is a commune (*Gemeinde*), while a provincial union consists of a large administrative division such as a circle (*Kreis*), a province, or a whole State. For the purposes of poor-relief a settlement is acquired by two years' continuous residence (after the age of 18), by marriage, or by descent. A German in distress must be relieved by the local union in which he becomes destitute, and the cost must be refunded by the local union in which he has a settlement, or by the appropriate provincial union. In communes poor-relief forms part of the ordinary local government business; in towns the actual administration is carried out by a special committee under the presidency of the burgher-master. Poor rates are usually not levied. In most large towns the Elberfeld system of unpaid district visitors is in force. Statistics of pauperism are not published regularly; the last issue related to the year 1885.

### Compulsory Insurance.

As preventive measures under this head must be mentioned the imperial laws introducing the compulsory insurance of workmen against sickness, insurance against accidents by employers, and the insurance of workmen against old age and infirmity.

Under an Imperial law of 1883 and amending Acts (codified in 1912), workmen must be insured against sickness, and must themselves pay two-thirds of the contributions, their employers paying one-third. For accident insurance, under an Act of 1884 and amending Acts, the contributions are paid entirely by the employers, and they, for mutual protection, have united into associations according to the nature of the industries in which they are engaged. The working of these insurance associations is controlled by Government. For invalidity and old age insurances, under an Act of 1889, amended in 1899, the contributions are paid half by the workmen and half by their employers, while towards each pension the Government grants an annual subsidy of 50 shillings. The employers are responsible both for their own and the workmen's contributions, but the latter may be deducted from wages paid subsequently.

Contributions are paid by the purchase of stamps from the Post Office; these are affixed by the contributing person to cards on which there are spaces for stamps for 52 weeks. When the contributions are complete, the card is handed in to a specified office and a certificate given in return.

The old age pension is given on the completion of the 65th year (from 1916 onwards) of the workman's age, contributions having been paid for 1,200 weeks (equal to about 25½ years), a margin of 5 weeks being allowed each year. The amount of wages per annum

of each class, the amount of weekly contributions of workman and employer for each class, and the pension for each are in shillings or pence respectively :—

	Class I.	Class II.	Class III.	Class IV.	Class V.
Yearly wages shillings	Up to 350	350—550	550—850	850—1150	1150—2000
Weekly contrib. pence	1½	2½	2½	3½	4½
Yearly pension shillings	110	140	170	200	230

Adding the State subsidy of 50 shillings to the pension, we find the total annual sum paid to the pensioner.

The amount expended in compensation (in various forms) in 1913 under the sick insurance law (Act of 1883 and subsequent Acts) was 22,994,445*l.*; under the accident insurance law (Act of 1884 and subsequent Acts), 8,831,905*l.*; under the invalidity and old age pensions law (Acts of 1889 and 1899), 10,916,830*l.*; total, 41,743,200*l.*

Of the various insurance schemes in operation for the benefit of working men, that for insurance against sickness, according to the statistics published in March, 1915, had in 1913 (excepting the 150 'Knappschaftskassen' [Societies for Miners] with 989,196 members) 21,372 societies with altogether 13,566,473 members.

In the three years 1911–13 the operations showed :—

	1911	1912	1913
Societies . . . . .	23,109	21,659	21,342
Members . . . . .	13,619,048	13,217,705	13,566,473
Cases of Sickness . . . . .	5,772,388	5,633,956	5,710,250
Days of Sickness . . . . .	115,128,905	112,249,064	117,436,644
Ordinary revenue £ . . . . .	20,614,531	20,880,403	22,039,770
Ordinary expenditure £ . . . . .	19,626,237	19,751,844	21,638,671

On January 1, 1916, the number of persons insured against sickness, 4,747,613 men and 4,019,564 women; total, 8,767,177.

To the revenue each member contributed in 1913 about 31*s.* and bore a share of the expenditure amounting to about 32*s.* The cost of sickness in 1913 amounted to 19,534,327*l.*, of which each member's share amounted to about 29*s.*

### Finance.

The common expenditure of the Empire is defrayed from the revenues arising from customs, certain branches of the excise, and the profits of the posts, telegraphs, and State railways. The individual States are assessed to make up any deficit in proportion to population.

The following tables exhibit the revenue and expenditure (in pounds sterling) for five years, ending March 31, the figures for the last four years being budget estimates (20 marks=1*l.*) :—

REVENUE				EXPENDITURE		
Years ending March 31	Ordinary	Extraord. (loans, &c.)	Total	Ordinary (recurring and non-recurring)	Extraord. (military, &c.)	Total
	£	£	£	£	£	£
1913	159,719,970	9,514,875	169,234,845	170,151,700	5,898,385	176,045,085
1914 <sup>1</sup>	170,258,920	519,637,650	689,896,570	170,258,920	519,637,650	689,896,570
1915 <sup>1</sup>	166,154,070	502,117,100	668,271,170	166,154,070	502,117,100	668,271,170
1916 <sup>1</sup>	182,963,096	4,375,892	187,338,988	182,963,096	1,204,960,676	1,387,923,772
1917 <sup>1</sup>	247,098,803	4,296,461	251,395,264	247,098,803	4,660,249	251,754,052

<sup>1</sup> Budget estimates.

The following table gives the estimated total revenue and expenditure (approved in March, 1917) for the financial year ending March 31, 1918 :—

Revenue	1917-18	Expenditure	1917-18
1. Ordinary :	Marks	1. Ordinary :—	Marks
Posts and Telegraphs . . . . .	881,217,500	Reichstag . . . . .	2,269,483

		Expenditure of the Treasury . . . . .	13,378,566
		Total permanent . . . . .	4,807,207,972
Total ordinary (including		2. Total transitory . . . . .	184,668,088
Miscellaneous taxes) . . . . .	4,941,876,060	Total Ordinary . . . . .	4,941,876,060
2. Total Extraordinary . . . . .	85,929,228	3. Extraordinary . . . . .	93,204,992
Grand total . . . . .	5,027,805,288	Grand total . . . . .	5,035,081,052
	(251,390,264 <i>l</i> )		(251,754,952 <i>l</i> )

The above estimates leave out expenditure on the army and navy. This will be taken out of the special war credits.

The budget was prefaced by the notice that as the war conditions make it impossible to foresee the approximate revenue and expenditure, the figures for the last peace year have in general been repeated for the budget for 1917-18.

The Federal contributions (*Matricular Beiträge*) are assessed according to population, at a rate per head fixed annually in the Imperial budget. For 1915 they were as follows (in thousands of pounds sterling). :—

	£		£		£
Prussia . . . . .	7,566	Brunswick . . . . .	97	Reuss, Younger	
Bavaria . . . . .	1,340	Saxe-Meiningen . . . . .	54	Branch . . . . .	29
Saxony . . . . .	913	Saxe-Altenburg . . . . .	41	Schaumburg-Lippe . . . . .	9
Württemberg . . . . .	450	Saxe-Coburg-Gotha . . . . .	49	Lippe . . . . .	29
Baden . . . . .	407	Anhalt . . . . .	65	Lübeck . . . . .	21
Hesse . . . . .	241	Schwarzburg-Son-		Bremen . . . . .	53
Mecklenburg-		dershausen . . . . .	17	Hamburg . . . . .	179
Schwerin . . . . .	125	Schwarzburg-		Alsace-Lorraine . . . . .	365
Saxe-Weimar . . . . .	78	Rudolstadt . . . . .	19		
Mecklenburg-Strelitz . . . . .	20	Waldeck . . . . .	11	Total . . . . .	12,299,970
Oldenburg . . . . .	89	Reuss Elder Branch . . . . .	14		

On October 1, 1916, the total funded debt amounted to 50,772,730,000 marks, of which 32,172,080,000 marks bear interest at 5 per cent. ; 1,137,807,400 marks at 4 per cent. ; 1,972,190,000 marks at 3½ per cent. ; 1,630,990,000 marks at 3 per cent. ; the Treasury bills amounted to 1,908,650,000 at 5 per cent. ; and 1,533,810,000 marks at 4 per cent. There is also a debt of 10,339,200,000 marks of treasury bills free of interest.

Five German War Loans have been issued, as follows :— (1) September, 1914, yielding 4,461 millions of marks ; (2) March, 1915, yielding 9,061 millions of marks ; (3) September, 1915, yielding 12,101 millions of marks ; (4) March 1916, yielding 10,712 millions of marks ; (5) September, 1916,

yielding 10,561 millions of marks; and (6) March, 1917, yielding 12,978 millions of marks; total, 59,964 millions of marks (2,998 millions sterling). For further details of the first four loans, *see* Introduction, THE STATESMAN'S YEAR-BOOK for 1916.

## Defence.

### I. FRONTIER.

Germany has a total frontier length of 4,570 miles. On the north it is bounded by the North Sea (293 miles), Denmark (47 miles), and the Baltic (927); on the south well-defined mountain-ranges and the Lake of Constance separate it from Austria (1,043) and Switzerland (256 miles). On the east Germany is bounded by Russia for 843 miles; on the west by France (242 miles), Luxemburg (111 miles), Belgium (70 miles), and Holland (377 miles).

Some of the coast defences and batteries have been placed under the jurisdiction of the admiralty. The empire is at present divided into ten 'fortress districts' (Festungs-Inspectionen), each including a certain area with fortified places. The following is a list of these districts, and the names of the fortresses in each, the fortified places of the first class, serving as camps, being distinguished by italics, while those specially designed for railway protection or obstruction are marked by asterisks (\*), and coast fortresses by a dagger (†):—

1. KÖNIGSBERG: *Königsberg*, *Danzig*,† *Pillau*,† *Memel*,† *Boyen*. 2. POSEN: *Posen*, *Glogau*,\* *Neisse*, *Glatz*. 3. BERLIN: *Spandau*, *Magdeburg*, *Torgau*,\* *Küstrin*. 4. MAINZ: *Mainz*, *Ulm*, *Rastatt*. 5. METZ: *Metz*, *Diedenhofen*,\* *Bitsch*.\* 6. COLOGNE (Köln): *Cologne*, *Koblenz*, *Wesel*,\* *Saarlouis*.\* 7. KIEL: *Kiel*, *Friedrichsort*,† *Cuxhaven*,† *Geestmünde*,† *Wilhelmshaven*,† *Swinemünde*.† 8. THORN: *Thorn*, *Graudenz*, *Vistula Passages* (Weichselübergänge), *Dirschau*. 9. STRASSBURG: *Strassburg*; *New Breisach*. 10. MUNICH (München): *Ingolstadt*, *Germersheim*.\*

These fortresses are all connected with each other by means of underground telegraphs, while strategical railway lines lead from the principal military centres towards the frontiers.

### II. ARMY.

Military service in Germany is compulsory and universal with the usual exemptions. Liability (Wehrpflicht) commences at the age of 17, and ends at 45, but actual service (Heerpflicht) begins at 20. The term of service in the First Line, or active army, is 7 years, 2 in the ranks, and 5 in the reserve, except in the cavalry and horse artillery, in which the periods are 3 and 4. During the period of reserve service the soldier is regarded as belonging to his corps, and is obliged to join it twice in the 5 (or 4) years for training. The duration of training is limited by law to 8 weeks: it is usually 6 weeks, or perhaps only a month.

The next stage is 5 years (cavalry and horse artillery 3 years) in the first 'ban' of the Landwehr, or Second Line Army. The Landwehr men are twice called out for exercise during this period, for 8 to 14 days on each occasion. Landwehr cavalry, however, are not called out for training in time of peace. After 5 years in the first 'ban' of the Landwehr, the soldier passes to the second 'ban,' and remains in it until he has completed his 39th year, *i.e.* for 6 to 7 years (8 to 9 in the case of the cavalry and horse artillery). There is no training during this period.

Finally all soldiers are passed into the Landsturm (second 'ban') in which they remain until they have reached the age of 45, that is for 6 years. The Landsturm is a purely home defence force. The first 'ban' consists of all those between the ages of 17 and 39 who for one reason or another have received no military training. The second 'ban' contains all the men,

whether trained or untrained, between 39 and 45. Excluding officers, non-commissioned officers, volunteers and certain specially enlisted grades, the establishment with the colours from October 1, 1914, is fixed at 661,176.

Well educated young men are admitted into the German army as volunteers, serving for one year only, but paying all their expenses. These supply almost all the Reserve and Landwehr officers.

There are a large number of Reserve Troops intermediate between the First Line and the Landwehr. The balance of the reservists will join the depots, and will be available for making good the losses in the field. The depot units would be augmented by the annual contingent of recruits, and if necessary by other young men whose 'Wehrpflicht' has commenced.

The Ersatz (lit. compensatory) reserve is composed of the young men of 20 who are fit for service, but are in excess of the numbers required for the annual contingent of recruits. They are liable to, and a certain number receive, 3 trainings of 10, 6 and 4 weeks, respectively. The primary object of this reserve is to supply the waste of war; for which purpose the men would be called to the depots on mobilisation, and their training completed. But a certain proportion of the ordinary (fully trained) reservists will also be available for this purpose, and the depot, or Ersatz, battalions will apparently be formed at first of about one-third fully trained, and two-thirds partially trained, reservists. On the other hand a large number of Ersatz reservists are now trained in special (non-combatant) duties, though they can of course be called to the depots if required.

Two regiments of infantry (6 battalions) form a brigade, two brigades a division, and two divisions an army corps. Ten divisions, however, have each 3 brigades. The intended employment of the reserve troops in war has not been divulged, but it seems possible that most of the 2-brigade divisions will be augmented by a reserve brigade, and that all army corps will take the field with six brigades (36 battalions), the artillery being proportionately increased by reserve regiments. To each infantry division is attached in war an artillery brigade (12 batteries) and a regiment of cavalry (4 squadrons): to each army corps 4 batteries of howitzers; also a battalion of rifles and a pioneer (engineer) battalion. Eighteen cyclist companies have been formed. Field batteries have 6 guns, horse batteries have 4. The war strength of a complete division, of two brigades, without reserve units, is about 14,000 combatants, and of an army corps of two divisions, about 30,000. The strength of a 3-brigade division would be about 21,000, and of an army corps of 6 brigades about 43,000 combatants. There are altogether 25 army corps in the army of the German Empire.

There is only one permanent cavalry division, that of the guard, but in war at least eight divisions would be formed from the line regiments. The normal strength of a cavalry division is 3 brigades of 2 regiments each, with 2 (or possibly 3) batteries of horse artillery. In all 24 squadrons and 8 (or 12) guns.

The kingdom of Prussia, together with Baden and Hesse, is divided into 16 military districts, each of which furnishes a complete army corps, and 2 (or 3) Landwehr divisions, as well as its proportion of cavalry, garrison artillery, &c. There is also the Prussian Guard Corps, drawn from the whole kingdom. Saxony furnishes 2 army corps (XIIth and XIXth); Württemberg one army corps (XIIIth); the Reichsland (Alsace and Lorraine) 2 army corps (XVth and XVIth), and the kingdom of Bavaria 3 army corps (1st, 2nd, and 3rd Bavarian). The strength of the field army (25 army corps and independent cavalry) together with the reserve troops, amounts to about 1,250,000 combatants. The estimate in the last edition of the handbook of the German Army, published in 1912, of the available trained and untrained men of the German Army, excluding officers

and officials, showed a total of 9,898,000. It was made up as follows:—Trained rank and file, including reserve and Landwehr, 3,302,000 trained Landsturm, 623,000; one-year volunteers, 85,000; non-commissioned officers of peace establishment, 92,000; total trained, 4,102,000. Partially trained Ersatz Reserve, 113,000; untrained Ersatz Reserve and Landsturm, 5,683,000. Grand total, 9,898,000.

The constitution of 1871 provides that the whole of the land forces of the Empire shall form a united army in war and peace, under the orders of the Emperor. All German troops are bound by the constitution to obey unconditionally the orders of the Emperor, and accordingly take the oath of fidelity; but this oath is not administered to the Bavarian troops in time of peace. The Prussian War Office performs the functions of an Imperial Ministry of War, but Bavaria, Saxony, and Württemberg have also War Ministers of their own. The king of Bavaria also retains by a special convention the general administration of the Bavarian troops. The military budgets of Saxony and Württemberg are prepared in Berlin, and Bavaria is bound to vote military supplies in a fixed proportion to the other budgets.

The German infantry are armed with the Mauser magazine rifle, model 1898, calibre .311". The cavalry have the Mauser magazine carbine. All classes of cavalry carry the lance. The field and horse artillery are armed with a Krupp gun firing a 15 lb. shell, of 1896; the carriage is of more modern date. The light field howitzer is a 30 pr.; the heavy howitzer is a 94 pr.

The military expenditure of the German Empire, entered in the budget for 1913-14, amounted to 58,537,965*l.*; for 1914-15, 60,429,705*l.*, for 1915-16, 25,798,255*l.* (in addition to unspecified special war expenditure); for 1916-17, the military expenditure was omitted altogether from the estimates.

The peace establishment of the German Army in 1914 amounted to 36,088 officers, 769,938 non-commissioned officers and men, and 160,092 horses.

There is also a colonial force with a special colonial staff; these troops are not included in the army, and they serve under the direct orders of the German Chancellor; their total establishment is about 340 officers, 2,250 German non-commissioned officers and men, and 3,830 native soldiers. The officers and non-commissioned officers are mostly seconded from the home army.

*War Expansion.*—Some figures have recently appeared showing the degree of military expansion of the German forces since the commencement of the war. From these it would appear, approximately, that the infantry has been multiplied by 3½ times its peace footing, the field artillery by 3½ times, the heavy artillery by 5 times, and the pioneers by 4 times. There was a slow and uniform rate of increase in the infantry down to the spring of 1915, when an extensive organisation was carried out, divisions being reduced from 4 to 3 regiments, and heavy levies being made to create new formations. The total of 1st line and reserves available on mobilisation was 2,250,000 men, and if a rough average expansion of 4 times the original mobilisation strength of the different arms is taken, it would appear that the German Empire has placed 10,000,000 men in the field since the outbreak of war. By December, 1916, the whole of the 1917 class of recruits had been incorporated in the army.

*Casualties.*—The total number of German casualties, reported in the official German lists up to the end of December, 1916, exclusive of naval and colonial casualties, is 4,010,160.

*Aviation.*—In July, 1914, the Army Aviation force was estimated at four battalions, with companies quartered at Aix-la Chapelle, Allenstein, Cologne, Darmstadt, Doebritz, Freiburg, Graudenz, Hanover, Insterburg, Jütenbog, Königsberg, Metz, Posen, Strassburg, and Zeithain. The aeroplane types were

as follows: 211 monoplanes, and 264 biplanes, the types used being, in addition to the Taube, the Aviatik, Albatross, and Fokker, which are more or less copies of French machines. There are three types of German airships in use: the Zeppelin, Schütte-Lanz, and Parseval. The number of dirigibles destroyed since the beginning of the war is unofficially reckoned at 39 or 40, of which 10 were brought down in 1916. Since 1914, Germany has greatly increased her aviation force in both airships and aeroplanes, and it is stated that at the present time Germany has about 9,000 aviators flying and in training, and about 20,000 aeroplanes in use for war purposes on the various fronts. But no definite information on the subject is available.

### III. NAVY.

Estimates:—For 1913-14, 21,508,165*l.*; for 1914-15, 22,775,725*l.*; for 1915-16, 7,110,320*l.* (in addition to unspecified special war expenditure); for 1916-17 the naval expenditure was omitted altogether from the estimates.

After the war of 1870-71 the German navy was re-organised, and a *Flotten Gründungsplan* laid down. By a cabinet order of March 30, 1889, the administration was wholly re-organised. The chief command was separated from the administration, and vested in the Chief of the Admiralty staff, while the administration was transferred to the *Reichsmarineamt*, having at its head, under the Chancellor, the Naval Secretary of State. The first of these officers deals generally with the operations of the fleet, and with questions relating to coast defence, training, the efficiency of the *personnel*, &c.; while the imperial dockyards, matters concerning shipbuilding and ordnance, clothing, victualling, &c., fall to the department of the secretary of state. The ships of the German navy are divided between the Baltic and North Sea stations. The chief naval establishments are at Kiel on the Baltic and Wilhelmshaven on the North Sea, and the Kaiser Wilhelm Canal, across the Schleswig-Holstein neck from Kiel to the Elbe, which was opened in the month of June, 1895, facilitates the transference of forces from one base to the other. Heligoland has been developed into a very important naval base. Danzig is now an effective base also, with a dockyard. Cuxhaven and Sonderburg are minor naval bases.

The following is a statement of the strength of the German fleet, so far as can be estimated. It allows for admitted losses, for ships building for foreign navies which have been bought in, and for accelerated construction. The 1917 figures are uncertain owing to no information being available as to the number of ships and vessels completed:—

Class	Effective at end of		
	1915	1916	1917 <sup>1</sup>
Dreadnoughts . . . . .	22	28	26
Pre-Dreadnought battleships . . . . .	20	20	19
Armoured cruisers . . . . .	4	3	3
Protected cruisers . . . . .	32	34	32
Destroyers . . . . .	164	?	?
Torpedo boats (old) . . . . .	47	47	45
Submarines . . . . .	?	?	?

<sup>1</sup> Anticipated figure, falling losses.

NOTE.—German ships were usually completed for sea about June each year. Certain ships which have no fighting value are omitted. Most of them have been sunk in the war.

From the following tables the ships destroyed in the war have been omitted. The battleship *Pommern* was sunk in the Jutland Bank battle, and Sir John Jellicoe reported that two Dreadnought battleships were seen to sink. The Germans have not admitted these latter losses. They reported the sinking of the battle-cruiser *Lützow*. Another of the class was said to have been seriously damaged, as well as a Dreadnought battleship. The *Westfalen* was torpedoed by E 23 on August 19th, but the Germans said she returned safely to port. It is believed that the battle-cruiser *Von der Tann*, was sunk earlier in the war. The *Goeben* has been transferred to Turkey, also the light cruiser *Breslau*. The following are the armoured cruisers lost to the German navy: *Blücher* (Dogger Bank), *Scharnhorst* and *Gneisenau* (Falkland Islands), *Yorck* (by German mine), *Friedrich Karl* and *Prinz Adalbert* (Baltic). The following is a list of the light cruisers sunk by gun-fire and torpedo: *Magdeburg*, *Köln*, *Mainz*, *Ariadne*, *Hela*, *Emden*, *Karlsruhe*, *Nürnberg*, *Leipzig*, *Dresden*, *Königsberg*, *Undine*, *Bremen*, and in the Jutland battle the *Frauenlob*, *Wiesbaden*, *Elbing*, *Rostock*, and one unnamed; also several gunboats, a dozen auxiliaries, and many armed merchant vessels, trawlers, mine sweepers, armed yachts, etc. For destroyers and submarines see note following the tables.

†—Possibly Sunk.

<sup>1</sup> These two ships, *M. Amursky* and *Nevelskoi*, were completing at Elbing for the Russian Navy when war broke out.

<sup>2</sup> One of this class, the *Elbing*, probably originally *Ersatz Hela*, was sunk in the Jutland battle. Four have been removed from the above lists, but Sir John Jellicoe's despatch mentioned the sinking of a fifth.

It is impossible to speak with any certainty concerning the destroyer flotillas of the German Navy. They have played an inconsiderable part in the war. If we suppose that 12 boats have been built every year, according to the peace programme, and that 8 have been taken over which were building in Germany for other countries, we reach (in 1917) a total of 188; but losses during the war would certainly reduce the number to 150 or less, and of these about 25 would be over 12 years old. Several were admitted by the Germans to have been sunk in the Jutland battle—Sir John Jellicoe's despatch put the number at 6, besides two damaged—and two were sunk in the raid on our cross-channel transport service, October 28, 1916, and two others subsequently.

Even greater uncertainty concerns the submarines, which appear to be of two principal classes, those intended for local service and those for long range operations, probably vessels of 1,200 tons or more submerged displacement, with 20 knots surface speed, and carrying 4 guns. Germany entered the war with about 28 completed submarines, others have since been completed very rapidly. The total number has been estimated as at least 300, but probably half of these have been sunk or have gone out of the service.

For many months the German High Sea Fleet pursued a reticent strategy. The fleet in the Baltic endeavoured to assist the army in Russia in August, 1915. On December 16, 1914, and on April 26, 1916, battle-cruiser squadrons raided the English coast. On January 24, 1915, this squadron was brought to action at the Dogger Bank. Activity began to be manifested in May last year, and on May 31 the whole Fleet cruised to the northward, and was brought to action off the Jutland Bank on May 31.

The German navy is manned by the obligatory service of the maritime population (*seemännische Bevölkerung*)—sailors, fishermen, ships' carpenters, and others; and also of the semi-maritime population—that is, of those who have smaller experience of the sea. All these were freed on this account from service in the army. Great inducements were held out for able seamen to volunteer in the navy, and the number of these in recent years has been very large. The total seafaring population of Germany was estimated at 80,000, of whom 48,000 were serving in the merchant navy at home, and about 6,000 in foreign navies. The naval *personnel* in 1914 was given as 3,889 officers and 75,486 men, plus a reserve of about 110,000 men. It is extremely efficient, especially in torpedo service. Practically the entire fleet has always been in commission.

## Production and Industry.

### I. AGRICULTURE.

In Germany (except the Mecklenburgs) there is complete free trade in land. Generally speaking, small estates and peasant proprietorship prevail in the West and South German States, while large estates prevail in the north-east.

According to the latest returns (1893 and 1900), 91 per cent. of the area of Germany is productive and 9 per cent. unproductive. The subdivision of the soil, according to the latest official returns (1913), was as follows (in acres):—Arable land, 65,148,000; grass, meadows, pasture, 21,760,500; vineyards, 296,500; woods and forests, 35,558,000; all other, 12,811,500.

On June 12, 1907, the total number of agricultural enclosures (including arable land, meadows, cultivated pastures, orchards, and vineyards) each cultivated by one household, was 5,736,082, with an area of 78,665,370 acres, being an average of about 13·7 acres to each. The total was distributed as follows:—

Under 2·47 acres	2·47 to 24·7 acres	24·7 to 247 acres	247 acres & over	Total
2,731,055	2,306,529	674,932	23,566	5,736,082

On June 12, 1907, these farms employed 15,169,549 persons; in the year ending June 12, 1907, the greatest number employed at the same time was 19,732,424.

The areas under the principal crops, in acres, were as follows:—

—	1912	1913	1914	1915
Wheat . . .	4,814,027	4,935,222	5,048,235	2,921,957
Rye . . .	15,670,390	16,035,347	16,245,807	12,443,785
Barley (Summer)	3,973,980	4,134,527	4,057,290	2,280,827
Oats . . .	10,966,335	11,095,388	11,278,665	7,697,267
Potatoes . . .	8,353,675	8,530,077	8,465,245	8,931,040
Hay . . .	14,806,530	14,808,492	14,822,475	—
Vines . . .	272,265	264,690	254,880	242,642
Tobacco . . .	39,440	35,452	35,405	22,587
Hops . . .	67,530	67,922	68,317	59,342
Beet . . .	1,261,850	1,369,062	1,423,092	—

The total yield of their products in the years indicated, in metric tons (1 metric ton = 2,204 lbs. or '984 an English ton), or hectolitres (hectolitre = 22 gallons), was as follows :—

	1912	1913	1914	1915
	Metric Tons	Metric Tons	Metric Tons	Metric Tons
Wheat . . .	4,360,624	4,655,956	3,971,995	3,855,841
Rye . . .	11,598,289	12,222,394	10,426,718	9,152,402
Barley . . .	3,481,974	3,673,254	3,137,983	2,483,752
Oats . . .	8,520,183	9,713,965	9,038,185	5,986,034
Potatoes . . .	50,209,466	54,121,146	45,569,559	53,979,258
Hay . . .	27,681,860	29,184,994	29,156,024	24,000,000
Hops . . .	20,564	10,617	23,236	14,563
Tobacco . . .	38,892	38,855	28,333	—
Wine. Hectol. .	2,019,392	1,004,947	921,198	2,698,917

Hop area in 1916 was 44,472 acres and production, 86,936 tons. Tobacco area in 1916, 31,762 acres. Sugar beet area in 1916-17, 1,100,000 acres ; in 1915-16, 1,000,000 acres.

In 1913 there were within the Empire 196,084,640 fruit trees, comprising 74,375,929 apple-trees, 30,788,886 pear-trees, 64,547,217 plum-trees, 21,390,088 cherry-trees, 769,731 apricot trees, 2,021,188 peach trees, and 2,191,601 walnut trees.

The number of domestic animals in Germany according to the Census of December 1, 1915, was :—

States	Horses <sup>1</sup>	Cattle	Sheep	Swine	Goats
Prussia . . .	2,444,897	11,776,765	3,505,657	11,803,268	2,096,381
Bavaria . . .	279,148	3,701,860	455,803	1,708,304	330,751
Saxony . . .	117,349	722,642	56,796	591,129	142,790

„ Sept. 1, 1916 . .	—	20,338,950	—	17,261,108	—

<sup>1</sup> Exclusive of Army horses.

## II. FORESTRY.

Forestry in Germany is an industry of great importance, conducted under the care of the State on scientific methods. The forest area of the Empire is put at 34,569,800 acres, of which crown forests occupy 675,540 acres ; State and partly State forests, 11,015,910 acres ; communal forests, 5,577,470 acres ; private forests, 16,130,000 acres, and forests belonging to various associations or foundations, 1,277,560 acres. Of the whole forest area about one-third (11,225,660 acres) is under foliage trees, oak, birch, ash, beech, &c., and two-thirds (23,344,240 acres) bear pine, larch, red and white fir, &c. The forests yield, according to the latest report (1900), 26,183,410 cubic yards of timber and 23,348,640 of firewood.

## III. MINING.

The great bulk of the minerals raised in Germany is produced in Prussia where the chief mining districts are Westphalia, Rhenish Prussia, and Silesia,

for coal and iron, the Harz for silver and copper, and Silesia for zinc. Saxony has coal, iron, and silver mines; Lorraine rich coal and iron ore fields; and the Grand-Duchy of Luxemburg rich iron ore fields.

In 1913 there were 4,275 mines and foundries in Germany employing 1,196,786 persons (1,133,701 men, 15,969 women, 46,947 juveniles, and 169 children under 14 years of age).

The quantities of the principal minerals raised are as follows:—

—	1909	1910	1911	1912	1913
	Metric Tons	Metric Tons	Metric Tons	Metric Tons	Metric Tons
Coal . . . . .	148,788,050	152,827,777	160,747,126	174,875,297	191,511,154
Lignite . . . . .	68,657,606	69,547,299	73,774,128	80,934,797	87,233,084
Iron ore . . . . .	25,504,464	28,709,700	29,879,353	27,199,944	28,607,903
Zinc ore . . . . .	723,566	718,316	699,970	643,598	641,549
Lead ore . . . . .	159,853	148,497	140,155	142,839	110,153
Copper ore . . . . .	798,618	925,957	868,600	974,285	947,757
Rock Salt . . . . .	1,369,805	1,424,063	1,436,491	1,296,302	1,391,738
Potassic salt . . . . .	7,042,034	8,311,671	9,606,875	11,161,202	13,306,312

The coal production in 1914 amounted to 161,535,224 metric tons, and in 1915 to 146,712,350 tons; that of lignite in 1914 to 83,946,906 metric tons, and in 1915, 88,369,554 tons.

The following table shows particulars of the production of the foundries in Germany and Luxemburg in 1911 and 1912:—

—	Quantity in metric tons 1911	Value in sterling 1911	Quantity in metric tons 1912	Value in sterling 1912
		£		£
Pig iron . . . . .	15,574,039	42,525,550	15,220,900	46,143,900
Zinc . . . . .	243,784	5,717,950	313,600	7,463,950
Lead . . . . .	161,450	2,207,600	165,000	2,804,900
Copper . . . . .	37,455	2,200,700	45,500	3,287,950
Silver . . . . .	869	3,180,500	895	3,707,250
Gold . . . . .	44	6,161,850	43	6,067,150
Tin . . . . .	12,426	1,974,800	10,600	2,205,300
Sulphuric acid . . . . .	1,724,981	2,031,050	1,649,700	2,816,070

In 1913 the total output of pig iron was 19,291,920 tons, in 1914, 14,389,547 tons; and in 1915 11,787,626 tons. Ingot steel production in 1914 totalled 14,872,467 metric tons; in 1915 13,163,188 tons.

#### IV. FISHERIES.

In 1907 the persons engaged in fishing numbered 33,665, of whom 15,811 were employed in sea and shore fishing, and 17,854 on inland waters. In 1911, 701 boats, with an aggregate crew of 6,876, were engaged in deep-sea fishing in the North Sea. In 1913, the yield of the North Sea fisheries was valued at 1,730,560*l.*, and the Baltic fisheries, 518,910*l.*; total value of fish caught, 2,249,470*l.*

#### V. MANUFACTURES.

The chief seats of the German iron manufacture are in Prussia, Alsace-Lorraine, Bavaria, and Saxony. Steel is made in Rhenish Prussia. Saxony

is the leading State in the production of textiles, but Westphalia and Silesia also produce linen; Alsace-Lorraine, Württemberg, Baden, and Bavaria produce cotton goods. Woollens are manufactured in several Prussian provinces, also in Saxony and Bavaria; silk in Rhenish Prussia, Alsace, and Baden. Beetroot sugar is an important manufacture in Prussia, Brunswick, Anhalt, and Bavaria, &c.; glass, porcelain, and earthenware in Silesia, Thuringia, Bavaria, and Saxony; clocks and wooden ware in Württemberg and Bavaria; and beer in Bavaria, Prussia, Saxony, Baden, Hamburg, Bremen, &c.

The following are the statistics of the beetroot sugar manufacture in the Zollgebiet:—

Years beginning 1 August	Number of Factories	Beetroot used in Metric Tons	Production in Metric Tons		No. of Kgs. Beetroot to produce 1Kg. of Sugar
			Raw Sugar	Molasses	
1909-10	356	12,892,068	1,947,580	282,411	6·62
1910-11	354	15,748,981	2,512,928	328,058	6·27
1911-12	342	9,060,575	1,407,781	302,164	6·44
1912-13	342	16,642,237	2,632,282	380,863	6·32
1913-14	341	16,939,979	2,617,937	375,643	6·24

In 1913-14 there were 24 manufactories of sugar from starch, which produced 11,343 tons of dry sugar, 65,463 tons of syrup, and 4,681 tons of colour.

The following table shows the quantity of beer brewed within the Beer-excise district (*Brausteuerggebiet*), which includes all the States of the Zollgebiet, except Bavaria, Württemberg, Baden, and Alsace-Lorraine. The amounts are given in thousands of hectolitres (1 hectolitre = 22 gallons):—

Years beginning 1 April	Beer Excise Dist.	Bavaria	Württem- berg	Baden	Alsace- Lorraine	Total (Zollgebiet)
1909	37,340	18,254	3,516	3,186	1,290	63,754
1910	38,080	18,110	3,981	2,801	1,206	64,465
1911	41,348	19,642	4,378	3,208	1,483	70,353
1912	39,538	19,300	4,104	3,238	1,400	67,872
1913	40,974	19,088	4,058	3,283	1,444	69,200

The total number of active breweries in the Beer-excise district was in 1913, 3,786. The amount brewed per head of the population in 1913 was in gallons:—the Excise district, 17; Bavaria, 59; Württemberg, 36; Baden, 33; Alsace-Lorraine, 17; the entire Zollgebiet, 23 gallons. In 1914, there were 53,448 distilleries in operation, which produced 84,575,480 gallons of alcohol.

In 1913, 556,340 juvenile workers were employed in Germany, 376,481 being males and 180,359 females. In addition 8,008 boys and 6,158 girls (total 14,166) under 14 years of age were employed.

### Commerce.

The commerce of the Empire is under the administration and guidance of special laws and rules, emanating from the Zollverein, or Customs Union, which, since March 1, 1906, embraces practically the whole of the States of Germany and the Grand Duchy of Luxemburg, as also the Austrian

communes of Jungholz and Mittelberg. A few districts in Baden (3,863 inhabitants), on the Swiss frontier; the Island of Helgoland; the four Free Havens of Hamburg, Bremerhaven, Geestemünde, and Cuxhaven; and the extra-customs territory of Bremen and Emden, still remain unincorporated. The commercial statistics, however, exclude only the commerce of the island of Helgoland and the districts in South Baden. Population of the entire Wirtschaftsgebiet (commercial unit) in 1910, 65,157,115.

Since 1879 Germany has been protectionist in her commercial policy. Of the total imports in 1913, the value of 235,398,700*l.* was subject to duty, and 303,085,600*l.* duty-free (exclusive of the precious metals). The duties levied amounted to 44,263,500*l.*, or 19 per cent. of the value of the imports subject to duty.

The following table shows (in pounds sterling) the special trade for six years:—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1909	443,020,500	342,934,650	1912	550,856,600	454,976,450
1910	465,499,600	382,209,900	1913	560,335,800	509,965,000 <sup>1</sup>
1911	509,347,250	411,219,900	1914 <sup>1</sup>	269,314,000	249,248,000

<sup>1</sup> First 6 months. No further statistics concerning German trade have been published since the outbreak of war.

The following are the principal details of the *special commerce* for the years 1912 and 1913 (20 marks = £1).

Classes of goods	Imports		Exports	
	1912	1913	1912	1913
	thousand marks	thousand marks	thousand marks	thousand marks
Agricultural products and foodstuffs	7,100,262	7,036,738	1,475,987	1,728,137
Mineral raw materials	1,045,469	1,087,250	762,983	869,805
Manufactures of fats, oils, and wax	28,292	26,714	47,205	52,283
Chemical & pharmaceutical products	416,646	430,885	824,640	956,414
Textile materials and manufactures	839,735	804,511	1,464,779	1,560,550
Leather and leather goods	166,728	163,637	512,272	553,219
Rubber goods	27,397	26,403	120,511	128,284
Plaited goods, not of textile fibres	10,990	8,584	7,892	8,344
Brooms, brushes, &c.	2,291	2,615	11,790	12,395
Manufactures of wood, &c.	74,127	76,019	140,570	164,471
Paper and paper goods	30,422	31,346	232,210	262,688
Books, statuary, pictures, &c.	45,898	45,937	96,123	104,807
Manufactures of stone, &c.	34,642	32,465	30,615	34,151
Earthenware	7,581	6,694	101,984	112,737
Glassware	19,752	17,820	119,515	146,024
Precious metals, & manufactures of	30,179	29,699	66,852	73,687
Base metals, & manufactures thereof	651,626	689,412	1,664,911	1,905,596
Machinery & electrotechnical goods	120,065	140,339	1,025,937	1,143,834
Firearms, clocks, toys, &c.	36,975	36,684	213,118	233,129

In Germany, the average value of most imported articles is fixed annually, under the direction of the Imperial Statistical Office, by a commission of experts. Since April 1, 1911, the value of all exports and of all imports is declared. The price fixed is that of the goods at the moment of crossing the frontier. For imports the price does not include Customs duties, cost of transport, insurance, warehousing, &c., incurred after the frontier is passed. For exports, the price includes all charges within the territory, but drawbacks and bounties are not taken into account. The quantities are determined according to obligatory declarations, and, for imports, the fiscal authorities may actually weigh the goods. For packages, an official tare is deducted. The countries whence goods are imported, and the ultimate destination of exports are registered.

The imports of gold (coined and in bars) in 1913 amounted to 19,108,750*l.*; of silver (coined and in bars), to 2,710,950*l.*; the exports of gold amounted to 3,051,600*l.*; of silver to 2,017,000*l.*

Some of the leading imports and exports under the above heads were, in thousands of marks value, as follows in 1912 and 1913 in millions of marks :—

Imports	1912	1913	Exports.	1912	1913
Cotton (raw) . . . . .	579.8	607.1	Machinery and parts . . . . .	630.3	680.3
Wheat . . . . .	395.8	417.3	Iron and iron goods . . . . .	580.9	652.2
Wool (raw) . . . . .	405.9	412.7	Coals . . . . .	436.6	516.4
Barley . . . . .	444.2	390.4	Cotton goods . . . . .	421.6	446.5
Copper . . . . .	313.0	335.3	Woollens . . . . .	253.4	270.9
Skins and Hides . . . . .	250.8	321.7	Sugar . . . . .	130.5	264.7
Iron Ore . . . . .	201.1	227.1	Paper and paper goods . . . . .	232.2	262.8
Coffee . . . . .	252.6	219.6	Furs . . . . .	211.5	225.4
Coal . . . . .	191	204.6	Silk goods . . . . .	190.9	202.4
Eggs . . . . .	193.1	194.1	Coke . . . . .	126.4	146.7
Furs . . . . .	194.8	187.8	Dyes (aniline) . . . . .	133.8	142.1
Nitrate . . . . .	178.8	171.9	Rye . . . . .	125.5	132.9
Silk (raw) . . . . .	146.9	158	Clothing . . . . .	118.3	132
Bran . . . . .	209.2	149.4	Copper goods . . . . .	108.1	130.8
Rubber . . . . .	184.8	146.8	Leather goods . . . . .	98.1	114.2
Lard . . . . .	141.1	146.7	Toys . . . . .	92.3	103.3
Tobacco . . . . .	135.6	134.3	Wheat . . . . .	63.4	87.6

New ships, &c. . . . .	118,883	327,903	467,289	456,299	159,662

Of exports in 1915 there were none.

The ports of Hamburg and Bremen were the chief gates of commercial intercourse of Germany with the United Kingdom and the United States.

### Shipping and Navigation.

The following was the distribution of the mercantile navy of Germany only ships of more than 17·65 tons gross-tonnage) on January 1 of three years:—

	Baltic Ports		North Sea Ports		Total Shipping	
	Number	Net tonnage	Number	Net tonnage	Number	Net tonnage
1912:—						
Sailing vessels . . .	392	18,586	2,331	491,473	2,723	510,059
Steamers . . . . .	550	298,321	1,459	2,215,345	2,009	2,513,666
Totals . . . . .	942	316,907	3,790	2,706,818	4,732	3,023,725
1913:—						
Sailing vessels . . .	388	17,187	2,364	481,041	2,752	498,228
Steamers . . . . .	562	301,145	1,536	2,354,351	2,098	2,655,496
Totals . . . . .	950	318,332	3,900	2,835,392	4,850	3,153,724
1914:—						
Sailing vessels . . .	404	20,152	2,361	467,007	2,765	487,159
Steamers . . . . .	583	311,703	1,587	2,520,009	2,170	2,832,312
Totals . . . . .	987	331,855	3,948	2,987,216	4,935	3,320,071

Of the total shipping on January 1, 1914, 2,329 of 318,646 tons ; 1913, 2,284 of 298,584 tons ; 1912, 2,260 of 312,713 tons belonged to Prussian ports. The total number of sailors required for manning the ships of the merchant navy was, on January 1, 1914, 83,898 ; January 1, 1913,

77,746; 1912, 75,130. The size of the various ships in 1914 was as follows:—

	Under 100 Tons gross	100-500 Tons gross	500-1,000 Tons gross	1,000-2,000 Tons gross	2,000 Tons gross and over
Sailing vessels	2,056	533	43	53	80
Steamers	241	575	255	316	783

Of the sailing vessels 1,481 were totally of iron or steel; of the steamers 2,159 were of iron or steel.

Built in German private yards, 1913, 936 vessels of 523,733 tons gross (including 22 war vessels of 55,860 tons gross). Of these, 179 of 38,249 tons gross (including 9 war vessels of 2,240 tons gross) were built for foreigners. Built in foreign yards for Germans, 103 trading vessels of 42,267 tons gross.

Shipping of the German Empire, in which each vessel, if it entered several ports on a single voyage, is counted only once:—

	With Cargoes		In Ballast		Total	
	Number	Net tonnage	Number	Net tonnage	Number	Net tonnage
1911:—						
Entered.	100,854	29,068,055	11,837	2,468,733	112,691	31,536,788
Cleared.	81,291	21,101,181	32,288	10,544,514	113,579	31,645,695
1912:—

<sup>1</sup> Excluding Cuxhaven. <sup>2</sup> Excluding Bremerhaven and Vegesack. <sup>3</sup> Excluding Travemünde.

## Internal Communications.

## I. RAILWAYS.

The following table gives some details of German railways :—

Years	Total Length, in English miles	Total Capital £	Expenditure £	Receipts £	Percentage on Capital of Surplus
1909	36,093	851,853,011	100,933,477	115,950,000	4·92
1910	36,599	875,917,215	103,725,098	152,524,442	5·57
1911	37,053	900,411,009	108,238,122	164,330,389	6·23
1912	37,823	922,850,000	117,300,000	173,850,090	6·29
1913	37,917	962,750,000	124,500,000	177,800,000	5·70

In 1913, 618,351,000 metric tons of goods, including live cattle, were carried, and paid 2,213,200,000 marks ; the number of passengers in 1913 was 1,798,000,000, yielding 975,800,000 marks.

In 1913 there were 3,168 miles of tramway, and 6,923 miles ' Kleinbahnen.'

The length of railway line of normal and narrow gauge respectively belonging to each of the State systems, and the length of private line, were as follows on March 31, 1915 :—

Railway system	Normal gauge	Narrow gauge	Total
	Miles	Miles	Miles
Prussian-Hessian . . . . .	24,785	149	24,884
Bavarian . . . . .	5,208	72	5,280
Saxony . . . . .	1,778	819	2,092
Württemberg . . . . .	1,251	63	1,314
Baden . . . . .	1,141	18	1,169

Railway system	Normal gauge	Narrow gauge	Total
	Miles	Miles	Miles
Mecklenburg . . . . .	684	—	684
Oldenburg . . . . .	421	—	421
Royal Military . . . . .	44	—	44
Alsace-Lorraine . . . . .	1,269	50	1,319
Total . . . . .	36,526	671	37,197
Private . . . . .	2,208	715	2,923
Grand Total . . . . .	38,734	1,386	40,120

## II. CANALS AND NAVIGATIONS.

The latest available statistics are for 1904. They will be found in the STATESMAN'S YEAR-BOOK for 1913, p. 885. On June 17, 1914, the Hohenzollern Canal, between Berlin and Hohensaaten, was opened.

## III. POSTS AND TELEGRAPHS.

The postal and telegraphic services are retained in the hands of their respective Governments. All parts of the Empire except Bavaria and Württemberg are united to form an imperial postal district (*Reichspostgebiet*). Statistics for 1913 :—

—	Employés	No. of Post Offices	No. of Boxes	No. of Telegraph Offices
Reichspostgebiet . . . . .	224,530	34,860	135,179	38,509
Bavaria . . . . .	16,941	5,355	19,989	9,136
Württemberg . . . . .	6,724	1,200	5,813	2,368
Total in Empire . . . . .	248,195	41,415	160,981	50,013

## Amount of business transacted in 1913 :—

—	Reichspostgebiet	Bavaria	Württemberg	Empire
Letters . . . . .	3,423,465,970	326,585,140	122,112,750	3,872,163,860
Post Cards . . . . .	1,872,365,120	160,720,550	64,473,570	2,097,559,240 <sup>1</sup>
Printed matter . . . . .	1,729,515,740	166,152,470	67,698,190	1,963,366,670
Business papers . . . . .	38,660,940	1,984,880	840,360	41,486,180
Samples . . . . .	113,423,230	8,140,590	3,239,130	124,802,950
Journals . . . . .	2,074,631,350	280,111,000	107,887,360	2,462,629,710
Total, including other despatches	9,807,020,430	998,233,210	391,958,780	11,197,212,420
Money sent (£ sterling) . . . . .	2,933,303,364	251,593,944	111,320,094	3,296,217,402

<sup>1</sup> The use of post cards for inland correspondence in Germany is almost double that of any other country.

Finances of the postal and telegraphic and telephonic services in 1913 (in marks) :—

—	Reichspostgebiet	Bavaria	Württemberg	Empire
Receipts . . . . .	833,314,597	80,713,143	31,977,952	946,005,692
Expenditure . . . . .	743,622,352	64,294,999	22,939,392	830,856,743
Surplus . . . . .	89,692,245	16,418,144	9,038,560	115,148,949

The following are the telegraph statistics for the year 1913 :—

	Telegraph Lines, miles	Telegraph Wires, miles	Inland Telegrams	Foreign Telegrams
Reichspostgebiet	121,148	402,889	36,221,810	16,299,480
Bavaria . . .	19,626	59,469	2,677,200	1,048,570
Württemberg . .	7,690	12,143	837,320	458,430
Total in Empire .	147,864	474,501	39,736,420	17,806,480

In 1913 the urban telephone systems had 80,099 miles of line and 3,694,021 miles of wire ; conversations, 2,073,757,950. The 10,105 inter-urban systems had 840,993 miles of wire ; conversations, 444,194,700.

### Money and Credit.

Money (in thousands of marks) coined since the foundation of the present Empire :—

Year beginning 1 April	Gold	Silver	Nickel	Copper	Total
1910	166,430·1	43,435·5	4,107·6	200·0	214,473·3
1911	136,346·1	40,910·2	6,524·3	1,142·2	184,922·8
1912	124,293·2	31,053·6	6,213·9	1,275·4	162,836·1
1913	155,917·7	48,695·5	3,253·1	687·0	208,553·3
1914	31,939·9	72,223·0	5,888·9	377·4	110,429·2
Total (1871- March 31, 1915)	5,319,356·5	1,232,858·9	118,995·2	24,673·2	6,685,893·8
Withdrawn .	178,153·5	1,825·6	5,373·3	79·0	185,431·4
Remaining—					
(Mar. 31, 1915)	5,141,103·0	1,231,033·3	113,621·9	24,594·2	6,510,462·4
(Mar. 31, 1916)	5,155,846·8	1,265,883·7	114,364·8	24,907·5	6,571,768·6 <sup>1</sup>
(Mar. 31, 1917)	5,155,813·3	1,270,394·3	108,047·2	25,106·1	6,485,426·1 <sup>2</sup>

<sup>1</sup> Including 10,765,578 marks' worth of iron coins.

<sup>2</sup> Including 25,965,144 marks' worth of iron coins and 99,901 marks' worth of aluminium coins.

The bank notes current in the German Empire are those of (1) the Imperial Bank (in denominations of 10, 20, 50, 100 and 1,000 marks) ; (2) the Badische Bank (100 mark notes only) ; (3) the Bayerische Notenbank (10 mark notes only) ; (4) the Sächsische Bank (100 and 500 mark notes) ; and (5) Württembergische Notenbank (100 mark notes). The notes of the last four banks are termed ' private bank notes.' The notes of all five banks must be accepted at their full face value by each of the banks named. Since January 1, 1910, the notes of the Imperial Bank are legal tender.

As a war measure Imperial Treasury Notes in denominations of 10 and 5 marks were issued to the extent of 240 million marks and by the law of August 4, 1914, were declared legal tender. By the same law the necessity to change all notes into gold was set aside. Moreover, Loan Banks were established in August, 1914, with the right of issuing notes up to 3,000

million marks. These notes, which are in denominations of 50, 20, 10, 5, 2 and 1 marks, are accepted at all public offices (*e.g.*, post, railways, customs, etc.).

On January 31, 1916, the circulation of paper money was as follows:—Imperial Bank Notes, 6,502 million marks; Treasury Notes, 320 million marks; Private Bank Notes, 133 million marks; Loan Bank Notes, 973 million marks; total, 7,928 million marks.

Average financial condition of the note issuing banks (thousands of marks):—

Year	Bks.	LIABILITIES				ASSETS			
		Capital	Reserve Fund	Notes in Circulation	Total including other Liabilities	Coin & Bullion	Notes of State & other Banks	Bills	Total including other Assets
1914	5	235,500	88,943	3,064,410	4,903,575	1,785,022	314,158	2,205,088	4,903,576
1915	5	237,500	95,795	7,060,817	10,218,490	2,547,646	1,326,974	5,906,838	10,218,490
1916	5	235,500	100,744	8,212,597	13,785,956	2,604,497	2,604,497	9,724,347	13,785,956

The condition of the Imperial Bank of Germany on April 29, 1917, and on April 23, 1917, is shown as follows (in thousands of pounds):—

—	April 29, 1916	April 23, 1917
Total coin and bullion . . . . .	125,195	127,456
Of which gold . . . . .	123,085	126,615

### Money, Weights, and Measures.

The *Mark*, of 10 *Pfennig* is of the value of 11½*d.*, or 20·43 marks to the pound sterling. Gold coins are 20, and 10-mark pieces, called respectively *doppel-krone*, and *krone*. The 20-mark piece weighs 7·96495 grammes ·900 fine, and consequently contains 7·16846 grammes of fine gold. Silver coins are 5-, 2-, and 1-mark pieces and half-mark pieces. The mark weighs 5·5 grammes ·900 fine, and thus contains 5 grammes of fine silver. Nickel coins are 25, 10, and 5-pfennig pieces. There are bronze coins of smaller denominations. Iron coins were introduced in 1915—5 pfennig pieces in August, and 10 pfennig pieces in December, aluminium coins (1 pfennig pieces) in 1916, and zinc coins (10 pfennig pieces) in 1917.

The standard of value is gold. Silver is legal tender only up to 20 marks.

The metric system of weights and measures is in force.

## Diplomatic Representatives.

Before the declaration of war between the United Kingdom and Germany (August 4, 1914) the Right Hon. Sir William E. Goschen, G.C.M.G., G.C.V.O., was the British Ambassador in Berlin, and His Serene Highness Prince Lichnowsky was the German Ambassador in London.

## Books of Reference concerning the German Empire.

## Colonies and Dependencies.

The following is a list of the various Colonies and regions under the protection or influence of Germany before the war, the estimates (1913) given being necessarily vague. All the Colonies were governed by an Imperial Governor :—

—	Date of Acquisition	Capital	Estimated Area Sq. Miles	White Population	Estimated Native Population
<i>In Africa :—</i>					
Togo . . . . .	1884	Lome . .	33,700	368	1,031,978
Kamerun <sup>1</sup> . . . . .	1884	Buca . .	191,130	1,871	2,648,720
German South-West Africa . . . . .	1884-90	Windhuk .	322,450	14,830	79,556
German East Africa . . . . .	1885-90	Darassalam	381,180	5,336	7,645,770
<b>Total African Possessions</b>	1884-90		931,460	22,405	11,406,024
<i>In Asia :—</i>					
Kiauchau . . . . .	1897	Tsingtau .	2002	—	168,900

<sup>1</sup> Not including the 107,270 square miles with a population of 1,000,000 conceded (1911) by France, but including the 6,450 square miles conceded by Germany to France.

<sup>2</sup> Exclusive of the Bay with an area of about 200 square miles.

	Date of Acquisition	Capital	Estimated Area Sq. Miles.	White Population	Estimated Native Population
<i>In the Pacific:—</i>					
German New Guinea:—					
Kaiser Wilhelm's Land	1885-86	Rabaul	76,000	1,427	600,000
Bismarck Archipelago	1885		20,000		
Caroline Islands.	1899				
Palau or Pelew Islands	1899		560		
Marianne Islands	1899		250		
Solomon Islands.	1886	Apia	4,200	557	34,579
Marshall Islands, etc.	1886		150		
Samoan Islands:—					
Savaii	1899	Apia	660	557	34,579
Upolu	1899		340		
Total Pacific Possessions	1884-99		96,160	1,984	634,579
Total Foreign Dependencies	1884-99		1,027,820	24,389	12,041,608

### Togo.

Togo, with Little Popo and Porto Seguro, in Upper Guinea, between the Gold Coast Colony on the west and French Dahomey on the east; area 33,700 square miles; coloured population 1,031,978; European population, 1913, 368, of whom 320 were German. Coast line about 32 miles, but inland the territory, between the rivers Volta and Monu, widens to three or four times that breadth. Togo was under an Imperial governor, assisted by a secretary, an inspector of customs, and a local council of 7 unofficial members. Lome, the chief port, and capital; Anecho (now closed to maritime trade), Porto Seguro, and Bagida are on the coast. The government stations were Misahöhe with Kpandu, Kete-Kratchi with Bismarekburg, Sansanne-Mangu, Sokodé-Bassari, Atakpame, Tendi. Togo station is on Lake Togo.

There were (1913) two Government schools with 312 pupils, some being trained as clerks and interpreters and learning handicrafts. Missionary societies have 368 schools with 14,653 native children. In the courts of justice in the year 1913 46 Europeans and 6,503 natives were sentenced. The climate at the coast is unhealthy for Europeans.

Inland the country is hilly with streams and watercourses. There are long stretches of forest, and brushwood, and dry plains alternate with cultivable land. Maize, yams, tapioca, ginger, and bananas are cultivated by the natives, most of whom are Ewe negroes; oil-palms, caoutchouc, and dye-woods grow in the forests; but the main commerce is the barter trade for palm oil, palm kernels, and gum, carried on by a few factories on the coast. There are now considerable plantations of palms, coffee, cocoa, kola, and manihot; tobacco is being tried, as also rubber, fibrous, and other plants. In the Sokode and Mangu districts are about 65,000 head of cattle; sheep, goats, poultry, and pigs are found, but nowhere in large numbers; in some districts horses of small size are bred. Native industries are weaving, pottery, smith-work, straw-plaiting, wood-cutting. There is no mining by Europeans, but the natives in the Sokode district extract iron. Revenue for 1913 was 204,823*l.*; expenditure, 213,329*l.* Estimates for 1914: revenue, 175,000*l.*; expenditure, 209,000*l.*

Imports and exports for 4 years :—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1910	573,306	361,106	1912	571,391	497,945
1911	481,001	465,677	1913	581,550	456,850

The principal imports in 1913 were machinery, 4,761*l.*; rice, 1,549*l.*; sugar, 7,569*l.* Principal exports were coco<sup>n</sup>, 16,660*l.*; palm kernels, 127,905*l.*; palm oil, 25,900*l.*; cotton, 29,101*l.*; rubber, 18,029*l.*

In 1912, 258 vessels of 571,832 tons (414,721 German) entered the ports. There are good roads, connecting Lome with Misahöhe and with Atakpame, and other roads are in construction. In April, 1913, total length of roads fit for motor traffic, 755 miles. There are three railways connecting Lome with Anecho (Little Popo) (27 miles), with Palime (63 miles), and with Agbonu (101 miles). Total, 191 miles. Cost of service, 1912: 469,407 marks; the receipts, 847,672 marks. Total length of line (1913), 200 miles. There are 13 post and telegraph stations and 4 sub-stations, connected by telegraph and telephone with the Gold Coast Colony, French Dahomey, and with Europe.

On August 7, 1914, Togoland was taken possession of by British and French forces after a campaign of three weeks culminating in the unconditional surrender of the German authorities. The country is provisionally divided into two spheres, administered respectively by a military officer of the French and Gold Coast Governments.

### Kamerun.

The Kamerun Protectorate, lying between British Nigeria and the French Congo, extends from the coast north-eastwards to the southern shore of Lake Chad. In 1911 a considerable tract of land was transferred to Kamerun from French Congo, the new acquisition being known as New Kamerun. An agreement settling the frontier between Nigeria and Kamerun from Yola to the sea was signed in London on March 11, 1913. Area 191,130 square miles; population 2,540,000. Bantu negroes near the coast, Sudan negroes inland. In 1913 there were 1,871 whites, of whom 1,643 were German. The protectorate was under an imperial governor, assisted by a chancellor, two secretaries, and a local council of three representative merchants. The seat of Government was at Buä. Duala (pop. 22,000), Victoria, Kribi, Rio del Rey and Campo are important trading stations, and Aquatown and Belltown are the principal native settlements. Military force, 199 Germans and 1,550 natives; police force, 40 Germans and 1,255 coloured men.

Four Government schools, at Duala, Victoria, Jaunde, and Garua, have about 868 pupils. Four missionary societies have schools with 24,270 pupils. In 1913, 72 Europeans and 11,229 natives were convicted in the criminal courts.

The soil in the coast region is fertile, and numerous valuable African vegetable productions grow in profusion. Plantations of cocoa occupy 10,654 hectares; coffee, 10 hectares; rubber of various sorts, 7,178 hectares; kola, 54 hectares. There are 345,824 oil palms. In Victoria, experiments are being made towards the cultivation of cloves, vanilla, ginger, pepper, and many other products; an active trade in ivory and palm-oil. The

colony is rich in hardwood ; ebony is abundant. Cattle-rearing is carried on with success in the hinterland. Gold and iron have been found.

Revenue (mainly from import duties) for 1914, 565,500*l.* ; expenditure, 863,000*l.*

Imports over sea, 1911, 1,395,513*l.* ; 1912, 1,629,895*l.* ; exports, 1911, 1,011,542*l.* ; 1912, 1,102,803*l.* Chief exports : palm kernels, rubber, palm oil, ivory, cocoa. Chief imports : textiles, spirits, timber, salt, iron wares, and colonial produce. In 1912 there entered at the 5 ports 604 trading vessels of 1,733,030 tons.

Roads are being constructed between the coast towns and from the coast inland. The total length of railway line (1913) is 149 miles. The Manenguba railway is constructed to the length of 160 kms. The receipts were (1912), 633,558 marks. A line from Duala to Edea and Widimenge was in construction, and other lines near the south-west coast were being projected. The telegraph system is being rapidly extended. Kamerun is connected by cable with Bonny in Southern Nigeria. A new direct cable to Germany was opened in 1913.

French and English troops finally conquered the colony on February 18, 1916. The districts of French Equatorial Africa incorporated in Kamerun under the Franco-German Treaty of November 4, 1911, are administered by the Governor-General of French Equatorial Africa as Commissioner-General ; the rest of the occupied territories by the Government of Nigeria.

### German South-West Africa.

This Protectorate is bounded on the north by Portuguese West Africa, Angola, and Rhodesia ; on the east by Rhodesia and the Kalhari Desert (Cape Province) ; on the south by the Cape Province ; and on the west by the Atlantic Ocean. The whole southern part and much of the east is barren and desert. There have been extensive boring operations for water, in many cases successful. Area 322,450 square miles. European population, 1913, 14,830 (1,799 British and 12,292 German). Seventeen British schools have been established with 500 pupils.

The principal native races in the Protectorate are Bushmen, Hottentots, Bergdamaras, Hereros, Ovambos, and Bastards. The Bushmen are purely hunters, leading a migratory life in search of game and water. It is impossible to give an estimate of their number, but they are said to be rapidly decreasing. The Hottentots were originally divided into 10 tribes or clans, at the head of each of which was a captain. Only three of these clans have retained their organisation. The Hottentots are found mostly in the southern part of the Protectorate. The Bergdamaras are found in all the northern districts, where they dwell in families of ten to forty. The Hereros were a nomad, pastoral people who, before the native war, numbered over 100,000, but who now do not exceed 20,000, and are still diminishing. The Bastards are descendants of a cross of European farmers and Hottentots who migrated from Cape Colony between 1860 and 1870. They number between four and five thousand and live in the Rehoboth district. The Ovambos are the largest native race in the Protectorate, numbering from 100,000 to 150,000. They occupy the northern part of the Protectorate, are an agricultural race, and understand working in iron.

For farm purposes, crown lands and native lands have been disposed of to the extent of several millions of acres. There is, however, little agriculture, but market-gardening is common. Cotton cultivation has begun in the Outjo district ; viticulture, silk culture, and tobacco-growing are being tried. The government has experimental stations for agriculture, gardening, and forestry. The chief industry is pastoral. In 1913, the live stock consisted

of 205,643 cattle, 472,585 sheep, 31,503 angora goats, 485,401 other goats, 15,916 horses, 13,618 mules and asses, 7,772 swine, 709 camels. Large herds and flocks of cattle and sheep belong to natives.

A great deal of prospecting for minerals has been done at one time or another, but with the exception of copper, lead, diamonds, and to some extent tin, the results have been disappointing. Gold, sulphur, and large deposits of iron have been found, but practically no mining has actually been undertaken for these metals. Valuable deposits of coloured marble are being worked at Karibib. Copper is extensively mined in the Tsumeb and Grootfontein districts and at the Khan mine. Diamonds were discovered near Luderitzbucht in 1908. The stones are small, averaging from 5 to 6 to the carat, but realise a high price. Up to the end of 1913, 4,692,973 carats had been extracted, which have realised over 7,000,000*l*.

The revenue for 1914 was put at 1,175,000*l*., and expenditure 2,017,000*l*.

The total imports (including government imports) and exports for 4 years were:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1910	2,217,219	1,734,568	1912	1,624,944	1,952,667
1911	2,265,097	1,428,662	1913 <sup>1</sup>	909,779	1,422,844

<sup>1</sup> First 6 months

The harbours in the Protectorate are Walvis Bay, which is British territory, and Luderitzbucht. An iron jetty was in course of construction at Swakopmund by the Germans but was abandoned when the war broke out, and, owing to the prevailing S.W. winds and heavy seas, the place is not at present used by shipping. Windhuk, the seat of the present Administration, is in telephonic communication with Swakopmund, Karibib, Usakos, Okahandja, Gobabis, Tsumeb, Grootfontein, Otavi, Otjiwarongo, Omaruru, and some of the smaller out-stations, and all the principal stations in the Protectorate are connected by telegraph. Cable communications to Europe are sent from Cape Town, the German cable station at Swakopmund not being in use.

To facilitate the British invasion of South-West Africa from the south, the extension of the South African Railway system from Prieska was started on September 7, 1914, and reached the German Railway Terminus at Kalkfontein on June 25, 1915, the distance being 315½ miles. The new South African standard gauge line (3ft. 6in.) Walvis Bay to Swakopmund was opened in March, 1915, the distance being 21½ miles. From Swakopmund to Krantzberg through Usakos a distance of 100½ miles, the Union Forces converted the Otavi 2 ft. gauge railway into a 3ft. 6in. gauge line, completing the work on August 17, 1915. From Krantzberg to Karibib a new standard gauge line was built and completed on July 31, 1915, the distance being 12½ miles, thus establishing through communication from Cape Town to Walvis Bay. The Protectorate Government lines, 3ft. 6in. gauge, are: Nakob (border) to Windhuk, 538 miles; Luderitzbucht to Seeheim junction, 198 miles; Swakopmund (border) to Windhuk, 232 miles; total, 968 miles. The Protectorate Government lines, 2ft. gauge are: Karibib to Tsumeb, 252 miles; Otavi to Grootfontein, 57 miles; Kransberg to Ougwati, 9 miles; total, 318 miles. Privately owned lines, 2ft. gauge, are: Kolmanskop to Bogenfels, 74 miles; Arandis to Khan Mine, 6 miles; Karibib Marble Company, 8 miles; total, 88 miles. There are 147 miles of Government 2 ft.

gauge line not working, which makes a total railway mileage in the Protectorate of 1,521 miles.

A telegraph line connects Swakopmund, Karibib, Okahandja and Windhuk, and a telephone system works in connection with this line. The colony has 2,457 miles of telegraph line and 415 miles of telephone line.

The colony was finally conquered by South African forces under General Botha on July 9, 1915, and the Government of the Union of South Africa are administering the country. Its official designation is "The Protectorate of South-West Africa in Military Occupation of the Union Defence Forces," and for purposes of brevity, "The Protectorate of South-West Africa."

### German East Africa.

The German sphere, East Africa, has a coast line of about 620 miles; estimated area, 384,000 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast line extends from the mouth of the Umba to Cape Delgado, or (more accurately) to 10° 40' S. lat. The German Empire was represented in the Protectorate by an Imperial governor, whose seat was at Daressalam. He was assisted in his deliberations by a council, which met twice yearly, and had advisory powers only.

The native population, consisting mostly of tribes of mixed Bantu race, numbered, according to official returns on January 1, 1913, 7,659,898. The coloured population (other than native) was 14,898. According to German law every native born after 1905 is free. But a mild serfdom still continues in the protectorate, and it is estimated that about 185,000 serfs exist in German East Africa. The total white population was 5,336, as against 4,866 in 1912. Of these 5,336, 4,107 were of German nationality, 90 were British, and 321 were British colonial subjects. The majority of these are Boers. The German population shows an increase of 528, and the British a decrease of 38 as against the previous year.

Education is not compulsory. In 1913 there were 109 Government schools, including 4 for handicrafts, with 18 European and 159 native teachers and 6,177 pupils. Five Protestant and three Catholic missionary societies have schools with 108,551 pupils.

Near the coast forests of mangrove, coco-palm, baobab, tamarind, &c. ; in the higher regions the acacia, cotton-tree, sycamore, banian, and other trees. Government forests, 652,067 acres. Near the coast there are German plantations of coco-palms, coffee (on the higher lands), vanilla, tobacco, caoutchouc, cacao, sugar, tea, cotton, cardamom, cinchona. Fibre plants are successfully cultivated. There are several Government experimental stations for tropical culture and cattle-rearing. In 1912 there were 43,617 cattle, 41,647 sheep and goats in the possession of Europeans, and 3,950,250 cattle and 6,398,300 sheep and goats in the possession of natives. Minerals known to exist within the Protectorate are coal, iron, lead, copper, mica, and salt. Agates, topaz, moonstones, tourmalin, and quartz crystals are found, and garnets in large quantities.

The chief seaports are Daressalam, Bagamoyo, Saadani, Pangani, Kilwa, Lindi, Mikiindani, and Tanga, but few of these are accessible to ocean-going vessels, though gradual improvements are being introduced. Wide, well-kept roads (on some of which rest-houses and stores are provided) run all through the colony. There are two railway lines in the Protectorate—the Usambara railway from Tanga to New Moshi (220 miles), commenced in 1905 and completed in February, 1912, and the Central Railway (780 miles) from Daressalam to Ujiji, completed in February, 1914.

There are also Government coasting, river, and lake steamers. Daressalam is in telegraphic communication with the coast towns, Zanzibar, many inland centres, and, at Ujiji, with the African trans-continental line, 51 post offices and 34 telegraph stations. There are wireless stations at Daressalam, Muansa, and Bukoba.

The revenue for the year 1914 was put at £825,500, and the expenditure £1,188,500.

Imports and exports for 4 years :—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1910	1,932,938	1,040,269	1912	2,515,458	1,570,919
1911	2,294,582	1,121,888	1913	2,667,925	1,777,552

Chief exports : rubber, copra, ivory, coffee, vegetable fibre (sisal), insect wax. Chief imports : cottons, rice, articles for consumption, hardware and iron. The trade is chiefly with Zanzibar and Germany. In 1912, 1,034 vessels of 1,913,743 tons entered the various ports.

German East Africa was attacked by British forces (including South African troops) under General Smuts from the north and by Belgian and Portuguese from the south and west. Practically the whole of the colony is now (May, 1917) conquered.

### Kiau-Chau.

Kiau-Chau, on the east coast of the Chinese province of Shan-tung, was seized by Germany in November, 1897 ; the town, harbour, and district were by treaty transferred to Germany on a 99 years' lease, March 6, 1898 ; and the district was declared a Protectorate of the German Empire, April 27, 1898. The administration was entrusted to the navy department, and a naval officer was governor.

Area, about 200 square miles, exclusive of the bay (about 200 square miles). There are 33 townships, and a population of about 192,000 ; white population with the garrison, 1913, 4,470 (Germans, 3,806). Surrounding the district and bay is a neutral zone, whose outer limit is 30 miles from highwater mark on the coast of the bay, its area being about 2,500 square miles, and population about 1,200,000. There were 50 German schools for Chinese, mostly taught by missionaries. At Tsing-Tau there was a school for European children with 140 and a higher-class school with 145 pupils. For the year 1914 the revenue was estimated at £403,000 and the expenditure £920,500.

The products are fruits, beans, ground-nuts, sweet potatoes, &c., and silk culture, coal mining, briquette-making, brewing, soap-making are carried on, and there is a prosperous silk factory. Over 1,000 Chinese were employed on the floating dock. At Kiau-Chau in 1915 the imports amounted to £1,423,698 and the exports to £1,223,246. The chief imports were raw cotton, cotton goods, and cotton yarn, metals, paper, sugar, and matches. The chief exports were straw braid, silk, ground nut and bean oil, and Shan-tung pongees. In 1915 1,188 vessels of 1,492,050 tons entered and cleared at Kiau-Chau. A railway, Tsing-Tau to Tsinang, is 252 miles long.

On August 15, 1914, the Japanese Government called upon Germany to deliver up the entire leased territory of Kiau-Chau by September 15th. As no reply was received Japan declared war on August 23, and on August 27 began the blockade of Tsing-Tau. On November 7, 1914, Tsing-Tau fell, to Japanese and British forces, and has since been administered by the Japanese.

The number of Japanese residents (exclusive of the military) was on April 30, 1915, 9,264 (5,691 males and 3,573 females).

On August 6, 1915, an agreement was entered into between the Chinese and Japanese Governments providing for the re-opening of the Chinese Maritime Customs at Tsing-Tau on conditions similar to those in force during the German occupation.

### In the Pacific.

1. *Kaiser Wilhelm's Land*.—Kaiser Wilhelm's Land, the northern section of south-east New Guinea, was declared a German protectorate in 1884. Since October, 1914, it has been in military occupation by Australian troops. Including Long Island, Dampier Island, and some other small islands, it has an estimated area of 70,000 square miles, and a population of 531,000 natives; white population (1914) 283 (Germans, 200). There is a chief judicial court in Rabaul. In the year 1913, 46 Europeans and 886 natives were convicted in the criminal courts. Three Protestant and two Catholic missionary societies are at work with schools in the territory and in the other German Pacific Islands, attendance about 22,524. The development of the Protectorate was originally entrusted to the German New Guinea Company, but the administration was transferred to the German Imperial Government on April 1, 1899. Areca and sago palms, bamboos, ebony, and other woods abound. Cultivated area 20,520 hectares, chiefly under coco-palms and caoutchouc. The natives barter copra, mother-of-pearl, and trepang. Horses, cattle, and goats flourish on the islands. Gold has recently been found in the Bismarck Mountains. Imports of the whole colony except Samoa (1912), 5,871,840 marks; exports, 5,163,686 marks (mostly copra). In 1912, 980 merchant vessels of 848,182 tons visited the port of Kaiser Wilhelm's Land and the Islands. The chief harbours are Friedrich Wilhelmshafen (now called Madang), Herbertshöhe (now called Kokopo), Simpsonhafen, Nusa, Matupi, Kawieng, Namatanai, Kieta. The seat of Government is Rabaul. Estimated revenue and expenditure (for all the lands with the exception of the Samoan Islands), 1913, 3,410,000 marks, including 1,650,000 marks of Imperial subvention.

2. *Bismarck Archipelago*.—In November, 1884, a German Protectorate was declared over the New Britain Archipelago and several adjacent groups of islands, then renamed the Bismarck Archipelago. The chief islands are New Britain, New Ireland, Duke of York Islands, and Neu Hanover, Admiralty, Anchorite, Commerson, Hermit, and other islands. Native population (1913) about 188,000; coloured non-native population was 396 (mostly Chinese). White population (1913) 685 (482 German). Wesleyan and Catholic missions are at work. The chief products are copra, cotton, coffee, and rubber.

3. *Solomon Islands*.—Germany owned part of this group, including the islands of Bougainville and Buka, but Choiseul, Isabel or Mahaga, and various smaller islands to the east of Bougainville were transferred to Great Britain November 14, 1899. Missionary societies are at work; their schools have about 120 pupils. Sandal wood and tortoiseshell are the chief commercial products. The islands formerly under German control are placed under the British Administrator with headquarters at Rabaul (New Britain).

4. *The Caroline, Pelew (or Palau), and Marianne (or Ladrone) Islands*.—By treaty of February 12, 1899, these islands, with the exception of Guam (the largest of the Marianne Islands), ceded to the United States in 1898, passed on October 1, 1899, from Spanish to German possession for payment of 840,000*l*. For administrative purposes the islands were divided into two groups: the Eastern Carolines, with Ponapé as the seat of Government;

the Western Carolines, the Pelew Islands, and the Marianne Islands, with Yap as administrative centre. They all formed part of the German New Guinea Protectorate. White population (1913): 264 (Germans 154). The native population (1913) was 55,000.

The Carolines consist of about 500 coral islets, Ponapé having about 2,000 inhabitants, Yap 7,155, and Kusai 400. The population is mainly of Malay origin, with some Chinese and Japanese. The chief export is copra. The Pelew (Palau) Islands, to the west of the Carolines, have 3,101 inhabitants; they are about 26 in number, mostly coral, many of them uninhabited; the largest is Babelthuap, which contains the bulk of the population. The Marianne Islands, to the north of Pelew, have 2,646 inhabitants; their northern group is actively volcanic and uninhabited.

5. *Marshall Islands*.—The Marshall Islands, consisting of two chains or rows of lagoon islands (several uninhabited), known respectively as Ratak (with thirteen islands) and Ralick (with eleven islands), first came under German rule in 1885. European population in 1913, 179 (91 German). Other population, estimated, 15,000. The administration was taken over from the Jaluit Company by the German Colonial authorities on April 1, 1906. Since then the Marshall Islands have formed a district (Bezirk) under the New-Guinea government. The chief island and seat of the German Imperial Commissioner was Jaluit; most populous island Majeru, 2,600 inhabitants. Protestant (American) and Catholic missions are at work. There are plantations of coco-palm (1,275 hectares). The chief export is phosphate.

6. *Samoa Islands*.—Among German dependencies were included Savai and Upolu, the largest of the Samoan or Navigator Islands. By the Anglo-German Agreement of November 14, 1899, ratified by the United States in January, 1900, Great Britain renounced all rights over the islands in favour of Germany as regards Savai and Upolu, and in favour of the United States as regards Tutuila and other islands. Under the German Imperial Governor there was a native High Chief with a native council, the several districts being administered by chiefs. Justice was administered by native as well as European judges and magistrates.

Savai has an area of about 660 square miles, Upolu 310 square miles. Both islands are mountainous, fertile, and well watered. Several adjacent islets, exceedingly fertile and populous, were included in the German dependency. The port of Apia is in Upolu. The inhabitants of the islands are Polynesians, nominally Christian (Protestant, Catholic, and Mormon), but native superstitions are prevalent. Population 1912, 35,000, distributed as follows:—Upolu, Manono and Apolima, 20,662; Savai, 12,816. There were in 1914 600 white inhabitants (373 German, 140 British); also 2,083 Chinese and 1,422 non-native inhabitants of mixed race. There were 2 German Government schools with 784 pupils, and mission schools with over 8,000 pupils. There are 60 miles of good roads. The revenue of Western Samoa for the year ended March 31, 1916, was £68,663, the expenditure, £66,764. Imports (exclusive of supplies for the troops) for 1915, £23,709; exports, £262,389. In 1915, 72 vessels of 63,151 tons (exclusive of coasters and ships of war) entered at the port of Apia (of these 51 with a tonnage of 56,133 were British), and 73 vessels with a tonnage of 63,496 cleared (51 of these with a tonnage of 56,133 were British). There is regular steam communication with New Zealand. Wireless stations have been erected at Apia, in Samoa, and Nauru (or Pleasant Island, one of the Marshall Islands), respectively. Two other stations were planned—at Rabaul in New Guinea, and on Yap, one of the Caroline Islands.

On August 29, 1914, the British occupied Apia; and shortly after the

outbreak of the war the German islands in the North Pacific were captured by Japanese; and on November 18 the Japanese Government handed them over to Australian forces. The islands south of the Equator are administered by the Australian Commonwealth; those north of the Equator by Japan; and Samoa by New Zealand.

The currency before the British occupation was in marks, but English and American gold and silver coin were legal tender. Since the occupation, however, it has been found necessary to replace the German currency by New Zealand bank notes and specie.

## STATES OF GERMANY.

Statistics of area, population, births, deaths, marriages, emigration, primary schools, universities, and railways are given collectively for all the German States under the head of *German Empire*.

## ALSACE-LORRAINE.

(REICHSLAND ELSSASS-LOTHRINGEN.)

**Constitution.**—The fundamental laws under which the Reichsland, or Imperial Land, of Alsace-Lorraine is governed were voted June 9, 1871, June 20, 1872, June 25, 1873, July 4, 1879, and May 31, 1911. By the law of June 9, 1871, it is enacted, 'The provinces of Alsace and Lorraine, ceded by France in the peace preliminaries of February 26, 1871, under limits definitely fixed in the Treaty of Peace of May 10, 1871, shall be for ever united with the German Empire.' The Constitution of the German Empire was introduced in Alsace-Lorraine on January 1, 1874. By the law of May 31, 1911, a Constitution was granted to Alsace-Lorraine, by which it received 3 votes in the Federal Council. The Emperor exercises sovereign powers in the country, and at the head of the Government is a Governor (*Statthalter*), appointed and recalled by the Emperor, who lives at Strassburg. Local laws are made by the Emperor with the consent of the Diet, which consists of two Chambers. The First Chamber is made up of five representatives of the religious communities (2 Catholic, 2 Protestants, 1 Jew), the President of the Supreme Court at Colmar; a representative of the University of Strassburg, four representatives of the larger cities—Strassburg, Metz, Colmar and Mülhausen, a representative of the Chamber of Commerce in each of these towns, six representatives of the Agricultural Councils; two representatives elected by the Chamber of Craftsmen of Strassburg, and a number of members nominated by the Emperor—this number not to be greater than the rest of the members, and at present amounts to 20, all of whom hold office for 5 years. The Second Chamber, consisting of 60 members, is elected on general direct suffrage, by secret ballot, for a period of 5 years.

State of the parties in the Second Chamber (elected 1911): 26 Centre Party (Catholic); 13 Lorrainers; 10 Liberal Democrats; 11 Social Democrats.

*Statthalter.*—His Excellency Dr. von Dallwitz, appointed May 1, 1914.

**Area and Population.**—The Reichsland has an area of 14,522 square kilometres or 5,605 English square miles. It is administratively divided into three Bezirke, or districts.

Districts	Area, English square miles	Population		Pop. per sq. mile. 1910
		1910	1905	
Oberelsass .	1,354	517,865	512,079	308·6
Unterelsass .	1,848	700,938	686,695	379·2
Lothringen .	2,403	655,211	615,790	272·6
Total .	5,605	1,874,014	1,814,564	334·3

In 1910 the population speaking German numbered 1,634,260, French 204,262. The number of foreign subjects was 76,386. The garrison (1910) consisted of 82,276 men. In 1910, 53·2 per cent. resided in towns of 2,000 inhabitants and upwards; 46·8 per cent. in rural communes. Chief towns, Strassburg (178,891 inhabitants in 1910), the capital of Alsace-Lorraine; Mülhausen (95,041), in Oberelsass; and Metz (68,598), in Lothringen.

For births, deaths and marriages, see under *German Empire*.

**Religion, Instruction, Justice, and Crime.**—In 1910, there were 1,428,343 Catholics, 408,274 Protestants, 3,863 other Christians, 30,483 Jews.

There is a university (at Strassburg, see *German Empire*), and in 1913 18 Gymnasias, 3 Progymnasias, 6 higher Realschulen, 11 Realschulen (4 united with gymnasia), 2 agricultural schools, 1 technical school, 7 seminaries, 5 preparatory schools for teachers, 67 higher girls' schools, 2,841 elementary schools, 69 private elementary schools, 511 infant schools, 53 intermediate schools, 5 institutions for the deaf and dumb, 2 for the blind, 2 for idiots.

There is an Oberlandesgericht (Supreme Court) at Colmar, and six Landgerichte. In 1911, 13,196 persons were convicted of crime.

**Finance.**—Budget estimate for year ending March 31, 1917, balanced at 4,074,037*l.*, ordinary revenue and expenditure, and extraordinary at 52,578*l.* More than half the revenue from customs and indirect taxes, one of the largest branches of expenditure, is for public instruction. Debt of 3 per cent. rentes in circulation to the amount of 1,336,398 marks (66,820*l.*), equivalent, if capitalised, to a debt of 44,547,000 marks (2,227,350*l.*).

**Production and Industry.**—Area under principal crops and yield in 1913 (1 hectare = 2·47 acres; 1 metric ton = 2,204 lbs.):—

Crops	Acres	Metric Tons	Crops	Acres	Metric Tons
Wheat . . .	342,695	238,048	Potatoes . .	226,700	1,266,463
Rye . . . .	138,632	92,889	Oats . . . .	282,165	209,963
Barley . . .	122,727	108,678	Hay . . . .	485,755	1,137,786

Vineyards, 1913, 67,090 acres, yield, 3,934,442 gallons of wine; tobacco, 1912, 3,842 acres, yield, 4,878 tons of dried tobacco; hops, 1913, 10,462 acres, yield, 1,595 metric tons (in 1915, 3,889 tons).

The cotton manufacture is the most important in Germany; woollens are produced on a smaller scale. Mineral products, 1913, 21,136,265 metric tons of iron ore valued at 2,736,750*l.*; coal, 3,795,932 tons (2,255,950*l.*); salt, 76,672 tons (75,911*l.*), besides gypsum and limestone. In 1913, 38,509 persons were employed in the mines and quarries.

## ANHALT.

(HERZOGTHUM ANHALT.)

The reigning Duke is **Friedrich II.**, born August 19, 1856, son of the late Duke Friedrich of Anhalt and of Princess Antoinette of Saxe-Altenburg. Succeeded at the death of his father, January 24, 1904; married, July 2, 1889, to Princess *Marie* of Baden.

*Brothers and Sisters of the Duke.*—I. Princess *Elisabeth*, born September 7, 1857; married, April 17, 1877, to the Grand-Duke of Mecklenburg-Strelitz. II. Prince *Eduard*, born April 18, 1861; married, February 6, 1895, to Princess Louise of Saxe-Altenburg; offspring, Princess *Marie Augusta*, born June 10, 1898, married to Prince Joachim of Prussia, March 11, 1916; Prince *Joachim Ernst*, born January 11, 1901; Prince *Eugen*, born April 17, 1903. III. Prince *Aribert*, born June 18, 1864; married, July 6, 1891, to Princess Louise of Schleswig-Holstein; the marriage was dissolved December 13, 1900. IV. Princess *Alexandra*, born April 4, 1868; married, January 25, 1897, to the Prince Sizzo of Schwarzburg-Rudolstadt.

The entailed property belonging to the ducal family is the sole resource of the Duke. Part of it, called 'the select entail,' yielding about 600,000 marks, cannot be sold by the Duke without the approbation of the Diet. To the entailed property belong very large private estates in the State and in Prussia embracing an area of nearly 250 square miles.

The legislative power is vested in a Diet of 36 members, two appointed by the Duke, eight representatives of landowners who pay the highest taxes, two of the highest taxed inhabitants belonging to the mercantile and industrial classes, fourteen of the other inhabitants of towns, and ten of the rural districts, the representatives being chosen for 6 years by indirect vote. The executive power is entirely in the hands of the Duke, who governs through a Minister of State.

Population, 1910, 331,128. The capital, Dessau, 56,605 inhabitants; Bernburg, 33,724; Cöthen, 23,416; Zerbst, 19,210; Rosslau, 11,354. Population mostly Protestant (1910), 12,755 Catholics, 1,383 Jews.

Estimate income and expenditure, 1916-17, 1,835,224*l.* Public debt, June 30, 1914, 371,672*l.*; State property, June, 1914, 932,320*l.*

## BADEN.

(GROSSHERZOGTHUM BADEN.)

**Reigning Grand-duke.**—**Friedrich II.**, born July 9, 1857, son of the Grand-duke Friedrich I. and of the Grand-duchess Luise, Princess of Prussia; succeeded to the throne on the death of his father, September 23, 1907; married, September 20, 1885, to Hilda, daughter of the Grand-duke of Luxemburg, Duke of Nassau.

*Sister of the Grand-duke.*

*Victoria*, born August 7, 1862; married, September 20, 1881, to Crown Prince Gustaf, now King Gustaf V. of Sweden.

Till 1771, Baden was a Margraviate divided into two or more lines; it was then united, and subsequently received various additions, and its ruler took the title of Elector in 1803, and of Grand-duke in 1806.

The Grand-duke has a civil list of 79,499*l.* (exclusive of the appanages of the other members of the Grand-duke's family).

**Constitution.**—The Constitution of Baden vests the executive power in the Grand-duke, the legislative authority is shared by him with a representative assembly (Landtag), composed of two Chambers. The Upper Chamber comprises the princes of the reigning family who are of age; the heads of the mediatised families; the Roman Catholic Archbishop; the prelate of the Protestant Church; elected for 4 years are eight members by the territorial nobility; one representative for each of the two Universities and one for the Technical High School; three of the Chambers of Commerce, two of the Chamber of Agriculture, and one of the Chambers of Trades; two Oberbürgermeister of the towns subject to the municipal law, and one Bürgermeister of one of the other towns (of more than 3,000 inhabitants); one member of one of the District Councils; and (at the most) eight members appointed for 4 years by the Grand-duke, two being high legal functionaries appointed during their term of office. The Second Chamber is composed of 73 representatives, 24 of whom are elected by towns, and 49 by rural districts for 4 years. Every citizen 25 years of age, not convicted of crime, nor receiving parish relief, has a vote. Citizens 30 years of age are eligible. The Chambers must be called together at least once every two years. Members of the First Chamber whose seats are not hereditary, are paid 1,500 marks (75*l.*), of the Second Chamber 3,000 marks (150*l.*), if living at Karlsruhe 1,000 and 2,000 marks (50*l.* or 100*l.*) for the session, with deduction of 15 marks for each day's absence; they travel free of charge on the Baden State Railways during session.

Last election, October, 1913: 29 Centre Party, 20 National Liberals, 13 Socialists, 5 Conservatives, 5 Democrats, 1 Peasants' League.

The executive is composed of four departments—the Ministers of the Interior, of the Grand-ducal House, Justice and Foreign Affairs, of Finance, and of Ecclesiastical Affairs and Instruction.

*President of the Council of Ministers.*—Dr. A. Baron von *Dusch*, Minister of the Grand-ducal House, Justice and Foreign Affairs.

For general administrative purposes there are 53 'Amtsbezirke,' superintended by four general commissioners (Landes-Kommissäre). For local government there are 11 circles (Kreise), and 1,592 communes (Gemeinden), 120 communal cities, and 1,472 parishes.

### Area and Population:—

District	Area: Square miles	Population		Pop. per square mile 1910
		1910	1905	
Konstanz . .	1,610	325,924	311,318	202·4
Freiburg . .	1,830	564,580	543,305	308·5
Karlsruhe . .	993	610,784	567,397	615·1
Mannheim . .	1,386	641,545	588,708	462·9
<b>Total . .</b>	<b>5,819</b>	<b>2,142,833</b>	<b>2,010,728</b>	<b>368·2</b>

Including a part of the Lake of Constance, area is 5,889 square miles.

Principal towns, 1910 :—

Mannheim . . . . .	206,049	Konstanz . . . . .	27,591	Lahr . . . . .	15,191
Karlsruhe . . . . .	134,313	Baden . . . . .	22,066	Lörrach . . . . .	14,756
Freiburg . . . . .	83,324	Offenburg . . . . .	16,848	Weinheim . . . . .	14,170
Pforzheim . . . . .	73,786	Bruchsal . . . . .	15,391	Durlach . . . . .	13,896
Heidelberg . . . . .	56,016	Rastatt . . . . .	15,196	Villingen . . . . .	10,924

For movement of population, *see* under *German Empire*.

**Religion and Instruction.**—In 1910 there were 1,278,836 Catholics, 826,364 Protestants, 5,408 other Christian sects, 25,896 Jews, and 6,329 others.

The Grand-duke is Protestant, and head of the Protestant Church, which is governed by a synod, and whose affairs are administered by a board (Oberkirchenrat). The Roman Catholic Church has an Archbishop (at Freiburg), whose 4 suffragans are outside the Grand Duchy. The State makes an annual grant to the Roman Catholic Church, to the Protestant Church, to a certain number of 'Old Catholic' parishes, and to the Jews, who have 15 rabbimates.

Instruction is general and compulsory. The elementary schools are maintained by the communes and by the State, and administered by local authorities under the inspection of Government. Public schools in Baden :—

	Number	Teaching Staff	Students & Pupils
Universities (summer session 1913) . . . . .	2	340	6,089
Technical Academy (winter session 1912-13) . . . . .	1	94	1,261
Academy of Arts (1912-13) . . . . .	1	16	113
Handels-Hochschule (winter session, 1912-13) . . . . .	1	33	435
Gymnasias (1911-12) . . . . .	17	403	4,938
Realgymnasias, Realprogymnasias, Oberrealschulen, Realschulen, and höhere Bürgerschulen (1911-12) . . . . .	49	977	13,202
Higher Schools for Girls (1911-12) . . . . .	12	362	6,140
Elementary Schools (1910-11) . . . . .	1,723	7,544	379,208
Normal Schools (1911-12) . . . . .	13	145	2,253
Technical, Agricultural, and other special schools (1912-13) . . . . .	260	1,121	34,525

**Finance.**—The Budget is voted for a period of two years. Estimates for 1915 and 1916 :—

Revenue	Marks	Expenditure	Marks
Direct taxes . . . . .	39,752,720	Ministry of State . . . . .	10,076,894
Indirect taxes . . . . .	20,626,400	„ „ the Grand-ducal	
Domains (Crown land) and salt-works . . . . .	12,267,060	House, of Justice and Foreign Affairs . . . . .	12,026,865
Justice and Police . . . . .	9,694,820	Ministry of Ecclesiastical Affairs, and Instruction . . . . .	19,490,079
Ministry of the Grand-ducal House, of Justice and Foreign Affairs . . . . .	1,521,380	Ministry of Interior . . . . .	24,121,700
Ministry of Ecclesiastical Affairs and Instruction . . . . .	5,298,700	„ „ Finance . . . . .	36,218,415
Ministry of Interior . . . . .	9,636,535	Chamber of Accounts . . . . .	128,130
„ „ Finance . . . . .	6,480,660	Total ordinary . . . . .	106,062,088
Various . . . . .	5,447,590	Total extraordinary . . . . .	7,326,680
Total ordinary . . . . .	110,725,865		
Total extraordinary . . . . .	2,662,898		
Total revenue . . . . .	113,388,763 (5,669,438L.)	Total expenditure . . . . .	113,388,763 (5,669,438L.)

There is also a special railway budget, showing revenue at 126,721,782 marks and expenditure at 128,530,215 marks.

For 1917 and 1918 the ordinary revenue and expenditure balanced at 750,592,838 marks, and the extraordinary at 15,138,296 marks, making a total of 76,573,134 marks (38,286,556%.)

Direct taxes are on property and income; indirect taxes chiefly on wine, beer, and meat, registry, duties on succession, on change of possession.

There was only a railway debt of 29,202,356*l.* in 1914.

**Production and Industry.**—Of the area 55·4 per cent. is under cultivation, 39·4 per cent forests, 5·2 per cent. uncultivated (houses, roads, water, &c.). Arable land 1,388,511 acres, vineyards 38,606, chestnut plantations 1,359, meadows 526,456, pastures 101,616, and forests 1,465,278 acres (of which 250,927 belong to the State, 653,760 to the communes, 50,931 to other bodies, and 509,660 to private persons).

Area in acres and yield in metric tons (2,204 lbs.) in 1913:—

Crops	Area	Yield	Crops	Area	Yield
	Acres	Tons		Acres	Tons
Wheat . . .	114,362	90,316	Potatoes . .	224,022	1,112,519
Rye . . .	126,547	89,893	Hay . . .	533,867	1,195,192
Summer barley.	134,945	109,620	Tobacco . .	18,800	15,720
Oats . . .	184,697	143,900	Hops . . .	2,470	1,180

Vines in 1915, 32,437 acres, yield 6,325,308 gallons of wine, valued at 852,887*l.*; beetroot, turnips, hemp, and chicory are also grown. Mineral produce almost solely salt and building-stone.

Principal manufactures: Tiles, jewellery, machinery, clocks, musical instruments, chemicals, silk ribbons, cotton tissues, felt and straw hats, paper and cardboard, leather, wood-work, brushes, and cigars.

**Communications.**—Mannheim is at the head of regular Rhine navigation; 1912, arrival 4,664,763 tons, departure 729,129 tons. The capital invested by the State in railways is 44,200,000*l.* At the end of 1915 there were 1,134 miles of main line railway (normal gauge lines) and 244 miles of subsidiary line. Total 1,378 miles.

## BAVARIA.

(KÖNIGREICH BAYERN.)

**Reigning King.**—**Ludwig III.**, born January 7, 1845; became Regent in succession to his father Prince Luitpold, who died December 12, 1912;

was proclaimed King on November 5, 1913, in succession to his cousin, King Otto (died October 12, 1916), who was declared incapable of ruling owing to mental infirmity; married, February 20, 1868, to Archduchess Maria Theresa of Austria-Este, of the branch of Modena, born July 2, 1849.

*Children of the King.*

I. Crown Prince Rupprecht, born May 18, 1869; married July 10, 1900, to Marie Gabriele, died October 24, 1912, daughter of Duke Karl in Bavaria; offspring: Prince Albrecht, born May 3, 1905. II. Princess Adelgunda, born October 17, 1870; married on January 20, 1915, to Prince William of Hohenzollern. III. Princess Marie, born July 6, 1872; married May 31, 1897, to Prince Ferdinand of Bourbon. IV. Prince Karl, born April 1, 1874. V. Prince Franz, born October 10, 1875; married, July 8, 1912, to Princess Isabella von Croy, daughter of Duke Karl von Croy; offspring: Prince Ludwig, born June 22, 1913, and Princess Marie, born September 9, 1914. VI. Princess Hildegard, born March 5, 1881. VII. Princess Wiltrud, born November 10, 1884. VIII. Princess Helmutrud, born March 22, 1886. IX. Princess Gundelinde, born August 26, 1891.

*Brother and Sister of the King.*

I. Prince *Leopold*, born February 9, 1846; brother of the Prince Regent; married April 20, 1873, to Archduchess Gisela of Austria-Hungary, eldest daughter of the Emperor-King Franz Joseph I. Offspring of the union are:—1. Princess Elizabeth, born January 8, 1874; married December 2, 1893, to Count von Seefeld. 2. Princess Auguste, born April 28, 1875; married November 15, 1893, to Archduke Joseph Augustus of Austria. 3. Prince George, born April 2, 1880; married February 10, 1912, to Archduchess Isabella Marie, daughter of the Archduke Frederick of Austria; the marriage was dissolved on April 26, 1913. 4. Prince Konrad, born November 22, 1883.

II. *Theresa*, born November 12, 1850; sister of the Prince Regent; abbess of the chapter royal of St. Anne at Munich.

The members of the royal house of Bavaria are descendants of the ancient Counts of Wittelsbach, who flourished in the twelfth century. Duke Maximilian I. of Bavaria was elevated to the rank of Elector of the Holy Roman Empire in the Thirty Years' War; and Elector Maximilian Joseph was raised to the rank of king by Napoleon I. in 1805.

The civil list of the King, and allowances to other members of the royal family, are fixed at present at 5,402,475 marks.

**Constitution and Government.**—The Crown is hereditary in the male line. To the king belongs the sole executive power; but his ministers are responsible for all his acts. The legislative functions are exercised jointly by the king and Parliament, the latter consisting of an Upper and a Lower House. The Upper House—Chamber of 'Reichsräte,' or councillors of the realm—consists at present of 16 royal princes, 2 crown dignitaries, the 2 archbishops, the heads of 16 mediatised houses, and 30 other hereditary 'Reichsräte'; a Roman Catholic bishop, the president of the Protestant Oberconsistorium, and 18 life-members appointed by the Crown. The number of life-members so appointed must not exceed one-third of the hereditary councillors. According to the law of April 9, 1906, the election of deputies is direct and secret. Every citizen who has completed his 25th year, has been a citizen, and has for at least a year paid a direct tax is entitled to vote. Every citizen entitled to vote, unless there are definite grounds for his exclusion, is eligible as a deputy. The number of deputies is fixed at 163, calculated at the average rate of 1 for every 38,000 inhabitants. Deputies are elected for 6 years. They receive 180*l.* for a regular session (in which the budget is presented), and 15*s.* a day during an extraordinary session, and are entitled during session, and for 8 days before and 8 days after, to travel free over the State railways. Members of the Upper House are unpaid, but have free railway passes.

State of the parties in Lower House (elected 1912): 87 Centre Party (Catholic); 37 Liberals; 8 Peasants' League; 30 Socialists; 4 Independents.

The executive is carried on, in the name of the king, by a 'Staatsrat,' or Council of State, consisting of nine members, besides the Ministers and one prince of the blood-royal; and by the Ministry as a whole, made up of seven departments, namely, of the Royal House and of Foreign Affairs, of Justice

of the Interior, of Education and Ecclesiastical Affairs, of Finance, of Communications, and of War.

*President of the Council of Ministers.*—Baron von Hertling, Minister of the Royal House and of Foreign Affairs.

### Area and Population :—

Regierungsbezirke	Area, Eng. sq. miles	Population		Pop. per sq. mile 1910
		1910	1905	
Upper Bavaria (Oberbayern) . . . . .	6,686	1,532,065	1,413,788	229·1
Lower Bavaria (Niederbayern) . . . . .	4,298	724,331	707,367	168·5
Palatinate (Rheinpfalz) . . . . .	2,372	937,085	885,833	352·8
Upper Palatinate (Oberpfalz) . . . . .	3,862	600,284	574,693	155·5
Upper Franconia (Oberfranken) . . . . .	2,798	661,862	637,700	200·8
Middle Franconia (Mittelfranken) . . . . .	3,036	930,868	868,846	306·9
Lower Franconia (Unterfranken) . . . . .	3,360	710,943	682,532	211·6
Suabia (Schwaben) . . . . .	3,934	789,853	753,613	200·7
Total . . . . .	30,346	6,887,291	6,524,372	226·9

To the area has to be added 257 square miles for water.

The total population at the end of 1910 was 6,887,291 (3,379,580 males and 3,507,711 females).

The increase of the population since 1880 has been as follows :—

Year	Population	Population per sq. mile	Annual Increase per cent.
1885	5,420,199	185·1	0·51
1890	5,594,982	191·0	0·63
1895	5,818,544	198·7	0·78
1900	6,176,057	210·9	1·22
1905	6,524,372	222·3	1·12
1910	6,887,291	226·9	1·12

### Urban and rural population at the censuses of 1905 and 1910 :—

Census	No. of Towns	No. of Rural Communes	Towns, &c., with 2,000 inhabitants and over			Communes, &c., with less than 2,000 inhabitants		
			No.	Population	Per cent. of pop.	No.	Population	Per cent. of pop.
1905	255	7,739	304	2,761,647	42·3	7,688	3,762,725	57·7
1910	255	7,729	334	3,079,022	44·7	7,650	3,808,269	55·3

In 1910 the urban population was thus distributed :—

—	No.	Population 1910	—	No.	Population 1910
Large towns <sup>1</sup> .	3	1,052,624	Small towns .	57	505,951
Medium „ .	19	741,969	Country „ .	176	397,992

<sup>1</sup> See under *German Empire* for official signification of these terms.

## Conjugal condition, 1910 and 1905 :—

	Total (1910)	Males (1910)	Females (1910)	Total (1905)
Unmarried . . . .	4,169,138	2,102,941	2,066,197	3,965,758
Married . . . . .	2,333,648	1,165,334	1,168,314	2,188,894
Widowed . . . . .	374,918	107,320	267,598	361,675
Divorced and separated .	8,997	3,487	5,510	7,482

For occupations see *German Empire*. In 1910 the number of foreigners in Bavaria (exclusive of other Germans) was 134,122 (British, 1,064).

## Annual movement of the population :—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1912	50,856	214,548	5,772	27,125	129,025	85,523
1913	48,438	207,457	5,433	26,271	126,136	81,321
1914	42,722	204,707	5,363	25,936	145,245	59,462

## Principal towns, 1910 :—

Towns	Dec. 1, 1910	Towns	Dec. 1, 1910
Munich (München) . .	596,467	Hof . . . . .	41,126
Nuremberg (Nürnberg)	333,142	Pirmasens . . . .	38,463
Augsburg . . . . .	102,487	Bayreuth . . . .	34,547
Würzburg . . . . .	84,496	Aschaffenburg . .	29,892
Ludwigshafen a. Rh. .	83,301	Amberg . . . . .	25,242
Fürth . . . . .	66,553	Landshut . . . .	25,137
Kaiserslautern . . .	54,659	Erlangen . . . . .	24,877
Ratisbon (Regensburg).	52,624	Ingoldstadt . . .	23,745
Bamberg . . . . .	48,063	Speyer . . . . .	23,045

The populations of the two largest towns, Munich and Nuremberg, were calculated at the end of 1912 to be approximately 606,014 and 359,529 respectively.

## Religion.—Religious division of the population, December 1, 1910 :—

Provinces	Roman Catholics	Protestants	Jews
Upper Bavaria . . . .	1,395,047	114,494	11,652
Lower Bavaria . . . .	716,435	7,037	468
Palatinate (Rheinpfalz) .	414,955	506,551	8,998
Upper Palatinate . . .	549,960	48,404	1,395
Upper Franconia . . .	282,999	374,967	2,946
Middle Franconia . . .	251,458	659,502	14,219
Lower Franconia . . .	571,827	126,128	11,925
Suabia . . . . .	679,552	105,202	3,462
Total . . . . .	4,862,233	1,942,385	55,065

Besides the above there are included in other Christian sects 5,816 Old Catholics, 8,017 Mennonites, 164 Anglican, 1,611 Greek Catholics and Russian Orthodox, 1,139 Irvingites, 25 Anabaptists, 1,833 Methodists, 5,841 Free Christians, 1,649 other Christians, 1,370 of

religion not Christian, 4,240 of religion not stated, or without religion, 903 of religion not ascertainable.

There are 2 Roman Catholic archbishoprics, those of Munich and Bamberg each with 3 suffragan bishoprics; 218 deaneries; and 3,101 parishes. The Protestant Church is under a General Consistory—'Ober-Consistorium'—and three provincial consistories, 81 deaneries, and 1,049 parishes. Of the three universities of the kingdom, two, at Munich and Würzburg, are Roman Catholic, and one, at Erlangen, Protestant.

**Instruction.**—(For Universities, *see* under *Germany*.) Education compulsory from six to sixteen. In 1913-14 there were 7,534 elementary schools (public and private), with 19,564 teachers (14,185 male, 5,379 female), and 1,091,884 pupils. The year's expenditure on the public schools (7,727) was 3,167,653*l*. There were 2 agricultural schools, with 329 pupils.

**Justice, Crime, and Pauperism.**—Bavaria is the only German State with an *Oberstes Landesgericht*, or appeal-court intervening between the Oberlandesgerichte and the Reichsgericht; it has a bench of 22 judges. Under it are 5 Oberlandesgerichte, 28 Landgerichte and 266 Amtsgerichte. The number of judges was (1914) 1,393. In 1913, 70,228 criminals were convicted.

In 1912, poor receiving relief 240,569 (121,244 permanent paupers), the sum expended of the ordinary budget, 783,500*l*.

**Finance.**—The Bavarian budget is voted for a period of two years. The estimates of the ordinary budget for each of the years 1916 and 1917 were :

Sources of Revenue	Marks	Branches of Expenditure	Marks
Direct taxes . . . . .	97,834,660	Public debt . . . . .	19,137,380
Stamps, fines, &c. . . . .	21,133,100	Civil list and appanages . . . . .	6,845,160
Indirect taxes . . . . .	27,801,870	Diet . . . . .	725,650
State railways, posts, tele- graphs, mines, &c. . . . .	18,670,228	Foreign Affairs . . . . .	2,356,263
State domains . . . . .	48,405,620	Communications . . . . .	85,900
Various . . . . .	20,581,195	Justice . . . . .	35,263,825
Imperial repayments . . . . .	6,241,556	Interior . . . . .	53,567,152
		Finance . . . . .	15,935,000
		Worship and Education . . . . .	60,725,488
		Contributions to Imperial expenditure . . . . .	43,883,279
		Reserve fund . . . . .	5,143,132
Total . . . . .	243,668,229 (12,183,411 <i>l</i> .)	Total . . . . .	243,668,229 (12,183,411 <i>l</i> .)

Since January 1, 1912, the direct taxes are income-tax, trade-tax, house-tax and land-tax.

Debt, December 31, 1915, 129,562,024*l*., 98,670,130*l*. being railway debt.

**Army.**—The Bavarian army, though forming an integral part of the German army, is in time of peace under the command of the King of Bavaria, and has its own administration. The military supplies, though voted by the Bavarian Parliament, must bear a fixed proportion to the amount voted for the rest of Germany by the Reichstag. The Bavarian troops form the 1st, 2nd, and 3rd Bavarian army-corps, not numbered consecutively with the other German army-corps; and there are certain differences in the matter of uniform permitted to the Bavarian troops. The administration of the fortresses in Bavaria is also in the hands of the Bavarian Government during peace.

The peace strength of the Bavarian army is between 72,000 and 78,000

**Production and Industry.**—Of the total area, nearly one-half is under cultivation, one-sixth under grass, and one-third under forests.

The areas under the chief crops, and the yield in 1914, were as follows :—

	Area, acres	Metric Tons		Area, acres	Metric Tons
Wheat	730,242	446,359	Oats	1,272,895	904,337
Rye	1,391,397	708,483	Potatoes	945,700	4,372,844
Summer-barley	829,352	615,657	Hay	3,223,457	4,979,250

Vines (1914), 48,085 acres, yielding 6,036,316 gallons; (1915) 46,147 acres yielding 12,587,410 gallons; 45,082 acres under hops (1914) yielded 12,190 metric tons; (in 1915, 8,186 metric tons).

In 1913 the output of coal was 1,895,715 metric tons, iron ore, 450,074 tons, pig iron, 195,606 tons, cast iron wares, 201,050 tons, sulphuric acid, 163,343 tons.

The quantity of beer brewed in 1915 was 312,051,256 gallons. In 1913-14, the distilleries produced 4,042,654 gallons of alcohol.

In 1913 there were 380 savings banks, with 1,147,276 depositors having to their credit 35,302,406l.

## BREMEN.

(FREIE HANSESTADT BREMEN.)

The State and Free City of Bremen form a republic, governed, under a Constitution proclaimed March 5, 1849, and subsequently revised, by a Senate of sixteen members, chosen for life, forming the executive, and the 'Bürgerschaft' (or Convent of Burgesses) of 150 members, invested with the power of legislation. The Convent is elected for six years by the votes of all the citizens, divided into classes. University men return 14 members; the merchants 40 members; the mechanics and manufacturers 20 members, and the other inhabitants who have taken the burgher oath the rest. The Convent and Senate elect the sixteen members of the Senate, ten of whom at least must be lawyers, and three merchants. Two burgomasters, elected for four years, direct the affairs of the Senate, through a Ministry divided into twelve departments—namely, Foreign Affairs, Church and Education, Justice, Finance, Police, Medical and Sanitary Administration, Military Affairs, Commerce and Shipping, Ports and Railways, Public Works, Industry, and Poor Laws. All the ministers are senators.

Area, 99 square miles; population census (1910), 295,715; (January 1, 1916) Bremen, 257,882; Bremerhaven, 24,275.

On Dec. 1, 1910, Bremen contained 257,930 Protestants (87·2 per cent.), 21,074 Roman Catholics (7·1 per cent.), 1,217 other Christians, 1,251 Jews; others 14,243. Marriages in 1915, 1,407; births, 4,691; deaths, 4,693; excess of deaths, 2.

Bremen contains two *Amtsgerichte* and a *Landgericht*, whence appeals lie to the 'Hanseatische Oberlandesgericht' at Hamburg.

In 1913-14 the revenue was 2,924,109*l.*, and expenditure 3,703,680*l.* Thirty-seven per cent. of the revenue is raised from direct taxes, 69 per cent. of which is income-tax. The chief expenditure is for interest and reduction of the public debt. Debt, 1915, 14,880,465*l.*, the whole incurred for the promotion of commerce and navigation, and for public works.

Next to Hamburg, Bremen is the largest port for the international trade of Germany. Seventy-five per cent. of the commerce was, in 1912, under the German, and about 10 per cent. under the British flag. Aggregate value of imports, 1913, 124,565,000*l.*, of which 6,105,000*l.* were from Great Britain; exports, 119,700,000*l.*, of which 10,110,000*l.* went to Great Britain.

For shipping entered and cleared, *see* under *German Empire*. Merchant vessels belonging to Bremen January 1, 1914, 595 of 1,416,848 tons net register, including 393 steamers of 1,249,542 tons. Bremen has several important shipping companies, the chief of which are the 'Norddeutscher Lloyd' with, on December 31, 1912, 255 sea-going ships of 737,549 gross register tons, 81 of which are Transatlantic steamers of 631,793 tons; 34 Orient coast-steamers of 55,827 tons and 2 training-ships of 5,833 tons; the 'Hansa' Company, with 78 ships of 311,305 tons; the 'Neptun' Company with 74 steamers of 53,515 tons; the 'Argo' Company with 27 ships of 33,172 tons; the 'Roland Line' with 12 steamers of 61,302 tons; the 'Hamburg-Bremer Afrika Line' with 13 steamers of 42,934 tons; and the Rickmers Reismühlen, Reederei u. Schiffbau, Aktien-Gesellschaft with 15 ships of 59,670 tons. Owing to the war these companies have been absolved from publishing their reports.

Total number of emigrants who embarked at Bremen, 1912, 7,974; 1913, 9,710; 1914, 6,260; 1915, 4,231.

Railways, 31 miles, owned and worked by the State.

## BRUNSWICK.

(HERZOGTHUM BRAUNSCHWEIG.)

Reigning Duke, **Ernest Augustus**, born November 17, 1887; son of Ernest Augustus, Duke of Cumberland; married May 24, 1913, to Princess Victoria Louisa (only daughter of the Emperor William II.), who was born on

September 13, 1892. Offspring: Ernest Augustus, born March 18, 1914; George William, born March 25, 1915; and a daughter, born April 18, 1917.

The legislative power is vested in one Chamber, consisting of forty-eight members. Of these fifteen are elected for four years by the inhabitants of towns, fifteen by those of rural districts, two by the Protestant clergy, four by the landlords, three by the industrial classes, four by the scientific professions, five by those who are highest taxed for income. The Chamber meets every two years. The executive is represented by a responsible Ministry of State, consisting at present of three departments, namely—of State, Foreign Affairs and Finance, of Justice and Ecclesiastical Affairs, and of the Interior.

Area, 1,424 square miles; population (1910), 494,339. There were only 25,888 Catholics in 1910.

For movement of population, see under *German Empire*.

The capital, Brunswick (Braunschweig), had 143,552 inhabitants, 1910.

The budget is voted by the Chamber for the period of two years, but each year separately. It is in two parts; the first, Staatshaushalts-Etat, provides for the particular expenditure of the State, the other, Kloster-und-Studienfonds-Etat, principally the expenditure for schools, arts and sciences. For the financial period April 1, 1916, to April 1, 1918, the budget of the Staatshaushalt is fixed at 1,270,235*l.* revenue and 1,532,715*l.* expenditure. The revenue and expenditure of the Kloster-und-Studienfonds-Etat are put at 188,114*l.* Not included in the budget estimates is the civil list of the Duke—56,266*l.* The public debt of the Duchy, exclusive of a premium-loan repayable by 60,990*l.* yearly till 1924, on January 1, 1915, was 2,073,948*l.*, three-fifths of which were contracted for railways. The property of the State consists chiefly of domains and forests and of active funds amounting to about 1,901,254*l.* in 1914, besides an annuity of 131,250*l.* till 1932, stipulated at the sale of the railways of the State.

## HAMBURG.

### (FREIE UND HANSE-STADT HAMBURG.)

**Constitution.**—The State and Free City of Hamburg is a republic. The present Constitution came into force on January 1, 1861; revised 1879 and 1906. The Government is entrusted, in common, to two Chambers of Representatives, the Senate and the Bürgerschaft, or House of Burgesses. The Senate, which exercises chiefly, but not entirely, the executive power, is composed of eighteen members, one half of whom must have studied law or finance, while seven out of the remainder must be merchants. The members of the Senate are elected for life by the House of Burgesses; but a senator may retire at the end of six years. A first and second burgomaster, chosen annually by ballot, preside over the Senate. No burgomaster can be in office longer than two years; and no member of the Senate may hold any other public office. The House of Burgesses consists of 160 members, 80 of whom are elected by ballot by all tax-paying citizens. Of the remainder, 40 are chosen, by ballot, by the owners of house-property, while the other 40 are chosen, by ballot, by burgesses who are or have been members of the Senate or of the House of Burgesses or members of various guilds, corporations, and courts of justice. All the members of the House of Burgesses are chosen for

six years, in such a manner that every three years new elections take place for one-half the number. The House of Burgesses has in permanence a Committee of the House, consisting of 20 deputies, of whom no more than five may be members of the legal profession. The Committee watches the proceedings of the Senate and the general execution of the articles of the Constitution. In all matters of legislation, except taxation, the Senate has a veto; and, in case of a constitutional conflict, recourse is had to an assembly of arbitrators, chosen in equal parts from the Senate and the House of Burgesses; also to the Supreme Court of Judicature of the Empire (Reichsgericht) at Leipzig.

The jurisdiction of the Free Port was, on January 1, 1882, restricted to the city and port, and on October 15, 1888, the whole of the city, except the actual port and the warehouses connected with it (population 1,824 in 1912), was incorporated in the Zollverein. This involved an expenditure of six millions sterling, to which the Imperial Government contributes two millions.

**Area and Population.**—Area, 160 English square miles; population on December 1, 1880, of 453,869; December 1, 1910, 1,014,664. The State consists of two divisions, the population of each of which was as follows on November 1, 1912 :—City of Hamburg, 986,804; Landgebiet (4 Landherrenschaften), 88,610. There were on December 1, 1910, 28,675 foreigners—9,920 Austrians, 2,481 Swedish and Norwegians, 3,775 Danes, 2,277 British, 7,921 other Europeans, 1,775 non-Europeans, and 526 unclassified.

Emigration *viâ* Hamburg for three years :—

Year	From Hamburg itself	Other Germans	Foreigners	Total	Bound for the United States	For other Destinations
1912	620	5,760	128,409	134,169	106,154	28,015
1913	864	8,730	413,857	422,587	—	—
1914	461	4,923	150,416	155,344	—	—

For births, deaths, and marriages, *see* under *Germany*.

**Religion, Instruction, and Justice.**—On December 1, 1910, 930,071 Protestants (91·66 per cent.), 51,036 Roman Catholics (5·03 per cent.), 3,942 other Christians (0·39 per cent.), 19,472 Jews (1·92 per cent.), and 10,143 'all other' (1·00 per cent.).

In the year ending March, 1913, Hamburg (State) had 249 public elementary schools with 3,911 teachers (2,343 male, 1,568 female), and 122,364 pupils; cost for the year, 15,859,053 marks, of which 14,000,000 marks was provided by the State; 20 higher State schools with 12,155 pupils and 78 private schools with 20,096 pupils.

The State contains three Amtsgerichte, a Landgericht, and the "Hanseatische Oberlandesgericht," or court of appeal for the Hanse Towns and the Principality of Lübeck (Oldenburg). In 1911, 9,072, and 1912, 10,466, persons, in the State of Hamburg, were convicted of crime.

**Finance.**—For 1916 the ordinary revenue was 8,757,961*l.*, and expenditure 10,201,750*l.* For 1917 the budget estimated revenue at 8,071,361*l.* and expenditure at 11,903,319*l.* Direct taxes amount to nearly half of the whole revenue, and next to that the proceeds of domains, quays, railways, &c. Expenditure for the debt, 2,148,405*l.* in 1915; for education, 1,403,430*l.*

Public debt, January 1, 1914, 842,241,438 marks (42,112,071*l.*), incurred chiefly for public works.

**Commerce and Shipping.**—Hamburg is the principal seaport in Germany. Value of imports and exports by sea :—

	1909	1910	1911	1912	1913
Imports . . . . .	1,000 <i>l.</i> 176,223	1,000 <i>l.</i> 190,771	1,000 <i>l.</i> 210,032	1,000 <i>l.</i> 230,368	1,000 <i>l.</i> 235,810
Exports . . . . .	136,624	156,170	168,469	181,560	193,245

Precious metals are not included in the above figures ; value of such imports in 1912, 3,491,652*l.* ; exports, 2,960,970*l.*

## HESSE.

(GROSSHERZOGTHUM HESSEN.)

**Reigning Grand-duke.**—**Ernst Ludwig**, born November 25, 1868 ; the son of Grand-duke Ludwig IV. and of Princess Alice of Great Britain and Ireland ; succeeded at the death of his father, March 13, 1892. Married, first, April 19, 1894, to Princess Victoria, born November 25, 1876, the daughter of Duke Alfred of Saxe-Coburg and Gotha. The marriage was dissolved December 21, 1901. Married, secondly, February 2, 1905, to Princess Elenore of Solms-Hohensolms-Lich, born September 17, 1871 ; offspring : Georg, born November 8, 1906 ; and Ludwig, born November 20, 1908.

**Sisters of the Grand-duke.**—I. *Victoria*, born April 5, 1863 ; married to Prince Louis of Battenberg, April 30, 1884. II. *Elizabeth*, born November 1, 1864 ; married to the Grand-duke Sergius Alexandrovitch of Russia, June 15, 1884 ; widow February 17, 1905. III. *Irene*, born July 11, 1866 ; married to Prince Heinrich of Prussia, May 24, 1888. IV. *Aliz*, born June 6, 1872 ; married (as Alexandra Feodorovna) to Nicholas II. ex-Emperor of Russia, November 26, 1894.

The former Landgraves of Hesse had the title of Grand-duke given them by Napoleon I. in 1806, together with a considerable increase of territory. At the Congress of Vienna this grant was confirmed, after some negotiations. The reigning family are not possessed of much private property, but dependent almost entirely upon the grant of the civil list, amounting to 1,265,000 marks.

**Constitution.**—The Constitution bears date December 17, 1820 ; but was modified in 1856, 1862, 1872, 1900 and 1911. The legislative power is vested in two Chambers, the first composed of the princes of the reigning family, the heads of a number of mediatised houses, the Roman Catholic

bishop, the chief Protestant superintendent, a representative of the University (Giessen), one of the Technische Hochschule at Darmstadt, two members elected by the noble landowners, and twelve life-members, nominated by the Grand-duke, as well as one representative of commerce, agriculture and industry respectively; while the second consists of fifteen deputies of the towns that have a special franchise, and forty-three representatives of the smaller towns and rural districts. Electors are Hessians above twenty-five years of age who pay direct taxes. Elections are direct and the voting is by ballot. The members of the Second Chamber are elected for six years, one-half of the number retiring every three years. The Chambers must meet every year. Members not hereditary of both Chambers who reside more than  $1\frac{1}{2}$  mile from the place of meeting, receive an allowance of 9s. a day and 3s. for each night, and travelling expenses.

The executive is represented by a ministry of State, divided into three departments, namely, of the Interior; of Justice; and of Finance. The minister of state is also minister of the Grand-ducal House and Foreign Affairs, and head of the department of Justice.

For administrative purposes, the Grand-duchy is divided into three provinces, eighteen circles (Kreise), and 983 communes (Gemeinden).

### Area and Population.

Provinces	Sq. Miles	Population			Pop. per sq. mile, 1910
		1900	1905	1910	
Starkenbourg . . . . .	1,169	488,598	542,996	590,380	505.0
Upper Hesse (Oberhessen) . . . .	1,269	282,047	296,755	309,233	243.7
Rhenish Hesse (Rhein Hessen) . . .	530	348,334	369,424	382,438	721.6
<b>Total . . . . .</b>	<b>2,968</b>	<b>1,118,979</b>	<b>1,209,175</b>	<b>1,282,051</b>	<b>432.0</b>

There were 639,198 males and 642,853 females in 1910. Increase from 1905 to 1910 was at the rate of 1.20 per cent. per annum.

The largest towns are Mayence or Mainz (including suburbs), with 118,000; Darmstadt, the capital, 87,089 (including Bessungen); Offenbach (including Bürgel), 75,583; Worms, 46,819 (including Hochheim, Neuhausen und Pfiffelgheim), Giessen, 31,153 inhabitants, 1910.

**Religion and Instruction.**—At the census of 1910 there were 848,004 Protestants, 397,549 Catholics, 6,707 of other Christian sects, 24,063 Jews, and 5,728 unclassified, or of no religion. The Grand-duke is head of the Protestant Church, which is governed by a synod, and whose affairs are administered by a consistory (Oberkonsistorium). The Roman Catholic Church has a Bishop (at Mainz). The State contribution to the Protestant Church in 1913 was 310,000 marks (15,500*l.*), to the Catholic Church 171,372 marks (8,586*l.*).

Instruction is compulsory. The elementary schools are maintained by the communes, but with contributions by the State. There are 979 public elementary schools with (1913) 3,469 masters, 584 mistresses, and 215,709 pupils. Continuation schools (Fortbildungsschulen); winter, 1912-13, 27,522 pupils. Hesse has 11 gymnasia, 2 progymnasia, 3 realgymnasia, 9 oberrealschulen, 9 realschulen, 1 Agricultural College (Landwirtschafts-

schule), and 32 in complete realschulen (höhere Bürgerschulen), with (1912) 739 teachers, and a total attendance of 12,584; 6 higher girls' schools with (1913) 3,523 pupils; and 49 private schools with (1913) 3,790 pupils. The University at Giessen had 1,436 matriculated students, and a Technical High School at Darmstadt, with 1,347 students in 1913. There are many industrial, technical, agricultural and other special institutes.

In 1911 there were 7,944 persons convicted of criminal offences in the Grand-duchy.

**Finance.**—The ordinary revenue and expenditure were estimated for the year 1916–17 to balance at 4,456,813*l*.

Direct taxes are income-tax and property-tax (only to be considered as a supplementary tax); the direct taxes paid to the communes are an income-tax, land-tax, trade-tax, and rent-tax; the indirect taxes are chiefly a stamp-tax, dog-tax, duties on successions, &c. Public debt 24,110,965*l*, 1916, nearly all railway debt.

**Production and Industry.**—Of the area, 63·4 per cent. is under cultivation; 31·5 per cent. forests; 5·1 per cent. uncultivated (houses, roads, water, &c.). Arable land occupies 916,938 acres; meadows and pastures, 249,964; vineyards, 36,865; and forests, 613,320 acres; of the latter, 188,333 belong to the State, 222,519 to the communes, 10,794 to other bodies, and 191,674 to private persons.

Areas and yield of chief crops, 1913 :—

Crops	Area	Yield	Crops	Area	Yield
	Acres	Tons		Acres	Tons
Rye ...	180,377	171,074	Potatoes	159,535	1,134,274
Wheat ...	82,990	89,264	Oats ...	132,482	134,473
Summer- barley ...	114,772	122,155	Hay ...	231,533	471,380

32,184 acres under vines, yielding 9,131,562 gallons of wine to the value of 986,933*l*.

Domestic animals, December 1, 1914 :—Horses, 40,155; cattle, 339,079; sheep, 58,146; swine, 410,395; goats, 144,385.

The quantity of coal raised in 1913 was 397,520 tons to the value of 24,560*l*; and iron, 887,486 tons, valued at 191,700*l*. The principal manufactures are leather, cloth, paper, chemicals, furniture, wagons, railway cars and carriages, machinery, musical instruments, tobacco and cigars, sparkling-wine.

**LIPPE.**

(FÜRSTENTUM LIPPE.)

Reigning Prince, **Leopold IV.**, born May 30, 1871, son of the late Count Ernst of Lippe Biesterfeld, and Carola, Countess of Wartensleben; married August 16, 1901, to Princess Bertha of Hessen-Philippsthal-Barchfeld; offspring: Ernst, born June 12, 1902; Leopold Bernhard, born May 19, 1904; Karoline, born August 4, 1905; Chlodwig, born September 27, 1909; Sieglinde, born March 4, 1915. Count Leopold assumed the Regency in succession to his father, September 27, 1904, but the right of succession was claimed by Prince Georg of Schaumburg-Lippe, and the dispute was settled by a judicial court at Leipzig on October 25, 1905.

The succession fell to the Lippe-Biesterfeld branch of the house of Lippe on the death of Prince Karl Alexander, January 13, 1905. For the expenses of the court, &c., are allotted the revenues arising from the *Domanium* (farms, forests, &c.), which, according to the covenant of June 24, 1868, are indivisible and inalienable entail estate of the Prince's house, the usufruct and administration of which belong to the reigning Prince. By the law of March 24, 1898, the Regent draws all the revenues from the *domanium*, and therefrom makes annual payments to the *Landkasse*.

A charter of rights was granted to Lippe by decree of July 6, 1836, partly replaced by the electoral law of June 3, 1876, according to which the Diet is composed of twenty-one members, who are elected in three divisions determined by the scale of the rates. The discussions are public. To the Chamber belongs the right of taking part in legislation and the levying of taxes; otherwise its functions are consultative. A minister presides over the government.

Except 5,925 Catholics and 780 Jews (1910), the people are Protestants. Marriages, 1912, 1,251; births, 4,443; deaths, 2,184; stillborn, 125; illegitimate, 219. The Capital, Detmold, has 14,295 inhabitants (1910). Area 469 square miles; population 1910, 150,937.

For 1916-1917 the revenue was estimated at 148,888/, and expenditure at 150,024/. Public debt in 1916, 94,482/.

In November 1915, a State bank was established, with its seat in Detmold.

REFERENCE.—*Amtsblatt für das Fürstentum Lippe.*

**LÜBECK.**

(FREIE UND HANSE-STADT LÜBECK.)

The free city and State of Lübeck form a Republic, governed according to a Constitution proclaimed December 30, 1848; since revised up to July 17, 1907. There are two representative bodies—the Senate, exercising the executive, and the *Bürgerschaft*, or House of Burgesses, exercising, together with the Senate, the legislative authority. The Senate is composed of fourteen members, elected for life, and presided over by one burgomaster, who holds office for two years. There are 120 members in the House of Burgesses, chosen by all citizens of the town. A committee of thirty burgesses, presided over by a chairman elected for one year, has the duty of representing the legislative assembly in the intervals of the ordinary sessions, and of carrying on all active business. The government is in the hands of the Senate, but

the House of Burgesses has the right of initiative in all measures relative to the public expenditure, foreign treaties, and general legislation. To the passing of every new law the sanction of the Senate and the House of Burgesses is required.

The city of Lübeck had (1910) 116,599 inhabitants. For births, deaths, and marriages, *see* under *German Empire*.

On December 1, 1910, Protestants numbered 111,543, Roman Catholics 3,802, other Christians 276, Jews 623, and 'unclassified' 189. Education is compulsory between the ages of 6 and 14. There are (1912) 28 elementary schools (9 for boys, 9 for girls, 10 for either sex), with 11,209 pupils; for boys 1 gymnasium (650 pupils), 1 real gymnasium (612 pupils), 1 real school (586 pupils), 1 private higher school (433 pupils), and 2 public middle schools (1,846 pupils); for girls there are 1 public high school (568 pupils), 2 private high schools, 1 private middle school (708 pupils) and 2 public middle schools (1,365 pupils). There are also a public technical school for apprentices, 1 architectural school, 1 naval school, 1 school for engineers of steamers, 1 public and 1 private commercial school, and 1 private technical school for women.

Lübeck contains an Amtsgericht and a Landgericht, whence the appeal lies to the 'Hanseatisches Oberlandesgericht' at Hamburg. In 1909, 862; in 1910, 883; and in 1911, 811 criminals were convicted. In 1911, 3,200 persons received poor-relief from the City 'Armen-Anstalt,' which spent, in 1911, 330,221 marks (16,511*l.*).

For 1916 the revenue is estimated at 1,031,377*l.* and the expenditure at 1,053,848*l.* About one-third of the revenue is derived from public domains, chiefly forests and industrial establishments; and over one-third from direct taxation. The public debt amounted to 3,491,051*l.* in 1915.

Total imports into Lübeck, 1913, 6,784,170*l.*; total exports, 11,362,260*l.*

Number of vessels entered and cleared in 1913, 9,084, of 2,006,824 tons; in 1912, 7,830 vessels, of 1,780,156 tons.

## MECKLENBURG-SCHWERIN.

(GROSSHERZOGTHUM MECKLENBURG-SCHWERIN.)

Grand-duke **Friedrich Franz IV.**, born April 9, 1882; son of Friedrich Franz III. and Anastasia Mikhaïlovna, daughter of the Grand-duke Michael Nikolaïevitch of Russia, married June 7, 1904, to Alexandra, daughter of Ernst August of Brunswick-Lueneburg, Duke of Cumberland; succeeded on the death of his father, April 10, 1897. Offspring: (1) Prince Friedrich Franz, born April 22, 1910. (2) Prince Christian Ludwig, born September 29, 1912. Sisters of the Grand-duke are: 1. *Alexandrine*, born December 24, 1879; married April 26, 1898, to Christian, King of Denmark. 2. *Cecilie*, born September 20, 1886, married June 6, 1905, to Friedrich Wilhelm, Crown-Prince of the German Empire and of Prussia.

*Uncles and Aunts of the Grand-duke.*—I. *Paul Friedrich*, born September 19, 1852; married May 5, 1881, to the Princess Marie of Windisch-Graetz. Offspring: 1. *Marie Antoinette*, born May 28, 1884. 2. *Heinrich Borwin*, born December 16, 1885. Duke Paul in 1884 renounced all hereditary rights to the Grand-duchy for himself and his descendants; he himself became a Roman Catholic. II. *Marie*, born May 14, 1854; married August 28, 1874, to Grand-duke Vladimir, second son of Alexander II., Emperor of Russia. III. *Johann Albrecht*, born December 8, 1857, Regent of the Duchy of

Brunswick, married for the second time to Elisabeth, daughter of the late Duke Botho zu Stolberg-Rossia. IV. *Elisabeth*, born August 10, 1869; married October 24, 1896, to Friedrich August, Grand-duke of Oldenburg. V. *Adolf Friedrich*, born October 10, 1873. VI. *Heinrich*, born April 19, 1876; married February 7, 1901, to Queen Wilhelmina of the Netherlands, with the title 'Prince of the Netherlands.'

The Grand-ducal house of Mecklenburg is the only reigning family in Western Europe of Slavonic origin, and claims to be the oldest sovereign house in the Western world. In their full title, the Grand-dukes style themselves Princes of the Wends. Their genealogical table begins with Niklot, who died 1160, and comprises 26 generations. The title of Grand-duke was assumed in 1815.

The political institutions of the Grand-duchy of Mecklenburg-Schwerin and of Mecklenburg-Strelitz are of an entirely feudal character, but in March, 1907, the Grand-dukes of both Grand-duchies intimated to the estates at Schwerin and New Strelitz, respectively, their intention of introducing a form of constitutional government. Part of the legislative power (only in the Domain has the Grand-duke the whole legislative power) is in the hands of the Diet—'Landtag.' There is only one Diet for both Grand-duchies, and it assembles every year for a few weeks; when it is not in actual session it is represented by a committee of nine members. Seats and votes in the Diet belong to the Ritterschaft—that is, the proprietors of Rittergüter, or Knights' Estates—and to the Landschaft, consisting of the burgomasters of 42 towns of Mecklenburg-Schwerin and 7 towns of Mecklenburg-Strelitz. The Ritterschaft has nearly 800 members, but only a few of them take seats in the Diet. The Domain has not a representation of its own. The only elected representatives of the people are the 6 deputies returned to the German Reichstag.

The executive is represented by a ministry divided into four departments, appointed by, and responsible to, the Grand-duke alone. There is no other administrative division than that springing from the ownership of the soil, in which respect the country is divided as follows, with population in 1910:—Grand-ducal Domains, 197,557; Knights' Estates (Rittergüter), 120,406; Convent Estates (Klostergüter), 7,889; Towns and Town Estates, 314,106. Total, 639,958, half rural. The chief towns (1911) were Rostock (65,512 inhabitants), Schwerin (43,131 inhabitants), the capital, Wismar (24,378 inhabitants), Güstrow (17,805 inhabitants), and Parchim (10,608 inhabitants).

In 1910 there were: Protestants, 615,512; Catholics, 21,043; other Christians, 1,288; Jews, 1,413; not stated, 702. The parishes are generally well endowed with landed property.

There are 1,235 elementary schools with 92,912 pupils (1911); Gymnasia, 7 with 1,819 pupils; Realgymnasien, 6 with 1,492 pupils; Realprogymnasien, 2 with 167 pupils; Realschulen, 5 with 1,254 pupils; 6 preparatory schools with 618 pupils; higher private schools, 18 with 2,154 pupils; normal schools, 2 with 398 pupils; navigation schools, 2 with 129 pupils; agricultural school, 1 with 55 pupils; technical schools, 2 with 196 pupils in the summer session and with 303 pupils in the winter session; institutions for the deaf and dumb, 1 with 54 pupils; institution for the blind, 1 with 90 pupils; schools for artisans, 50 with 5,843 pupils. There is a university at Rostock (see *German Empire*).

There are 43 Amtsgerichte, 3 Landgerichte, and 1 Oberlandesgericht at Rostock, which is also the supreme court for Mecklenburg-Strelitz. There are also certain special military and ecclesiastical tribunals.

There exists no general budget for the Grand-duchy. There are three systems of finance, entirely distinct. 1. That of the Grand-duke, estimated for July 1, 1915-16, at 1,178,650*l.* 2. The financial administration of the States, the resources of which are very small. 3. The common budget of the Grand-duke and States, the receipts of which are 1,739,500*l.* (for July 1, 1915-16), and expenditure, 1,936,750*l.* On July 1, 1916, the public debt was estimated at 9,960,265*l.*

**MECKLENBURG-STRELITZ.**

(GROSSHERZOGTUM MECKLENBURG-STRELITZ.)

Grand-duke **Adolf Friedrich VI.**, born June 17, 1882; the son of Grand-duke Adolf Friedrich V. and of Princess Elizabeth of Anhalt; succeeded at the death of his father, June 11, 1914; married April, 1917, to Princess Feodora of Reuss. Sisters: (1) Mary, born May 8, 1878; married June 22, 1899, to George Jametel; divorced December 31, 1908; married again on August 11, 1914, to Prince Julius Ernst of Lippe; (2) Jutta, born January 24, 1880; married July 27, 1899, under the name of Militza, to Prince Danilo of Montenegro.

The reigning house of Mecklenburg-Strelitz was founded, in 1701, by Duke Adolf Friedrich II., youngest son of Duke Adolf Friedrich I. of Mecklenburg. There being no law of primogeniture at the time, the Diet was unable to prevent the division of the country, which was protested against by subsequent Dukes of Mecklenburg-Schwerin. The Grand-duke is, however, one of the wealthiest of German sovereigns, having seigniorial rights over more than one-half of the country.

Mecklenburg-Strelitz has, in common with Mecklenburg-Schwerin, a Diet consisting of landowners and town magistrates. The country is divided into two provinces: Stargard, which alone participates in the Constitution, and Ratzeburg, whose special Constitution, framed in 1869, was put in force in 1906. Of the 48 burgomasters and nearly 800 members of the Ritterschaft (see *Mecklenburg-Schwerin*), 7 burgomasters and over 80 proprietors of Rittergüter belong to Mecklenburg-Strelitz.

The executive is entirely in the hands of the Grand-duke, and is exercised by him through his Government, at the head of which is a 'Minister of State.' For 1915-16 revenue 314,240*l.*, expenditure 303,470*l.* Debt, July 1, 1915, 132,560*l.*

The overlordship of the soil within the State is distributed as follows:—The Grand-duke has seigniorial rights over 527 square miles; titled and untitled nobles over 353 square miles, and town corporations over 117 square miles.

For births, deaths, and marriages, *see* under *German Empire*.

With the exception of 2,627 Catholics, 253 Jews and 212 persons of other confessions (1905), the people are Protestants. The total population on December 1, 1910, numbered 106,347 (53,523 males and 52,824 females). The capital, Neu-Strelitz, had 11,993 inhabitants in 1912.

**OLDENBURG.**

(GROSSHERZOGTUM OLDENBURG.)

Grand-duke **Friedrich August**, born November 16, 1852; the son of Grand-duke Peter and of Princess Elizabeth of Saxe-Altenburg; succeeded at the death of his father, June 13, 1900; married (1), February 18, 1878, to

Princess Elizabeth (died August 28, 1895), daughter of Prince Friedrich Karl of Prussia ; (2), October 24, 1896, to Princess Elizabeth of Mecklenburg-Schwerin ; issue of first marriage, a daughter, Sophia, born February 2, 1879 ; married February 27, 1906, to Prince Eitel Friedrich, second son of the Emperor Wilhelm II. ; of the second, a son, Nicolaus, born August 10, 1897 ; and two daughters, Ingeborg Alix, born July 20, 1901, and Altborg Mathilda, born May 19, 1903. *Brother of the reigning Grand-duke*.—Prince *Georg*, born June 27, 1855.

The ancient house of Oldenburg is said to be descended from Witdukind, the celebrated leader of the heathen Saxons against Charles the Great. In the fifteenth century a scion of the House of Oldenburg, Count Christian VIII., was elected King of Denmark, Sweden, and Norway. The main line became extinct with Count Anton Gunther, in 1667, whereupon the territory of the family fell to the King of Denmark, who made it over to Grand-duke Paul of Russia, in 1773, in exchange for pretended claims upon Schleswig-Holstein. The Grand-duke then (1773) gave Oldenburg to his cousin, Prince Friedrich August of Holstein-Gottorp, with whose descendants it remained till 1810, when Napoleon incorporated it with the Kingdom of Westphalia. But the Congress of Vienna not only gave the country back to its former sovereign, but, at the urgent demand of Czar Alexander I., added to it a territory of nearly 400 square miles, with 50,000 inhabitants, bestowing at the same time upon the Prince the title of Grand-duke. Part of the new territory consisted of the Principality of Birkenfeld, on the left bank of the Rhine, close to the French frontier. Another part consisted of the Principality of Lübeck, and another of a piece of the secularised bishopric of Münster. The Grand-duke has a civil list of 400,000 marks, or 20,000*l.*, and the revenue from the crown lands (Krongut) is estimated at 255,000 marks, or 12,750*l.* ; he draws also a considerable revenue from private estates of the family in Holstein.

By the Constitution, 1849, revised 1852 and 1908, the legislative power is exercised by a Landtag, or Diet, elected for five years, by the vote of all citizens paying taxes. By a law of April 17, 1909, the direct mode of election was introduced in 1911. The Grand-duchy is divided into 29 districts. The Landtag consists of 45 delegates. The executive is vested, under the Grand-duke, in a responsible ministry of three departments. The outlying Principalities of Lübeck and Birkenfeld have also provincial councils, both of 15 members, summoned twice a year by the provincial government.

The budgets are divided into the budget of the Grand-duchy and the budgets of the Duchy of Oldenburg and the Principalities of Lübeck and Birkenfeld. Estimated revenue, 1917, 785,500*l.* ; expenditure, 785,300*l.*

Debt, 1916, 5,456,207.

The population, 1910 :—Duchy of Oldenburg, 391,246 ; Principality of Lübeck, 41,300 ; Principality of Birkenfeld, 50,496 ; total, 483,042 (244,018 males and 239,024 females). Oldenburg, the capital, had 30,242 inhabitants in 1910.

In 1910 Oldenburg contained 371,650 Protestants, 107,508 Roman Catholics ; other religions, 2,359 ; 1,525 Jews. The State Church (Protestant) is under the Ministry for Ecclesiastical Affairs.

Oldenburg contains an Oberlandesgericht and a Landgericht. The Amtsgerichte of Lübeck and Birkenfeld are under the jurisdiction of the Landgerichte at Lübeck and Saarbrücken respectively.

## PRUSSIA.

(KÖNIGREICH PREUSSEN.)

## Reigning King.

**Wilhelm II.**, born Jan. 27, 1859, eldest son of Friedrich III., German Emperor and King of Prussia—who was eldest son of Wilhelm I., and was born October 18, 1831, married, Jan. 25, 1858, to Victoria (Empress and Queen Friedrich), Princess Royal of Great Britain, succeeded his father March 9, 1888, and died June 15, 1888, when he was succeeded by his son, Prince Friedrich Wilhelm, under the title of Wilhelm II. The Emperor married, Feb. 27, 1881, Princess Victoria of Schleswig-Holstein-Sonderburg-Augustenburg, born Oct. 22, 1858, daughter of the late Duke Friedrich of Schleswig-Holstein-Sonderburg-Augustenburg.

*Children of the King.*

1. Prince *Friedrich Wilhelm*, born May 6, 1882, Crown Prince of the German Empire and of Prussia, married June 6, 1905, to Princess Cecilie, born Sept. 20, 1886, daughter of the late Friedrich Franz III., of Mecklenburg-Schwerin; offspring, Prince *Wilhelm Friedrich*, born July 4, 1906; Prince *Ludwig Ferdinand*, born November 9, 1907; Prince *Hubertus*, born September 30, 1909; Prince *Friedrich George*, born Dec. 19, 1911; and Princess *Alexandrine Irene*, born April 7, 1915; 2. Prince *Wilhelm Eitel-Friedrich*, born July 7, 1883, married, February 27, 1906, to Princess Sophie Charlotte, daughter of the Grand-duke Friedrich August of Oldenburg; 3. Prince *Adalbert*, born July 14, 1884, married, August 3, 1914, to Princess Adelheid of Sachsen-Meiningen; 4. Prince *August Wilhelm*, born Jan. 29, 1887; married, October 22, 1908, to Princess Alexandra Victoria of Schleswig-Holstein; offspring: Prince *Alexander Ferdinand*, born December 26, 1912; 5. Prince *Oscar*, born July 27, 1888, morganatically married, July 31, 1914, to Countess Ina Marie Bassewitz (Countess Ruppin); offspring: two sons, born respectively on July 12, 1915, and Jan. 8, 1917; 6. Prince *Joachim*, born Dec. 17, 1890; married, March 11, 1916, to Princess Marie Auguste of Anhalt; offspring: *Carl Franz Josef*, born Dec. 15, 1916; 7. Princess *Viktoria Luise*, born Sept. 13, 1892; married, May 27, 1913, to Prince Ernst August of Cumberland, Duke of Brunswick.

*Brother and Sisters of the King.*

1. Princess *Charlotte*, born July 24, 1860; married, Feb. 18, 1878, to Bernhard, reigning Duke of Saxe-Meiningen. 2. Prince *Heinrich*, born Aug. 14, 1862; married, May 24, 1888, to Princess Irene, daughter of the late Grand-duke Ludwig IV., of Hesse; offspring of the union are two sons, Waldemar, born March 20, 1889; Sigismund, born Nov. 27, 1896. 3. Princess *Victoria*, born April 12, 1866; married, Nov. 19, 1890, to Prince Adolf of Schaumburg-Lippe; died July 9, 1916. 4. Princess *Sophie*, born June 14, 1870; married, Oct. 27, 1889, to King Konstantin of Greece. 5. Princess *Margarette*, born April 22, 1872, married, Jan. 25, 1893, to Prince Friedrich Karl Ludwig of Hesse.

The Kings of Prussia (Bo-Russia) trace their origin to Count Thassilo, of Zollern in Swabia, one of the generals of Charles the Great. His successor, Count Friedrich I., built the family castle of Hohenzollern, near the Danube, in the year 980. A subsequent Zollern, or Hohenzollern, Friedrich III., was elevated to the rank of a Prince of the Holy Roman Empire in 1278, and received the Burggraviate of Nuremberg in fief; and his great-grandson, Friedrich VI., was invested by King Sigmund, in 1415, with the Margraviate of Brandenburg, and obtained the rank of Elector in 1417. A century after, in 1511, the Teutonic Knights, owners of

the large province of Prussia, on the Baltic, elected Margrave Albrecht, a younger son of the family of Hohenzollern, to the post of Grand-Master, and he, turning Protestant, declared himself hereditary duke. The early extinction of the male line of Albrecht brought the province of Prussia by inheritance to the electors of Brandenburg, who likewise adopted Protestantism. In the seventeenth century, the Hohenzollern territories became greatly enlarged by Friedrich Wilhelm, 'the Great Elector,' under whose fostering care arose the first standing army in Central Europe. The Great Elector, after a reign extending from 1640 to 1688, left a country of one and a half million inhabitants, a vast treasure, and 38,000 well-drilled troops to his son, Friedrich I., who put the kingly crown on his head at Königsberg on January 18, 1701. His successor Friedrich Wilhelm I., after adding part of Pomerania to the possessions of the house, left his son and successor Friedrich II., called 'the Great,' a State of 47,770 square miles, with two and a half millions of inhabitants. Friedrich II. added Silesia, an area of 14,200 square miles; this, and the large territory gained in the first partition of Poland, increased Prussia to 74,340 square miles, with more than five and a half million inhabitants. Under the reign of Friedrich's successor, Friedrich Wilhelm II., the State was enlarged by the acquisition of the principalities of Anspach and Baireuth, as well as the vast territory acquired in another partition of Poland, which raised its area to nearly 100,000 square miles with about nine millions of souls. Under Friedrich Wilhelm III., nearly one-half of this State and population was taken by Napoleon; but the Congress of Vienna not only restored the loss, but added part of the Kingdom of Saxony, the Rhineland, much of Westphalia, and Swedish Pomerania, moulding Prussia into two separate pieces of territory, of a total area of 106,820 square miles. This was shaped into a compact State of 134,463 square miles, with a population of 22,769,436, by the war of 1866.

At present the total 'Krondotations Rente,' as far as it figures in the budgets, amounts to 17,719,296 marks, or 885,964*l*. The reigning house is also in possession of a vast amount of private property, comprising castles, forests, and great landed estates in various parts of the kingdom, known as 'Kronfideikommiss und Schatullgüter,' the revenue from which mainly serves to defray the expenditure of the court and the members of the royal family.

The Royal Fideikommiss was last regulated by Cabinet Order of Aug. 30, 1843. Besides this the Royal Crown treasure, founded by King Friedrich Wilhelm III., consists of a capital of 6 millions, which has since considerably increased, and also the family Fideikommiss, likewise founded by King Friedrich Wilhelm III., for the benefit of princes born afterwards. It comprises the domains of Flatow, Krojanke, and Frauendorf, as well as the Fideikommiss founded by the late Prince Karl (Gliénicke). Finally, the Royal House is also entitled to the House Fideikommiss of the Hohenzollern princes.

Dating from King Friedrich I. of Prussia (Elector Friedrich III. of Brandenburg), there have been the following

#### SOVEREIGNS OF THE HOUSE OF HOHENZOLLERN.

Friedrich I.	1701	Friedrich Wilhelm III.	1797
Friedrich Wilhelm I.	1713	Friedrich Wilhelm IV.	1840
Friedrich II. called 'the Great'	1740	Wilhelm I.	1861
Friedrich Wilhelm II.	1788	Friedrich III. (Mar. 9-June 15)	1888
		Wilhelm II.	1888

### Constitution and Government.

Various fundamental laws vest the executive and part of the legislative authority in a king, who attains his majority upon accomplishing his eighteenth year. The crown is hereditary in the male line, according to primogeniture. In the exercise of the government the king is assisted by a council of ministers, appointed by royal decree. The legislative authority the king shares with a representative assembly, the Landtag, composed of two Chambers, the first called the 'Herrenhaus,' or House of Lords, and the second the 'Abgeordnetenhaus,' or Chamber of Deputies. The assent of the king and both Chambers is requisite for all laws. Financial projects and estimates must first be submitted to the Abgeordnetenhaus, and be either accepted or rejected *en bloc* by the Herrenhaus. The right of proposing laws is vested in the Government and in each of the Chambers.

The Herrenhaus is composed of, first, the princes of the royal family who are of age, including the scions of the formerly sovereign families of Hohenzollern-Hechingen and Hohenzollern-Sigmaringen; secondly, the chiefs of the mediatised princely houses, recognised by the Congress of Vienna, to the number of sixteen in Prussia; thirdly, the heads of the territorial nobility formed by the king, and numbering some fifty members; fourthly, a number of life-peers, chosen by the king from among the rich landowners, great manufacturers, and 'national celebrities'; fifthly, eight titled noblemen elected in the eight older provinces of Prussia by the resident landowners of all degrees; sixthly, the representatives of the universities, the heads of 'chapters,' and the burgomasters of towns with above fifty thousand inhabitants; and seventhly, an unlimited number of members nominated by the king for life, or for a more or less restricted period.

The Abgeordnetenhaus consists of 443 members—362 for the old kingdom, 80 added in 1867 to represent the newly-annexed provinces, and 1 in 1876 for Lauenburg. Every Prussian who has attained his twenty-fifth year, and is qualified to vote for the municipal elections of his place of domicile, is eligible to vote as indirect elector. Persons who are entitled to vote for municipal elections in several parishes can only exercise the right of indirect elector, or 'Urwähler,' in one. One direct elector, or 'Wahlmann,' is elected from every complete number of 250 souls. The indirect electors are divided into three classes, according to the respective amount of direct taxes paid by each; arranged in such manner that each category pays one-third of the whole amount of direct taxes levied on the whole. The first category consists of all electors who pay the highest taxes to the amount of one-third of the whole; the second, of those who pay the next highest amount down to the limits of the second third; the third of all the lowest taxed, who, together, complete the last class. Direct electors may be nominated in each division of the circle from the number of persons entitled to vote indirectly, without regard to special divisions. The representatives are chosen by the direct electors. The legislative period of the Abgeordnetenhaus is limited to five years. Every Prussian is eligible to be a member of the second Chamber who has completed his thirtieth year, who has not forfeited the enjoyment of full civic rights through a judicial sentence, and who has paid taxes during three years to the State. The Chamber must be re-elected within six months of the expiration of the legislative period, or after being dissolved. In either case former members are re-eligible. The Landtag is to be regularly convoked by the king during the month of November, and in extraordinary session as often as circumstances may require. The opening and closing of the Landtag must take place by the king in person, or by a minister appointed by him. Both Chambers are to be convoked,

opened, adjourned, and prorogued simultaneously. Each Chamber has to prove the qualification of its members, and to decide thereon. Both Chambers regulate their order of business and discipline, and elect their own presidents, vice-presidents, and secretaries. Functionaries do not require leave of absence to sit in the Chamber. When a member accepts paid functions, or a higher office connected with increased salary, he vacates his seat and vote in the Chamber, and can only recover the same by a new election. No one can be a member of both Chambers. The sittings of both Chambers are public. Each Chamber, at the proposition of the president or of ten members, may proceed to secret deliberation. Neither Chamber can adopt a resolution when the legal majority of its members is not present. Each Chamber has a right to present addresses to the king. No one can deliver a petition or address to the Chambers, or to either of them, in person. Each Chamber can refer documents addressed to it to the ministers, and demand explanations relative to complaints contained therein. Each Chamber has the right to appoint commissions of investigation of facts for its own information. The members of both Chambers are held to be representatives of the whole population. They vote according to their free conviction, and are not bound by prescriptions or instructions. They cannot be called to account, either for their votes or for opinions uttered by them in the Chambers. No member of the Chambers can, without its assent, be submitted to examination or arrest for any proceeding entailing penalties, unless seized in the act, or within twenty-four hours of the same. All criminal proceedings against members of the Chambers, and all examination and civil arrest, must be suspended during the session, should the Chamber whom it may concern so demand. Members of the Abgeordnetenhaus receive and must accept travelling expenses and diet money from the State, according to a scale fixed by law, amounting to 15 marks, or 15 shillings, per day.

Lower House (elected May, 1913), composed as follows :—Conservatives, 148 ; Free Conservatives, 53 ; National Liberals, 74 ; Progressives, 40 ; Centre, 103 ; Poles, 12 ; Socialists, 10 ; Independents, 3.

The executive government is carried on by a Staatsministerium, or Ministry of State, the members of which are appointed by the king, and hold office at his pleasure. The Staatsministerium is divided into nine departments, as follows :—

1. *President of the Council of Ministers, Minister of State, Minister of Foreign Affairs, and Imperial Chancellor.*—Dr. von Bethmann-Hollweg.

2. *Minister of State and Minister of Finance.*—Dr. Lentze ; appointed August, 1910.

3. *Minister of State, Vice-President of the Council of Ministers, and Minister of Public Works.*—von Breitenbach, born 1856 ; appointed June, 1906.

4. *Minister of Ecclesiastical Affairs and Instruction.*—Dr. von Trotz zu Solz ; appointed July, 1909.

5. *Minister of Agriculture, Domains, and Forests.*—Dr. Frhr. von Schorlemer ; appointed 1910.

6. *Minister of Justice.*—Dr. Besler, appointed November, 1905.

7. *Minister for Interior.*—Von Löbell, appointed May 1, 1914.

8. *Minister of Commerce and Industry.*—Dr. Sydow ; appointed October, 1909.

9. *Minister of State and Minister of War.*—Lieutenant-General von Stein ; appointed October 23, 1916.

The salary of the President of the Council is 54,000 marks, and that of

each of the other ministers 36,000 marks, and, since 1905, 14,000 marks "representation-money."

For local government Prussia is divided into Provinces, Government districts (*Regierungsbezirke*), urban circles (*Stadtkreise*), and rural circles (*Landkreise*). Urban circles consist of towns of over 25,000 inhabitants; rural circles consist of the smaller towns, rural communes (*Landgemeinden*), and manors (*Gutsbezirke*). For provinces and rural circles the local authorities of the constituent areas elect deliberative assemblies which appoint executive committees. Each province has a governor (*Oberpräsident*); each government district has a president, and deals chiefly with local affairs of State concern. In towns the deliberative authority is the town council (*Stadt-verordnetenversammlung*), elected on the 3-class system of property suffrage. The executive is a magistracy with the burgher-master as president. Each rural circle has a *Landrat*. Local administrative business varies according to the nature of the administrative division. The matters dealt with are such as poor-relief, roads, light railways, &c., but in rural districts they include agricultural interests, and in towns, education, sick-insurance, valuation, collection of certain taxes, mustering of recruits, management of gas, water, and electric works, &c. The Crown controls the administration of all the administrative areas.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

Provinces	Area : Square Miles	Population		Pop. per Square Mile, 1910
		1910	1905	
East Prussia (Ostpreussen) . . .	14,320	2,064,175	2,030,176	144·1
West Prussia (Westpreussen) . . .	9,863	1,703,474	1,641,874	172·7
Berlin . . . . .	24	2,071,257	2,040,148	86,279·0
Brandenburg . . . . .	15,376	4,092,616	3,531,856	266·1
Pomerania (Pommern) . . . . .	11,629	1,716,921	1,684,345	147·6
Posen . . . . .	11,190	2,099,831	1,986,637	187·6
Silesia (Schlesien) . . . . .	15,569	5,225,962	4,942,725	335·6
Saxony (Sachsen) . . . . .	9,752	3,089,275	2,979,249	315·7
Schleswig-Holstein <sup>1</sup> . . . . .	7,340	1,621,004	1,504,248	220·8
Hanover (Hannover) . . . . .	14,862	2,942,436	2,759,245	197·9
Westphalia (Westfalen) . . . . .	7,504	4,125,096	3,618,090	528·6
Hesse-Nassau . . . . .	6,060	2,221,021	2,070,052	366·5
Rhine (Rheinprovinz) . . . . .	10,420	7,121,140	6,436,337	683·4
Hohenzollern (Hohenzollernsche Lande) . . . . .	441	71,011	68,282	141·0
Total . . . . .	134,650	40,165,219	37,293,264	298·2

<sup>1</sup> Including Heligoland.

Development of Prussia since 1875 :—

Year	Area in Sq. Miles	Population	Average per Sq. Mile	Percentage of Annual Increase
1875	134,179	25,742,404	191·8	—
1890	134,537	29,957,367	222·7	1·1
1900	134,622	34,472,509	256·1	1·5
1905	135,134	37,293,264	275·9	1·59
1910	135,134	40,165,219	297·0	1·54

Estimated population in 1916, 41,052,718.

The population living in towns and that not in towns in 1905 and 1910 were as follows :—

—	1910	1905 <sup>1</sup>	Annual increase per cent. 1905-1910.
Town population . . . . .	18,963,785	17,378,965	1.74
Country population . . . . .	21,201,434	19,914,299	1.25

<sup>1</sup> Of the same areas as in 1910.

Urban and rural population:—

Census	No. of Towns	Nos. Rural Communes <sup>1</sup>	Towns and Communes, with 2,000 Inhabitants and upwards			Communes, &c., with less than 2,000 Inhabitants		
			No.	Pop.	Per Ct.	No.	Pop.	Per Ct.
1895	1,266	52,518	1,840	16,384,323	51.4	51,944	15,470,800	48.6
1900	1,266	52,117	1,968	19,144,609	55.5	51,415	15,327,900	44.5
1905	1,279	51,743	2,088	21,904,493	58.7	50,934	15,388,771	41.3
1910	1,276	51,338	2,168	24,687,490	61.5	50,446	15,477,929	38.5

<sup>1</sup> Including 16,143 separate 'Gutsbezirke' in 1895; 15,955 in 1900; 15,672 in 1905; 15,368 in 1910.

Conjugal condition 1910 :—

	Males	Females	Total
Unmarried . . . . .	12,161,517	11,517,281	23,678,798
Married . . . . .	7,154,129	7,162,027	14,316,156
Widowed . . . . .	500,917	1,583,157	2,084,074
Divorced or separated . . . . .	31,162	55,029	86,191

The division of the population according to occupation is shown in the section relating to the *German Empire*.

In 1910 the number of foreigners (exclusive of other Germans) resident in Prussia was 688,839, of whom 322,962 were Austrians and Hungarians, 137,440 Dutch, 90,667 Russians, 20,206 Danes, 7,602 Swedes and Norwegians, 9,898 British, 10,703 Belgians, 8,832 Americans (United States), 23,029 Swiss, and 4,283 French.

## II. MOVEMENT OF THE POPULATION.

Year	Marriages	Total Births	Still-born	Illegitimate	Total Deaths incl. Still- born	Surplus of Births
1909	307,904	1,287,234	37,995	100,134	705,877	581,357
1910	310,415	1,256,794	37,175	98,695	675,237	581,557
1911	321,151	1,225,300	35,884	97,705	732,826	492,474
1912	328,340	1,222,333	35,933	101,379	672,306	550,027
1918	323,709	1,209,500	35,970	—	656,490	553,010
1914	286,197	1,202,528	35,948	—	802,776	399,752

In 1914 2.82 per cent. of the total births in rural districts and 3.22 per cent. in urban areas were stillborn, and 6.51 per cent. in rural districts and 11.54 per cent. in urban areas were illegitimate.

The emigration from Prussia by German ports and Antwerp was in 1910, 14,021; in 1911, 11,835; in 1912, 9,645; in 1913, 12,772 (7,592 men and 5,180 women). Of the total number in 1913, 10,986 went to the United States.

Absolute religious liberty is guaranteed by the Constitution. Nearly two-thirds of the population are Protestants, and rather over one-third Roman Catholics. In 1910, the numbers were: Protestants, 24,830,547; Roman Catholics, 14,581,829; other Christians, 189,887; Jews, 415,926; others and unknown, 147,030. Catholics are in a majority only in West Prussia, Posen, Silesia, Westphalia, Rhine Province, and Hohenzollern.

**Instruction.**

Education in Prussia is compulsory. Every town, or community in town or country, must maintain a school supported by local rates, supplemented by the State, and administered by the local authorities, who are elected by the citizens, and called aldermen or town councillors. All parents are compelled to have their children properly taught or to send them to one of these elementary schools, in which all fees are now abolished. No compulsion exists in reference to a higher educational institution than elementary schools, but parents who send more than one child to any school supported by the community have, in many cases, a reduction made in the charge, and a limited number of pupils (about 10 per cent.) whose parents cannot afford to pay the full rate either enjoy this reduction or are admitted entirely free, at the discretion of the authorities. The school age is from 6 to 14 years, and the number of children of that age in 1910 was returned at 7,165,744.

The following table gives the educational statistics of Prussia:—

	No.	Teaching Staff	Students or Pupils
Universities (1913-14) <sup>1</sup>	10 <sup>4</sup>	1,997 <sup>5</sup>	29,710 <sup>8</sup>
Gymnasias & Progymnasias <sup>2</sup> (1914-15) <sup>1</sup>	370	7,193	104,349
Realgymnasias, Realprogymnasias, and Higher Realschulen (1913-14) <sup>1</sup>	353	6,136	118,874
Realschulen <sup>2</sup> (1913-14) <sup>1</sup>	181	1,459	33,027
High schools for girls (Lyceums), public and private (1914-15) <sup>1</sup>	481	10,685 <sup>6</sup>	168,137
Middle schools, public (1911) <sup>3</sup>	629	7,154	193,429
" " private (1911) <sup>3</sup>	924	5,646	62,265
Public elementary schools (1911)	38,684	163,016 <sup>7</sup>	6,572,074
Private " (1911)	263	553	8,498
Public normal schools (1915)	204	1,469	11,820

<sup>1</sup> Winter half-year. <sup>2</sup> Including teachers and scholars of preliminary schools. <sup>3</sup> Including girls' schools not officially recognised. <sup>4</sup> Excluding Lyceum at Braunsberg with 13 teachers and 89 students. <sup>5</sup> Including lecturers and special teachers. <sup>6</sup> Including regular technical and assistant teachers. <sup>7</sup> Including technical and assistant teachers, but excluding teachers of religion. <sup>8</sup> Including 2,159 women students.

There are also 5 technical high schools (Berlin, Hanover, Aachen, Danzig, Breslau), 2 forestry schools (Eberswalde, Münden), 2 technical mining schools (Berlin, Klausthal), 2 agricultural high schools (Berlin, Poppelsdorf), agricultural institutes connected with universities, 2 veterinary high schools (Berlin, Hanover), a great number of other schools for various aspects of agriculture, 4 commercial high schools (Berlin, Cöln, Posen, Königsberg i. Pr.), 2 academies of local government work (Düsseldorf and Cologne), besides other special schools and State establishments for art and music.

The Universities, the high schools (exclusive of commercial high schools), some of the Gymnasias, Realgymnasias, and similar schools, as also the normal schools, are maintained and administered by the Government, while all the other scholastic institutions are supported by the community, &c., under control of the Government. (For number of professors, teachers, and students at each of the Universities of Prussia, see under *German Empire*.)

The whole of the educational establishments (exclusive of agricultural and some technical institutes) in Prussia are under the control of the Minister of Public Instruction and Ecclesiastical Affairs, but there is a local supervision for every province. The administration of each of these, as regards the *Regierungs-Bezirke*, is vested in a President, who is the head of the Civil Government (*Regierung*); while the management of the higher (secondary) schools and the normal schools belongs to the Provincial Schul-Collegium, under the supervision of the Oberpräsident, who is the head of the Civil Government of the province. As a general rule, the administration of school funds provided by the State is under the control of the Civil Government, which likewise takes upon itself nearly the whole management of the lower and elementary schools, while the Schul-Collegium is responsible for the higher schools and the normal schools, for the general system of instruction and discipline therein, the proper selection of school books, the examination and appointment of masters, and the examination of those who leave school for the Universities.

According to the Constitution of 1850, all persons are at liberty to teach, or to form establishments for instruction, provided they can produce to the authorities the prescribed proofs of their moral, scientific, and technical qualifications. Both private and public establishments for education are placed under the superintendence of the Minister of Public Instruction, while all public teachers are considered, directly or indirectly, State servants.

### Justice, Crime.

Prussia contains 14 Oberlandesgerichte (see under *German Empire*). The Oberlandesgericht at Berlin is called the *Kammergericht*, and serves as an ultimate appeal court for summary convictions; though for all cases the court of final instance is the Reichsgericht at Leipzig. The prosecution in all criminal cases is conducted by *Staatsanwälte*, or public prosecutors, paid by the State. In 1912 there were 364,395 persons convicted of crime in Prussia.

### Finance.

Effective, ordinary and extraordinary revenue and expenditure for years ending March 31 following the year indicated in the table (20 marks = £1):—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Marks	Marks		Marks	Marks
1913 <sup>1</sup>	4,240,750,000	4,240,750,000	1916 <sup>1</sup>	4,816,363,929	4,816,363,929
1914 <sup>1</sup>	4,477,890,000	4,477,890,000	1917 <sup>1</sup>	4,810,431,641	4,810,431,641
1915 <sup>1</sup>	4,846,239,109	4,846,239,109	1918 <sup>1</sup>	5,160,765,721	5,160,765,721

<sup>1</sup> Estimates.

## Budget estimates for year ending March 31, 1918 :—

Revenue	1917-18	Expenditure	1917-18
	Marks		Marks
Direct taxes . . . . .	486,073,200	Public Debt . . . . .	502,839,175

State Bank (Seehandlung) . .	4,470,900	Expenditure . . . . .	154,010,813
State Mines . . . . .	422,483,420	Appanages, etc. . . . .	108,290,394
State Railways . . . . .	2,895,425,000	Ministry of State . . . .	5,114,593
Dotations and financial		„ Foreign Affairs . . . .	602,400
administration . . . . .	613,938,452	„ Finance . . . . .	109,022,114
		„ Public Works . . . . .	48,826,488
		„ Trade & Industry . . . .	25,713,654
		„ Justice . . . . .	214,688,000
		„ Interior . . . . .	156,876,801
		„ Agriculture . . . . .	54,097,378
		„ Education . . . . .	277,804,411
Total ordinary (in-		Total ordinary (in-	
cluding various) . . . . .	5,159,149,721	cluding various) . . . . .	4,955,731,269
Total extraordinary . . . .	6,616,000	Total extraordinary . . . .	205,034,482
Grand total . . . . .	5,160,765,721 (258,038,286L.)	Grand total . . . . .	5,160,765,721 (258,038,286L.)

Since April 1, 1895, only the income tax, a new supplementary tax (Vermögenssteuer), and the tax “vom Gewerbebetriebe im Umherziehen” are direct State-taxes; the land-tax, the house-tax, and the trading-tax are received by the communes.

The expenditure for the army and navy is not entered in the budget of Prussia, but forms part of the budget of the Empire.

Public debt on April 1, 1915, and 1916 :—

	1915	1916
	Marks	Marks
National debt bearing interest:		
Consolidated debt at 4 per cent. . . . .	1,921,211,500	1,911,382,000
„ „ 3½ per cent. . . . .	6,082,683,850	6,076,689,150
„ „ 3 per cent. . . . .	1,403,755,000	1,383,755,000
Treasury bonds . . . . .	1,385,000,000	1,347,500,000
State railway debt . . . . .	81,365,895	77,639,784
Debt of provinces annexed in 1866 . . . .	2,763,092	2,716,334
Total national debt . . . . .	10,876,784,337 (543,839,216L.)	10,799,682,868 (539,984,143L.)

The charges for interest, amortisation, and management of the debt amounted to 24,189,078L. in the financial year 1916.

**Army.**—The conditions of service have been already described under *German Empire*. The total peace strength of the Prussian army at the present time is about 480,000 of all arms and ranks.

## Production and Industry.

### I. AGRICULTURE.

The areas under the chief crops for 2 years, and the yield in metric tons, for 3 years, were as follows (1 hectare = 2·47 acres; 1 metric ton = 2,204 lbs.) :—

—	1913	1913	1914	1914	1915
	Acres	Tons	Acres	Tons	Tons.
Wheat . . . . .	2,915,000	2,942,647	2,935,805	2,521,263	2,382,637
Rye . . . . .	12,837,000	9,845,155	12,065,367	8,098,553	6,988,335
Summer barley . . . . .	2,230,000	2,107,158	2,083,162	1,806,704	1,858,344
Oats . . . . .	7,357,000	6,559,911	7,228,820	6,067,589	4,015,815
Potatoes . . . . .	5,822,000	39,215,298	5,749,885	33,040,026	38,590,914
Hay (meadow) . . . . .	7,782,000	14,001,132	7,588,230	13,765,989	10,888,915

In 1913 there were vineyards on 43,040 acres, yielding 4,801,808 gallons of wine, and in 1914, on 42,465 acres, yielding 4,912,644 gallons; hops (1915) on 2,230 acres, yielding 5,789 tons. On December 1, 1915, Prussia contained live stock comprising 2,444,897 horses (including army horses), 11,776,765 cattle, 3,505,657 sheep, 11,803,268 swine, and 2,096,381 goats.

## II. MINERALS.

Quantities (in metric tons) and values (in marks) of the coal and iron ore raised, and of the pig-iron produced in 1912 and 1913:—

—	1912		1913	
	Tons	Marks	Tons	Marks
Coal . . . . .	165,302,784	1,722,559,629	180,057,671	2,007,450,000
Lignite . . . . .	65,803,959	130,467,673	70,051,871	140,470,000
Iron ore . . . . .	5,238,766	18,132,970	5,669,786	51,971,000
Salt . . . . .	399,834	1,398,167	581,970	2,767,000

In 1913 the numbers employed in and about mines in Prussia were: Underground workers, 516,603; surface workers, 184,702; boys (under 16), 25,623; females, 9,389; total (all workers), 763,368.

**Commerce.**—The trade of Prussia forms an important part of the general trade of the German customs district (Zollgebiet). This is carried on through the various ports of the Baltic and North Seas, through many navigable rivers and canals, and an extensive network of roads, railways, telegraphs, and telephones. There are 92 chambers and corporations of commerce in the large towns of the Kingdom. There are no separate statistics for the trade of Prussia; it is included in that of Germany.

**Internal Communications.**—On April 1, 1912, the length of the system open for traffic was as follows: State owned, Broad gauge, main lines, 13,727 miles; broad gauge, local lines, 9,910 miles; total broad gauge, 23,637 miles. Narrow gauge, 149 miles. Total length of State lines, 23,786 miles. Private lines, 1,826 miles. Total railway mileage, 25,612. On April 1, 1916, the total was 24,954 miles. Plans for the electrification of main railway lines were being steadily pushed on before the war. The line between Dessau and Bitterfeld was the first to be electrified. Total receipts on the railways in 1915–16, 2,568·33 million marks; total expenditure, 1,826·87 million marks; surplus 741·46 million marks; capital sunk, 13,521·38 million marks.

**Savings Banks.**—In 1914 there were 1,760 savings banks in Prussia, with deposits amounting to 681,942,000*l.*, which works out at about 16*l.* per head of the population.

## REUSS, Elder Branch.

## (FÜRSTENTHUM REUSS—ÄLTERE LINIE.)

The reigning Prince is **Heinrich XXIV.**, born March 20, 1878; succeeded his father **Heinrich XXII.**, who died April 19, 1902. Sisters of the reigning prince are *Emma*, born Jan. 17, 1881; married May 14, 1903, to *Erck*, Count of Künigl; *Marie*, born March 26, 1882; married Feb. 4, 1904, to *Ferdinand*, Baron Gnagnoni; *Hermine*, born Dec. 17, 1887; married Jan. 7, 1907, to *Johann Georg*, Prince of Schönaich-Carolath; *Ida*, born Sept. 4, 1891; married November 7, 1911, to *Martin Christopher*, Prince of Stolberg-Rossla.

The *Regent* of the Principality since Oct. 15, 1908, is Prince **Heinrich XXVII.**, reigning Prince of Reuss-Gera.

The princely family of Reuss traces its descent to the old prefects of Weida, who were imperial functionaries and afterwards free lords. All the heads of the house, ever since the commencement of the eleventh century, have been called Heinrich. In the year 1701 it was settled, in a family council, that the figures should not run higher than a hundred, beginning afterwards again at one. The present sovereign of Reuss-Greiz has no civil list, but a great part of the territory over which he reigns is his private property.

The Constitution, bearing date March 28, 1867, and amended May 18, 1913, provides for a legislative body of 15 members, 3 nominated by the sovereign, 2 by the possessors of large estates, 3 elected for 6 years by towns, 4 by rural districts, the Mayors of Greiz and Zeulenroda respectively, and 1 representative of the Chairmen of district councils. The public revenue and expenditure for 1916 were estimated at 124,078*l*. There is no public debt.

Area, 122 square miles ; population (1910), 72,769.

The population is mainly Protestant, only 1,205 being Catholic. The capital, Greiz, has (1910) 23,245 inhabitants.

## REUSS, Younger Branch.

(FÜRSTENTHUM REUSS—JÜNGERE LINIE.)

The reigning Prince is **Heinrich XXVII.** born Nov 10, 1858 ; the son of Prince Heinrich XIV. and of Princess Agnes ; succeeded his father March 29, 1913 ; married November 11, 1884, to Princess Elise, born September 4, 1864, daughter of Prince Hermann of Hohenlohe-Langenburg. Offspring : I. Princess Victoria, born April 21, 1889. II. Princess Luise Adelheid, born July 17, 1890. III. Prince Heinrich XLV., born May 13, 1895. *Sister of the Reigning Prince* : Princess *Elisabeth*, born October 27, 1859 ; married November 17, 1887, to Prince Hermann of Solms-Braunfels ; widow, August 30, 1900.

The reigning house forms a younger branch of the Reuss family. As in Reuss-Greiz, a great part of the territory of the Principality is the private property of the reigning family.

All the princes are called Heinrich, and to distinguish them they have numbers attached to their names, beginning and ending in each century. Number I. is given to the first prince of the branch born in the century, and the numbers follow in the order of birth until the century is finished, when they begin again with number I.

The Principality has a Constitution, proclaimed November 30, 1849, and modified April 14, 1852, June 20, 1856, and January 8, 1913. Under it restricted legislative rights are granted to a Diet of twenty-one members, of whom three are elected by those paying the highest income-tax, and seventeen by the inhabitants in general, in each case for 4 years. The head of the collateral Reuss-Köstritz family is hereditarily a member. The Prince has the sole executive and part of the legislative power. In the administration of the State a cabinet of three members acts under his direction.

For each of the years 1916-18 the estimated revenue was 148,673*l.* and estimated expenditure 161,883*l.* Public debt (1916), 52,027*l.*

Of the total population (152,752 in 1910), 147,272 were Evangelical, 3,498 Catholic, 779 other Christians, 375 Jews, 828 not included in these sects. The capital, Gera, has (1910) 49,276 inhabitants.

## SAXE-ALTENBURG.

(HERZOGTUM SACHSEN-ALTENBURG.)

The reigning Duke is **Ernst II.**, born August 31, 1871 ; the son of Moritz (brother of the late Duke Ernst) and Augusta, Princess of Saxe-Meiningen ; succeeded to the throne February 7, 1908, on the death of his uncle ; married February 17, 1898, to Princess Adelheid of Schaumburg-Lippe, born September 22, 1875. Offspring, Princess Charlotte Agnes, born March 4, 1899 ; Prince Georg-Moritz, born May 13, 1900 ; Princess Elisabeth, born April 6, 1903 ; Friedrich-Ernst, born May 15, 1905.

There was a separate Duchy of Saxe-Altenburg from 1603 till 1672, but its territories were afterwards incorporated with Saxe-Gotha until 1826, when the Duke of Hildburghausen, which had been a separate Duchy since 1680, exchanged Hildburghausen for Altenburg, and became Duke Frederick of Saxe-Altenburg. In 1874 the Duke resigned his right to a civil list, in exchange for a charge upon the State or crown-domains (*Domänenfideicommiss*).

According to the Constitution, formulated April 29, 1831, amended in 1848, 1849, and May 31, 1870, the legislative authority is vested in a Chamber of thirty-two representatives, elected for three years, nine chosen by the highest taxed inhabitants, eleven by the inhabitants of towns, and twelve by those of rural districts. The Chamber meets once at least in each financial period.

The executive is divided into four departments, namely—1, of the Ducal House, Foreign Affairs, Worship; 2, of Justice; 3, of the Interior; 4, of Finance. The budget is voted for three years, estimates for the period 1914-1916, revenue and expenditure, 284,752*l.* Two-thirds of the revenue are derived from the State domains and the remainder from direct taxes. Public debt, 1914, 44,370*l.*, which the funds of the State (exclusive of reserve funds in the "*Landesbank*") exceeded by 283,127*l.*

Population, 1910, 216,128. In 1910, 207,825 Protestant, 7,246 Catholic. The capital, Altenburg, had 39,976 (1910) inhabitants. Many of the inhabitants are of Slavonic origin. The peasants of the "*Ostkreis*" (eastern part of the Duchy) are reputed to be more wealthy than those of any other part of Germany, and the rule prevails among them of the youngest son becoming the heir to the landed property of the father. Estates are kept for generations in the same family, and seldom parcelled out. The rural population, however, has been declining in numbers for the last thirty years.

Gymnasia, Realschule, and teachers' seminaries, 1913, 1,338 pupils; *Bürgerschulen* 5,620 pupils (2,845 boys and 2,775 girls); 204 public elementary schools, 655 teachers (60 female) and 37,268 pupils. Annual expenditure on elementary schools, 95,496*l.*, of which 21,435*l.* was provided by the State.

## SAXE-COBURG AND GOTHA.

(HERZOGTHUM SACHSEN-COBURG-GOTHA.)

The reigning Duke is **Charles Edward** (H.R.H. Duke of Albany), born July 19, 1884, son of the late Leopold Duke of Albany, and Princess Helena of Waldeck and Pyrmont, succeeded his uncle, Alfred, July 30, 1900; married October 11, 1905, to Princess Victoria Adelheid, daughter of Duke Friedrich Ferdinand of Schleswig-Holstein-Sonderburg-Glücksburg; offspring: Prince Johann Leopold, born August 2, 1906; Princess Sibylla Kalma Marie, born January 18, 1908; Prince Dietmar Hubert, born August 24, 1909; Princess Caroline Mathilda, born June 22, 1912.

Sister of the Duke is Princess *Alice*, born February 25, 1883 ; married February 10, 1904, to Prince Alexander of Teck.

The immediate ancestor of the reigning family of Saxe-Coburg and Gotha was Duke John Ernst, seventh son of Duke Ernst the Pious, who succeeded his brother Albrecht, Ernst's second son, in 1699, in the Duchy of Saxe-Coburg, to which he added Saalfeld. John Ernst's two sons ruled in common, under the title Dukes of Saxe-Coburg-Saalfeld ; but their single successor Ernst Frederick I. (1764-1800) introduced the principle of primogeniture. On the extinction of the line of Saxe-Gotha-Altenburg in 1825, Ernst I. received, in 1826, Gotha in exchange for Saalfeld, which was assigned to Saxe-Meiningen, and assumed the title of Ernst I. of Saxe-Coburg and Gotha. The family is in possession of a large private fortune, accumulated chiefly by Duke Ernst I., to whom the Congress of Vienna made a present of the Principality of Lichtenberg. This Principality he sold, September 22, 1834, to the King of Prussia, for a sum of two million thalers, and other advantages. According to an agreement of July 19, 1905, the income of the Gotha domains is divided between the Duke and the State. The Duke further receives one-half of the excess of revenue over expenditure from the Coburg domains.

The fundamental law of the two Duchies, proclaimed May 3, 1852, vests the legislative power in the Duke in conjunction with two separate chambers, one for the Duchy of Coburg and the other for the Duchy of Gotha. For the common affairs of the two Duchies the two Chambers meet in common. The Coburg Chamber consists of eleven, and that for Gotha of nineteen members, chosen in as many electoral divisions, by the indirect vote of all the electors. Every man above the age of twenty-five who pays direct taxes has a vote, and every fully-qualified citizen above thirty may be elected a deputy to the Landtag or Chamber. Deputies resident in Coburg or Gotha receive six marks per diem, the others ten marks per diem and travelling expenses. New elections take place every four years. The two assemblies meet separately, regularly in the first and last years of their duration, otherwise when necessary ; the 'United Parliament' meets alternately at the towns of Coburg and of Gotha.

Area of Coburg, 216 sq. miles ; of Gotha, 546 sq. miles ; total area, 762 sq. miles. Population of Coburg (1910), 74,818 (36,064 males and 38,754 females) ; of Gotha, 182,359 (89,266 males and 93,093 females) ; total population, 257,177 (125,330 males and 131,847 females).

The domain budget is voted for four years for Coburg. The annual domain revenue for Coburg 1913-17 is estimated at 27,650*l.*, and expenditure 17,000*l.* The special State revenue and expenditure for the year ending March 31, 1917, for Coburg, is revenue 79,965*l.* expenditure 80,502*l.* ; and for Gotha, revenue 252,300*l.*, expenditure 253,150*l.* ; while the common State-revenue and expenditure (1916-17) of Coburg and Gotha was 88,650*l.* Public debt, 1916, 130,212*l.* for Coburg, and 221,406*l.* for Gotha, both being largely covered by real property and stocks. In 1910 there were 250,454 Protestant, 4,951 Catholic, and 319 other Christians ; 783 Jews, and 670 persons of other religion. The chief towns, Gotha and Coburg, have respectively 39,553 and 23,789 inhabitants (1910).

## SAXE-MEININGEN.

(HERZOGTUM SACHSEN MEININGEN.)

The reigning Duke is **Bernhard**, born April 1, 1851 ; the son of Duke George II., and Princess Charlotte of Prussia. Succeeded, on the death of his father, June 25, 1914. Married, February 18, 1878, to Princess Charlotte, eldest daughter of the late German Emperor Friedrich III. (and sister of the present German Emperor). *Offspring* : Feodora, born May 12, 1879 ; married September 24, 1898, to Prince Henry XXX. of Reuss,

Younger Branch. Heir apparent, Prince *Ernst* (Duke's step-brother), born September 27, 1859; marriedmorganatically Sept. 20, 1892, to Katharina Jensen, Baroness von Saalfeld. Next in succession is Prince *George*, born October 11, 1892; son of Prince Friedrich, brother of the reigning duke, born October 12, 1861; killed at Charleroi, August 23, 1914.

The line of Saxe-Meiningen was founded by Duke Bernhard, third son of Ernst I. of Saxony, surnamed the Pious, the friend and companion in arms of King Gustaf Adolf of Sweden. The Duchy was only one-third its present size up to the year 1826, when, by the extinction of the ancient family of Saxe-Gotha, the territories of Hildburghausen and Saalfeld fell to the father of the present Duke. The Duke has a civil list of 394,286 marks paid out of the produce of the State domains. Besides these he receives the half of the surplus revenue, which is estimated for each of the three financial years 1912-14 at 40,738*l.*

According to the Constitution, promulgated August 23, 1829, amended July 20, 1871, April 24, 1873, and March 9, 1896, there is a legislative organisation, consisting of one Chamber of twenty-four representatives; four elected by those who pay the highest land and property tax, and four by those who pay income tax on an income of 150*l.* or more; sixteen by all other inhabitants. There are new elections every six years.

Budget for each of the 3 financial years 1914-17, revenue, 529,772*l.*; expenditure, 448,580*l.*; 189,860*l.* of the revenue are drawn from State domains. Debt in 1914, 264,487*l.*, largely covered by productive State capital.

Population, 278,762 in 1910. In 1910, 271,433 Protestants; 5,233 Catholics; 1,137 Jews. The capital, Meiningen, had, in 1910, 17,186 inhabitants. In 1912 there were 2,388 marriages; 7,806 births alive; 4,348 deaths; surplus of births, 3,458. Of the births 245 (3.3 per cent.) were stillborn, and 996 (12.7 per cent.) illegitimate.

In 1913 there were 319 public elementary schools with 953 teachers (814 male, 139 female) and 49,605 (18.0 per cent. of the inhabitants) pupils.

## GRAND-DUCHY OF SAXONY.

(GROSSHERZOGTUM SACHSEN.)

The reigning Grand-duke is **Wilhelm Ernst**, born June 10, 1876, son of the late Prince Karl August and Princess Pauline of Saxe-Weimar; succeeded his grandfather, the late Grand-duke Karl Alexander, January 5, 1901; married, April 30, 1903, to **Caroline**, Princess of Reuss, who died January 17, 1905; married a second time, January 4, 1910, to **Feodora**, Duchess of Sachsen-Meiningen. Offspring (second marriage): (1) Princess Sophia, born March 20, 1911; (2) William Ernst (hereditary Grand-duke), born July 28, 1912; (3) a third son, born March 3, 1917.

The family of the Grand-duke stands at the head of the Ernestine or elder line of the princely houses of Saxony, which include Saxe-Meiningen, Saxe-Altenburg, and Saxe-Coburg-Gotha; while the younger, or Albertine line, is represented by the Kings of Saxony. In the event of the Albertine line becoming extinct, the Grand-duke of Weimar would ascend the Saxon throne. Saxe-Weimar was formed into an independent Principality in 1640. After a temporary subdivision the Principality was finally, on the death of the last duke of Eisenach, in 1741, united into a compact whole under Ernest Augustus (1728-1748), who introduced the principle of primogeniture. At the Congress of Vienna a considerable increase of territory, together with the title of Grand-duke, was awarded to Duke Karl August, known as a patron of German literature.

The Grand-duke has a large private fortune. He has also a civil list of 1,020,000 marks, or 51,000*l.*

The Constitution was granted May 5, 1816; slightly altered October 15, 1850. It was the first liberal Constitution granted in Germany. The legislative power is vested in a House of Parliament of one Chamber, composed of 38 members, five chosen by landowners having a yearly income of from 150*l.* upwards; five by other persons of the same income; one each from the University of Jena, the Chamber of Commerce, the Chamber of Handicrafts, the Chamber of Agriculture, and the Chamber of Labour: and twenty-three by the other inhabitants. All deputies are elected directly, and elections are held every six years. All citizens over twenty-five years of age have the franchise. The executive, acting under the orders of the Grand-duke, but responsible to the representatives of the country, is divided into three departments.

The budget is granted for a period of three years; from 1914 to 1916 annual income and expenditure, 713,152*l.* The State forests yield a large income, while there is a graduated tax on all incomes. Public debt, 83,631*l.* in 1914. The debt is more than covered by real property and stocks.

The Grand-duchy consists of the three detached districts of Weimar, Eisenach, and Neustadt, to which belong also 24 smaller exclaves. Population, December 1, 1910, 417,149. Marriages, 1912, 3,506; births, 12,123; deaths, 6,622; surplus of births, 5,501. Among the births, 348 (2·87 per cent.) were stillborn, and 1,464 (12·08 per cent.) illegitimate. In 1910, 48·94 per cent. lived in rural communes. Weimar, the capital, had 34,582 inhabitants in 1910; Eisenach, 38,362; Jena, 38,487; Apolda, 22,610.

In 1910 there were 393,774 Protestants, 19,980 Catholics, 1,323 Jews, 841 other Christians, and 1,231 not stated.

The University at Jena (see *Germany*) serves the four Saxon Duchies.

Saxe-Weimar contains two Landgerichte, while the district of Neustadt is subject to the jurisdiction of the Landgericht at Gera, common to Saxe-Weimar and the Reuss Principalities. The Oberlandesgericht at Jena is a common court of appeal for the four Saxon Duchies, Schwarzburg-Rudolstadt, the two Reuss Principalities, and parts of Prussia.

## KINGDOM OF SAXONY.

(KÖNIGREICH SACHSEN.)

**Reigning King.**—**Friedrich August III.**, born May 25, 1865, son of the late King Georg; succeeded to the throne on the death of his father, October 15, 1904; married November 21, 1891, to Princess Luise of Tuscany, born September 2, 1870. The marriage was dissolved February 11, 1903. Offspring: Prince Georg, born January 15, 1893; Prince Friedrich Christian, born December 31, 1893; Prince Ernst Heinrich, born December 9, 1896; Princess Margarethe, born January 24, 1900; Princess Maria Alix, born September 27, 1901; Princess Anna Monica, born May 4, 1903.

*Sisters and brothers of the King:* I. Princess Mathilda, born March 19, 1863. II. Princess Maria Josefa, born May 31, 1867; married October 2, 1886, to the late Archduke Otto of Austria, widow, November 1, 1906. III. Prince Johann Georg, born July 10, 1869;

married (1) April 5, 1894, to Duchess Maria Isabella of Württemberg (died May 24, 1904) (2) October 30, 1906, to Princess Maria Immaculata of Bourbon; and IV. Prince Max, born November 17, 1870; became a priest July 26, 1896.

The royal house of Saxony counts amongst the oldest reigning families in Europe. Heinrich of Eilenburg, of the family of Wettin, was Margrave of Meissen 1089-1103; he was succeeded by his son, Heinrich (1103-1123), and Konrad the Great (1123-1156), well known in Saxon history. The house subsequently spread into numerous branches, the elder of which, called the Ernestine line, is represented by the ducal families of Saxe-Altenburg, Saxe-Coburg-Gotha, and Saxe-Meiningen, and the grand-ducal family of Saxe-Weimar; while the younger, the Albertine line, lives in the rulers of the Kingdom of Saxony. In 1806 the Elector Friedrich August III. (1763-1827), on entering the Confederation of the Rhine, took from Napoleon the title of King of Saxony, which was confirmed by the Congress of Vienna in 1815. The predecessors of the present King were Friedrich August I. (1806-1827), Anton (1827-1836), Friedrich August II. (1836-1854), Johann (1854-1878), Albert (1873-1902), Georg (1902-1904).

King Friedrich August III. has a civil list of 3,741,902 marks per annum. Exclusive of this sum are the appanage of the Prince Johann Georg, and the appanage of the Princess Mathilde amounting (1914-15) to 349,554 marks. The formerly royal domains, consisting chiefly of extensive forests, became, in 1830, the property of the State.

**Constitution and Government.**—The Constitution dates from September 4, 1831; but has undergone alterations up to May 5, 1909. The crown is hereditary in the male line; but, at the extinction of the latter, also in the female line. The sovereign comes of age at the completed eighteenth year, and, during his minority, the nearest heir to the throne takes the regency. The legislature is jointly in the King and Parliament, the latter consisting of two Chambers. The Upper Chamber comprises the princes of the blood royal who are of age; one deputy of the (Lutheran) archbishopric of Meissen, the proprietor (or one deputy) of the 'Herrschaft' of Wildenfels, one of the proprietors of mediatised domains, now held by five owners, one deputy of the University of Leipzig, the two proprietors of 'Standesherrschaften,' the Lutheran 'Oberhofprediger' at Dresden, the Dean of the Roman Catholic Chapter of St. Peter at Bautzen in his character as 'Apostolic Vicar' at Dresden, the superintendent at Leipzig, one deputy of the collegiate institution of Wurzen, one of the proprietors of four estates in fee; twelve deputies elected by the owners of other nobiliar estates for life; ten noble proprietors and five other members without restriction nominated by the King for life; and the burgomasters of eight towns. The Lower Chamber is made up of forty-three deputies of towns and forty-eight representatives of rural communes. The qualification for a seat in the Upper House is the possession of a landed estate worth at least 4,000 marks a year, and the qualification for the right of electing to the same is the possession of a landed estate worth at least 3,000 marks a year; which qualification, however, is not required by the *ex officio* deputies of chapters and of the university. Members of the Lower House must be Saxon citizens over thirty, and pay some direct State taxes; and electors are all Saxon citizens above twenty-five years of age who pay some direct contribution. Every elector has a right to one, two, or three additional votes according to (1) the amount of his income; (2) the value of his landed property; (3) the possession of an income (by public officials) over a certain amount; (4) his right as an elector for the Chamber of Industry or the Chamber of Agriculture; (5) his scientific education; (6) his scientific or artistic profession; (7) his age (an elector over 50 years of age has an additional vote). The members of both Houses, with the exception of the hereditary and certain of the *ex officio* members, are each allowed 12 marks per day (6 marks per day if they reside in the town where the Legislature meets) during the sittings of Parliament, and an allowance for travelling expenses.

Both Houses may propose new laws ; no taxes can be imposed, levied, or altered without the sanction of both.

Last election, 1911 : Conservatives, 29 ; National Liberals, 26 ; Radicals, 10 ; Socialists, 26.

The executive is in the King and in the Ministry of State (*Gesammt-Ministerium*), and in the separate Ministries of Justice, of Finance, of the Interior, of Education and Ecclesiastical Affairs, of Foreign Affairs, and of War.

*President of the Council of Ministers.*—Dr. H. G. Beck, Minister of Education and Ecclesiastical Affairs.

### Area and Population :—

Governmental Divisions	Area, English Sq. Miles	Population.		Population per Sq. Mile 1910
		Dec. 1910	Dec. 1905	
Dresden . . . .	1,674	1,350,287	1,284,397	806·6
Leipzig . . . .	1,378	1,234,623	1,146,423	895·9
Bautzen . . . .	953	443,549	426,420	467·5
Chemnitz . . . .	799	920,543	851,130	1151·8
Zwickau . . . .	983	857,659	800,231	872·4
Total . . . .	5,787	4,806,661	4,508,601	830·6

Estimated population in 1914, 4,984,500, including 748,500 married women under 50.

The growth of the population is shown in the following table :—

Year	Population	Density per Sq. Mile	Annual Increase per Cent.	Year	Population	Density per Sq. Mile	Annual Increase per Cent.
1875	2,760,586	471	1·99	1900	4,202,216	726·8	2·19
1885	3,182,003	543	1·41	1905	4,508,601	779·1	1·46
1895	3,787,688	654·5	1·63	1910	4,806,661	830·6	1·32

The conjugal condition of the population was as follows in 1910 :—

—	Males	Females	Total
Children . . . .	784,656	790,512	1,575,168
Adults—			
Unmarried . . . .	553,954	557,231	1,111,185
Married . . . .	916,325	914,939	1,831,174
Widowed . . . .	54,793	193,603	248,396
Divorced or separated .	14,265	26,473	40,738

Saxony contains (1910) 43,358 Lusatian Wends, most of them in the district of Bautzen. In 1910 there were 188,469 foreigners (exclusive of Germans belonging to other German States).

The movement of the population is shown in the following table:—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1911	41,236	130,257	4,374	19,799	79,750	46,133
1912	41,692	129,707	4,293	20,279	69,566	55,848
1913	40,307	127,482	4,497	20,779	68,512	54,478

The population of the principal towns was, 1910 (including the municipalities incorporated up to July 1, 1913):—

Leipzig . . . . .	589,850	Zittau . . . . .	37,084	Reichenbach . . . . .	29,685
Dresden . . . . .	551,697	Freiberg . . . . .	36,237	Crimmitschau . . . . .	28,818
Chemnitz . . . . .	293,761	Meissen . . . . .	35,865	Meerane . . . . .	25,470
Plauen . . . . .	121,272	Bautzen . . . . .	32,754	Glauchau . . . . .	25,155
Zwickau . . . . .	73,542				

**Religion.**—Although the royal family is Roman Catholic, the vast majority of the inhabitants of Saxony are Protestants. In 1910, Lutherans, 4,518,041; Roman Catholics, 233,872; Reformists, 16,531; other Christians, 30,548; Jews, 17,587; unclassified, 6,613. Of the Lutheran Church, the chief governing body is the 'Landes-Consistorium' or National Consistory at Dresden; and it also has a representative Synod (*Synode*) with 35 clerical and 42 lay members (1901).

**Instruction.**—In 1912-13, there were 2,308 public Protestant and 56 Roman Catholic common schools, 48 private and chapter schools, and 1,959 advanced common schools (Fortbildungsschulen), or altogether 4,371, with a total attendance of 915,720. In addition there were 1 technical high school at Dresden (winter term, 1913-14, 1,247 students), 1 mining academy at Freiberg (382 students), 1 forestry academy at Tharandt (89 students), further, 19 Gymnasias, 19 Realgymnasias, 5 'Oberrealschulen,' 3 'Progymnasien,' 37 'Realschulen,' 28 seminaries, 5 higher girls' schools and 'Studienanstalten' (1913), altogether 110 educational establishments, with a total attendance of 33,412 (1913), exclusive of the University and a large number of industrial, commercial, agricultural, musical, and art institutes. The University of Leipzig is one of the largest in Germany. *See under Germany.*

**Justice, and Crime.**—Saxony has one 'Oberlandesgericht,' at Dresden, 7 'Landgerichte,' and 111 'Amtsgerichte.' The 'Reichsgericht' has its seat at Leipzig. In 1911, 33,189 persons were convicted of criminal offences.

**Finance.**—The financial period extends over a term of two years. The budget for each of the two years 1916-17 estimated the receipts from State property and taxes at 20,802,992*l.*, and the cost of working and of collection at 15,016,576*l.*, the surplus being 5,786,416*l.* Other receipts were estimated at 3,797,478*l.*, and expenditure at 9,583,894*l.* The total revenue and expenditure balanced at 24,600,470*l.* More than one-half of the total revenue is derived from domains, forests, and State railways. Public debt, 1916, 46,700,000*l.*, incurred almost entirely on railways and telegraphs, and other works of public utility.

**Production and Industry.**—Saxony is, in proportion to its size, the busiest industrial State in the Empire, rivalled only by the leading industrial provinces of Prussia. Textile manufactures form the leading branch of industry, but mining and metal working are also important.

In 1912, of the total area, 2,459,181 acres were under cultivation, viz. :— 2,017,888 acres (82·06 per cent.) arable; 424,605 acres (17·27 per cent.) meadow; 16,085 acres (0·65 per cent.) pasture; 603 acres (0·02 per cent.) vineyard; besides 950,256 acres under wood, of which 445,588 acres belonged to the State.

Areas under the chief crops in acres and the yield in metric tons (of 2,204 lbs.) in 1913 :—

Crop	Acres	Metric tons	Crop	Acres	Metric tons
Wheat . . .	167,797	192,188	Oats . . .	477,033	487,980
Rye . . .	525,483	490,315	Potatoes . . .	310,737	1,946,359
Barley . . .	55,880	57,100	Hay. . . .	424,605	840,656

The following shows the mining statistics for five years :—

		Coal Mines			Other Mines			Total	
Year	No. of Mines	Hands	Production in metric tons		Value in 1,000 marks	No. of Mines <sup>1</sup>	Hands	Produce in 1,000 marks	No. of Mines
			Coal	Lignite					
1909	103	32,437	8,209,000	75,915	24	2,159	1,558	127	34,596
1910	110	33,394	8,623,000	75,050	29	1,941	1,438	139	35,335
1911	108	32,984	5,056,000	4,325,000	76,580	28	1,622	1,318	136
1912	110	32,505	5,066,000	5,335,000	80,739	28	1,458	1,407	138
1913	91	30,845	5,445,291	6,310,439	87,171	—	—	—	—

<sup>1</sup> Exclusive of mines not worked.

In 1913-1914, 422 breweries produced 96,558,000 gallons of beer; and in 1912-13, 542 distilleries produced 2,758,470 gallons of pure alcohol.

In 1913 there were 361 savings banks having to the credit of their depositors at the end of the year, 97,708,855*l*.

## SCHAUMBURG-LIPPE.

(FÜRSTENTHUM SCHAUMBURG-LIPPE.)

The reigning Prince is **Adolf**, born February 23, 1883, son of Prince Stephen Georg; succeeded his father April 29, 1911. *Brothers and Sister* :—

1. Prince *Moritz*, born March 11, 1884.
2. Prince *Wolrad*, born April 19,

1887. 3. Prince *Stephan*, born June 21, 1891. 4. Prince *Heinrich*, born September 25, 1894. 5. Prince *Friedrich Christian*, born January 5, 1906. 6. Princess *Elisabeth*, born May 31, 1908.

*Uncles and Aunts of the Reigning Prince*.—1. Princess *Hermine*, born Oct. 5, 1845; married, February 16, 1876, to Maximilian, Duke of Württemberg, who died July 28, 1888. 2. Prince *Hermann*, born May 19, 1848. 3. Prince *Otto*, born Sept. 13, 1854; married (morg.) November 28, 1893, to Anna von Köppen, created Countess von Hagenburg. The reigning house of Lippe is descended from a count of the same name who lived in the sixteenth century.

Area, 131 sq. miles; population (1910), 46,652.

According to the Constitution, promulgated November 17, 1868, there is a legislative Diet of 15 members, two appointed by the Prince, one nominated by the nobility, one by the clergy, one by certain functionaries, and the rest elected by the people. To the Prince belongs part of the legislative and all the executive authority.

For the financial year 1916 the revenue and expenditure were 56,152*l*. Public debt, 19,975*l*.

Except 715 Catholics and 230 Jews, the inhabitants are Protestant. Buckeburg, the capital and residence of the prince, had, in 1910, 5,747 inhabitants.

#### OFFICIAL PUBLICATION.

Schaumburg-Lippische Landesanzeigen bezw. Landesverordnungen.

## SCHWARZBURG-RUDOLSTADT.

(FÜRSTENTUM SCHWARZBURG-RUDOLSTADT.)

The reigning Prince is *Günther*, born August 21, 1852, succeeded his cousin Prince Georg, Jan. 19, 1890; married December 9, 1891, to Princess Anna Luise of Schönburg-Waldenburg. The reigning prince is also reigning prince of Schwarzburg-Sondershausen.

The Schwarzburg-Rudolstadt line is a younger branch of the house of Schwarzburg, being descended from Albrecht VII., 1605, who died in the middle of the seventeenth century. The present sovereign has a civil list of 300,000 marks. The State domains are the property of the reigning family.

For all legislative measures the Prince has to obtain the consent of a Chamber of Representatives of sixteen members, four elected by the highest assessed inhabitants, and the rest returned by the general population. The deputies are elected for three years.

There are triennial budgets. For the period 1912-1916 the annual public income and expenditure were settled at 168,885*l*. each. Public debt (March 31, 1916), 191,578*l*., to cover which the State possesses property to the value of 56,061*l*.

Area, 363 sq. miles; population (1910), 100,702; Protestant (1910), 99,210; Catholics, 1,288; other Christian sects, 88; and Jews, 78. Rudolstadt, the capital, had (1910) 12,937 inhabitants.

## SCHWARZBURG-SONDERSHAUSEN.

(FÜRSTENTUM SCHWARZBURG-SONDERSHAUSEN.)

Since the decease on March 28, 1909, of Prince Karl Günther, the principality of Schwarzburg-Sondershausen has been united with Schwarzburg-Rudolstadt by a personal bond of union under the government of Prince

**Günther.** (See *Schwarzburg-Rudolstadt*.) In 1916 it was agreed to unite the two duchies and only the sanction of the Bundesrat is now required to make the measure constitutionally legal.

The princes of the house of Schwarzburg belong to a very ancient and wealthy family. The small territory of the house was left undisturbed at the Congress of Vienna. It is now administered by the State for its own use, and in return the Prince of Schwarzburg-Sondershausen receives an annual grant (*Domänenrente*) of 25,000*l*.

Restricted legislative rights are given to a Diet which consists of eighteen members, six appointed by the Prince, six elected by certain highly-taxed landowners and others, and six elected by the inhabitants in general. The sole executive and part of the legislative power is in the hands of the Prince, who exercises his authority through a Government divided into five departments.

For the years 1912 to 1916 the annual revenue and expenditure are estimated to amount to 170,887*l*. Public debt (April 1, 1913), 306,220*l*.

Area, 333 sq. miles; population (1910), 89,917, mostly Protestant. The chief towns, Sondershausen and Arnstadt, have respectively 7,759 and 17,841 inhabitants.

## WALDECK.

(FÜRSTENTUM WALDECK.)

Reigning Prince, **Friedrich**, born January 20, 1865; the son of Prince George Victor and Princess Helena of Nassau; succeeded at the death of his father, May 12, 1893; married, August 9, 1895, to Princess Bathildis of Schaumburg-Lippe; offspring: Prince Josias, born May 13, 1896; Prince Max, born September 13, 1898; Princess Helene, born December 22, 1899; Prince Georg Wilhelm, born March 10, 1902.

Brother and sisters of the reigning prince are:—I. Princess *Pauline*, born October 19 1855; married, May 7, 1881, to the Hereditary Prince Alexis of Bentheim-Steinfurt. II. Princess *Emma*, born August 2, 1858; married, January 7, 1879, King Willem III. of the Netherlands; widow, November 23, 1890. III. Princess *Helene*, born February 17, 1861; married, April 27, 1882, to Prince Leopold, Duke of Albany, son of Victoria, Queen of Great Britain; widow, March 28, 1884. IV. Princess *Elizabeth*, born September 6, 1873; married, May 3, 1900, to Alexander, hereditary Count of Erbach-Schönberg.

After the war between Austria and Prussia, at the end of 1866, a 'Treaty of Accession' was signed by the Prince on July 18, 1867, by which he surrendered his chief sovereign rights to King Wilhelm I. for ten years, retaining merely nominal power, and renewed November 24, 1877, till January 1, 1888. A Treaty, made March 2, 1887, continued the arrangement for the future, making it terminable on notice given.

According to the Constitution, promulgated August 17, 1852, there is a legislative assembly of fifteen members, with authority restricted to purely local affairs. In terms of the 'Treaty of Accession' all public officials are appointed by the King of Prussia, and take the oath of fidelity to him. Prussia also manages the finances of the Principality.

The revenue and expenditure for 1914 was 86,239*l*.; for 1915, 86,159*l*.; and for 1916, 81,992*l*.

The debt on July 1, 1916, was 63,745*l*.

Area, 433 sq. miles; population (1910), 61,707 (30,544 males and 31,163 females). Protestants, 57,817; Catholics, 2,858; other Christians, 393; Jews, 590; unclassified, 49. The residence town, Arolsen, had 2,793 inhabitants in 1910.

## WÜRTTEMBERG.

(KÖNIGREICH WÜRTTEMBERG.)

**Reigning King.**—**Wilhelm II.**, born February 25, 1848; son of the late Prince Friedrich of Württemberg (cousin of the late king Karl I.) and of the late Princess Katharine of Württemberg (sister of the late king); ascended the throne on the death of Karl I., October 6, 1891. Married (1), February 15, 1877, to Princess *Marie* of Waldeck-Pyrmont, who died April 30, 1882; issue: Princess *Pauline*, born December 19, 1877, married October 29, 1898, to Prince Friedrich of Wied. (2), April 8, 1886, to Princess *Charlotte* of Schaumburg-Lippe, born October 10, 1864.

The former Duchy of Württemberg became, with a large increase of territory, an electorate in 1803, and was erected into a Kingdom by the Peace of Pressburg, 1805, and by a decree of January 1, 1806. The civil list of the king amounts to 120,375*l.*, with additional grants of 2,185*l.* for the other members of the royal family.

**Constitution and Government.**—Württemberg is a constitutional hereditary Monarchy, the Constitution of which bears date September 25, 1819, but certain changes were made by the law of July 16, 1906. The Constitution vests certain powers in the Landstände, or two 'Estates' of the realm, called together at least every two years to discuss and sanction the estimates. In the first chamber are: 1. The princes of the Royal House; 2. the heads of princely or countly (gräflich) families to whose possessions a vote in the imperial or provincial diet was formerly annexed; also the heads of 2 other families conditionally; 3. members (not more than 6) appointed by the King; 4. 8 members of knightly rank; 5. 6 ecclesiastical dignitaries; 6. a representative of the University of Tübingen, and one of the technical high school of Stuttgart; 7. 2 representatives of commerce and industry, 2 of agriculture, and 1 of handicrafts. Total number of members in 1917, 54. The second chamber consists of: 1. a deputy from each district (Oberamtsbezirk); 2. 6 deputies from Stuttgart, and 1 from each of 6 other towns; 3. 9 deputies from the Neckar and Jagst circle, and 8 from the Black Forest and Danube circle. All the members of the second Chamber are chosen for 6 years, and they must be thirty years of age; property qualification is not necessary. The president of the Upper Chamber is appointed by the king, the vice-president is elected by the Chamber from among the mediatised princes and nobles (royal princes and life members being ineligible); the president and vice-president of the Second Chamber are both elected by the deputies. When the Chambers are not sitting they are represented by a committee of twelve persons, consisting of the presidents of both Chambers, two members of the Upper, and eight of the Lower House. A special court of justice, called the Staats-Gerichtshof, is appointed guardian of the Constitution. It is composed of a president and twelve members, six of whom, together with the president, are nominated by the king, while the other six are elected by the combined Chambers. Members of both Chambers receive 15 marks a day for attendance, a free pass over the railways, re-imbursement of incidental travelling expenses.

Last election, 1912: Conservatives, 20; German Party, 10; Socialists, 17; People's Party, 19; Centre, 26.

The executive is a Ministry of State of six ministerial departments. The

heads being the Ministers of Justice ; of Foreign Affairs and the Royal House, to whose province belongs also the administration of the State railways, posts, and telegraphs ; of the Interior ; of Ecclesiastical Affairs and Public Education ; of War ; and of Finance.

*President of the Council of Ministers.*—Dr. von Weizsäcker, Minister of Foreign Affairs and of the Royal House.

For administrative purposes the country is divided into 4 circles (Kreise). 64 districts (Oberämter), and 1,898 communes (Gemeinden).

### Area and Population:—

Circles	Area in Sq. Miles	Population		Population per Sq. Mile 1910
		1910	1905	
Neckar . . . . .	1,286	882,569	811,478	685·5
Black Forest (Schwarzwald) . . . . .	1,844	570,820	541,662	309·6
Jagst . . . . .	1,985	414,969	407,059	209·0
Danube (Donau) . . . . .	2,419	569,216	541,980	239·0
Total . . . . .	7,534	2,437,574	2,302,179	323·5

In 1910, there were 1,192,392 males and 1,245,182 females.

In 1910, 872,192, or 35·8 per cent., lived in communes of 5,000 inhabitants and upwards, and 1,565,382, or 65·5 per cent., in other communes. Foreigners, 25,848 in 1910. According to the last census of employment (1907), of the total population of 2,338,010, 882,421 were engaged in agricultural pursuits ; 934,971 in industry ; 224,077 in trade and commerce ; 10,971 in domestic service ; 124,431 in the army and the professions, and 161,139 without any calling.

The movement of the population for three years was:—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1910	17,449	74,016	1,985	6,146	43,611	30,405
1911	17,964	71,658	1,971	6,027	45,525	26,133
1912	18,356	73,170	2,045	6,669	41,183	31,987

The population in 1910 of the largest towns was as follows:—

Stuttgart <sup>1</sup> . . . . .	286,218	Göppingen . . . . .	22,373	Schwenningen . . . . .	15,411
Ulm . . . . .	56,109	Gmünd . . . . .	21,312	Feuerbach . . . . .	14,244
Heilbronn . . . . .	42,688	Tübingen . . . . .	19,076	Zuffenhausen . . . . .	12,752
Esslingen . . . . .	32,216	Heidenheim . . . . .	17,780	Ebingen . . . . .	11,423
Reutlingen <sup>1</sup> . . . . .	29,763	Tuttlingen . . . . .	15,862	Aalen . . . . .	11,247
Ludwigsburg <sup>1</sup> . . . . .	24,926	Ravensburg . . . . .	15,594		

<sup>1</sup> Including extensions.

**Religion.**—The various creeds were distributed as follows at the census of 1910:—

Kreise	Protestant	Roman Catholic	Other Christians	Jews	Others
Neckar . .	762,178	105,617	7,404	6,276	1,094
Black Forest . .	418,409	147,507	3,381	1,359	164
Jagst . .	275,976	135,475	1,048	2,412	58
Danube . .	214,620	351,396	1,030	1,935	235
Total . .	1,671,183	739,995	12,863	11,982	1,551

In the king is vested the right of guardianship and direction over the churches, and, so far as he belongs to the Evangelical Church, also the conservation of the episcopal rights in this church. The administration of the Evangelical Church is in the hands of a consistorium of one president, nine councillors, and six general superintendents, at Ludwigsburg, Heilbronn, Reutlingen, Tübingen, Hall, and Ulm. The representative body of the Evangelical ecclesiastical communes is the Evangelical Landes-synode, consisting of 25 clerical and 25 lay representatives of the dioceses and 1 of the evangelical theological faculty of the university, with 3 clerical and 3 lay members appointed by the evangelical princes. It meets at least every six years, oftener if necessary. The Roman Catholics are under a bishop, who has his see at Rottenburg, and is suffragan to the archbishop of Freiburg in Baden. The State exercises its rights over the Catholic Church through the Catholic Kirchenrat, which is appointed by the king and is subject to the Ministry of Worship. The Jews likewise are under a special council (Oberkirchenbehörde), nominated by the king on the proposition of the Minister of Ecclesiastical Affairs and Public Education.

**Instruction.**—Education is compulsory, and there must be one public school or more in every commune. According to official returns, there is not an individual above the age of ten unable to read and write. In 1912 there were 2,101 places with elementary schools with 6,606 teachers, attended by 370,384 pupils; 108 Realschulen with 15,408 pupils; 21 grammar schools (Elementarschulen) with 3,723 pupils; 18 gymnasia, of which 4 are training colleges for the Protestant clergy, 6 Realgymnasias, 5 Progymnasias and 8 Real Progymnasias, 48 Latin schools, having together 9,112 scholars; 3 city schools with 3,068 scholars. For girls there are 24 high schools with 6,851 pupils and 1 gymnasium with 85 pupils. There are, besides, the Technical High School at Stuttgart, the Veterinary High School at Stuttgart, the Agricultural High School at Hohenheim, and several agricultural and other special institutes. The State funds appropriated to education amounted in 1910-11 to 12,144,176*l.* For Tübingen University, see under *Germany*.

**Justice.**—In addition to other tribunals there is one Oberlandesgericht at Stuttgart. In 1910, 21,491 persons were convicted of crimes.

**Finance.**—Estimated revenue and expenditure for two years ending March 31 :—

Revenue	1916-17	Expenditure	1916-17
	Marks		Marks
State Property.	49,558,709	Civil List . . . . .	2,407,509
Direct Taxes . . . . .	45,637,110	Appanages and Dowries . . . . .	70,497
Indirect Taxes.	12,898,406	National Debt . . . . .	30,292,469
Various . . . . .	7,744,168	Annuities, &c. . . . .	647,350
		Pensions . . . . .	13,891,600
		Grants . . . . .	1,064,500
		Privy Council, &c. . . . .	106,940
		Ministry of Justice . . . . .	7,579,641
		„ Foreign Affairs . . . . .	224,040
		„ the Interior . . . . .	13,600,441
		„ Worship and Education. . . . .	22,701,192
		„ Finance . . . . .	6,628,672
		Parliament, Expenses of . . . . .	493,100
		General Purposes Fund . . . . .	50,000
		Matricular contribution to Empire. . . . .	20,068,471
		Postage . . . . .	1,260,000
Total . . . . .	115,838,387 (£5,791,969)	Total . . . . .	121,086,432 (£6,054,321)

Public debt (April 1, 1916), 32,995,280*l.*, divided into the general debt and the railway debt.

**Army.**—The troops of Württemberg form the 13 corps of the German army (q. v.). Their strength on a peace footing is about 30,261.

**Production.**—Württemberg is primarily an agricultural State, and 2,948,900 acres, or 64 per cent. of the entire area, are under cultivation, and 1,482,240 acres, or 31 per cent., under forest.

Areas under the principal crops and yield in metric tons in 1913 :—

—	Acres	Yield, tons	—	Acres	Yield, tons
Wheat . . . . .	111,140	89,545	Oats . . . . .	373,708	195,731
Rye . . . . .	97,268	57,868	Potatoes . . . . .	252,342	1,080,192
Barley . . . . .	241,709	173,444	Hay . . . . .	755,298	1,688,872
Spelt. . . . .	344,439	260,074	Hops. . . . .	8,104	2,226

Vines in 1915, 30,425 acres, yield 3,781,684 gallons of wine. In 1911 were produced 93,621,000 gallons of beer. The total value of the minerals raised in 1911 was about 200,000*l.* There are active iron foundries and salt works.

## GREECE

(KINGDOM OF HELLAS.)

### Reigning King.

**Konstantinos**, born August 3, 1868, the eldest son of Georgios (George I.); succeeded on the assassination of his father, March 18, 1913; married, October 27, 1889, to Queen *Sophia*, born June 14, 1870, Princess of Prussia, sister of the Emperor William II.

### *Children of the King.*

I. Prince *Georgios* (Crown Prince), born July 19, 1890. II. Prince *Alexandros*, born August 1, 1893. III. Princess *Helene*, born May 2, 1896. IV. Prince *Pavlos*, born December 14, 1901. V. Princess *Irene*, born February 14, 1904. VI. Princess *Catherine*, born May 4, 1913.

### *Brothers and Sister of the King.*

I. Prince *Georgios*, born June 24, 1869; High Commissioner in Crete, 1898-1906; married, November 21, 1907, to Princess Marie, only child of Prince Roland Bonaparte; offspring:—Prince *Petros*, born December 3, 1908; Princess *Eugenia*, born February 11, 1910. II. Prince *Nicolaos*, born January 21, 1872; married, August 29, 1902, to the Grand-Duchess Helena Vladimirovna, daughter of the Grand-Duke Vladimir of Russia; offspring, Princess *Olga*, born June 11, 1903; Princess *Elizabeth*, born May 23, 1904; Princess *Marina*, born November 30, 1906. III. Princess *Maria*, born March 3, 1876; married, April 30, 1900, to the Grand-Duke George Michailovitch of Russia. IV. Prince *Andreas*, born February 1, 1882; married, October 7, 1903, to Princess Alice, daughter of Prince Louis of Battenberg; offspring, Princess Margaret, born April 17, 1905; Princess Theodora, born May 30, 1906; Princess Cecilia, born June 23, 1911; Princess Sophia, born June 27, 1914. V. Prince *Christophoros*, born August 10, 1888.

By decision of the Greek National Assembly of April 14, 1913, a civil list of 2,000,000 drachmai (80,000*l.*) was settled on the King, and an annual sum of 300,000 drachmai on the Queen-Mother.

Greece, a province of the Turkish Empire since the latter part of the 15th century, gained its independence in the insurrection of 1821-29, and by the Protocol of London, of February 3, 1830, was declared a kingdom, under the protection of Great Britain, France, and Russia. The crown was accepted by Prince Otto of Bavaria, who ascended the throne January 25, 1833, being under the age of eighteen. He was expelled the Kingdom, after a reign of 29 years, in October, 1862, which event was followed by the election, in 1863, under the directing guidance of the three protecting Powers, of King George I., the father of the present sovereign.

The King, according to Art. 49 of the Constitution of 1864, attains his majority upon completing his eighteenth year. Within two months at the most the King must convoke the Legislature. If the successor to the throne is either a minor or absent at the time of the King's decease, and no Regent has been appointed, the Legislative Chamber has to assemble of its own accord within ten days after the occurrence of that event. The constitutional royal authority in this case has to be exercised by the ministerial council, until the choice of a Regent, or the arrival of the successor to the throne. The

sovereign and his heirs and successors must be members of the Greek Orthodox Church.

### Constitution and Government.

The Constitution of Greece, adopted October 29, 1864, vested the whole legislative power in a single chamber, called the *Bulé*, consisting of 184 representatives, elected by manhood suffrage (in the proportion of 1 for every 16,000 inhabitants) for the term of four years. In 1911 the Constitution was modified and a substitute for a second chamber was adopted in the re-establishment of the Council of State. The functions of the Council will be the examination of *Projets de Loi* and the annulling of official decisions and acts which may be contrary to law. The new Constitution came in force on June 1, 1911. The deputies must be at least 25 years of age. The elections take place by ballot. The *Bulé* must meet annually for not less than three months. No sitting is valid unless at least one-third of the members of the Assembly are present, and no bill can pass into law without an absolute majority of members attending. Every measure, before being adopted, must be discussed and voted, once in principle and twice article by article, on three separate days. A revision of any non-fundamental provisions of the new Constitution may be demanded, after the lapse of ten years, by an ordinary Parliament by means of two votes passed by a two-thirds majority, provided that the second vote shall not be taken until at least one month after the first, and provided also that such revision shall be carried out by a newly-elected Chamber. The Chamber of Deputies, unless specially convoked at an earlier date, must meet on October 1 (old style) of every year. The deputies are paid 4,000 drachmai a year, except those living in Athens or in Piræus, who receive only 3,200 drachmai. In case of absence extending over more than five sittings every month, the deputy has 20 drachmai per sitting taken from the total amount due to him. The number of deputies, including those for the new territories, is 332.

The Ministry, appointed May 3, 1917, is as follows :—

*Premier and Minister of Foreign Affairs.*—M. Zaimis.

*Minister of War.*—Colonel Haralamtis.

*Minister of the Interior.*—M. Negris.

*Minister of Finance.*—M. George Rallis.

*Minister of National Economy.*—M. Calligas.

*Minister of Justice.*—M. Lidoryki.

*Minister of Marine.*—M. Demirdji.

*Minister of Food Supplies.*—M. Drossopoulos.

*Minister of Education.*—M. Egenitis.

On August 30, 1916, the Venezelist party withdrew to Salonica, and on September 29, 1916, set up a Cabinet of National Defence to advise the Triumvirate (M. Venezelos, Admiral Condouriotis, and General Miliotis). Venezelist Greece is roughly bounded on the south by a line running through Armatobon and Petra; on the west by Albania; on the north by Serbia and Bulgaria, and on the east by the Struma. It also includes a number of islands (Lemnos, Tenedos, Imbros, Chios, Samos, Crete, &c.

### Area and Population.

At the census of 1879 Greece had a population (including that of Thessaly in 1881) of 1,973,768; in 1889, 2,188,008; in 1896, 2,433,806; on October 27, 1907, 2,631,952. In 1896 the population consisted of 1,266,816 males and 1,166,990 females; in 1907, 1,324,942 males and 1,307,010 females. Estimated population (old territory) 1914, 2,765,000. The area of Greece was about 25,014 square miles, and thus had about 105 inhabitants to the

square mile. The population of the nomes or departments into which Greece is divided is as follows:—

Divisions of Old Territory		Divisions of New Territory	
Departments	Population (Census 1907)	Departments	Population (Provisional Census 1913)
Attica and Boeotia . . . . .	407,063	<i>Macedonia</i> :—	
Phthiotis and Phocis . . . . .	174,574	Salonica . . . . .	503,896
Acarnania and Ætolia . . . . .	188,597	Serres . . . . .	132,841
Achaia and Elis . . . . .	254,728	Drama . . . . .	174,091
Argolis and Corinthia . . . . .	153,172	Kozani . . . . .	206,287
Arcadia . . . . .	162,324	Florina . . . . .	133,003
Laconia . . . . .	148,628		1,150,118
Messenia . . . . .	218,511	<i>Epirus</i> :—	
Eubœa . . . . .	116,903	Yanina . . . . .	245,618
Cyclades . . . . .	130,378		245,618
Corfu . . . . .	140,757	<i>Ægean Islands</i> :—	
Cephalonia . . . . .	71,235	Mytilene . . . . .	182,167
Zante . . . . .	42,502	Chios . . . . .	73,830
Larissa . . . . .	197,808	Samos . . . . .	68,949
Trikkala . . . . .	183,489		324,946
Arta . . . . .	52,411	Canea . . . . .	77,159
Total . . . . .	2,643,109	Heraclion (Candia) . . . . .	110,014
		Stakia . . . . .	25,027
		Lasithiou . . . . .	62,611
		Rethymnou . . . . .	61,339
			336,150
		Total new territories . . . . .	2,056,832

The acquisition of new territories by Greece, obtained as the result of the war with Turkey from October 17, 1912, to May 30, 1913, and with Bulgaria from June 30, to August 10, 1913, have given the country a total area of 41,933 square miles with an estimated total population (1914) of 4,821,300. The new territory is 16,919 square miles in extent.

The Powers, in accordance with the Treaties of London and of Athens, have decided that Greece shall retain all those Ægean islands which she occupied during the war, except Imbros, Tenedos, and Castellorizzo, which are to be restored to Turkey. In the meantime Greece is in occupation of all the islands. These include Crete and Samos.

In November, 1914, Greece, with the consent of the Great Powers, occupied North Epirus (see under Albania), and in March, 1916, formally took possession of the district. Population about 250,000. (Towns: Argyrocastro, 12,000; Korytza, 8,000.)

Mount Athos is inhabited by the monks of Greek (17), Russian (1), Bulgarian (1), and Serbian (1) monasteries and hermitages (*Sketari*). The monks and their servitors till the fields, tend the vineyard, take in the harvest, fish, weave, sell in shops, and, indeed, take upon themselves all the secular duties of the community as well as the sacred. Originally inhabited by one mediæval ascetic, Peter the Athonite, it has at last grown to a religious colony of thousands, contained in 20 monasteries with their respective dependencies; and after having passed in the fifteenth century from the sovereignty of the Greek Emperors of Byzantium to that of the Sultans it fell again into the hands of the Greeks, who occupied it in November, 1912. Each of the 20 monasteries is a sort of little republic in itself, those of the 'coenobitic' category being ruled by abbots chosen for life, while the 'idiorrhhythmic' monasteries are administered by a board of

overseers (*epitropoi*) elected for a certain term of years. Hitherto the peninsula has been administered by a Council of 4 members, and an Assembly of 20 members, the latter consisting of 1 deputy from each monastery.

In recent years there has been considerable emigration. According to United States statistics, the number of Greek immigrants into the States was in 1910-11, 37,021; 1911-12, 31,566; 1912-13, 38,644; 1913-14, 45,881; in 1914-15, 15,187.

The principal towns are the following, with populations, 1907 :—

Athens . . . 167,479	Larissa . . . 18,041	Calamada . . . 15,397
Piræus . . . 73,579	Trikkala . . . 17,809	Chalcis . . . 10,958
Patras . . . 37,724	Hermoupolis . . . 17,773	Tripolitsa . . . 10,958
Corfu . . . 27,397	Pyrgos . . . 13,690	Laurium . . . 10,007
Volo . . . 23,563	Zante . . . 13,580	Syra . . . 18,132

The chief towns in the new territory (with population of provisional census 1913) are :—

Salonica . . . 160,000	Cavalla . . . 45,000	Vodena . . . 8,850
Serres . . . 18,670	Canea . . . 24,399	Yanina . . . 16,800
Candia . . . 25,185	Drama . . . 13,000	Kozani . . . 9,410

### Religion.

The great majority of the inhabitants of the Kingdom are adherents of the Greek Orthodox Church. By the terms of the Constitution of 1864, the Greek Orthodox Church is declared the religion of the State, but complete toleration and liberty of worship is guaranteed to all other sects. A National Synod, held at Nauplia in 1833, vested the government of the Orthodox Church, within the limits of the Kingdom, in a permanent council, called the Holy Synod, consisting of the Metropolitan of Athens and 4 archbishops and bishops, who must during their year of office reside at the seat of the executive. The Orthodox Church has 3 archbishops and 29 bishops in the old territory and 59 archbishops and bishops in the new territories, including 1 metropolitan and 6 bishops in Crete. The Roman Catholic Church has an archbishop at Athens, another at Corfu, and a third at Naxos; and 1 bishop at Syra, Tinos and Santorin respectively.

### Instruction.

All children between the ages of six and twelve years must attend school, but the law is not well enforced in country districts. Of the army recruits 30 per cent. are illiterate, and 15 per cent. can read only.

There were (1910-11) 3,551 primary schools with 4,641 teachers (of whom 990 were of the female sex) and 259,854 pupils (82,458 females). For secondary education there were 41 high schools, 284 middle schools, 6 commercial schools, which, with others, totalled 338, having 1,318 teachers and 31,399 pupils (30,178 boys and 1,221 girls). There are 2 agricultural schools in Greece with, together, 50 pupils. There is a Trade and Industrial Academy. The Government Trade Schools at Athens and Patras have together 126 pupils. In 1912 the two Universities of Athens, the National University (founded 1836) and the Capodistria University, had 56 ordinary professors, 106 lecturers, and 3,250 students studying medicine, law, philosophy, theology, and chemistry. Of the total number, 800 were from abroad, chiefly from Turkey. The Polytechnicon Mezzovion with 22 professors, and 170 students, provides instruction in painting, sculpture, and mechanics.

The cost of primary instruction is borne by the State. It amounts to some 10 million drachmai annually.

**Finance.**

In accordance with the peace preliminaries between Greece and Turkey, and the Greek Law of Control of March, 1898, the financial commission of delegates representing Germany, Austria-Hungary, France, Great Britain, Italy, and Russia (the mediating Powers) is established at Athens in direct relation with the Greek Minister of Finance. To this commission were assigned, for the payment of the interest on the external debt, the revenues from the salt, petroleum, matches and playing-cards monopolies, the duties on tobacco, cigarette paper, Naxos emery, the stamp duty, and the import duties at the port of Piræus. In their report for 1915 the Commissioners announce an income of 84,787,154 drachmai (3,391,486*l.*), of which 34,886,588 drachmai (1,395,463*l.*) were derived from the conceded revenues, and 23,344,887 drachmai (933,795*l.*) from the receipts of the Piræus customs and the customs of six other ports assigned to the service of the 5 per cent. loan of 1914 (see below.)

The collection of the assigned revenues and the administration of the monopolies is entrusted to a Greek Company, called the "Société de Régie des Revenues affectés au Service de la Dette Publique," which is under the control of the international commission.

The ordinary revenue and expenditure for 6 years are as follows (25·22 drachmai = 1*l.* sterling) :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1910	6,875,801	5,507,736	1913	6,907,752	16,957,080
1911	9,201,844	7,045,678	1914 <sup>1</sup>	8,464,631	11,734,696
1912	5,764,746	7,335,060	1915 <sup>1</sup>	9,258,136	11,230,360

<sup>1</sup> Estimates.

For the year 1915 the estimates of total revenue and expenditure were as follows (including all the new territories) :—

Sources	Revenue	Branches	Expenditure
Ordinary—	Drachmai	Ordinary—	Drachmai
Direct taxes . . . . .	60,539,500	Public debt . . . . .	63,681,965
Indirect taxes . . . . .	84,319,000	Pensions and allowances . . . . .	16,754,876
Stamps and dues . . . . .	39,405,900	Civil list . . . . .	2,500,000
Monopolies . . . . .	18,231,000	Chamber of Deputies . . . . .	946,939
State property, revenue . . . . .	14,137,636	Ministries:	
State property, sales . . . . .	1,065,578	Foreign Affairs . . . . .	5,415,180
Amounts received from		Justice . . . . .	11,483,656
New Territories . . . . .	2,000,000	Interior . . . . .	21,889,165
General revenues from		Communication . . . . .	23,719,904
Northern Epirus . . . . .	3,000,000	Worship and Instruction . . . . .	17,567,221
Various . . . . .	8,754,717	Commerce and Agriculture . . . . .	5,951,963
Total ordinary . . . . .	231,453,421	War . . . . .	52,569,600
Extraordinary		Marine . . . . .	22,766,821
Loans . . . . .	179,999,934	Finance . . . . .	37,572,310
		Total . . . . .	280,759,000
		Extraordinary . . . . .	418,010,859
Grand Total . . . . .	411,453,355 (16,458,184 <i>l.</i> )	Grand Total . . . . .	698,769,861 (27,940,794 <i>l.</i> )

The outstanding external debt of Greece amounted on December 31, 1916, to 45,863,692*l.*, made up as follows:—

	£		£
Five per cent. loan of 1881 . . .	3,526,340	Five per cent. Greek National	
1884 . . .	3,056,360	Loan of 1907 . . .	738,440
Four "per cent." Monopoly Loan,		Four per cent. Loan of 1911 . . .	4,241,686
1887 . . .	4,614,140	Six per cent. Loan of 1913 (repay-	
Four per cent. Rentes, 1889 . . .	5,221,280	able in five years) . . .	2,000,000
Five per cent. Loan, Piræus-		Five per cent. Greek Government	
Larissa Railway, 1890-1 . . .	1,987,380	Loan of 1914. Authorised	
Five per cent. Funding Loan, 1893	337,380	Amount, £19,850,000 . . .	13,285,506
Two and a-half per cent. Loan of			
1898 (Guaranteed by the Powers)	4,638,800	Total . . . . .	£45,863,692
Four per cent. "Greek Railways			
Loan" of 1902 . . . . .	2,216,380		

Besides the above there exist also the following loans:—(1) Loan on forced currency notes, 58,949,315 drachmai; (2) Loan of the Three Powers (1833), 52,000,000 drachmai; (3) Loan in the Islands (1 per cent.), 16,000,000 drachmai; and (4) Patriotic loan without interest, 1,720,000 drachmai.

## Defence.

### I. ARMY.

Military service in Greece is compulsory and universal, with very few exemptions (laws of 1867, 1896, 1904, and November 30, 1914). It commences in the 20th year, and lasts for the long period of 31 years. The term of service in the active army is 3 years for the cavalry and artillery and 2 years for the infantry, &c., followed by 21 years in the first serie of the reserve and 8 years in the second serie. The annual contingent of recruits, fixed by the Parliament, is about 25,000. The peace establishment for 1915 is about 60,000 officers and men.

The army is divided into 5 army corps as follows:—(1) Four army corps consisting each of:—3 divisions of 3 infantry regiments, 6 sections of machine guns, 1 group of mountain artillery; 1 brigade of field artillery (18 batteries); 1 cavalry regiment (6 squadrons and 6 sections of machine guns); 1 engineer regiment (6 companies); 1 battalion of train (transport and supplies); 1 company of medical service, and 1 company of clerks and "ouvriers d'administration." (2) One army corps consisting of:—2 divisions as above; 1 field artillery regiment; 1 cavalry regiment; 1 battalion of engineers; 1 battalion of train (transport and supplies); 1 company of the medical service; and 1 company of clerks and "ouvriers d'administration." (3) The garrisons of the Aegean Islands called "Commandement militaire des Iles." (4) 1 cavalry division of 4 regiments, 2 batteries of machine guns and 1 group of mounted artillery. (5) 1 regiment and 1 battalion of fortress artillery. (6) 1 regiment and 1 battalion of fortress engineers. (7) 1 battalion of railway engineers. (8) 1 battalion of bridge engineers. (9) 1 regiment of telegraphists (optical, wireless, telephones, &c.). (10) 1 battalion of automobilists. (11) 1 company of aviators.

The effective strength of the Greek army, according to the scheme submitted to the Chamber in February, 1915, is 3,970 officers and 55,803 non-commissioned officers and men.

The territorial army is, of course, primarily intended for home defence, but certain classes are liable to be drafted to the field army in time of war. The territorial army has no definite organisation at present in peace time, and the men receive no training.

The Greek infantry are armed with the Mannlicher Schönauer rifle, model 1903. The field artillery is armed with Schneider-Canet Q.F. guns. The military budget for 1915 was 3,439,385*l*.

## II. NAVY.

The Greek Navy was re-organised in 1906, and after 1911 a British naval mission superintended the training and organisation of the fleet. The principal vessels are as follows :—

—	Launched	Displacement Tons	Armour		Principal Armament	Torpedo Tubes	Horse Power	Max. Speed Knots
			Belt In.	Gun In.				
Spetsai . . . . .	1889	5,000	12	13½	3 10 6; 5 6in.; 1 4in.	3	6,700	17
Hydra . . . . .	1889							
Psara . . . . .	1880							
Averoff . . . . .	1910	10,118	8	6½	4 9·2; 8 7·5in.	3	19,000	24
Kilkis <sup>1</sup> . . . . .	1905	13,000	9	12	4 12in.; 8 8in.; 8 7in.	2	14,000	17
Lemnos . . . . .	1912	2,600	—	—	2 6in.; 4 4in.	2	6,500	20
Helle <sup>2</sup> . . . . .	—	—	—	—	—	—	—	—
Lambros . . . . .	—	—	—	—	—	—	—	—
Katsonis . . . . .	—	—	—	—	—	—	—	—

<sup>1</sup> Purchased 1914 from the U.S. Navy.

<sup>2</sup> Cruiser purchased 1914 from China.

The *Averoff* was acquired through a deceased millionaire of that name leaving the bulk of his fortune for improving the navy.

There are also 14 destroyers, 6 modern torpedo boats, 5 old boats reconstructed, 2 submarines, and a variety of miscellaneous craft.

When war broke out Greece had a battle cruiser, *George I.* (ex *Salamis*), building in Germany, and a Dreadnought was on order in France, while in England a small cruiser and four destroyers had been commenced. All these vessels have been taken over by the countries building them. Much preliminary work had been done on the proposed new arsenal for the Greek Navy, which was to take the place of the establishment at Salamis. The cost of the new work was estimated at 2,800,000*l*.; it was being carried out under the direction of British engineers. After the landing of the Allies at Salonika, the institution of the provisional government of M. Venezelos, and the action taken by the Allies, the Greek Fleet was handed over to the charge of the French Admiral Dartige du Fournet, who was in command in Greek waters.

## Production and Industry.

Greece is mainly an agricultural country, and the economic life is directly dependent on the products of the soil. Of the total area only one-fifth is cultivable. The total area (old Greece) is 15,978,750 acres, made up as follows: 3,532,000 acres (22·10 per cent.) is cultivated land; 4,999,000 acres (31·22 per cent.) is meadow and pasture; 2,029,300 acres (12·67 per cent.) is forest; and 5,431,250 acres (34·01 per cent.) is waste land. By the draining of Lake Copais, an area of about 53,000 acres has been acquired for agricultural purposes. Irrigation and drainage canals, farm roads, and

buildings are being constructed, tree planting is undertaken, and the breed of cattle is being improved.

While there are a few large proprietors in Greece, the land is to a large extent in the hands of peasant proprietors and *métayer* farmers. On the whole, agriculture is in a backward state, chiefly because of the dryness of the climate, the scarcity of rivers which may be utilised for irrigation, the system of payment of rent in kind, and by the lack of co-operative societies and agricultural banks. The cereals grown are wheat, barley, rye, maize, mezlin. The total area sown was 2,029,000 acres (57·45 per cent. of the cultivable soil). The most favoured and best cultivated crop is the currant, which covers vast districts. The yield for 1914 was 158,000 tons. Thirty-three thousand stremmata (stremma=0·2471 acre) of currant plantations have been uprooted in accordance with a law to limit the production of currants. Five thousand stremmata still remain to be destroyed. Olives are next in importance to currants, yielding 50,000,000 okes (1 oke=2·85 lbs.) in 1913. The wheat fields of the old provinces yielded 12,593,000 bushels in 1913. Tobacco in the old provinces in 1912 yielded 86,355 cwts., and in the new lands 274,000 cwts.; the vineyards, 140,551,000 okes; figs, 240,000 cwts. The fig industry is centred in the port of Calamada. Rice is cultivated in Greek Macedonia—Vodena, near Salonika, being the principal centre. Two kinds of cheese are produced in Greece—sliced cheese in brine and head cheese. The production of the former in 1912 amounted to 1,995,000 lbs., and of the latter, 2,280,000 lbs. Most of the sliced cheese is consumed in Greece, chiefly in the cities of Athens and Piræus. There are in Greece (1914) 149,000 horses, 79,500 mules, 132,800 asses, 300,000 cattle, 3,546,600 sheep, 227,180 pigs, and 2,638,000 goats.

Greece has a great variety of mineral deposits, and there are now in force about 35 mining concessions embracing a total area of nearly 20,000 acres. The ore and other minerals worked include iron, copper, zinc, lead, silver, manganese, aluminium, antimony, tin, nickel, magnesite ore, cobalt, coal, sulphur ochre, and various other earths. The Laurium district, Thessaly, Eubœa, the Ægean islands and other parts of Greece yield a large output of ores and earths.

The principal mineral output of all Greece for two years is given as follows (in metric tons):—

—	1913	1914	—	1913	1914
	Tons	Tons		Tons	Tons
Chromite . . .	6,930	7,059	Lead . . .	159,348	151,581
Emery . . .	5,649	16,112	Magnesite . . .	118,054	136,701
Iron . . .	313,578	299,286	Nickel . . .	17,424	13,626
Manganese iron . . .	6,323	1,315	Zinc . . .	36,402	32,440
Iron pyrites . . .	128,867	129,046	Salt . . .	19,215	29,717

## Commerce.

Value of the commerce of Greece (25 drachmai = £1):—

—	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . .	6,940,416	6,306,270	6,868,220	7,005,381	6,282,650
Exports . . .	5,636,106	5,846,516	4,693,438	4,685,475	5,402,168

## Principal special imports and exports in 1914 and 1915 :—

Imports	1914	1915	Exports	1914	1915
	£	£		£	£
Agricultural products	1,799,477	2,574,412	Agricultural products	2,383,153	2,985,548
Yarn and tissues	961,798	802,080	Raw minerals	495,258	572,624
Crude minerals	1,280,494	900,536	Wines, &c.	652,037	665,840
Forest products	540,284	301,803	Oils (olive, &c.)	552,858	518,744
Wrought metals, &c.	272,325	158,896	Animal products	174,299	282,988
Chemicals	298,471	314,576	Forest products	111,061	172,144
Living animals	87,707	5,396	Wrought metals	68,521	44,388
Fishery products	331,804	241,796	Chemicals	38,332	74,208
Animal products	152,518	95,824	Fishery products	21,209	20,986
Paper, books, &c.	134,628	163,844	Living animals	1,525	48

The customs revenue amounted in 1912 to 1,587,930*l.*, in 1913 to 1,662,508*l.*, and in 1914 (including all new provinces) to 2,503,393*l.*

The commercial treaty of 1856 provides for 'the most favoured nation' treatment between the United Kingdom and Greece, and the declaration of November, 1904, extends the scope of the treaty so as to include all British possessions, colonies, &c., which accord the 'most-favoured nation' treatment to Greece (that is, all except India, Canada, the Cape, and New South Wales). The treaty is terminable July 23, 1910, and then after 12 months' notice.

The staple article of import from Greece into the United Kingdom (Board of Trade Returns) is currants, the value of which amounted in 1915 to 2,163,425*l.* Other articles of import in 1915 were:—iron ore (including chrome), 119,295*l.*; raisins, 276,759*l.*; sponges, 142,022*l.*; wine, 1,496*l.*; olive oil, 27,840*l.* Of the exports from the United Kingdom to Greece in 1915, cotton goods and yarns were valued at 589,041*l.*; woollens, 179,018*l.*; coal, 344,988*l.*; iron, 27,271*l.*; machinery, 59,732*l.*

The total trade between Greece and the United Kingdom for 5 years was (in thousands of pounds) as follows:—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Greece to U.K.	2,171	2,202	2,423	3,943	4,636
Exports to Greece from U.K.	2,569	2,536	2,971	2,467	1,265

## Navigation and Shipping.

The merchant navy of Greece on January 1, 1916, had 329 sailing vessels of 85,750 tons and 433 steamers of 829,991 tons. In 1915, 3,827 steamers of 2,430,680 tons entered the port of Piræus. Of this total, 3,178 steamers of 1,485,652 tons were under the Greek flag. A considerable amount of the carrying trade of the Black Sea and the Eastern ports of the Mediterranean is under the Greek flag.

## Internal Communications.

There are about 3,000 miles of roads. There is a canal (opened November 9, 1893) across the Isthmus of Corinth (about 4 miles). In 1913, 2,877 steamers of 1,463,896 tons and 1,192 sailing vessels of 36,095 tons passed through the canal.

Railways were open for traffic in 1914 for a length of about 1,365 miles, made up as follows:—Hellenic Railway, 275 miles; Piræus-Athens-Peloponnesus railway, 468 miles; the Thessalian Railway, 145 miles; Athens-

Piræus railway, 6 miles; Attica Railway, 47 miles; North-Western Railway, 40 miles; Salonica-Gevgeli, 49 miles; Salonica-Monastir, 125 miles; Salonica-Oxilar, 211 miles. Before the war with Turkey (1912-13) Greece was completely isolated by land from the rest of Europe, but it is now intended to connect the Greek with the European railroads. The distance is only about 70 miles, and the line would have been completed by July, 1915, but for the European war. It was, however, opened in the spring of 1916 (May 21). Projects for new lines to the extent of 400 miles are under consideration. Among the lines to be constructed are those from Salonica to Aghista, from Kalambaka to Koshani, from Kalambaka to Sorovitchevo and from Kalambaka to Yanina.

The telegraphic lines in 1914 had a length of 5,735 miles, with 10,130 miles of wire. The number of offices was 795. They despatched 1,900,500 inland telegrams, 100,000 international, and 68,000 official. Receipts, inland telegrams, 3,700,600 drachmai.

In 1914 there were 1,438 miles of telephone lines with 5,096 miles of wire belonging to 6 urban systems.

Of post offices there existed at the end of 1914, 1,342, and there passed through the post in that year 29,810,000 letters, 3,150,000 post-cards, and 26,471,000 printed matter and samples. The receipts were 3,654,066 drachmai.

### Money and Credit.

The nominal value of the Greek coinage (minted in Paris) put in circulation since 1866 has been: gold, in 1876, 1,000,000 drachmai; in 1884, 11,000,000 drachmai; total gold, 12,000,000 drachmai; silver, up to 1910, 26,262,865 drachmai, nearly all of which had disappeared from circulation during the period when the agio on gold made it profitable to export to other countries of the Latin Union; bronze, up to 1883, 6,816,065 drachmai; nickel, 1893-95, 3,000,000 drachmai. Since 1910 the silver currency has been restored by the repatriation from other countries of the Latin Union of 4,548,024 drachmai, in good condition, and by coin (at Paris) of 9,451,976 drachmai.

The National (with which is now united the Epiro-Thessalian) and the Ionian Banks are authorised to issue forced currency notes to the amount of 73,000,000 drachmai. This privilege (so far as the National Bank is concerned) was extended to December 31, 1930, and by an agreement with the Government made on December 6, 1914, these privileges were extended to the new territories as from January 1, 1915. In accordance with a law of March 19 (April 1), 1910, the National Bank had up to May 31, 1913, successively been authorised to issue notes up to 150,000,000 drachmai, convertible into gold at par or exchange at a premium of  $\frac{1}{4}$  per cent. Of a total authorised issue of paper money of 210,000,000 drachmai 136,446,397 drachmai was in circulation on December 31, 1915.

### Money, Weights and Measures.

Greece entered in 1868 the Latin Monetary Union.

The *Drachma*, of 100 *leptá*, is equivalent to the franc (25.225 francs = 12. sterling). 100 new drachmai = 112 old drachmai. The currency drachms is now at par value.

By Royal decree of January 30, 1893, the gold coins of Great Britain, Austria, Germany, Denmark, Russia, Spain, Turkey, Egypt, and the United States are accepted by the Treasury and by private persons as legal tender, one-fourth per cent. being deducted from their nominal value.

In September, 1898, it was announced that it had been decided to introduce the metric system as regards measures of length, weight, and capacity.

The change from the old system is to be gradual, commencing with measures of length. The old system is as follows :—

The <i>Oke</i>	.	.	.	.	=	2·80	lbs. avoirdupois.
„ <i>Stater</i>	.	.	.	.	=	123·20	„ „
„ <i>Livre</i> (Venetian)	.	.	.	.	=	1·05	„ „
„ <i>Baril</i> (wine)	.	.	.	.	=	16·33	imperial gallons.
„ <i>Kilo</i>	.	.	.	.	=	0·114	„ quarter.
„ <i>Pike</i>	.	.	.	.	=	$\frac{1}{4}$	of an English yard.
„ <i>Stremma</i>	.	.	.	.	=	·242	„ „ acre.

On August 3, 1914, a Royal Decree was issued providing for the extension to the Greek New Territories of the coinage system in force in Old Greece, so that all the coins struck in virtue of the laws regulating that system, and those which are at present circulating, will be legal tender in the New Territories. The circulation of copper or nickel coins of the Ottoman Empire is prohibited, but the 25, 50, and 100 piastre Turkish gold coins, as well as the  $\frac{1}{2}$ , 1, 2, 5, 10 and 20 piastre silver coins, will be temporarily legal tender in the New Territories, except that the gold coins will not be legal tender in Crete.

## Diplomatic Representatives.

### 1. OF GREECE IN GREAT BRITAIN.

*Chargé d'Affaires ad interim.*—Ch. Simopoulos.

*Diplomatic Agent of the National Government at Salonica.*—J. Gennadius (December 19, 1916).

*Honorary Counsellor.*—John Stavridis.

There are consuls of Greece at Birmingham, Cardiff, Dublin, Edinburgh, Glasgow, Liverpool, Manchester, and vice-consuls and consular agents at various other towns.

### 2. OF GREAT BRITAIN IN GREECE.

*Envoy and Minister.*—Sir F. E. H. Elliot, G.C.V.O., K.C.M.G., appointed November, 1903.

*Secretaries.*—D. E. M. Crackanthorpe and R. F. O. Bridgeman, M.V.O.

*Naval Attaché.*—Commander W. F. Sells, R.N.

*Military Attaché.*—Col. W. E. Fairholme, C.M.G., M.V.O.

*Consul (Piræus).*—Paul Wilkinson.

*Consul at Canza (Crete).*—E. C. D. Rawlins.

*Diplomatic Agent at Salonica.*—Earl Granville, G.C.V.O.

*Consul-General.*—A. C. Wratislaw, C.B., C.M.G.

There are also British Consular representatives at Cavalla, Cephalonia, Chios, Corfu, Mitylene, Patras, Piræus, Samos, Syra, Thasos, Volo, Zante.

## GUATEMALA.

(REPÚBLICA DE GUATEMALA.)

### Constitution and Government.

THE Republic of Guatemala, established on March 21, 1847, after having formed part for twenty-six years of the Confederation of Central America, is governed under a Constitution proclaimed December 1879, and modified October, 1885, November, 1887, October, 1889, and July, 1903. By its terms the legislative power is vested in a National Assembly, consisting of representatives (one for every 20,000 inhabitants) chosen by universal suffrage for four years, and a Council of State of 13 members, partly elected by the National Assembly, partly appointed by the President of the Republic. The executive is vested in a President, elected for six years.

*President of the Republic.*—Don Manuel Estrada Cabrera for the term 1911–17. Has been re-elected for a second term, from March, 1917, to March, 1923.

The administration is carried on, under the President, by the heads of six departments—of Foreign Affairs, Government and Justice, Hacienda and Public Credit, Public Instruction, Fomento, War.

### Area and Population.

Area, estimated at 48,290 English square miles. In 1903 the population was 1,842,134; December 31, 1914, estimate, 2,003,579. About 60 per cent. are pure Indians, most of the remainder being half-caste, there being very few descendants of Europeans. Guatemala is administratively divided into 23 departments. Number of births in 1914, 76,551; marriages, 5,873; number of deaths, 40,878; surplus, 35,673.

Capital of the Republic and seat of the government is Guatemala, with 90,000 inhabitants (1910), five-sixths of them of European origin. Other towns are Quezaltenango, 28,940, Coban, 30,770, and Totonicapan, 28,310. A boundary convention with Honduras of March, 1905, was extended to March 1, 1915, and a New Convention was signed and ratified in 1915.

### Religion and Instruction.

Roman Catholicism is the prevailing religion; but all other creeds have complete liberty of worship. Guatemala has an archbishop under whom are suffragan bishops for Costa Rica, Honduras, Nicaragua, and San Salvador. The State does not recognise any creed.

Education is free and compulsory. In 1913 there were 1,837 Government primary schools, as follows:—Kindergarten, 32; mixed schools, 382; primary schools for boys, 498, and for girls, 474; additional schools for boys, 33, and for girls, 25; training schools for girls, 4, and for boys, 11; night schools for workmen, 63; schools of arts and crafts, 3; and rural schools, 312. In 1916 the total number schools was 1,849. The number of pupils attending these schools in 1914 was 64,387, as compared with 61,136 in 1913. There is a medical college, a school of pharmacy, a school of dentistry, and a school of midwifery. The National Central Institute confers degrees which are recognised in all the Central American Republics. Among the other institutions are a School of Handicraft for Women, a National Conservatoire of Music, and a School of Art. There is a German school, endowed by the German Government. The national library contains 19,400 volumes.

### Justice and Crime.

Justice is administered in a supreme court, 6 appeal courts, and 26 courts of first instance. In all the municipalities there are Justices of Peace.

## FINANCE—DEFENCE—PRODUCTION AND INDUSTRY 1009

### Finance.

Ordinary revenue and expenditure in currency (77 paper dollars = £1 in 1910; 61 = £1 in 1911; 90 = £1 in 1912; 100 = £1 in 1913; and 200 = £1 in 1914 and 1915):—

—	1912-13	1913-14	1914-15	1915-16 <sup>1</sup>	1916-17 <sup>1</sup>
	dollars	dollars	dollars	dollars	dollars
Revenue	83,644,025	82,399,924	85,007,704	65,000,000	66,200,000
Expenditure	46,463,582	48,735,805	67,841,283	60,082,640	63,095,693

<sup>1</sup> Estimates.

On December 31, 1915 (according to the report of the Council of the Corporation of Foreign Bondholders) the outstanding amount of the 4 per cent. External Debt of 1895 was 1,512,460*l.*; certificates in respect of unpaid interest, 1899 and 1901-1913, 844,603*l.*; total, 2,357,063*l.*

### Defence.

The military force of Guatemala, as reorganised, numbers 85,535 officers and men when mobilised. The reserve army consists of 40,575, divided into 81 battalions. All male citizens are liable to conscription from 18 to 50.

### Production and Industry.

The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the greater. The Pacific slope, though comparatively narrow, is exceptionally well watered and fertile between the altitudes of 1,000 and 5,000 feet, and is the most densely settled part of the Republic. The Atlantic slope is sparsely populated and has little of commercial importance beyond the timber cutting of the Peten, coffee cultivation of Coban region, and banana raising of the Motagua Valley and Lake Izabal district.

By the National Land Law of 1894, the State lands (except those on the frontiers and the sea-shore) were divided into lots for sale, the maximum allotment permitted to one person being 15 caballarias (or about 1,687 acres); and these cannot be sold under ten years. In December 1915, the state took over all the ore lands in the country, and such land may be exploited only under leasehold.

Uncultivated lands may be granted gratuitously to immigrants or to immigrant companies, to municipalities, villages and schools, or as assistance towards road-making. The forest area has an extent of 526,593 hectares.

The soil in general is exceedingly fertile. The most important crop is coffee, of which the quantity produced in 1916-17 was 80,000,600 pounds (91,852,200 pounds in 1914). Germans own and control between 50 and 60 per cent. of the coffee plantations of Guatemala. Other crops in 1915 were 8,217,000 bunches of plantains and bananas, 6,000,000 quintals (of 101·433 pounds) of corn. Of the smaller crops, beans, 180,000 quintals, and wheat, 270,000 quintals, were about the same as the previous year; rice and potatoes were also produced.

The department of Petén is rich in mahogany and dye woods, for which there is a ready market in the United States, whither they are carried overland through British Honduras and Mexico. Cotton is grown in small quantities. On the high plateaux the area of the cattle-grounds (potreros) is about 758,640 acres. On December 31, 1914, there were in the Republic 655,886 head of cattle, 114,451 horses and mules, 402,124 sheep, 58,847

goats, and 176,515 pigs, making a total of 1,467,323. On December 31, 1915, the total was 1,470,200.

There are silver, gold, copper, iron and lead mines. The proportion of mineral is estimated to be as follows:—Copper 5 per cent., zinc 11 per cent., lead 9 per cent., silver 33 per cent. The principal mining zones are in the Departments of Huehuetenango and Chiquimula. There are 129 mines fully registered and title deeds issued in respect thereof. Marble is abundant, and auriferous sand is found in several rivers.

### Commerce.

Value of the commerce in pounds sterling for 5 years:—

	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . . . .	1,095,100	806,500	2,012,465	1,866,200	1,014,493
Exports . . . . .	1,647,551	1,510,373	2,889,986	2,550,800	2,313,317

The values of the principal imports and exports in U.S. dollars for 2 years were:—

Imports	1914	1915	Exports	1914	1915
	Dollars	Dollars		Dollars	Dollars
Cotton . . . . .	1,289,105	785,570	Coffee . . . . .	10,391,765	8,949,441
Foodstuffs . . . . .	545,087	538,236	Rubber . . . . .	14,767	49,331
Linen, hemp, and jute . . . . .	224,764	252,481	Timber . . . . .	301,571	176,231
Paper, etc. . . . .	165,399	147,243	Hides . . . . .	369,642	540,710
Iron and Steel . . . . .	515,517	121,198	Bananas . . . . .	1,017,141	1,082,429
Leather . . . . .	143,448	94,661	Sugar . . . . .	—	332,728

In 1913 and 1915 the trade was distributed as follows:—

Countries	Imports		Exports	
	1913	1915	1913	1915
	Dollars	Dollars	Dollars	Dollars
United States . . . . .	5,053,060	3,751,762	3,923,354	6,881,410
Germany . . . . .	2,043,329	146,053	7,033,557	50,237
United Kingdom and Belize . . . . .	1,650,387	577,206	1,857,105	1,322,271
France . . . . .	402,025	124,492	21,268	—
Mexico . . . . .	113,578	1,622	77,970	143,667
Central America . . . . .	29,768	2,932	81,534	134,172

Total trade between Guatemala and the U.K. for 5 years:—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Guatemala to U.K. . . . .	385,725	355,725	288,467	441,542	41,459
Exports to Guatemala from U.K. . . . .	355,246	343,768	236,812	114,899	211,556

### Shipping and Communications.

In 1915, 565 vessels of 975,801 tons entered the ports of the Republic. The chief ports on the Atlantic side are Puerto Barrios and Livingston; on the Pacific side, San José, Champerico, and Ocos.

The International Railway of Central America was incorporated in 1912 and represents a consolidation of the Guatemala Railway (195 miles), the Guatemala Central Railway (139 miles), the Occidental Railway (51 miles), and the Ocos Railway (22 miles). The company's main lines at present extend from Puerto Barrios to Guatemala City, a distance of 194.5 miles, thence to San José de Guatemala, on the Pacific Ocean, a distance of 74 miles. The company receives subsidies from the Governments of Guatemala and Salvador. The Salvador division of 40 miles is operated separately. The Government of Guatemala may purchase the lines after the year 2002 at a price to be decided by arbitration. The lines located in Salvador may be purchased after June, 1978, by the Government of that country at an arbitrated price. After the year 2006 Salvador will receive the lines without indemnity. In 1914 the International Railways of Central America acquired by purchase a 60-mile railroad extending from Santa María, on the main line between Guatemala City and San José de Guatemala, to Las Cruces. The same year it built an extension from Las Cruces to Ayutla, a distance of 45 miles. Ayutla is on the border of Mexico; Mariscal, in Mexico, being on the other side of the river Suchiate, which forms the boundary between the two countries. Although the road was constructed in 1914, through freight and passenger traffic between Guatemala City and Ayutla was not inaugurated until October 1, 1916. The International Railways of Central America has also projected a line to run south-east from Santa María to Santa Ana in Salvador. It is stated that when this and other lines in Central America, projected or under construction, are completed, a direct through route will be afforded between Vera Cruz, Mexico, and Panama and Colon, extending along the western portion of Central America through the five Republics of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica.

There are a few good roads, and many bridges have been recently built, but away from the railway-most of the traffic is on mule-back. In November, 1916, a concession was granted to a company for the construction of an intra-coastal canal, to be known as the Chiquimulilla Canal, skirting the Pacific Coast of Guatemala and extending 80 miles from San José to the Esclaves River.

There were in 1915, 382 post-offices, through which passed 15,992,600 letters, &c. The foreign mail included 45,820 postal packets. The telegraph offices in 1915 handled 1,626,866 telegrams and 7,263 cablegrams. The telephone system has 280 offices.

### Money, Weights, and Measures.

Important Guatemalan Banks are :—(1) The Bank of Guatemala (1895), capital, 10,000,000 pesos; paid-up capital, 2,500,000 pesos; reserve, 4,312,512 pesos. (2) The International Bank of Guatemala (1877), subscribed capital, 2,000,000 pesos; reserve fund, 1,651,000 pesos. (3) The American Bank (1895), paid-up capital, 3,000,000 pesos; reserve fund, 1,200,000 pesos. (4) The Western Bank (Banco de Occidente) of Quezaltenango (1881), capital, 2,000,000 pesos; paid-up capital, 1,650,000 pesos; reserve fund, 3,300,000 pesos. On December 31, 1915, there were in circulation 155,428,531 pesos in paper money issued by the banks. In addition there are the notes of the Comité Bancario issued in 1899. The amount outstanding by the end of 1914 was stated by the Government to be 5,782,001 pesos.

The silver peso or dollar is not now current, the money in use being paper or fractional nickel and copper coin.

*The Dollar or Peso*, of 100 *Centavos*, weight, 25 grammes, .900 fine; nominal value, 4s. Nickel coins are the *real*, nominal value 6d., and the

half and quarter real. Copper coins (introduced in 1915) are 25 and 12½ centavos.

The Spanish <i>Libra</i> of 16 ounces . . .	= 1·014 lb. avoirdupois.
„ <i>Arroba</i> of 25 libras . . .	= 25·35 lb. „
„ <i>Quintal</i> of 4 arrobas . . .	= 101·40 „
„ <i>Tonelada</i> of 20 quintals . . .	= 18·10 cwt.
„ <i>Fanega</i> . . .	= 1½ imperial bushels.

The metric system is now adopted.

## Diplomatic and Consular Representatives.

### 1. OF GUATEMALA IN GREAT BRITAIN.

*Consul-General and Chargé d'Affaires*.—Don José M. Lardizabal.

There are also Consular representatives at Glasgow, Liverpool, Manchester, Southampton, Birmingham, Cardiff, Grimsby.

### 2. OF GREAT BRITAIN IN GUATEMALA.

*Envoy Extraordinary, Minister and Consul-General*.—C. Alban Young, M.V.O. Appointed September 18, 1913.

There is a British Consul at Quezaltenango; Vice-Consuls at Livingston, Puerto Barrios, and San José.

## HAITI.

(RÉPUBLIQUE D'HAÏTI.)

### Constitution and Government.

THE Republic of Haiti, formerly a French colony, was proclaimed independent January 1, 1804, and is now governed under a Constitution of October 9, 1889. The legislative power is vested in a Chamber of the Communes of 99 members (1 for each Commune) chosen for 3 years by direct popular vote, and in a Senate of 39 members chosen for 6 years (renewed to the extent of one-third every 2 years) by the Chamber of the Communes from a list made out partly by the President and partly by the electors. The President is elected for 7 years by the two Chambers in joint session. Members of both houses are paid by the month during session (representatives 300 dollars, and senators 150 dollars).

*President of the Republic.*—Monsieur Sudre Dartiguenave; elected August 12, 1915.

The administration of the Republic is carried on, under the President, by six heads of departments. The President receives a salary of 4,800*l*.

In November, 1915, both Houses of the Haitian Congress ratified the treaty with the United States establishing a virtual protectorate by the United States over Haiti.

### Area and Population.

The area of the Republic, which embraces the western portion of the island of Haiti—the larger but less populated eastern division forming the Republic of *Santo Domingo*—is estimated at 10,204 English square miles. The inhabitants were estimated to number 960,000 in 1887; the ecclesiastical estimate, based on parish registers, in 1909 put the number at 2,029,700. In 1912 the estimated population was 2½ millions. The majority of them are negroes; there are also great numbers of Mulatto Haitians, the descendants of the former French settlers. There are about 5,000 foreigners of whom about 10 per cent. are white. Capital. Port-au-Prince, with 100,000 inhabitants, situated on a large bay, and possessed of an excellent harbour. Cape Haiti has a population of about 30,000; Les Cayes about 12,000; Gonaïves, 13,000; Port de Paix, 10,000. The language of the country is French, though most of the common people speak a debased dialect known as Creole French.

### Religion and Instruction.

The religion is Roman Catholicism. There is an archbishop with 4 suffragan bishops. Public elementary education is free, the country being divided into 15 inspectors' districts. The sum allotted for public instruction amounts to nearly 1,000,000 dollars annually, but the educational system is still very imperfect, especially in rural districts. In 1910 education was made compulsory. There are 400 national schools, besides private schools, and 5 public lycées. The Deutscher Schulverein of Hamburg opened a school here in April, 1912.

### Finance.

The revenue of Haiti is derived almost exclusively from customs, paid in American gold on exports and imports. The largest portion of the expenditure is for debt charges, 2,882,468 U.S. gold dollars (331,154 gourdes). For

6 years ending September 30, the revenue is given as follows (in U.S. gold dollars for export duties and in paper gourdes worth at present 10*d.*)

—	U.S. Gold dollars	Currency gourdes	—	U.S. Gold dollars	Currency gourdes
1909-10	2,694,107	6,684,656	1912-13	3,914,480	7,571,082
1910-11	3,279,858	7,717,799	1913-14	4,788,368	4,978,003
1911-12	3,957,227	8,227,315	1914-15	4,980,146	4,959,386

Some of the more important items of expenditure are : interior relations, 54,740 gourdes and 135,635 dollars ; justice, 962,066 gourdes and 25 dollars ; war, 1,872,721 gourdes and 80,800 dollars ; navy, 251,496 gourdes and 20,500 dollars ; public works, 498,400 gourdes and 108,000 dollars ; agriculture, 261,064 gourdes and 930 dollars ; public instruction, 1,893,084 gourdes and 24,400 dollars ; finance and commerce, 1,507,638 gourdes and 27,098 dollars ; interior and police, 1,222,601 gourdes and 282,640 dollars ; public debt, 149,000 gourdes and 4,007,146 dollars ; bank service, 74,515 gourdes and 73,751 dollars.

On July 1, 1914, the debt consisted of gold loans amounting to 25,982,181 gold dollars. The currency debt amounts to 13,534,812 dollars paper, including the paper and nickel money, and the floating debt.

### Defence.

In accordance with the Law of the October 12, 1912, for the organisation of the army, the army is recruited partly by drawing lots and partly by voluntary engagements. The period of service is for 2 years. This Law fixed the strength of the active army at 5,000 men, but has not yet been thoroughly completed. The reserve troops, consisting of the former "Guard of the Government" and old line regiments, have an effective of 19,128 men.

### Production and Commerce.

The industries of Haiti are mainly agricultural, and the most important product is coffee of excellent quality, but the export duty is so considerable as to prevent the development of its cultivation. Cocoa is grown extensively and cotton is exported in increasing quantities. The cultivation of tobacco is extending, and a cigar and cigarette factory is successful. Sugar is extensively grown, and there are 4 sugar-making establishments. Rum and other spirits are distilled but not exported : the rum is of a superior quality. Logwood is an important product, and other valuable woods are now exported. Cattle breeding is neglected. The output of soap from local factories cannot compete with imports from the United States.

Haiti possesses considerable mineral resources quite undeveloped. Gold, silver, copper, iron, antimony, tin, sulphur, coal, kaolin, nickel, gypsum, limestone and porphyry are found but are little worked. Some effort has been made to work copper mines in the last few years, and concessions have been granted for mining coal, iron, and copper.

Imports and Exports for 4 years :—

—	Imports	Exports	—	Imports	Exports
	Dollars	Dollars		Dollars	Dollars
1912	9,876,555	17,285,485	1914	7,612,792	—
1913	8,717,668	—	1915	4,344,763	—

The values of imports into Haiti from various countries for the years 1914 and 1915 were as follows :—

Articles	1914	1915	Articles	1914	1915
	Dollars	Dollars		Dollars	Dollars
United States . . .	6,381,688	3,806,673	All others . . .	138,099	53,574
Great Britain . . .	409,811	296,228			
France . . .	345,190	167,779	Total . . .	7,612,702	4,344,763
Germany . . .	338,004	20,509			

The following statistics of exports are stated to cover calendar years and show only the quantities of given commodities exported from Haiti. No values are available.

Articles	1914	1915	Articles	1914	1915
Beeswax lbs.	82,445	89,862	Cotton seed lbs.	5,369,175	532,766
Cocoa . . .	6,088,084	3,467,892	Goatskins . . .	506,891	724,354
Coffee . . .	78,512,339	36,879,096	Honey gallons	1,264,690	668,632
Copper, old . . .	33,076	19,346	Logwood lbs.	54,518,800	65,599,580
Cotton . . .	3,121,839	1,762,102	Orange peel . . .	515,295	243,408

The chief imports are cottons, sacks, machinery, and iron-work.

Total trade between Haiti and the U.K. for 5 years (Board of Trade Returns) :—

	1912	1913 <sup>1</sup>	1914 <sup>1</sup>	1915 <sup>1</sup>	1916
	£	£	£	£	£
Imports . . .	810,941	115,542	74,070	87,932	94,644
Exports . . .	317,518	167,310	89,749	87,621	148,717

<sup>1</sup> For these years the figures are for Haiti alone; previous figures are for Haiti and Santo Domingo.

### Shipping and Communications.

In 1911 the registered shipping consisted of about 5 steamers of 1,410 tons (net), and 8 sailing vessels of 1,392 tons. In 1913 there entered 1,142 steam vessels of 2,244,847 tons, and 52 sailing ships of 31,918 tons. Several lines of steamers (French, Dutch, and Norwegian) connect the ports of Haiti with New York and Hamburg and other European ports.

A light railway has been constructed from Port-au-Prince to Lake Assué (28 miles), and to Léogane (22 miles), but the traffic is small. A concession has been granted the "National Railroad Company of Hayti" for a railroad from Cape Haiti to Port-au-Prince, now in construction. Total length of line, 64 miles. Port-au-Prince has 5 miles of tramway.

The principal towns are connected by the Government telegraph system. A cable runs from the Mole St. Nicholas to Santiago de Cuba and from the Mole to Port-au-Prince, and also to Cape Haiti, whence it runs to Puerto Plata (Santo Domingo) and to South America.

There are 31 post offices. Haiti joined the Postal Union in 1880. Length of telegraph lines, 124 miles.

## Money, Weights, and Measures.

The Banque Nationale de la République d'Haiti, established October 21, 1910, with a capital of 10,000,000 francs, undertakes to render services to the Government in respect of loans and other matters. In 1916, the National City Bank of New York purchased control over this bank.

The *Gourde*, or dollar, nominal value, 4s. Nickel coins are 50-, 20-, 10- and 5-centime pieces, and bronze 3-, 2-, and 1-centime pieces. The money in circulation (1912) consists of paper money, 8,289,812 gourdes; nickel coins, 7,000,000 gourdes; bronze coins, 225,000 gourdes; total, 15,514,812 gourdes. It is estimated there are also 2,100,000 dollars in American gold in circulation. The bank notes are to be issued by the "Banque Nationale de la République d'Haiti" under the control of the Haitian Government. In 1907 the premium on gold as against Haitian gourdes rose to 500 per cent. in consequence of the issue of 2,000,000 nickel gourdes. On August 19, 1912, a law was approved providing for the withdrawal from circulation within two years of 6,000,000 gourdes. On August 1, 1912, some 2,000,000 gourdes were to be withdrawn, and a similar amount on August 1, 1913, and 1914 respectively.

The weights and measures in use are those of France.

## Diplomatic and Consular Representatives.

### 1. OF HAITI IN GREAT BRITAIN.

*Minister Resident*.—Vacant.

*Secretary of Legation*.—Abel Thérard, Chargé des Archives.

*Consul*.—Maurice Erdmann.

There are consular agents at Belfast, Cardiff, Cork, Liverpool, Manchester, Southampton, Grimsby, Dundee, Glasgow.

### 2. OF GREAT BRITAIN IN HAITI.

*Minister*.—Stephen Leech (Resident in Cuba), Feb. 26, 1913.

*Chargé d'Affaires*.—Robert Mendel Kohan.

*Vice-Consul*.—E. D. Watt.

## HONDURAS.

(REPÚBLICA DE HONDURAS.)

### Constitution and Government.

THE Republic of Honduras, established September 15, 1821, is governed under a charter proclaimed October, 1894. It gives the legislative power to a Congress of Deputies consisting of 42 members, chosen for 4 years directly by popular vote, in the ratio of one per 10,000 inhabitants. It meets for 60 days on January 1 each year. The executive authority rests with a President, nominated and elected by popular vote for 4 years. The number of electors in 1911 was 107,850.

*President.*—Dr. Don Francisco Bertrand (1916–1920).

The administration of the Republic is carried on by a Council of five ministers, to whom are entrusted the departments of Foreign Relations, Government and Justice, War, Treasury and Public Credit, Public Works and Agriculture, and Instruction.

### Area and Population.

Area about 44,275 English square miles, with a population, in 1910, of 553,446 (270,722 males and 282,724 females), according to official figures, or 12·5 inhabitants to the square mile. On January 1, 1914, the population was estimated at 562,000, or 12·7 per square mile. The Republic is divided into 17 departments. La Mosquitia is still practically unexplored and is inhabited by native races who speak no Spanish. The capital of Honduras is Tegucigalpa, with 28,950 inhabitants in 1914; other towns are Pespire, 7,132; Nacaome, 8,152; La Esperanza, 11,453; Santa Rosa, 10,574; Choluteca, 8,065; San Pedro Sula, 7,820. The main ports are Amapala on the Pacific, and, on the Atlantic, Puerto Cortez (2,500), Omoa (1,000), Ulúa, La Ceiba, Trujillo, Roatan, and Tela. Amapala, on Tiger Island, is 3 hours by gasoline launch from San Lorenzo on the mainland, where a cart road starts for the capital Tegucigalpa, 88 miles. Traction is by autos and bull carts. Tegucigalpa is 5 days mule travel from the end of railroad on North Coast.

### Religion, Instruction, Justice.

The Roman Catholic is the prevailing religion, but the Constitution guarantees freedom to all creeds, and the State does not contribute to the support of any. Instruction is free, compulsory (from 7 to 15 years of age), and entirely secular. At Tegucigalpa there is a central university with faculties of medicine, and of science, law, and political sciences, also a military and automobile school, and at Comayagua there is a school of jurisprudence. For secondary instruction the Government maintains a Central Institute at Tegucigalpa, and subsidised colleges in the departments. To these colleges five normal schools are annexed. In 1913 they had 325 pupils. For primary instruction there were 916 schools with, in 1913, 40,565 pupils, and an average attendance of 25,917. The number of teachers was 1,138.

The Judicial power resides in the Supreme Court with five judges chosen directly by the people for 4 years; four Appeal Courts, and departmental and local judges.

**Finance.**

The revenue is mainly derived from customs, and from spirit, explosives, and tobacco monopolies. For the years stated, ending July 30, the revenue and expenditure are given as follows (the silver peso is worth about 1s. 8d.):—

—	1912-13	1913-14	1914-15	1915-16 <sup>1</sup>	1916-17 <sup>1</sup>
	£	£	£	£	£
Revenue . . .	433,936	453,476	473,187	556,905	421,261
Expenditure . . .	370,540	444,185	456,154	538,456	421,261

<sup>1</sup> Estimates.

On December 31, 1914, the external debt of Honduras consisted of four loans contracted as follows: 1867, 78,800*l.* and 900,700*l.*; 1869, 2,176,570*l.*; 1870, 2,242,500*l.*; amounting to 5,398,570*l.* The arrears of interest to January 1, 1917, amount to 20,472,652*l.*; total, 25,871,222*l.* No interest has been paid since 1872. The bonds of this debt were floated to build a Trans-oceanic railway, but the scheme ended in a complete failure. Afterwards the Government took over the railway, which is slowly being extended, and pays its way.

The internal debt on August 31, 1915, was stated to amount to 347,157*l.*

**Defence.**

Every citizen of Honduras belongs to the regular army from the age of 21 to 35; to the reserves from the age of 35 to 40. Foreigners are exempt from service, naturalised citizens being exempt for 10 years. The permanent troops consist of about 2,000 officers and men, the reserve of 54,000 men.

**Production and Industry.**

The chief culture is that of bananas, mostly on the Atlantic coast, where cocoanuts are also grown. The coconut groves of Puerto Sal extend from the Ulua River to the Cuero River, a distance of about 60 miles, and are said to contain 28,182 fruit-bearing trees. Rubber is produced in slowly increasing quantity; coffee of fine quality is grown, and the industry is increasing. Tobacco too is grown. While the Department of El Paraiso has become noted for its fine quality of tobacco, the Department of Copan still leads in quantity, producing 75 per cent. of the total amount raised in the Republic. This finds a market in the neighbouring Republics and also in Peru. In 1914-15 there was produced 2,248,445 quintals (of 100 pounds) of corn, 140,312 quintals of beans, 246,551 quintals of maicillo (a small primitive corn), 32,586 quintals of rice, 8,606 quintals of wheat, 38,601 quintals of coffee, and 6,069,379 bunches of bananas.

Honduras is essentially a cattle producing country. The total number of farms was 3,658; of cattle ranches, 1,561. Cattle breeding is carried on extensively, and dairy farming on a small scale. In 1914 there were within the Republic 489,185 head of cattle, 68,059 horses, 24,700 mules, 180,092 pigs, and 22,778 goats. About 150,400 acres are devoted to pasture.

The mineral resources of Honduras are—gold, platinum, silver, copper, lead, zinc, iron, antimony, nickel, some of them being found in almost every department. Gold, bar silver, some copper and lead, and various

ores are exported. Deposits of brown and other coal have also been found. The chief requisites for the development of the mining industries are capital, and facilities for transport.

Straw hats and cigars are the only articles of home manufacture exported. A very good quality of Panama hat is manufactured in the Departments of Copan and Santa Barbara. There are in all 106 registered factories of all classes in the Republic, mostly for making aguardiente, soda water, cigars, sugar, soap, candles, shoes, and artificial ice, besides minor establishments.

### Commerce.

Imports and exports for 5 years :—

—	1910-11	1911-12	1912-13	1913-14	1914-15
	£	£	£	£	£
Imports . . .	539,181	652,957	1,026,535	1,344,986	1,226,709
Exports . . .	604,945	616,035	660,051	684,266	737,838

The Customs receipts for 1915 totalled 207,163*l*.

The principal exports from Honduras are bananas, coconuts, coffee, hides, rubber, cattle, and mahogany.

The total trade was distributed as follows :—

Countries	Imports		Exports	
	1914-15	1913-14	1914-15	1913-14
	Dollars	Dollars	Dollars	Dollars
United States . . .	5,177,000	5,262,012	3,041,000	2,974,157
United Kingdom . . .	327,000	459,762	14,000	53,000
Germany . . .	96,000	521,837	763	164,607
France . . .	55,000	142,000	—	4,000
Guatemala . . .	89,000	54,000	45,000	181,000

In February, 1916, Congress agreed to the establishment of a free port, which is to be called Puerto Herrera, and will be built at the point where the Cruta River joins the Bay of Caratasca.

The treaty of Commerce and Navigation of 1915 provides for the “most favoured nation” treatment between the United Kingdom and Honduras.

Total trade between Honduras and United Kingdom for 5 years was as follows :—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Honduras . . .	19,365	1,213	2,829	18	617
Exports to Honduras . . .	133,625	126,768	104,596	44,413	52,395

In 1912 the registered shipping comprised 2 steamers of 1,563 tons and 3 sailing vessels of 363 tons; total tonnage, 1,935 tons. The trans-

port of fruit, &c., to the United States is effected largely by steamships, some of them built for the purpose. Puerto Cortez, La Ceiba, and Tela are visited by the boats of three American companies; in autumn fruit is shipped at Roatan in American boats. Amapala, on the Pacific coast, is visited by the steamers of the Pacific Mail Steamship Company, and of the Salvador Railway SS. Co. and Ward Line, direct from New York via Canal.

In 1911, 771 steamers and 2,444 sailing vessels entered, and 705 steamers and 2,412 sailing vessels cleared the ports of Honduras.

### Communications.

In general, travelling and transport are accomplished by means of mules and ox-carts. Slow improvements in road-making and repairing are beginning to be made. The cart road from Tegucigalpa to the coast is now in a good state of repair, and there is a good mail service by automobiles; indeed, motor-cars are coming more and more into use. There is a railway of 61 miles from Puerto Cortez to San Pedro Sula and La Pimienta; the line, which was taken over by the Government in 1912, has been almost completely overhauled and repaired, and is now in a condition to meet the heavy demands made upon it by the banana crop. A bridge has been built and paid for out of profits, to span the Ulua River. The railway has now reached Potrerillos (Potre), 3 miles after crossing the river, and the Government intends to devote all future profits to further construction. It may, however, be many years before the line can reach the capital. Some 15 miles of line has been constructed from Vera Cruz, 25 miles west of Puerto Cortez, to tap banana lands. Construction work has started on a line from the Port of Tela (east of Puerto Cortez) destined to reach El Progreso. Construction work has started on a line from Trujillo destined to reach Juticalpa and the capital. Total length of line (1916) 320 miles.

In 1914 there were 278 post-offices; the internal correspondence amounted to 807,618 letters, &c.; the foreign correspondence to 630,279 letters, &c. In 1914 there were 259 telegraph offices and 4,307 miles of telegraph line. The telephone, with 100 miles of line and 95 stations, is in use in the capital and most other towns.

### Money, Weights, and Measures.

The silver *peso* or *dollar*, of 100 cents, weighs 25 grammes, .900 fine. The fractional silver money consists of 50, 25, 20, 10, and 5 cent pieces. The *real* is also in popular use. It is equivalent to  $12\frac{1}{2}$  cents. There is a 1-cent and a 2-cent copper coin. The monetary unit is the silver peso, which (1914) was worth about 1s. 7d., but went down considerably in 1915. In September, 1916, the exchange was at the rate of 4.80 gold dollars to 1£. On February 16, 1910, the mint of Honduras was opened after having been closed two years, owing to the fact that most of the silver in bars is exported to other countries. In August, 1910, the Government coined some silver, but chiefly copper coins, to replace the amount which disappeared from circulation. It has gathered about 84,000 copper coins and expects to coin new ones to the amount of 1,000,000.

There are three banks in the Republic, the 'Banco de Honduras,' with a capital of 417,000 pesos, the Banco de Comercio (March 1, 1913), with a capital of 500,000 pesos, and the Banco Atlantida (1913), with a capital of 500,000 dollars (about 625,000 pesos). The total bank notes of the three banks amount to 785,000 pesos. The amount of silver in active circulation in the country is estimated by the different banks at 2,000,000 to 3,000,000

pesos. Taking 2,500,000 pesos as an average and adding 785,000 pesos in paper money it will be seen that the actual money in the country is only 3,285,000 pesos.

The metric system of weights and measures has been legal since April 1, 1897, but English pounds and yards and the old Spanish system are still in general use :

1 <i>Vara</i>	.	.	.	.	.	= 32 inches.
1 <i>Arroba</i>	.	.	.	.	.	= 25 lb.
1 <i>Quintal</i>	.	.	.	.	.	= 100 lb.
1 <i>Tonelada</i>	.	.	.	.	.	= 2,000 lb.

## ITALY.

(REGNO D'ITALIA.)

## Reigning King.

**Vittorio Emanuele III.**, born November 11, 1869, the only son of King Umberto I. of Italy and of Queen Margherita; succeeded to the throne on the death of his father, July 29, 1900; married October 24, 1896, to *Elena*, born January 8, 1873, daughter of Nicholas, King of Montenegro; offspring, Princess *Jolanda*, born June 1, 1901; Princess *Mafalda*, born November 19, 1902; Prince *Umberto*, Nicola Tommaso Giovanni Maria, Prince of Piedmont and Heir Apparent, born Sept. 15, 1904; Princess *Giovanna*, born November 13, 1907; Princess *Maria*, born December 26, 1914.

*Mother of the King.*

Queen *Margherita*, born November 20, 1851, the only daughter of the late Prince Ferdinando of Savoy, Duke of Genoa, married, April 22, 1865, to Umberto of Savoy, Prince of Piemonte (King of Italy, 1878), widow July 29, 1900.

*Cousins of the King.*

Prince *Emanuele Filiberto*, of Savoy, Duke of Aosta, born January 13, 1869, married, June 25, 1895, to Princess *Elena*, d'Orleans, daughter of the late Comte de Paris; offspring, Prince *Amedeo Umberto*, Duke of Apulia, born October 21, 1898, and Prince *Aimone*, Duke of Spoleto, born March 9, 1900; Prince *Vittorio Emanuele*, of Savoy-Aosta, Count of Turin, born November 24, 1870; Prince *Luigi Amedeo*, of Savoy-Aosta, Duke of the Abruzzi, born January 30, 1873; Prince *Umberto Maria* of Savoy-Aosta, Count of Salemi, born June 22, 1889—children of the late Prince Amedeo of Savoy, Duke of Aosta; the first three from his union with Maria Vittoria, Princess of Pozzo della Cisterna, who died November 8, 1876; the last from his union with the Princess Maria Laetitia Napoleone.

Most genealogists trace the origin of the reigning house to a German Count Berthold, who, in the eleventh century, established himself on the western slope of the Alps, between Mont Blanc and Lake Lemman. In the end of the eleventh century the Count of Savoy acquired the countries of Turin and Susa. Count Amadeus, in 1383, founded a law of primogeniture which led to the immediate acquisition of the territory of Nice. In 1416 the Counts of Savoy adopted the title of Duke; in 1418 they acquired the Principality of Piedmont; and in 1713 they obtained the island of Sicily, with the title of King. Sicily had to be exchanged, in 1720, for the isle of Sardinia, to which henceforth the royal dignity remained attached. The Genoese territory was added at the peace of 1815. The direct male line of the House of Savoy died out with King Carlo Felice in 1831, and the crown fell to Prince Carlo Alberto, of the house of Savoy-Carignano, a branch founded by Tommaso Francesco, born in 1596, younger son of Duke Carlo Emanuele I. of Savoy. King Carlo Alberto abdicated the throne March 23, 1849, in favour of his son, the late King Vittorio Emanuele II., who, by the Peace of Zürich, November 10, 1859, obtained Lombardy, with the exception of Mantua and a part of the surrounding territory. On March 11, 1860, annexation to Sardinia was voted by *plébiscites* in Parma, Modena, the Romagna, and Tuscany; on October 21, Sicily and Naples (including *Benevento* and *Pontecorvo*, part of the Papal States), and on November 4, the Marches and Umbria. The first Italian Parliament assembled in February 1861, and declared (March 17, 1861) Vittorio Emanuele King of Italy. The remaining part of the province of Mantua and Venetia were added in 1866. Finally, the remaining part of the Papal States (province of Rome), having been taken possession of by an Italian army (September 20, 1870), after the withdrawal of the French garrison, was annexed to the Kingdom by *plébiscite* on October 2.

The civil list has been settled at 16,050,000 lire.<sup>1</sup> From this amount the children of the late Prince Amedeo, Duke of Aosta, receive jointly allowance of 400,000 lire; Prince Tommaso, Duke of Genoa, an allowance of 400,000 lire; and Queen Margherita, an allowance of 1,000,000 lire.

The greater part of the private domains of the reigning family were given up to the State in 1848.

### Constitution and Government.

The present Constitution of Italy is an expansion of the 'Statuto fondamentale del Regno,' granted on March 4, 1848, by King Charles Albert to his Sardinian subjects. According to this charter, the executive power of the State belongs exclusively to the Sovereign, and is exercised by him through responsible ministers; while the legislative authority rests conjointly in the King and Parliament, the latter consisting of two Chambers—an upper one, the Senate, and a lower one, called the 'Camera de' Deputati.' The Senate is composed of the princes of the royal house who are twenty-one years of age (with the right to vote when twenty-five years of age), and of an unlimited number of members, above forty years old, who are nominated by the King for life; a condition of the nomination being that the person should either fill a high office, or have acquired fame in science, literature, or any other pursuit tending to the benefit of the nation, or, finally, should pay taxes to the annual amount of 3,000 lire, or 120*l*. In 1916 there were 395 senators and six members of the royal family. The electoral law of June 30, 1912, made the suffrage almost universal for men 21 years of age, only denying the franchise to those younger than 30 who have neither performed their military service nor learnt to read and write. The number of deputies is 508, or 1 to every 71,000 of the population (census 1911). In 1913 the number of enrolled electors was 8,672,249 (24 per 100 inhabitants without distinction of sex or age) inclusive of the electors temporarily disfranchised on account of military service. For electoral purposes the whole of the Kingdom is divided into 508 electoral colleges or districts, and these again into several sections. No deputy can be returned to Parliament unless he has obtained a number of votes greater than one-tenth of the total number of inscribed electors, and than half the votes given. A deputy must be thirty years old, and have the requisites demanded by the electoral law. Incapable of being elected are all salaried Government officials, as well as all persons ordained for the priesthood and filling clerical charges, or receiving pay from the State. Officers in the army and navy, ministers, under-secretaries of State, and various other classes of functionaries high in office, may be elected, but their number must never be more than forty, not including the ministers and the under-secretaries of State. All deputies receive 2,000 lire (80*l*.) annually, to cover the expense of correspondence. A further payment of 4,000 lire (160*l*.) per annum is made to those deputies who receive no income from any public funds whatsoever; while those who do enjoy such a source of income may claim the difference between what they receive and 4,000 lire. All deputies and senators travel gratis on the railways.

Lower House, elected October, 1913: Constitutionalists, 318; Radicals, 70; Republicans, 16; Socialists, 77; Syndicalists, 3; and Catholics, 24.

The duration of a Parliament is five years, and it must meet annually; but the King has the power to dissolve the lower House at any time, being bound only to order new elections, and convoke a new meeting within four

<sup>1</sup> The amount of the civil list is, in fact, 15,050,000 lire, because the King repays to the State the annuity settled on Queen Margherita by law of December 6, 1900.

months. Each of the Chambers has the right of introducing new bills, the same as the Government; but all money bills must originate in the House of Deputies. The ministers have the right to attend the debates of both the upper and the lower House; but they have no vote unless they are members. No sitting is valid unless an absolute majority of the members are present.

The executive power is exercised, under the King, by a ministry divided into 14 departments. The ministry, constituted June 17, 1916, is as follows:—

*President of the Council.*—Signor Paolo Boselli.

*Minister of the Interior.*—Signor Vittorio Emanuele Orlando.

*Minister of Foreign Affairs.*—Baron Sidney Sonnino.

*Minister for the Colonies.*—Signor Gaspare Colosimo.

*Minister of Justice and of Ecclesiastical Affairs.*—Signor Ettore Sacchi.

*Minister of the Treasury.*—Signor Paolo Carcano.

*Minister of Finance.*—Signor F. Meda.

*Minister of War.*—General Paolo Morroc (Senator).

*Minister of Marine.*—Admiral Camillo Corsi (Senator).

*Minister of Public Instruction.*—Signor Francesco Ruffini.

*Minister of Public Works.*—Signor Ivanoe Bonomi.

*Minister of Agriculture.*—Signor Giovanni Raineri.

*Minister of Industry, and Commerce.*—Signor Giuseppe de Nava.

*Minister of Posts and Telegraphs.*—Signor Luigi Fera.

*Political Commissioner for War Services.*—Signor Leonida Bissolati.

*Minister of Railways and Merchant Marine.*—Signor Enrico Ariotta.

*Ministers without portfolio.*—Signor Ubaldo Comandini, L. Bissolati-Bergamesco, L. Bianchi, V. Scialoja, and T. Tittoni.

#### LOCAL GOVERNMENT.

The administrative divisions of Italy are provinces, territories (*circondari*) districts (*mandamenti*), and communes. There are 69 provinces which are divided into 214 territories (*circondari*). The territories and districts are divided into communes.

In 1917 (January 1) there were 8,344 communes. The two principal elective local administrative bodies are the communal councils and the provincial councils. According to the law of February 4, 1915, each commune has a communal council, a municipal council, and a syndic. Both the communal councils and the municipal councils vary according to population, the members of the latter being selected by the former from among themselves. The syndic is the head of the communal administration, and is a Government official; he is elected by the communal council from among its own members, by secret vote. Each province has a provincial council and a provincial commission, the numbers varying according to population. The council elects its president and other officials. The provincial commission is elected by the council from its own members. It conducts the business of the province when the latter is not sitting. Both communal and provincial councillors are elected for 4 years. The communal council meets twice and the provincial once a year in ordinary session, though they may be convened for extraordinary purposes. All communal electors are eligible to the council except those having an official or pecuniary interest in the commune. Electors must be Italian citizens, resident in the province, twenty-one years of age, able to read and write, be on the Parliamentary electoral list, or pay a direct annual contribution to

the commune, of any nature, or comply with other conditions of a very simple character.

In 1911 the number of enrolled *administrative* electors was 4,011,038 (11·2 per cent. of population). As a result of the amended law of June 19, 1913, the number of these electors, in 1914, was 9,554,273 (26·7 per cent. of population).

### Area and Population.

The following figures show the increase of the population of the present territory of the Kingdom of Italy (from 1816 to 1901 in round numbers):—

Year (1 Jan.)	Population	Increase per cent. per annum	Year (1 Jan.)	Population	Increase per cent. per annum
1816	18,383,000	—	1912	34,813,975	1·04 <sup>3</sup>
1872	26,801,000	0·720	1913	35,238,997	
1882	28,460,000	0·619	1914	35,597,784	
1901 <sup>1</sup>	32,475,000	0·738	1915	36,120,118	1·17 <sup>3</sup>
1911 <sup>2</sup>	34,671,377	0·658	1916	36,546,437	1·18 <sup>3</sup>

<sup>1</sup> February 10.

<sup>2</sup> June 10.

<sup>3</sup> Mean Annual Increase.

In the following table areas of 19 provinces marked with an asterisk are definitely ascertained by the Government Survey Department; the others are estimated by the General Statistical Department:—

Provinces and Departments.	Area in square miles	Population Present				Population per square mile, 1915

The resident population (*i.e.* having habitual residence in Italy, including persons temporarily absent) on June 10, 1911, numbered 35,845,048.

The number of foreigners in Italy in 1911 was 79,756, the principal being: 15,006 French, 11,911 Austrians and Hungarians, 11,121 Swiss, 10,715 Germans, 6,154 English, 4,963 Americans, 4,064 Argentinians, 3,009 Brazilians, 1,892 Russians, 1,533 Spaniards, 1,187 Turks, 930 Belgians, 766 Greeks.

The population of Italy is in general perfectly homogeneous. According to statistics of 1911, the exceptions are: about 83,300 of French origin; 9,600 of Teutonic origin; 81,000 of Albanian origin; 29,000 of Greek origin; 11,700 of Spanish (Catalan) origin, and 42,200 Slavs.

The population over 15 years of age in 1911 was 22,817,755; of these 8,039,129 were unmarried, 12,613,993 (of whom 34,090 were either separated or divorced) were married, 2,147,325 were widowers or widows, and 17,308 were returned as State unknown. Of the whole population, 19,789,718 or 57·3 per cent. were unmarried; 12,629,930 (of whom 34,163 were either separated or divorced), or 36·5 per cent. were married; 2,151,168 or 6·2 per cent. were widowers or widows, and 100,561 were returned as State unknown.

For the population according to occupation in 1911, exclusive of children under 10 years, see THE STATESMAN'S YEAR-BOOK, for 1916, p. 1065.

Number of proprietors in Italy, 1911:—Proprietors of lands, 1,326,736; of buildings, 732,484; of lands and buildings, 1,737,341; total, 3,796,561. Proprietors of lands and buildings (3,796,561) per 100 of population, 11; proprietors of lands (3,064,077) per square mile, 27.

#### MOVEMENT OF POPULATION.

Births, deaths, and marriages:—

Year	Marriages	Births Living			Stillborn	Deaths exclusive of the Stillborn	Surplus of Births
		Legitimate	Illegitimate and Exposed	Total			
1913	264,235	1,070,263	52,219	1,122,482	46,871	663,966	458,516

<sup>1</sup> Including 30,006 who died in the earthquake of January 13, 1915.

*Emigrants.*—Total number in 1915, 149,910, of whom 79,998 went to other European countries or those bordering on the Mediterranean, and 65,912 to countries overseas (United States, 51,098)

The number of Italians who returned to Italy was:—In 1915, 167,925 (of whom 104,265 were from the United States); in 1914, 219,000 (of whom 157,000 were from the United States).

The number of Italians abroad was officially estimated in 1910 at about 5,558,000. In 1901 a Commission, under the Ministry of Foreign Affairs, was established for the direction of the Government service relating to emigration. There is now regular inspection, and a medical officer watches over the emigrants while at sea.

#### PRINCIPAL TOWNS.

The numbers of inhabitants at the different centres do not in Italian statistics afford a sufficient basis for distinguishing between the urban and rural population. In Northern Italy the population is scattered over the country and there are few centres. In Southern Italy and in the islands the country people live in the towns, coming and going to cultivate their own plots of land; consequently there are many populous centres where, if numbers alone were considered, the population would be regarded as urban, though it is, in truth, almost exclusively rural. The following statement gives the classification of communes according to resident population in 1914, on the basis of the 1911 census:—

	Number.	Population	Per 1,000.
Communes with population over 100,000 . . . . .	13	3,906,075	109·0
From 50,001 to 100,000 . . . . .	29	1,925,546	53·8
From 30,001 to 50,000 . . . . .	51	1,948,849	54·3
From 20,001 to 30,000 . . . . .	99	2,342,873	65·4
From 15,001 to 20,000 . . . . .	98	1,667,812	46·5
Others . . . . .	8,049	24,054,393	671·0
Total . . . . .	8,339	35,845,048	1,000·0

The estimated communal population of the capitals of provinces was as follows on January 1, 1915 :—

Communes	Popula- tion	Communes	Popula- tion	Communes	Popula- tion
Napoli . . . . .	697,917	Perugia . . . . .	70,227	Lecce . . . . .	37,790
Milano . . . . .	663,059	Pisa . . . . .	67,285	Catanzaro . . . . .	37,836
Roma . . . . .	590,960	Ancona . . . . .	68,430	Caserta . . . . .	32,856

Modena . . . . .	76,584	Piacenza . . . . .	40,362	Porto Maurizio . . . . .	8,039

### Religion.<sup>1</sup>

The Roman Catholic Church is, nominally, the ruling State religion of Italy; but the power of the Church and clergy is subordinated to the civil government, and there is freedom of worship to the adherents of all recognised religions. The census returns of 1911 were as follows :—

Profession	Total	Per cent.
Roman Catholics . . . . .	32,983,664	95·13
Evangelical Protestants . . . . .	123,253	0·36
Jews . . . . .	34,324	0·11
Other professions . . . . .	2,200	—
Not professing any religion . . . . .	874,532	2·52
Not known . . . . .	653,404	1·88
Total . . . . .	34,671,377	100·00

<sup>1</sup> See also Rome, See and Church of,

Of the Protestants, 22,500 belonged to the Waldensian Church of Piedmont, about 10,000 to the other evangelical Italian Churches, and 30,000 to foreign Protestant bodies.

Under the Roman Pontiff, the Catholic episcopal hierarchy in Italy consists of 49 archbishoprics and 225 bishoprics, besides the 6 cardinal bishoprics near Rome. Of these prelacies, 74 are immediately subject to the Apostolic See, 13 being archbishoprics. Every archbishop or bishop is appointed by the Pope, on the advice of a committee of Cardinals; but the royal *exequatur* is necessary for his installation. In 1911, the number of parishes was 20,707. According to the census, 1911, the secular clergy numbered 67,147: the regulars (monks, lay-brothers, nuns, &c.), 45,253; sacristans, &c., 10,561; persons employed at the Pontifical and Episcopal Courts, &c., 284<sup>1</sup>. There were in 1911, 358 Evangelical pastors and ministers, and 54 Jewish Rabbis.

The suppression of the religious corporations began in 1855, and was completed by the law of June 19, 1873, which extended the measure to the city and province of Rome. The method followed was simply the abolition of the legal status of religious corporations, so that they could not hold property. Thus mortmain land was set free for agriculture and for buying and selling, while the State profited by relief from burdens and by direct taxation of the land thus freed from mortmain. Dispossessed monks and nuns received life pensions; houses which had been used for schools or for hospitals, &c., were, with restrictions, made over to the communes; in Rome, the hospitals, &c., were assigned to the various charitable institutions; everywhere the churches of the corporations necessary for public worship were preserved, as were monumental, artistic, and other corporation buildings. Of the monastic edifices some were occupied by the State, others assigned to communes or provinces. The corporations of Lombardy were privileged by the treaty of Zürich, and their lands and houses were left to the disposal of their individual members. All other immovable corporation property was sold, but the equivalent revenue (after certain deductions, including a 30 per cent. tax) was inscribed in the public debt book. The administration of the revenue from the proceeds of land destined for charity or instruction now belongs to the communes; that from monastic parish church property in Rome, to the parish churches; that from property of foreign religious orders in Rome (400,000 lire) to the Holy See; while the remainder is administered by two institutes which pay the pensions and other dues, and provide (1) for beneficent work and for worship in Rome; and (2) for worship in the rest of Italy.

### Instruction.

The State regulates public instruction, and maintains, either entirely or in conjunction with the communes and provinces, public schools of every grade. Every teacher must have the qualifications required by law.

Schools in Italy may be classified under four heads, according as they provide: (1) elementary instruction; (2) secondary instruction—classical; (3) secondary instruction—technical; (4) higher education.

(1) Schools providing elementary instruction are of two grades. Religious instruction is given to those whose parents request it. Only the *lower-grade* instruction is compulsory. Every commune must have at least one lower-grade school for boys and one for girls; and no school with only one master should have more than seventy pupils. Higher-grade elementary schools are required in communes having normal and secondary schools, and in those with over 4,000 inhabitants. In both grades the instruction is free. The age-limit of 6 to 9 exists for communes where there is no higher elementary

<sup>1</sup> In this total are not comprised the priests, monks, nuns, etc., engaged in education (males, 1,343, females, 3,869), or as nurses (males, 450, females, 3,147).

school, but where there is such higher school, children are required to attend till they have completed the course of instruction, the compulsory age being thus raised to 12 years. This law provides that illiterate persons shall be under various disabilities.

(2) Secondary instruction—classical—is provided in the *ginnasi* and *licei*, the latter leading to the universities.

(3) Secondary instruction—technical. This is supplied by the technical schools, technical institutes, and institutes for the mercantile marine.

(4) Higher education is supplied by the universities, by other higher institutes, and by special higher schools.

In the 46 years 1862-1907, there has been an increase of 156 per cent. in school attendance. Percentage of illiterates :—

Year	Over 6 Years		Over 21 Years	
	Male	Female	Male	Female
1882	54·6	69·3	53·9 <sup>1</sup>	72·9 <sup>1</sup>
1901	42·5	54·4	43·9	60·4
1911	32·6	42·4	34·7	48·5

<sup>1</sup> Over 20 years (1882).

According to the census of 1911 the smallest percentage of illiterates above six years was in Piedmont, male 9·1, female 12·8 (male and female 11·0); and the largest in Calabria, male 59·5, female 78·1 (male and female 69·6). Since then there has been much improvement, and now there are circondari (arrondissements), e.g. Domodossola Pallanza, and Varallo in the province of Novara, and others in the provinces of Turin, Como, Cuneo, &c., where all young people twenty years of age can read and write.

There were, also, 35 schools of agriculture (1914-15) with 1,705 students; 3 schools of mining with 67 students; 103 industrial schools with 25,968 students; 292 schools of design and moulding with 30,056 students; 43 professional schools for girls with 9,486 students; 17 *Government* commercial schools with 1,405 students, and 30 *private* commercial schools in the principal centres; 13 Government fine art institutes with 2,660 students; and 13 non-Government with 1,684 students; 5 Government institutes and conservatoires of music with 1,064 students, and 46 non-Government with 4,604 students.

## Justice and Crime.

Italy has 5 Courts of Cassation (4 of which have jurisdiction exclusively in civil matters), and is divided for the administration of justice into 20 appeal court districts, subdivided into 162 tribunal districts, and these again into mandamenti, each with its own magistracy (*Pretura*), 1,535 in all. In 12 of the principal towns there are also *Pretori urbani* (14), who have jurisdiction exclusively in penal matters. For civil business, besides the magistracy above-mentioned, *Conciliatori* have jurisdiction in petty complaints.

The Pretori have jurisdiction concerning all misdemeanours (*contravvenzioni*) and offences (*delitti*) punishable by imprisonment (reclusion and detention) not exceeding three months, or banishment not exceeding one year, or by fine not exceeding 1,000 lire. The penal Tribunals have jurisdiction in the first instance in offences (*delitti*) for which the Code establishes a *minimum* penalty not exceeding five years of imprisonment and a *maximum* not exceeding ten years, or in offences punishable by a fine, exceeding 1,000 lire.

The Courts of Assize, which in all cases have juries, have jurisdiction in all proceedings concerning serious offences punishable by imprisonment for life (*ergastolo*), or by imprisonment (reclusion and detention) exceeding in the *minimum* five years, and in the *maximum* ten years. They have exclusive jurisdiction (save that the Senate is, on occasion, a high Court of Justice) concerning offences against the internal and external security of the State, and all press offences. Appeal is allowed to the penal Tribunals from the sentences of the Pretori, and to the Courts of Appeal from those of the penal Tribunals. There is no appeal from sentences of the Courts of Assize. The Court of Cassation in Rome has power to annul, for illegality, sentences passed by the inferior magistracy and to decide questions of jurisdiction or competency.

Statistics of persons convicted of offences of all kinds —

Year	Convictions			
	Total	Before the Pretori	Before the Tribunali (first instance)	Before the Corti d'Assise
1913	566,787	494,158	70,893	1,736
1914	549,590	494,473	53,683	1,434
1915	393,739	345,347	46,498	1,984

In 1915 (January 1) there were 38,205 males and 2,086 female prisoners; and 22,666 male and 1,183 females were placed in reformatories. At that date there were 173 central and arrondissement prisons, 70 penal establishments, 41 reformatories, and 8 colonies for persons under domiciliary restraint. There were, besides, 1,504 cantonal prisons.

### Pauperism.

In Italy legal charity, in the sense of a right in the poor to be supported by the parish or commune, or of an obligation on the commune to relieve the poor, does not exist. Public charity in general is exercised through the permanent charitable foundations, called 'Opere pie,' regulated by the law of July 17, 1890. The general results of an inquiry in 1900 were:— Leaving out of account institutions intended for lending, or for the encouragement of saving (that is, monti di pietà, monti frumentari, casse di prestanze agrarie), there were 27,078 opere pie, with a gross capital of about 2,205,000,000 francs. Their net income amounted to 52,559,000 lire. Added to this net income were casual legacies, contributions from private benefactors, subsidies from communes (for hospitals), &c., all of which receipts are spent annually, and thus the sum at the disposal of the opere pie in 1900 (last available data) amounted to 120,765,000 lire. Between 1901 and 1914 the capital of all the benevolent institutions was increased by 313 million lire (about twelve million pounds sterling).

### Finance.

#### *Revenue and Expenditure.*

Direct taxes are those on lands, on houses, and on incomes derived from movable capital and labour. The tax on lands amounts to about 86 million lire. That on houses is at the rate of 12·5 per cent. (with three-tenths additional) of the amount taxable, which is two-thirds of the real annual value in the case of factories, and three-fourths in the case of dwelling houses. In 1914-15 this tax brought in about 123 million lire. The tax on incomes from movable wealth was raised to 20 per cent. of the amount taxable. The amount taxable in the case of incomes varies from the whole income to fifteen-fortieths according to various conditions. This tax in 1914-15 amounted to 383 million lire. The communes and provinces also tax lands and buildings. The State grants to the communes one-tenth of the proceeds of the tax on incomes as compensation for other communal revenues made over to the State by various laws.

The principal indirect taxes are:—the customs duties, the octroi, the taxes on manufactures, the salt and tobacco monopolies, lotto.

<sup>1</sup> By-law of May 1, 1912, the interest on the 5 p.c. (gross) and 4 p.c. (net) consolidated debts is reduced from  $3\frac{3}{4}$  p.c. (net) to  $3\frac{1}{2}$  p.c.

The capital (nominal) of the consolidated and redeemable debt amounted to 15,927,718,517 lire on July 1, 1915, or 637,108,740*l.* sterling, and the interest to 572,101,926 lire, or 22,884,076*l.* sterling.

On June 30, 1915, the property of the State was as follows:—

	Estimated Value. Lire
Financial assets (Treasury)	2,491,663,472
Property, immovable, movable, loans, and various titles	2,799,374,277
Property of industrial nature	4,954,438,807
Material in use in army and navy	2,675,562,322
Property used in the service of the State	958,947,980
Scientific and artistic material	263,540,807
Gold in depôt	11,542,835
Total.	14,155,070,500

In the financial year 1914-15 the revenue from State property was:—Ecclesiastical, 399,799 lire; from fixed capital, 9,855,670 lire; from the Cavour Canals, 3,375,810 lire; various, 2,723,807 lire; total, 15,955,288.

## Defence.

### I. FRONTIER.

The extent of the land frontier of Italy is as follows:—French frontier 300 miles; Swiss 418; Austro-Hungarian 484; frontier of San Marino 24; in all (exclusive of San Marino) 1,202 miles. The coast line of the peninsula measures 2,052 miles; of Sicily, 630; of Sardinia, 830; of Elba and the small islands, 648; the total length of coast is thus 4,160 miles.

On the Continental frontier of Italy the principal passes of the Alps are defended by fortifications. The basin of the Po is also studded with fortified places; the chief strong places in the region are the following:—Casale, Piacenza, Verona, Mantua (these two belong to the old Austrian Quadrilateral), Venice, Alessandria. On the coasts and islands are the following fortified places:—Vado, Genoa, Spezia, Monte Argentaro, Gaeta; works in the Straits of Messina, Táranto. To the north of Sardinia a group of fortified islands form the naval station of Maddalena. Rome is protected by a circle of forts.

### II. ARMY.

Service in the army (or navy) is compulsory and universal. The total period is 19 years, beginning at the age of twenty. The young men of the year are divided into 3 categories; the first being posted to the permanent army; the second also to the permanent army but with 'unlimited leave'; and the third, that is those exempted from active service, to the territorial militia. The second category men form what is called the 'complementary force.'

The term of service in the ranks of the permanent army is 2 years for all arms. After passing through the ranks, the men are placed on 'unlimited leave,' *i.e.*, they are transferred to the reserve, in which they remain until they have completed a total of 8 years' service. From the reserve the soldier passes to the mobile militia, the term of service in which is 4 years. After completing his time in the mobile militia he is trans-

ferred to the territorial militia, in which he remains 7 years ; thus finishing his military service at the age of 39.

The second category recruits are regarded as belonging to the permanent army for the first 8 years of their service. During this period they receive from 2 to 6 months' training, which may be spread over several years. They then pass to the mobile militia, and afterwards to the territorial militia, the periods of service in each being the same as in the case of the first category soldiers. The men allotted to the third category, who are posted at once to the territorial militia, receive 30 days' training.

In Italy each regiment receives recruits from all parts of the country, and the troops change their stations by brigades every four years. On mobilisation regiments would be filled up by reservists from the districts in which they are quartered at the time. Reliefs are so arranged that at least half the reservists shall have previously served in the unit which they would join on mobilisation.

The field army consists of 12 army corps and 3 cavalry divisions. The army corps consist of 2 divisions, except the IXth army corps, in the Roman district, which has an additional division. There are two brigades of infantry each consisting of two regiments of three battalions, and a regiment of field artillery (5 batteries) to each division, which has a war strength of 14,156 officers and men, 1,399 horses, and 30 guns. There is a regiment of field artillery (6 batteries of 6 guns), 2 or 3 heavy batteries, a cavalry regiment, and a regiment of Bersaglieri, to each army corps. Cavalry divisions each consist of 2 brigades of 2 regiments, and of 2 horse artillery batteries.

Each regiment of Bersaglieri (light infantry) consists of 3 battalions of infantry and 1 battalion of cyclists, the cyclists being intended to supplement the cavalry in the field. The Alpini are frontier troops, specially organised to defend the mountain passes leading into Italy ; they consist of 8 regiments (26 battalions) of Alpine infantry, and 2 regiments of 36 mountain artillery batteries. There are, furthermore, 1 regiment of horse artillery of 8 batteries, 2 regiments of heavy artillery of 10 batteries each, and 10 regiments of fortress artillery. The engineers are organised as 6 regiments : 2 consist of pioneers, 1 of pontoon troops, 1 of telegraph troops, 1 of sappers and miners, and 1 of railway troops. The aeronautical service consists of a 'specialist battalion' of 5 companies, of an experimental section, of a 'flying battalion' of 2 companies, and of a growing number of field squadrons of 7 aeroplanes each ; there were to be 30 complete during the course of 1914. Italy possessed 9 airships in 1913.

The Carabinieri are a force of military police. They are recruited by selection from the army, and they remain in the ranks of the force until they have completed 3 years' service. They then serve in the reserve of the carabinieri for 4 years, after which they are transferred to the territorial militia for the remainder of their service, and are reckoned as a part of the army.

The strength of the field army (12 army corps and independent cavalry) is about 400,000 combatants. The nominal strength of the mobile militia is 326,000, but the numbers put into the field would not perhaps exceed 200,000. The 'complementary' troops should be sufficient to maintain the strength of the first line and mobile militia in the field. The territorial militia is strong numerically, but only about half the number, viz., the first category men who have passed through the army and mobile militia, could be made use of, should its services ever be required.

The arm of the Italian infantry is the Mannlicher Carcano rifle, a magazine weapon of 6.5 mm. calibre. The territorial militia has the old Vetterli.

The field artillery is being rearmed with the De Port gun and carriage, calibre 7·5 cm., model 1912.

The following table gives the peace establishment of the Italian army in 1914, exclusive of troops in Africa:—

	Officers	Men	Horses & Mules
Administration, staff, military schools, etc. . . . .	1,286	1,888	2,442
Infantry, 389 battalions, and 88 district headquarters . . . .	7,891	154,217	6,205
Cavalry, 150 squadrons, and 29 dépôts . . . . .	1,006	26,404	25,467
Artillery, 263 batteries, 110 companies, 51 dépôts, etc. . . .	2,359	51,134	23,084
Engineers, 82 companies, and 10 companies engineer train . . .	630	15,206	1,284
Medical, 12 companies . . . .	773	4,893	420
Commissariat, 12 companies . .	452	5,488	81
Carabineers, 12 legions . . . .	726	30,680	5,362
Total . . . . .	15,123	289,910	64,345

The war effective of the Italian Army is 3,159,836 of all ranks.

The garrison of Libya is not yet fully organised. There are to be 3 infantry battalions, 4 companies mounted infantry, 2 field batteries and 2 mountain batteries as colonial troops recruited voluntarily in Italy for 3 years service. The native army is to consist of 12 battalions, 6 squadrons, 6 mountain batteries, 3 camel squadrons, etc.

The total military budget of Italy for 1914-15 amounted to 18,756,338*l*.

The Italians have a special African corps in Erythrea, consisting of 3 companies of white infantry and 10 native battalions; also 1 squadron of native cavalry, a local company of artillery (Italians), and a native mountain battery. Its total strength is about 8,600 of all ranks.

In Italian Somaliland there is a native corps of 15 infantry companies, 1 camel company and 1 artillery company, with Italian officers, and a body of military police. Total strength about 4,700 of all ranks.

*Aviation.*—On the outbreak of War Italy had 200 aeroplanes organised in 28 squadrons. They were of two distinct classes, light and heavy—the first of French, English and Italian models, and the second all Italian. The heavy is also well supplied with hydroplanes of the Curtiss and Borel types.

The Government had in August, 1914, four dirigibles of 420,000 cubic feet, with two motors each of 250 h.p., with a speed of 44 miles an hour, and capable of rising to 7,000 feet; and two Parsevals of 350,000 cubic feet, each with two motors, of 180 h.p.

### III. NAVY.

The Italian navy estimates for financial years ending June 30 were:—

	£		£
1915-16 . . . . .	10,896,283	1913-14 . . . . .	10,269,460
1914-15 . . . . .	11,188,635	1912-13 . . . . .	8,675,446

The naval administration, under the Minister of Marine, is thus organised : An assistant secretary ; a vice-admiral as Chief of the Staff ; a Superior Board composed of two vice-admirals, the lieutenant-general of the *Genio Navale* (naval architect), the lieutenant-general of engineers' corps, a captain as secretary, and a civil member ; a general surgeon at the head of the sanitary service ; a general of the *Genio Militare* (military architect) at the head of a section having charge of the engineering works of the naval stations ; a general paymaster directing the sections of account. A rear-admiral is chief of a special department administering matters concerning the *personnel* (officers) ; another rear-admiral the *personnel* (men) ; a major-general of the *Genio Navale* of that dealing with naval construction, and a rear-admiral of that devoted to ordnance and equipment. A civil officer administers the department of the merchant marine, which is under the direction of the assistant secretary for the navy. For purposes of local naval administration and defence the Italian littoral is divided into four departments: Spezia; Naples; Venice; Taranto. The vessels are apportioned, for administrative purposes, between the four departments. There are torpedo stations all round the Italian coasts, the head stations being at Genoa, Spezia, Maddalena, Gaeta, Messina, Taranto, Brindisi, Ancona, and Venice. Summary of the Italian navy :—

	Completed at end of		
	1915	1916	1917
Dreadnoughts . . . . .	6	6	5
Pre-Dreadnoughts . . . . .	8	7	7
Armoured cruisers . . . . .	10	8	8
Protected cruisers . . . . .	16	16	16
Torpedo gunboats, etc. . . . .	10	10	9
Destroyers . . . . .	43	48	48
Torpedo boats . . . . .	69	71	71
Submarines . . . . .	20	19	26

Some ships of no fighting value are excluded from the above table.

The tables which follow of the Italian armour-clad fleet and first-class cruisers are arranged chronologically, after the manner of other similar tables in this book, though it should be remembered that in Italian official classification the usual line between battleships and armoured cruisers does not exist. The four super-Dreadnoughts are not included in the above summary, their situation not being known.

The Dreadought battleship *Leonardo da Vinci* (sister ship of the *Conte di Cavour*) was blown up in Taranto harbour on August 2, 1916, and has been removed from the list. The battleship *Benedetto Brin*, the armoured cruiser *Amalfi* (sister of *Pisa*), the *Giuseppe Garibaldi*, and destroyers *Turbine* and *Impetuoso*, and the submarine *Medusa* have been lost in the war, as well as the auxiliary *Citta di Messina*.

The protected cruisers are small craft, of which only 3 may be considered up to modern requirements.

The personnel consisted before the war of 1,927 officers (comprising 1 admiral, 23 vice- and rear-admirals, 232 captains and commanders, 444 lieutenants, 218 sub-lieutenants and midshipmen, 108 engineer-constructors, 312 engineers, 259 sanitary officers, 200 commissariat officers, 157 officers of the *Corpo Reale Equipaggi*); and 38,000 men (sailors, gunners, mechanics, &c.). Both naval and military officers are attached indifferently to the aerial service.

## Production and Industry.

### I. AGRICULTURE.

The systems of cultivation in Italy may be reduced to three:—1. The system of peasant proprietorship (*coltivazione per economia o a mano propria*); 2. That of partnership (*colonia parziaria*). 3. That of rent (*affitto*). Peasant proprietorship is most common in Piedmont and Liguria, but is found in many other parts of Italy. The system of partnership or *colonia parziaria*,

more especially in the form of *mezzadria*, consists in a form of partnership between the proprietor and the cultivator. This system is general in Tuscany, the Marches, and Umbria. It is almost unknown in the Basilicata, little practised in Apulia, Calabria, and Sardinia, and has been entirely abandoned in the two most advanced centres of cultivation in the south, viz. :—Baresse and the province of Naples. Various modifications of the system exist in different parts of Italy. The system of rent (*affitto*) exists in Lombardy and Venetia. Large farms (*la grande coltura*) exist in the neighbourhood of Vercelli, Pavia, Milan, Cremona, Chioggia, Ferrara, Grosseto, Rome, Caserta, and in Apulia, the Basilicata, Calabria, and at Girgenti and Trapani in Sicily. In Italy generally the land is much subdivided.

The area of Italy comprises 70,811,000 acres. Of this area 51,309,310 acres are under crops and 11,272,339 acres are forests. Waste land forms 7·9 per cent. of the whole, tilled land 48·8 per cent., pasture 28·1 per cent., vineyards and orchards 5·8 per cent.

The principal crops for 3 years were as follows :—

	Acreage			Produce in cwts.		
	1914	1915	1916	1914	1915	1916
Wheat . . .	11,921,250	12,648,750	11,815,750	92,230,000	92,825,000	96,088,000
Barley . . .	617,000	615,000	612,500	3,012,000	4,812,000	4,402,000
Oats . . .	1,227,500	1,222,000	1,663,750	7,788,000	9,128,000	7,570,000
Rye . . .	306,250	297,500	288,750	2,672,000	2,216,000	2,714,000
Maize . . .	3,933,500	3,932,500	3,939,750	53,346,000	61,860,000	41,264,000
Rice . . .	366,250	360,000	356,750	10,894,000	11,212,000	10,406,000
Beans . . .	1,584,250	1,351,750	1,225,750	6,402,000	9,486,000	7,552,000
Potatoes <sup>1</sup> . .	735,250	733,500	737,750	1,663,000	1,545,000	1,477,200
Sugar Beet- root <sup>1</sup> . . .	101,750	125,000	117,500	1,350,000	1,480,000	1,100,000
Vines <sup>2</sup> . . .	11,302,500	11,041,000	10,872,500	947,012	419,210	857,120
Olives <sup>2</sup> . . .	5,745,500	5,750,000	5,767,500	39,248	33,000	33,000

<sup>1</sup> Produce in tons.

<sup>2</sup> Produce in thousand gallons.

In 1915 Italy exported 25,754 and imported 8,463 cattle; exported 3,063 and imported 167 sheep; exported 263 and imported 37 goats; exported 16,323 and imported 43 swine.

Silk culture, though flourishing most extensively in Lombardy, Piedmont and Venetia, is carried on all over Italy. The average annual production of silk cocoons in the four years 1912-15 is estimated at 41,631,250 kilogrammes, and of silk at 4,361,000 kilogrammes (in 1876, 1,293,000 kilos.). In 1915 the estimated silk cocoon crop was 33,897,000 kilogrammes, as against 46,668,000 kilogrammes in 1914.

In the year 1898-99 there were only 4 sugar factories, with an output of 5,972 metric tons; in 1914-15 there were 30, their output being 150,216 tons.

The value of the output of industrial chemical products in 1913 was 193,000,000 lire (in 1893, 26,134,000 lire).

## II. FORESTRY.

The forest area (exclusive of chestnut plantations) is about 4,000,000 hectares. The yield from the forests was valued as follows in 1915 :—Timber, 1,120,000 cubic metres at 39,280,000 lire; firewood, 4,500,000 cubic metres at

63,000,000 lire; charcoal, 4,528,500 quintals valued at 68,927,500 lire; total value, 171,207,500 lire (6,848,300*l.*).

This total is exclusive of secondary produce valued at about 55 millions of lire annually. The forest produce thus amounts to 225 millions of lire. From 1867 to June 30, 1915, 33,555 hectares were replanted by or with assistance from the Government.

### III. MINES AND MINERALS.

Production in metric tons (1 metric ton = 2,204 lbs., or 1,016 metric tons = 1,000 English tons) of metallic ores and other minerals in 1915:—

Ores, &c.	Produc- tive mines	Metric tons	Lire	Workers
Iron . . . . .	23	679,970	19,596,028	1,881
Manganese . . . . .	20	12,577	482,250	479
Copper . . . . .	5	74,470	2,225,607	1,022
Zinc . . . . .	87	80,622	10,907,991	11,417
Lead . . . . .		41,590	11,869,855	
Gold . . . . .	2	296	8,280	31
Antimony, argentiferous . . . . .	6	4,334	720,668	328
Mercury . . . . .	7	110,642	6,875,220	847
Iron and cuprous pyrites . . . . .	8	369,320	8,962,309	2,214
Mineral fuel . . . . .	59	953,082	21,324,657	1,712
Sulphur ore . . . . .	316	2,222,399	29,312,534	15,020
Asphaltic and bituminous substances . . . . .	13	47,650	956,585	489
Boric acid . . . . .	7	2,497	1,373,350	598
Totals (including graphite, petroleum and other minerals) . . . . .	619	—	119,551,887	41,095 <sup>1</sup>

<sup>1</sup> Exclusive of 1,709 workers in non-productive mines. Of the total number of workers 1,360 were female.

The quarries of Italy employed in 1915, 53,626 persons (1,318 females), the output of building and decorative stone being valued at 62,776,211 lire.

### IV. FISHERIES.

On December 31, 1914, the number of vessels and boats employed in fishing was 29,486, with an aggregate tonnage of 79,996. These numbers include 48 boats of 419 tons engaged in coral fishing. There were 149,672 fishermen, of whom 6,884 were engaged in deep-sea or foreign fishing. The value of the fish caught in 1914 (excluding foreign fishing) was estimated at 19,988,200 lire; the value obtained from tunny-fishing was 2,897,852 lire, and from coral-fishing 398,075 lire, the quantity being estimated at 31,751 kilogrammes.

V. MANUFACTURES.

The following table gives the figures of the Italian industrial census of June 10, 1911, for the number of establishments, the number of employees, and the aggregate horse-power, by Departments, by Provinces having over 5,000 establishments, and by principal industries :—

Departments and Provinces	Estab-lish-ments	Em-ployees	Horse-power	Departments and Provinces	Estab-lish-ment	Em-ployees	Horse-power
Abruzzi and Molise . . . . .	9,005	36,966	40,639	Marches . . . . .	7,568	49,623	40,339
Apulia . . . . .	14,765	82,699	39,492	Piedmont . . . . .	26,332	342,354	264,572

(\*) Provisional.

For the determination of Customs' values, &c., in Italy there is a permanent central commission, comprising official members, representatives of commercial corporations, &c. The values recorded are those of the goods at the frontier, exclusive of import or export duties. For imports and exports the parties interested declare the value of the goods, their quantity, and the country of origin or destination. For imports there is recorded the

gross weight in the case of goods subject to a duty of 20 francs per quintal (8s. 1½d. per cwt.) or less; the net legal weight (i.e. with deduction of an official tare) in the case of goods subject to duty of 20 or 40 francs per quintal (8s. 1½d. to 16s. 3d. per cwt.); the actual net weight in the case of goods taxed at over 40 francs per quintal (16s. 3d. per cwt.) For exports the gross weight is usually given. Inaccurate declarations are punishable by fine if the inaccuracies are prejudicial to the Treasury.

The trade of Italy is regarded either as general or special. The general trade comprehends all imports from abroad, whether intended for consumption within the kingdom or merely for transit, and all exports to foreign countries, whether national, nationalised or only issuing after transit. The special trade is restricted to imports for consumption and exports of national or nationalised merchandise. National merchandise consists of the produce and manufactures of the kingdom, while foreign imports on which the duties have been paid at the frontier are said to be nationalised. Transit trade denotes merchandise merely passing through the kingdom whether directly or after having been temporarily warehoused.

The treaty of 1883 provides for 'the most favoured nation' treatment in matters of commerce and navigation between Italy and the United Kingdom, and Italy is a party to the International Sugar Convention.

The principal articles of import into Great Britain from Italy, and British exports to Italy (according to the Board of Trade returns) in 2 years were:—

Imports into U.K.	1914	1915	Exports to Italy	1914	1915
	£	£		£	£
Olive oil . . . . .	115,908	102,120	Coal . . . . .	6,265,746	5,231,286
Hides . . . . .	435,185	432,587	Ironwork . . . . .	644,461	1,378,419
Canned vegetables . . . . .	392,973	293,478	Machinery . . . . .	765,280	716,845
Eggs . . . . .	431,830	3,455	Copper, sulphate of . . . . .	366,578	213,979
Silk manufactures . . . . .	768,872	1,930,766	Woollen goods . . . . .	465,747	313,255
Cheese . . . . .	328,538	297,612	Cottons . . . . .	308,247	197,821

Total trade between Italy and the United Kingdom (Board of Trade returns) for 5 years (in thousands of pounds sterling):—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Italy to United Kingdom . . . . .	8,239	8,127	8,699	11,258	12,276
Exports to Italy from United Kingdom . . . . .	14,007	11,610	12,867	13,929	20,454

Messina . . . . .	3,004	2,361,032	3,004	2,361,032
Catania . . . . .	4,146	2,126,507	4,157	2,129,977
Palermo . . . . .	4,373	3,298,686	4,377	3,296,053
Venice . . . . .	3,230	2,035,341	3,142	2,029,687

## Internal Communications.

### I. RAILWAYS.

Length of State railways 8,526 miles (December 31, 1915) ; all the railway lines 11,635 miles.

In 1914 the total receipts of the State railways were 603,395,191 lire.

### II. POSTS AND TELEGRAPHS.

In the year 1914 there were 10,736 post offices. The postal traffic was as follows :—

	Internal.	External and Transit	Total
	1,000	1,000	1,000
Letters . . . . .	461,560	114,214	575,774
Post cards . . . . .	168,330	30,029	198,360
Newspapers, Printed matter, &c. . . . .	1,333,324	85,338	1,418,663
Post Office orders, &c. . . . .	59,460	3,769	63,229
Total . . . . .	2,022,675	233,352	2,256,027

On June 30, 1914, the telegraph lines had a length of 35,015 miles, and the wires 213,695 miles. There were 8,598 telegraph offices, of which 6,656 were State offices and 1,942 railway offices. There were, in that year, 19,086,881 private telegrams sent inland ; and 1,953,540 private international telegrams.

The telephone service in 1914-15 had 99,593 subscribers. There were 362 urban systems ; and 778 inter-urban systems with 24,430 miles of line and 48,861 miles of wire. Total number of conversations in the year, 6,973,261 (excluding international conversations, which numbered 56,635). In 1907 the telephone service passed to the direct working of the State.

### Money and Credit.

State notes and bank notes in circulation in lire :—

—	1911	1912	1913	1914	1915
State notes .	485,290,695	498,973,615	499,070,695	657,241,875	1,082,102,315
Bank notes .	2,193,381,850	2,212,381,000	2,283,508,850	2,936,014,950	3,968,069,300

The total coinage from 1862 to the end of 1915 was : gold, 430,840,430 lire ; silver, 650,476,256 lire ; nickel, 48,462,933 lire ; bronze, 84,461,917 lire ; total, 1,214,241,537 lire, exclusive of recoinage.

The nominal value of the money coined (including recoinage) :—

—	Gold	Silver	Nickel	Bronze	Total
	Lire	Lire	Lire	Lire	Lire
1911	1,300,000	3,369,620	2,734,200	262,543	7,366,363
1912	2,323,460	10,197,050	4,208,000	93,900	16,822,410
1913	—	16,176,910	4,145,800	130,203	20,452,913
1914	—	20,780,084	2,861,533	145,200	23,786,817
1915	—	21,124,780	—	246,674	21,371,454

By law of July 22, 1894, gold and silver (5-franc pieces .900 fine) were temporarily withdrawn from circulation, being represented by paper. On December 31, 1915, the actual currency consisted of 1,082,102,315 lire of State notes, 3,968,069,300 lire of bank notes, and about 80,000,000 lire of copper and nickel coin.

There is no national bank in Italy. According to the law of August 10, 1893, there are only three banks of issue : the Banca d'Italia, the Banco di Napoli, and the Banco di Sicilia. Assets and liabilities of these banks on December 31, 1915 :—

—	Assets	—	Liabilities
	Lire		Lire
Cash and Reserve <sup>1</sup>	3,402,048,655	Capital . . . . .	302,000,000
Bills . . . . .	742,656,492	Notes in circulation . . . . .	3,968,069,300
Anticipations . . . . .	261,022,722	Accounts current, &c. . . . .	1,012,865,826
Credits . . . . .	189,058,409	Titles and valuables deposited . . . . .	7,898,320,361
Deposits . . . . .	7,898,320,361	Various . . . . .	749,007,810
Various securities . . . . .	1,437,156,658		
Total . . . . .	13,930,263,297	Total . . . . .	13,930,268,297

<sup>1</sup> Reserve in gold, in silver, and in equivalent bonds (1,699,702,845) : Gold, 1,364,187,114 lire ; bills of exchange on foreign countries, foreign bank-notes, treasury bonds, &c., 208,000,228 lire ; silver (.900 fine), 118,659,950 lire ; fractional silver, 8,905,073 lire.

On March 31, 1917, the total cash amounted to 1,052,657,000 lire ; inland bills to 545,650,000 lire ; foreign bills, 20,818,000 lire ; advances, 508,065,000 lire ; government securities 216,507,000 lire ; circulation, 3,863,242,000 lire.

On June 30, 1916, there were 750 co-operative credit societies and popular banks, 1,896 rural banks, 197 ordinary credit companies, and 7 agrarian credit institutions, and (January, 1916) 11 credit foncier companies, of which 4 were in liquidation, with 799,114,875 lire of 'cartelle fondiaria' in circulation, and with 758,884,023 lire of 'mutui con ammortamento.'

The following table gives statistics of the savings banks at the end of 1915 :—

—	Offices	Depositors	Total Deposits	Deposits during year	Repayments during year
			Lire	Lire	Lire
Post-office savings-banks	10,351	6,236,511	1,968,013,609	593,012,146	629,083,777
Ordinary " "	187	—	2,561,633,339	1,348,672,665	1,326,213,601

On June 30, 1916, the savings deposited with the co-operative credit and ordinary credit companies amounted to 1,190,536,670 lire, and *Monti di pietà*, 125,081,842 lire.

On August 12, 1912, a Law came into operation establishing life assurance as a State monopoly. The existing insurance companies were allowed to continue their operations for 10 years under certain conditions. The National Insurance Institute carries out the Government business. It started operations on January 1, 1913, and has already assumed large proportions, having absorbed the business of 24 insurance companies (15 foreign and 9 Italian). According to the law, the companies which at the end of 1911 were engaged in life insurance in the Kingdom which did not cede their business to the Government were given the privilege of continuing their business for not more than 10 years, with the obligation of turning over to the Government Institute 40 per cent. of the business done after the beginning of the new régime. Only 3 Italian and 9 foreign companies continued business in Italy under these conditions and later one of these also ceded its business to the institute. Branches of the National Institute of Insurance were established in every Province of Italy, almost 1,900 branches in all.

The insurance effected by the Institute in the years 1914 and 1915 was as follows :—

	1914		1915	
	No. of Contracts	Amount	No. of Contracts	Amount
		Lire		Lire
Insurance issued	26,368	193,381,403	16,518	119,341,838
Insurance paid	22,318	164,419,263	11,719	104,542,398

### Money, Weights, and Measures.

The money, weights, and measures of Italy are the same as those of France, the names only being altered to the Italian form.

The *Lira* of 100 *Centesimi*; intrinsic value, 25·22½s. to 1*l.* sterling.

The coin in circulation consists of gold 10-lire and 20-lire pieces; of silver 50 cent, 1-lire, 2-lire, and 5-lire pieces; nickel 20 cent pieces, and bronze 1, 2, 5 and 10 cent pieces. Nickel coin is being substituted for bronze to a large amount. Bank notes of 50, 100, 500 and 1,000 lire are in circulation; also small notes, issued by the State, for 5, 10, and 25 lire.

### Diplomatic Representatives.

#### 1. OF ITALY IN GREAT BRITAIN.

*Ambassador*.—Marquis Guglielmo Imperiali, G.C.V.O. (appointed June 2, 1910).

*Councillor*.—Prince Livio Borghese.

*Secretaries*.—Conte Ercole Durini di Monza, Cav. Gabriele Preziosi, Giovanni Balsamo, Giuseppe Lanza, Principe di Scordia, and Tommaso Bertelè.

*Military Attaché*.—Major Count E. Greppi, C.B.

*Naval Attaché*.—Capitaine de Corvette Count Carlo Rey di Villarey, R.I.N., C.B.

*Archivist*.—Cavaliere Ugo Catani.

There are Consular representatives at London (Consul—Marquis Alessandro Faà di Bruno), Dublin (C.), Glasgow, Liverpool (C.G.), &c.

## 2. OF GREAT BRITAIN IN ITALY.

*Ambassador*.—Rt. Hon. Sir J. Rennell Rodd, G.C.M.G., G.C.V.O., C.B., appointed December 1, 1908.

*Counsellor*.—Hon. W. Erskine, M.V.O.

*Secretaries*.—G. Mounsey, Lord Gerald Wellesley, E. A. Keeling, and G. M. Randel.

*Naval Attaché*.—Captain Larking, R.N.

*Military Attaché*.—Col. Lamb, M.V.O.

*Honorary Attachés*.—G. H. Tyrwhitt and Geoffrey, Scott.

*Consuls-General*.—Major W. P. Chapman (at Turin), A. J. A. Churchill, M.V.O. (at Naples), and W. Keene, M.V.O. (at Genoa).

There are Consular representatives at Brindisi, Cagliari, Florence, Genoa (C.G.), Leghorn (V.C.), Messina (V.C.), Milan, Naples, Palermo, Spezia (V.C.), and other towns.

## San Marino.

Embraced in the area of Italy is the independent Republic of San Marino, which claims to be the oldest State in Europe. Its legislative power is vested in the Great Council of 60 members elected by popular vote, a third of whom are renewable every three years, and two of whom are appointed every six months to act as Regents (*Capitani reggenti*). The regents exercise executive power. A smaller Council consists of 12 members, and is divided into 4 congresses: *Congresso Economico di Stato*, *Congresso dei Legali*, *Congresso degli Studi*, *Congresso militare*. The frontier line is 24 miles in length, area is 38 square miles, and population (August 1916) 11,648. The revenue and expenditure for 1916-17 amounted to 882,102 and 1,035,930 lire respectively. There is no public debt. The military force contains 39 officers and 950 men. The chief exports are wine, cattle and stone. A new treaty of friendship with the Kingdom of Italy was concluded June 28, 1907, revised in 1908 and in 1914. The Republic has extradition treaties with England, Belgium, Holland, and United States. San Marino has bronze and silver currency coined in Italy: 210,000 lire in silver and 119,000 lire in bronze.

## FOREIGN DEPENDENCIES.

### Colony of Eritrea.

The dominion of Italy on the coast of the Red Sea extends from Cape Kasar (18° 2' N.) to Cape Dumeirah on the strait of Bab-el-Mandeb (12° 30' N.). The length of coast is about 670 miles. The area is about 45,800 square miles, and the population, which is to a great extent nomadic, is estimated at 450,000. In 1908 there were 274,944 natives and 2,930

Europeans (inclusive of the military forces), 2,271 of whom were Italians; Massawah having 2,275 inhabitants, of whom 524 are European (exclusive of the garrison), and 480 Asiatics. Asmara is the seat of government. The Italian possessions on the Red Sea are constituted as the Colony of Eritrea, with the management of its own finances and an autonomous administration in 8 commissariats, as follows:—

Commissariat	Area in square miles	Total Population	Capital
Hamassen . . . . .	1,160	35,100	Asmara
Massowah . . . . .	5,000	29,555	Massowah
Assab . . . . .	5,500	2,071	Assab
Accioli Guzzi . . . . .	3,475	53,129	Adi Caieh
Serae . . . . .	3,300	36,245	Adi Quala
Cheren . . . . .	8,800	62,230	Cheren
Barca . . . . .	12,700	36,862	Agordat
Gasc and Setit . . . . .	5,500	19,556	Barentu

Military force, 342 officers and 13,137 men (9,868 natives and 3,269 Italian).

In the Italian dependencies the central government is represented by a civil governor, who is nominated by the King and is under the direction of the Minister for the Colonies.

*Governor.*—Senator Nobile Giacomo de Martino (1916).

For the financial year 1916–17 the revenue and expenditure of the Colony of Eritrea were estimated at: Colonial revenue, 5,325,221 lire; State contribution, 17,440,000 lire; total revenue, 22,765,221 lire; expenditure, civil administration, 17,899,772 lire; military, 4,865,449 lire total expenditure, 22,765,221 lire.

The tropical climate and the general scarcity of water during the summer months necessitate works for irrigation before crops can be raised with success. Pasture is abundant, but the pastoral population is essentially nomadic. Camels, oxen, sheep, goats, are common, and the produce, consisting of meat, hides, butter, supplies articles of local trade. Pearl-fishing is carried on at Massawah and the Dahlak archipelago to the annual value of from 250,000 lire for pearls and 800,000 lire for mother-of-pearl. A very promising trade is being carried out in palm nuts. The exportation of these nuts in 1914 was over one million lire. There are gold mines worked about 6 miles from Asmara, with hopeful results.

At Massawah the imports by land and sea, the exports, and the tonnage entered were as follows:—

—	1912	1913	1914	1915
Imports . Lire	18,845,118	20,403,500	26,367,541	23,623,490
Exports . „	9,371,802	11,589,744	10,046,710	14,005,201
Transit . „	5,234,262	2,895,774	3,654,082	5,845,617
Tonnage entd. Tons	290,338	269,678	338,728	856,258

There are 74 miles of railway from Massawah to Asmara (end of 1912), and now the line is being taken to Keren (58 miles) and Agordat (46 miles). There are 11 post-offices. There is a telegraph line of 243 miles in length. There are 3 telephone lines. Two wireless telegraph stations have been opened at Massawah and Assab. They communicate with the radiotelegraphic system of Italian Somaliland and also with Italy (Coltano). There is, thus,

through wireless communication between Italy and Italian Somaliland, via Massawah.

The legal currency consists of Italian coins and those of the Latin Union, but in actual circulation there are still some Maria Theresa dollars. The Italian mint has issued coin amounting to 10,879,995 lire, under the denominations of Eritrean dollars (= 5 lire), and  $\frac{1}{10}$ ,  $\frac{1}{20}$ ,  $\frac{1}{50}$  dollar pieces.

### Italian Somaliland.

The Colony and Protectorates of Italian Somaliland have an area of 139,430 sq. miles and a population of about 450,000. They extend along the east coast of Africa from British Somaliland to the course of the Juba and comprise the Protectorates of Northern Somaliland, viz., the Sultanate of the Mijertins (Osman Mahamud) from Bender Ziade, the most northerly point belonging to Italy on the Gulf of Aden, to Cape Gabbel on the Indian Ocean ( $8^{\circ} 13' N.$  lat.); the territory of the Nogal from Cape Gabbel to Cape Garad ( $6^{\circ} 47' N.$  lat.); the Sultanate of Obbia (Ali Jusuf) from Cape Garad to the northern boundary of the colony of Benadir, determined by a line which ends at the sea near the wells of Fah (about  $4^{\circ} 30' N.$  lat.); and the Colony formerly called "Benadir" but now officially known as the "Somalia Italiana Meridionale," which extends from  $4^{\circ} 30' N.$  lat. to the mouth of the Juba, and comprises the following four administrative divisions:—(1) Medio Shebeli, with Mogadisho (population 13,000) as capital, (2) Basso Shebeli and Goscia, with Brava (8,000) as capital, (3) Alto Shebeli, with Mahaddei (5,000) as capital, and (4) Alto Juba, with Baidoa (2,000) as capital. The colony is administered by a civil governor who resides at Mogadisho. A royal decree of December 8, 1910, provides for the minting of silver coins of 1 rupee,  $\frac{1}{2}$  and  $\frac{1}{4}$  rupee for Italian Somaliland, of the value of 15 rupees to 1*l.* sterling. The principal occupation of the people is cattle-rearing for the tribes of the country; and agriculture for the low classes of population imported as slaves in the past, and now free. But the Mijertins rear chiefly camels and sheep. Imports (1915-16), 6,828,463 lire; exports, 3,429,965. Imports are yarn, timber, petroleum, rice, sugar, cottons; exports, butter, cotton, hides, dura. Animal produce is exported to Italy, Aden and Zanzibar, whence it is shipped to Europe or America. Length of roads 744 miles; steamship services on the Juba River from Kismayu to Bardera. A monthly service of steamers between Genoa and Mombassa connects the colony with Italy. Military force, 74 officers and 3,592 men. The inland boundaries of Italian Somaliland and Benadir are determined under the treaty of May 16, 1908, between Italy and Abyssinia, by a line (only partially demarcated) from Dolo on the Juba to the confluence of the Juba with the Dana, thence to the Webi Shebeli, and finally to the Anglo-Abyssinian frontier fixed by protocol of May 14 and June 4, 1897.

*Governor.*—G. Cerrina Ferroni (1916).

The budget of Italian Somaliland for the year 1916-17 is as follows: revenue proper of the colony, 1,300,000 lire; State contribution, 4,629,000 lire; extraordinary revenue, 1,525,000 lire; total, 7,454,000 lire. Civil expenditure, 3,578,000 lire; military, 1,995,800 lire; extraordinary, 1,787,000 lire; total, 7,360,800 lire.

Thirteen wireless telegraph stations are working in the Colony connecting the principal coast and inland towns. A big wireless station has just been built at Mogadisho, which communicates with Italy, via Massawah.

There are in the Colony 4 principal post offices (Mogadisho Merca Brava and Jumbo) but postal business is carried out at every station.

## Tripoli and Cyrenaica.

(LIBIA ITALIANA.)

**Government.**—Tripoli fell under Turkish domination in the sixteenth century and, though, in 1714, the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet. In September, 1911, a quarrel broke out between Turkey and Italy, and the latter invaded Tripoli and established an army there. On November 5, 1911, a decree was issued annexing Tripoli, and on February 23, 1912, the Italian Chamber passed the Bill which ratified the decree of annexation. The war, nevertheless, continued until October 18, 1912, when the Treaty of Ouchy was signed, by which the Sovereignty of Italy in Tripoli was established. This has now been recognised by the Great Powers. Italy accepted a clause, identical with that contained in the Austro-Hungarian treaty regarding Bosnia-Herzegovina, dealing with the exercise of religious authority by the Caliph.

For administrative and military purposes the country is divided into two independent districts, Tripolitania and Cyrenaica, with their respective capitals at Tripoli and Benghazi, all under the jurisdiction of the minister of colonies. Each province or district has its governor, appointed by the King upon the nomination of the minister of colonies in accord with the minister of war. Large military powers have been delegated to the governors, who at present hold the rank of lieutenant-generals. Immediately under the governor is the secretary-general for civil and political affairs, the chief of the political-military office, and the chief of staff. To the secretary-general belongs the duty of organising and supervising the civil administration within the civil zone.

*Governor of Tripolitania and of Cyrenaica.*—Lieut.-General Giovanni Ameglio.

**Area and Population.**—The entire area of the territory is estimated at about 406,000 square miles. According to a census taken on August 3, 1911, there were 523,176 natives, of whom 29,761 were in Tripoli town. The population is mostly Berber, but Jews are numerous. The civil European population numbers 5,000 or 6,000, mostly Maltese and Italians; practically there are no Turkish settlers. Arabic is generally spoken, but Italian is the official language. The principal towns are on the coast, Tripoli, with 73,000 inhabitants, Benghazi with 35,000, Derna, with 8,000 inhabitants, and Homs; inland are the caravan halting places Ghadames, Murzûk, and Ghat.

**Justice.**—In both districts justice is administered by regional tribunals, presided over by civil magistrates who are assisted by Italian or Mussulman assessors according as the cases concern Italians or native subjects. In all civil, commercial, and penal matters, the judicial law of Italy holds good. The Court of second instance is the Assize Court, which deals with more serious cases. The Royal Court of Appeal for Libia held its first session in December, 1912.

**Finance.**—For the financial year 1916–17 the revenue and expenditure of Tripolitania and Cyrenaica were estimated at: Colonial revenue, 13,351,000 lire; state contribution, 70,137,640 lire; extraordinary revenue, 1,800,000 lire; total revenue, 135,288,640 lire. Civil expenditure, 20,056,440 lire; military expenditure, 114,982,200 lire; extraordinary expenditure, 250,000 lire; total expenditure, 135,288,640 lire.

**Production and Industry.**—Tripolitania has four zones, the first of which, along the sea, is covered with palm, olive, lemon, and fruit trees. The second is formed by the highlands of Gebel and Tarhuna; the former has olive groves and palm and fig trees, while cereals and saffron are also grown. The country, however, is rather barren. The Tarhuna land is rich in esparto grass. The rest of the second zone, which includes the hills of Mesellata and Bondara, as well as numerous valleys, is most fertile, and olive trees are abundant. In 1913 the olive crop totalled 881,900 lbs. of olives for food and 1,323,000 lbs. for industrial purposes, chiefly for making soap. The third zone consists chiefly of oases and is rich in palms. The oases (of which Gadames is the most important) are some distance apart. The fourth zone is covered with palms, figs, vines, and almonds.

In Cyrenaica, olives and cypresses predominate. Pasturage is abundant and cattle could be bred on a vast scale. Bananas are grown at Derna. Barley is the chief food of the people.

**Commerce.**—There is a considerable caravan trade between Benghazi and Wadai and between Tripoli and Central Sudan when the routes are free from raiders. An important article of trade is ostrich feathers, which are brought overland from Central Africa, and exported to Paris and London from Tripoli to the value of 50,000*l.* annually, and 20,000*l.* from Benghazi.

Imports and exports for 4 years:—

	1912	1913	1914	1915
	£	£	£	£
Imports . . .	1,072,585	1,021,349	1,638,120	2,004,730
Exports . . .	154,901	137,101	213,657	212,073

Sponge fishing was started in 1885. In good years the returns from the industry amount to some 2,000,000 lire (£80,000) out of a total of 10,000,000 lire (£400,000) for the whole Mediterranean. The two fishing seasons in Libia are from November to February, and from March to October, the latter being the more important. During the year 1913-14 there were 76 fishing permits issued in Tripolitania, *viz.*, 25 for fishing with diving apparatus, 37 for fishing with the "Gangava," and 14 for fishing with the harpoon. The total output amounted to 35,044 okes (about 99,500 lbs.), valued at 1,194,802 lire (about £47,800).

In 1914, 8,203 steamers with a tonnage of 6,416,377 entered and cleared at the ports of Libia; in 1913, there were 7,205 steamers of 4,786,314 tons.

**Communications.**—The principal means of communication inland are the caravans which follow long-frequented routes. Tripoli (town) is connected by telegraph cable with Malta, and by land lines with Gabes (Tunis). In 1912 two Italian cables were laid, one between Syracuse and Tripoli, and the other between Syracuse and Benghazi.

Railway lines are being built. The principal line in Tripolitania is 53 miles in length, running from the coast to Hensair el Abiat. Altogether some 321 miles of line are in operation (1916). In Cyrenaica a line 13 miles long runs from Benghazi inland and another 8 miles long is being built.

In 1912, 24,000 parcels were sent and 48,000 received through the parcel post. The postal savings bank had deposits to the value of 127,380*l.* and withdrawals of 57,300*l.*, leaving a balance of 70,080*l.*

**Banking and Currency.**—The Banca d'Italia, the Banco di Sicilia, the Banco di Napoli and other banks carry on financial operations.

There is a British Consul at Benghazi, and a Vice-Consul at Homs.

**Concession of Tientsin.**—The Italian concession of Tientsin, under the agreement with China of June 7, 1902, lies on the left bank of the Peiho and has an area of about half a square kilometer with a population of 10,017 (Chinese, 9,887; Italians, 51; other Europeans, 79) in 1915. It contains a village and salt-pits.

## Statistical and other Books of Reference concerning Italy.

### 1. OFFICIAL PUBLICATIONS.

The publications of the various Departments of Government: Agriculture; Industry, Commerce, and Labour; Public Works; Treasury; Finance; War; Marine; Interior; Public Instruction; Justice; Foreign Affairs; Post and Telegraphs; Colonies.

The *Annuario Statistico Italiano* (Annual), issued by the General Statistical and Labour Department of the Ministry of Industry, Commerce and Labour, gives statistical information about Italy and its colonies.

Census publications are issued by the General Statistical Department of the Ministry of Industry, Commerce, and Labour.

## JAPAN.

(NIPPON.)

### Reigning Sovereign.

THE Japanese claim that their empire was founded by the first Emperor Jimmu Tennō, 660 B.C., and that the dynasty founded by him still reigns. It was revived in the year 1868 (the first year of the *Meiji*), when the now ruling (*de jure*) sovereign overthrew, after a short war, the power of the Shogun (the *de facto* sovereign), who had held the ruling power in successive families, since the twelfth century; and in 1871 the feudal system (Ihōken Seiji) was entirely suppressed. The Emperor bears title of Tennō; but the appellation by which he is called in relation to external affairs is 'Kōtei,' a word of Chinese origin. Only foreigners make use of the poetical title 'Mikado.'

*Emperor of Japan.*—Yoshihito (Harunomia), born at Kyoto, August 31, 1879; succeeded his father, Mutsuhito, July 30, 1912; married, May 10, 1900, to Princess Sadako, born June 25, 1884, daughter of Prince Kujo.

*Children of the Mikado.*—I., Prince Hirohito, born April 29, 1901 (Crown Prince). II., Prince Yasuhito, born June 25, 1902. III., Prince Nobuhito, born January 3, 1905. IV., Prince Takahito, born December 2, 1915.

*Sisters of the Mikado.*—I., Princess Masako, born Sept. 30, 1888, married, April 27, 1908, to Prince Tsunehisa. II., Princess Fusako, born Jan. 29, 1890, married, April 29, 1909, to Prince Narihisa. III., Princess Nobuko, born August 7, 1891, married May 6, 1910, to Prince Yasuhiko. IV., Princess Toshiko, born May 11, 1896, married May 18, 1915, to Prince Naruhiko.

By the Imperial House Law of February 11, 1889, the succession to the throne has been definitely fixed upon the male descendants. In case of failure of direct descendants, the throne devolves upon the nearest Prince and his descendants. The civil list is fixed at 4,500,000 yen.

### Constitution and Government.

By the Constitution of February 11, 1889, the Emperor combines in himself the rights of sovereignty, and exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, who are responsible to him, and are appointed by himself. There is also a Privy Council, who are consulted by the Emperor on important matters of State. The Emperor can declare war, make peace, and conclude treaties. The Emperor exercises the legislative power with the consent of the Imperial Diet. It is his prerogative to give sanction to laws, to convoke the Imperial Diet, to open, close, and prorogue it, and to dissolve the House of Representatives. The Imperial Diet consists of two Houses, a House of Peers and a House of Representatives. Every law requires the consent of the Imperial Diet.

Both Houses may respectively initiate projects of law, can make representations to the Government as to laws or upon any other subject, and may present addresses to the Emperor.

The House of Peers (369 members) is composed of (1) male members of the Imperial family of full age; (2) princes and marquises of the age of 25 and upwards (15 princes and 44 marquises); (3) counts, viscounts, and barons of the age of 25 and upwards, and who have been elected by the members of their respective orders, never to exceed one-fifth of each order (103 counts, 397 viscounts, 429 barons); (4) persons above the age of 30 years, who have been nominated members by the Emperor for meritorious services to the State or for erudition; (5) persons who shall have been elected in each *Fu* and *Ken* from among and by the 15 male inhabitants thereof, above the age of 30 years, paying therein the highest amount of direct national taxes on land, industry, or trade, and have been nominated by the Emperor. The term of membership under (3) and (5) is seven years; under (1), (2), and (4) for life. The number of members under (4) and (5) must not exceed the number of other members.

The members of the House of Representatives number 379, a fixed number being returned from each electoral district. The proportion of the number of members to the population is one to about 136,522. Voting is by secret single ballot. Electors are (1) male Japanese subjects of not less than full 25 years of age, (2) permanent and actual residents in the electoral district for not less than a year; (3) and paying land tax to the amount of not less than 10 yen in a year for more than one year, or direct taxes other than land tax to the amount of not less than 10 yen in a year for more than two years or of land tax together with other direct national taxes to the amount of not less than 10 yen in a year for more than two years. In general, male Japanese subjects of not less than 30 years of age are eligible to the House of Representatives, without any qualification arising from payment of taxes. Disqualified for membership are the Imperial Household officials, priests, students, teachers of elementary schools, government contractors, election officials. The President and Vice-President of the House of Peers are nominated by the Emperor from among the members, and President and Vice-President of the House of Representatives are nominated by the Emperor from among three candidates, elected by the House. The Presidents of both Houses receive an annual salary of 5,000 yen; Vice-Presidents, 3,000 yen; elected and nominated members of the House of Peers and members of the House of Representatives, 2,000 yen, besides travelling expenses. The Imperial Diet, which must meet annually, has control over the finances.

House of Representatives, May, 1917: Seiyukai (Constitutional Party), 163; Kensaikai (Kato Opposition), 122; Kokuminto (Popular Party), 86; Independents, 60.

The Cabinet (formed on October 9, 1916) consists of the following members:—

*Prime Minister.*—Count Terauchi.

*Interior.*—Baron Goto.

*Foreign Affairs.*—Viscount Motono.

*War.*—Lieutenant-General Oshima.

*Marine.*—Vice-Admiral Tomosaburo Kato.

*Finance.*—Mr. Kazuye Shoda.

*Agriculture and Commerce.*—Mr. Nakashoji. ✓

*Justice.*—Mr. Matsumuro.

*Education.*—Mr. Okada. ✓

*Communications.*—Baron Den.

For terms of agreement between the United Kingdom and Japan, see THE STATESMAN'S YEAR-BOOK for 1916, p. 1096.

### Local Government.

For local administration Japan (except Hokkaidō or Yezo; Chosen, formerly Korea or Cháo-psien; Karafuto or Japanese Sakhalin; and Taiwan or Formosa) is divided into prefectures ('Fu' and 'Ken'). The prefectures are subdivided into municipalities ('Shi') and counties ('Gun'); and the counties are again subdivided into towns ('Chō') and villages ('Son'). Okinawa Prefecture and some islands have, however, special organisations. Municipality, town, and village are the units of local government. These administrative divisions form at the same time local corporations of the same names. In each prefecture there are a governor ('chiji'), a prefectural assembly ('Fu-kwai' or 'Ken-kwai'), and a prefectural council ('Fu-Sanjikwai' or 'Ken-sanjikwai'), of which the governor is president; in each county a sheriff, a county assembly, and a county council, of which the sheriff is the president; in each municipality a mayor, a municipal assembly, and a municipal council, of which the mayor is the president; and in each town or village a chief magistrate and a town or village assembly. Prefectural, county, municipal, town and village assemblies give decision mainly upon financial matters. The prefectural and county councils give decision upon matters delegated by the prefectural and county assemblies respectively, and upon matters of pressing necessity when the respective assemblies are not in actual session.

The qualifications of the prefectural electors are (1) citizenship and residence in the prefecture; (2) payment of the direct national tax to the amount of not less than 3 yen for one year in the prefecture. Persons eligible for election must pay direct national tax to the amount of not less than 10 yen. Citizenship is shared by all male Japanese subjects not less than 25 years of age, who for two years (1) reside in the municipality, or town, or village; (2) share its burden; and (3) pay land tax or not less than 2 yen direct national tax annually in it. The governor and sheriff are appointed by Government; the mayor is that one of three candidates elected by the municipal assembly who has obtained the Emperor's approval; and chief magistrate of town or village is one who has been elected by the town or village assembly and has obtained the governor's approval.

Hokkaidō has a governor and a special organisation. Chosen has a Governor-General. The peninsula is administered in 13 Do or provinces, these being sub-divided into 329 Tuand Yun or districts. Taiwan (Formosa) also has a governor-general, who is invested with very extensive powers. The island is divided into 20 local divisions (Chō), each of which has a chief magistrate. Karafuto is divided into 5 local divisions (Chō).

### Area and Population.

The Empire consists of the five principal islands of Honshiu (mainland), Kiushiu, Shikoku, Hokkaidō (Yezo), and Taiwan (Formosa); besides the Chishima (Kuriles), Sado, Oki, Awaji, Iki, Tsushima, Riukiu, Ogasawara-jima (Bonin), Hōkotō (Pescadores) islands, the peninsula Chosen, and the

southern half of the island of Karafuto (Sakhalin). Total area is shown as follows :—

Principal Islands	Number of Adjacent Small Islands	Area in square miles			
		Principal Islands	Adjacent Small Islands	Total	Per cent.
Mainland . . . . .	167	86,953	473	87,426	33.53
Shikoku . . . . .	74	6,907	176	7,083	2.72

Hokkaidō (excluding the Chishima)	13	30,340	162	30,502	11.70
Chishima or Kurile Islands (31 islands) . . . . .	—	6,068	—	6,068	2.33
Sado . . . . .	—	337	—	337	0.13
Oki . . . . .	1	130	1	131	0.05
Awaji . . . . .	1	219	1	220	0.08
Iki . . . . .	1	51	1	52	0.02
Tsushima . . . . .	5	263	3	266	0.10
Riūkiū (55 islands) . . . . .	—	941	—	941	0.36
Ogasawarajima or Bonin Islands (20 islands) . . . . .	—	27	—	27	0.01
<b>Total . . . . .</b>	<b>412</b>	<b>146,106</b>	<b>2,650</b>	<b>148,756</b>	<b>57.05</b>
Chōsen (Korea) . . . . .	—	—	—	84,738	32.50
Taiwan (Formosa) . . . . .	7	13,911	33	13,944	5.35
Hōkotō (Pescadores) . . . . .	12	25	22	47	0.02
Karafuto (Japanese Sakhalin) . . . . .	—	—	—	13,253	5.08
<b>Grand Total . . . . .</b>	<b>431</b>	<b>160,042</b>	<b>2,705</b>	<b>260,738</b>	<b>100.00</b>

Administratively there exists a division into 47 prefectures. There is also a division into 636 rural districts, 71 cities, 1,263 towns, and 11,004 villages (1914).

Taiwan (Formosa) and Hōkotō (the Pescadores) were ceded by China in accordance with the treaty of Shimonoseki in 1895, and Japanese Karafuto was ceded by Russia by the Treaty of Portsmouth, N. H., in 1905. By the same Treaty of Peace the Russian Government ceded to Japan the lease of Port Arthur, Ta-lien, and adjacent territory and waters, and also the railway between Chan-Chun and Port Arthur, and the coal mines worked in connection therewith. In March, 1915, the Chinese Government agreed to extend the lease of the territory on Liaotung Peninsula, including Port Arthur and Dalny, to 99 years. The Chino-Japanese Treaty of December 22, 1905, provided for the interests of China and Japan with respect to Manchuria. By a treaty between Japan and Korea on Aug. 23, 1910, the Korean Territory was annexed to the Empire of Japan.

By an agreement signed May 25, 1915, Japan obtained from China exclusive mining rights in Eastern Mongolia, and the right to settle in the province, and in Shantung the transference of all mining and railway privileges hitherto enjoyed by the Germans; also the extension of the lease of Port Arthur to 99 years, and a joint control over certain industrial works in which they have a large financial interest, besides other privileges. (For full details, see Introduction to THE STATESMAN'S YEAR-BOOK for 1916.)

Number of Japanese proper (*i.e.* excluding natives of Formosa and the Pescadores) residing in Japan or abroad :—

Year	Male	Female	Total	Annual Increase per cent.
1912	26,544,789	25,978,808	52,522,753	1.49
1913 <sup>1</sup>	26,964,586	26,398,093	53,362,682	1.60
1914	27,395,920	26,820,466	54,216,485	1.60
1915	27,834,255	27,249,593	55,083,949	1.60
1916	28,279,603	27,685,586	55,965,292	1.60

<sup>1</sup> Last Census.

In 1914, 43,570 Japanese emigrated, and of these 2,225 went to China, 20,259 to Russia, 63 to Australia, 1,423 to Canada, 1,118 to Peru, 1,595 to Brazil, 1,172 to New Caledonia, 1,172 to Hawaii. In 1914, 8,941 Japanese migrated to the U.S., and in 1915, 8,609. On December 31, 1915, the number of foreigners in Japan (exclusive of Formosa) was 18,395, of whom 12,071 were Chinese, 2,356 English, 1,641 American, 706 German, 414 French, 205 Portuguese, 94 Dutch, 171 Russian, 119 Swiss.

Births, deaths, and marriages of Japanese at home and abroad (latest available statistics):—

Year	Marriages	Births	Deaths	Excess of Births
1908	461,940	1,672,627	1,038,110	634,517
1909	438,771	1,705,877	1,099,797	606,080
1910	442,498	1,726,522	1,073,732	652,790
1911	434,538	1,763,639	1,053,460	710,179
1912	431,992	1,756,553	1,048,378	708,175

In 1912 the still-births (not included in the above) numbered 147,545 (or 7.7 per cent.), and the illegitimate, 160,061 (or 10.3 per cent.).

The following is a list of large towns and cities in 1913 (last census):—

Tokyo . . .	2,244,796 <sup>2</sup>	Tokushima . . .	70,292	Takamatsu . . .	41,837
Osaka . . .	1,460,218 <sup>2</sup>	Kumamoto . . .	68,167	Wakamatsu . . .	41,828
Kyoto . . .	539,153 <sup>2</sup>	Sakai . . .	67,706	Nagano . . .	41,112
Nagoya . . .	389,272 <sup>2</sup>	Niigata . . .	66,622	Nara . . .	40,938
Kobé . . .	498,317 <sup>2</sup>	Toyama . . .	64,822	Uji-Yamada . . .	40,357
Yokohama . . .	428,663 <sup>2</sup>	Shidzuoka . . .	61,108	Himeji . . .	40,316
Hiroshima . . .	167,130	Fukui . . .	56,218	Matsumoto . . .	39,653
Nagasaki . . .	161,174	Nawa . . .	55,547	Nagaoka . . .	39,354
Kanazawa . . .	129,804	Toyohashi . . .	54,673	Kurumé . . .	39,292
Kuré . . .	128,342	Utsunomiya . . .	54,049	Koshi . . .	39,162
Sendai . . .	104,141	Kofu . . .	53,672	Oita . . .	38,905
Hakodate . . .	99,795	Gifu . . .	51,647	Matsue . . .	38,631
Fukuoka . . .	97,303	Maebashi . . .	50,061	Hirosaki . . .	38,586
Sapporo . . .	96,924	Tsu . . .	47,295	Yonezawa . . .	38,265
Sascho . . .	94,914	Aomori . . .	47,077	Ogura . . .	38,139
Otaru . . .	92,864	Yamagata . . .	45,371	Takaoka . . .	38,045
Okayama . . .	86,961	Matsuyama . . .	45,189	Tottori . . .	37,278
Yokosuka . . .	85,473	Otsu . . .	44,100	Saga . . .	36,667
Wakayama . . .	77,683	Takasaki . . .	44,096	Akita . . .	36,560
Kagoshima . . .	75,907	Morioka . . .	43,527	Fukushima . . .	33,981
Shimonoseki <sup>1</sup> . . .	72,117	Mito . . .	43,215	Yokkaichi . . .	33,812
Moji . . .	71,977	Hamamatsu . . .	43,012	Takata . . .	32,403

Shimonoseki was formerly called Akamagasaki.

<sup>2</sup> December 31, 1916.

### Religion (excluding Formosa).

There is absolute religious freedom. The chief forms of religion are—(1) Shintoism, with 13 sects; (2) Buddhism, with 12 sects (55 denominations). There is no State religion, and no State support. In 1914 Shinto shrines numbered 49,746 (besides 71,063 minor shrines), and the ritualists, 14,342. Buddhist temples, 71,736; high priests and priestesses, 50,983; students, 11,380. There were, besides, 2,316 licensed preachers and 1,389 churches and preaching stations of the Roman Catholic, Greek, Catholic, and Protestant Churches. Since 1891 the Roman Catholics have had an episcopate of one archbishop and three suffragan bishops. There are shrines dedicated to the eminent ancestors of the Imperial House, and to meritorious subjects; these are independent of any religious sect, and some of them are supported by State or local authorities.

### Instruction.

Elementary education is compulsory. The number of children of school age (6-14) on March 31, 1913, was 8,688,713. The following are the educational statistics for 1914-15:—

Institutes	Number	Teaching Staff	Students and Pupils
Kindergarten . . . . .	605	1,609	48,813
Blind and Dumb schools . . . . .	65	390	2,848
Elementary schools . . . . .	25,558	159,754	7,263,733
Middle " " " " . . . . .	319	6,453	136,778
Girls' High " " " " . . . . .	346	4,389	90,009
Normal " " " " . . . . .	90	1,661	27,739
Special & technical schools . . . . .	8,630	9,675	496,081
Miscellaneous schools . . . . .	2,392	7,139	152,981
High schools . . . . .	8	303	5,435
Universities . . . . .	4	865	9,611

The four Universities are Tokyo Imperial University, Kyoto Imperial University, Tohoku Imperial University, and Kyushu Imperial University. The first consists of a University Hall, Colleges of Law, Medicine, Literature, Science, Engineering, and Agriculture; the second, of a University Hall, Colleges of Law, Medicine, Literature, Science, and Engineering; the third, of a University Hall, Colleges of Science, Medicine, and Engineering; the fourth, of a University Hall, Colleges of Medicine and Engineering. They are all supported by Government. At Tokyo University in 1914-15 there were 603 professors and teachers (inclusive of 15 foreigners), and 5,233 students. At Kyoto University there were 301 professors and teachers (inclusive of 5 foreigners), and 1,865 students. At Tohoku University there are 224 professors and teachers (inclusive of 2 foreigners), and 1,905 students. At Kyushu University there were 139 professors and teachers, and 618 students. The bulk of other schools are also supported by Government as well as by local rates. Total expenditure on education in 1914-15, 76,695,244 yen (7,796,046*l.*).

In 1914-15 there were 708 libraries in Japan, with 3,689,667 volumes (3,445,236 Japanese and Chinese, and 244,431 European). In 1913, 44,429 books of various kinds, and 2,647 periodicals, monthly, weekly, and daily, were published.

In Formosa there is a special educational system.

### Justice and Crime.

A system of justice founded on modern jurisprudence has been established. Judges are irremovable, except by way of criminal or disciplinary punishment.

There are four classes of courts in Japan (exclusive of Formosa); namely, sub-district courts, district courts, courts of appeal, and court of cassation. In the court of cassation seven judges preside; in the courts of appeal five judges; in the district courts three judges; in each case one of them being the chief judge. In the subdistrict courts a single judge presides. A court which deals with disputes respecting administrative affairs is under the direct supervision of the Emperor.

A few judges of high rank are directly appointed by the Emperor, and some are appointed by him on nomination by the Minister of Justice. The following are the criminal statistics for five years:—In 1910, 106,179 criminals were condemned; in 1911, 115,978; in 1912, 116,262; in 1913, 110,423; and in 1914, 103,292.

In 1914 there were 52 prisons, 1,215 detached prisons and houses of correction. Number of prisoners of all kinds, convicted and accused, and those in houses of correction at the close of 1914:—Men, 52,889; women, 2,447; total, 55,336.

For the trial of cases connected with the military and naval services there are courts-martial.

### Pauperism.

In 1899 new legislation settled that the minimum amount of prefectural funds for the relief of sufferers from extreme calamity shall be 500,000 yen; that funds below that limit are to be made up by the Treasury; and that when the amount of relief exceeds 5 per cent. of the funds at the beginning of the fiscal year, one-third of the amount thus granted is to be supplied from the Treasury.

The relief statistics for 5 years show expenditure as follows (in yen, exclusive of Formosa):—

Year	Shelter	Food	Clothing	Medicine	Temporary lodgings	Providing with work	Total (including miscellaneous)
1910	21,597	887,849	13,026	13,216	77,803	449,515	1,472,277
1911	7,392	100,469	5,885	526	47,564	69,556	232,736
1912	1,447	164,504	3,462	1,366	113,780	62,944	347,741
1913	10,577	241,610	3,294	170	88,456	760,156	1,104,466
1914	4,205	199,383	6,711	280	69,600	94,629	380,058

In 1914 the Central Government relieved 1,564 persons to the amount of 34,497 yen (excluding Formosa). At the end of 1914, 1,729 foundlings (excluding Formosa) were being maintained, and the expense in that year was 68,358 yen. There are, besides, several workhouses established by local corporations and private persons.

### Finance.

#### I. IMPERIAL.

Revenue and expenditure (excluding Formosa) (the yen = about 24½d.):—

	1913-14	1914-15	1915-16	1916-17 <sup>1</sup>	1917-18 <sup>1</sup>
	Yen	Yen	Yen	Yen	Yen
Revenue . . .	721,975,486	734,648,055	608,269,267	600,938,397	604,050,000
Expenditure . .	573,633,925	648,420,409	602,510,719	602,262,972	604,050,000

## Summary of the budget estimates for the year ending March 31, 1917.

Revenue 1916-17	Yen	Expenditure 1916-17	Yen
<b>Ordinary:—</b>		<b>Ordinary:—</b>	
Land tax . . . . .	72,592,350	Civil List . . . . .	4,500,000
Income tax . . . . .	33,438,186	Foreign Affairs . . . . .	4,551,542
Business tax . . . . .	18,644,602	Home Affairs . . . . .	12,788,981
Liquor tax . . . . .	91,719,091	Finance . . . . .	154,548,414

Public debt, March 31, 1916:—Internal loans (4 and 5 per cent.), 1,028,091,653 yen; foreign loans (4 to 5 per cent.), 1,461,142,774 yen; total, 2,489,234,427 yen (in 1915, 2,477,082,242 yen).

## II. LOCAL.

The revenue of the Prefectures for the year 1916-1917 was 85,513,339 yen, and expenditure 85,505,881 yen. Of the revenue 64,876,324 yen was from rates. The revenue of the cities in 1915-16 was 86,312,922 yen (21,217,159 yen from rates), and the expenditure was 83,393,909 yen. The revenue of the towns and villages in 1914-15 was 114,929,279 yen (83,684,534 yen from rates), and the expenditure was 114,847,134 yen. The total local debt at the end of 1915 was 334,892,234 yen (321,180,999 yen in 1914).

## Defence.

## I. ARMY.

Service in the army (or navy) is universal and compulsory. Liability commences at the age of 17 and extends to the age of 40, but actual service begins at 20. All those physically capable of bearing arms are divided into two classes, the 'fit,' and the 'absolutely fit.' The numbers necessary for the first line (or active army), called *Geneki*, are taken solely from the 'absolutely fit.' Service in the ranks is for 2 years in the infantry, 3 in all other arms; then for 5 (or 4) years and 4 months in the reserve (*Yobi*). One year volunteers are admitted. Reservists are called out twice for training during their reserve service, for 60 days on each occasion. Having completed 7 years and 4 months in the first line, including its reserve, the men are transferred to the second line, called *Kobi*. Service in the *Kobi* is for 10 years, with two trainings of 60 days each in the whole period. At the end of their *Kobi* service the men are in the 38th year of their age, and they are passed into the *Kokumin*, which is the territorial or home defence army. In this

they serve for 2 years and 8 months, to complete their total service of 20 years.

The reserve for making good the waste of war, or *supplementary reserve*, is called Hoju. It is composed of the balance of the 'absolutely fit' recruits not required for the first line, and of as many of those classed as "fit" as may be required to make up a certain fixed number. They all serve in the Hoju for 7 years and 4 months, during which they have a first training of 90 days, and two subsequent trainings of 60 days each. After completion of this period of their service they are passed to the Kobi, in which they serve for ten years, like the men who have passed through the first line. Like them also they are finally passed to the Kokumin for 2 years and 8 months, to complete their army service.

The Kokumin is divided into two 'bans.' The first ban comprises all the men who have passed, as shown above, through the first line and landwehr, or through the supplementary reserve and landwehr, and who therefore have only 2 years and 8 months to spend in the Kokumin. The second ban is the levy *en masse* of all those capable of bearing arms. It includes (1) those who though 'fit' are not required for the Hoju; (2) those who for various reasons have been exempted from military service; and (3) the young men between 17 and 20 years of age who have not been called up. None of these classes receive any military training, but they can be drawn on in case of national emergency.

The partially trained men who have been passed into the Kobi from the Hoju are not included in the fighting units of the Second Line. They supply the large number of men required for the transport service on mobilisation, and for the expansion of other departmental corps.

The field army of Japan consists of 19 divisions, including the guard, 4 independent cavalry brigades, 3 independent brigades of field artillery (each of 12 batteries of 6 guns), 3 independent divisions of mountain guns, and 6 regiments of heavy field artillery, each of 24 guns.

Two infantry regiments form a brigade, and two brigades (12 battalions) a division. The artillery consists of a regiment of field artillery (6 batteries of 6 guns) supplemented by heavy or mountain guns as required (also probably by 3 batteries of Kobi artillery). A regiment of cavalry of 3 squadrons, with 4 machine guns, and a battalion of engineers, complete the division. Four infantry, and 4 artillery, ammunition columns, 6 field hospitals, 4 supply columns, and 1 remount depot accompany each division in the field. The war strength of a division is reckoned at 18,700 officers and men, 4,800 horses, 36 guns, and 1,674 vehicles.

The strength of an independent brigade of cavalry is 2 regiments each of 4 squadrons and a battery of 8 machine guns; total about 1,650 men and 1,680 horses. The strength of an independent artillery brigade of 12 batteries is about 2,500 men and 1,000 horses. Divisions are grouped directly into armies, 3 to 5 divisions forming an army of from 80,000 to 130,000 men. The total strength of the field army at the present time may be taken at about 600,000 combatants, including Kobi troops detailed for the lines of communication.

The active army consists at present of 76 regiments (228 battalions) of infantry, 27 regiments of cavalry (89 squadrons), 150 field batteries, 9 mountain batteries, 19 battalions of garrison artillery, 19 battalions of engineers each of 3 companies, 12 railway companies, 6 telegraph companies, 1 aero battalion, and 38 companies of train troops.

The Kobi comprises 228 battalions, 57 squadrons, 114 field batteries, 12 battalions of garrison artillery, and 19 battalions of engineers, and would on mobilisation form independent divisions.

The Japanese Islands are divided into military districts, corresponding to the divisions of the army, and the district is the unit of administration as well as of territorial command. Each division is supplied with recruits from its own district, except the Guards, whose infantry recruits are selected from the whole country; the other arms of the Guard division are recruited from the large district of the 1st division. Abroad there are the separate division of Formosa, and the small garrisons of Saghalien and Tsu-shima, also some 25,000 to 30,000 men in Korea and Manchuria.

The Emperor is the head and supreme commander of the army, and also of the navy. He nominates the War Minister (always a general officer of high rank), the Chief of the General Staff, the Director of Military Schools, and the Members of the Military Council.

The arm of the Japanese infantry is the improved Arisaka rifle; calibre, 6.5 mm. (.256"), a Mauser with an altered chamber. The cavalry are armed with a carbine of similar construction. The field gun is a q.-f. shielded Krupp of 7.5 cm. calibre, which fires a shrapnel of 14.3 lb. The mountain artillery has a gun of the same calibre firing a lighter shell. There are a certain number of field howitzer batteries, armed with 4.6" and 5.9" howitzers, firing shells of about 44 lb. and 80 lb. respectively. A 4" gun for heavy field batteries is being introduced.

No returns of the peace strength of the Japanese army are published, but the total apparently amounts to rather over 250,000 of all ranks, which in war-time expands to about 30,000 men in the regular army, 200,000 in the reserve, and 1,000,000 as reinforcements. The strength of the territorial army cannot be estimated.

The military budget for 1916-17 amounted to about 10,000,000*l.*, including extraordinary expenditure.

## II. NAVY.

The coast of Japan is divided into five maritime districts having their headquarters at Yokosuka, Kure, Sasebo, Maizuru, and Chinkai (the last not established yet).

The personnel of the Navy in 1914 included 2 Admirals of the Fleet, 6 Admirals, 18 Vice-Admirals, 46 Rear-Admirals, 108 Captains, 183 Commanders, 276 Lt.-Commanders, 627 Lieutenants, 465 Sub-Lieutenants 1st class, 318 Sub-Lieutenants 2nd Class, 154 Midshipmen, 743 Engineers, 372 Medical Officers, 341 Pay Officers, 82 Constructors, 49 Ordnance Officers, 11 Hydrographic Engineers, 1,553 Warrant Officers, and 45,576 men on the active service.

Japan now builds and equips her own warships. Armour factories are installed at Kure.

A statement of the Japanese fleet similar to that given for other navies is:—

	Completed at end of

\* *Asama* was wrecked, but has been salvaged and refitted.

The work of the Japanese Navy during the war has been in the blockade and reduction of Tsing-tau, assisting in the protection of the Pacific trade routes and the transport of troops from New Zealand and Australia, and co-operating with British forces in compelling Admiral von Spee to come into the Atlantic, where his squadron was destroyed at the Falkland Isles.

**Production and Industry (exclusive of Formosa).**

About three-fifths of the arable land is cultivated by peasant proprietors, and the remaining portion of it by tenants. According to the official report of January 1, 1916, taxed land owned by private persons and local corporations was in chō (1 chō = 2,4507 acres) 14,942,094; of which under cultivation, 5,271,755; forests, 7,906,721; open field, 1,342,435.

The forest area in 1915 was 46,010,000 acres, of which 19,591,480 acres belonged to the State, and 4,484,980 acres to the Imperial household.

The following are some agricultural statistics for three years :—

Crop	Acreage			Produce (quarters)		
	1913	1914	1915	1913	1914	1915
Rice . . .	7,574,262	7,583,422	7,583,600	31,409,542	35,628,88 0	34,952,870
Wheat . . .	1,208,647	1,197,502	1,259,600	3,266,842	2,805,14 9	3,343,445

Pyrites . . .	30,873,548	600,605			
			Total value . . .	—	154,066,561

<sup>1</sup> 120 mommé = 1 lb. avoirdupois.

<sup>2</sup> kin = 1·323 lb. av.

<sup>3</sup> 1 kwan = 8·28 lbs.

<sup>4</sup> koku = 39·7 gall.

On June 30, 1916, there were 37 cotton spinning companies with 2,738,674 spindles consuming 449,949,383 pounds of cotton and producing 394,107,628 pounds of yarn. They employed 23,494 males and 99,208 females. On the same date there were 18 cotton weaving companies with 29,962 looms producing 283,551,160 pounds of cotton and employing 3,710 males and 23,756 females.

The last industrial census showed that on December 31, 1914, there were 86 Government factories and 15,811 private factories (employing more than 10 hands). Number of employees, 916,252 (375,596 males and 540,656 females).

Other manufactures in 1914 were Japanese paper worth 18,563,067 yen ; European paper, 25,096,977 yen ; matches, 15,545,855 yen ; earthenware, 15,656,856 yen ; lacquered ware, 8,738,480 yen ; matting, 8,043,829 yen ; leather, 9,143,508 yen ; oil, 16,624,564 yen.

In 1914 the raw marine products amounted to the value of 95,053,814 yen ; the manufactured products to the value of 60,279,649 yen.

The recorded values are ascertained from shipping documents and invoices, in the case of exports being given as the market values in Japan, and of imports as the values in the countries of purchase, inclusive of the cost of transport, insurance, &c. The prime origin and ultimate destination, as far as they are known, are recorded as disclosed in the shipping documents.

## Chief articles of the foreign commerce, excluding re-imports and re-exports :—

Imports	1915	1916	Exports	1915	1916
	Yen	Yen		Yen	Yen
Rice . . . . .	4,886,125	3,083,218	Cotton yarn . . . . .	66,211,007	77,603,654
Wheat . . . . .	1,059,265	1,356,088	Cotton tissues . . . . .	38,511,414	59,048,600
Wheat flour . . . . .	194,388	94,704	Raw silk . . . . .	152,030,518	267,006,983
Soja beans . . . . .	9,300,462	7,109,065	Silk waste . . . . .	5,955,168	10,476,969
Sugar . . . . .	14,805,886	12,984,204	Silk manufactures . . . . .	38,552,526	41,276,216
Raw cotton . . . . .	217,316,063	276,088,674	Coal . . . . .	19,236,725	20,405,899
Cotton shirtings & prints . . . . .	863,152	621,265	Drugs, Chemicals . . . . .	23,819,711	32,825,053
Cotton satins . . . . .	1,922,612	1,598,397	Matches . . . . .	14,717,088	21,108,103
Wool . . . . .	39,584,249	33,506,699	Copper . . . . .	44,264,801	66,119,107
Woollen yarn . . . . .	392,417	1,424,302	Camphor . . . . .	3,475,415	6,287,795
Woollen cloth . . . . .	3,154,813	4,301,713	Tea . . . . .	15,402,023	16,081,977
Oil cake . . . . .	36,127,106	37,468,059	Rice . . . . .	9,674,969	11,197,399
Petroleum . . . . .	8,463,675	5,570,948	Matting . . . . .	2,452,804	2,864,008
Iron, pig, bar, rod & plates . . . . .	28,087,868	70,985,077	Earthenware . . . . .	6,952,953	12,040,357
Engines and rolling stock . . . . .	847,438	414,125	Straw-plait . . . . .	14,131,547	16,318,350
Machinery . . . . .	8,816,485	16,102,157	Sake . . . . .	1,775,515	2,080,888
			Refined sugar . . . . .	11,808,785	16,421,788
			Toys . . . . .	4,538,466	7,640,020

The imports of bullion and specie (gold and silver) in 1915 amounted to 24,296,518 yen, and exports to 44,566,024 yen ; in 1916, imports, 101,029,901 yen ; exports, 28,202,087 yen.

The staple articles of import from Japan into Great Britain (Board of Trade returns) in the year 1915 were silk manufactures, 1,478,201*l.*; straw plaiting, 597,754*l.*; unwrought copper, 1,321,795*l.*; buttons, 164,800*l.*; drugs, 148,568*l.*; curios, 41,165*l.* The staple articles of British export to Japan consist of cotton goods of the value of 446,604*l.*; cotton yarn, 16,362*l.*; woollen goods, 279,109*l.*; iron, wrought and unwrought, 1,439,736*l.*; machinery, 480,413*l.*; manures, 130,661*l.*; arms and ammunition, 108,133*l.*

Total trade between Japan and U.K. for 5 years in thousands of pounds sterling :—

—	1912	1913	1914	1915	1916
Imports from Japan to U.K.	3,933	4,387	4,105	9,379	12,491
Exports to Japan from U.K.	12,229	14,530	8,354	4,876	7,501

### Shipping and Navigation.

—	Entered (1915)		Cleared (1913)	
	No.	Tonnage	No.	Tonnage
Japanese steamships . . . . .	6,850	13,848,558	6,296	12,610,352
" sailing ships and junks . . . . .	296	38,152	366	50,182
Foreign steamships . . . . .	1,917	6,229,986	3,630	12,221,981
" sailing ships . . . . .	12	18,086	7	14,783
Total . . . . .	9,075	19,634,782	10,299	24,897,298

The total number of steamers cleared in 1914 was 9,522, with a tonnage of 23,514,147, and of sailing vessels 298, with a tonnage of 46,703.

Of the total foreign ships entered in 1915, 1,055 vessels of 3,881,922 tons were British; 506 of 748,286 tons Russian; 10 of 29,246 tons Norwegian; 147 of 959,105 tons American; 62 of 225,704 tons French.

On January 1, 1916, the merchant navy (without Formosa) consisted of 3,487 steamers of 1,621,205 tons net; 17,498 sailing vessels of 671,273 tons net. The Japanese Government subsidises shipping companies for foreign trade, and now Japanese vessels run on four great routes to Europe, North America, South America, and Australia. There are also lines plying between Japanese ports and Korea, Northern China, and nine ports on the Yangtse-Kiang.

### Internal Communications.

The following table gives the railway statistics (including, except for revenue and expenditure, Formosa) for 1915 :—

—	State Railways	Railways owned by Private Companies	Total
Length in miles . . . . .	5,686	1,445	7,131
Gross income, yen . . . . .	112,169,616	8,582,319	120,751,935
Expenditure, yen . . . . .	97,927,049	5,934,061	103,861,110
Goods carried, tons . . . . .	35,272,875	4,948,292	40,216,167
Passengers, number . . . . .	166,092,421	47,276,289	213,368,710

It has been decided (1916) to make the standard gauge 4·85 feet. The work is expected to be completed in 1943, and the cost estimated at 1,408,000,900 yen.

There are (1915) 1,413 miles of electric tramway in Japan, and 405 miles under construction.

The following are postal and telegraphic statistics for four fiscal years :—

—	1911-1912	1912-1913	1913-1914	1914-1915
Letters . . . . .	349,243,855	370,916,171	394,518,835	498,650,000
Postcards . . . . .	956,684,045	913,465,012	1,048,991,721	1,069,768,000
Newspapers and periodicals . . . . .	192,585,661	204,606,628	200,170,374	305,804,000
Parcels . . . . .	23,442,540	24,702,039	25,717,509	25,473,020
Post and Telegraph offices . . . . .	7,166	7,268	7,268	7,266
Telegrams delivered . . . . .	32,478,365	33,758,301	33,723,887	33,786,538
Telegraphic line (miles) . . . . .	23,880	24,532	25,583	26,255
" wire (miles) . . . . .	105,892	109,068	109,562	117,617
Telephone line (miles) . . . . .	6,576	7,276	6,842	7,445
" wire (miles) . . . . .	382,531	450,605	482,728	539,987
Number of telephone messages . . . . .	766,205,606	857,385,960	927,637,826	1,045,042,902

### Money and Credit.

Coinage issued in the fiscal years stated (ending 31st March) :—

—	1911-12	1912-13	1913-14	1914-15	1915-16
	Yen	Yen	Yen	Yen	Yen
Gold coins . . . . .	29,760,000	29,560,000	17,870,000	20,900,000	30,260,000
Silver „ . . . . .	8,928,851	4,916,234	4,289,953	1,969,926	2,690,884
Bronze „ . . . . .	—	—	150,023	100,016	130,020
* Total . . . . .	38,688,851	34,476,234	22,310,006	22,969,942	33,080,904

The total amount of coins in circulation at the end of 1915 was 169,440,724 yen; notes, 430,138,010.

The principal banks of Japan are the Nippon Ginko (Bank of Japan), the Yokohama Specie Bank, the Hypothec Bank, the Industrial Bank of Japan, the Hokkaido Colonisation Bank, the Bank of Taiwan. There are also 46 agricultural and industrial banks, 1,607 ordinary banks, and 653 savings banks. The condition of the banks for three years (December 31st) was :—

Year	Paid-up Capital	Reserve Fund	Deposits	Earnings	Rate of Dividend
	Yen	Yen	Yen	Yen	Yen
1913 . . . . .	615,658,816	218,336,457	2,209,840,763	369,151,107	9·3
1914 . . . . .	645,296,572	236,925,940	2,312,266,847	387,076,320	9·3
1915 . . . . .	649,143,034	249,966,682	2,567,861,994	253,063,074	9·5

### Money, Weights, and Measures.

The present monetary law came into force from October, 1897, by which gold standard was adopted. The unit of value is 0·75 gramme of pure gold, and is called the yen = 2s. 0½d., which, however, is not coined. The pieces coined are as follows :—Gold coins (20, 10, and 5 yen pieces), silver coins (50, 20, and 10 sen pieces), nickel coin (5 sen piece), and bronze coins (1 sen

and 5 rin pieces). The sen is the hundredth part of a yen, and the rin is the tenth part of a sen. The gold coins are '900 fine, and the silver coins '800 fine. The gold coins formerly issued (20, 10, 5, 2, and 1 yen pieces) are used at double their face value. The one-yen silver coin formerly issued is withdrawn. The old copper 2, 1 and  $\frac{1}{2}$  sen pieces, are used as formerly.

The <i>Kin</i>	= 160 <i>momme</i>	. . .	= 1'323 lb. avoirdupois.
„ <i>Kwan</i>	= 1,000 „	. . .	= 8'267 lbs. „
„ <i>Sun</i>	. . .	. . .	= 1'193 inch.
„ <i>Shaku</i>	(10 <i>sun</i> )	. . .	= 11'930 inches.
„ <i>Ken</i>	= 6 <i>shaku</i>	. . .	= 5'965 feet.
„ <i>Chō</i>	= 60 <i>ken</i>	. . .	= $\frac{1}{16}$ mile, 5'4229 chains.
„ <i>Ri</i>	= 36 <i>chō</i>	. . .	= 2'44 miles.
„ <i>Ri sq.</i>	. . .	. . .	= 5'9552 sq. miles.
„ <i>Chō</i> , land measure	. . .	. . .	= 2'45 acres.
„ <i>Koku</i> , liquid	. . .	. . .	= 39'7033 gallons.
„ „ dry	. . .	. . .	= 4'9629 bushels.
„ <i>To</i> , liquid	. . .	. . .	= 3'9703 gallons.
„ „ dry	. . .	. . .	= 1'9851 peck.

Besides, the system of weights and measures based on the metric system acknowledged as legal in the following ratios.

metre	= 3'3 <i>shaku</i> .
gramme	= 0'26667 <i>momme</i> ( $\frac{1}{18}$ <i>momme</i> ).

## Diplomatic Representatives.

### 1. OF JAPAN IN GREAT BRITAIN.

*Ambassador Extraordinary and Plenipotentiary.* — His Excellency Baron Chinda (appointed, August, 1916).

*Counsellor.* — Kumataro Honda.

*Second Secretaries.* — Isaburo Yoshida and Nobumichi Sakenobe.

*Third Secretary.* — Setsuzo Sawada.

*Attachés.* — Mamoru Shigemitsu.

*Naval Attaché.* — Rear-Admiral Kozaburo Oguri, K.C.M.G.

*Military Attaché.* — Colonel Sabweo Inagaki, C.B.

*Financial Attaché.* — Kengo Mori.

*Chancellors.* — Saizo Mashiko, Tetsuzo Yuge, and Kuramatsu Kishi.

*Consul-General in London.* — Takahashi Nakamura.

There are Consuls at Glasgow, Liverpool, and Middlesbrough.

### 2. OF GREAT BRITAIN IN JAPAN.

*Ambassador and Consul-General.* — Rt. Hon. Sir William Conyngham Greene, G.C.M.G., K.C.B., appointed October, 1912.

*Counsellor.* — H. C. Norman.

*Secretaries.* — Charles Wingfield and Count Charles Bentinck.

*Naval Attaché.* — Captain Edward H. Rymer, R.N.

*Military Attaché.* — Lieut.-Col. John A. C. Somerville.

*Japanese Secretary.* — E. M. Hobart-Hampden, C.M.G.

*Commercial Attaché.* — E. T. F. Crowe, C.M.G.

*Honorary Attaché.* — Lieut. W. Bowle-Evans.

There are Consular Representatives at Dairen (Dalny), Hakodate, Kobé, Nagasaki, Shinonoseki, and Yokohama, and at Tainan and Tamsui in the Island of Formosa.

## KOREA (CHOSEN).

**Government.**—The ex-Emperor, whose surname is Yi and name Chök, was born March 25, 1874, and succeeded his father, Yi Hiung, on his abdication, July 20, 1907. He is reckoned as the thirty-first in succession since the founding of the dynasty in 1392; but four of the so-called Kings were Crown Princes who never ascended the throne.

For details of treaties between Japan and China, Russia, and Korea from 1895, see *THE STATESMAN'S YEAR-BOOK* for 1916, p. 1112.

By a treaty concluded between Japan and Korea on August 22, 1910, the Korean territory was formally annexed to the Empire of Japan. The Emperor was deprived of all political power, and was accorded the title of Prince Yi, and his father (the former ex-Emperor) that of Prince Yi, Senior. The title of the country was changed back to "Chosen," from Tai Han, which had been adopted in 1897, and the office of Japanese Governor-General established. Henceforth Korea became an integral part of the Japanese Empire. Members of the Korean Imperial House and the late Korean Cabinet have had Japanese patents of nobility conferred upon them.

*Governor-General.*—His Excellency General Hasegama (November, 1916).

**Area and Population.**—Estimated area, about 86,000 square miles; population on December 31, 1916, was 17,519,864 (9,103,952 males and 8,415,913 females). The vast majority of the foreign residents are Chinese, numbering some 18,972. The latest returns give the number of British subjects as 223, Americans 597, French 107, and Germans 57. The urban prefecture of Seoul has 302,686 inhabitants (50,291 Japanese), and that of Ping-Yang 173,273. There has been a large immigration of Japanese into the Peninsula of recent years and a considerable exodus of Koreans into the neighbouring Russian and Chinese territory.

The language of the people is intermediate between Mongolo-Tartar and Japanese, with a large admixture of Chinese words, and an alphabetical system of writing is used. Official correspondence, except with Korean provincial officials, is conducted in Japanese. The written language of the people is a mixture of Chinese characters and native script.

**Religion and Instruction.**—The worship of ancestors is observed with as much punctiliousness as in China, but, otherwise, religion holds a low place in the land. In the country there are numerous Buddhist monasteries, which, however, are looked upon with scant respect. The knowledge of Chinese classics and of Confucian doctrine, formerly essential to the education of the upper classes, is giving way under Japanese influence to a more practical system of instruction. There is a large number of Christian converts. In 1890 an English Church mission was established, with a bishop and 20 other members. A hospital in Chemulpo is attached to the mission with an English doctor and trained nurses. The American missionaries have two hospitals in Seoul, where the Japanese have also established a large Government hospital. The total number of hospitals in the country is about 160, while the Red Cross Society has a numerous membership among both Japanese and Koreans. There are over 250 Protestant missionaries (British and American), and 60 Roman Catholic, also a Russian (Greek Church) mission in Seoul. The mission schools have, however, been made subject to strict superintendence and control.

In Seoul there is a Government school for English with 1 English teacher and 100 pupils. There are, besides, numerous Christian Mission schools

for boys and girls throughout the country. All these schools are subject to the control of the Education Department. Technical and industrial schools are rapidly springing up. A model farm and agricultural school has been established at Suigen. In 1914 there were 403 public schools of all sorts, with 59,397 pupils and 1,013 teachers.

In Seoul there are two daily Korean newspapers, and 23 Japanese, besides others published at Chemulpo. There is a Government-owned daily newspaper in English, published at Seoul. The Press is entirely in the hands of the Japanese, and a strict censorship is exercised.

**Finance.**—The finances of Korea form a special account in the Budget of Japan. The estimated revenue for two years is shown as follows (1 yen = 2s. 0½d.) :—

Revenue.	1915-16	1916-17	Expenditure.	1915-16	1916-17
	Yen	Yen		Yen	Yen
Ordinary ...	39,776,729	41,561,626	Ordinary ...	36,757,714	37,073,155
Extraordinary ...	18,783,778	18,287,372	Extraordinary ...	21,802,703	22,775,843
Total ...	58,560,507	59,848,998	Total ...	58,560,507	59,848,998

The main sources of revenue are taxes and public undertakings.

The total debt on December 31, 1915, was 65,968,453 yen (6,756,986l.).

**Production.**—Korea is entirely an agricultural country; the cultivated area is about 6,500,000 acres, but the methods of cultivation are of a backward and primitive type, and the means of communication few and difficult, though improvements are fast being made in this respect. The chief crops are rice, wheat, beans, and grain of all kinds, besides tobacco and cotton. The rice crops for 5 years were (in bushels):—1911, 51,060,332; 1912, 45,892,720; 1913, 51,664,102; 1914, 62,254,935; 1915, 55,540,666. Whale fishing is carried on on the coast. Live stock is raised as a by-product of agriculture. The cattle are well known for their size and quality.

Gold mining is carried on and promises to be successful. There are four foreign-owned gold mines in active operation, and others in process of development. Copper, iron, and coal are abundant in Korea, but the development of these resources is impeded by defective means of communication. An anthracite coal mine in the north of Korea is in operation, and considerable extension of the workings are in contemplation. Graphite and mica also are found in considerable quantities.

**Commerce.**—As the result of annexation, the Treaties of Korea with foreign countries virtually ceased to exist, though as a matter of fact, neither the German nor the American Governments have as yet unreservedly admitted the cessation of consular jurisdiction over their subjects in Korea. The Japanese courts have, however, taken cognisance of criminal charges against American citizens without any objection being raised by the United States Government. The tariff imposed by these treaties is maintained for a period of 10 years from the date of annexation.

The open ports are Chemulpo, Fusan, Wonsan, Chinnampo, Mokpo, Kunsan, Songchin, Ping-Yang (inland city), Wiju, Yong-Am-Po (1908), Chung-jin and Shin-wi-ju.

## Trade (merchandise only) at the open ports :—

—	1912	1913	1914	1915	1916
	Yen	Yen	Yen	Yen	Yen
Imports . .	67,115,447	71,580,247	63,231,461	59,199,357	26,255,751
Exports . .	20,985,617	30,878,944	34,388,787	49,492,325	35,835,368

The imports in 1915 included cotton goods, 2,103,022 yen ; cotton yarn, 2,403,339 yen ; machinery, 1,222,603 yen ; silk goods, 973,252 yen ; tobacco and cigarettes, 435,604 yen ; timber, 1,436,996 yen ; kerosene oil, 1,701,786 yen ; grass cloth, 1,185,103 yen ; sugar, 1,545,219 yen ; paper, 1,504,427 yen ; coal, 1,810,034 yen. The principal exports were rice, 24,516,622 yen ; beans, 5,328,059 yen ; cowhides, 3,538,790 yen ; cattle, 465,927 yen. Gold was exported to the value of 11,366,587 yen. Of the imports the value of 41,535,102 yen in 1915, was from Japan ; of the exports the value of 40,900,829 yen in 1913 was to Japan. From China in 1915 the imports amounted to 8,022,188 yen ; to China the exports amounted to 5,599,286 yen. From Great Britain and the United States respectively the imports amounted to 4,729,512 yen and 3,933,840 yen.

**Shipping and Communication.**—The foreign-going shipping entered at the open ports in 1915 had a tonnage of 3,971,792, and those that cleared a tonnage of 3,899,756.

Transport in the interior is by porters, pack-horses and oxen, and by river. Improvements in road making are being effected. There are about 1,400 miles of road. Length of railways, 1916, 1,006 miles ; number of passengers carried (1915-16), 5,040,471. The Korean system of railways is now connected with the Siberian and Chinese lines, a through express train of the latest type running thrice weekly from Fusan to Chang-chun, via Seoul, Ping-Yang, Autung, and Mukden. From Chang-chun a Russian train connects at Harbin with the Trans-Siberian express.

A street electric railway in Seoul has been extended in four directions to points three miles outside the city. Number of post offices (1916) 516. There are 4,830 miles of telegraph line open, and the lines connect with the Japanese and the Chinese systems. The telephone has been introduced at Seoul, Chemulpo, and several other towns ; length of lines 2,250 miles.

**Money.**—Regulations for banking were framed in 1906, and in 1915 there were 11 ordinary banks with 7,015,000 yen paid-up capital.

A central bank, the Bank of Chosen, was established in August, 1909, and in November it took the place of the First Bank of Japan (Dai-ichi-Ginko) as the Government Treasury. Notes of this bank are permitted to circulate unrestrictedly within the jurisdiction of the Government-General of Chosen and are exchangeable with gold coin and convertible notes issued by the Bank of Japan. Against their issue must be provided a reserve of the same amount, consisting of gold coin, gold and silver bullion, and convertible notes of the Bank of Japan ; silver bullion, however, must not exceed one-fourth of the total reserve.

The coinage consists of gold pieces of 5-, 10-, and 20-yen, silver of 10-, 20-, and 50-sen, nickel of 5 sen, and bronze of 1-sen and 5-rin. The old nickel coin has been practically wholly withdrawn from circulation, and the cash currency is now used only for petty transactions. Under certain regulations, bills of exchange and cheques may pass into the currency. In the

more important commercial towns there are authorised 'note associations' of merchants for the transaction of business relating to bills.

*British Consul-General at Seoul.*—A. Hyde Lay, C.M.G.

*Vice-Consul at Seoul.*—W. B. Cuningham.

### FORMOSA (TAIWAN).

THE Island of Formosa, or Taiwan, was ceded to Japan by China by the treaty which was ratified on May 8, 1895, and Japan took formal possession on June 2 of the same year. Japanese civil government in the island began on March 31, 1896.

The Island has an area of 13,339 square miles, with a population (1914) of 3,612,184 (1,890,091 males and 1,722,093 females). The chief towns are Tainan City (53,794 inhabitants), Tamsui, and Kelung. At Kelung the old fortifications have been restored and improved.

Many improvements have been effected by the Japanese administration. A colonising scheme was commenced in 1909, whereby Japanese were settled in Taiwan. There are four villages containing 493 families consisting of 2,425 persons. An educational system has been established for Japanese and natives, for whom there are (1914) 331 elementary schools with 1,792 teachers and 67,545 pupils. There are also normal schools, a medical school, and a school for teaching the Japanese language to natives, and native languages to Japanese.

The receipts of the Japanese administration are from inland taxes, customs, public undertakings, and also subsidies from Japan ranging from 5 to 9 million yen annually. The expenditure is chiefly for internal administration and the working of public undertakings.

—	1912-13	1913-14	1914-15	1915-16 <sup>1</sup>	1916-17 <sup>1</sup>

<sup>1</sup> Estimates.

The agricultural products of Formosa are rice, tea, sugar, sweet potatoes, ramie, jute, turmeric; while camphor is worked in the forests under a Government monopoly. There are active fisheries. The industries comprise flour-milling, sugar, tobacco, oil, spirits, iron-work, glass, bricks, soap, and many other manufactures. Mining is making steady progress.

The commerce of Formosa is largely with Japan, the chief foreign countries with which there is traffic being China and the United States. In 1916 the imports amounted to 53,409,638 yen; exports, 7,110,278 yen. The chief exports in 1915 were tea, 75,623,179 yen; camphor, 3,235,755 yen.

Roads have been and are being constructed throughout the Island. There are now (1915) 318 miles of railway open and over 125 miles of light railway. In 1915 there were 158 post offices, through which passed 34,929,042 packets and 522,766 parcels. The telegraph service has 153 offices; length of line 643 miles; of wire, 2,610 miles; messages (1915), 1,835,904. Telephone line, 777 miles; calls (1915), 20,162,355.

At the end of 1914 the post office savings bank had 141,005 depositors with 237,963½ to their credit.

Shipping entered at Taiwan ports in 1913 included 374 Japanese vessels of 567,945 tons, 37 British vessels of 124,329 tons, 10 German vessels of 25,797 tons, and 8 American vessels of 65,280 tons. The total was 438 vessels of 792,724 tons, as compared with 435 vessels of 806,944 tons in 1912.

The coinage current in the Island is that of Japan.

**Hokotō** or the **Pescadores** consist of about 12 islands, with a total area of about 50 square miles.

Japanese **Sakhalin** (or **Karafuto**) consists of that portion of Sakhalin which lies to the south of the parallel of 50° north latitude. It has an area of about 13,148 sq. miles, and, in 1914, a population of 49,463 (27,165 males and 22,298 females). The most important industry of the island is the herring fishery, but large areas are fit for agriculture and pasturage, and Japanese settlers have been provided with seed and domestic animals. There is a vast forest area of larch and fir trees. The minerals found are coal and alluvial gold.

The revenue and expenditure for 1916-17 are estimated to balance at 2,218,559 yen.

The leased Territory of **Kwantung**, the southern part of the Liaotung Peninsula, has an area of about 538 sq. miles, and a population (December 31, 1915) of 540,835 (306,477 males and 234,358 females), of whom 490,431 (211,383 females) are Chinese and 50,262 (22,926 females) Japanese (exclusive of army and navy). The Territory is under a Japanese governor-general, the seat of administration being at Dairen (or Tairen, formerly called Dalny), where in 1914 there were 34 elementary schools with 8,960 pupils; also an American Presbyterian Mission with a church and a hospital.

The estimated revenue and expenditure for 1916-17 balance at 4,483,470 yen.

The chief agricultural products of the Territory are maize, millet, beans, wheat, buckwheat, rice, tobacco, hemp, and various vegetables. There is an active fishing industry. The chief manufactured product is salt, which is abundant in the Territory. Since July 1, 1907, the Territory forms a Customs district under the Chinese Imperial Customs, Dairen being the Customs port, with out-stations at Kinchow, Pulantien, Pitzewo, and Port Arthur. The port is free, goods being subject to duty only on crossing the frontier of the leased territory. The trade is mostly with Japan and China. Imports (1915), 43,969,092 yen; exports, 56,766,575 yen. Dairen has a fine harbour, ice-free all the year, and protected by a breakwater 1,000 yards long. The harbour is provided with sheds and warehouses, under the control of the Manchuria Railway Company. The railway connects Port Arthur and Dairen with Mukden, Kharbin, and the Eastern Chinese Railway System.

Gold and silver coin and the notes of the Yokohama specie bank are current.

## LIBERIA.

**Constitution and Government.**—The Liberian Republic had its origin in the efforts of several colonisation societies of Europe and America to make permanent provision for freed American slaves. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On July 26, 1847, the State was constituted as the Free and Independent Republic of Liberia. The new State was first recognised by Great Britain, and ultimately by other Powers. The Constitution of the Republic is on the model of that of the United States, with trifling exceptions. The executive is vested in a President, a Vice-President, and a Council of 6 Ministers, and the legislative power in a parliament of two houses, called the Senate and the House of Representatives. The President and the House of Representatives are elected for four years, and the Senate for two years. An Amendment to the Constitution was carried in May, 1907, extending these terms to *four* and *six* years respectively. The President must be thirty-five years of age, and have real property to the value of 600 dollars, or 120*l*. Electors must be of negro blood, and owners of land. The natives of the country are not excluded from the franchise, but, except in the centres of civilisation, they take no part in political life. The official language of the Government is English.

*President of Liberia.*—Hon. Daniel Howard (1916-20).

*Vice-President.*—Hon. S. G. Harmon (1916-20).

The President is assisted in his executive function by the Secretary of State, the Secretary of the Treasury, the Secretary of the Interior, the Attorney-General, the Postmaster-General, and the Secretary for War and Navy.

**Area and Population.**—Liberia has about 350 miles of coast line, extending from the British colony of Sierra Leone, on the west, to the French colony of the Ivory Coast on the east, and it stretches inland to a distance, in some places, of about 200 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1892 and 1907-10. Under the latter agreement Liberia lost about 2,000 square miles of territory which she was unable effectively to administer. Early in 1911 an agreement was concluded between the British and Liberian Governments transferring the territory of Kanre-Lahun to Sierra Leone in exchange for a strip of undeveloped territory of about the same area on the south side of Morro River, which now becomes the boundary.

The total area is about 40,000 square miles. Of this a strip of land about 20 miles broad along parts of the coast is administered by the Government. The total population is estimated at 1,500,000 to 2,100,000, all of the African race. The Americo-Liberians have not full control or influence over the natives of the interior, where there are several powerful aboriginal chiefs. The indigenous natives belong in the main to five principal stocks: (1) the Mandingos (Muhammadan), (2) the Kisi; (3) the Gola, (4) the Kpwesi and (5) the Kru negroes and their allies. The Kru tribes preponderate and are absolute negroes, mostly Pagan, a few Christian. The number of American Liberians is estimated at about 12,000. About 50,000 of the coast negroes (including the Liberians proper) may be considered civilised. All such use English as their language in daily life, and are Christian in religion. There

is a British negro colony of about 500, and there are about 160 Europeans, including 40 Englishmen. The coast region is divided into counties, Bassa, Sino, and Maryland, each under a Government superintendent, and Montserrado, subdivided into 4 districts, each under a superintendent. Monrovia, the capital, has, including Krutown, an estimated population of 6,000. It is a port of entry, the others being (from January 1st, 1913) Liberian Gene, Saywolu, Robertsport, Marshall, Buchanan, River Cess, Greenville, Nana Kru, Sasstown, Grand Cess, Harper, Kablake, Half Cavalla, and Webo. Other towns are Robertsport, Royesville, Marshall, Arthington, Careysburg, Millsburg, Whiteplains, Boporo (native), Rocktown (native), Philadelphia, Cuttington, Upper Buchanan and Edina.

The Americo-Liberians are all Protestant (Anglican, Presbyterian, Baptist, or Methodist). There are several American missions at work and one French Roman Catholic. The Government educational system is supplemented by mission schools, instruction being given both to American and to native negroes. In 1910 the Government had 113 elementary schools with 122 teachers and 4,100 pupils. There are 87 mission schools and about 3,000 pupils. The mission schools give industrial training. The Methodists have a college at Monrovia; the Protestant Episcopalians a high school at Cape Palmas and 3 other important schools. The Government has a college with (1916) 3 professors and 20 students. A criminal code was enacted in 1900; the customs laws were codified in 1907.

For defence every citizen from 16 to 50 years of age capable of bearing arms is liable to serve. The organised militia, volunteers, and police number about 400. An armed revenue cutter has recently been built, but has not been delivered.

**Finance.**—The revenue and expenditure (in American dollars) :—

	1906	1908	1909	1911-12	1912-13	1913-14	1914-15	1915-16
	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue . . .	—	355,209	378,300	471,335	618,809	531,500	373,368	295,233
Expenditure . .	340,036	350,000	—	470,000	529,548	531,500	266,861	282,332

The customs duties for 1914-15 were 347,850 dollars; for 1915-16 they were 224,660 dollars.

In 1912 an international loan of 1,700,000 dollars was raised, secured by the Customs' rubber tax, and tax on native labourers shipped from Liberia, which is administered by an American General Receiver and British, French, and German Receivers, the American General Receiver acting as financial adviser to the Government. It is further provided that for the security of the revenue a frontier police force sufficient for the maintenance of peace in Liberia shall be established, and that the United States shall designate trained military officers to organise the force. In 1915, 73,941 dollars were spent on the force.

On December 31, 1916, the total debt was 1,458,000 dollars.

**Production, Commerce.**—The agricultural, mining, and industrial development of Liberia has scarcely begun. There are forests unworked; the soil is productive, but cultivation is neglected; cocoa and cotton are produced in small quantities only, and indigenous coffee is the staple product. Piassava fibre, prepared from the raphia palm, is largely exported. Palm oil

and palm kernels are exported. Kola nuts, chillies, beni seed, anatto seed and rice are produced for local consumption. Beeswax is collected, and gum copal is found but is not collected. Tortoiseshell, improperly prepared, is sold in small quantities. In the forests there are rubber vines and trees of 22 species. Iron is worked by the natives. Gold in small quantities, tin, copper, zinc, monazite, corundum, lead, bitumen or lignite, and diamonds have been at different times found in the interior, but not as yet in payable form or abundance.

The trade for 4 years is shown as follows:—

Year	Imports	Exports	Year	Imports	Exports
	Dollars	Dollars		Dollars	Dollars
1910	1,048,772	964,097	1912	1,194,128	1,150,491
1911	1,154,924	1,013,849	1913	902,063	1,337,197

No later figures have been issued.

The chief imports are rice, Manchester goods, gin, tobacco, building timber, galvanised roofing iron, ready-made clothing, and dried and preserved fish. The chief exports are rubber, palm oil, palm kernels, piassava fibre, cocoa, coffee, ivory, ginger, camwood, and anatto. The trade is chiefly with Great Britain, Germany, and Holland.

According to the 'Annual Statement of Trade' issued by the Board of Trade, the value of the trade between the United Kingdom and Liberia was as follows in five years:—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports into U.K. from Liberia	45,000	56,709	53,450	245,419	191,308
Exports of U.K. produce to Liberia	92,977	90,258	79,410	73,309	101,931

Monrovia is visited regularly by 7 lines of steamers, British, German, and Spanish. In 1914, 371 vessels visited Monrovia with a tonnage of 845,901 tons. Of these, 60 vessels of 347,673 tons were British, 170 vessels of 419,041 tons German.

There are no railways or vehicular means of transport in the country, except ox-carts and a motor road of about 20 miles recently constructed. The river St. Paul is navigable for 25 miles from the sea northwards (including creeks, for 38 miles), and various Liberians maintain three steam launches thereon. The Liberian Government has a river launch, besides the gun vessel already mentioned. Two motor launches are owned by German trading firms, and one by the British Consul-General. Direct cable communication with Europe was established by German cable via Tenerife on March 21, 1910, and with New York, by the South American Cable Co., which opened its station at Monrovia on February 14, 1912. There are two wireless stations at Monrovia, one belonging to the French Government, and the other to the German Cable Company.

**Money, Weights, and Measures.**—The money chiefly used is British gold and silver, but there is a Liberian coinage in silver and copper. Accounts are kept generally in American dollars and cents. The Liberian coins are as follows:—Silver, 50-, 25-, and 10-cent pieces; copper, 2- and 1-cent pieces.

Weights and measures are the same as Great Britain and the United States.

The Bank of British West Africa, Ltd., has a branch at Monrovia, and agencies at other ports of the Republic.

## Diplomatic and Consular Representatives.

### 1. OF LIBERIA IN GREAT BRITAIN.

*Minister.*—J. P. Crommelin.

*Commercial Attaché.*—J. T. Grein.

*Consul-General.*—C. M. Higgins.

There are Consuls in London, Birmingham, Cardiff, Glasgow, Hull, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton, Swansea.

### 2. OF GREAT BRITAIN IN LIBERIA.

*H. B. M. Consul-General at Monrovia.*—R. C. F. Maugham (1913).

*Vice-Consul.*—M. Y. H. Parks.

*British Receiver of Customs.*—Richard Sharpe.

## LIECHTENSTEIN.

The Principality of Liechtenstein, lying between the Austrian crownland of Vorarlberg and the Swiss cantons of St. Gallen and Graubünden, is a sovereign State consisting of Schellenberg and Vaduz (formerly immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of January 23, 1719, granted by the Emperor Karl VI., the two lordships were constituted as the Principality of Liechtenstein. After the break-up of the Empire in 1806 the Principality was incorporated in the Rhine Confederation; from 1815 to 1866 it formed part of the German Confederation, since the break-up of which it has joined no similar union.

The Reigning Prince is **John II.**, born October 5, 1840; succeeded his father, November 12, 1858. The reigning family originated in the twelfth century, and traces its descent through free barons who in 1608 became princes of Liechtenstein. The monarchy is hereditary in the male line. The constitution provides for a Diet of 15 members appointed for four years (3 by the Prince, and 12 by indirect vote). The capital and seat of Government is Vaduz (pop. 1,376). But the appeal court sits in Vienna, and the court of control (financial) at Butschowitz in Moravia; here too are kept the accounts of the Prince's private property. The directorate of the Prince's private forests is at Olmütz; but the affairs of the reigning house and its private property are managed by the Chancellery at Vienna. The Principality is by treaties connected in many ways with the Austro-Hungarian monarchy. Since 1852 it has belonged to the Austrian Customs Union. The annual payments in fact amount to over 100,000 crowns. The postal, telegraph, and telephone affairs of the principality are managed by the Austrian authorities, according to an agreement made in 1911, Austria paying annually to Liechtenstein 47,000 crowns. According to a treaty made in 1884, the "Oberlandesgericht in Innsbruck" (appeal court for Tirol and Vorarlberg) was constituted the court of highest instance.

Area, 65 square miles; population, of German origin and nearly all Catholic, 1912, 10,716 (5,266 males and 5,450 females). In 1915 the revenue amounted to 1,158,557 crowns; expenditure 1,137,885 crowns. There is no public debt. The Prince has estates in Austria and elsewhere yielding over 100,000*l.* sterling per annum. The inhabitants of Liechtenstein since 1867 have not been liable to military service. The population is in great part agricultural, the chief products of the country being corn, wine, fruit, and timber. The rearing of cattle for which the fine Alpine pastures are well suited is highly developed. The industries of the Principality, except the textile industries, are not unimportant. The Principality has no army (since 1886).

## LUXEMBURG.

**Reigning Grand-duchess.**—**Marie-Adelaide**, born June 14, 1894; succeeded on the death of her father, the late Grand-duke Wilhelm, February 26, 1912. Sisters:—Princess *Charlotte*, born January 23, 1896; Princess *Hilda*, born February 15, 1897; Princess *Antoinette*, born October 7, 1899; Princess *Elisabeth*, born March 7, 1901; Princess *Sophie*, born February 14, 1902.

The Grand-duchy of Luxemburg was included from 1815 to 1866 in the dissolved Germanic Confederation. By the Treaty of London, 11 May, 1867, it is declared neutral territory, and its integrity and independence were guaranteed.

There is a Chamber of Deputies in the Grand-duchy of 53 members, elected directly by the cantons for six years, the half renewed every three years. Luxemburg has an area of 998 square miles, and a population (Dec. 1, 1910) of 259,891 (134,101 males and 125,790 females). The population is Catholic, save 4,007 Protestants, 1,270 Jews, and 303 belonging to other sects. The chief town, Luxemburg, has 20,848 (1910) inhabitants. Estimated revenue and expenditure (including extraordinary for the last five years) in francs:—

—	1913-14	1914-15	1915-16	1916-17	1917-18 <sup>1</sup>
Revenue . . .	18,101,733	22,017,781	20,745,223	17,690,705	43,761,428
Expenditure . . .	20,484,564	24,832,531	24,050,362	30,114,067	48,045,794

<sup>1</sup> Revenue includes loan of 25,076,500 francs; expenditure includes 11,926,659 francs for repaying Treasury Bills.

The debt on December 31, 1916, amounted to 45,754,917 francs. In 1914, the number of mines was 77; the mineral output amounted to 5,007,457 metric tons; the number of miners was 1,240. Production of iron (1915), 1,589,599 tons, as against 1,827,270 tons in 1914. Production of steel in 1915, 980,384 tons, as against 953,886 tons in 1914. For commercial purposes Luxemburg is included in the German Zollverein. There were 325 miles of railway in 1914, and 439 miles of telegraph line with 1,352 miles of wire, and 356 telegraph offices in 1915. There were also (1915) 107 telephone systems with 858 miles of line and 4,690 miles of wire. In 1915 there were 139 post-offices, through which there passed 9,801,000 letters, 5,142,000 post-cards, and 16,443,000 samples, &c.

## MEXICO.

(REPÚBLICA MEXICANA.)

### Constitution and Government.

MEXICO was annexed to the Spanish Crown by conquest in 1521, and for three centuries continued to be governed by Spain. In all 64 Spanish Viceroyalties ruled the Courts, from Antonio de Mendoza (1535-1550) to Juan O'Donojú (1821-1822). In 1810 the rule of the Spanish Viceroyalties had become so tyrannical that it caused an outbreak headed by the patriot priest Hidalgo, who on September 15, 1810, declared the Independence of Mexico. On May 15, 1822, General Augustin Iturbide declared himself Emperor of Mexico, but in 1824 he had to flee, and the Republic was established. Several Presidents (Felix Fernandez Victoria, 1824-28, was the first) ruled the destinies of the country with more or less severity until 1864, when the throne of Mexico was offered to Archduke Ferdinand Maximilian of Austria. He was shot in 1867, and Benito Juarez, who had been President in the northern part of the country, took the reins of government. He was followed by Lerdo de Tejada, who in 1876 fled, and General Porfirio Diaz (died July 2, 1915) made his entry into Mexico City. He ruled the country with the exception of four years (1880-4, General Manuel Gonzalez) until May 25, 1911, when he presented his resignation to Congress. On November 6, 1911, Señor Francisco I. Madero assumed office as President and ruled until February, 1913, when a *coup d'état* took place, resulting in the President's murder (February 23, 1913) and his replacement by General Victoriano Huerta.

The new President was recognised by Great Britain on April 13, 1913, but the United States refused him recognition. At the end of April, 1913, a rebellion was raised in the north under the auspices of Generals Venustiano Carranza and Francisco Villa, leaders of the 'Constitutionalists,' and the insurrection steadily advanced southward. In the meantime Huerta had become involved in a quarrel with the United States, which ended in the seizure of Vera Cruz by American troops on April 27, 1914. On June 24, 1914, the 'Constitutionalists' captured Zacatecas, and Huerta's position became untenable, so that on July 15, 1914, he resigned. On November 23, 1914, the American troops evacuated Santa Cruz.

A quarrel soon broke out between Carranza and Villa, and confusion became worse confounded by the appearance of a third party, that of Zapata. The three armies fought each other, and by March 31, 1915, Carranza was in possession of Vera Cruz and Tampico; Zapata had Mexico City, and Villa was in charge of the northern part of Mexico. Anarchy continued until October, 1915, when a conference of representatives of the United States, Argentina, Brazil, Chile, Bolivia, Uruguay, and Guatemala decided to extend formal recognition to General Carranza as "Chief of the Executive of the *de facto* Government of Mexico." In December, 1915, Britain, France, Belgium, Italy, Russia, and Germany likewise recognised Carranza. Queretaro was declared (February 14, 1916) the provisional capital. But Carranza controls only a comparatively small part of the country round Mexico City, Villa being in authority in the north, while Felix Diaz, nephew of General Porfirio Diaz, has started a revolution in the south.

*President.*—General Venustiano Carranza. Elected May, 1917.

The Constitution of Mexico bears date February 5, 1857, with subsequent modifications down to May, 1908. By its terms Mexico is declared

a federative republic, divided into States—19 at the outset, but at present 27 in number, with 3 territories and the Federal District—each of which has a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the supreme Government are divided into three branches, the legislative, executive, and judicial. The legislative power is vested in a Congress consisting of a House of Representatives (233 members) and a Senate, and the executive in a President. Representatives are elected for two years by the suffrage of all respectable male adults, at the rate of one member for 40,000 inhabitants. The qualifications requisite are, to be twenty-five years of age and a resident in the State. The Senate consists of fifty-six members, two for each State, of at least thirty years of age, who are returned in the same manner as the deputies. The members of both Houses receive salaries of 3,000 dollars a year. The President is elected by direct popular vote in a general election, and holds office for six years. The election of the Vice-President takes place in the same manner and at the same date as that of the President. The Vice-President is *ex officio* President of the Senate, with a voice in the discussions but without vote. Failing the President through absence or otherwise, the Vice-President discharges the functions of the President. Failing both, Congress shall call for new elections to be held at once.

A new Constitution which came into force on May 1, 1917, was promulgated by General Carranza.

The administration is carried on, under the direction of the President and a Council, by eight Secretaries of State, heads of the Departments of:—1. Foreign Affairs; 2. Interior; 3. Justice; 4. Public Instruction and Fine Arts; 5. Fomento, Colonisation and Industry; 6. Communications and Public Works; 7. Finance and Public Credit; 8. War and Marine.

#### LOCAL GOVERNMENT.

Each separate State has its own internal constitution, government, and laws; but inter-State customs duties are not permitted, though State taxes are levied. Each State has its governor, legislature, and judicial officers popularly elected under rules similar to those of the Federation; and the civil and criminal code in force in the Federal District prevails only in the Federal District and Territories (Tepic, Lower California, and Quintana Roo). All the other States of the Mexican Union have their own special codes based, more or less, on those of the Federal District; but at the same time they must publish and enforce laws issued by the Federal Government.

#### Area and Population.

The population of the census of 1910 and the estimated population in 1912 are shown in the following table. The capitals of the States and districts are in brackets:—

States and Territories	Area, in square miles	Census Population, 1910	Estimated Population, 1912	Population per square mile, 1910
Aguascalientes (Aguascalientes).	2,950	120,511	124,497	40·6
Baja California (La Paz)	58,328	52,272	53,254	0·8
Campeche (Campeche)	18,087	86,661	86,685	4·7
Chiapas (Tuxtla Gutiérrez)	27,222	438,843	466,371	16·1
Chihuahua (Chihuahua)	87,802	405,707	423,387	4·6
Coahuila (Saltillo)	63,569	362,092	376,747	5·7
Colima (Colima)	2,272	77,704	80,500	34·2
Durango (Durango)	38,009	488,175	509,585	12·8

States and Territories	Area, in square miles	Census Population, 1910	Estimated Population, 1912	Population per square mile, 1910
Federal District (México) . . . . .	463	720,753	763,170	1556.8
Guanajuato (Guanajuato) . . . . .	11,370	1,081,651	1,085,681	95.1
Guerrero (Chilpancingo) . . . . .	24,996	594,278	620,416	20.1
Hidalgo (Pachuca) . . . . .	8,917	646,551	655,187	74.7

Quintana Roo (Santa Cruz de Bravo) . . . . .	18,876	9,109	9,328	0.4
San Luis Potosí (San Luis Potosí) . . . . .	25,316	627,800	638,832	24.7
Sinaloa (Guilicuan) . . . . .	33,671	323,642	329,317	9.6
Sonora (Hermosillo) . . . . .	76,900	265,383	275,107	3.4
Tabasco (San Juan Bautista) . . . . .	10,072	187,571	193,675	18.6
Tamaulipas (Ciudad Victoria) . . . . .	32,128	249,641	256,278	7.7
Tepic (Tepic) . . . . .	11,275	171,173	175,731	15.1
TLaxcala (Tlaxcala) . . . . .	1,595	184,171	186,642	115.4
Veracruz (Xalapa) . . . . .	20,201	1,132,859	1,165,934	38.7
Yucatán (Mérida) . . . . .	35,203	339,613	347,781	9.6
Zacatecas (Zacatecas) . . . . .	24,757	477,556	480,690	19.2
Islands . . . . .	1,420	—	—	—
Grand Total . . . . .	785,881	15,160,369	15,501,654	19.2

In 1910 there were 7,504,471 males and 7,655,898 females. The foreign population in 1910 numbered 116,527:—Spanish, 29,541; United States, 28,639; Guatemala, 21,334; French, 4,604; British, 5,264; Cuban, 3,478; German, 3,827; Italian, 2,595; Chinese, 13,203; Japanese, 2,276; Arabs, 1,546; Turks, 2,907; all others, 5,433.

The chief cities, 1910, are:—Mexico (capital), 471,066; Puebla, 96,121; Guadalajara, 119,468; San Luis Potosí, 68,022; Leon, 57,722; Monterey, 73,528; Pachuca, 39,009; Zacatecas, 25,900; Guanajuato, 35,682; Mérida, 62,447; Querétaro, 33,062; Morelia, 40,042; Oaxaca, 38,011; Orizaba, 35,263; Aguascalientes, 45,198; Saltillo, 35,414; Durango, 32,263; Chihuahua, 39,706; Vera Cruz, 48,633; Toluca, 31,023; Celaya, 23,062.

### Religion, Instruction, and Justice.

The prevailing religion is the Roman Catholic, but according to the new Constitution of 1917, the Church is separated from the State, and there is toleration of all other religions. No ecclesiastical body can acquire landed property. There are 7 archbishops and 23 suffragan bishops. In 1910, there were 15,033,176 Roman Catholics; 68,839 Protestants; 33,343 of other faiths; 25,011 of no professed faith.

Education is free and compulsory. In the Federal District and in the Territories education is controlled by the National Government; elsewhere the State authorities regulate education. In 1907 (the last school census) elementary schools supported by the Federation and States (exclusive of infant schools) 9,710, by municipalities, 2,230; total, 11,940 schools, with 776,622 enrolled pupils. For secondary instruction the Federal and State Governments had 34 schools (27 for boys, 3 for girls, and 4 mixed) with 4,231 pupils (3,793 boys and 438 girls). The Federal capital is the seat of

the National University of Mexico, organised in 1910. The private, clerical and association schools numbered 2,499 with 152,917 pupils (81,947 boys and 70,970 girls). In 1912 the system of primary education was extended so as to reach the native population, for whom 209 schools have been established with 13,616 pupils. In 1913-14, 13,926,000 dollars were spent in education.

In 1913 there were the National Library, with 200,000 volumes, and 150 other public libraries. There were also 34 museums for scientific and educational purposes, and 11 meteorological observatories. The number of periodicals published was 459, of which 439 were in Spanish, 12 in English, 5 in Spanish and English, 2 in Italian, 1 in French.

The judicial power, which is entirely distinct from and independent of the executive, consists of the Supreme Court, with 15 judges chosen for a period of six years, three Circuit Courts, with 3 judges, and District Courts, with 32 judges.

The Ordinary, Civil, Criminal, and Correctional Courts are controlled by the Department of Justice and Public Instruction.

### Federal Finance.

The ordinary receipts and expenditure for six years have been :—

—	Revenue	Expenditure	—	Revenue	Expenditure
	£	£		£	£
1909-10	10,854,365	9,700,841	1912-13	12,095,890	11,078,187
1910-11	11,345,782	10,301,629	1913-14 <sup>1</sup>	13,230,715	13,210,573
1911-12	10,739,481	9,900,649	1914-15 <sup>1</sup>	14,597,000	15,220,489

<sup>1</sup> Estimates.

The following are the budget estimates of revenue and expenditure for the year 1914-15 (1 dollar = about 2s. 0½d.) :—

REVENUE		EXPENDITURE	
	Dollars		Dollars
Taxes on Foreign Commerce . . . . .	57,875,000	Legislative power . . . . .	2,279,798
Federal internal taxes . . . . .	57,761,000	Executive " . . . . .	361,647
Special taxes . . . . .	14,432,000	Judicial " . . . . .	792,368
Railways . . . . .	100,000	Foreign Affairs . . . . .	2,319,597
Posts and telegraphs . . . . .	7,400,000	Home Department . . . . .	19,088,958
Lottery . . . . .	1,200,000	Justice . . . . .	2,033,124
Various . . . . .	7,189,000	Instruction . . . . .	9,917,602
		Public Works . . . . .	4,309,576
		Communications . . . . .	14,758,024
		Finance . . . . .	41,178,776
		War and Marine . . . . .	55,165,428
Total . . . . .	145,957,000 (14,597,000L.)		152,204,898 (12,220,489L.)

On December 31, 1916, the outstanding external debt together with arrears of interest, amounted to 50,643,805L.

### Defence.

Every Mexican capable of bearing arms is obliged to serve in the Active Army or in the National Guard. The army consists of the Active Army, the Reserve, and auxiliary troops. In November 1913, the army on a peace footing was as follows: infantry, 34 battalions, 20 auxiliary battalions, and

49 irregular corps; cavalry, 18 regular regiments, 21 auxiliary regiments and 2 squadrons of army gendarmes, 52 irregular corps, and 26 scout corps; artillery, 5 regiments. In addition there were 1 sapper battalion, 1 engineer park, 1 telegraph section, 2 war schools, 1 naval school, 1 school of musketry, 1 school for fencing, 1 medical school, and 57 schools for soldiers.

The infantry is armed with 7 mm. Mauser rifle, the cavalry with a carbine of the same type, artillery with Q.F. guns (Saint Chaumont Mon-dragon and Schneider-Canet). The reserves are armed with the Remington rifle.

The peace effective (including auxiliaries, irregulars, and gendarmes) in 1912 was 3,200 officers, 40,769 men, 8,629 horses, and 4,359 mules.

The war effective in November, 1913, was 6,511 officers and 82,944 men.

The Navy, which is little more than a police force, consists of the gun-boats *Bravo*, *Morales*, *Vera Cruz*, *Tampico*, *Democrata*, *General Guerrero*, and *Zaragoza*. There are also a couple of armed transports.

### Production and Industry.

Mexico is well suited for agriculture. Within a radius of 300 miles may be produced the crops of the Tropical, Semi-tropical, and Temperate Zones, owing to the varying altitude, the land rising rapidly from the coast to the centre of the country. The soil is rich in all sections. In the tropical regions, in the mountain valleys, and on the great central plateau are millions of acres of virgin soil and millions more which have been barely skimmed by the antiquated methods of agriculture in vogue.

Cultivated lands, 30,027,500 acres; pastoral lands, 120,444,200 acres; forest lands, 43,933,200 acres. Principal products are maize, cotton, henequen, wheat, coffee, beans. There is a large output of sugar and molasses, valued at about 2,600,000*l.* annually, and the production of spirits is on the increase. There are many colonies, or agricultural settlements, established either by the Government or by companies or persons authorised by the Government.

Petroleum was produced as follows:—In 1908, 3,481,410 barrels; in 1909, 2,488,742 barrels; in 1910, 4,531,826 barrels; in 1911, 12,629,319 barrels; in 1912, 15,689,268 barrels; in 1914, 26,235,403 barrels; in 1915, 33,927,950 barrels.

Mining is the principal industry in Mexico. It is carried on in 24 of the 31 States and Territories, nearly all the mines yielding silver either alone or in combination with other ores. For the production of gold and silver in the years 1907–12, see THE STATESMAN'S YEAR-BOOK for 1916, p. 1130.

The output of coal is estimated at 700,000 tons annually. Opals are mined in Querétaro.

### Commerce.

## Shipping and Communications.

Mercantile marine, 1911, 32 steamers of 16,648 net tons, and 50 sailing vessels of 8,712 net tons. In 1909-10 in the foreign trade there entered 3,160 vessels (steam and sail) of 8,031,296 tons, and cleared 2,854 vessels (steam and sail) of 7,275,348 tons. The most important ports are Veracruz and Tampico, both on the Gulf of Mexico.

On September 16, 1913, there were 15,804 miles of railway open. The main trunk lines are merged in one corporation ("The National Lines of Mexico") controlled by Government. About 6,000 had a gauge of 4 ft. 3½ in., and the remainder a gauge of 3 ft. or less. Lines under construction 1,116 miles.

On June 30, 1913, the Federal telegraph lines were 58,729 miles. There were other lines belonging to individual States and private persons totalling 5,199 miles in length. There were on June 30, 1913, 516 Federal offices, including 24 wireless telegraph offices. Number of messages, 108,024,029. The Federal telephone had a length of 29,574 miles of wire.

In 1913 there were 2,911 post-offices. The post, inland and international, carried in 1913 101,920,217 letters, postcards and packets. Post office receipts 1912-13, 11,797,627 pesos; expenditure, 14,244,150 pesos.

### Money and Credit.

There were on June 30, 1914, in Mexico 24 banks with note issue and 8 without note issue. The most important are the Banco Nacional with a capital of 32,000,000 dollars; the Bank of London and Mexico, with capital of 21,500,000 dollars; the Banco Oriental, capital 12,000,000 dollars; the Mexican Bank of Commerce and Industry, capital 10,000,000 dollars; the Banco Internacional e Hipotecario, capital 5,000,000 dollars; the Banco de Crédito Territorial, capital 7,500,000 dollars; and the Banco Peninsular, capital 10,725,000 dollars. The first 4 of these banks have unitedly received a concession as the 'Caja de Prestamos para obras de irrigacion y Fomento de la Agricultura.'

### Money, Weights, and Measures.

By the monetary law of December 9, 1904, and the Presidential Decree of March 25, 1905, the monetary unit is the silver peso or dollar, the legal value of which has been fixed at  $\cdot 75$  gramme of pure gold. There are 10-peso and 5-peso gold coins,  $\cdot 900$  fine and  $\cdot 100$  copper, weighing respectively  $8\cdot 333\frac{1}{3}$  and  $4\cdot 166\frac{2}{3}$  grammes. The silver peso weighs  $27\cdot 073$  grammes,  $\cdot 9027$  fine and  $\cdot 0793$  copper, and thus contains  $24\cdot 438$  grammes of fine silver. The peso is divided into 100 centavos; 50-, 20-, and 10-centavo pieces are of silver,  $\cdot 800$  fine and  $\cdot 200$  copper. Bronze coins are 2- and 1-centavo pieces, 95 parts copper, 4 tin, and 1 zinc. There are 5-centavo nickel coins. The value of the gold peso or dollar in peace time was  $24\cdot 58$  pence.

The metallic currency has entirely disappeared from circulation. Even the 20, 10, and 5 cent. piece have been replaced by strips of cardboard for these denominations. An enormous quantity of paper money is in circulation.

The weights and measures of the metric system were introduced in 1884 and their use is enforced by law of June 19, 1895, though the old Spanish measures are still occasionally referred to. The old weights and measures were:—

*Weight.*

1 libra =  $0\cdot 46$  kilogrammo =  $1\cdot 014$  lb. avoirdupois.

1 arroba = 25 libras =  $25\cdot 357$  lb. avoirdupois.

*For gold and silver.*

1 marco =  $\frac{1}{2}$  libra = 4,608 granos.

1 ochava = 6 tomines.

1 tomin = 12 granos.

20 granos = 1 French gramme.

*Length.*

1 vara =  $0\cdot 837$  mètre = 2 ft.  $8\frac{9}{16}$  English in.

1 legua comun =  $6,666\frac{2}{3}$  varas.

### Diplomatic and Consular Representatives.

#### 1. OF MEXICO IN GREAT BRITAIN.

*Envoy and Minister.*—Señor Sanchez Azcona. Appointed March, 1916.

*Secretary.*—Alfonso Acosta.

There are Consular representatives at Barrow-in-Furness, Birmingham, Belfast, Bristol, Cardiff, Dover, Dublin, Falmouth, Glasgow, Great Grimsby, Liverpool, Manchester, Maryport, Newcastle, Southampton.

#### 2. OF GREAT BRITAIN IN MEXICO.

*Envoy and Minister.*—Vacant.

*Consul-General and Chargé d'Affaires.*—E. W. P. Thurstan.

*Vice-Consul.*—R. C. E. Milne.

## MONACO.

**Prince Albert**, born November 13, 1848; succeeded his father, Prince Charles III., September 10, 1889; married (1) to Lady Mary Douglas Hamilton, September 21, 1869;<sup>1</sup> (2) to Alice Duchess-Dowager de Richelieu, Oct. 31, 1889. Son by first wife, Prince Louis, born July 12, 1870.

Monaco is a small Principality on the Mediterranean, surrounded since 1860 by the French Department of Alpes Maritimes except on the side

<sup>1</sup> The religious marriage was annulled by the Apostolic See on January 3, 1880, and the civil marriage declared dissolved by decree of the reigning Prince on July 28, 1880.

towards the sea. From 968 it belonged to the house of Grimaldi. In 1715 it passed into the female line, Louise Hippolyte, daughter of Antony I., heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thoirny, who took the name and arms of Grimaldi. Antony I died in 1731, Louise Hippolyte reigning only ten months and dying in 1732. She was succeeded by her husband under the name of Jacques I., who also succeeded Antony I. as Duc de Valentinois, and was in his turn succeeded by his son Honorius III. This Prince was dispossessed by the French Revolution in 1792, and died in 1795. In 1814 the Principality was re-established, but placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna (1815).

In 1848 Mentone and Roccabruna revolted, and declared themselves free towns; in 1861 Charles III. ceded his rights over them to France, and the Principality thus became geographically an *enclave* of France, when the Sardinian garrison was withdrawn and the Protectorate came to an end.

The Prince was an absolute ruler, there having been no elective representation within the Principality. But on January 7, 1911, a Constitution was promulgated, which provides for a National Council elected by universal suffrage and *scrutin de liste*. The Government is carried out under the authority of the Prince by a Ministry assisted by a Council of State. The legislative power is exercised by the Prince and the National Council, which consists of 21 members elected for four years. The territory of the Principality is divided into three communes, administered by municipal bodies, in the election of which women are entitled to take part.

In 1819 the Government adopted a code founded upon the French codes and a Court of First Instance, as well as a Juge de Paix's Court. The Principality has its own coinage (it issues only 100-franc pieces) which is current since 1876 in all the States of the Latin Union; it also issues its own separate postage-stamps, and has its own flag.

The small harbour, absolutely sheltered, has an area of 42 acres, depth at entrance 90 feet, and alongside the quay 24 feet at least. The Customs duties are the same as in France.

The area is eight square miles. Population (census January 9, 1913), 22,956. Towns: Monaco, 2,247; La Condamine, 11,082; Monte Carlo, 9,627.

There has been since 1887 a Roman Catholic bishop. A semi-military police force has taken the place of the 'guard of honour' and troops formerly maintained. The value of the commerce of the Principality is not stated. Imports are coal and wine; olive oil, oranges, citrons, and perfumes are exported. The industries and trade are unimportant, and the revenue is mainly derived from the gaming tables. The annual grant for the concession is 70,000*l.*, in 1917 it is 80,000*l.*, in 1927 90,000*l.*, and in 1937 100,000*l.*

*Consul-General* for Monaco in London.—Th. Lumley.

## MONTENEGRO.

(TŠERNAGORA)

**Reigning King.**—**Nicholas I.**, Petrovitch Njegosh, born October 7 (September 25), 1841; educated at Trieste and Paris; proclaimed Prince of Montenegro, as successor of his uncle, Danilo I., August 14, 1860. Assumed title of King, in virtue of a resolution passed unanimously by the National Skupshtina, Aug. 28, 1910, on the occasion of the 50th anniversary of his accession. Married, November 8, 1860, to *Milena Pétroovna Vukotitch*, born May 4, 1847, daughter of Peter Vukotitch, senator, and Vice-President of the Council of State.

*Children of the King.*—(1) Princess *Militza*, born July 26, 1866, married, August 7, 1889, to the Russian Grand Duke Peter Nikolaievitch; (2) Princess *Stana*, born January 4, 1868, married August 28, 1889, to George, Duke of Leuchtenberg, and after the dissolution of that marriage, married in 1907 to the Russian Grand Duke Nicolas Nicolaievitch; (3) Prince *Danilo Alexander*, heir-apparent, born June 29, 1871; married July 27, 1899, to Princess Jutta (Militza) daughter of the Grand-Duke of Mecklenburg Strelitz; (4) Princess *Helena*, born January 8, 1873, married October 24, 1896, to Victor Emanuel, now King of Italy; (5) Princess *Anna*, born August 18, 1874, married May 18, 1897, to Prince Francis Joseph of Battenberg; (6) Prince *Mirko*, born April 17, 1879, married July 12, 1902, to Natalie Konstantinovitch, daughter of Colonel Konstantinovitch, great uncle of the late King Alexander of Serbia; offspring, Prince Michael born September 14, 1908; Prince Paul, born May 16, 1910; (7) Princess *Xenia*, born April 22, 1881; (8) Princess *Vera*, born February 22, 1887; (9) Prince *Peter*, born October 10, 1889.

A leading part in the history of the country has been played by the family of Petrovitch Njegosh, descending collaterally, since the time of Danilo Petrovitch, who, being proclaimed Vladika, or prince-bishop, of Montenegro in 1697, liberated the country from the Turks, and, having established himself as both spiritual and temporal ruler, entered into a religious and political alliance with Russia. His successors retained the theocratic power till the death of Peter Petrovitch II. (October 31, 1851), last Vladika of Montenegro, a ruler of great wisdom, as well as a widely celebrated poet. He was succeeded by his nephew, Danilo I., who abandoned the title of Vladika, together with the spiritual functions attached to it, and substituted that of Gospodar, or Prince. At the same time Danilo I., to throw off a remnant of nominal dependency upon Turkey, acknowledged by his predecessors, obtained the recognition of his new title from Russia. In 1878 the independence of Montenegro was formally recognised by Turkey and the other Signatory Powers of the Treaty of Berlin. In 1909 the limitations which the Treaty of Berlin had placed on Montenegro's complete sovereignty were removed, except the prohibition to erect fortifications at Antivari or along the Boyana. On October 23, 1909, Antivari was opened as a free port.

Montenegro took part in the European war on the side of the Allied Powers. Late in 1915 it was overrun by the Germans and Austrians. On December 6, the former captured Ipek; on January 13, 1916, the latter captured Cetinje. The Government is at present resident in Neuilly-sur-Seine.

The following is the complete list of the Petrovitch dynasty, with their dates :—

*Vladikas or Prince-Bishops.*

Danilo . . . . .	1696-1735	Peter I. (St. Peter) . . . . .	1782-1830
Sava and Vasilije. . . . .	1735-1782	Peter II. (Vladika Rade) . . . . .	1830-1851

*Princes (King).*

Danilo I. (Kniaz and Gospodar) . . . . .	1851-1860
Nicholas I. (Prince 1860-1910 ; now reigning King ; nephew of the last) . . . . .	1860-

King Nicholas's nominal civil list amounts to 360,000 krone, with an additional 140,000 in appanages for the other members of the family.

**Government.**—Under the Constitution granted by the Prince of Montenegro on December 19, 1905, it is now a hereditary Constitutional monarchy with popular representation. The first National Assembly or Skupshtina met in 1906 but was dissolved in July 1907.

An electoral law was framed (1906) under which elections took place for the Skupshtina, which was opened on February 3, 1914. Its members are elected by universal suffrage for a period of 4 years. Each of the 56 districts or capitanats of Montenegro, and each of the 6 provincial towns, Cetinje, Podgoritzza, Nikshitch, Kolashin, Antivari, and Dulcigno, elect one representative. There are also 14 *ex officio* members, including the Montenegrin Orthodox Metropolitan, the Roman Catholic Archbishop of Antivari, the Montenegrin Mussulman Mufti, 6 high officials of the State, and 3 generals, nominated by the King. There are thus 76 members in all.

*Prime Minister, Minister of the Interior and of Commerce.*—M. Tomanovitch. Appointed January, 1917.

**Area and Population.**—The extreme length, from the northernmost point of Piwa to the Boyana, is about 100, and width, from Grahovo to the Lim, about 80 English miles. It is bordered on the south by the new state of Albania, on the east by Servia, and on the north-west by Herzegovina. (See map in the STATESMAN'S YEAR BOOK for 1914.) The new Serbo-Montenegrin frontier was settled by treaty on November 12, 1913. On the west it is separated from the Adriatic by the narrow strip of Austrian territory forming the extremity of Dalmatia (Bocche di Cattaro, Budua, Spizza), excepting in the recently (1878-81) acquired districts of Antivari and Dulcigno, where it possesses a seaboard some 28 miles in length.

Area estimated at 5,603 English square miles. Before the Balkan war the area was 3,474 sq. miles. After the war Montenegro obtained 168 sq. miles of the old province of Scutari and 1,961 sq. miles of that of Kossovo. The acquired area was thus 2,129 sq. miles.

The total population of the country numbers very roughly about 516,000. The population is mainly pastoral and agricultural. The Montenegrins belong almost entirely to the Serb branch of the Slav race.

The capital is Cetinje, with an estimated population of 5,500 ; Podgoritzza, 14,000 ; Dulcigno, 5,000 ; Nikshitch, 5,000 ; Antivari, 2,500. In the newly acquired territory are Plevlje, Djakova, and Ipek (Petch).

**Religion and Instruction.**—The Church is nominally independent of the State, except that the bishops are appointed by the King ; but the personal authority of the latter is all-pervading. The principal monasteries are possessed of sufficient property for their maintenance. The rural clergy are

maintained by a tax paid to the Government by every head of household. Orthodox Montenegro is divided into three dioceses, Cetinje, Ostrog, and Ipek (Petch).

Schools for elementary education are supported by Government; education is compulsory and free. All males are supposed to be able to read and write. There is a theological seminary and a gymnasium or college for boys at Cetinje.

**Justice, Crime, and Pauperism.**—A Penal Code based on the Serbian Code came into force in 1906; a Civil Code has been in existence for some time.

There are district courts in five of the principal towns. In the 56 rural districts there are courts of first instance over which the heads of the districts preside. There are appeal Courts in the five principal towns. The 'Veliki Sud,' or supreme court at Cetinje, has jurisdiction, both appellate and concurrent, over the whole principality, and from its decision in civil matters there is no appeal. In criminal cases the Prince may pardon. Petitions against judges for undue delay may be lodged with the Minister of Justice. There are no judicial statistics, but crime in general is rare.

There is no regular provision for poor relief.

**Finance.**—The estimated revenue for 1914 was 390,000*l.*, and the expenditure 504,000*l.*, thus leaving a deficit of 114,000*l.*

Public debt 1914, 250,000*l.*

**Defence.**—The military forces of Montenegro are organised on a militia basis. According to the Law of 1910, every Montenegrin subject is liable to military service from the 18th to the 62nd year of his age, *i.e.*, for a total period of 45 years. The army consists in time of peace of four divisions, three of which have three brigades, while the fourth has only two. The brigades vary in strength from three to seven battalions, the total number of battalions being 56, of which three are composed of Moslems. The cavalry arm is non-existent in the Montenegrin army. The infantry are armed with Russian "three-line" rifles of the 1898 pattern; the artillery with various guns of not very recent model. The war strength of the Montenegrin army is variously estimated at from 30,000 to 40,000 men. The military budget for 1914 was 191,000*l.*

**Production and Industry.**—Agriculture is of the most primitive kind. The cultivated land is mostly the property of the cultivators, the Croatian system of domestic communism being generally prevalent. In some districts, however, the land is split up into diminutive peasant-holdings, while in a few the métayer system is met with, but large estates nowhere exist. The principal crops grown are maize, tobacco, oats, potatoes, barley, and buckwheat. The exclusive right to manufacture, sell, and export tobacco is, since November 14, 1903, in the hands of an Italian syndicate. The vine is cultivated successfully in the Tchernuitchka Nahie, and the district of Podgoritz, and the olive about Antivari and Dulcigno. The uncultivable area consists, in the east, of mountain pasturage and forests of beech, oak, &c., which, owing to the want of roads, are valueless; and, in the west, of bare limestone sparsely sprinkled with brushwood and stunted scrub. There are no sea-fisheries, but on the Lake of Scutari fishing is carried on. Live stock of all kinds are reared.

**Commerce.**—Montenegro has a maximum and minimum tariff. The exports for 1910 were valued at about 99,650*l.*; the imports at about 340,277*l.* The principal exports are sumach, flea-powder (*Pyrethrum*

*roseum*), smoked sardines (*scoranz*), smoked mutton, cattle, sheep, goats, cheese, wool, hides, skins, and furs, honey, beeswax, wood for walking-sticks, &c., olive-oil, wine, tobacco. The imports are salt from Turkey, a Government monopoly yielding over 11,000*l.* a year; petroleum from Russia; maize, cottons, hardware, sugar, coffee, rice. According to Board of Trade statistics the exports from the United Kingdom to Montenegro for 5 years was as follows: 1911, 1,426*l.*; 1912, 3,146*l.*; 1913, 2,177*l.*; 1914, 803*l.*; 1915, 174*l.*

**Communications.**—There are good carriage roads from Cattaro to Cetinje; from Cetinje by Rieka, near Lake Scutari, to Podgoritz, and to Nikshitch; also from Podgoritz to Plawnitza (the Sentari-Lake Port of Podgoritz); and from Antivari to Vir Pazar on Lake Scutari, from Vir Pazar to Rieka, from Podgoritz to Kolashine, and from Antivari to Dulcigno. A carriage road from Kolashine to the Turkish frontier near Berana has been made. There are public diligences between Cattaro and Cetinje, between Cetinje, Podgoritz, and Nikshitch; and between Antivari and Vir Pazar. There are bridle roads over the rest of the principality. Three lake steamers belonging to the Société Monténégro d'Antivari ply between Rieka, Vir Pazar, Plawnitza, and Scutari. A narrow gauge railway (the first Montenegrin railway) is now open from Antivari to Vir Pazar. There are 45 telegraph offices and 1 radio-telegraphic station. Montenegro forms part of the Postal Union; it has 40 post offices.

**Money.**—Montenegro has a small coinage of gold, silver, nickel and bronze. The perper and para are nominally equal in value to the Austrian krone and heller. The coins in circulation in 1910, struck at the Vienna mint except the five and one perper pieces struck in France, were: gold, 300 hundred perper, 30,000 twenty perper and 40,000 ten perper pieces; silver, 60,000 five perper, 300,000 two perper, and 500,000 one perper pieces. French and English gold and Austrian paper and silver circulate freely. There are four banks, the Bank of Montenegro at Cetinje, the Banks of Podgoritz and Nikshitch at those places, and the National Bank of Montenegro at Antivari with a branch at Cetinje.

## MOROCCO.

MAGHRIB-EL-AKSA.—EL GHARB.)

### Reigning Sultan.

**Mulai Yusef**, K.C.M.G., son of Mulai-Hassan, was proclaimed Sultan on August 18, 1912, on the abdication of his brother, Sultan Mulai-Abd-el-Hafid, who received a lump sum of 400,000 francs and an annual pension of 350,000 francs.

The present Sultan of Morocco is the seventeenth of the dynasty of the Alides, founded by Mulai-Ahmed, and the thirty-sixth lineal descendant of Ali, uncle and son-in-law of the Prophet. His five predecessors were:—

Sultan	Reign	Sultan	Reign
Mulai-Abderrahman	1822-1859	Mulai-Abd-el-Aziz	1894-1908
Sidi-Mohamed	1859-1873	Mulai-Abd-el-Hafid	1908-1912
Mulai-Hassan	1873-1894		

The Sherifian umbrella is hereditary in the family of the Filali Sharifs of Tafilelt. Each Sultan is supposed, prior to death, to indicate the member of the Sherifian family who, according to his conscientious belief, will best replace him. This succession is, however, elective, and all members of the Sherifian family are eligible. Generally the late Sultan's nominee is elected by public acclamation at noonday prayers the Friday after the Sultan's death, as the nominee has probably possession of imperial treasure, and is supported by the bodyguard, from among whom the large majority of court officials are selected.

### Government.

In April, 1912, a treaty was signed at Fez by which the Sultan formally accepted the French Protectorate. This has been recognised by Germany, England, Austria-Hungary, Russia, Italy, the Netherlands, Belgium, Spain, Portugal, the United States, and Denmark.

The form of government of the Sultanate, or Empire of Morocco, is in reality an absolute despotism, unrestricted by any laws, civil or religious. The Sultan—who is known to his subjects under the title of 'Emir-el-Mumenin,' or Prince of True Believers—is chief of the State, as well as head of the religion. As spiritual ruler, the Sultan stands quite alone, his authority not being limited, as in Turkey and other countries following the religion of Mahomet, by the expounders of the Koran, the class of 'Ulema,' under the 'Sheik-ul-Islam.' Since the establishment of the French Protectorate, however, the Sultan has to follow the advice of the French Resident-General (an office created April 28, 1912) in all matters. The Resident-General holds the appointment also of Minister for Foreign Affairs. The Officer Commanding the French troops is Minister of War. There is a Grand Vizier, Sid Mohammed El Guebbas (October 31, 1913), who has to act under the

control of the Resident-General. The Moorish Minister of Finance acts under the control of the French Director-General of Finance and the Minister of Justice under that of the French Secretary-General of the Sherifian government.

For the Algenciras conference, the Agadir incident, and the Franco-German agreements of November 4, 1911, see STATESMAN'S YEAR BOOK for 1913, pp. 1055-56.

The capitals of Morocco remain, as before the French Protectorate, Fez, Mequinez, Marakesh, and Rabat, in each of which towns the Sultan has palaces, and in each of which the Sultans of Morocco have always resided from time to time. The seat of Government, for the present, is Rabat. Consequently the Sultan generally resides there, and the public offices are at Rabat, where the Resident-General has his residence.

The negotiations between France and Spain as to their respective rights in Morocco came to an end in the Franco-Spanish Treaty of Madrid, signed on November 27, 1912. In this France acknowledged the right of Spain to exercise its protectorate in the Spanish zone, the extent of which was clearly defined. (See map STATESMAN'S YEAR BOOK for 1913.) The zone will be administered, under the control of a Spanish High Commissioner, by a Calipha (whose headquarters shall be at Tetuan) chosen by the Sultan from a list of two candidates presented by the Spanish Government. It was further agreed that Tangier and its district should be excluded from the Spanish zone, and become a special international zone, some 140 square miles in extent.

A protocol attached to the Treaty provides for the rapid planning, construction, and exploration of the railway from Tangier to Fez. The capital of the company shall be 60 per cent. French and 40 per cent. Spanish. The line shall comprise three sections, corresponding (1) to the International zone of Tangier, (2) the Spanish Northern zone, and (3) the French zone. Negotiations between Great Britain, France and Spain regarding the organisation of the International zone of Tangier have not yet (May, 1916) been concluded.

The following are the principal treaties concerning Morocco from 1856 to 1912:— (1) General Treaty and Convention of Commerce and Navigation, between Great Britain and Morocco, 1856; (2) Treaty of Tetuan, between Spain and Morocco, April 26, 1860; (3) Supplementary Treaty to last, October 30, 1861; (4) Treaty of Commerce, between Spain and Morocco, November 20, 1861; (5) Convention of Madrid, signed by the European Powers, on June 3, 1880, relative to the exercise of protection; (6) Treaty of Marakesh, between Spain and Morocco, March 5, 1894; (7) Additional Convention to last, February 24, 1895; (8) Franco-Spanish Agreement, relative to Spanish possessions of the Sahara and Guinea, June 27, 1900; (9) Franco-British Treaty of April 8, 1904; (10) Franco-Spanish Agreement of October 3, 1904; (11) Franco-Spanish Agreement of September 1, 1905; (12) Act of Algenciras, April 7, 1906; (13) Franco-Hispano-British Agreement of 1907; (14) Franco-German Treaty of February, 1909; (15) Franco-Moroccan Agreement of March 21, 1909; (16) Hispano-Moroccan Agreement of November 16, 1910; (17) Franco-German Agreement of November 4, 1911; (18) French Protectorate Treaty with Morocco, March 30, 1912; (19) Franco-Spanish Treaty of Madrid of November 27, 1912.

*French Resident-General.*—General Lyautey (held office from April 28, 1912, to December 13, 1916. Re-appointed April 7, 1917).

*Spanish High Commissioner.*—General Jordana, appointed July 9, 1915.

*Calipha of the Spanish Zone.*—Mulai El-Mehdi, appointed April 19, 1913.

### Area and Population.

According to the most recent investigation, the area is about 219,000 English square miles. Population generally considered to be about 5,000,000.

A French officer, Captain N. Larras, who has been in the country since 1898, estimated the numbers in 1906 at from 4,340,000 to 4,580,000. To the Atlantic coast region, Tangier to Mogador, he assigns 2,200,000; to the Atlas-Riff country, 1,500,000; to the Muluya valley, 200,000; to the Sus valley, 200,000; while in the region from the southern slopes of the Atlas stretching into the Sahara, he estimates the numbers thus: Wad Dras, 100,000 to 250,000; Wad Ziz (with Tafilet), 120,000 to 200,000; Wad Gir (with Figig), 20,000 to 30,000. But more detailed investigation since the French occupation would tend to the conclusion that 3,600,000 is nearer the truth. The population consists of Berbers, Tuaregs, Shellah Berbers, Beduin and Mued Arabs, and a considerable number of Jews and Negroes.

An agreement (July 20, 1901) makes the valley of the Wad Gir the boundary between France and Algeria, and to the east of this only those who acknowledge French authority will be permitted to dwell. A French and Moroccan Commission is entrusted with the formation of police arrangements in the region. The number of Christians is estimated at about 50,000, of whom about 11,000 are at Tangier and 20,000 at Casablanca. Fez has a population of about 100,000; Marakesh, 78,350; Casablanca, 75,000 (31,000 Europeans); Tangier 46,000 (11,000 Europeans); Rabat, 34,310 (5,310 Europeans); Mequinez, 30,820; Mogador, 20,800; Saffi, 20,200; Tetuan, 18,533; Mazagan, 18,105; Sullee, 17,360; Oujda, 16,250 (4,250 Europeans). Larache, 15,000. There are 65,000 Europeans living in the principal towns. The Sultan and his subjects are of the Malekite sect of Sunnite Mohammedans.

The most important languages are French, Spanish and Arabic.

### Finance.

Customs receipts at all the Ports amounted (1915) to 847,173*l.* exclusive of the *Taxe Spéciale* of 2½ per cent. on Imports (163,064*l.*), which, under Act 66 of Act of Algeciras, must be applied to public works at the ports. The Moroccan debt consists of French loans (1904, 1910, 1914) amounting to 16,224,960*l.*; and French and Spanish war indemnities, 5,300,000*l.* The French Government, however, decided not to require the Moorish Government to pay the annuities on their war indemnity (2,800,000*l.*) until its financial position enables it to support the charge. The 1904 loan amounted to 2,500,000*l.* and bears interest at 5 per cent. The 1910 loan was for 4,044,960*l.* and also bore interest at 5 per cent. The 1914 loan, guaranteed by the French Government, was for 6,810,000*l.* and is to be issued at a rate of interest not exceeding 4·6 per cent. By a law dated March 25, 1916, the 1914 loan was increased to 9,680,000*l.*, thus bringing the total Moroccan debt to 16,224,960*l.* for loans.

### Defence.

The Sherifian army is under the supreme command of the Resident-General, and consists of about 18,000 men. The French occupation troops consist of 9 Colonial infantry battalions, 9 Zouave battalions, 5 foreign battalions, 1 Chasseur battalion, 3 light infantry battalions, 13 Algerian tirailleur battalions, 6 Tunisian tirailleur battalions, and 6 Senegal tirailleur battalions, total, 58 battalions forming 6 mixed groups, and 15 mixed regiments; 8 cavalry squadrons and 14 Spahis squadrons, 14 field and 8 mountain artillery battalions, 10 engineer companies, and 6 transport companies. Further 14 Moroccan *goumis*, and Moroccan auxiliaries under French

command, viz.: 18 infantry companies forming 5 battalions, 8 cavalry squadrons, 4 mountain artillery sections, a half company of engineers, and 1 transport company. Total about 75,000 men.

### Production and Industry.

The interior of Morocco, although generally open to travellers, is not permanently occupiable as yet on account of lack of security to both life and property. Immigration is confined principally to the towns and especially to the ports and neighbouring districts. Morocco, therefore, is still in the rudimentary stages of both economic and commercial development, though great progress has recently been made, particularly in the French zone.

The soil is capable of agricultural production; but the methods in use are somewhat primitive. Vine growing is a promising enterprise; a great variety of fruit is grown. In February, 1911, cotton was introduced. Fish of all kinds abound in Moroccan waters; more especially sardines and tunny. In addition to its undoubted agricultural resources, rich mineral deposits of copper, iron, lead, antimony, sulphur, silver, gold, and petroleum are also said to exist in various parts of the Sultanate. The French have been steadily pacifying and opening up their zone, and a number of roads have been made. This work is being pushed forward with great activity, and tends greatly to open up the country. Journeys which formerly occupied several days can now be accomplished by motor-cars in as many hours. The existence of these roads naturally extends the districts which can be profitably sown with grain, as the produce can now be brought to the ports for exportation. The French are also doing much to improve the system of agriculture and are studying the introduction of new plants, &c. They are also encouraging the revival of extinct, or almost extinct industries.

### Commerce.

Imports and exports for two years:—

Ports	Imports		Exports	
	1914	1915	1914	1915
	£	£	£	£
Tangier . . . . .	852,013	712,947	56,467	41,035

Total . . . . .	4,570	4,319	3,104,901	1,963,540

The Moorish Government have now established a postal service under French management. Postal services have long been maintained by the British, French, German and Spanish Governments, with offices at all the ports and at Fez, Mequinez, Alcazar and Marakesh, but the French have now suppressed their services in the Spanish zone. Owing to the war all German offices have been closed in the French zone, but not in the Spanish zone. Regular couriers serve all the places named, mails being also sent by all the steamers. There is a daily post to Europe *viâ* Cadiz and Algeciras, also parcel post and money order systems.

There are telegraphic submarine cables from Tangier to Cadiz (Eastern Telegraph Co.), Tarifa (Spanish Government), and Oran (French Government); also wireless telegraphic stations belonging to the Moorish Government at Tangier, Rabat, Casablanca, Fez, Marakesh and Mogador. Land telegraph lines have been laid from Tangier to Arzila, Larache, Alcazar, Arbaoua, Mehdia, Rabat, Casablanca, Mazagan, Saffi and Mogador. Lines also exist to Fez, Mequinez and Marakesh and other places in the interior of the French zone. The total length of the telegraph system actually in operation in the French Protectorate in 1916 is 4,185 miles of wire, exclusive of 1,670 miles of military lines.

The railway has now been completed to Fez. Another line is being constructed from Casablanca to Marakesh and is completed as far as Bou Louane on the Oum er Rabia river. The Lalla-Maghnia Oujda railway, which is to connect the Algerian railways with Fez, has been completed as far as Taza. The Southern railway from Ain Sefia has not been taken beyond Bechar.

Telephone systems are now in operation in Tangier, and in the following towns of the French Protectorate: Casablanca, Rabat, Kenitra, Fez, Mequinez, and Marrakesh. Tangier, Arcila, and Larache are connected by telephone. Casablanca, Rabat, and Kenitra have also inter-urban telephone communication and connections are being effected between Casablanca, Rabat, Fez, and Marrakesh.

Great activity has been displayed in the French zone in the construction of public highways. The first improvements have been practically completed and include a coast road from Kenitra to Mogador, linking up all the chief coast towns in the French zone; two roads from Fez, one direct to Kenitra

and the other passing through Mequinez. The Fez-Kenitra road, when joined with the Fez-Tangier road, will connect the three zones of the Empire. This scheme comprises 875 miles. A further scheme for the construction of an additional 350 miles of road has been adopted.

### Money, Weights, and Measures.

The <i>Blanket</i> or <i>Muzoona</i>	= 6 <i>Floos</i>	Approximate English value =	·096 at par
The <i>Ounce</i> or <i>Okia</i>	= 4 <i>Blankets</i>	„ „ „	= ·384 „
The <i>Mitkal</i>	= 10 <i>Ounces</i>	„ „ „	= 3·84 „

Spanish dollars and pesetas, as well as Moorish coins minted for the Government in France, Germany and England, are current. Spanish currency has practically disappeared from the French zone where French and Moorish coin are alone used. The silver coinage comprises dollars,  $\frac{1}{2}$  and  $\frac{1}{4}$  dollars, and dirhems and  $\frac{1}{2}$  dirhems (1 dollar=10 dirhems). But the values fluctuate, and the market values are sometimes only one-third of those adopted by the Government for custom-house purposes. At Tangier European goods are paid for in Spanish coin or French coin; French coin is much used at Casablanca (Dar-al-Baida) and other ports in the French zone; in other parts of Morocco Moorish coin is now almost exclusively used. The use of French money is extending. On July 27, 1914, the new bronze Hassani coinage was issued. The Rial Makhzani is to be divided into 500 mouzounis, so that the mouzouni may represent a hundredth part of a Hassani peseta. Coins of 2, 5 and 10 mouzounis have been struck. They are of the same type, differing only in size and the figure indicating their value.

The *Kantar*, used for the produce of the country sold by weight, contains 100 *Rotals*, and is generally equal to about 168 lb., but varies in different districts.

The *Kantar* by which is sold the articles of weight of importation is 100 *Rotals*, equal to 112 lb. English.

The *Drah*, 8 *tominis*, about 22 English inches.

Grain is sold by measure.

The Tangier *Mudd*, 8 *tominis*, equal to  $1\frac{1}{3}$  English bushel.

Oil is sold, wholesale, by the *kula*; that of Tangier actually weighs 28 *rotals*, 47 lb. English, and is equal to about  $5\frac{1}{10}$  British imperial gallons.

### Diplomatic and Consular Representatives.

#### OF GREAT BRITAIN IN MOROCCO.

*Agent and Consul-General*.—H. E. White, C.M.G.

*1st Secretary*.—W. J. Garnett.

*Vice-Consul*.—H. B. Johnstone.

There are also Consuls at Casablanca (Dar-al-Baida) and Fez; Vice-Consuls at Casablanca (Dar-al-Baida), Laraiche, Mazagan, Rabat, Saffi, Tetuan, Mogador, and Marakesh, and Consular Agent at Alcazar and Arzila.

## NEPÁL.

An independent Kingdom in the Himálayas, between 26° 25' and 30° 17' N. lat., and between 80° 6' and 88° 14' of E. long.; its greatest length 500 miles; its greatest breadth about 150; bounded on the north by Tibet, on the east by Sikkim, on the south and west by British India.

The sovereign is His Highness Mahárájadhírāja Tribhubana Bir Bikram Jung Bahádúr Shah Bahádúr Shumshere Jung, who was born on June 30, 1906, and succeeded his father on December 11, 1911. The government of Nepál is a military oligarchy. All power is in the hands of the Prime Minister, to whom it was permanently delegated by the Mahárájadhírāja Surendra Bikram Shah under pressure of the Bharadars or nobles of the State in 1867. The present Prime Minister is Maharája Sir Chandrá Shumshere Jung, Bahádúr Rana, G.C.B., G.C.S.I., G.C.V.O., D.C.L., who was appointed on June 26, 1901. He holds the rank of Lieutenant-General in the British army.

The Gurkhas, a Kájpút race originally from Udaipur in Rajputana, who had settled in the province of Gurkha in Nepál, overran the whole country during the latter half of the eighteenth century, and have maintained their supremacy ever since. About 1790 a Gurkha army invaded Tibet; and to avenge this affront the Chinese Emperor, Kuen Lung, in 1791, sent an army into Nepál, which compelled the Gurkhas to submit to the terms of peace, by which the Nepal Durbar agreed to restore the booty taken from the Tibetans, and to send a deputation to Peking with a petition and presents for the Emperor of China once in five years. A commercial treaty between India and Nepál was signed in 1792, and a British Resident was sent to reside at Katmandu, but was recalled two years later. A frontier outrage, in 1814, compelled the Indian Government to declare war; and a British force advanced to within three marches of the capital. Peace was concluded and the Treaty of Segowlic signed on December 2, 1815. Since then the relations of the British with Nepál have been friendly. In 1854 hostilities broke out between the Nepalese and Tibetans, and in 1856 a Treaty was concluded between the Nepalese and Tibetan Governments by which the Tibetans bound themselves to pay an annual tribute of Rs.10,000 to Nepal, to encourage trade between the two countries, and to receive a Representative of Nepál at Lhasa.

In accordance with the treaty of Segowlic, a British Resident, with a small escort of Indian sepoy, lives at the capital; but he does not interfere in the internal affairs of the State.

Area about 54,000 square miles; population estimated at about 5,000,000. The estimated gross revenue is 15,000,000 rupees. The races of Nepál, besides the dominant Gurkhas, include earlier inhabitants of Tartar origin, such as Magars, Gurangs, Newárs, and Bhutias.

Capital, Katmandu; population about 50,000.

Hinduism of an early type is the religion of the Gurkhas, and is gradually but steadily overlaying the Buddhism of the primitive inhabitants. The people are in general prosperous. Charitable hospitals have been built at Katmandu, Bhatgaon, Birganj, Palpa and Bhimphedi, and a dispensary at Doti.

There is a standing regular army of about 30,000, organised in battalions and armed with Martini-Henry rifles. An irregular force, nearly as numerous, is armed with old Snider and Enfield rifles. The artillery force has about 250 guns, two batteries being light field pieces, fairly modern, but the rest old

smooth-bore muzzle-loading guns. Facilities are given for the recruitment of Gurkas for the Indian army.

The trade of Nepal with British India during three years ending March 31, 1915, has been as follows (merchandise and treasure) :—

From or to Nepal	1913-14	1914-15	1915-16
	£	£	£
Imports into India . .	2,887,000	2,565,000	2,632,000
Exports from India . .	1,367,000	1,276,000	1,379,000

The principal articles of export are cattle, hides and skins, opium and other drugs, gums, resins and dyes, jute, wheat, pulse, rice and other grains, clarified butter, oil seeds, spices, tobacco, timber, saltpetre. The chief imports are cattle, sheep and goats, salt, spices, sugar, tobacco, drugs and dyes, petroleum, leather, brass, iron and copper wares, raw cotton, twist and yarn, silk, cotton and woollen piece goods.

The silver mohar is valued at 6 annas and 8 pies of British Indian currency. Copper pice, of which 50 go to a silver mohar, are also coined. The Indian rupee passes current throughout Nepal.

*British Resident.*—Lt.-Colonel S. F. Bayley.

## NETHERLANDS (THE).

(KONINKRIJK DER NEDERLANDEN.)

### Reigning Sovereign.

**Wilhelmina Helena Pauline Maria**, born August 31, 1880, daughter of the late King Willem III., and of his second wife, Princess Emma, born August 2, 1858, daughter of Prince George Victor of Waldeck ; succeeded to the throne on the death of her father, November 23, 1890 ; came of age August 31, 1898, and was crowned September 6 of that year ; married to Prince Henry of Mecklenburg-Schwerin, February 7, 1901. Offspring : Princess Juliana Louise Emma Marie Wilhelmina, born April 30, 1909.

The royal family of the Netherlands, known as the House of Orange, descends from a German Count Walram, who lived in the eleventh century. Through the marriage of Count Engelbrecht, of the branch of Otto, Count of Nassau, with Jane of Polanen, in 1404, the family acquired the barony of Breda, and thereby became settled in the Netherlands. The alliance with another heiress, only sister of the childless Prince of Orange and Count of Châlons, brought to the house a rich province in the south of France ; and a third matrimonial union, that of Prince Willem III. of Orange with a daughter of King James II., led to the transfer of the crown of Great Britain to that prince. Previous to this period, the members of the family had acquired great influence in the United Provinces of the Netherlands under the name of 'stadthouders,' or governors. The dignity was formally declared to be hereditary in 1747, in Willem IV. ; but his successor, Willem V., had to fly to England, in 1795, at the invasion of the French republican army. The family did not return till November, 1813, when the fate of the old United Provinces, released from French incorporation, was under discussion at the Congress of Vienna. After various diplomatic negotiations, the Belgian provinces, subject before the French revolution to the House of Austria, were ordered by the Congress to be joined to the Northern Netherlands, and the whole to be erected into a kingdom, with the son of the last stadthouder, Willem V., as hereditary sovereign. In consequence, the latter was proclaimed King of the Netherlands at the Hague on the 16th of March, 1815, and recognised as sovereign by all the Powers of Europe. The union thus established between the northern and southern Netherlands was dissolved by the Belgian revolution of 1830, and their political relations were not readjusted until the signing of the treaty of London, April 19, 1839, which constituted Belgium an independent kingdom. King Willem I. abdicated in 1840, bequeathing the crown to his son Willem II., who, after a reign of nine years, left it to his heir, Willem III. This king reigned 41 years, and died in 1890 ; in default of male heirs, he was succeeded by his only daughter Wilhelmina.

The Sovereign has a civil list of 600,000 guilders. There is also a large revenue from domains, and in addition an allowance of 50,000 guilders for the maintenance of the royal palaces. The family of Orange is, besides, in the possession of a very large private fortune, acquired in greater part by King Willem I. in the prosecution of vast enterprises tending to raise the commerce of the Netherlands.

## Government and Constitution.

### I. CENTRAL GOVERNMENT.

The first Constitution of the Netherlands after its reconstruction at a kingdom was promulgated in 1815, and was revised in 1848 and in 1887. According to this charter the Netherlands form a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture: in default of male heirs, the female line ascends the throne. In default of a legal heir, the successor to the throne is designated by the Sovereign and a joint meeting of both the Houses of Parliament (each containing twice the usual number of members), and by this assembly alone if the case occurs after the Sovereign's death. The age of majority of the Sovereign is 18 years. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the State Council.

The executive power of the State belongs exclusively to the Sovereign, while the whole legislative authority rests conjointly in the Sovereign and Parliament, the latter—called the States-General—consisting of two Chambers. The Upper or First Chamber is composed of 50 members, elected by the Provincial States from among the most highly assessed inhabitants of the eleven provinces, or from among some high and important functionaries, mentioned by law. Members of the First Chamber not residing in the Hague, where the Parliament meets, are allowed 10 guilders (16s. 8d.) a day during the Session of the States-General. The Second Chamber of the States-General numbers 100 deputies, who are elected directly.

First chamber (elected 1913): 18 Catholics, 19 Anti-Revolutionists, 4 Protestant Party, 9 old Liberals, 6 Liberal Union, 2 Democrats and 2 Socialists.

Second chamber (elected 1913): 10 old Liberals, 22 Liberal Union, 25 Catholics, 11 Anti-Revolutionists, 10 Protestant Party, 7 Democrats, 15 Socialists.

According to the electoral reform act, passed in 1896, voters are all male Dutch citizens not under 25 years of age, in possession of certain outward and positive signs of capacity and well-being, who pay one or more direct State taxes (for the land tax an amount of 1 florin is sufficient). Besides these, the Reform Act admits as electors all those who can prove that they are householders, and have paid rent of houses or lodgings during a fixed term, or that they are owners or tenants of boats of not less than 24 tons capacity, or that they have been during a fixed term in employment with an annual wage or salary of at least 22*l.* 18s. 4d., or possess a certificate of State interest of at least 100 florins, or a savings bank deposit of at least 50 florins, or the legal qualifications for any profession or employment. The mode of voting adopted is based upon the *couloir* system. Voting is not compulsory. The electoral body numbered January 1, 1916, 1,054,620 voters, *i.e.* 70·7 per cent. of the number of male citizens of 25 years and older.

The members of the Second Chamber receive an annual allowance of 2,000 guilders (166*½* *l.*), besides travelling expenses. They are elected for 4 years, and retire in a body, whereas the First Chamber is elected for 9 years, and every 3 years one-third retire by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, being bound only to order new elections within 40 days, and to convoke the new meeting within two months.

The Government and the Second Chamber only may introduce new bills; the functions of the Upper Chamber being restricted to approving or rejecting them, without the power of inserting amendments. The

meetings of both Chambers are public, though each of them, by the decision of the majority, may form itself into a private committee. The minister may attend at the meetings of both Chambers, but they have only a deliberative vote unless they are members. Alterations in the Constitution can be made only by a bill declaring that there is reason for introducing those alterations, followed by a dissolution of the Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly declared, the laws concern only the realm in Europe, and not the Colonies. The executive authority, belonging to the Sovereign, is exercised by a responsible Council of Ministers. The names of the members of the Ministry are:—

1. *President of the Council of Ministers and Minister of the Interior.*—Dr. P. W. A. Cort van der Linden; appointed August 29, 1913.

2. *The Minister of Foreign Affairs.*—Jhr. Dr. J. Loudon; appointed September 27, 1913.

3. *The Minister of Finance.*—Dr. M. W. F. Treub; appointed February 22, 1917.

4. *The Minister of Justice.*—Dr. B. Ort; appointed August 29, 1913.

5. *The Minister of the Colonies.*—Dr. Th. B. Pleyle; appointed August 29, 1913.

6. *The Minister of War.*—N. Bosboom; appointed August 29, 1913.

7. *The Minister of Public Works (Waterstaat).*—Dr. C. Lely; appointed August 29, 1913.

8. *The Minister of Agriculture, Commerce and Industry.*—F. E. Posthuma; appointed November 19, 1914.

9. *The Minister of Marine.*—J. J. Rambonne; appointed August 29, 1913.

Each of the above Ministers has an annual salary of 12,000 guilders, or 1,000l. The Minister of Foreign Affairs enjoys besides 10,000 guilders for representation.

There is a State Council—'Raad van State'—of 14 members, appointed by the Sovereign, of which the Sovereign is president, and which is consulted on all legislative and a great number of executive matters.

## II. LOCAL GOVERNMENT.

The territory is divided into 11 provinces and 1,120 communes. Each province has its own representative body, 'the Provincial States.' The members are elected for 6 years, directly from among the male Dutch inhabitants of the province who are 25 years of age, one-half of the number being subject to re-election or renewal every 3 years. Except that they must be inhabitants of the province, the electors, as well as the mode of voting, are the same as for the Second Chamber. The number of members varies according to the population of the province, from 82 for Holland (South) to 35 for Drenthe. The Provincial States are entitled to make ordinances concerning the welfare of the province, and to raise taxes according to legal precepts. All provincial ordinances must be approved by the Crown. The Provincial States exercise a right of control over the municipalities. They also elect the members of the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 (in Drenthe 4) of their members, called the 'Deputed States,' is charged with the executive power in the province and the daily administration of its affairs. This committee has also to see the common law executed in the province. Both the Deputed as well as the Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but in the latter named only a deliberative vote. He is the chief magistrate in the province. The Commissioner and the members of the Deputed States receive an allowance.

The communes form each a Corporation with its own interests and rights, subject to the general law. In each commune is a Council, elected for six years directly, by the same voters as for the Provincial States, provided they inhabit the commune; one-third of the Council retiring every two years. All the male Dutch inhabitants 23 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Council has a right of making and enforcing by-laws concerning the communal welfare. The Council may raise taxes according to rules prescribed by common law; besides, each commune receives from the State Treasury an allowance proportioned to the total number of its inhabitants and to the share which its non-contributing inhabitants have failed to pay towards local taxes. All by-laws may be vetoed by the Sovereign. The Municipal Budget and the resolutions to alienate municipal property require the approbation of the Deputed States of the province. The Council meets in public as often as may be necessary, and is presided over by a Mayor, appointed by the Sovereign for 6 years. The executive power is vested in a college formed by the Mayor and 2—6 Aldermen (wethouders), elected by and from the Council; this college is also charged with the execution of the public law. The Municipal Police is under the authority of the Mayor; as a State functionary the Mayor supervises the actions of the Council; he may suspend their resolutions for 30 days, but is bound to inform the Deputed States of the province.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

Population at various census periods :

1829.	2,613,487	1869	3,579,529	1909	5,858,175
1849.	3,056,879	1889	4,511,415		

Area (excluding water) and the population, according to the communal population lists for December 31, 1914 and 1915 :—

Provinces	Area : English square miles (1909)	Population		
		Dec. 31, 1914	Dec. 31, 1915	Per sq. mile 1915
North Brabant . . .	1,920	670,030	684,146	356
Guelders . . .	1,939	681,824	691,716	357
South Holland . . .	1,131	1,537,419	1,566,724	1,385
North Holland . . .	1,066	1,202,652	1,220,624	1,145
Zealand . . .	707	239,676	242,135	342
Utrecht . . .	525	307,517	313,644	597
Friesland . . .	1,243	372,625	376,471	303
Overijssel . . .	1,295	410,826	418,458	323
Groningen . . .	881	345,649	350,501	398
Drenthe . . .	1,028	188,775	192,386	187
Limburg . . .	847	382,682	392,543	464
Total . . .	12,582	6,339,705	6,449,348	513

The area, including the interior waters, amounted in 1909 to 13,196 square miles, whilst the total area, including gulfs and bays, amounted in 1909 to 15,760 square miles.

On September 9, 1916, a Bill was introduced into the Second Chamber for the purpose of forming a new province by the draining of the Zuider Zee to the extent of 523,000 acres.

The rate of increase in each year has been :—

In 1880 . . .	0.59	In 1910 . . .	1.49	In 1914 . . .	2.04
.. 1900 . . .	1.47	.. 1913 . . .	1.61	.. 1915 . . .	1.72

Of the total population at the end of 1914 there were 3,147,259 males and 3,192,446 females.

Year	Population of the principal Towns <sup>1</sup>	Percentage of the whole Population	Rural Population	Percentage of the whole Population
Dec. 31, 1889 . . .	1,550,187	34·36	2,061,228	65·64
" " 1899 . . .	1,984,063	38·97	3,120,074	61·03
" " 1914 . . .	2,537,179	40·81	3,752,526	59·19
" " 1915 . . .	2,634,298	40·85	3,815,050	69·15

<sup>1</sup> The towns with a population of more than 20,000 inhabitants at the census of 1909.

For details of the 1909 census see THE STATESMAN'S YEAR-BOOK for 1916, p. 1155.

At the census of 1909 there were 69,982 persons of foreign origin living in the Netherlands, 37,534 of them being Germans<sup>1</sup>, 18,338 Belgians, 2,102 English, and 12,008 from other countries. 3,733,775 persons were born in the communes where they lived; 1,249,741 in some other communes in the province; 764,201 in other provinces of the realm; 15,031 in the Dutch colonies; and 95,282 in foreign countries.

## II. MOVEMENT OF THE POPULATION.

Years	Total Births Registered as Living	Illegitimate	Deaths	Marriages	Surplus of Births over Deaths	Stillborn
Average						
1913	178,541	3,591	75,867	48,387	97,674	6,716
1914	170,831	3,728	77,739	42,539	99,092	6,899
1915	167,423	3,760	79,613	42,651	87,810	6,025

The emigration has been as follows, mostly to North America: in 1912, 2,155; 1913, 2,330; 1914, 2174; and 1915, 1074 (567 were males, 278 females, and 229 children).

The total number of emigrants, Dutch and foreigners, who sailed from Dutch ports was, in 1915, 6,603.

## III. PRINCIPAL TOWNS.

On December 31, 1915:—

Amsterdam . . .	616,589	Dordrecht . . .	50,718	Emmen . . .	34,002
Rotterdam . . .	480,240	Maestricht . . .	39,758	Deventer . . .	30,775
The Hague . . .	322,081	Leeuward . . .	40,277	Helder . . .	29,768
Utrecht . . .	180,010	Apeldoorn . . .	41,465	Breda . . .	28,099
Groningen . . .	84,448	's Hertogenbosch . . .	36,625	Zaandam . . .	27,166
Haarlem . . .	72,362	Enschede . . .	39,275	Gouda . . .	26,184

<sup>1</sup> The number of Germans works out at about 0·5 per cent. of the population. Owing to an error, the map in the 1916 edition of THE STATESMAN'S YEAR-BOOK, showing the distribution of Germans over the world, wrongly indicated from 30 to 70 per cent. for Holland.

### Religion.

Entire liberty of conscience is granted to the members of all religious confessions. The royal family and the majority of the inhabitants belong to the Reformed Church. The State Budget contains fixed allowances for the different churches; for Protestant Churches, about 1,388,000 guilders; for Roman Catholics, about 576,000; and for Jews, about 14,000.

The number of adherents of the different churches in the various provinces, according to the census of 1909, was as follows:—

Provinces	Dutch Reformed	Other Protestant	R. Cath. Church	Jansenists	Jews	Other or no creeds
N. Brabant . . .	51,051	16,331	551,576	21	1,784	2,316
Guelanders . . .	339,869	52,170	226,070	361	5,171	15,961
South Holland . .	749,270	195,800	334,064	2,230	18,733	90,647
North Holland . .	442,425	172,271	307,199	5,425	64,426	115,947
Zealand . . .	125,857	31,008	58,974	14	331	16,191
Utrecht . . .	147,704	36,191	92,478	1,939	1,390	8,812
Friesland . . .	192,685	93,645	25,273	6	1,284	46,659
Overijssel . . .	212,720	46,424	102,139	14	4,401	17,182
Groningen . . .	197,655	72,158	20,305	33	5,686	32,208
Drenthe . . .	125,128	28,039	10,654	31	2,186	7,280
Limburg . . .	3,872	2,059	324,153	8	960	955
1909 . . .	2,588,261	746,186	2,053,021	10,082	106,309	353,158

The government of the Reformed Church is Presbyterian. At the end of 1912 the Dutch Reformed, Walloon, English Presbyterian, and Scotch Churches had 1 Synod, 10 provincial districts, 44 classes, and 1,362 parishes. Their clergy numbered about 1,640. The Roman Catholic Church had one archbishop (of Utrecht), 4 bishops, and 1,133 parishes. The Old Catholics had 1 archbishop, 2 bishops, and 27 parishes. The Jews had about 171 parishes.

### Instruction.

Public instruction (primary) is given in all places where needed, religious convictions being respected. Instruction was made obligatory by the Act of 1900; the school age is from 6 to 13.

In 1806, and more expressly in 1848, secular instruction was separated from religious or sectarian instruction. The law on the point of the year 1879 is still in force. By a modification of the Act of 1887 public instruction is diminished and a greater share in the education of the youths left to private instruction, which is now largely supported by the State. The cost of public primary instruction is borne jointly by the State and the communes, the State contributing to the salaries of the teachers and being responsible for 25 per cent. of the costs of founding or purchasing schools. Important modifications of the law took place in the years 1901, 1905, 1910 and 1912.

The Secondary Education Act dates from the year 1863, but it has repeatedly been modified since. Superior instruction is given in the larger communities in public or private schools. Private schools may be endowed by the State, private professional schools also by the province and the community. The Higher Education Act dates from the year 1876, but it has repeatedly been modified since. Higher education is given at Universities, in high schools, and grammar schools, either public or private. Private institutions may be endowed by the State. Tuition in Kindergartens has not been regulated by law.

The following table is taken from the Government returns for 1914-15 :

Institutions	Number	Teaching Staff	Pupils or Students	
			Total	Female
Universities (public) <sup>1</sup> . . . .	4	317	3,475	774
Technical University . . . . .	1	74	1,182	81
Classical (public) schools . . . .	33	512	3,062	1,015
Schools for the working people . .	483	3,702	41,956	6,682
Navigation schools . . . . .	12	126	1,213	—
Middle class schools . . . . .	111	1,734	16,733	4,934
Elementary Schools :				
Public . . . . .	3,351	19,413	570,791	251,350
Private . . . . .	2,320	14,084	410,637	226,424
Infant Schools :				
Public . . . . .	182	1,618	33,937	16,194
Private . . . . .	1,153	3,318	109,274	54,841

<sup>1</sup> Leiden, Utrecht, Groningen, Amsterdam.

Besides the schools named in the table, there is a great number of special schools, mostly technical. A High School of Commerce (the first in Holland) was opened at Rotterdam in November, 1913. Since 1880 there is also a private university, with a teaching staff of 15, 175 students in 1914-15, and since 1908 a Government school to train functionaries of the colonial service for superior posts.

In 1914 the State spent on education 2,974,000*l.*; the provinces, 38,000*l.*; the Communes, 1,489,000*l.*

Of the conscripts called out in 1913, 0·6 per cent. could neither read nor write, the percentage being highest in Drenthe, 1·5. Of the persons married in 1915, 0·41 per cent. of the males and 0·73 per cent. of the females could not sign the marriage certificate. Of the convicts in 1911, 4 per cent. could neither read nor write. Of the total number of children from 7 to 13 years (school age) on January 15, 1915, 4·73 per cent. received no elementary instruction.

## Justice and Crime.

Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 23 district tribunals, and by 101 cantonal courts; trial by jury is unknown in Holland. The Cantonal Court, which deals with minor offences, is formed by a single judge; the more serious cases are tried by the district tribunals, formed as a rule by 3 judges (in some cases one judge is sufficient); the courts are constituted of 3 and the High Court of 5 judges. All Judges are appointed for life by the Sovereign (the Judges of the High Court from a list prepared by the Second Chamber). They can be removed only by a decision of the High Court.

The number of persons convicted was :—

	By the Cantonal Courts		By the District Tribunals	
	Male	Female	Male	Female
1911	131,536	15,334	12,228	1,280
1912	138,421	14,300	12,478	1,403
1913	142,910	12,722	12,113	1,311
1914	136,305	13,810	11,787	1,231

The number of inmates in the 28 prisons during 1914 was 8,602 males and 434 females; in the 27 houses of detention, 21,811 males and 1,222 females. There are also 4 State-work establishments specially for drunkards, beggars and vagabonds. The number of inmates was, during the year 1914, 2,488 males and 56 females. In 1901 an Act was passed reforming State reformatories for the education of juvenile criminals and establishing disciplinary schools for juvenile criminals and for children admitted by request of parents or guardians (*correction paternelle*). The number of inmates during the year 1914 in the 6 State reformatories was: 1,050 boys and 127 girls; in the 5 disciplinary schools: 661 boys and 61 girls.

There are both State and communal police. The State police consists of field-constables and cavalry. The former are spread over the country, the latter guard the frontiers (eastern and southern). The cavalry police (*maréchaussée*) numbers about 20 officers and about 1,000 men. There are about 1,040—appointed and paid by the Government—field-constables, divided into numerous brigades. Besides each commune has its own field-constables or police force.

### Pauperism.

The relief of the poor is largely effected by the religious societies and organised private charity. The State does not interfere, except when no relief is to be obtained from private charity; in that case the pauper must be supported by the commune where he is living. There is no poor rate in the Netherlands. Mendicity and vagabondage are treated as offences, and persons so convicted can be placed in a State-work establishment. Workhouses for the poor are found in very few communes.

Number of poor relieved in the Kingdom during the year 1913:—Heads of families, 164,878; other persons, 62,222; lunatics and idiots, 12,769; women in child-bed, 7,196; in asylums (almshouses), 46,387; in hospitals, 62,530; in workhouses, 4,021.

The amount spent on outdoor relief in 1913 was 15,722,611 florins, for lunatics and idiots 3,500,858 florins, for maternity cases 43,921 florins, for asylums 5,800,674 florins, for hospitals 1,230,967 florins, and for workhouses 179,814 florins.

### Finance.

The revenue and expenditure in five years were (12 guilders = £1):—

#### REVENUE.

Year	Ordinary	Extraord. (loans, &c.)	Total
	Guilders	Guilders	Guilders
1911	203,787,000	1,816,000	205,603,000
1912	211,443,000	1,958,000	213,401,000
1913	223,507,000	3,915,000	227,422,000
1914	221,860,000	20,659,000	245,526,000
1915	240,519,000	41,838,000	280,676,000

#### EXPENDITURE.

Year	Defence	Debt	Public Works	General	Total
	Guilders	Guilders	Guilders	Guilders	Guilders
1911	47,510,000	36,807,000	13,952,000	110,221,000	208,490,000
1912	49,188,000	37,593,000	16,159,000	122,725,000	224,665,000
1913	52,969,000	38,021,000	17,162,000	130,635,000	238,727,000
1914	110,650,000	40,121,000	24,956,000	181,979,000	357,706,000
1915	207,730,000	41,406,000	19,690,000	250,921,000	519,547,000

Budget estimates for the years 1916 and 1917 were as follows :

Branches of Expenditure	1916	1917	Sources of Revenue	1916	1917
	Guilders	Guilders		Guilders	Guilders
Civil list	815,000	815,000	Direct taxes :—		
Legislative body and Royal cabinet	842,057	854,620	Land tax	16,195,000	16,350,000
Department of Foreign Affairs	1,543,688	1,621,454	Personal	14,085,000	14,525,000
Department of Justice	13,031,515	13,425,319	Tax on capital	3,750,000	3,820,000
Department of Interior	46,629,728	45,987,182	Tax on incomes from trades, professions, &c.	23,600,000	32,800,000
Department of Marine	27,223,312	39,841,216	Excise duties	64,308,000	65,477,000
Department of Finance	60,629,321	57,291,493	Indirect taxes	32,456,000	33,017,000
Department of War	34,970,680	36,007,617	Import duties	17,681,000	18,159,000
Department of Public Works, etc.	34,032,110	32,545,781	Tax on gold & silver	520,000	540,000
Department of Agriculture, etc.	17,919,327	23,831,729	Domains	1,690,000	1,850,000
Department of Colonies	3,212,621	3,973,545	Post office	412,000 <sup>1</sup>	144,000 <sup>1</sup>
Public Debt	42,780,981	44,143,560	Telegraph service		
Contingencies	50,000	50,000	State lottery	655,000	655,000
			Pilot dues	3,876,000	3,953,000
			State mines	7,901,000	14,174,000
			State railways	4,425,000	4,549,000
			Part paid by the East Indies in the interest and sinking fund of public debt	2,413,000	2,355,000
			Share in the profits of the Bank of the Netherlands	3,205,000	3,475,000
			Miscellaneous receipts	25,586,000	32,116,000
Total expenditure	283,680,340 (22,806,695 <i>l.</i> )	300,388,516 (25,032,876 <i>l.</i> )	Total revenue	227,703,000 (18,975,250 <i>l.</i> )	250,265,000 (20,855,438 <i>l.</i> )

<sup>1</sup> Net profit.

The amount of the chief taxes per head of the population was, in 1915 30·37 guilders (3*l.* 10*s.* 7*d.*).

The expenditure of the 'Department for the Colonies' entered in the budget estimates only refers to the central administration. There is a separate budget for the great colonial possessions in the East Indies, voted as such by the States-General. The financial estimates for the year 1917 are distributed between the colonies and the mother country in the following proportions :—

	Guilders		Guilders
Expenditure in the colonies	318,366,284	Revenues in the mother country	45,254,096
Home Government expenditure	85,990,833	Revenues in the colonies	300,857,507
Total expenditure	404,357,117 (33,796,426 <i>l.</i> )	Total revenue	346,111,60 (28,842,634 <i>l.</i> )

In the budget for 1917 the national debt is given as follows :—

—	Nominal Capital	Annual Interest
Funded Debt	Guilders	Guilders
2½ per cent. debt	577,593,100	14,439,828
3 " " debt of 1895, 1898, 1899 and 1905	495,026,850	14,850,806
3½ " " debt of 1910	49,211,950	1,722,418
5 " " debt of 1914	261,250,000	13,062,500
Other loans	125,000,000	5,625,000
Total	1,508,081,900	49,700,552

—	Nominal Capital	Annual Interest
	Guilders	Guilders
Floating debt . . . . .	—	6,150,000
Annuities . . . . .	—	139,709
Sinking fund . . . . .	—	6,815,890
Total debt . . . . .	1,508,081,900 (125,678,491 <i>l.</i> )	68,806,061 (5,317,171 <i>l.</i> )

For 1917 the interest of the funded debt was estimated at 49,700,552 guilders, and the sinking fund 6,815,800 guilders.

During the years 1850–1916, 388,494,562 guilders have been devoted to the redemption of the public debt. The total debt (1917) amounts to 1,508,081,900 gld. or 19*l.* 3*s.* 2*d.* per head, and the annual charge to 49,700,552 or 12*s.* 8*d.* per head.

The rateable annual value of buildings was given at 208,787,167 guilders in 1915, and of land, 97,742,658 guilders.

The various provinces and communes have their own separate budgets; the provincial expenditure for 1914 was 12,803,554 guilders; the revenue at 13,864,493 guilders; the communal expenses in 1913 amounted to 279,156,501 guilders, whereof 76,756,643 guilders for debt. The communal revenues were, in the same year, 274,880,718 guilders.

## Defence.

### I. FRONTIER.

The Netherlands are bordered on the south by Belgium, on the east by Germany. On the former side the country is quite level, on the latter more hilly; the land frontier is open all round. The frontiers are defended by few fortresses. The scheme of defence adopted in 1874 contemplates concentration of the defensive forces in a restricted area, known as the "Holland Fortress." This comprises the provinces of North and South Holland, with parts of Zeeland and Utrecht. Two-thirds of the area is surrounded by the sea. On the land side, to the East and South, are lines of more or less permanent works, which can be rendered very difficult of attack by inundations. There are also strong works on the coast, notably the Helder group, barring access to the Zuiderzee, and the Hollandsch Diep and Volkerak position, while the entrances to the Amsterdam and Rotterdam ship canals are defended by powerful forts. The citadel of the whole is Amsterdam, which is well fortified. Here also inundations would almost preclude a successful attack. The coast defences are in good order and are to be further strengthened, but the defences on the land side, except the position of Amsterdam, have of late years been neglected. Moreover, the control of the inundations is not entirely in military hands.

Apart from the Holland Fortress are the works on the Western Schelde. These have hitherto been unimportant, but a plan has been adopted to augment them by entirely new works at Flushing.

### II. ARMY.

According to an Act of 1912, service in the army is partly voluntary and partly compulsory; the voluntary enlistments bear a small proportion to the compulsory. Every Dutch citizen is liable to personal service in the

army (or navy) from the age of 19 up to 40. Actual service in the ranks is determined by lot, but substitution is not permitted. The maximum strength of the annual contingent is fixed at 27,500 (including 600 for the sea service).

The engagement of voluntarily enlisted men is for 10 years, of which only 2 or 3 years (according to the arm of the service) are with the colours, but many re-engage to become non-commissioned officers. The conscripted militiamen belong to the active army for 6 years for the unmounted corps, and 8 years for the mounted corps (sea service 5 years). The 'full' training time is 8½ months in the infantry, engineers, and garrison artillery (under certain circumstances 6½ months), and 24 months in the cavalry, horse and field artillery. A certain proportion of the full-course men of the infantry and garrison artillery (between 3,800 and 4,500 men, designed by lot) are retained for an additional 4½ months. The full-course men are called up in two batches, half in January (March), half in October.

With regard to further training, men belonging to mounted corps are liable to be called out once in their army service for 4 weeks; the others, once for 4 and the second time for 3 weeks.

After having fulfilled their active service the militiamen pass to the 'landweer' for 5 years; they can be called out twice in their 7 years, but for 6 days only on each occasion. Men of mounted corps and of the navy are excused from landweer service. Men after they have completed their landweer service belong to the 'landstorm' up to the age of 40, together with all men who have not passed through the ranks.

The landweer forces are organised in units corresponding to those of the first line, except that there are no mounted troops. Cadres are maintained in time of peace for the landweer formations.

The field army consists of 4 divisions and an independent cavalry brigade. A division contains 3 brigades of infantry each consisting of 2 regiments of 3 battalions, 1 squadron, a field artillery regiment (12 three-gun batteries, 36 guns), a group of 2 four-gun batteries of heavy artillery, a company of cyclists, 8 machine guns, and a company of engineers. The total strength of a division in the field, with staff, would be about 19,000 officers and men. The cavalry brigade has 4 regiments, each of 3 squadrons, 3 companies of cyclists and 4 three-gun batteries of horse artillery. There are also 57 fortress artillery companies organised as battalions of a strength adequate to the particular fortress garrisoned. The landweer troops, with the fortress artillery of the active army, would hold the fortresses.

The peace strength of the Netherlands army, that is the permanent staffs of all the units of the first line, amounted in 1913 (latest available information) to 1,543 officers, and 21,412 non-commissioned officers and men. The total strength of the field army is approximately 150,000 men, with 160 guns. Military expenditure budgeted in 1917, 3,005,635*l.* Colonial military budget, 3,763,663*l.* A bill has been passed to spend about two millions sterling on the coast defences, including armament.

The Netherlands infantry is armed with the Mannlicher magazine rifle, model 95. Cavalry and engineers carry the Mannlicher carbine. The field artillery, including the horse batteries, is armed with a shielded Q.F. Krupp gun of 7.5 cm.

### III. NAVY.

The Navy is maintained for a double purpose—viz. the protection of the Dutch waters and coast, and the defence of the East Indian possessions. These latter contribute to the maintenance of that division of it known as the Indian Marine.

Following is a list of the fighting ships of the Dutch Navy.

Name	Displacement, Tons	Armour water line	Max. Armour on gun	Principal Armament	Torpedo Tubes	Indicated Horse-power	Nominal Speed Knots	Designed
<b>COAST DEFENCE SHIPS</b>								
Kortenaar	3,520	6	10½	3 8-in.; 2 6-in.	2	4,800	16	'93
Hertog Hendrik	5,080	6	10	2 9·4-in., 4 6-in.	3	6-7,000	17	'98
Koningin Regentes								
De Ruijter	5,300	6	10	2 9·4-in., 4 6-in.	3	6-7,000	17	'98
Tromp	5,700	6	8	2 9·4-in., 6 6 in.	3	6,000	17	'05
Heemskerk	6,500	6	10	2 11-in., 4 6 in.	—	7,500	16	'08
Zeven Provinciën								
<b>CRUISERS</b>								
Holland	3,900	deck	—	10 4·7-in.	4	{10,500 to (10,800)}	20	'95
Zeeland				8 4·7-in., 2 6-in.				
Friesland								
Norod Brabant	4,030	deck	—	10 4·7-in.	4	"	20	'97
Gelderland				4 6-in.				

There are also a number of gunboats, 38 torpedo boats, and 5 submarines. Eight destroyers were added in 1911-12. Four others were building in Germany when war broke out and taken over by the Germans. Four replacement boats have since been laid down in Holland.

The navy was officered in 1915 by 4 vice-admirals, 5 rear-admirals ('schout-bijnacht'), 29 captains, 37 commanders, and about 655 lieutenants and midshipmen, besides engineers, surgeons, &c., and about 8,600 seamen. The marine infantry consists of about 22 officers, and about 2,600 non-commissioned officers and privates. Both seamen and marines are recruited by enlistment, conscription being allowed, but it is not actually in force.

## Production and Industry.

### I. AGRICULTURE.

The surface of the Netherlands was divided in 1915 as follows (in hectares, 1 hectare=2·47 acres):—Uncultivated land (heath) 500,136; water and morass, 124,049; dykes and roads, 53,849; untaxed land, 76,677; building land, houses, &c., 49,022. Total, 803,733 h.a. Cultivated land: arable land, 881,729; pasture, 1,235,719; gardens and orchards, 83,326; forest, 257,184. Total, 2,457,958 h.a.

Large estates prevail in the provinces of Zealand, South Holland, Groningen, and North Holland; small estates in North Brabant, Guelders, Limburg, and Overijssel.

The areas under the principal crops, in acres, were as follows:—

Products.	1914	1915	1916	Products.	1914	1915	1916
	Acres	Acres	Acres		Acres	Acres	Acres
Winter wheat	139,614	153,556	131,306	Brown mustard seed	1,594	1,554	2,679
Summer wheat	8,728	9,291	4,230	White mustard seed	2,234	4,831	12,217
Winter rye	558,308	542,550	495,412	Caraway seed	13,059	9,803	12,434
Summer rye	4,285	3,758	3,111	Flax	19,084	22,111	36,176
Winter barley	52,868	49,750	47,387	Tobacco	986	860	877
Summer barley	13,793	13,509	12,526	Table potatoes	346,648	355,213	324,092
Oats	348,212	358,383	343,030	Factory potatoes	77,168	82,345	88,100
Buckwheat	24,100	19,761	20,342	Sugar beets	156,254	189,646	157,265
Horse beans	39,912	38,704	36,799	Chicory	1,648	2,431	3,074
Peas	64,815	61,237	61,015	Onions	6,907	7,991	9,706
Beans.	19,385	19,524	21,928	Spinach seed	2,234	1,816	2,478

The yield of the more important products for 3 years was as follows :—

Crop	Produce			Crop	Produce		
	1913	1914	1915		1913	1914	1915
	Quarters	Quarters	Quarters		Tons	Tons	Tons
Wheat . . . . .	606,542	678,851	624,500	Sugar beet.	1,665,000	1,994,182	1,714,000
Barley . . . . .	367,548	354,682	297,750				
Oats . . . . .	2,221,113	2,275,059	1,823,000		Cwts.	Cwts.	Cwts.
Rye . . . . .	1,984,584	1,582,360	1,419,750	Flax . . . . .	7,532	4,904	5,861

The value of imports and exports of the leading agricultural products in 1912 and 1913 was as follows (in guilders) :—

	1914		1915	
	Imports	Exports	Imports	Exports
Wheat . . . . .	179,628,328	181,132,656	84,142,988	6,394,840
Flour, wheat, and rye . . . . .	58,692,609	16,845,287	29,728,093	138,060
Rye . . . . .	81,849,985	16,736,647	5,005,194	56,852
Barley . . . . .	36,660,262	23,313,569	8,852,866	245,051
Oats . . . . .	23,230,660	16,768,937	5,030,624	88,918
Potato-flour . . . . .	4,710,543	35,211,079	10,446	32,914,142
Buckwheat . . . . .	988,634	347,745	1,536,468	749
Flax . . . . .	1,167,249	22,003,807	1,160,833	8,551,150

Fruits . . . . .	6,051,330	6,762,254	10,334,571	16,460,723

## II. MINING AND MANUFACTURES.

A few coal mines are found in the province of Limburg; most of them belong to the State. The quantity of coal extracted in 1915 was 2,262,148 metric tons, valued at 18,024,000 gl.

There are no official returns of all the manufacturing industries. According to the last reports there were, in 1915: 383 distilleries, 7 sugar refineries, 26 beet-sugar refineries, 31 salt works, 403 breweries and 58 vinegar manufactories.

## III. FISHERIES.

In 1915, 5,879 vessels of all kinds were engaged in the fisheries, with crews numbering about 21,573. The produce of the herring fishery in the North Sea was valued at 36,230,474 guilders in 1915. The quantity of oysters produced in 1915 amounted to 2,491,431 kilos.

## Commerce.

The Netherlands is a free-trading country. A few duties are levied, but they have only a fiscal, not a protectionist, character.

Treaties of commerce and navigation between the Netherlands and Great Britain were signed in 1837, 1851 and 1889, and (having special reference to the colonies) in 1815, 1827 and 1871, providing, amongst other things, for the 'most favoured nation' treatment. The treaties of 1837, 1851, and 1889, are terminable on a year's notice, with exception of that of 1851, which is terminable on six weeks' notice, when the privileges granted by the Netherlands law of 1850 may be withdrawn. For the treaties of 1815, 1827 and 1871 no time of notice has been stipulated.

No official returns are kept of the value of the general trade, but only of the weight of the goods. In 1872 the total imports were estimated

at 6,451 million kilogrammes, and the exports at 2,956 millions; while in 1914 the former were 23,485 million kilogrammes, and the latter 11,730 millions, inclusive of goods in transit.

The following are the estimates of the imports for home consumption and the exports of home produce for five years :—

Year	Imports	Exports	Transit trade
	Guilders	Guilders	Kilogrammes
1911	3,333,000,000	2,732,000,000	13,696,000,000
1912	3,613,000,000	3,113,000,000	14,706,000,000
1913	3,918,000,000	3,083,000,000	15,622,000,000
1914	2,889,000,000	2,505,000,000	10,677,000,000
1915	2,111,000,000	1,749,000,000	6,549,000,000

The values of the leading articles of import and export in the last two years were (in thousands of guilders, 12 guilders = 1l.) :—

	Imports		Exports	
	1914	1915	1914	1915
Iron and steel of all kinds . . . . .	375,744	181,411	247,032	72,079
Textiles, raw and manufactured . . . . .	186,125	165,022	174,551	151,062
Cereals and flour . . . . .	397,908	218,238	231,567	11,946

United States of America . . . . .	300·7	331·0	Hamburg . . . . .	33·7	117·3
British India . . . . .	39·4	6·6	France . . . . .	23·1	8·6
France . . . . .	27·4	15·2	Italy . . . . .	19·9	61·8
Hamburg . . . . .	47·1	0·1	Russia . . . . .	21·7	0·0 <sup>5</sup>
Spain . . . . .	70·0	8·6	Bremen . . . . .	48·0	4·8

In the Netherlands the statistics give sometimes the real, sometimes the official, value of goods. For goods liable to an *ad valorem* import duty and for some articles duty-free, the importer has to declare the real value according to the current prices of the day. To other goods the official values, unchanged since 1847, are applied. Every declaration of imports and of exports is, in principle, subject to verification, but in fact only those relating to goods subject to duty are checked. Returns are made out in gross weight, in net weight (with deduction of an official tare), in number or in value according to the nature of each case. When goods are imported or exported by river the neighbouring country is always regarded as the country of origin or of destination: thus imports really from France are attributed to Belgium. When transport is by sea, generally the real country of origin is given; thus Spanish wines are set down as from Spain, unless they have been imported first into some other country, in which case they are attributed to that country.

The principal articles of trade between the United Kingdom and the Netherlands (Board of Trade Returns) in two years were:—

Imports into U.K. from Netherlands	1914	1915	Exports of produce and manuf. of U.K. to Netherlands	1914	1915
	£	£		£	£
Peas . . . . .	56,458	1,144	Cottons . . . . .	970,816	806,727
Rice . . . . .	300,022	2,570	Cotton yarn . . . . .	1,820,458	2,175,668
Eggs . . . . .	603,323	635,856	Coal . . . . .	1,040,335	1,290,869
Fish . . . . .	184,518	397,658	Iron . . . . .	982,261	801,260
Cheese . . . . .	921,311	438,235	Machinery . . . . .	701,565	537,277
Butter . . . . .	1,144,181	313,868	New ships, &c. . . . .	1,350,516	41,423
Margarine . . . . .	3,896,375	5,666,146	Carriages . . . . .	234,894	278,990
Paper, Strawboard . . . . .	841,832	982,663	Woollens . . . . .	360,918	310,579
Sugar . . . . .	2,157,149	2,407,799	Corn . . . . .	279,659	439,191
Hides . . . . .	89,555	18,876	Cottonseed oil . . . . .	471,072	454,909
Pork . . . . .	2,248,650	359,424			
Condensed milk . . . . .	1,187,408	1,396,821			

Much of the trade here entered as with the Netherlands consists of goods on transit from and to Germany, notably the imports of silk goods and metal goods.

Total trade between the Netherlands and the United Kingdom (in thousands of pounds sterling) for 5 years (Board of Trade Returns):—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Netherlands to U.K.	21,433	23,577	24,310	23,418	22,187
Exports to Netherlands from U.K.	14,281	15,429	13,365	18,036	24,066

### Shipping and Navigation.

The number of vessels in the mercantile navy at the end of 1915 was:—Sailing vessels 390, of 44,617 English tons; steamers 397, of 725,532 English tons. At the end of 1916 the total was 480 vessels of 1,611,320 English tons.

The following table gives the number and tonnage (in English measurement) of vessels which entered and cleared the ports of the Netherlands:—

Year	Entered.		Entered.		Entered.	
	With Cargoes		In Ballast		Total	
	No.	Tonnage	No.	Tonnage	No.	Tonnage
1913	14,952	17,144,000	2,044	1,054,000	16,996	18,198,000
1914	10,650	12,344,000	1,804	1,196,000	12,454	13,540,000
1915	5,912	6,409,000	439	213,000	6,341	6,621,000
	Cleared.		Cleared.		Cleared.	
	No.	Tonnage	No.	Tonnage	No.	Tonnage
	No.	Tonnage	No.	Tonnage	No.	Tonnage
	No.	Tonnage	No.	Tonnage	No.	Tonnage
1913	11,878	11,024,000	5,211	7,007,000	17,089	18,031,000
1914	9,076	8,965,000	3,593	4,690,000	12,669	13,565,000
1915	4,106	3,619,000	2,269	3,912,000	6,375	6,631,000

Of the total number in 1915, 3,507 Dutch vessels entered with a tonnage of 4,114,000 and 2,182 foreign vessels with a tonnage of 2,508,000; 3,502 Dutch vessels cleared, with a tonnage of 4,160,000, and 2,873 foreign vessels with a tonnage of 2,472,000.

The vessels with cargoes which entered at the chief ports were as follows:—

Port	<i>Entered.</i>					
	1914			1915		
	Number	Tons	per cent.	Number	Tons	per cent.
Rotterdam . . .	6,208	8,048,800	69.0	3,302	3,942,800	61.5
Amsterdam . . .	1,781	2,095,300	17.0	1,455	1,673,600	26.1
Flushing . . .	707	723,900	5.9	388	404,800	6.3

	1914			1915		
	Number	Tons	per cent.	Number	Tons	per cent.
Rotterdam . . .	4,922	5,285,400	58.9	1,965	1,902,700	52.6
Amsterdam . . .	1,417	1,669,100	18.6	891	999,500	27.6
Flushing . . .	711	712,500	7.9	395	405,700	11.2

## Internal Communications.

### I. CANALS AND RAILWAYS.

The total extent of canals is about 2,000 miles; of roads about 3,000 miles.

In 1915 the total length of the principal tramway lines was 1,779 miles; 243,375,000 passengers were carried, and 2,035,462,000 kilogrammes of goods. Their revenue amounts to 19,510,000 guilders.

In 1915 the 4 principal railways had a length of 2,313 miles. The breadth of the railway gauge is 1.50 metres, or 4 ft. 11 in. In 1915 60,005,000 passengers and 15,784,000 metric tons of goods were carried on the railways. The revenue was 84,934,000 guilders, and the expenditure 65,604,000 guilders. All railway companies are private; there is a State railway company, only so named because the road is owned by the State. A project is on foot for bringing the four railway companies under one control.

### II. POST AND TELEGRAPHS.

The postal traffic was as follows in 2 years:—

	Letters	Post Cards	Newspapers and Printed Matter	Parcels	Letters with Money Orders
1914					
Internal .	132,643,000	97,716,000	284,821,000	6,833,754	623,775
Foreign .	—	—	—	1,535,831	134,059
1915					
Internal .	153,777,000	116,900,000	311,969,000	7,633,754	754,846
Foreign .	39,673,000	25,106,000	25,425,000	1,501,626	206,271

The receipts of the Post Office in 1915 were 19,142,000 guilders, the expenditure 18,190,000 guilders.

There are several private telegraph lines, but most of the lines are owned by the State. The length of State lines on Dec. 31, 1915, was 5,113 miles, the

length of wires 26,090 miles. The number of State offices was, on December 31, 1915, 1,193. The number of paid messages by State and private lines in 1915 was 8,194,900. The receipts of the State amounted in the same year to 4,986,090 guilders, and the ordinary expenses to 5,130,000 guilders.

In 1915 the interurban telephone system had 2,307 miles of line and 61,152 miles of wire, and is administered by the State; 8,105,209 interurban and 31,155 international conversations were held. The receipts were in the same year for interurban and international intercourse 4,053,000 guilders; the total expenses 2,963,000 guilders.

### Money and Credit.

The money in general circulation is chiefly silver. Before 1875 the Netherlands had the silver standard; but a bill which passed the States-General in the session of 1875 allowed an unrestricted coinage of ten-guilder pieces in gold, whereas the coinage of silver was suspended for an unlimited time.

Value of money minted during the following years (in thousands of guilders):—

Year	Gold	Silver	Copper and Nickel	For the East India Colonies	Total value	Total number of pieces
1881-90	4,030	1,433	840	2,660	8,955	111,768,000
1891-1900	4,540	12,285	470	7,496	24,791	340,574,090
1901-10	990	34,990	1,305	15,035	52,097	404,679,000
1913	4,000	12,800	450	6,366	23,616	148,200,000
1914	7,380	18,085	455	4,686	30,606	187,123,000
1915	—	15,215	177	3,863	19,255	105,575,000

The Bank of the Netherlands is a private institution, but it is the only one which has the right of issuing bank-notes. This right, granted in 1863 for 25 years, was prolonged in 1888 for 15 years, and prolonged again for the same term in 1903, with some alterations in the conditions; *e.g.* all the paper money is to be issued by the Bank. The Bank does the same business as other banks only with more guarantees. Two-fifths of the paper money in circulation must be covered. It has agencies in all places of importance.

Year	Notes in Circulation, March 31	Total Exchanges years ending March 31	Stock of Gold, March 31	Stock of Silver, March 31
	1,000 guilders	1,000 guilders	1,000 guilders	1,000 guilders
1914	312,856,620	902,590,190	160,064	9,786
1915	472,428,385	927,141,035	288,798	1,869
1916	618,304,570	1,095,471,952	517,194	4,288

The capital amounts to 20,000,000 guilders, the reserve fund in 1915 to 5,000,000 guilders. The Bank keeps the State-Treasury and the cash of the State Postal Savings-Bank and of other institutions. It receives  $3\frac{1}{2}$  per cent. of the clear gains; the remainder is divided between the State and the Bank in proportion of 2 : 1.

There are many savings-banks, all private. Besides these there is a State

postal savings-bank, established in 1881. The following table gives some particulars of both :—

Year	Number of Savings Banks	Amount deposited (in 1,000 gldrs.)	Amount withdrawn (in 1,000 gldrs.)	Total Deposits at end of year (in 1,000 gldrs.)	Number of Depositors at end of year	Amount per inhabitant. Gldrs.
1913						
State P. S. B.	—	86,818	84,256	183,791	1,048,720	29.59
Private banks	294	47,799	45,815	129,751	509,836	20.59
1914

Private banks	294	40,572	55,319	118,108	510,077	18.68
1915						
State P. S. B.	—	67,688	67,762	189,107	1,690,149	—

## Money, Weights, and Measures.

### MONEY.

The standard coin is the 10-florin piece weighing 6.720 grammes, .900 fine, and thus containing 6.048 grammes of fine gold. The unit of the silver coinage is the gulden or florin, weighing 10 grammes, .945 fine and containing 9.45 grammes of fine silver.

Gold is legal tender, and the silver coins issued before 1875.

The principal coins are :—

The *gulden*, *guilder* or *florin* of 100 cents = 1s. 8d. ; or 12 g. = £1.

The *rijksdaalder* = 2½ guilders.

The gold-piece of ten guilders and of five guilders.

¼ guilder, ½ guilder (*kwartje*), 1½ guilder (*dubbeltje*).

Cent coins are: of nickel, 5 cents; of bronze, 1 cent, ½ cent, and 2½ cents.

### WEIGHTS AND MEASURES.

The metric system of weights and measures, and, with trifling changes, the metric denominations are adopted in the Netherlands.

## Diplomatic and Consular Representatives.

### 1. OF THE NETHERLANDS IN GREAT BRITAIN.

*Envoy and Minister*.—Jonkheer R. de Marees van Swinderen (October 13, 1913).

*Counsellor*.—Jonkheer F. E. M. H. Michiels van Verduynen.

*Secretary*.—Baron E. H. van Nagell.

*Naval Attaché*.—Capt. A. C. Dunlop.

*Consul-General in London*.—H. S. J. Maas ; appointed 1897.

### 2. OF GREAT BRITAIN IN THE NETHERLANDS.

*Envoy and Minister*.—Sir Walter B. Townley, K.C.M.G. ; accredited February 9, 1917.

*Secretaries*.—H. G. Chilton and R. S. Seymour, M.V.O.

*Military Attaché*.—Major L. C. F. Oppenheim.

*Hon. Attachés*.—John Monck and W. R. Youngor.

*Commercial Attaché*.—Sir Francis Oppenheimer.

*Consul-General at Rotterdam*.—E. G. B. Maxse, C.M.G.

*Consul at Amsterdam*.—J. J. Broderick.

There are consular representatives at Bois le Duc, Delfzil, Dordrecht, Flushing, Groningen, Harlingen, Helder, Leeuwarden, Maastricht, Terneuzen, Tiel, Vlaardingen and Ymuiden.

### Colonies.

The colonial possessions of the Netherlands, situated in the East Indies and the West Indies, embrace an area of about 783,000 English square miles. The total population, according to the last returns (December 31, 1905), was, approximately, 38,000,000, or about seven times as large as that of the mother-country.

#### DUTCH EAST INDIES.

The Dutch possessions in Asia, forming the territory of Dutch East India (Nederlandsch Oost Indie), are situated between 6° N. and 11° S. latitude, and between 95° and 141° E. longitude.

In 1602 the Dutch created their East India Company. This Company conquered successively the Dutch East Indies, and ruled them during nearly two centuries. After the dissolution of the Company in 1798 the Dutch possessions were governed by the mother-country.

### Government and Constitution.

Politically, the territory, which is under the sovereignty of the Netherlands, is divided into (1) Lands under direct government; (2) Subject native States.

With regard to administration, the Dutch possessions in the East Indies are divided into residencies, divisions, regencies, districts, and *dessas* (villages). They are also very often divided into: (1) Java and Madura; (2) the Outposts—Sumatra, Borneo, Riau-Lingga Archipelago, Banca, Billiton, Celebes, Molucca Archipelago, the small Sunda Islands, and a part of New Guinea.

Java, the most important of the colonial possessions of the Netherlands, was formerly administered, politically and socially, on a system established by General Johannes Graaf Van den Bosch in 1832, and known as the 'culture system.' It was based in principle on the officially superintended labour of the natives, directed so as to produce not only a sufficiency of food for themselves, but a large quantity of colonial produce best suited for the European market. To-day, however, the old system no longer exists.

The whole of Java—including the neighbouring island of Madura—is divided into seventeen residencies, each governed by a Resident, assisted by several Assistant-Residents and a number of subordinate officials, called *Contrôleurs*. The Resident and his assistants exercise almost absolute control over the province in their charge; not, however, directly, but by means of a vast hierarchy of native officials. The Outposts are administered by functionaries with the titles of 'Governor,' 'Resident,' 'Assistant-Resident,' 'Contrôleur,' &c.

The superior administration and executive authority of Dutch India rests in the hands of a Governor-General. He is assisted by a Council of five members, partly of a legislative, partly of an advisory character. The

members of the Council, however, have no share in the executive. The Governor-General and the members of the Council are nominated by the Queen. In 1917, a "Volksraad" was installed to discuss the budget.

*Governor-General.*—Dr. J. P. Count van Limburg Stirum, appointed October 28, 1915.

The Governor-General represents not only the executive power of government, but he has a right of passing laws and regulations for the administration of the colony, so far as this power is not reserved to the legislature of the mother-country. However, he is bound to adhere to the constitutional principles on which the Dutch Indies are governed, and which are laid down in the 'Regulations for the Government of Netherlands India,' passed by the King and States-General of the mother-country in 1854, and altered many times since.

### Area and Population.

	Area: English square miles	Population 31 Dec. 1905 (Census)	Population 31 Dec. 1912 (Official estimate)
Java and Madura . . . . .	50,557	30,098,008	36,015,435
Sumatra, West Coast . . . . .	15,494	1,308,771 <sup>1</sup>	1,219,515 <sup>2</sup>

Approximate total <sup>6</sup> . . . . .	735,000	38,000,000	48,000,000

<sup>1</sup> Tolerably accurate.

<sup>2</sup> Approximate.

<sup>3</sup> Mere conjecture.

<sup>4</sup> Including West and South New Guinea.

<sup>5</sup> Including North New Guinea.

<sup>6</sup> The population of several countries, unexplored until 1905, is included in the estimate of 1912. Since 1905 no census has been taken. In 1918 a new census will take place.

The total number of Europeans and persons assimilated to them was, in 1905, 80,910; of these 38,812 males and 34,982 females were Dutch, of whom 32,026 males and 32,288 females were born in the East Indies; of the remainder, 1,406 were German, 184 French, 312 English, 197 Swiss, 315 Belgians. Of the remaining population about 563,000 were Chinese, 29,000 Arabs, and 23,000 other Orientals, and about 37,200,000 natives.

Marriages, births, and deaths among Europeans and persons assimilated to them:—

	Marriages		Births		Deaths	
	1913	1914	1913	1914	1913	1914
Java and Madura . . . . .	969	988	2,880	3,012	1,084	1,783
Outposts . . . . .	164	165	869	903	397	433

The population of the four principal towns of Java was:—

	Europeans	Natives.	Chinese.	Arabs.	Other Orientals.	Total.
Batavia (1915) . . . . .	18,000	99,320	28,150	2,058	246	138,551
Samarang (1905) . . . . .	5,126	76,413	13,636	698	787	96,660
Soerabaya (1915) . . . . .	15,000	119,733	19,503	2,660	306	156,752
Soerakarta (1905) . . . . .	1,572	109,524	6,532	337	413	118,378

The whole population of the colony is legally divided into Europeans and persons assimilated with them, and natives and persons assimilated with these. The former generally live under the same laws as the inhabitants of the mother-country, while in the government of the latter the Indian customs and institutions are considered. The Governor-General, however, is, in agreement with the Council, authorised to make individual exceptions to this rule.

### Religion.

Entire liberty is granted to all religious denominations. The Reformed Church counted, in 1915, 42 ministers and 23 assistants, the Roman Catholic 34 curates and 32 priests, not salaried out of the public funds. In 1915, about 400 missionaries of various societies were at work.

### Instruction.

For the education of Europeans and persons assimilated with them there were, in 1915, 10 public intermediate schools, with 2,075 pupils and 181 teachers. The cost to the Government in 1916 was 1,581,000 guilders. There are besides 5 private intermediate schools with 379 pupils and 59 teachers, on which in 1915 the Government spent 70,800 guilders.

In 1915 there were for Europeans 178 mixed public elementary schools and 21 for girls only (29 for Chinese only), with 36 private schools, a total of 264. The 228 public schools had a teaching staff of 1,675, and an attendance of about 30,000 pupils (10,000 natives and other orientals), and the 36 private schools a teaching staff of 234, and an attendance of 5,915 pupils. The cost of the elementary schools was, in 1915, 7,000,000 guilders. There are 3 public and 9 private normal schools for Europeans.

The following statement relates to schools for natives:—

The elementary schools for natives were, for Java and Madura, in 1915, 848 Government schools with 182,497 pupils, and 493 private schools with 47,086 pupils. In the Outposts in 1914, 429 Government schools with 75,799 pupils, and 2,047 private schools with 110,863 pupils. Besides, there

were 7 schools for native civil functionaries, with 857 pupils. There are 4,142 dessa-schools, with 280,486 pupils, where a very elementary instruction is given in the native tongue.

In 1915 the Government spent 7,961,234 guilders for the education of natives.

### Justice and Crime.

The administration of justice for Europeans is entrusted to European judges, while for natives their own chiefs have a large share in the trial of cases. There is a High Court of Justice at Batavia—courts of justice at Batavia, Samarang, Soerabaya, Padang, Medan and Makassar—Resident and Regent courts, district courts, and courts of priests for natives.

### Finance.

The local revenue is derived from land, taxes on houses and estates, from licences, customs duties, poll taxes, and a number of indirect taxes; from the Government monopolies of salt, pawnshops, and opium, railways, and from the sale of Government products.

Revenue and expenditure :—

Year	Revenue	Expenditure	Surplus or Deficit
	Guilders	Guilders	Guilders
1915	309,429,094	353,567,088	- 44,137,994
1916	323,763,348	367,318,225	- 43,554,877
1917	346,111,605	404,357,117	- 58,245,512

The sources of revenue in 1917 are stated as follows (in guilders):

Receipts in the Netherlands from sales of Government coffee, 572,117; cinchona, 699,186; rubber and gutta-percha, 1,824,825; tin, 26,427,000; railways, 300,000; share of the State in the profits of the Biliton Company, 1,625,000; various, 14,105,970. Receipts in India from sales of opium, 33,032,000; import, export, and excise duties, 41,764,000; land revenues, 22,038,000; sales of coffee, 1,449,850; sales of salt, 15,625,000; forests, 10,646,300; railways, 43,183,060; tax on trades, 13,400,000; coal, 7,244,700; income-tax, 14,200,000; from all other sources, 108,274,657.

### Defence.

The Dutch forces in the East Indies constitute a colonial army which is entirely separate from the home army. The colonial army consists of about one-quarter Europeans to three-quarters Natives, and comprises 31 battalions and 3 dépôt battalions of infantry, 4 machine-gun companies, 1 company of cyclist-soldiers, 5 squadrons, 1 dépôt squadron of cavalry, 4 field batteries, 4 mountain batteries, 10 fortress companies of artillery, and 4 field companies and 1 dépôt-company of engineering troops.

In most battalions there are 4 companies composed of Europeans and Natives; the officers, and a proportion of the non-commissioned officers, are Europeans. The artillery has European gunners and Native drivers. The Europeans and Natives are recruited by volunteers. The strength of the colonial army in 1916 was 1,139 officers and 38,196 men, of whom 8,657 were Europeans. There is also a small colonial reserve of both Europeans and natives, with an effective of 5,504 men, of whom 2,960 are natives,

Besides the Army there are different armed troops, viz. : (1) The Legion of the Native Prince Mangkoe Nagara, consisting of infantry and cavalry, numbering 790 men. In case of war this Legion would be placed at the disposal of the Government. (2) The Barisan, being a native infantry of Madoera, 1,483 men, designed to maintain peace in the island and to participate in campaigns in case of war. (3) The 'Schuttery,' being national guards residing in some of the larger places, designed to maintain peace and to assist in case of insurrection. These guards number 118 officers and 3,318 men, mostly Europeans, and a few natives. (4) The police-soldiers, numbering about 9,000 men.

The expenditure for defence (army and navy) estimated for 1917 amounts to 6,155,576*l.*, of which about 1,904,816*l.* will be spent in Holland.

The Netherlands Navy in the East Indies numbers 251 officers and 2,024 European and 1,331 native non-commissioned officers and sailors, and consists of 27 men-of-war. There is, besides, the Colonial Navy, consisting of 22 smaller ships with 168 Europeans and 738 natives, employed for civil service duties.

### Production and Industry.

The greater part of the soil of Java is claimed as Government property, and it is principally in the residencies in the western part of Java that there are private estates, chiefly owned by Europeans and by Chinese. The bulk of the people are agricultural labourers. Formerly the Government or private landowners could enforce one day's gratuitous work out of seven, or more, from all the labourers on their estates; in 1882 the greater part of these enforced services for the Government was abolished, in return for the payment of one guilder per head yearly, and the remainder were abolished in 1914 in return for an increased poll tax.

Area in Java and Madura cultivated regularly by natives, 1915, 13,687,509 acres. The various succeeded cultures (first and second) were as follows, in acres, in 1915: rice, 6,940,000; maize, arachis, cotton, and various plants, 7,712,000; sugar-cane, 433,000; tobacco, 427,000; indigo, 17,000; total, 15,529,000.

Owing to the 'agrarian law' (1870), which has afforded opportunity to private energy for obtaining waste lands on hereditary lease (emphyteusis) for seventy-five years, private agriculture has greatly increased, as well in Java as in the Outposts. In 1915 were ceded on lease in Java by the Government to 781 Companies and Europeans, 1,230,208 acres; to 88 Chinese, 67,650 acres; to 5 natives, 1,554 acres—total, 1,248,000 acres. In 1915, the lands, now the property of Europeans, had an extent of about 2,014,000 acres, of Chinese, about 314,000 acres, and of other foreign Orientals, about 23,400 acres.

The following table gives a comparison of the production of sugar for the last 3 years :—

—	1913	1914	1915
Planted area . . . acres .	365,111	339,951	438,872
Total production . . . tons .	1,431,854	1,363,380	1,843,304
Production per acre . . . do .	4.20	4.01	3.06
Factories . . . number .	190	188	187

The production of coffee in Dutch India was, for 4 years, as follows :—

— •	1912	1913	1914	1915
<b>Government—</b>	<b>Tons</b>	<b>Tons</b>	<b>Tons</b>	<b>Tons</b>
Java (Arabica) . . .	4,016	2,550	2,567	3,032
Liberia . . . . .	314	173	105	19
Robusta . . . . .	567	678	873	874
<b>Private—</b>				
Java (Arabica) . . .	10,826	7,158	8,079	19,009
Liberia . . . . .	3,273	2,590	1,731	973
Robusta . . . . .	15,295	21,681	24,627	29,375
<b>Total . . .</b>	<b>31,291</b>	<b>34,850</b>	<b>38,072</b>	<b>53,282</b>

The production of cinchona, in kilogrammes, in Java was as follows in 1915 :—877,303 on 7 government plantations, 6,090,561 on 76 estates on Emphyteusis, and 329,904 on 3 private estates, making a total of 7,297,768 kilos. The production of tobacco, in kilogrammes, was as follows in 1915 :—38,003,802 on 124 plantations in Java and 19,072,599 on 115 plantations in Sumatra : total 57,076,401 kilos.

The production of tea in Java, in kilogrammes, was as follows : 1911, 25,317,109 ; 1912, 29,412,704 ; 1913, 23,680,130 ; 1914, 29,893,603 ; 1915, 46,183,334.

The production of cacao in Java was (in kilogrammes) : 1911, 1,778,331 ; 1912, 2,272,953 ; 1913, 1,494,036 ; 1914, 1,186,282 ; 1915, 1,643,440.

The tin mines of Banca are worked by the Government ; those of Biliton and Riau by private enterprise. Their total yield was, in tons : 1911-12, 19,607 ; 1912-13, 20,219 ; 1913-14, 21,156 ; 1914-15, 20,526 ; 1915-16, 18,597.

The yield of the principal coal mines in Java, Sumatra and Borneo was, in tons : 1911, 609,416 ; 1912, 673,121 ; 1913, 565,432 ; 1914, 609,883 ; 1915, 631,676.

The production of the principal mineral oil enterprises was in thousands of kilogrammes : 1911, 1,714,353 ; 1912, 1,518,044 ; 1913, 1,526,938 ; 1914, 1,564,927 ; 1915, 1,643,503.

### Commerce.

No difference is made between Dutch and foreign imports and vessels. There is a tariff on certain goods ; on some articles there is a small export duty, including tobacco.

Imports and exports in guilders (12 guilders = £1) :—

Year	Government			Private			Grand Total
	Merchandise	Specie	Total	Merchandise	Specie	Total	
1913	27,021,000	4,419,000	31,440,000	437,903,000	23,998,000	461,901,000	493,341,000
1914	28,485,297	3,320,000	31,805,297	384,894,423	13,459,091	398,353,514	430,158,811
1915	17,759,971	3,050,000	20,809,971	373,620,181	6,275,610	381,895,791	402,705,762
<b>Exports</b>							
1913	57,231,000	—	57,231,000	620,504,000	6,211,000	626,715,000	683,946,000
1914	38,435,735	—	38,435,735	640,580,083	5,539,171	646,119,254	684,534,989
1915	11,868,091	715,650	12,583,741	759,235,131	192,232	759,427,363	772,011,104

The principal exports are sugar, coffee, tea, rice, indigo, cinchona, tobacco, copra, and tin. With the exception of rice, about one-half of which goes to Borneo and China, nearly four-fifths of these exports go to the Netherlands.

## Shipping and Communications.

Year		Entered		Whereof, from England :	
		Number	Tons	Number	Tons
1914	Steamers . . .	6,147	4,604,546	3,694	1,884,214
	Sailing vessels . .	3,531	223,070	2,892	188,510
1915	Steamers . . .	7,682	4,070,617	5,218	1,570,412
	Sailing vessels . .	3,872	225,900	3,213	197,119

At the end of 1915 the total length of railways (State and private) was about 1,787 miles (1,518 in Java and 269 in Sumatra); the gross receipts (1914) 41,859,000 guilders; working expenses, 23,342,000 guilders; number of passengers, 47,311,326.

The Government telegraphs extended in 1915 over 6,889 miles, the Government telegraph cables over 5,959 miles, together over 12,848 miles. The number of post and telegraph stations in 1915 was 553 for Java and Madoera, and 354 for the other islands, while the numbers of telegrams were 1,351,039 (internal) and 280,075 (foreign intercourse). Internal letters carried in 1915, 18,106,751, while there were 23,625,000 newspapers, &c., for the interior.

## Money and Credit.

The 'Java Bank,' established in 1828, has a capital of 6,000,000 guilders, and a reserve on March 31, 1916, of 2,761,132 guilders. The Government has a control over the administration. Two-fifths of the amount of the notes, assignats, and credits must be covered by specie or bullion. In March, 1916, the value of the notes in circulation was 144,882,260 guilders, and of the bank operations 77,882,000. There are some other Dutch banks, besides branches of British banks.

In the savings-banks, including the Postal savings-bank, there were in 1915, ±140,000 depositors, with a deposited amount of 22,000,000 guilders.

## Weights and Measures.

The *Amsterdamsch Pond.* = 1·09 lb. avoirdupois.

„ *Pikol* . . . = 133½ „ „

„ *Catty* . . . = 1½ „ „

„ *Tyengkak* . . . = 4 yards

The only legal coins, as well as the weights and measures, of Dutch India are those of the Netherlands.

## Consular Representatives.

*British Consul-General at Batavia.*—W. R. D. Beckett, C.M.G.

*Vice-Consul at Batavia.*—A. J. Martin.

*Vice-Consul at Samarang.*—E. T. Campbell.

*Vice-Consul at Sourabaya.*—H. H. Gervis Jackson.

*Vice-Consul at Makassar.*—S. P. Stephens.

*Vice-Consul at Medan.*—A. I. Mathewson.

*Vice-Consul at Balikpapan (Borneo).*—F. E. Jago.

## DUTCH WEST INDIES.

The Dutch possessions in the West Indies are (a) *Surinam*, or *Dutch Guiana*, and (b) the colony *Curaçao*.

## Surinam or Dutch Guiana.

Dutch Guiana or Surinam is situated on the north coast of S. America between 2 and 6° N. latitude, and 53° 50' and 58° 20' E. longitude, and bounded on the north by the Atlantic Ocean, on the east by the river Marowijne, which separates it from French Guiana, on the west by the river Corantyn, which separates it from British Guiana, and on the south by inaccessible forests and savannas to the Tumuc-Humac Mountains.

At the peace of Breda, in 1667, between England and the United Netherlands, Surinam was assured to the Netherlands in exchange for the colony of New Netherlands in North America, and this was confirmed by the treaty of Westminster of February, 1674. Since then Surinam has been twice in the power of England, 1799 till 1802, when it was restored at the peace of Amiens, and in 1804 to 1816, when it was returned according to the Convention of London of August 13, 1814, confirmed at the peace of Paris of November 20, 1815, with the other Dutch colonies, except Berbice, Demerara, Essequibo, and the Cape of Good Hope.

The administration and executive authority is in the hands of a governor assisted by a council consisting of the governor as president, a vice-president and three members, all nominated by the Queen. The Colonial States form the representative body of the colony. The members are chosen for 6 years by electors in proportion of one in 200 electors.

*Governor.*—G. Y. Staal.

Dutch Guiana is divided into thirteen districts.

Area, 46,060 English square miles; population (January 1, 1916) 88,750, exclusive of the negroes and Indians living in the forests. Capital, Paramaribo, 37,085 inhabitants.

Births and deaths for 3 years :—

	Births			Deaths		
	1913	1914	1915	1913	1914	1915
Males . . . .	1,423	1,370	1,518	1,200	940	870
Females . . . .	1,355	1,427	1,507	979	792	723
Total. . . .	2,778	2,997	3,025	2,179	1,732	1,593

There is entire religious liberty. At the end of 1915 the numbers of the different religious bodies were : Reformed and Lutheran, 10,157 ; Moravian Brethren, 26,136 ; Roman Catholic, 18,761 ; Jews, 882 ; Mohammedans, 11,559 ; Hindus, 17,633, &c.

There were, in 1915, 28 public schools with 3,679 pupils, and 40 private schools with 6,702 pupils. There is a Government normal school.

There is a court of justice, whose members are nominated by the Sovereign. There are three cantonal courts and two circuit courts.

The relations of the Government to pauperism are limited not only to subventions to orphan-houses and other religious or philanthropical institutions, but the Government itself maintains an almshouse.

The local revenue, derived from import, export, and excise duties, taxes on houses and estates, personal imposts, and some indirect taxes, is shown as follow for 4 years in thousands of guilders :—

—	Expenditure	Local Revenue	Subvention	—	Expenditure	Local Revenue	Subvention
1914	7,050	6,261	789	1916	4,177	3,147	1,030
1915	7,271	6,483	833	1917	4,818	3,198	1,620

The Dutch forces in Surinam consist of a civic guard and infantry, the latter containing, in 1915, 9 officers and 254 non-commissioned officers and men.

In 1915 sugar was produced to the amount of 14,747,100 kilogrammes ; cacao, 1,464,200 kilogrammes ; bananas, 446,900 bunches ; coffee, 609,700 kilogrammes ; rice, 5,280,200 kilogrammes ; maize, 1,867,900 kilogrammes ; rum, 1,693,500 litres ; and molasses, 112,000 litres.

In 1915 the export of gold, mostly alluvial, was 1,157,031 grammes, valued at 1,619,843 guilders. Gold production in 1915 was 910,682 grammes, and of balata 209,372 kilos.

In 1915 there entered 246 vessels of 209,418 tons, and cleared 244 ships of 209,911 tons.

Imports and exports for 6 years :—

Year	Imports	Exports	Year	Imports	Exports
	Guilders	Guilders		Guilders	Guilders
1910	7,424,698	8,345,447	1913	7,113,420	9,457,787
1911	8,273,590	9,201,669	1914	6,399,849	6,472,041
1912	7,494,042	8,435,447	1915	5,445,866	6,949,315

The communication between several districts of the colony is carried on by vessels and small steamers. A Colonial steamship service extends to British Guiana.

*Vice-Consul at Paramaribo and Cayenne.*—Rev. W. L. Kissack.

*Vice-Consul at Nickerie.*—Chr. Spence.

### Curaçao.

The colony of Curaçao consists of the following islands :—

—	Square Miles	Population, Dec. 31, 1915
Curaçao . . . . .	210	33,677
Bonaire . . . . .	95	6,592
Aruba . . . . .	69	9,204
St. Martin <sup>1</sup> . . . . .	17	3,202
St. Eustache . . . . .	7	1,431
Saba . . . . .	5	2,488
	403	56,754

<sup>1</sup> Only the southern part belongs to the Netherlands, the northern to France.

There is a Governor, assisted by a Council composed of a vice-president and three members, nominated by the Sovereign. There is also a Colonial

Council consisting of thirteen members nominated by the Sovereign. The different islands, except Curaçao, are under officials called 'gezaghebbers,' nominated by the Sovereign. In 1915 there were 49,444 Roman Catholics, 6,630 Protestants, 621 Jews. Schools in 1915 about 40 with about 6,222 pupils. In 1915, 1,215 births were registered, 208 marriages and 1,151 deaths.

The revenue is derived from import, export, and excise duties, taxes on land, and some indirect taxes. In the Budget for 1917 the revenue is estimated at 758,694 guilders, and the expenditure at 1,316,815 guilders; the difference is supplied by the mother-country.

The militia (Schutterij) of the Isle of Curaçao consisted at the end of 1915 of 17 officers and 390 men; the garrison of 7 officers and 193 men. In Aruba gold is being worked under concession.

The imports of Curaçao and the other islands in 1915 were valued at 4,665,431 guilders; the exports of Curaçao and the other islands at 2,338,413 guilders. The chief products are maize, beans, pulse, cattle, salt, and phosphate of lime.

There entered the ports of the different islands in 1915, 2,930 vessels of 837,848 tons.

*British Consul at Curaçao.*—J. Jesurun.

*Vice-Consul.*—J. H. Laing.

## NICARAGUA.

(REPÚBLICA DE NICARAGUA.)

### Constitution and Government.

THE Constitution of the Republic of Nicaragua is that which came into operation on April 5th, 1913. This is the same as was promulgated on March 12, 1912, with the exception of Articles 168 and 170. Previous constitution was that of March 30, 1905. It vests the legislative power in a Congress of two houses consisting of 40 deputies, elected for 4 years by universal suffrage, and 13 Senators. The Executive power is with a President appointed for 4 years.

*President.*—General Emiliano Chamorro. (Inaugurated January 1, 1917. Term of office expires December 31, 1920.)

The President exercises his functions through a council of responsible ministers, composed of the heads of the departments of Foreign Affairs and Public Instruction; Finance; Interior, Justice, and Police; War, and Marine; Public Works.

The Republic is divided into 13 departments and 2 comarcas, each of which is under a political head, who has supervision of finance, instruction and other matters, and is also military commandant. The Mosquito Reserve now forms a department named Bluefields. The Indians in this region were long under the protection of Great Britain; but under the treaty of April 19, 1905 (ratified August 24, 1906), the treaty of 1860 was abrogated, and Great Britain agreed to recognise the absolute sovereignty of Nicaragua over the territory.

The judicial power is vested in a supreme Court of Justice, three chambers of second instance, and judges of inferior tribunals.

On February 18, 1916, a treaty between Nicaragua and the United States was ratified, under which the United States in return for 3 million dollars acquires the canal route through Nicaragua and also a naval base in the Bay of Fomesca on the Pacific coast and Corn Island on the Atlantic coast. Ratified by Nicaragua on April 7, 1916.

### Area and Population.

Area estimated at 49,200 English square miles, and it has a coastline of about 300 miles on the Atlantic and of about 200 miles on the Pacific. The estimated population on December 31, 1914, was 703,540, as against 689,891 on December 31, 1913. At least 75 per cent. of the inhabitants live in the western half of the country. The two halves of the Republic differ greatly in many respects and there is little communication between them, the journey by trail and river being so slow and difficult that passengers usually go by way of Costa Rica, while the small amounts of merchandise shipped from one side to the other are sent mainly by way of Panama.

The people of the western half of the Republic are principally of mixed Spanish and Indian extraction, though there are a considerable number of pure Spanish descent and many Indians. The population of the eastern half is composed mainly of Mosquito and Zambo Indians and negroes from Jamaica and other islands of the Caribbean, with some Americans and a comparatively small number of Nicaraguans from the western part of the Republic.

There are within the Republic 105 municipalities of which 28 have from 2,000 to 30,000 inhabitants. The capital of the Republic and seat of

government is the town of Managua, situated on the southern border of the great lake of the same name, with 34,872 inhabitants. Leon, formerly the capital, has a population of 62,569; Granada, 17,092; Matagalpa, 15,749; Masaya, 13,023; Jinotega, 13,899; Chinandega, 10,542; Esteli, 8,281; Matapa, 8,279; Somoto, 8,182; Boaco, 10,581; Jinotepe, 9,317; Bluefields, 4,706. Other towns are Corinto, and San Juan del Sur on the Pacific.

### Religion and Instruction.

The prevailing form of religion is Roman Catholic. In 1914 the Republic was divided into two archbishoprics (Managua and Leon) and two bishoprics (Granada and Matagalpa).

There are about 356 elementary schools, ten colleges and two universities (at Leon and Managua). Also two schools of telegraphy, at Managua and Granada.

A national Industrial, Commercial, and scientific Museum has been established at Managua.

### Finance.

Revenue and expenditure for 5 years :—

—	1910	1911	1912	1913	1915-16
	£	£	£	£	£
Revenue . . .	506,095	800,000	843,718	764,431	441,020
Expenditure . .	1,152,437 <sup>1</sup>	800,000	887,100	765,275	440,705

<sup>1</sup> Ordinary expenditure, 401,761; extraordinary, on account of revolution of 1909, 750,676.

A five (formerly six) per cent. loan for 1,250,000*l.* was issued in 1909 for the construction of railways, &c., and for conversion purposes. Of this 70,380*l.* has been redeemed. Total debt, December 31, 1916, 1,179,620*l.* The internal debt amounted to 10,000,000 cordobas in September, 1916.

### Defence.

The active army consists of 2,000 men; in war it may rise to 7,000. Military service is obligatory between 17 and 55 years of age. The period of active service is a year. The marine consists of one very small boat, on the Pacific coast, capable perhaps of carrying a machine gun and 25 men.

### Production and Industry.

The agricultural, timber and mining industries are the principal sources of national wealth. The area of cultivation in Nicaragua has extended in recent years and would probably extend still further but for the scarcity of labour. The banana is the principal agricultural product of the eastern part of the Republic, but the banana industry suffered severely during the last two years on account of disease probably due to overworked soil. This disease extends down and includes the Atlantic seaboard of Costa Rica. Coconuts are also of some importance, and a few plantains, oranges, and pineapples, and some yucca are raised. The products of the western half are much more varied, the most important being coffee, sugar cane, cacao, corn, and beans. With the exception of bananas, plantains, and yucca or cassava, the greater part of the food supply of the eastern section is imported from the United States. The western half of the country produces much of its own food, and occasionally exports small quantities of beans, corn, cheese, lard, and sugar to the neighbouring Republics.

The forests contain mahogany and cedar, which are largely exported

many valuable timber trees, dye-woods, gums, and medicinal plants. They are worked both from the Atlantic and Pacific, but statistics of the timber cut are incomplete.

There are 1,200,000 cattle in Nicaragua.

There are several gold mines, worked by American and British companies, one having also silver. The gold export amounted in 1915 to 187,052*l*. The mines towards the east coast in Mico, Tunkey, Cuicuína and Pizpiz districts are showing increased activity. Copper, coal, oil, and precious stones are also found.

### Commerce.

The foreign trade of Nicaragua was as follows in 5 years :—

—	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . .	1,144,939	999,364	1,154,001	826,865	631,843
Exports . . .	1,243,372	682,242	1,642,409	991,010	913,440

The customs receipts in 1916 were 204,344*l*.; in 1915, 157,943*l*.

In 1915 the principal exports were :—20,128,133 lbs. of coffee ; 1,105,648 bunches of bananas ; 965,436 coconuts ; and 227,818 lbs. of cocoa. France and Costa Rica are the principal markets for Nicaraguan coffee.

Trade by principal countries :—

—	Imports		Exports	
	1914	1915	1914	1915
	£	£	£	£
United States . . . . .	529,148	518,560	500,637	615,962
United Kingdom . . . . .	148,095	60,459	75,683	87,700
France . . . . .	52,393	27,643	238,453	120,137
Germany . . . . .	80,703	7,392	115,620	—

A treaty of commerce between Great Britain and Nicaragua, signed at Managua in July, 1905, and ratified at London on August 14, 1906, provides mutually for the most favoured nation treatment, except that Nicaragua may accord certain advantages to other Central American States.

Total trade between Nicaragua and United Kingdom (Board of Trade returns) for 5 years :—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Nicaragua to U.K. . .	71,717	117,296	59,105	146,990	18,987
Exports to Nicaragua from U.K. . .	200,339	242,677	180,170	74,020	132,561

### Shipping and Communications.

Western Nicaragua has two seaports, Corinto and San Juan del Sur, through which pass approximately 64 per cent. of the imports and 86 per cent. of the exports of the Republic. The eastern ports are Bluefields, Cape Gracias a Dios, Las Perlas (Pearl Lagoon), and San Juan del Norte (Greytown).

There are few good roads in the country, but contracts have recently been

made for roads and transport from Momotombo to Matagalpa, 79 miles, and for 3 roads leading respectively from Matagalpa, from New Segovia, and from the Pipiz mines in the Cape Gracias district to the head of steamboat navigation on the Cuco Wanks river, about 160 miles from its mouth. For the repairing and making of roads a tax varying from 1 peso (about 22*d.*) to 10 pesos is imposed on all male inhabitants over 18 years of age.

The Pacific Railroad of Nicaragua is the only line in the republic, having a total length of 171 miles. The line runs from Corinto to Leon, Managua, Granada, and Diriamba, with branches to El Viejo and Monotombo. Various other railways have been contracted for. On June 28, 1916, formal approval of the agreement between the Nicaraguan Government and the Pacific Railroad Co. of Nicaragua has been given by both houses of the Nicaraguan Congress. Under the terms of this agreement the railroad company, which is financed in New York City, will construct and operate a railway from the Atlantic coast to the present Pacific railway system of Nicaragua or to the steamship lines owned by the same company. There are 20 miles of private railway on the Atlantic coast near the Rio Grande, and, on the west side of Lake Nicaragua, 3 private steam tramways aggregating 3 miles in length.

The steamers running on the San Juan river and on the lakes now belong to the Government, as well as steamers for traffic on the Atlantic and Pacific coasts. The national railways have been sold to an American company for two million dollars, 51 per cent. of stock being owned by Brown Bros. and J. W. Seligman and Co. of New York, and 49 per cent. by the Government, but held on escrow by American bankers for a loan of 1,060,000 dollars due.

There are 135 post offices. From September 1, 1910, to August 31, 1912. the inland correspondence by post numbered 15,695,902 pieces, comprising : ordinary letters, 3,902,269 ; official letters, 659,014 ; postcards, 174,357. Of the total, 10,403,125 pieces were received, and 5,284,968 were dispatched. In the same period 28,011 packets were handled ; telegrams received numbered 577,698, and transmitted 615,256 ; conversations by telephone numbered 47,557. There are 3,637 miles of telegraph wire, and 130 offices ; also 805 miles of telephone wire and 29 telephone stations.

The Government has contracted for the installation of wireless telegraph stations at Managua, Granada, San Carlos, San Juan del Norte and Castillo.

### Money, Weights, and Measures.

The National Bank of Nicaragua, with a capital of over 100,000 dollars, was established in Managua in 1912. Other banks are the Commercial Bank of Spanish America and the Anglo Central American Commercial Bank, Ltd.

In 1912 a new monetary unit was introduced, the gold *cordoba*, equivalent to the American dollar, containing 1·672 gr. of gold nine-tenths fine, and divided into 100 equal parts. Other gold coins are 10, 5 and 2½ cordobas, but no gold coins have ever been struck. As the National Bank suspended the sale of gold drafts on the United States in October, 1914, the monetary reform has fallen to pieces, as there is presumably no gold reserve at all behind the circulation of 2 million paper cordobas. No statements are published either by the Bank or by the Government, and very little silver is in circulation. The country again has an unconvertible paper currency, and exchange keeps at 2 to 5 per cent. on account of general shortage of currency.

The silver coins are the silver cordoba, containing 25 grammes of silver nine-tenths fine ; the half and quarter cordoba ; 10 cents, a coin containing 2½ grammes of silver eight-tenths fine ; 5 cents, a coin three-quarters of copper and one of nickel : 1 cent, ninety-five parts of copper and 5 of zinc ;

$\frac{1}{2}$  cent, in same proportion. 300,000 dollars' worth of cordobas in silver were coined at Birmingham in 1912. There are also paper cordobas.

Since January 7, 1893, the metric system of weights and measures has been in use.

## Diplomatic and Consular Representatives.

### 1. OF NICARAGUA IN GREAT BRITAIN.

*Envoy and Minister.*—Vacant.

*Consul-General (in Manchester).*—Jorge Lacayo.

There are Consular Representatives at London, Birmingham, and Nottingham.

### 2. OF GREAT BRITAIN IN NICARAGUA.

*Minister and Consul-General.*—C. Alban Young, M.V.O. (resident at Guatemala).

*Consul at Bluefields.*—A. C. Lawder.

*Vice-Consul at Managua and Acting-Consul-General for Nicaragua.*—General A. J. Martin, F.R.G.S.

There are Vice-Consuls at Managua, Matagalpa and Corinto.

## NORWAY.

(NORGE.)

### Reigning King.

**Haakon VII.**, born August 3, 1872; the second son, Carl, of Frederik, King of Denmark, elected King of Norway by the Storting, November 18, 1905; accepted the crown through his grandfather, the late King Christian of Denmark, November 18, 1905; landed in Norway November 25, 1905; married, July 22, 1896, to Princess *Maud*, born November 26, 1869, the third daughter of the late Edward VII., King of Great Britain and Ireland.

*Son.*—Prince *Olav*, Crown Prince, born July 2, 1903.

According to the Constitution, Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

By Treaty of January 14, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederick of Denmark as their King. The foreign Powers refused to recognise this election, and on August 14 a convention was made proclaiming the independence of Norway in union with Sweden. This was followed on November 4 by the election of Karl XIII. as King of Norway. Norway declared this union dissolved, June 7, 1905, and after some months' negotiation, a mutual agreement for the repeal of the union was signed, October 26, 1905. The throne of Norway was offered to a prince of the reigning house of Sweden, but declined, and, after a *plébiscite*, Prince Carl of Denmark was formally elected King. In October, 1907, a treaty guaranteeing the integrity of Norwegian territory was signed at Kristiania by the representatives of Norway, Great Britain, France, Germany, and Russia, and on January 8, 1908, received the unanimous approval of the Storting.

The following is a list of the Sovereigns of Norway since the year 1204, with the date of their accession.

Inge Baardssøn . . . . .	1204	Erik af Pommern . . . . .	1389
Haakon Haakonsson . . . . .	1217	Kristofer af Bayern . . . . .	1442
Magnus Lagabøtter . . . . .	1263	Karl Knutssøn . . . . .	1449
Erik Magnusson . . . . .	1280	Same Sovereigns as in Denmark	
Haakon V. Magnusson . . . . .	1299		1450-1814
Magnus Eriksson . . . . .	1319	Kristian Fredrik . . . . .	1814
Haakon VI. Magnusson . . . . .	1355	Same Sovereigns as in Sweden	
Olav Haakonsson . . . . .	1381		1814-1905
Margræta . . . . .	1388	Haakon VII. . . . .	1905

The King has a civil list of 700,000 kroner, or 38,546*l*.

### Constitution and Government.

The Constitution of Norway, called the Grundlov, bears date May 17, 1814, with several modifications passed at various times. It vests the legislative power of the realm in the Storting, the representative of the sovereign people. The royal veto may be exercised twice; but if the same bill pass three Stortings formed by separate and subsequent elections, it becomes the law of the land without the assent of the sovereign. The King

has the command of the land and sea forces, and makes all appointments, but, except in a few cases, is not allowed to nominate any but Norwegians to public offices under the crown.

The Storting assembles every year. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first weekday after January 10 each year, and must receive the sanction of the King to sit longer than two months. Every Norwegian citizen of twenty-five years of age (provided that he resides and has resided for five years in the country) is entitled to elect, unless he is disqualified from a special cause, for instance, actual receiving of parish relief. Women are, since 1913, entitled to vote under the same conditions as men, and since 1915 are eligible as members of the Council of State. The mode of election is direct. Every third year the people choose their representatives, the total number being 123 (forty-one from towns, and eighty-two from rural districts). The country is divided into districts, each electing one representative. Representatives must not be less than thirty years of age, must have resided in Norway for ten years, and be voters in the district from which they are chosen. Former members of the Council of State can be elected representatives of any district of the Kingdom without regard to their residence. At the election in 1915 the number of electors was 1,134,349, or 45·16 per cent. of total population, while 671,293 votes, or 59·18 per cent. of the whole number, were recorded.

Storting (1915): Liberals 78, Conservatives 21, Socialists 24.

The Storting, when assembled, divides itself into two houses, the 'Lagting' and the 'Odelsting.' The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. The Ting nominates its own presidents. Questions relating to laws must be considered by each house separately. The inspection of public accounts and the revision of the Government, and impeachment before the Rigsret, belong exclusively to the Odelsting. All other matters are settled by both houses in common sitting. The Storting elects five delegates, whose duty it is to revise the public accounts. All new laws must first be laid before the Odelsting, from which they pass into the Lagting to be either accepted or rejected. If the Odelsting and Lagting do not agree, the two houses assemble in common sitting to deliberate, and the final decision is given by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution. The Lagting and the ordinary members of the supreme court of justice (*Höiesteret*) form a high court of justice (the *Rigsret*) for the impeachment and trial of Ministers, members of the Höiesteret, and members of the Storting. Every member of the Storting has a salary of three thousand kroner per annum, besides travelling expenses.

The executive is represented by the King, who exercises his authority through a Council of State, composed of one Minister of State and at least seven Councillors. Minister and Councillors of State are entitled to be present in the Storting and to take part in the discussions, when public, but without a vote. The following are the members of the Council of State, appointed January 31, 1913.

#### MINISTER OF STATE.

President of the Council.—Gunnar Knudsen.

#### COUNCILLORS OF STATE.

*Ministry for Foreign Affairs.*—M. Ihlen.

*Ministry for Finance.*—M. Omholt.

*Ministry for Social Affairs.*—M. Abrahamsen.

*Ministry for Justice.*—M. Blehr.

*Ministry for Commerce, Navigation, Industry, and Fishery.*—M. Friis-Petersen.

*Ministry for Agriculture.*—The President of the Council.

*Ministry for Defence.*—General Holtfodt.

*Ministry for Worship and Instruction.*—M. Løvland.

*Ministry for Labour.*—M. Nalūm.

*Ministry for Provisioning.*—M. Vik.

*Ministry for Industrial Supplies.*—M. Prytz.

## II. LOCAL GOVERNMENT.

The administrative division of the country is into twenty districts, each governed by a chief executive functionary (Amtmand), viz., the town of Kristiania and Bergen, and 18 'Amter' (counties). There are 42 towns, 22 'Ladesteder,' and 626 rural communes (Herreder), mostly parishes or sub-parishes (wards). The government of the Herred is vested in a body of representatives (from 12 to 48), and a council (Formænd), elected by and from among the representatives, who are four times the number of the 'Formænd.' The representatives elect conjointly every third year from among the 'Formænd' a chairman and a deputy chairman. All the chairmen of the rural communes of an Amt form with the Amtmand the 'Amtsting' (county diet), which meets yearly to settle the budget of the Amt. The towns and the ports form 62 communes, also governed by a council (5 to 21), and representatives (four times the size of the council). The members of the local governing bodies are elected under the same conditions as those of the Storting. Since 1910 women are entitled to vote and to be elected, under the same conditions as men.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

Amt	Area : English square miles	Population Dec. 3, 1900	Population Dec. 1, 1910	Pop. per square mile 1910
Kristiania (town) . .	6.4	227,626	241,834	37,786.5
Akershus . .	2,020.8	116,228	128,042	63.4
Smaalenene . .	1,599.6	136,886	152,306	95.2

Søndre Bergenhus . .	6,024.1	135,752	146,006	24.2
Bergen (town) . .	5.2	72,251	76,867	14,782.1
Nordre Bergenhus . .	7,133.9	89,041	90,040	12.6
Romsdal . .	5,786.2	136,137	144,622	25.0
Søndre Trondhjem . .	7,184.4	135,382	148,306	20.6
Nordre Trondhjem . .	8,683.1	83,433	84,948	9.8
Nordland . .	14,917.4	152,144	164,687	11.0
Tromsø . .	10,131.0	74,862	81,902	8.1
Finmarken . .	18,366.2	32,952	38,065	2.1
Total . .	124,642.9	2,240,032	2,391,782	19.2

In 1910 there were 1,155,673 males, and 1,236,109 females.  
 Conjugal condition of the present population, 1910:—

—	Unmarried	Married	Widowed	Divorced	Not stated
Males . . .	713,318	364,642	41,778	769	2,653
Females . .	755,187	382,679	94,128	1,380	1,256

In 1910, 1,702,554 were domiciled in rural districts, and 689,228 in towns. Of the population in 1910 2,296,344 were born in Norway, 38,647 in Sweden, 1,832 in Finland, 2,986 in Germany. In 1910 the number of Laps was 18,590, and of Fins, 7,172.

For the distribution of the population above the age of 15, divided according to occupation and according to the 1910 census, *see* THE STATESMAN'S YEAR-BOOK for 1916, p. 1192.

## II. MOVEMENT OF THE POPULATION.

### 1. Births, Deaths, and Marriages.

Year	Marriages	Births (exc. still-born)	Stillborn	Illegitimate, living	Deaths (exc. still-born)	Excess of Births
1911	14,826	61,468	1,399	4,154	31,278	30,190
1912	14,797	61,151	1,430	4,080	32,219	28,932
1913	15,262	61,037	1,364	4,360	32,009	29,028
1914	15,773	61,849	1,374	4,406	32,928	28,921
1915	15,900	58,600	1,500	4,200	32,800	25,800

### 2. Emigration.

Place of Destination	1909	1910	1911	1912	1913	1914	1915
United States . . .	15,237	17,361	11,122	7,776	8,568	7,723	4,388
British North America . .	880	1,518	1,304	1,287	1,281	775	169
Other Non-European countries . . .	35	33	51	42	27	24	15
Total . . .	16,152	18,912	12,477	9,105	9,876	8,522	4,572

## III. PRINCIPAL TOWNS.

At the census taken December 1, 1910, the number of towns with a population of above 100,000 was one, above 20,000 four, above 10,000 ten, above 5,000 seven. The population of the principal towns, December 1, 1910, was:—

Kristiania . . .	241,834	Kristiansand . . .	15,291	Aalesund . . .	13,858
Bergen . . .	76,867	Fredrikstad . . .	15,597	Skien . . .	11,856
Trondhjem . . .	45,335	Kristiansund . . .	13,201	Sarpsborg . . .	10,542
Stavanger . . .	37,261	Haugesund . . .	12,987	Arendal . . .	10,315
Drammen . . .	24,895	Fredrikshald . . .	11,992	Larvik . . .	10,105

## Religion and Instruction.

The evangelical Lutheran religion is the national Church and the only one endowed by the State. Its clergy are nominated by the King. All religions (except Jesuits) are tolerated. Ecclesiastically Norway is divided

into 6 *Stifter* (bishoprics), 86 *Proustier* (provostships, or archdeaconries), 505 *Prestegjeld* (clerical districts). In 1910 there were 62,553 dissenters, including 2,046 Roman Catholics, 10,986 Methodists, 7,659 Baptists, 714 Mormons, 143 Quakers. The Roman Catholics are under a Vicar Apostolic resident at Kristiania.

Education is compulsory, the school age being from six and a half in towns and seven in the country to fourteen. In 1913 (the latest date for which there are statistics) there were in the country 5,978 public elementary schools with 283,364 pupils, and in towns 3,286 classes with 98,431 pupils; the amount expended on both being 23,287,454 kroner, of which 6,391,773 kroner was granted by the State, the rest being provided locally. There are 89 secondary schools: 14 public, 53 communal, 25 private, with 21,574 pupils, in 1913-14. Most of the secondary schools are mixed, 10 are for girls alone, all private. Besides these, 106 communal and private schools have 7,341 pupils. There were in 1913, 6 public normal schools and 4 private, with 1,399 students. Kristiania has a University, attended in 1914 by 1,500 students. In the financial year 1914-15 it had its own income, 413,700 kroner, and a State subsidy of 1,044,950 kroner.

There are 10 schools for abnormal children, deaf, blind, and feeble-minded. There are 9 reformatory schools for neglected children. In one of these schools there is a special division for children of the age of 9 to 21 years who need rigorous treatment; in the rest children of the age of 9 to 18 years, are received. The number of children in reformatories on September 30, 1915, was 374 boys and 99 girls. There are, besides, 4 communal compulsory schools, established mainly for children neglecting the ordinary school.

### Justice and Crime.

For civil justice Norway is divided into 108 districts, each with an inferior court. There are 3 superior courts, having each one chief justice and two other justices, and one supreme court for the whole kingdom (*Høiesteret*), consisting of 1 president and at least 6 other justices. There is a court of mediation (*Forlikskommission*) in each town and *Herred* (district), consisting of two men chosen by the electors, before which, as a rule, civil cases must first be brought.

According to the law of criminal procedure of July 1, 1887, all criminal cases (not military, or coming under the *Rigsret*—the court for impeachments) shall be tried either by jury (*Lagmandsret*), or *Meddomsret*. The *Lagmandsret* consists of three judges and 10 jurors. The Kingdom is divided into 4 jury districts (*Lagdømmer*), each having its chief judge. Each district is divided into circuits, in which courts are held at fixed times. The *Meddomsret* consists of the judge and is held in the district of the inferior court, and 2 assistant judges (not professional) summoned for each case. The *Lagmandsret* takes cognisance of the higher classes of offences, and is also a court of appeal. The *Meddomsret* is for the trial of other offences, and is also a court of first instance.

There are four convict prisons; inmates, June 30, 1916, 408 males and 18 females. There are 148 local prisons, in which were detained, June 30, 1916, 600 males and 50 females.

### Pauperism.

The relief of the poor is mostly provided for by local taxation by the State. The number of persons receiving relief amounted to 78,599 in 1914.

### Finance.

Revenue and expenditure in thousands of kroner (18 kroner = 1l.):—

Years ending June 30	Revenue.				Expenditure				
	Direct Taxes	Indirect Taxes	Other Sources	Total	Defence	Debt	Public Works	General	Total
1913	1,000 kr.	1,000 kr.	1,000 kr.	1,000 kr.	1,000 kr.	1,000 kr.	1,000 kr.	1,000 kr.	1,000 kr.

<sup>1</sup> Neutrality expenditure not included (estimated at about 2,000,000 kr. per month).

For 1917-18 the ordinary budget balanced at 237,500,000 kroner, and the extraordinary budget at 30,722,875 kroner.

The public debt:—

Years ending June 30	Amortisation	Growth	Interest	Amount at the end of the year
	Kroner	Kroner	Kroner	Kroner
1913	5,062,064	5,000,000	12,589,000	362,743,499
1914	5,379,037	—	12,411,000	357,394,462
1915	5,156,710	69,086,000	12,851,000	421,323,752

The taxation for communal purposes amounted for the rural communes to 28,809,200 kroner, and for the towns to 36,359,300 kroner in 1914-15.

### Defence.

The most important fortresses of Norway are Oscarsborg and the new fortresses near Agdenes, Bergen, Tönsberg and Kristiansand; the other fortresses, Karljohansvaern, Akershus in Kristiania, Bergenshus in Bergen, Munkholmen near Trondhjem, and Vardöhus, are of little importance.

### ARMY.

The army of Norway is a *national militia*. Service is universal and compulsory, liability commencing at the age of 18, and continuing till the age of 55. The men are called out at 21, and for the first 12 years belong to the line; then for 12 years to the landvärn. Afterwards they pass to the landstorm, in which they remain until they have attained 55 years of age. The initial training is carried out in recruits' schools; it lasts for 90 days in the infantry, garrison artillery, the mountain batteries and in the engineers, 92 in the field artillery, and 102 in the cavalry. As soon as their courses are finished the men are passed to the units to which they will permanently belong, and with them go through a further training of 30 days. Subsequent training consists of 30 days in the second, third and seventh years of service.

The line is now organised in 6 divisions of all arms, besides which there is the garrison artillery. There are 65 battalions of infantry, 5 companies of cyclists (skiers), 3 regiments of cavalry (16 squadrons), 27 four-gun field batteries, 3 batteries of mountain artillery, 9 batteries of heavy artillery, and 1 regiment and 2 battalions of engineers. The divisions are of unequal strength, according to the importance of the district in which they are recruited. In event of war, each division would mobilize 2 or 3 regiments of infantry (of 4 battalions), 3 or 4 squadrons of cavalry, a battalion of field artillery (of 3 batteries), a battalion of heavy artillery, a sapper company, a telegraph company, a medical company and a company of train. Each regimental district also forms one battalion of landvärn of 6 companies, and the other arms would form landvärn units in the same proportion. The total strength of the line, on a war footing, is 80,000 of all ranks, which would be increased by means of the landvärn to 110,000.

The Norwegian infantry is armed with the Krag-Jørgensen rifle of 6·5 mm. The field artillery has Erhardt Q.F. guns of 7·5 cm.

The budget of the army for 1916-17 is 1,450,000l.

NAVY.

The principal vessels of the Norwegian navy are:—

Laid down	Name	Displacement	Armour		Principal Armament	H. P.	Max. Speed
			Belt	Big Guns			
1896	(H. Haarfaagre Tordenskiold . . . .)	3,900	7	8	2 Sin.; 6 4.7in.	4,500	17
1899	(Norge Eidsvold . . . . .)	4,200	6	9	2 Sin.; 6 6in.	5,200	17

There are also 2 old coast service monitors, 10 gunboats, 5 destroyers, 27 torpedo boats and 5 submarines.

The navy numbers about 190 officers on active service and about 160 in the reserve, and about 1,000 petty officers and seamen on permanent engagement. All seafaring men between the ages of twenty and forty-four are enrolled on the lists of the active fleet, and are liable to the maritime conscription. The conscripts (about 1,000) have to go through a training of at least 12 months.

Production and Industry

I. AGRICULTURE.

Of the total area, 75 per cent. is unproductive, 21.5 per cent. forest, and 3.5 per cent. under cultivation. On September 30, 1907, there were 188,366 real estates separately registered, and the number of farms was 246,634. The 246,634 farms were classified as follows according to their cultivated area:—

Without cultivated area (not including gardens).	20,839
Up to 2 hectares „	142,930
2.01-10 „	65,904
10.01-50 „	16,590
Above 50 „	371

246,634

The 33,557 farms without cultivated area are most of them special estates of gardens, and not cultivated meadow land.

The average annual produce in hectolitres per hectare for 1911-1915 was: wheat, 23.1; rye, 25.0; barley, 30.2; mixed corn, 35.5; oats, 36.7; peas, 20.8; potatoes, 273.2 hectolitres.

The acreage and products of the principal crops for 3 years were as follows:

Crops	Acreage			Produce (quarters)		
	1913	1914	1915	1913	1914	1915
Wheat	12,415	12,415	13,608	39,376	32,669	34,531
Barley	89,408	89,408	97,213	387,884	298,317	324,826
Oats	269,605	269,605	306,016	1,421,392	969,197	1,219,576
Rye	37,471	37,471	48,205	117,898	126,749	100,467
Mixed Corn	15,140	15,140	15,269	81,206	55,464	67,412
Potatoes	103,933	103,933	113,454	27,780,994 <sup>1</sup>	27,541,009 <sup>1</sup>	19,940,686 <sup>1</sup>
Hay	—	—	—	3,071,782 <sup>2</sup>	2,937,342 <sup>2</sup>	2,606,816 <sup>2</sup>

<sup>1</sup> Bushels

<sup>2</sup> Tons.

On September 30, 1916, there were:—Horses, 189,296; cattle, 1,119,875; sheep, 1,282,271; goats, 229,981; swine, 221,146.

The value of cereals imported (including flour) was 74,224,600 kroner in 1914; the principal articles being rye, barley and wheat flour. The imports of animal products amounted to 17,584,500, and their exports to 125,154,300 kroner.

## II. FORESTRY.

The total area covered with forests is estimated at 26,685 square miles, of which 75 per cent. is under pine trees. The State forests occupy about 3,060 square miles, administered by a forest staff under the supervision of the Ministry of Agriculture. The value of unwrought or partly wrought timber exported from Norway in 1914 was 31,829,400 kroner, and of wrought timber (mostly wood pulp) 53,179,000 kroner.

## III. MINES AND MINERALS

The total value of mineral products in 1914 was 22,724,900 kroner (6,706,500 in 1904); of furnace products, 6,905,000 kroner (2,190,000 in 1904). The chief mineral products are silver, 910,000 kroner in 1914 (570,000 in 1904); copper ore, 2,697,000 kroner; pyrites, 9,495,000 kroner; iron ore, 8,460,000 kroner; felspar, 465,900 kroner (312,500 in 1904); nickel ore, 487,000 kroner. Of the smelting products in 1914, silver was valued at 865,000 kroner; copper, 3,570,000 kroner; nickel, 2,180,000 kroner. At the end of 1914 there existed about 64 mining establishments employing 6,556 workpeople, and 10 smelting furnaces with 560 workpeople.

## IV. FISHERIES.

The number of persons in 1914 engaged in cod fishery was 94,239; in summer-herring fishery, 18,443; and in mackerel fishery, 3,898.

The value of the fisheries in kroner in 1914 was cod, 33,857,571; herring, 16,149,527; mackerel, 2,636,897; salmon and sea trout, 1,226,172; other fisheries, 6,283,566; lobsters, 560,664; total, 60,714,397.

Other fisheries are the cod and herring fisheries on the coast of Island, and the whale, walrus, seal, and shark fisheries which in 1914 produced a total of about 37,413,200 kroner.

## V. MANUFACTURES.

The numbers of establishments and workers in the principal industries on December 31, 1914, were as follows:—

Industries	Estab- lish- ments	Workers over 18 years		Workers under 18 years		Total
		Male	Female	Male	Female	
Chemicals, paints, oils, and soaps	335	6,813	1,498	418	225	8,954

Portugal & Madeira . . . . .	4,612,000	8,926,100			
Spain . . . . .	22,364,400	12,640,500	Total . . . . .	867,967,800	676,759,800

The total amount of the import duties collected in 1915 was 53 millions, of kroner. The value of imports subject to duty (1915) was 352,994,000 kroner and of duty-free 514,974,000 kroner.

Under the treaty of 1826 there is the "most favoured nation" treatment between the United Kingdom and Norway.

The recorded values are calculated according to information supplied by Exchange Committees and merchants. Those of imports include the invoice price, freight, packing, and insurance, but not duty; those of exports give the price free on board in Norwegian port, excluding freight and insurance, but including packing and Norwegian commercial profit. The returns of quantities are compiled from the officially controlled declarations of importers and exporters. These declarations stated prior to 1909 the countries from which the articles were *directly* imported and to which they were *directly* exported. An article coming, for example, from the East Indies *via* London was recorded as coming from England. From January 1, 1909, the declarations state the countries from which the articles are bought and to which they are sold. The recorded imports include all articles imported, whether for consumption inland or for re-exportation, but not the direct transit goods. The exports are divided into exports of Norwegian articles (special trade) and exports of foreign articles.

Values of imports and exports, divided into classes, for 1915 :—

Classes of Goods	1915		Classes of Goods	1915	
	Imports of Foreign Goods	Exports Norwegian Goods		Imports of Foreign Goods	Exports Norwegian Goods
	Kroner	Kroner		Kroner	Kroner
Animals, living . . .	1,303,900	1,010,400	Minerals, unwrought . . .	118,421,600	36,449,800
Animal produce (malty food) . . .	17,065,300	223,701,100	Minerals, manufactured . . .	26,788,400	62,030,500
Breadstuffs . . .	105,308,900	112,000	Metals, unwrought or partly wrought . . .	76,393,400	42,899,000

### Internal Communications.

The length of State Railways on December 31, 1916, was 1,685 miles; of private companies 288 miles; total 1,973 miles. 1,206 miles have a gauge of 4ft. 8½in.; 699 miles, 3ft. 6in.; 16 miles, 3ft. 3½in.; 52 miles, 2ft. 5½ins. Total receipts year ending June 30, 1915: State railways, 31,270,944 kroner; companies, 6,451,710 kroner. Total expenses: State railways, 26,094,310 kroner; companies, 4,788,561 kroner. Goods carried: State railways, 5,603,394 tons (of 1,000 kilograms.); companies, 1,909,342. Passengers carried: State railways, 16,293,409; companies, 2,885,058. The State railways have been constructed partly by subscription in the districts interested and partly at the expense of Government. The receipts, expenses and traffic refer to the year July 1, 1914, to June 30, 1915. A beginning is soon to be made for the electrification of the State Railways in Norway.

The following are the postal statistics :—

—	1911	1912	1913	1914	1916
Letters	71,040,558	76,589,629	83,832,407	76,176,219	86,677,317
Post-cards	17,798,759	19,241,953	18,145,329	16,330,774	18,669,476
Letters with declaration of value	4,916,720	5,325,690	5,719,487	5,750,428	6,080,250
Registered letters	1,818,971	2,044,948	2,457,887	2,275,332	2,572,123
Journals	100,227,296	110,635,856	110,335,469	132,265,542	110,574,294
Other printed matter	14,301,109	15,361,663	15,252,536	13,229,951	17,081,211
Samples and parcels	2,518,605	2,860,535	3,213,135	2,925,672	3,484,752

Length of telegraph and interurban telephone lines and wires, June 30, 1916: 14,070 miles of line, 61,707 miles of wires. Number of paid messages

on the State lines 5,687,717. Number of telephone conversations on trunk lines, 8,211,145. State telegraph offices, 1,608 ; receipts, 13,731,053 kroner ; expenses, 7,771,562 kroner.

The Government possesses seven wireless telegraph coast stations and another wireless station at Spitzbergen (Green Harbour), the stations at Bergen, Ingø, and Spitzbergen being of a larger type than the others. A large station for direct communication with Boston, U.S., is now in course of erection at Stavanger.

### Money and Credit.

On June 30, 1915, the Norwegian coins in circulation (the coinage after the monetary reform deducting the coins melted down) were: Gold coin, 22,639,850 kroner ; silver coin, 17,064,554 kroner ; bronze coin, 1,429,815 kroner ; total, 41,134,219 kroner.

There exists no Government paper money.

The value of income and property assessed for taxes in 1915 was :—

	Income.		Property.	
	514·1	millions of kroner	1,726·2	millions of kroner
The towns	514·1	millions of kroner	1,726·2	millions of kroner
The rural districts	481·0	„ „	2,727·6	„ „
The whole kingdom	995·1	„ „	4,453·8	„ „

The 'Norges Bank' is a joint-stock bank, of which, however, a considerable part is owned by the State. The bank is, besides, governed by laws enacted by the State, and its directors are elected by the Storting except the president and vice-president of the head office, who are nominated by the King. It is the only bank in Norway that is authorised to issue bank notes for circulation. The balance-sheets of the bank for 1915 show the following figures :—Assets at the end of the year :—bullion, 130,508,400 kroner ; outstanding capital, mortgaged estates, foreign bills, &c., 95,989,533 kroner ; total, 226,497,933 kroner. Liabilities—notes in circulation, 162,210,585 kroner ; the issue of notes allowed was 155,771,620 kroner ; deposits, cheques, unclaimed dividends, unsettled losses, &c., 32,931,110 kroner (of which the deposits amounted to 26,540,273 kroner) ; dividends payable for the year, 2,500,000 kroner, 10 per cent. ; total, 195,141,695 ; balance, 31,356,238.

The 'Kongeriget Norges Hypothekbank' was established in 1852 by the State to meet the demand for loans on mortgage. The capital of the bank is mostly furnished by the State, and amounted to 28,000,000 kroner in 1915. At the end of 1915 the total amount of bonds issued was 193,537,200 kroner. The loans on mortgage amounted to 200,500,091 kroner.

There were at the end of 1914, 119 private joint-stock banks reported, with a collective subscribed capital of 103,848,825 kroner and a paid-up capital of 76,523,566. The reserve funds amounted to 60,306,037. The deposits and withdrawals in the course of the year amounted to 1,638,757,690 kroner and 1,602,994,143 kroner respectively. Deposits at the end of the year 630,397,232 kroner, of which 48,931,841 kroner deposits on demand, and 581,465,395 kroner on other accounts.

All savings-banks must be chartered by royal licence. Their operations are regulated, to a considerable extent, by the law, and controlled by the Ministry of Finance. In 1914 their number was 526 : depositors 1,175,157, with 637,936,220 kroner to their credit at the end of the year. In 1913 their number was 519 ; depositors 1,136,262, with 606,699,064 kroner to their credit at the end of the year.

## Money, Weights, and Measures

By a treaty signed October 16, 1875, Norway adopted the same monetary system as Sweden and Denmark. The Norwegian krone, of 100 öre, is of the value of 1s.  $1\frac{1}{2}d.$ , or about 18 kroner to the pound sterling. The gold 20-kroner piece weighs 8.960572 grammes, .900 fine containing 8.0645 grammes of fine gold, and the silver krone weighs 7.5 grammes, .800 fine, containing 6 grammes of fine silver. The standard of value is gold. National Bank notes for 5, 10, 50, 100, 500, and 1,000 kroner are legal means of payment, and the Bank is bound to exchange them for gold on presentation.

The metric system of weights and measures is obligatory.

## Diplomatic Representatives.

### 1. OF NORWAY IN GREAT BRITAIN.

*Envoy and Minister in London.*—Paul Benjamin Vogt. (Appointed June 2, 1910.)

*First Secretary.*—J. Michelet.

*Second Secretary.*—Richard Momme Peterson.

*Third Secretary.*—Alexis Lundh.

*Military Attaché.*—Major Carl Gölbranson.

*Naval Attaché.*—Commander C. Rachlew.

*Consul-General in London.*—W. Eckell.

*Vice-Consul.*—Hjalmar Ohlsen.

There are Consular representatives at Amble, Barrow, Berwick, Birmingham, Blyth, Boston, Bradford, Bristol, Brixham, Cardiff, Dartmouth, Douglas, Dover, Falmouth, Fleetwood, Goole, Grimsby, Hartlepool, Harwich, Hull, Ipswich, Jersey, King's Lynn, Leeds, Liverpool, Lowestoft, Manchester, Middlesbrough, Newhaven, Newport, Nottingham, Plymouth, Portsmouth, Sheffield, Shoreham, Southampton, Sunderland, Swansea, Weymouth, Great Yarmouth, Newcastle-on-Tyne, South Shields, Edinburgh—Leith, Aberdeen, Alloa, Ardrossan, Bo'ness, Burntisland, Dundee, Glasgow, Grangemouth, Greenock, Kirkwall, Lerwick, Methil, Peterhead, Stornoway, Troon, Wick, Dublin, Belfast, Cork, Limerick, Londonderry.

### 2. OF GREAT BRITAIN IN NORWAY.

*Envoy and Minister.*—Sir Mansfeldt de Cardonnel Findlay, K.C.B., C.M.G.

*Secretaries.*—Esmond Ovey, M.V.O., Thomas Maitland Snow, and Lord Colum Crichton-Stuart.

*Attachés.*—V. F. W. Cavendish Bentinck and Herbert Alexander Macrae.

*Hon. Attaché.*—Hastings Elwin Taylor, R.N.

*Naval Attaché.*—Captain Montague W. W. P. Consett.

*Military Attaché.*—General H. H. Yarde-Buller, M.V.O., D.S.O.

*Commercial Attaché.*—Sir Francis Oppenheimer.

*Consul at Kristiania.*—Edward F. Gray.

There are Consular representatives at Arendal, Bergen, Bodö, Kristiania, Drammen, Flekkefjord, Fredrikshald, Fredrikstad, Hammerfest, Haugesund, Kragerö, Kristiansand, Kristiansund, Larvik, Mandal, Molde, Moss, Namsos, Porsgrund, Risør, Skien, Stavanger, Svolvær, Tromsø, Trondhjem, Tönsberg, Vadsö, Vardö.

## OMAN.

AN independent State, in South-eastern Arabia, whose integrity has been guaranteed by Great Britain and France. Oman extends along the southern shore of the gulf of that name from the entrance into the Persian Gulf to the extreme eastern point of Arabia, and thence S.W. as far as Ras Sajir, lat. 16° 8' N. The coast line is nearly 1,000 miles long. Inland Oman is bounded on the S.W. by the great desert. Area, 82,000 square miles; population, estimated at 500,000, chiefly Arabs, but there is a strong infusion of negro blood. The capital, Maskat, and the adjacent town of Mattra have together about 24,000 inhabitants. Maskat was occupied by the Portuguese from 1508 to the middle of the seventeenth century. After various vicissitudes it was recovered in the eighteenth century by Ahmed bin Sa'eed, of Yemenite origin, who was elected Imam in 1741, and whose family have since ruled.

The present Sultan is **Seyyid Taimur bin Feysil**, eldest son of the late Seyyid Feysil bin Turki, who succeeded his father October 5, 1913.

In the beginning of last century the power of the Imam of Oman extended over a large area of Arabia, the islands in the Persian Gulf, a strip of the Persian coast, and a long strip of the African coast south of Cape Guardafui, including Socotra and Zanzibar. On the death of Sultan Sa'eed in 1856, one son proclaimed himself Sultan in Zanzibar and another in Maskat. Eventually the rivals agreed to submit their claims to the arbitration of Lord Canning, Viceroy of India, who formally separated the two Sultanates. Subsequent troubles curtailed the area of the state in Asia. The island of Kishm or Tawilah, near the entrance of the Persian Gulf, formerly belonging to the Imam of Oman, is now under Persian government and is ruled by a Shaikh, but the port of Basidu at the western extremity of the island is British. Further south on the Persian coast of the Gulf of Oman is the Port of Jask, formerly belonging to Oman, but now Persian. The closest relations have for years existed between the Government of India and Oman and a British Consul and Political Agent resides at Maskat.

The revenue of the Sultan amounts to about 300,000 dollars. The population is poor; inland the Sultan's authority is merely nominal and there is little security for life and property. In some coast regions there is the possibility of considerable agricultural development. Inland camels are bred in large numbers by the tribes, and these are said to be the best breed in Arabia, but in size and strength they are inferior to those of north-western India. As to the mineral resources of the country little is known.

Commerce is mostly by sea, statistics being given only for the ports of Maskat and Matrah, but large caravans under protection carry on traffic with the interior.

Total exports 1915-16, Rs. 28,22,829; chiefly dates Rs. 15,33,799; fruit, Rs. 28,623; fish, Rs. 1,38,295; limes, Rs. 66,633; pearls, Rs. 23,800; cotton goods, Rs. 2,22,700; hides and skins, Rs. 27,875. Total imports for 1915-16, Rs. 36,44,912; chiefly rice, Rs. 12,41,475; coffee, Rs. 5,19,758; sugar, Rs. 96,905; piece goods, Rs. 6,72,097; silk and silk goods, Rs. 21,000; twist and yarn, Rs. 1,04,749; wheat and other grain, Rs. 1,61,214.

Total imports from United Kingdom Rs. 87,943; India, Rs. 30,95,462; Persia, Rs. 44,053; France, Rs. 1,052; Shatt al Arab, Rs. 425. Trade is mainly in the hands of British Indians, and the imports and the exports are mostly from and to India. All imports are subject to 5 per cent. *ad*

*valorem* duty. There are no export duties; imports for re-export by the importer within 6 months are not subject to transit duty.<sup>1</sup>

The number of vessels that cleared at the port of Maskat in 1915-16 including the native craft, was 174 of 116,418 tons. The Arabs of Sur, near Ras el Hadd, maintain a large coasting trade, and also traffic in native craft with India, and the East African coast and islands.

There is a mail weekly from and to Bombay, and Maskat is connected by cable with the Indo-European telegraph system.

The common medium of exchange is the Maria Theresa dollar. On the coast, but not in the interior, the rupee circulates (rupee exchange 100 dollars equal to from Rs. 121 to Rs. 132 in 1915-16). There is one Omanese copper coin, which fluctuates in value. The muhammadi of 20 *gaj* (1 dollar = 11½ muhammadi) is only money of account. The weights in use are the Maskat *man* which contains 237 tolas and is equal to one-third of a Delhi *man*; 24 *kias* = 1 Maskat *man*; 10 Maskat *mans* = 1 *farúsala*; 200 Maskat *mans* = 1 *tabír*. There is also a bazaar *man* equal in weight to 136 dollars.

*Political Agent and H.B.M.'s Consul*.—Major E. B. Howell, C.I.E., I.C.S.

### Books of Reference.

<sup>1</sup> The above figures of imports and exports include trade carried on by sailing vessels, which, however, is very imperfectly registered.

## PANAMA.

(REPÚBLICA DE PANAMÁ.)

**Government.**—Panama, formerly a department of the Republic of Colombia, asserted its independence on November 3, 1903, and the *de facto* Government was on November 13 recognised by the Government of the United States, and soon afterwards by the other Powers. In 1914 Colombia, in virtue of the Treaty of Bogota undertook to agree to recognise the independence of Panama.

The Constitution, adopted February 13, 1904, provides for a Chamber of Deputies of 33 members (one for every 10,000 inhabitants), which meets biennially on September 1, and for a President of the Republic, elected for 4 years, and not eligible for the succeeding term.

*President of the Republic.*—Dr. Ramon M. Valdes (October 1, 1916).

There are three Vice-Presidents, and a Cabinet of five Ministers. The Republic is divided into eight provinces, each under a Governor.

A treaty for the demarcation of the boundary line between Panama and Costa Rica was signed on behalf of the respective Governments on March 17, 1910, and has been ratified by the congresses of both countries. By this treaty the question of what is the true boundary line will be submitted to the arbitration of the Chief Justice of the Supreme Court of the United States.

**Area and Population.**—Extreme length is about 480 miles; breadth between 37 and 110 miles; total area is 32,380 square miles; population according to the census of 1912 (excluding the Canal Zone), 336,742. Estimated population in 1915, 400,000. The inhabitants are of a mixed race, comprising Spanish, Indian, and Negro elements, with a small number of temporary immigrants from the United States and European countries. Chinese subjects are estimated at 3,500. There are 54,488 British subjects in the Republic, including 30,859 in the Canal Zone, chiefly from the West Indies. There are 8 provinces as follows (the capitals in brackets):—Bocas del Toro (Bocas del Toro); Coclé (Penonomé); Colón (Colón); Chiriqui (David); Herrera (Chitré); Los Santos (Las Tablas); Panamá (Panamá); Veraguas (Santiago). The capital, Panamá, founded in 1518, on the Pacific coast, has (1915) 60,028 inhabitants (31,830 males and 28,198 females), and Colón on the Atlantic coast, 26,000. Smaller ports on the Pacific are Agua Dulce, Pedregal, Montijo, and Puerto Mudis; on the Atlantic Bocas del Toro, Puerto Bello, and Mandinga (opened September 26, 1916).

In 1915 there were 12,040 births, 1,293 marriages, and 7,359 death. Of the total births, 6,197 were boys and 5,843 girls; 3,963 legitimate and 8,077 illegitimate.

**Religion.**—The religion of the country is Catholicism, but other denominations are represented and have a fair following. In the Canal Zone Protestantism chiefly prevails. There are 69 Catholic churches and 58 parishes, served by 70 priests of various nationalities (20 are Panamanians, 27 Spaniards, 5 Italians, 4 French, 1 English, 3 North Americans, 3 Germans, 4 Colombians, 2 Venezuelans, and 1 Swiss).

**Education.**—The Government maintains 398 public schools throughout the eight provinces (1916), and 24,150 children (excluding 1,721 children enrolled in the Canal Zone public schools) received free instruction in 1916, from 315 teachers. A University (Instituto Nacional) has been opened in fine large buildings constructed at a cost of about 300,000%. In addition there are about a dozen private institutions. Many young men and women are being educated in Europe and the United States at the cost of the Panama Government.

**Justice.**—The laws have been codified and took effect on January 1, 1917. These codes—civil, penal, commercial, judicial, administrative, fiscal, and mining—are designed to meet national needs and modern conditions, and will replace the old Colombian laws that have been in use since the separation of Panama.

**Finance.**—All the revenue collected on importations into the Republic or zone belongs to the Panama Government, but the United States reserve the right to import supplies of all descriptions required for canal construction and for the use of their employees free of all taxes.

The national revenue and expenditure for 5 years were as follows :—

	1911	1912	1913	1914	1915
	£	£	£	£	£
Revenue . . . . .	672,957	691,057	821,843	780,117	675,057
Expenditure . . . . .	670,839	680,301	676,512	911,549	635,820

The Republic has 1,260,000% in United States banks and 150,000% capital in the National Bank : total, 1,410,000%, with an interior debt of about 60,000%. In 1915 the Republic obtained a loan in the United States for building the Chiriqui Railway. It has no army or navy to support.

**Production.**—The soil of Panama is of great fertility. Of the whole area about five-eighths are unoccupied, and of the remainder only a small part is properly cultivated. Immigration is encouraged, and land is offered to small farmers on favourable terms. The most important product is the banana. Caoutchouc (about 130 tons annually) is collected by the Indians of the Cordillera, or is obtained from trees planted by Europeans near the coast. Coffee (about 500,000 bushes) is grown in the province of Chiriqui, near the Costa Rican frontier. In the province of Coolé (Atlantic coast) there is one large agricultural undertaking, begun in 1894 with German capital. Here about 75,000 cocoa trees, 50,000 coffee bushes, and 25,000 caoutchouc trees have been planted and are now beginning to yield returns. Other products of the soil of Panama are coconuts, mahogany and other woods, copaliba, sarsaparilla and ipecacuanha. Sugar and tobacco growing are assuming importance. Cattle rearing is carried on successfully, and hides form an important article of export. In 1916 the live stock was estimated at 200,000 head of cattle, 15,000 horses, 2,000 mules, 30,000 pigs, and 5,000 goats.

Pearl fishing is carried on at the Pearl Islands in the Gulf of Panama, and at Coiba Island to the west. Turtle-shell is also exported to a considerable amount. It is claimed that Panama possesses nearly every common mineral except coal.

**Commerce, Shipping, Communications.**—The imports and exports for 6 years are shown as follows :—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1900	1,751,261	300,495	1913	2,279,400	1,076,605
1910	2,063,167	364,059	1914	1,977,095	1,082,600
1912	1,962,111	410,396	1915	1,861,095	669,652

Of the total imports in 1915, 1,404,577*l.* came from the United States (exclusive of canal materials), 235,058*l.* from Great Britain, 1,925*l.* from Germany, 36,027*l.* from France, 16,682*l.* from Italy.

The Isthmus on both sides is in communication with European and American countries by several lines of steamers. In 1915 there entered at the port of Colón 103 steamers of 275,410 tons. Of these 52 of 117,198 tons were British; 17 of 57,417 tons were American.

A railway, 47 miles, connects the ports of Colon and Panama. It belongs to the Panama Railroad Company (United States Government). In the Province of Bocas del Toro the United Fruit Company (American) owns about 140 miles of track with branches, which is used to transport bananas and passengers to the port of Almirante in the Chiriqui lagoon. At present the line extends into Costa Rica for a distance of about 30 miles. This line is being extended towards Port Limon (Costa Rica) and its terminal is now distant from that port 30 miles. The Chiriqui line is 65 miles long.

There are telegraph cables from Panama to North American and South American ports, and from Colon to the United States and Europe. Roads are being constructed throughout the country. There are 96 post-offices and 37 telegraph offices.

**Money and Credit.**—The monetary unit is the gold *Balboa* weighing 1·672 gramme ·900 fine, to which the United States gold dollar is legally equivalent. Silver coins are the peso (of 25 grammes ·900 fine), and the half, fifth, tenth and twentieth peso pieces and nickel coins of 2½ cents. There is no paper money. Two silver pesos of Panama currency are taken as equivalent to one U.S. gold dollar. Altogether four millions of silver dollars of the new currency have been coined and placed in circulation.

Part of the 10,000,000 dollars (canal money) paid by the United States has been applied to the establishment of a real estate loan bank, part to public improvements in the several provinces, and 6,000,000 dollars have been invested in the United States.

### The Panama Canal and the Canal Zone.

On November 18, 1903, a treaty between the United States and Panama was signed, providing facilities for the construction and maintenance of the inter-oceanic Canal. In this treaty, Panama granted in perpetuity the use of a zone (Canal zone) five miles wide on each side of the Canal route, and within this zone the exclusive control for police, judicial, sanitary and other purposes. For subsidiary canals other territory was ceded and, for the defence of the Canal, the coastline of the zone and the islands in Panama Bay were also ceded. The cities of Panama and Colon remain under the authority of the new State, but complete jurisdiction was granted to the United States in both the cities

and in their harbours in all that relates to sanitation and quarantine. In return for these grants the United States paid 10,000,000 dollars on the ratification of the treaty, and is paying 250,000 dollars yearly, beginning after nine years. The treaty was ratified on February 23, 1904, and in July, 1904, the provisional delimitation of the boundaries of the United States territory on the Isthmus was signed. According to this agreement the city of Panama is, for all practical purposes, left without a seaport for foreign commerce, as the anchorage of vessels at Flamenco Island and the wharves at Balboa, both lie within the territory of the zone. Moreover, a similar port was opened on the Atlantic entrance to the Canal, called Cristobal.

*Governor of Canal Zone.*—Col. Geo. W. Goethals. Appointed April 1, 1914.

The area of the Canal zone within the limits of 5 miles on either side of the centre line of the canal, including land and water, but not including the area within the 3-mile limit from the Atlantic and Pacific ends, is 441·5 square miles made up of : Land area, 332·35 square miles ; Gatun Lake, 106·4 square miles ; Miraflores Lake, 1·9 square miles ; and the area of the channels from the coast to Gatun and Miraflores Locks, 0·85 square mile. Including all the waters of Gatun Lake, over which the Panama Canal has absolute control, the total area of the Canal Zone is 502·5 square miles. The population in 1916, 31,048, of whom 14,876 are Americans. The Zone has been de-populated in order to make it a military reservation, and therefore no private individuals or traders are permitted to settle or to acquire land.

The Canal has a summit elevation of 85 feet above the sea. It is 43·84 nautical miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about 4 miles, and from the Pacific shore line to deep water is about 4½ miles ; hence the length of the Canal from shore to shore is approximately 35½ miles. The channel ranges in width from 300 to 1,000 feet. The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet. The Canal has a minimum depth of 41 feet. The time required for the passage of a ship of medium size through the entire length of the Canal is from 8 to 10 hours, and for larger vessels from 10½ to 11 hours.

The Gatun dam along the crest is 8,000 feet long, including the spillway, or about 1½ miles, and 2,100 feet wide at its greatest width. The crest of the dam is at an elevation of 105 feet above sea level, or 20 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, *i.e.*, 85 feet above sea level, is about 338 feet.

The cost of the construction of the Canal to June 30, 1916, including the balance available for expenditure, was 364,117,972 dollars. This amount includes 40,000,000 dollars paid to the new French Canal Company and 10,000,000 dollars to the Republic of Panama for property and franchises. It does not include 5,300,000 dollars spent and to be spent for colliers to carry coal to the Isthmus, and 1,500,000 dollars for a new pier at Cristobal. Including these and some other small items, the expenditures authorised to date amount to 371,517,972 dollars.

The Canal was informally opened to commerce by the passage of the 9,000 ton steamer *Ancon* on August 15th, 1914, with specially invited guests. The journey was made without mishap in ten hours. The Canal has been in use since, except that owing to landslides in the Culebra Cut the channel was interrupted for various short periods in 1915 for traffic, and from September 23, 1915, to April 16, 1916, the channel was entirely blocked and

only a few vessels used the Canal. Since April 16, 1916, traffic has moved with only slight delays, with the exception that in the latter part of August, 1916, Cucaracha slide became active, causing a suspension for six days. Since that time the Canal has been handling vessels drawing up to 30 feet without delay.

Particulars of the traffic through the Canal are given as follows:—

Fiscal year ending June 30	Eastbound (Pacific to Atlantic)		Westbound (Atlantic to Pacific)		Total		Tolls levied
	Vessels <sup>2</sup>	Cargo, tons	Vessels	Cargo, tons	Vessels	Cargo, tons	
1915 <sup>1</sup>	530	2,125,735	558	2,814,057	1,088	4,969,792	Dollars 4,343,383
1916	411	1,434,236	376	1,705,810	787	3,140,046	2,399,830

<sup>1</sup> 11 months only, from August to June.

<sup>2</sup> *I.e.*, ocean-going vessels, excluding Canal vessels and launches.

The (Hay-Pauncefote) treaty between Great Britain and the United States signed November 19, and ratified by the United States Senate December 16, 1901, provides for the use of the Canal on equal terms by vessels of all nations. On August 24, 1912, the United States Congress passed the Panama Canal Act whereby privileges were given to certain classes of American shipping using the canal. The British Government lodged a protest against some of the provisions which it regarded as involving violation of the Hay-Pauncefote treaty. After much discussion and many suggestions, President Wilson, on March 5, 1914, requested Congress to repeal that provision of the Act which discriminates between American and other vessels, holding that the exemption was "in plain contravention of the treaty with Great Britain concerning the Canal concluded on November 19, 1901." The Bill was signed on June 15, 1914.

## Diplomatic and Consular Representatives.

### 1. OF PANAMA IN GREAT BRITAIN.

*Charge d'Affaires*.—Señor Don C. R. Zachrisson (October 6, 1916).

*Consul-General* (at Liverpool).—J. A. Orillae.

### 2. OF GREAT BRITAIN IN PANAMA.

*Envoy Extraordinary and Minister Plenipotentiary*.—Sir Claude C. Mallet, C.M.G. Appointed October 1, 1914.

*Hon Attaché*.—Claude Mallet.

*Consul for the Republic*.—Constantine Graham.

*Vice-Consul at Panama*.—A. B. Hutcheson.

There is also a Vice-Consul at Colon.

## PARAGUAY.

(REPÚBLICA DEL PARAGUAY.)

### Constitution and Government.

THE Republic of Paraguay gained its independence from Spanish rule in 1811, and after a short government by two consuls, the supreme power was seized, in 1815, by Dr. José Gaspar Rodríguez Francia, who exercised autocratic sway as dictator till his death, September 20, 1840. Dr. Francia's reign was followed by an interregnum, which lasted till 1842, when a National Congress, meeting at the capital, Asuncion, elected Don Mariano Roque Alonso and Don Carlos Antonio Lopez joint consuls of the Republic. Another Congress voted, March 13, 1844, a new Constitution, and, March 14, elected Don Carlos Antonio Lopez sole President; he was continued by another election, March 14, 1857. At the death of Don Carlos, September 10, 1862, his son, Don Francisco Solano Lopez, born 1827, succeeded to the supreme power. President Lopez, in 1864, began a dispute with the Government of Brazil, the consequence of which was the entry of a Brazilian army, united with forces of the Argentine Confederation and Uruguay, into the Republic, June, 1865. After a struggle of five years, in which Paraguay lost probably 500,000 men, Lopez was defeated and killed at the battle of Cerro Cora, March 1, 1870.

A new Constitution was proclaimed on November 25, 1870. The legislative authority is vested in a Congress of two Houses, a Senate and a Chamber of Deputies, the executive being entrusted to a President, elected for the term of four years, with five ministers. There is also a non-active Vice-President, who is at the same time President of the Senate. The Senate and Chamber of Deputies are elected directly by the people, the former in the ratio of one representative to 12,000 inhabitants, and the latter one to 6,000 inhabitants, though in the case of the sparsely populated divisions a greater ratio is permitted. The Constitution provides for this proportion, but in practice the original number of 13 Senators and 26 Deputies is still adhered to. The Senators and Deputies receive each 3,000 dollars per month.

*President of the Republic.*—Dr. Manuel Franco. Elected for 4 years from August 15, 1916.

The President exercises his functions through a cabinet of responsible ministers, five in number, presiding over the departments of the Interior; of Finance; of Justice, Worship and Public Instruction; of War and Marine; and of Foreign Affairs. The President receives a salary of 3,000 dollars and representation allowance of 4,000 dollars per month, and each of the ministers 3,000 dollars salary and 3,000 or 4,000 dollars representation allowance. The total administrative expenses are estimated (1915) at 603,805 dollars gold (120,761*l.*), and 50,799,410 dollars currency.

The country is divided into 20 electoral districts and 93 departments. The civil authority is exercised by a *jefe político* in each of the latter who is subject to the control of Government *delegados*, or *comisionados*, 12 in number, among whom are included the military commanders of the 5 military zones.

### Area and Population.

The approximate area of Paraguay proper, which is situated between the rivers Paraguay and Alto Paraná, is estimated at 65,000 square miles. An area comprising upwards of 100,000 square miles of territory lying between the rivers Paraguay and Pilcomayo, known as the Chaco, is claimed by Paraguay, whose rights, however, are disputed by Bolivia. In 1915 the total population was estimated at 1,000,000, not including 50,000 Chaco Indians. The population of Paraguay proper consists of people of Guaraní Indian, European (chiefly Spanish) and Negro blood, the Guaraní largely predominating. Of foreigners in Paraguay, in 1916, there were probably upwards of 60,000, including 25,000 to 30,000 Argentines, 10,000 to 15,000 Italians, 1,400 Brazilians, 7,000 Spanish, 3,000 German, 800 to 1,000 French, 1,000 Uruguayans, 800 English. In 1916 the population of the capital, Asuncion (founded 1537), was estimated at 120,000; other towns are Villa Rica, 26,000; Concepcion, 15,000; Encarnacion, 12,500; San Pedro, 8,700; Luque, 15,000; Carapeguá, 15,000; Paraguari, 10,000; Villa del Pilar, 10,000. These figures include the surrounding districts in each case, and the figures are estimated.

In 1909 the immigrants assisted by Government were 830; in 1911, 389; in 1912, 704; in 1913, 1,512; and in 1914, 1,616. Very little land is now national property, most of it having been transferred to private ownership, much of it in very large tracts.

### Religion, Instruction, and Justice.

The Roman Catholic Church is the established religion of the State, but the free exercise of other religions is permitted. Asuncion, Suffragan to Buenos Aires, is the only Paraguayan Episcopal See. The law of civil marriage came into force on August 1, 1899. Roman Catholic and other religious marriage ceremonies are allowed, but the civil ceremony alone gives validity to a marriage. Education is free and nominally compulsory, but schools are not everywhere available. In 1914 there were 1,124 primary schools with 66,894 pupils of both sexes and an average monthly attendance of 57,431. The teachers numbered 1,223. Some private schools, including commercial schools, are subsidised by the Council of Education. There are National Colleges (*i.e.*, schools) at Asuncion, Villa Rica, and Pilar. The aggregate number of students is 790 and of teachers 50. There is also a University which grants degrees in law and social sciences and certificates to notaries public and practitioners in pharmacy and obstetrics. Besides contributions from general taxes, there is a special Government fund for education consisting of a proportion of the proceeds of land sales, customs dues, &c. A national library, the national archives, and a natural history museum and botanic zoological garden are under the care of the department of Public Instruction.

Justice is administered by a Supreme Court, two courts of appeal (one for civil causes and another for commercial and criminal causes), a court of jurymen, 10 judges of First Instance, and (at the capital) 3 police magistrates. The functions of magistrates are exercised in the provinces by upwards of 100 *jueces de paz* (all laymen), who are at the same time registrars of births, deaths, and marriages.

### Finance.

The revenue is derived from import and export duties, inland revenue, transit dues, post and telegraph and other dues. The estimated revenue and

expenditure for five years are given as follows (gold dollar = 4s. ; paper dollar varies in value) :—

	Revenue		Expenditure	
	Gold pesos	Paper pesos	Gold pesos	Paper pesos
1912	1,259,337	19,895,658	999,411	32,687,228
1913 <sup>2</sup>	1,508,142	44,062,013	1,503,569	52,331,249
1914	729,562	68,131,544 <sup>3</sup>	711,365	64,516,569 <sup>3</sup>
1915 <sup>1</sup>	1,951,200	20,643,600 <sup>4</sup>	603,805	50,799,410 <sup>4</sup>
1916 <sup>1</sup>	1,951,200	20,643,600 <sup>4</sup>	603,805	50,799,410 <sup>4</sup>

<sup>1</sup> Estimates.

<sup>2</sup> Revenue equivalent to 874,978*l.*; expenditure to 981,667*l.*

<sup>3</sup> Revenue equivalent to 688,064*l.*; expenditure to 642,401*l.*

<sup>4</sup> Estimated revenue equivalent to 493,458*l.*; expenditure to 374,755*l.*

On December 31, 1916, the outstanding external debt amounted to 716,450*l.* and the acknowledged internal debt to 1,518,997 dollars gold (303,799*l.*) and 16,448,562 dollars paper (not including the paper currency, viz., 115,000,000 dollars). The war debt to the Argentine and Brazil (the portion due to Uruguay was condoned) is not included in Government accounts. It may be said to exist only as a political weapon in the hands of those countries, and is by some considered an effective guarantee of the independence of Paraguay.

### Defence.

The small army of Paraguay is drilled and trained and armed on the German model. Total about 100 officers and 2,500 men, distributed at 5 centres. The law of compulsory service (2 years) has not yet been put into force. In the event of war the National Guard is called to the colours.

The navy consists at present of a flotilla of converted merchant vessels armed with modern guns. The largest is about 500 or 600 tons gross register.

### Production and Industry.

The soil of Paraguay is productive and the climatic conditions favourable to the cultivation of many sub-tropical products. But in its present condition much of the country is admirably suited to pastoral purposes. Excellent grazing land is abundant in Paraguay proper and in the Chaco region. The estimated number of horned cattle in 1916 was about 4,000,000. The meat packing and curing industry is encouraged by Government; hides, jerked beef, and other animal products are exported. *Yerba maté*, or Paraguay tea, which is a natural product of the virgin forests, is one of the chief articles of export. It is cultivated to a limited extent. The total export of *yerba* in 1915 was 10,360,268 lbs. Tobacco is also one of the principal products. The normal output is about 137,500 cwt., of which about 60 per cent. was (before the war) exported to Europe, chiefly to Germany. The export of timber to Argentina under normal conditions is considerable. Fruit-growing, especially oranges, is general. The export of *petit grain* oil, the essential oil made from the leaves of the sour orange, amounted in 1915 to 38,423 kilos. The total area devoted to sugar cultivation (largely for the manufacture of spirit) is estimated at nearly 9,000 acres. Roots (chiefly mandioca, sweet potatoes, and ground-nuts), maize, beans, rice, &c. are grown for local consumption, but agriculture is primitive. The cultivation of cotton is encouraged by the authorities, but has not yet assumed commercial importance.

### Commerce.

The following is the value of the imports and exports (5 dollars = £1) :-

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports <sup>1</sup> . . .	1,070,120	1,623,999	1,029,893	481,174	949,815
Exports . . .	847,145	1,126,180	916,874	1,119,410	1,640,500

<sup>1</sup> The comparison between the import values with the export values is apt to be misleading, since these figures represent the *conventional values* only (assigned by the customs tariff as the basis in which duties are collected) and not the ascertained *value* of the goods.

Import duties (estimated) in 1914, 523,200*l.*; in 1915, 308,350*l.* The *export* duties were estimated in 1914 at 167,400*l.*; in 1915 at 75,970*l.* The taxes in 1915 were estimated at 158,301*l.*

The chief imports are textiles, provisions, hardware, wines and spirits, drugs, and fancy goods. The chief exports are hides, yerba, oranges, tobacco, timber, jerked and preserved beef, cattle, petit grain oil, and quebracho extract. Of the imports in 1915, the most important were foodstuffs, 131,530*l.*; hardware, 64,131*l.*; and textiles, 158,811*l.* Of the total exports in 1915, goods to the value of 725,397*l.* went to Argentina. The imports from Great Britain (chiefly consisting of textiles and hardware) amounted in 1915 to 155,820*l.* or 32.5 per cent. of the total. The exports from Paraguay to the United Kingdom were valued at 38,703*l.* The 'most favoured nation treaty' of 1884 between Great Britain and Paraguay is in force. A free trade treaty was signed in 1916 between Paraguay and Argentina, but has not yet been ratified.

### Communications.

In 1915, 515 vessels (of which 360 Argentine) with an aggregate tonnage of 242,296 tons, entered at the port of Asuncion in the River Plate trade, and 512 with a tonnage of 240,048 cleared. In the up-river traffic 2,168 vessels of 98,962 tons entered and 2,171 vessels of 102,108 tons cleared. The steamers are mostly 'liners' regularly visiting the port. Paraguay is served by sundry steamship companies, the most important of which is that of Nicholas Mihanovich, Ltd., of Buenos Aires.

There is a railway from Asuncion to Encarnacion, on the Rio Alto Paraná, a distance of 255 miles. The change of gauge on the Paraguay Central Railway from 5½ ft. to the standard 4 ft. 8½ ins., was effected in 1910 and a through train service without break of bulk from Asuncion to Buenos Aires was opened in 1911. The passenger accommodation, sleeping and restaurant cars are thoroughly up to date and well served. Opposite Encarnacion is Posadas, to which an Argentine line is extended, and the two lines are connected by a train ferry (opened October 10, 1913). The country roads are in general mere bullock tracks, and transport is difficult and costly.

There is a line of telegraph at the side of the railway. The national telegraph connects Asuncion with Corrientes and Posados in the Argentine Republic, and thus with the outside world; there are altogether 2,050 miles of telegraph line and 64 telegraph offices. The telephone at Asuncion was destroyed by fire in 1913. Wireless telegraph stations have lately been erected at Asuncion and Concepcion. They are said to have a radius of 500 kilom. by day and 1,000 kilom. by night. Paraguay joined the postal union

in 1881; in 1914 the number of post offices was 385. In 1914, total number of pieces of mail matter handled was 7,291,635, and the number of telegraph messages sent (over Government wires) was 212,016.

### Money and Credit.

The principal banks in Paraguay are the Bank of the Republic, opened in June, 1908 (capital, 4,000,000 dollars gold); the Mercantile Bank, established 1891, with a capital of 25,000,000 dollars paper; the Agricultural Bank, established 1887, with a capital of 34,390,097 currency dollars advanced by Government. The currency was increased in 1915 to 125,000,000 dollars (10,000,000 dollars in suspense).

There is no gold and silver current and paper is the only circulating medium with the exception of a few small nickel coins. The average rate of exchange in 1915 was about 190 dollars paper to 1*l*. The exchange fluctuates greatly, and consequently transactions are frequently made in dollars *gold* at the nominal fixed rate of 5·04 dollars to the 1*l*. for gold coin and 5 dollars per 1*l*. for cheques or drafts, or in Argentine paper at 11·45 dollars to the 1*l*. On January 20, 1916, a law was passed establishing an Office of Exchange or Conversion. For the purpose of buying gold currency the office had placed at its disposal (1) 10,000,000 pesos paper currency, (2) the amounts received from the sale of gold currency, and (3) the available funds in hand at the Agricultural Bank.

### Weights and Measures.

The 1 <i>Cuadra</i>	.	.	= 100 varas (97 yards, about).
„ 50 <i>Cuadras</i>	.	.	= 1 league (2½ miles, about).
„ 1 <i>cuadra cuadrada</i>	.	.	= 2 acres (nearly).
„ <i>Legua cuadrada</i>	.	.	= about 7½ sq. miles.

The weights and measures of the metric system are also in general use.

### Diplomatic and Consular Representatives.

#### 1. OF PARAGUAY IN GREAT BRITAIN.

*Consul-General in Great Britain.*—Alfred James. Appointed November 20, 1897.

There are Consuls at Glasgow, Birmingham, Manchester, Cardiff, Liverpool, and Southampton.

#### 2. OF GREAT BRITAIN IN PARAGUAY.

*Minister Plenipotentiary.*—Sir R. T. Tower, K.C.M.G., C.V.O. (residing at Buenos Aires).

*Consul at Asuncion (Local rank of Secretary of Legation and Chargé d'Affaires in absence of Minister).*—Francis A. Oliver.

## PERSIA.

(IRÂN.)

### Reigning Shah.

**Sultan Ahmad Shah**, born January 20, 1898 (27th Shaban 1315), succeeded his father, Muhammad Ali Shah (who abdicated) July 16, 1909, under regency of Ali Reza Khan, Azud el Mulk, chief of the Kajar tribe. Azud el Mulk, the Regent, died September 22, 1910, and on the 25th of the same month the National Council elected Abu'l Kassim Khan, Nasser el Mulk, who was then in Europe, as his successor. The Regent arrived in Teheran on February 8, 1911, and definitely assumed the functions of Regent by taking the oath before the National Council on March 4. The coronation of the Shah took place on July 21, 1914, and the Regent left for Europe soon after.

*Brothers of the Shah.*—I. Itezad es Saltaneh. II. Muhammad Hassan Tabriz Mirza, Valiahd (heir apparent), born February 19, 1899 (9th Shaban 1316). III. Muhammad Mehdi Mirza. IV. Mahmud Mirza.

*Uncles of the Shah.*—I. Malik Mansur Mirza, Shua es Saltaneh, born 1880. II. Abu'l Fath Mirza, Salar ed Dowleh, born 1881. III. Abu'l Fazl Mirza, Azud es-Sultan, born 1883. IV. Husein Kuli Mirza, born 1894. V. Nâsr-ed din Mirza, born 1896.

The Royal Family is very numerous: there are some thousands of princes and princesses, but the last official year-book only mentioned about a hundred.

The Shah of Persia—by his official title, 'Shâhinshâh' (a corruption of Shâhân Shâh), or King of Kings—was until 1906 absolute ruler within his dominions, and master of the lives and goods of all his subjects. The whole revenue of the country being at their disposal, recent sovereigns of Persia were able to amass a large private fortune, but that of the present occupant of the throne is reported to amount to barely two millions sterling, most of it represented by diamonds, the largest, the Deryâ i Nûr, of 186 carats, and the Taj i Mâh, of 146 carats, and other precious stones, forming the crown jewels.

The present sovereign of Persia is the seventh of the dynasty of the Kajârs, which took possession of the crown after a civil war extending over fifteen years, from 1779 to 1794. The date of accession of each of the sovereigns of the dynasty was as follows:—

1. Agha Muhammed . . . . . 1794	5. Muzaffar-ed-dîn, son of Nâsr-ed-dîn . . . . . 1896
2. Fath Ali, nephew of Agha Muhammed . . . . . 1797	6. Muhammed Ali, son of Muzaffar-ed-dîn . . . . . 1907
3. Muhammed, grandson of Fath Ali . . . . . 1835	7. Sultan Ahmed, son of Muhammed Ali . . . . . 1909
4. Nâsr-ed-dîn, son of Muhammed . . . . . 1848	

According to the Constitution the Shah must belong to the Shî'ah faith and his successor must be his eldest son, or next male heir in succession, whose mother was a Kajâr princess.

### Constitution and Government.

The form of government in Persia up to the year 1906 was, in its most important features, similar to that of Turkey. The Shâh, within the limitations imposed by the Mohammedan religion, was an absolute ruler, generally regarded by the people as the vice-regent of the Prophet. In 1905, however

the Persian people demanded representative institutions, and in January, 1906, the Government announced that the Shâh had given his consent to the establishment of a National Council (Mejlis i Shorâ i Milli). But the Mejlis was never properly constituted, though attempts were made to set it working. Since November, 1915, it has ceased to exist as a legislative or administrative body. (For a history of the struggle see THE STATESMAN'S YEAR-BOOK for 1916, p. 1220.) The government of the country is in the hands of the Cabinet, which in August, 1916, was composed as follows:—

*Prime Minister and Minister for Foreign Affairs.*—Vossoughod Dowleh.

*Minister of the Interior.*—Sardar Mansur.

*Minister of War.*—Hechmated Dowleh.

*Minister of Education.*—Mometazol Molk.

*Minister of Finance.*—Vacant.

*Minister of Public Works.*—Ghavamed Dowleh.

*Minister of Justice.*—Prince Nosrâted Dowleh.

*Minister of Posts and Telegraphs.*—Yaminol Molk.

The country is divided into thirty-three provinces, which are governed by governors-general, who are directly responsible to the central Government, and can nominate the lieutenant-governors of the districts comprised in their own governments-general. Some of the governments-general are very small, and do not bear subdivision into districts, &c.; others are very large, and comprise several provinces. Governors-general and lieutenant-governors are generally called Hâkim, the former also often have the title of Wâli, Fermân Fermâ, &c. A lieutenant-governor is sometimes called Nâib el-Hukûmah; one of a small district is a Zâbit. Every town has a mayor or chief magistrate called Kalântar, or Darogha, or Beglerbegi. Every quarter of a town or parish, and every village, has a chief who is called Kedkhodâ. These officers, whose chief duty is the collection of the revenue, are generally appointed by the lieutenant-governors, but sometimes elected by the citizens. Most of the governors have a vizir or a pîshkâr, a man of experience, to whom are entrusted the accounts and the details of the government. The chiefs of nomad tribes are called Ilkhânî, Ilbegî, Wâli, Serdâr, Sheikh, Tushmâl; they are responsible for the collection of the revenues to the governors of the province in which their tribe resides.

A law of May, 1907, provides for the election of rural and town councils. In these elections practically all subjects have a right to vote, and the councils will be in direct communication with the National Council.

On August 31, 1907, Great Britain and Russia agreed between themselves to limit the spheres of their respective interests in Persia to the Persian provinces adjoining the Russian frontier on the one hand, and the British frontier on the other. The two Powers respect the integrity and independence of Persia, but, at the same time, contemplate the possible necessity of financial control in conformity with the principles of the agreement. The approximate area, population, and customs revenue of each of the three spheres are given as follows:—

	Area sq. miles	Population	Net Revenue Customs (1914-15) £
British sphere . . . . .	137,000	690,000	31,745
Russian sphere . . . . .	305,000	6,900,000	570,000
Neutral sphere . . . . .	185,000	1,910,000	108,203

But in 1914-15 the Seistan (British sphere) revenues were compounded with those of Eborassan (Russian sphere), and all those of Neutral sphere were hypothecated to England against loans and advances.

### Area and Population.

According to the latest and most trustworthy estimates, the country—extending for about 700 miles from north to south, and for 900 miles from east to west—contains an area of 628,000 square miles. A vast portion of this area is an absolute desert, and the population is everywhere so scanty as not to exceed, on the average, fifteen inhabitants to the square mile.

The population now is estimated at about 9½ millions.

The number of Europeans residing in Persia does not exceed 1,200. There are just over 600 British subjects resident in Persia (exclusive of British Indians).

The principal cities of Persia are :—Teheran, with 280,000 ; Tabriz, with 200,000 ; Ispahan, with 80,000 ; Meshed and Kerman, with 60,000 ; Yezd, with 45,000 ; Barfurush and Shiraz, with 50,000 ; Hamadan, Kazvin, Kom, Kashan, Resht, each with 30,000 to 40,000 inhabitants. Of the nomads 260,000 are Arabs, 720,000 Turks, 675,000 Kurds and Leks, 20,700 Baluchis and Gipsies, 234,000 Lurs.

### Religion.

Of the population about 8½ millions are Mahometans of the Shi'ah sect, and 850,000 of the Sunni sect ; 10,000 are Parsis (Guebres), 40,000 Jews, 50,000 Armenians, and 30,000 Nestorians.

The Mahometans of the sect called Shi'ah differ to some extent in religious doctrine, and more in historical belief, from the Moslems of the Turkish Empire, who are called Sunni. The Persian priesthood (ulemâ) is very powerful, and works steadily against all progress coming from Europe. Any person capable of reading the Koran and interpreting its laws may act as a priest (mullâ). As soon as such a priest becomes known for his just interpretation of the divine law, and for his knowledge of the traditions and articles of faith, he is called a mujtahid, or chief priest. There are many mujtahids in Persia, sometimes several in one town ; there are, however, only four or five whose decisions are accepted as final. The highest authority, the chief priest of all, is the mujtahid, who resides at Kerbelâ, near Baghdâd, and some consider him the vicegerent of the Prophet, the representative of the Imâm. The Shah and the Government have no voice in the matter of appointing the mujtahids, but the Sheikh-ul-Islâm, chief judge, and the Imâm-i-Jum'ah, chief of the great mosque (Masjed-i-Jâm'ah) of a city, are appointed by Government. Under the Imâm-i-Jum'ah are the pish namâz or khatib (leader of public prayers and reader of the Khutbeh, the Friday oration), the mu'azzin (crier for prayers), and sometimes the mutavali (guardian of the mosque) ; this latter, as well as the mu'azzin, need not necessarily be a priest. All mosques and shrines have some endowments (wakf), and out of the proceeds of these are provided the funds for the salaries of the priests attached to them. The shrines of some favourite saints are so richly endowed as to be able to keep an immense staff of priests, servants, and hangers-on.

The Gregorian National Armenians form two dioceses, each under a bishop. One bishop resides at Tabriz, the other at Ispahan. There are also a few thousand Roman Catholic Armenians in Persia who have a bishop of their own rite at Ispahan, the bishop of the Latin rite residing at Urumiah. There is a wide tolerance exercised towards Armenians and Nestorians, Jews, and Parsis in cities where Europeans reside ; in other places, however, they occasionally suffer oppression from Mussulmans belonging to the lower classes.

### Instruction.

In recent years the educational question has played a prominent part in Persia. Many schools of various degrees, entirely on European lines, have been established; the Ministry of Education has undergone radical reforms; the Educational Council recently created is doing very useful work; female education has been greatly advanced. It is said that there are now some 180 schools in Persia with an aggregate of 10,000 pupils of both sexes.

There are many colleges (*medressch*), supported by public funds, in which students are instructed in religion and Persian and Arabic literature, as well as in a certain amount of scientific knowledge, and many schools for children, while private tutors are very common, being employed by all families who have the means. A polytechnic school with a number of European professors, opened in Teheran in 1849, has done much towards introducing the knowledge of Western languages and science into Persia, and four French professors were recently engaged for work at the college. There are also military colleges at Teheran and Tabriz. At Teheran there is a French school supported by the Alliance Française. But the bulk of the population are taught only to read the Korân. A 'political college,' *Medressch i Siasi*, now having 30 pupils, was opened in 1900, and prepares candidates for service in the Foreign Office, which pays 75,000 *kran* per annum for its maintenance.

### Justice.

Justice is administered by the governors and their representatives, and by the *Sheikhs-ul-Islâm* and the priesthood. The former administer justice according to the *Urf*, the unwritten or common law; the latter according to the *Shar'*, the written or divine law.

The dispensation of justice is always summary. In May, 1888, the Shah published a proclamation stating that henceforth no subject would be punished except by operation of law, and that all subjects had full liberty as to life and property. But another proclamation published in June annulled the first as far as regards liberty of property.

### Finance.

In May, 1916, a "Commission Financière Mixte," composed of the Administrator of the Treasury (a Persian), one Russian, one English and two other Persians, was formed for the inspection and approval of past due claims on the Government.

The revenue for 1911-12 amounted to 2,042,850*l*, and the expenditure to 1,608,600*l*. In 1912-13 the revenue amounted to 1,055,792*l*, and in 1913-14 to 1,480,778*l*.

More than half of the revenue consists of payments in cash or kind raised by assessments upon towns, villages, and districts, each of which has to contribute a fixed sum, the amount of which is changed from time to time by tax-assessors (*mumayiz*) appointed by the Government. Almost the entire burthen of taxation lies upon the labouring classes.

Approximate gross Customs receipts during year 1914-15 (£1 = 60 *Kran*) compared with years 1912-13 and 1913-14:—

—	1912-13	1913-14	1914-15
Northern Zone:—	£	£	£
Azerbaijan (Tabriz) . . . .	164,326	171,725	85,912
Astara . . . . .	38,776	40,822	36,809
Ghilan (Enzeli) . . . . .	212,577	184,416	128,333
Mashedisair . . . . .	48,833	47,083	26,018
Benderguez . . . . .	31,318	27,786	17,700
Khorassan . . . . .	83,499	91,769	64,000
Kermanshah . . . . .	84,970	104,663	52,337

	1912-13	1913-14	1914-15
Southern Zone:—	£	£	£
Bushire . . . . .	98,521	82,021	90,975
Bunder Abbas . . . . .	31,096	38,997	26,378
Mohammerah . . . . .	—	53,110	32,310
Teheran . . . . .	16,489	19,580	28,425
Total . . . . .	810,405	861,872 <sup>1</sup>	589,197

<sup>1</sup> The Kran value of the gross receipts is actually 4,276,83s. better than the previous year, but the 10% rise in the rate of exchange reduces it to nil in the sterling value.

With all overdue instalments paid up, the total debt of Persia as at December 31, 1916, was as follows:—

Loans	Original Amount		Outstanding	
	£	s. d.	£	s. d.
1. Russian 5 per cent. loan of 1900, 1902 . . . . .	3,439,000	0 0	3,147,564	0 0
2. Russian Consolidated 7 per cent. loan, 1911 . . . . .	1,111,100	0 0	825,440	0 0
3. Indian 5 per cent. loan . . . . .	314,281	16 4	255,799	6 8
4. Imperial Bank of Persia 5 per cent. loan . . . . .	1,50,000	0 0	1,246, 75	0 0
5. British Advances of 1912-14, 7 per cent . . . . .	490,000	0 0	490,000	0 0
6. British Advances, 1915-16 . . . . .	360,000	0 0	360,000	0 0
	6,964,281	16 4	6,325,678	6 8

The above represents what the Persian Government *should* owe, but the instalments due have not all been paid up owing to the diminution of customs receipts which guarantee the repayments: thus (2)—Nothing has been paid since July, 1914, the *real* debt is therefore 959,725*l.*; or (6) in September, 1915, the British Government decided to assist Persia by further advances of 30,000*l.* per month as from January, 1915: these advances, with the exception of 23,000*l.*, have been fully paid: nothing has yet been decided as to how long these advances are to continue nor of the mode of repayment.

## Defence.

### ARMY.

The Persian army is of Oriental type, and is irregularly recruited. European officers of various nationalities have been employed from time to time, but have not been able to effect much. Certain districts are supposed to furnish battalions, and each of the provinces several battalions. Where the tribal system prevails, the tribe furnishes 1, or sometimes 2, battalions, usually under their own chiefs. Christians and Jews pay a tax, and cannot be called on to serve. The *nizam*, or regular troops, consist, according to the official lists, of 79 battalions of infantry, 23 batteries of field artillery, and a battalion of pioneers, but whether many of these units actually exist is uncertain; it is supposed to be formed into 12 divisions. The strength of battalions is, nominally, from 600 to 800, and the batteries have from 4 to 8 guns. The irregular troops are believed to amount to about 50,000 district and tribal horse, and an uncertain number of footmen, all badly, or indifferently, armed, and of no value whatever.

There is also at the capital the "Cossack Brigade," consisting of 8 squadrons, 1 small battalion of infantry and a horse battery of 6 (Krupp) guns. The total strength does not exceed 2,000 of all ranks. The men are Persians, organised and trained by Russian officers. In 1912, Russia

obtained the formal consent of the Persian Government to the formation of a similar Cossack Brigade at Tabriz under Russian officers; the consent of the Persian Government was given as a condition for the withdrawal of Russian troops in Azerbaijan. Owing to the deficiency of the Customs Receipts of the Northern Zone, from which the Brigade should be paid, the Russian Government itself has been paying for the needs of the Brigade.

There was a Gendarmerie under Swedish officers, consisting of about 7,000, of whom about 1,000 were mounted. They were organised in 6 regiments (9 battalions) and were armed with the Mauser; they had also 12 machine guns and 4 mountain guns. The regiments were distributed as follows:—2 in Teheran, 1 at Ispahan, 1 at Shiraz, 1 at Burujird, 1 at Kazvin, and 1 company at Kerman. There was also an extra and independent force in Tabriz. The whole force was under 36 Swedish officers and some 200 native officers. The cost of upkeep of this force was 360,000*l.* annually. The claims of the Gendarmerie against the Government for unpaid budgets amounted in September, 1915, to 40,000*l.*, and as the pay was not forthcoming the force was disbanded in September, 1915. The length of roads under the charge of the gendarmerie was about 950 miles. The remnants of the Gendarmerie were enrolled at the end of 1915 as a force of 'Amnieh' (or Roadguards) numbering 2,000 men (of whom 300 were in Yazd and the rest in Teheran) under a Swedish officer, not of the regular army.

In 1913 the police service of Teheran was also handed over to Swedish organizers, of whom there are 4. There are also forces at Kazvin, and Ispahan, and some in Tabriz and Resht.

#### NAVY.

The navy is quite unimportant, for the only boat is used for Customs purposes.

### Production and Industry.

Besides great quantities of wheat, barley, rice, fruits, gums, drugs, wool, cotton, &c., Persia produces much silk. The opium industry, as well as the production of gums, chiefly tragacanth, are increasing. The wool of Khorassân is the best, and much of it reaches Bradford *via* Batum. Persian carpets, of which there are many kinds, are all made by hand. The export of carpets amounted to 977,429*l.* in 1911-12, 1,207,856*l.* in 1912-13, and 431,140*l.* in 1914-15. The principal centres of the industry are Tabriz, Hamadan, Sultanabad, and Kerman.

The mineral deposits of Persia are considerable. The zones producing minerals are (1) the Province of Azerbaijan, (2) the slopes of the Elburz range, (3) Khorassan, (4) Kerman, (5) the districts around Ispahan and Nain, and (6) the region of Persian Gulf. In Azerbaijan, iron, lead, and copper ores exist in abundance. Lead is found in Khalkal region. Coal is worked near Tabriz. The slopes of the Elburz are rich in deposits of coal and iron. Turquoise mines are found in Khorassan, and also copper, coal and salt. Kerman produces copper, lead, manganese, marble, borax, turquoises, iron, mercury, nickel, and cobalt. In the southern region along the Persian Gulf the chief minerals found are naphtha, rock salt, and iron ochre.

#### Commerce.

The principal centres of commerce are Tabriz, Teheran, Hamadan, and Ispahan; the principal ports, Bender Abbas, Mohammediah, and Bushire on the Persian Gulf, and Astara, Enzeli, Mechedissar, and Benderguez on the Caspian. On March 21, 1899, the Government abolished the farm system in

Azerbaijan and Kermnashah, and one year later in all other provinces, establishing at the same time a uniform duty of 5 per cent. *ad valorem* on imports and exports. However, the districts of Mohammerah (with imports and exports valued at about 300,000*l.* per annum), of the Karun River and of Kurdistan on the western frontier, that of Seistan on the eastern frontier, and some of the smaller ports on the Persian Gulf, were then not interfered with, and the greater part of the Persian Gulf pearl trade also escaped the authorities until the following year.

The commercial treaty with Great Britain made in 1857 provided for the 'most favoured nation' treatment. In October, 1901, a treaty between Persia and Russia was concluded, fixing a new tariff, but this treaty expressly reserved the 'most favoured nation' treatment for the countries already enjoying it. The treaty was ratified in December, 1902, and the new tariff came into force February 14, 1903. A few days before, a new treaty (ratified in May) was made with Great Britain, under which the duties levied on British imports will be the same as on Russian imports.

According to the statistics published by the Minister of Finance the values of the imports and exports for the six years 1909-15 were as follows :—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1910-11	9,690,153	7,508,538	1913-14	11,766,633	8,287,993
1911-12	11,404,169	8,415,694	1914-15	8,322,030	6,600,960
1912-13	11,351,512	8,726,665	1915-16	7,735,000	6,285,577

The following table shows (in thousands of kran : 55 kran = 1*l.* in 1913-14, and 60 kran in 1914-15) the values of the chief imports into, and exports from, Persia in 1913-14 and 1914-15 :—

Imports	1913-14	1914-15	Exports	1913-14	1914-15
	1000 Kran	1000 Kran		1000 Kran	1000 Kran
Cottons . . . . .	201,018	142,000	Fruits . . . . .	70,384	51,645
Sugar . . . . .	170,519	127,210	Carpets . . . . .	53,677	25,762
Tea . . . . .	38,602	23,159	Cotton . . . . .	85,236	73,484
Gold and silver bars	5,687	22,704	Fish . . . . .	7,886	7,550
Do. coin . . . . .	9,217	3,919	Rice . . . . .	42,197	21,375
Petroleum . . . . .	10,199	13,036	Gold and silver coins	16,924	13,530
Yarn . . . . .	13,721	10,522	Gums . . . . .	12,924	5,660
Flour . . . . .	16,959	8,905	Opium . . . . .	37,714	41,446
Woollens . . . . .	13,416	8,672	Wool . . . . .	12,408	12,207

United States . . . . .	4,064	7,200	185,540	73,550
British Empire . . . . .	3,235,540	2,468,000	1,038,378	1,472,033
France and Colonies . . . . .	3,058,91	185,000	83,440	18,700
Italy . . . . .	101,783	65,930	190,428	2,570
Netherlands and Colonies . . . . .	24,933	8,015	250,264	28,700
Russia . . . . .	6,470,693	4,668,520	5,492,021	4,374,400
Switzerland . . . . .	16,368	9,720	1,048	400
Turkey . . . . .	406,155	318,050	670,310	357,000
Muscat . . . . .	2,809	5,150	3,112	4,724
Oman . . . . .	39,397	26,682	181,034	92,800

Of the total trade Russia enjoys 60·53 per cent., and the British Empire 15·5 per cent.

Tonnage entered at Bushire, Lingah, Bunder Abbas, Mohammerah, and several smaller ports was : in 1914-15, 1,591,080 tons, of which 1,339,006 British, 11,739 Russian, and 81,623 German ; 13,274 Japanese. At Caspian ports in 1913-14, 797,850 tons, all Russian ; in 1914-15, 752,617 tons, all Russian.

There are trade routes through Trebizond, through Resht and Meshed to Russia, through Khorassan and Seistan to Afghanistan and India, and through Kermanshah to Baghdad.

Total trade between Persia and United Kingdom (Board of Trade Returns) for 5 years :—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Persia to U.K. . . . .	957,715	429,562	794,868	944,401	485,285
Exports to Persia from U.K. . . . .	878,143	724,808	709,942	880,651	552,415

### Money and Credit.

The Shah in 1889 granted a concession to Baron Julius de Reuter for the formation of a State Bank of Persia, with head office at Teheran and branches in the chief cities. The bank was formed in the autumn of the same year, with the title "The Imperial Bank of Persia," and incorporated by Royal Charter granted by H.M. the late Queen, and dated September 2, 1889. The authorised capital is 4 millions sterling, which may be increased. The bank started with a capital of one million sterling, of which the greater part was remitted to Persia at the then reigning exchange of 32-34. In consequence of the great fall in silver and the rise in the exchange, to 50 or more, the capital was reduced in December, 1894, to

650,000*l*. The bank has the exclusive right of issuing bank-notes—not exceeding 800,000*l*. without the assent of the Persian Government. The issue of notes is on the basis of the silver krân. In virtue of one of the articles of the concession the cash reserve for the first two years was 50 per cent., and afterwards 33 per cent. The bank had the exclusive right of working throughout the Empire the iron, copper, lead, mercury, coal, petroleum, manganese, borax, and asbestos mines, not already conceded. There is also established at Tehran the Russian ‘Banque d’Escompte,’ formerly ‘Banque des Prêts de Perse’ (which is connected with the Russian State Bank and floated the loans of 1900 and 1902 to Persia). A concession for a National Bank was signed, February 6, 1907. The capital of this bank will be 15,000,000 tomans. It will have the right to issue notes after the Imperial Bank’s right has expired. It has not yet (January, 1917) been established.

### Communications.

A small railway from Teheran to Shah Abdul-azim (six miles) was opened in July, 1888, and is in the hands of a Belgian company, ‘Société des chemins de fer et tramways de Perse.’ The river Karun at the head of the Persian Gulf has been opened to foreign navigation as far as Ahwaz. It is served by a fortnightly steamship service subsidised by the British Government.

Until 1903 the only carriageable roads in Persia were Teheran-Kom and Teheran-Resht, the former 91 miles, the latter about 220 miles, and on both mails and travellers were conveyed by carts. Since then good roads have been made from Tabriz to Julfa (Russian frontier), Kazvin to Hamadan, Meshed to Askabad, Kom to Sultanabad, and others. Mails and passengers are now conveyed by carts on them and some other roads, but the latter, only slightly improved and being practically as nature made them, are somewhat difficult for wheeled traffic. A concession for the construction of a cart road with the option of changing it later for a “chaussée,” or macadamised road, from Kazvin to Enzeli on the Caspian was granted to a Russian firm in 1893, and the Russian Government having aided with capital and guarantee, construction was begun in 1897 and the road opened for traffic in August, 1899. The concession includes the road from Kazvin to Teheran, which has been open for wheeled traffic since 1880, and a branch from Kazvin to Hamadan. All these are in good working order now.

In 1898 Messrs. Lynch took over a concession granted to a Persian subject for a caravan road between Ahwaz and Ispahan, with rights of levying tolls, and opened the road for traffic in the autumn of 1900. In 1903 Messrs. Lynch acquired the concessionary rights of the Imperial Bank of Persia for the roads Teheran-Kom-Ispahan, Kom-Mohammerah, and formed the “Persian Road and Transport Company,” which started construction on the Kom-Ispahan section in the summer of 1904.

In virtue of another concession a Russian company has constructed a railway from Julfa (Perso-Russian frontier) to Tabriz (opened March 7, 1916).

Persia has a system of telegraphs consisting of 6,312 miles of line, with 10,754 miles of wire, and 131 stations.—(1) 1,706 miles of line with 5,318 miles of wire are worked by an English staff, and form the ‘Indo-European Telegraph Department in Persia,’ a British Government department, established in virtue of a number of conventions from 1863 to 1901 between the British and Persian Governments. The last convention was for the construction and working by the British Government of a three-wire line from Kashan to British Beluchistan via Yazd, Kerman, and Bam. Telegraphic communication with India was effected in May, 1904. (2) 457 miles of line with three wires, 1,371 miles of wire between Teheran and Julfa on

the Russo-Persian frontier, are worked by the Indo-European Telegraph Company, Limited, according to its concession of 1868. (3) About 3,600 miles of single wire lines belong to the Persian Government, and are worked by a Persian staff.

The first regular postal service, established by an Austrian official in Persian employ, was opened January, 1877. Under it mails are regularly conveyed to and from the principal cities in Persia. There is a service twice a week to and from Europe via Resht or Tabriz and Tiflis (letters to be marked 'via Russiæ') and a weekly service to India via Bushire. There are 218 post offices. In 1902 the post office was joined to the Customs Department worked by Belgian officials. In August, 1909, posts and telegraphs were placed in charge of a Minister of Posts and Telegraphs, who is a member of the Cabinet, but as to the number of letters, postcards, parcels, &c., conveyed, and telegrams transmitted, very few statistics are obtainable. During the year 1912-13, about 284,000,000 letters, post-cards and newspapers, of which 4,000,000 were registered, were delivered in Persia, and there were 320,000 parcels delivered from Europe via Russia.

### Money, Weights, and Measures.

The monetary unit is the kran, a silver coin, formerly weighing 28 nakhods (88 grains), then reduced to 26 nakhods (77 grains), now weighing only 24 nakhods (71 grains) or somewhat less. The proportion of pure silver was before the new coinage (commenced 1877) 92 to 95 per cent.; it was then fixed at 90, but occasionally coins with only 89½ have been turned out from the Mint. In 1874 a kran had the value of a franc, 25 being equal to 1*l*. The value of a kran is at present (January, 1916) about 4*d*., a 1*l*. bill on London being worth 60 kran.

The coins in circulation, with their values calculated at exchange 1*l*. = 50 kran, are:—

Copper.		Silver.	
<i>Pal</i>	0·12 <i>d</i> .	Five <i>Shâhîs</i> = 10 <i>Pal</i>	= ¼ <i>Kran</i> 1·20 <i>d</i> .
<i>Shâhî</i> = 2 <i>Pal</i>	0·24 <i>d</i> .	Ten <i>Shâhîs</i> = ½ <i>Kran</i>	2·40 <i>d</i> .
Two <i>Shâhîs</i> = 4 <i>Pal</i>	0·48 <i>d</i> .	One <i>Kran</i> = 20 <i>Shâhîs</i>	4·80 <i>d</i> .
Four <i>Shâhîs</i> = (1 <i>Abbâssi</i> )	0·96 <i>d</i> .	Two <i>Kran</i>	9·60 <i>d</i> .
		Five <i>Kran</i>	2 <i>s</i> . 0·00 <i>d</i> .

Copper is out of official circulation; it only exists in outlying provinces.

In consequence of an excess of coinage by a former mint-master the copper money greatly depreciated in value since 1896 and was circulating at less than its price of copper, viz. 80 to 83 copper shahis (weighing about ½ lb.) to one silver kran (4½*d*.). The Government then decided to introduce a nickel coinage instead; great quantities of five and ten centimes pieces, of same size and weight as those current in Belgium, and of the nominal value of ½ and 1*o* kran, were coined at Brussels and put into circulation in the autumn of 1900, the copper coinage being withdrawn, and of these nickel pieces nearly five million kran face value are now (January, 1911) in circulation.

Gold coins are: ¼ *Toman*, ½ *Toman*, 1 *Toman*, 2, 5 and 10 *Tomans*, but they are not in circulation as current money, because of their ever-varying value in *Kran* (silver) and no coins of the higher values have been struck for some years. A *Toman* in silver is the equivalent of 10 *kran* (now worth 3*s*. 4*d*.), but a gold *Toman* has a value of 22 *Kran* (7*s*. 4*d*.).

Accounts are reckoned in *dînârs*, an imaginary coin, the ten-thousandth part of a *toman* of ten kran. A *krân* therefore = 1,000 *dînârs*; one *shâhî* = 50 *dînârs*.

The unit of weight is the miskâl (71 grains), subdivided into 24 nakhods (2·96 grains) of 4 gandum (·74 grain) each. Sixteen miskâls make a sir, and 5 sir make an abbâsî, also called wakkeh, kervânkeh. Most articles are bought and sold by a weight called batman or man. The mans most frequently in use are :—

<i>Man-i-Tabriz</i> = 8 <i>Abbâsst</i>	.	.	.	= 640 <i>Miskâls</i>	= 6·49 lbs.
<i>Man-i-Noh Abbâst</i> = 9 <i>Abbâsst</i>	.	.	.	= 720 „	= 7·30 „
<i>Man-i-Kohneh</i> (the old man)	.	.	.	= 1,000 „	= 10·14 „
<i>Man-i-Shâh</i> = 2 <i>Tabriz Mans</i>	.	.	.	= 1,280 „	= 12·98 „
<i>Man-i-Rey</i> = 4 „	.	.	.	= 2,560 „	= 25·96 „
<i>Man-i-Bender Abbâsî</i>	.	.	.	= 840 „	= 8·52 „
<i>Man-i-Hâshemî</i> = 16 <i>Mans</i> of	.	.	.	720 „	= 116·80 „
Corn, straw, coal, &c., are sold by <i>Khurâdr</i> = 100 <i>Tabriz Mans</i> = 649·142 „					

The unit of measure is the zar or gez ; of this standard several are in use. The most common is the one of 40·95 inches ; another, used in Azerbaijan equals 44·09 inches. A farsakh theoretically = 6,000 zar of 40·95 inches = 3·87 miles. Some calculate the farsakh at 6,000 zar of 44·09 inches = 4·17 miles.

The measure of surface is jerib = 1,000 to 1,066 square zar of 40·95 inches = 1,294 to 1,379 square yards.

## Diplomatic Representatives.

### 1. OF PERSIA IN GREAT BRITAIN.

*Envoy Extraordinary and Minister Plenipotentiary.*—Mirza Mehdi Khan Mochirof Molk (appointed July 4, 1911).

*Counsellor.*—Mirza Abdol Ghaffar Khan.

*First Secretary.*—Mohamed Ali Khan Ehtesham Homayoun.

*Third Secretary.*—Fathollah Khan Noury Monazemes-Saltaneh.

*Honorary Attaché.*—Abdol Ali Khan Sadighes-Saltaneh.

*Consul-General.*—H. S. Foster.

### 2. OF GREAT BRITAIN IN PERSIA.

*Teheran: Envoy, Minister, and Consul-General.*—Sir C. M. Marling, C.B., K.C.M.G. Appointed March, 1915.

*Counsellor.*—Hon. E. Scott, C.M.G., M.V.O.

*Secretaries.*—R. J. V. Astell and G. P. Churchill.

*Military Attaché.*—Lt.-Col. G. S. F. Napier.

*Honorary Attaché.*—Henry Maclean.

There are Consular representatives at Teheran, Tabriz (C.), Resht, Bushire (C. G.), Bunder Abbas, Meshed (C.-G.), Isfahan (C.-G.), Seistan, Kerman, Mohammedrah, Shiraz, Kermanshah, Hamadan, Yezd, Aliwaz, Turbat-i-Haidari, Sultanabad.

## Statistical and other Books of Reference concerning Persia.

### 1. OFFICIAL PUBLICATIONS.

*Blue Books.*—Affairs of Persia, December 1906, to November, 1908, 1909, 1910, 1911, 1912, 1913, and 1914.

*Eastern Persia: an Account of the Journeys of the Persian Boundary Commission, 1870-72.* 2 vols. 1876.

*Treaty Series*, No. 10, 1903. This gives the Commercial Convention of May 27, 1903. The customs tariff is also given in the Board of Trade Journal (No. 325) for February 19, 1903, and in United States Consular Reports (No. 273) for June, 1903. *Treaty series* No. 34. Convention with Russia relative to Persia, Afghanistan, and Tibet, 1907.

*Foreign Office Reports.* [On the trade of Bushire, Lingah, Bunder Abbas, Mohammedrah and other ports in the Persian Gulf. On Kermanshah. On the trade of Resht, and of Meshed. Annual Series. London.

## PERU.

(REPÚBLICA DEL PERÚ.)

### Constitution and Government.

THE Republic of Peru, formerly the most important of the Spanish Viceroyalties in South America, issued its declaration of independence July 28, 1821; but it was not till after a war, protracted till 1824, that the country gained its actual freedom from Spanish rule. The Republic is politically divided into departments, and the departments into provinces. According to the Constitution proclaimed on November 10, 1860, the legislative power is vested in a Senate (52 members) and a House of Representatives (116 members), the latter composed of deputies of the provinces, in the proportion of one for every 30,000 inhabitants or fraction exceeding 15,000 and the former of representatives in the proportion of four senators for each department which has more than eight provinces; three for each department which has less than eight provinces and more than four; two for each department which has less than five and more than one; one for a department having only one province; and one for the littoral province of Callao. Senators must have an income of 1,000 soles (100*l.*) a year or belong to a scientific profession; and deputies 500 soles (50*l.*) a year, or belong to a scientific profession. Both senators and deputies are elected by a direct vote. Every two years one-third of the members of each chamber, as decided by lot, retire. Congress meets annually on July 28, and sits for 90 days only. It may be summoned as often as necessary, but no extraordinary session may last more than 45 days.

The executive power is entrusted to a President, elected for 4 years and not re-eligible till after another 4 years. He receives 48,000 soles (4,800*l.*) a year and an amount for administration expenses, fixed by Congress each year. There are two Vice-Presidents, who take the place of the President only in case of his death or incapacity, and they are elected for four years. The Vice-Presidents receive no salary as such. The President and Vice-Presidents are elected by direct vote.

*President.*—Dr. José Pardo. Assumed office on August 18, 1915. Term of office expires August 18, 1919.

The President exercises his executive functions through a Cabinet of six ministers, holding office at his pleasure. The ministers are those of the Interior, War and Marine, Foreign Affairs, Justice, with Worship and Instruction, Finance and Public Works. Each minister receives 6,000 soles (600*l.*) a year. None of the President's acts has any value without the signature of a minister.

The departments are divided into provinces (110 in all), and these are subdivided into districts (850 in all). Each department is administered by a Prefect, and each province by a Sub-Prefect. Municipal councillors are elected by direct vote, and foreigners are eligible.

### Area and Population.

There has been no enumeration of the population in recent years. The census returns of 1876 put the number of inhabitants at 2,660,881, of whom about 18·8 per cent. were white, 1·9 per cent. negroes, 57·6 per cent. Indian, 24·8 per cent. mestizos (Cholos and Zambos), and 1·9 per cent. Asiatic, chiefly Chinese. An estimate in 1908 gives the population in that year as 4,500,000. The population of the capital, Lima, according to the municipal

census of 1908, was 140,884, in 1913 it was 143,500; Callao 34,346 (in 1905), Arequipa 35,000 to 40,000, Cuzco 10,000 to 15,000, Iquitos district 12,000, Ayacucho 14,346, Huara 7,646, Huacho 6,283.

The Republic (including Tacna) is divided into 19 departments and 3 provinces (Callao, Tumbes and Moquegua), the areas of which, according to estimates supplied by the Lima Geographical Society, are given below with the population, according to the census returns of 1876 (the latest official one) and an estimate for 1896. The estimate, however, is not to be accepted as satisfactory, grave doubts being entertained whether the population is increasing. (The chief towns are shown in brackets):—

Departments and Provinces	Area : English square miles	Population		Pop. per square mile, 1896
		1876	1896	
<i>Departments :</i>				
Amazonas (San Carlos) . . . .	13,943	34,284	70,676	5.0

<sup>1</sup> Province of Lima, pop. (1908) 172,927.

<sup>2</sup> Created in 1912.

There are, besides, many uncivilised Indians, but their numbers are absolutely unknown. The Peruvian Government encourages immigration of properly qualified persons, but would-be settlers entirely destitute of capital are mentioned as undesirable.

As a result of the war with Chile, the latter country has annexed the province of Tarapacá. The Chileans have also, under the treaty signed in 1883 and ratified in 1884, occupied the provinces of Tacna and Arica since 1883. A popular vote should in 1894 have decided to which country they are to belong, but owing to the failure of negotiations for arriving at a *modus operandi*, the decision was deferred.

As to the boundary dispute with Bolivia an arrangement has been come to by direct negotiations between Bolivia and Peru. The frontier line

between them was fixed from the mouth of the Heath to that of the Yaverija (1912), and finally demarcated by a joint commission. Those with Colombia and Ecuador were referred to the King of Spain. The question at issue concerned the possession of over 100,000 square miles of land rich in rubber, timber, and probably gold lying about the head waters of the Amazon. The King, on the evident unwillingness of Ecuador to decide the dispute by arbitration, renounced his functions as arbitrator in November, 1910. The United States then intervened, and hostilities were for the moment averted by the agreement of the disputants to accept the mediation of the United States, Argentina, and Brazil. A definite arrangement has been made with Brazil as to boundary, favourable, on the whole, to Peru.

The region north of the Marañon from the Pongo de Manseriche is claimed by Ecuador and Colombia and Peru. This region formed in the Spanish Colonial days the Comandancia de Maynas, and was allocated to the Virreynato of Santa Fé, then to the Audiencia of Quito, and for religious and ecclesiastical purposes subject to the Archbishop of Lima. It has been occupied by Peru since 1840.

### Religion.

There is a Roman Catholic archbishopric (Lima, dating from 1545), 8 suffragan bishoprics and 3 Apostolic Prefectures. By the terms of the Constitution there exists absolute political, but not religious freedom, the 4th Article of the Constitution prohibiting the public exercise of any other religion than the Roman Catholic, which is declared the religion of the State. But practically there is a certain amount of tolerance, there being Anglican churches and missionary schools in Callao, Lima, Arequipa, and Cuzco. On October 3, 1913, however, both chambers agreed so to amend Article 4 of the Constitution as to grant full religious liberty, and the amended Article became law on November 11, 1915.

The churches and convents are the property of the State. The State pays about 16,000% annually for the purposes of public worship, including 300% for missions (though this sum has not been paid since 1907). In 1897 an Act was passed enabling non-Catholics to contract civil marriages. In 1903 an Act was passed giving still greater facilities for the marriage of non-Catholics.

### Instruction, Justice.

Elementary education is by law compulsory for both sexes, but the law is not enforced. It is free in the public schools that are maintained by the Government. In 1913, there were in Peru 2,253 primary schools with 3,063 teachers. In 1912 the number of pupils on the registers was 153,753. On 31st May, 1913, the number of pupils inscribed on the registers was 146,272 as compared with 129,003 on the same date in 1912, showing an increase of 17,269 pupils. There were (1912) 27 colleges in the republic, with 4,674 pupils. For elementary education (1912) 245,810% were appropriated, and for secondary education 80,523%. High schools are maintained by the Government in the capitals of the departments, the pupils paying a moderate fee. There is in Lima a central university, called 'Universidad de San Marcos,' founded by Charles V. in 1551; it has faculties of jurisprudence, literature, medicine, political science, and theology. There are also universities at Arequipa, Cuzco, and Trujillo. Lima possesses a school of mines and civil engineering, created in 1874, with good collections and laboratories, a national agricultural school, and a school of arts and trades recently established. There are in the capital and in some of the

principal towns private high schools under the direction of English, German, and Italian staffs. There is also a military and a naval school. Lima has also a public library, besides that of the university and school of mines.

Justice is administered in the Supreme Court at Lima composed of 11 judges and 3 fiscals, and in Superior and Minor Courts at Lima and 9 other judicial districts. The judges of the Supreme Court are chosen by Congress from lists of names presented by the Government; those of the Superior Courts and of the Minor Courts are chosen by the Government from lists of names presented by the Supreme and Superior Courts, respectively.

### Finance.

For the collection of the dues on alcohol, opium, tobacco, stamped paper for official uses, legacy and property transfer dues, etc.; a new syndicate was formed under Government approval called the *Compañía Recaudadora de Impuestos*, (the Tax Collecting Company) which began operations on the 1st April, 1913, making a loan to the Government, as a condition of its contract, of 1,245,000*l.*, which sum is to earn 7 per cent. interest per annum. The Company retains 115,000 for administration expenses as also 1 per cent. of the profits.

Salt is a Government monopoly created originally (1896) for the purpose of raising a fund for the ransom of the Provinces of Tacna and Arica. Latterly, however, the *Compañía Recaudadora de Impuestos* has undertaken, as one of the stipulations of its contract, to furnish the Government at any given moment with the necessary sum to make the service of amortization and interest of a loan it may contract for the ransom of the Provinces mentioned. This monopoly produced a net revenue of 119,652*l.* in 1915.

The revenue and expenditure for 5 years (ended May 31) were as follows (10 soles = 1*l.*) :—

—	1913	1914	1915	1916 <sup>1</sup>	1917 <sup>1</sup>
	£	£	£	£	£
Revenue . . . . .	3,417,974	2,921,498	3,424,326	2,686,950	3,412,237
Expenditure . . . . .	4,411,983	3,886,142	3,882,223	2,920,159	3,412,237

<sup>1</sup> Estimates.

The foreign debt of Peru was made up of two loans, contracted in England in 1870 and 1872, amounting to 32,688,320*l.* In 1889 the debt, including arrears of interest, amounted to 55,209,133*l.* In January, 1890, by the final ratification of the Grace-Donoughmore contract, Peru was released of all responsibility for the two loans, and the bondholders had ceded to them all the State railways for 66 years, and certain rights over guano deposits, mines, and lands.

The Peruvian Corporation is a foreign company, with headquarters in London, formed in 1890 to take over the then existing Peruvian foreign debt.

The terms of the above-mentioned contract were not carried out either by the Government or the Peruvian Corporation, and after long negotiations the agreement of June 20th, 1907, was signed. Under it, the obligations created on either side by the contract of 1890 were annulled, certain matters being, however, reserved for arbitration and for future contracts. The Government was to pay the Corporation annually for 30 years the sum of 80,000*l.* in monthly instalments, beginning in July, 1907. The Corporation was to proceed with the work of railway construction, taking in hand the continuation of the Central Railway to Huancayo, the Southern Railway to Cuzco, and the Pacasmayo Railway to Chilte, all of which extensions have since been finished and are now in operation, The Corporation lease is to be extended by 17 years, during which the Government will receive 50 per cent. of the net receipts (the service of railway obligations up to 6,000,000*l.* being deducted), and the taxation of the Corporation railways is fixed for 30 years. The Mollendo port works, the debt of 200,000*l.* due to Chile, the Chira canal, and the Cerro de Pasco mines are the chief subjects reserved for subsequent arrangement, the first two of which have since been definitely settled.

The Government extended the contract with the Peruvian Corporation for 10 years from September 11, 1911.

The total debt of Peru (August, 1916) amounted to 6,983,010*l.*, of which the internal debt amounted to 130,000*l.*, the loans to 1,498,787*l.*, bank obligations to 1,098,193*l.*, debts to the Tax Collecting Company 1,576,334*l.*, sundry loans 126,223*l.*, floating debt 1,993,471*l.*

### Defence.

Military service in Peru is compulsory and universal. The terms are 3 years in the active army (4 in the cavalry), 7 years (or 6) in the first reserve, 5 in the second reserve, and 15 years in the National Guard. In peace, the army consists of 5 battalions, 7 squadrons, 6 batteries, &c. Total establishment about 6,500 of all ranks. The infantry are armed with the Mauser rifle, model of 1891, and the cavalry have the Mauser carbine. The country is divided into five military districts. Total strength of police force, 5,408 (2,413 civil guards, 1,900 mounted police, 1,905 foot police).

The Peruvian navy now consists of 6 vessels: the *Lima*, a cruiser of 1,700 tons displacement, which has been re-boilered and is to be re-armed. Two cruisers, the *Almirante Grau* and the *Coronel Bolognesi*, 3,200 tons and 24 knots speed, were launched at Barrow in April, 1906. In 1911 the old French armoured cruiser *Dupuy de Lôme* was purchased, and renamed *Comandante Aguirre*. She is of 6,400 tons displacement; armament, 2 7·6 inch, 6 6·4 inch; armour 4 inches. The horse-power is 13,000, and in 1904 when the ship was re-boilered she made 22 knots speed. There are also 2 submarines, *Ferre* and *Palacios*, and one torpedo destroyer, *Teniente Rodriguez* (built in France and stationed at Callao).

Peru possesses a river flotilla on the Amazon, composed of the following vessels:—*America*, *Iquitos*, *Cahuapanas*, *Orellana*, *Requena*, *Puno*, and *Cuzco*.

### Agriculture and Industry.

The country may be divided into three zones: the coast strip, with an average width of 30 miles; the Sierra, or Uplands, lying between the coast range of mountains and the Andes proper; and the forest or wooded region, called the Montaña. The chief agricultural productions of Peru are cotton, coffee, and sugar. The chief coffee-growing districts are those of Chanchamayo, Perené and Paucartambo in Central Peru, where the Peruvian Corporation has done much useful colonising work. Coffee is also grown in the Huanuco district. The concession to the Corporation comprises about 2,750,000 acres, but the labour and transport difficulties in the tropical forest region are serious; much less than half the area conceded for colonisation is as yet occupied. The sugar industry is carried on chiefly in the coast region. The area devoted to cane cultivation was given in 1915 as 107,010 acres, and the number of labourers in the industry as 24,433. In 1915, 262,840 tons were produced, and 220,257 tons, valued at 5,577,869*l.*, exported. Cocoa cultivation is extending, about 200,000 cocoa trees having been recently planted in the Perené region. Rice is extensively grown, the annual production being about 35,714 tons. The quality is excellent, but the quantity is insufficient to meet local wants. There are about 20 rice mills in the country. Tobacco, wines and spirits, wheat, olives, ramie, and maize, are also produced. In 1909 the Government created a tobacco monopoly for the manufacture, importation and sale of tobacco. This industry is conducted by an organisation known as the *Compañía Recaudadora de Impuestos, Estanco del Tabaco*, at Lima. During 1915 it manufactured 359,299,052 cigarettes and 152,900 cigars, using 608,623

kilos of leaf tobacco grown in the country, 24,783 kilos imported from Colombia, and 56,247 kilos from Ecuador. In addition it imported 810,000 cigarettes and 90,149 cigars from Habana, 38,832 cigarettes and 160,000 cigars from other countries, mostly from England. Silk culture is being tried in the coast region. The most important coca growing district is in the province of Otuzco in the department of La Libertad, where there are several coca estates. Cocaine is manufactured in Lima, Otuzco, and several other towns. Besides, there are in the country dyes, cinchona, and other medicinal plants. There is a large export of alpaca, sheep, and llama wool. Thousands of square miles of healthy and fertile land of unsurpassed beauty on the eastern slopes of the Andes are available for colonisation. Rubber is collected in large quantities and shipped down the Amazon from Iquitos.

The guano deposits on Huanillos, Punta Lobos, and Pabellon de Pica, which had been delivered over to the Peruvian Corporation, reverted to the Chilean Government on February 2, 1901; they contained 40 or 50 thousand tons of guano; but those on the island of Lobos de Afuera, and at some places on the coast, still remain in possession of the Corporation. For the year ending June 30, 1916, the Corporation obtained a revenue of \$7,457.4 (136,843.4 in 1915) from the export of guano.

The following table shows the mineral production for 2 years:—

		1914.		1915.	
		Quantity.	Value.	Quantity	Value.
			£		£
Copper . . . . .	Metric tons	27,090	1,530,344	31,319	2,431,856

<sup>1</sup> The value after the petroleum has been refined.

## Commerce.

The value of the trade of Peru in 5 years (exclusive of Department of Loreto) has been as follows (10 soles = 1L):—

	1912	1913	1914	1915	1916 <sup>1</sup>
	£	£	£	£	£
Imports . . . . .	5,157,686	6,083,777	4,827,930	3,095,554	1,788,024
Exports . . . . .	9,438,581	9,137,781	8,767,790	14,123,071	6,474,959

<sup>1</sup> First 6 months.

The values of the principal imports and exports for 2 years are shown by the following table:—

Imports			Exports		
	1914	1915		1914	1915
	£	£		£	£
Cotton, Woollens and Silks . . .	580,460	301,821	Sugar . . . . .	2,640,952	5,577,869
Timber . . . . .	314,009	208,887	Cotton . . . . .	1,515,742	1,451,878
Coal . . . . .	278,625	111,324	Copper . . . . .	1,430,360	2,816,583
Wheat . . . . .	212,001	233,562	Petroleum . . . .	247,138	447,125
Foundry plant . .	161,977	101,526	Gums . . . . .	447,792	595,944

The distribution of the trade was mainly as follows (10 soles = 1l.):—

From or to	Imports		Exports	
	1914	1915	1914	1915
	£	£	£	£
U.S. America . . . . .	1,570,724	1,488,234	3,046,892	6,390,283
United Kingdom . . . .	1,338,552	662,546	3,274,098	3,621,624
Germany . . . . .	647,003	95,676	328,972	—
Belgium . . . . .	274,596	30,317	81,659	—
Italy . . . . .	201,632	157,831	10,245	19,086
France . . . . .	155,974	89,067	152,845	81,982
Chile . . . . .	89,618	94,390	1,282,140	2,893,245

Maritime custom receipts in 1915 amounted to 700,609l.; in 1914 to 938,867l.

Under the treaty of 1850 there is reciprocal freedom of commerce and navigation between the United Kingdom and Peru.

Total trade between Peru and United Kingdom in thousands of pounds for 5 years Board of Trade returns):—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Peru to United Kingdom	3,298	3,178	2,962	3,312	4,683
Exports to Peru to United Kingdom .	1,409	1,487	1,060	590	1,080

## Shipping and Navigation.

At Callao there entered, in the foreign trade, in 1915, 532 vessels of 1,013,030 tons, and cleared 525 of 961,512 tons. Of the total entering, 143 steamers were British, 177 Peruvian, 122 Chilean, and 1 German. Since 1886, foreign sailing vessels may not engage in Peruvian coasting trade; but foreign steamers, with special authorisation, may.

The merchant navy of Peru in 1916 consisted of 17 steamers of 23,342 tons.

## Internal Communications.

Good roads and bridges are required all over the country, and great efforts are being made for their construction. There is a carriage road from Sicuani to Cuzco, 90 miles.

In 1915 the total working length of the Peruvian railways was 1,724

miles. All the lines are standard gauge railways (4 ft. 8½ in.), with the exception of the Trujillo Railway and the Chimbote Railway, which are 3 ft. gauge, and the Guaquí to La Paz Railway, which is a metre gauge line. A small Government line connecting up Lima with the Port of Chilca, a short distance south of Callao, is being constructed; 16 miles were ready by August, 1916. It is intended to continue this to the Port of Pisco.

There were 252 telegraph offices in 1915. The length of State telegraph lines in 1915 was 7,849 miles of line. Number of telegrams (1915) 1,655,043. Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the Republics to the north. A telephone system has a network of 3,000 miles. Wireless telegraph lines between Iquitos and Masisea, and between Iquitos and Puerto Bermúdez were inaugurated July 8, 1908. In 1913 wireless offices at Callao, Pisco, Chala, Ilo, and Lima (San Christóbal) were opened. Total length of telephone wire (1914), 182,900 miles.

In 1915 there were 646 post offices; letters and packets transmitted, 25,118,491.

### Money and Credit.

A decree was issued by the President of the Republic on January 10, 1898, to give effect to the law of December 29, 1897, establishing a gold currency. By Act of December 14, 1901, gold became the only standard. The national gold coin, the *libra*, is of the same standard and weight as the pound sterling, which is also legal tender; 10 soles = 1*l.* sterling. Silver is legal tender up to 100 soles. Peru has no paper currency issued by the Government, but since the outbreak of the European War (1914) an issue in notes to the amount of 2,500,000*l.* has been made by a number of banks with the sanction of Congress.

These notes (10*s.*, 1*l.*, 5*l.* and 10*l.*) are guaranteed by the several banks with 20 per cent. bullion and 80 per cent. in approved bonds, shares and other securities deposited by them in their vaults and subject to Government supervision; they are by law declared legal substitute for the gold *£*. The actual amount of gold coin held in deposit on August 27, 1916, was 842,000*l.*, or rather more than the 36 per cent. required by law of Congress.

This issue is to be redeemed, in gold, six months after the signing of peace in Europe.

The national mint coined during the year 1915 silver soles, half soles, and one-fifth sole pieces to the value of 196,899*l.*, which was largely in excess of the amount coined the preceding year. During 1916, the mint issued gold coins to the value of 582,477*l.* There were 91,233 Peruvian gold pounds minted and 3,754 one-fifth pound gold pieces, the total value being 91,983*l.*

In Peru the commercial banks are: the Bank of Peru and London (capital, 500,000*l.*), the Italian Bank, the International Bank of Peru, the American Mercantile Bank (founded in 1916), and the Banco Popular, the Caja de Depósitos y Consignaciones, the Banco Alemán Transatlántico, and the Caja de Ahorros de la Beneficencia de Lima, a savings bank with deposits amounting to over 200,000*l.*

### Money, Weights, and Measures.

The gold coin is the *Libra*=the English sovereign. The coinage of gold 5-sole pieces (equivalent to half sovereigns) has been authorised. Silver coins

are the *Sol* (10 soles=1 libra),  $\frac{1}{2}$  sol,  $\frac{1}{3}$  sol,  $\frac{1}{10}$  sol,  $\frac{1}{20}$  sol. Bronze coins are 1 and 2 *centavo* pieces (100 centavos=1 sol).

The <i>Ounce</i> . . . . .	=	1·014 ounce avoirdupois.
„ <i>Libra</i> . . . . .	=	1·014 lb „
„ <i>Quintal</i> . . . . .	=	101·44 lb. „
„ <i>Arroba</i> { of 25 pounds . . . . .	=	25·36 „ „
of wine or spirits . . . . .	=	6·70 imperial gallons.
„ <i>Gallon</i> . . . . .	=	0·74 „ gallon.
„ <i>Vara</i> . . . . .	=	0·927 yard.
„ <i>Square Vara</i> . . . . .	=	0·835 square yard.

The French metric system of weights and measures was established by law in 1869, and is coming into general use, except for the customs tariff. It came into force in Lima and Callao on September 1, 1916.

## Diplomatic Representatives.

### 1. OF PERU IN GREAT BRITAIN.

*Envoy and Minister*.—(Vacant).

*Chargé d'Affaires*.—Edmund de la Fuente.

*Attachés*.—Pablo Caballero, Cesar Canevaro and Carlos D. Gibson.

*Military Attaché*.—Colonel C. E. Pardo.

*Consul-General* (London).—A. Ayulo.

There are Consular representatives at Belfast, Cardiff, Dublin, Dundee, Glasgow, Liverpool, Queenstown, Southampton, and other places.

### 2. OF GREAT BRITAIN IN PERU.

*Envoy, Minister and Consul-General*.—E. A. Rennie, M.V.O.

*Consul at Callao*.—G. G. Wilson.

There are a Vice-Consul at Callao, a Consul at Iquitos. Vice-Consuls at Lima, Arequipa and Mollendo Paita districts, and a Consular Agent at Cerr de Pasco.

## PORTUGAL.

(REPUBLICA PORTUGUESA.)

PORTUGAL has been an independent State since the twelfth century ; until 1910 it was a monarchy. The last King was Manoel II. of the house of Braganza-Coburg, born November 15, 1889, younger son of King Carlos I. and Queen Mary Amélie, daughter of Philippe Duc d'Orleans. Manoel II. succeeded to the throne on the assassination of his father and elder brother, Prince Luiz Philip, February 1, 1908. On October 5, 1910, the republic was proclaimed, after a short revolution, and a provisional government established with Dr. Theophilo Braga as the Provisional President (October 5, 1910, to August 24, 1911). The first President of the Republic was Dr. Manoel de Arriaga (August 24, 1911, to May 27, 1915); the second, who was elected for the remainder of the term of the first, was Dr. Theophilo Braga (May 29 to October 5, 1915).

On August 20th, 1911, a new constitution was adopted. This provides that there shall be two Chambers. In the first, which is called the National Council, the members (164) shall be elected by direct suffrage for three years. The Second or Upper Chamber (71 members) shall be elected by all the Municipal Councils, and shall be renewable half at a time every three years. The President of the Republic is elected by both Chambers with a mandate for four years, but he cannot be re-elected. The President must be at least 35 years of age. He appoints Ministers, but these are responsible to Parliament. The President may not be present in the Chambers at debates. He is to receive a yearly salary of 2,600*l.*, with 1,300*l.* for allowances, or a total of 3,900*l.* yearly. The Constitution may be revised every ten years.

The Powers formally recognised the Republic on September 11, 1911.

*President of the Republic.*—Dr. Bernardino Machado (elected August 6, 1915 : assumed office October 5, 1915).

The Cabinet, which was formed on April 25, 1917, is as follows :—

*Premier Minister and Minister of Finance.*—Dr. Affonso Costa.

*Minister of the Interior.*—Senhor Almeida Ribeiro.

*Minister of Justice.*—Dr. Alexandre Braga.

*Minister of War.*—Lieut.-Col. Norton de Matos.

*Minister of Marine.*—Com. Arantes Pedroso.

*Minister of Public Works.*—Major Herculano Galhardo.

*Minister for Foreign Affairs.*—Dr. Augusto Soares.

*Minister of Education.*—Dr. Barbosa de Magalhães.

*Minister of Labour.*—Senhor Lima Basto.

*Minister for the Colonies.*—Senhor Ernesto de Vilhena.

### Area and Population.

Area and population at the Census of 1900 and December 1, 1911. The Azores (3 districts) and Madeira (1 district), are regarded as an integral part of the Republic.

Provinces and Districts	Area in sq. miles	Population		Per sq. mile 1911
		1900	1911	
Entre Minho-e-Douro:—				
Vianna do Castello . . . . .	857	215,267	227,420	251·2
Braga . . . . .	1,040	357,159	382,461	343·4
Porto . . . . .	893	597,935	679,978	669·6
	2,790	1,170,361	1,289,859	419·5
Tras-os-Montes:—

	9,208	1,515,834	1,626,484	164·6
Estremadura:—				
Leiria . . . . .	1,317	238,755	262,558	181·3
Santarem . . . . .	2,555	283,154	322,753	110·8
Lisbon . . . . .	3,065	709,509	858,415	231·5
	6,937	1,231,418	1,438,726	177·5
Alentejo:—				
Portalegre . . . . .	2,405	124,431	141,778	51·7
Evora . . . . .	2,856	128,062	144,307	44·8
Beja . . . . .	3,058	163,612	192,499	41·3
	9,219	416,105	478,584	45·1
Algarve (Faro) . . . . .	1,937	255,191	274,122	131·7
Total Continent . . . . .	34,254	5,016,267	5,545,595	145·4
Islands:—				
Azores . . . . .	922	256,291	242,613	277·0
Madeira (Funchal) . . . . .	314	150,574	169,777	479·5
Total Islands . . . . .	1,236	406,865	412,390	329·2
Grand total . . . . .	35,490	5,423,132	5,957,985	152·8

In 1911 the population consisted of 2,828,691 males and 3,131,365 females, or 110 females to every hundred males. In 1900 the continental urban population was 1,627,476 or 32·4 per cent., and the rural 3,388,791 or 67·6 per cent.

In 1911 the foreign population of Portugal numbered 41,197, including 20,517 Spaniards, 12,143 Brazilians, 2,576 English, 1,832 French, and 1,645 Armenians.

The chief towns with their population in 1911 were : Lisbon, 435,359; Oporto, 194,009 ; Setubal, 30,346 ; Funchal (Madeira), 24,687 ; Braga, 24,647 ; Coimbra, 20,581 ; Evora, 17,901 ; Ponta Delgada (Azores), 16,179 ; Covilhã, 15,745 ; Faro, 12,680 ; Tavira, 11,665 ; Portalegre, 11,603 ; Aveiro, 11,523 ; Elvas, 10,645 ; Viana do Castelo, 10,486 ; Beja, 10,113 ; Angra do Heroísmo (Azores), 10,057.

#### MOVEMENT OF THE POPULATION.

Births, deaths, and marriages (including the Azores and Madeira) for 5 years :—

Years	Births	Deaths	Marriages	Emigrants
1910	186,953	113,161	38,931	39,515
1911	230,033	130,900	41,235	59,661
1912	207,690	119,317	44,126	88,929
1913	199,765	124,748	39,950	77,633
1914	193,942	117,967	41,724	25,722

Portuguese emigration is chiefly to Brazil and the United States.

#### Religion.

The Roman Catholic faith was the State religion ; now all forms of worship are tolerated. Portugal, including the Azores and Madeira, is divided into three ecclesiastical provinces, with their sees severally at Lisbon, Braga and Evora. The Archbishop of Lisbon (Patriarch since 1716) has seven suffragans, of whom only two are on the European mainland ; while the Archbishop of Braga (the oldest see in Portugal) has five, and the Archbishop of Evora two. The Azores, Madeira, and the Portuguese colonial possessions of West Africa, continental and insular, with five episcopal sees, constitute part of the ecclesiastical province of Lisbon. In East Africa there is also the province of Mozambique. In Asia there is a province of Goa with four suffragan sees (Macao included).

The total income of the upper hierarchy of the Church is calculated to amount to 300,000 milreis. In 1900 the number of Protestants in Portugal was 4,491, and that of Jews 481. The Republican government has separated the Church from the State, and State payments for the maintenance and expenses of worship have now ceased. The conventual establishments of Portugal were suppressed by decree of May 28, 1834, and their property confiscated for the benefit of the State. Notwithstanding, several establishments of this nature were formed in later years ; they were suppressed by the provisional government, which enforced the law of 1834.

#### Instruction.

Education in Portugal is of three kinds—primary, secondary, higher and special. Primary education is compulsory, and is rigorously enforced by a decree of the Provisional Government of March 29, 1911. In 1913 there were 5,563 public elementary schools and 31 secondary schools, the teachers for which are trained in the normal departments attached to the Universities of Lisbon and Coimbra. For higher education (which was reorganised in 1911) there are now 3 Universities, at Lisbon, Coimbra (founded 1290), and Oporto, which have various faculties. The Technical School at Lisbon

provides instruction in engineering, chemistry, etc. There are also special colleges for music, art (Lisbon and Oporto), commercial schools, a military academy at Lisbon, and a naval school.

The number of pupils at the secondary schools in the session 1912-13 was 10,401. The number of students at the Universities in 1910-11 was 2,955; in 1911-12, 2,673; in 1912-13, 2,916. The number of students at the Schools of Fine Arts in 1910-11 was 894; in 1911-12, 963; in 1912-13, 796; and at the Military Academy in 1911-12, 352; in 1912-13, 251.

### Justice and Crime.

The Republic is divided for judicial purposes into 193 comarcas; in every comarca there is a court of first instance. There are two courts of appeal (Tribunaes de Relação) at Lisbon and Oporto, and a Supreme Court in Lisbon.

The number of persons convicted of crime in the year 1910 was 15,451 (3,236 females); 1911, 12,518 (2,308 females); 1912, 12,603 (2,315 females); 1913, 13,188 (3,381 females); 1914, 12,620 (2,341 females).

### Finance.

The revenue and expenditure for six years were in pounds sterling:—

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	£	£		£	£
1912-13	19,050,672	18,916,547	1915-16 <sup>1</sup>	17,344,140	18,776,878
1913-14	17,326,512	15,828,158	1916-17 <sup>1</sup>	17,220,047	17,623,467
1914-15	18,762,967	17,921,056	1917-18 <sup>1</sup>	15,466,444	15,452,774

<sup>1</sup> Estimates.

The following were the estimates for 1916-17:—

Revenue	Escudos	Expenditure	Escudos
Direct taxes . . . . .	13,462,900	Public Debt . . . . .	30,642,018
Registration and Stamps . . . . .	9,600,000	Presidency, Congress . . . . .	3,173,968
Indirect taxes . . . . .	23,845,300	Ministry of Finance . . . . .	5,137,294
Port dues . . . . .	81,332	„ „ Interior . . . . .	4,245,904
National property and Income on investments . . . . .	16,363,340	„ „ Justice . . . . .	1,341,754
Revenue Earning, administration, &c. . . . .	14,386,605	„ „ War . . . . .	11,329,775
		„ „ Marine . . . . .	4,031,492
		„ „ Colonies . . . . .	344,114
		„ „ Foreign Affairs . . . . .	609,566
		„ „ Public Works . . . . .	3,788,567
		„ „ Instruction . . . . .	3,785,948
		„ „ Labour . . . . .	7,981,899
		General Treasury of deposits . . . . .	1,350,392
Total ordinary . . . . .	77,739,477	Total ordinary . . . . .	77,762,711
Extraordinary . . . . .	8,360,760	Extraordinary . . . . .	10,354,627
Grand Total . . . . .	86,100,237 (17,220,017 <sup>1</sup> )	Grand Total . . . . .	88,117,338 (17,623,467 <sup>1</sup> )

On June 30, 1916, the external debt of Portugal was as follows:—New external 3 per cent. converted debt of 1902, 33,567,861<sup>1</sup>; 4½ per cent. tobacco loan, 1891 and 1896, 4,943,600<sup>1</sup>; total 38,511,461<sup>1</sup>.

The internal debt on June 30, 1916, amounted to 134,654,306<sup>1</sup>., of which, 56,823,217<sup>1</sup>., were held by the Government.

### Defence.

The Army of Portugal is a militia raised by conscription. It is in three categories, the active army, the reserve and the territorial army. All adult males are liable to be called out from the age of 17 to 45, but, practically, service only begins at the age of 20. 10 years are passed in the active army, 10 in the reserve, and 8 in the territorial army, which latter also includes surplus men from other categories. In the active army, recruits undergo from 15 to 30 weeks' preliminary training, according to the arm of the service; afterwards there is a fortnight's training during the annual mobilisation. The country is divided into 8 territorial districts, each supposed to produce a division. The active army consists of 35 regiments of 3 battalions, 11 cavalry regiments of 4 squadrons, 8 field artillery regiments, comprising 63 batteries, 2 horse batteries, 9 mountain batteries, 20 garrison batteries, and engineer units. Batteries have 4 guns.

The peace establishment of the active army has been fixed of late years at 30,000 men. There are about 2,800 officers, all told.

The reserve army is to consist of 35 regiments of infantry, 8 squadrons of cavalry, and 24 field batteries, with other units.

The territorial army has no cadres.

The Republican Guard, and the Fiscal Guard, are civil corps recruited from the army, the men of which can be employed in the field in war time. The Republican Guard is a military police, numbering about 5,000 men, of whom about 800 are mounted. The Fiscal Guard is a preventive service about 5,200 strong.

The arm of the Portuguese infantry is the Mauser-Vergueiro, a magazine weapon, calibre 6·5 mm. The field artillery is being re-armed with 7·5 cm. Schneider Canet guns.

With regard to over-sea garrisons, 2 line regiments of infantry (of 2 battalions) are permanently stationed in the Azores, and 1 at Madeira. The latter has also a battalion of garrison artillery, and there are 2 in the Azores. Besides these troops, the Portuguese have a separate Colonial Army, partly European and partly Native, which garrisons their possessions on the West Coast of Africa, in Mozambique, India, &c. The force consists of about 650 officers (partly of the home army), about 2,500 European non-commissioned officers and men, and 7,000 natives, the Europeans being enlisted voluntarily, the natives compulsorily.

The military budget of Portugal for 1915-16 was 20,804,500*l*. The extraordinary expenses resulting from military operations in Europe and the Portuguese colonies amounted in 1915-16 to 8,442,129*l*.

The navy of Portugal comprises:—5 protected cruisers, *Almirante Reis* (4,253 tons), *Adamastor* (1,757 tons); a variety of old gunboats, 4 transports, 3 training ships, the former royal yacht, 5 *de Outubro* (1,365 tons), 5 destroyers, 4 torpedo boats, 3 submarines, 1 steamer for torpedo and mine service.

The new programme contemplates 3 Dreadnoughts, 3 cruisers, 12 large destroyers, and 6 submarines, but at present remains a programme.

The naval personnel is about 6,000.

### Production and Industry.

Of the whole area of continental Portugal 26·2 per cent. is annually cultivated under cereals, pulse, pasture, etc.; 3·5 per cent. is under vineyards; 3·9 per cent. under fruit trees; 17·3 per cent. under forest; 43·1 per cent. is waste. In Alentejo and Estremadura and the mountainous districts of other provinces are wide tracts of waste lands, and it is asserted that many hectares, now uncultivated, are susceptible of cultivation.

The chief cereal and animal produce of the country are:—In the north, maize and oxen; in the mountainous region, rye and sheep and goats; in the central region, wheat and maize; and in the south, wheat and swine, which fatten in the vast acorn woods. The production of wheat in 1916 was 7,115,790 bushels; of rye, 2,676,107 bushels; of oats, 3,189,078 bushels; of barley, 1,158,461 bushels; of beans, 1,102,400 bushels; of potatoes, 1,709,527 cwt.; and of cork, 942,053 cwt. Throughout Portugal wine is produced in large and increasing quantities. The total vintage for 1915 amounted to 90,200,343 gallons (126,011,678 gallons in 1914). Olive oil, figs, tomatoes are largely produced, as are oranges, onions, and potatoes. The olive area in 1914–15 was 813,350 acres, producing 330,000 tons of olives.

The forests cover 19 per cent. of the total area of the country; pines extending to 1,909,663 acres; oaks, 898,833 acres; corks, 817,081 acres; chestnut, 210,345 acres; Pyrenean oak, 169,150 acres: total, 4,005,072 acres.

Portugal possesses considerable mineral wealth, but coal is scarce, and, for want of fuel and cheap transport, valuable mines remain unworked. In 1912, 3,239 persons worked underground and 4,290 (including 492 females) worked at the mines above ground.

The quantity and value of the principal mineral produce in 1913 and 1914 was:—

Minerals	1913		1914	
	Metric tons	Value in escudos	Metric tons	Value in escudos
Coal (anthracite) . . . . .	22,510	81,319	25,281	77,243
Iron pyrites . . . . .	377,533	1,065,472	267,084	787,852
Lead . . . . .	1,046	36,932	2,163	107,595
Iron . . . . .	49,182	54,318	6,649	11,035
Tin . . . . .	266,355	92,210	346	132,604
Wolfram. . . . .	1,050	563,312	640	361,587

Portugal had in 1914, 46,303 persons and 11,509 vessels of 58,192 tons engaged in fishing. The exports of sardines and tunny fish are considerable. The centre of the sardine industry is at Setubal, about 10 miles south of Lisbon. The value of the fisheries in 1914 was 1,480,513%, including sardines, 707,909%.

A characteristic industry of Portugal is the manufacture of *azulejos* or porcelain tiles. This was inherited from the Moors, and tiles are used extensively for interior and exterior decoration of public and private buildings. At Sacavem, near Lisbon, a large factory makes tiles and china-ware. In Peniche, an old fishing village on the coast north of Lisbon, there is a local pillow lace industry, and at Guimaraes famous embroidery is made.

### Commerce.

Imports for consumption and exports (exclusive of coin and bullion) for six years:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1900	14,571,419	6,968,269	1912	16,793,886	7,723,118
1910	15,639,039	8,020,416	1913	17,986,222	8,152,222
1911	15,328,539	7,664,181	1914	15,682,222	6,410,900

Various classes of imports and exports (special trade):—

	Imports		Exports	
	1913	1914	1913	1914
	Escudos	Escudos	Escudos	Escudos
Living animals . . . . .	1,976,000	305,000	3,720,000	800,000
Raw materials . . . . .	36,856,000	30,008,000	8,824,000	7,139,000
Textiles . . . . .	8,104,000	6,554,000	1,230,000	1,143,000
Food substances . . . . .	25,231,000	20,842,000	19,284,000	15,896,000
Machinery, &c. . . . .	10,052,000	6,260,000	185,000	169,000
Various manufactures . . . . .	7,554,000	6,199,000	3,742,000	3,702,000
Packing . . . . .	165,000	177,000	—	—
Total . . . . .	89,938,000 (19,986,222 <i>l.</i> )	70,345,000 (15,632,222 <i>l.</i> )	36,685,000 (8,152,222 <i>l.</i> )	28,849,000 (6,410,900 <i>l.</i> )

Wine is the staple article of import from Portugal into the United Kingdom, the quantity amounting in 1915 to 3,970,570 gallons, valued at 954,401*l.*

Total trade between Portugal and the United Kingdom in thousands of pounds for five years (Board of Trade Returns):—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Portugal into U. Kingdom	2,830	3,017	3,167	3,980	5,272
Exports to Portugal from U. Kingdom	3,031	3,270	2,753	3,203	4,101

### Shipping, Navigation, and Internal Communications.

The commercial navy of Portugal on January 1, 1911, contained 66 steamers of 70,193 tons in the aggregate, and 259 sailing vessels of 43,844 tons.

In 1914, 9,107 vessels of 20,505,334 tons entered the ports of Portugal.

The length of railways open for traffic on December 31, 1913, was 1,849 miles, of which 711 miles belonged to the State. The railways have a gauge of 5ft. 5½in., except two lines, one of which has a 3ft. 3½in. gauge, and the other a 2ft. 11½in. gauge.

The number of post-offices at the end of 1913 was 4,266; the number of letters, newspapers, &c., carried in the same year was: letters, 54,623,000; post-cards, 23,667,000; printed matter, circulars, &c., 47,549,000. The number of telegraph offices at the end of 1912 was 580. There were at the same date 5,945 miles of line and 13,415 miles of wire. The number of telegrams in 1912 was: internal, 1,442,932; international, 695,786; transit, 3,320,666; service, 168,305; total, 5,267,389.

### Money, Weights, and Measures.

The total transactions of the Government financial institution, the Bank of Portugal, for 1914, were 1,206,732,369 escudos, compared with 1,140,732,197 escudos for 1913. The cash on hand on December 31, 1915, was gold, 8,508,516 escudos; silver, 3,563,378 escudos; nickel, 103,518 escudos; and copper, 13,517 escudos, making a total of 12,188,938 escudos, compared with 13,357,580 escudos, October 30, 1914. The notes in circulation amounted on December 31, 1915, to 113,383,453 escudos. Bills discounted during the year, 1914, amounted to 66,260,677 escudos, against

49,325,173 escudos for 1913. Loans on chattels were as follows: Carried over from 1913, 1,303,011 escudos; new loans, 1,023,962 escudos; making a total of 2,326,973 escudos for 1914. Those paid back amounted to 881,050 escudos, leaving a balance of 1,445,923 escudos.

There are 18 other banks registered in the Republic with a nominal capital of 47,000,000 escudos, and total deposits on December 31, 1914, of 29,449,000 escudos.

The gold coinage of Portugal issued since 1854 amounts to the nominal value of 7,967,002, and the silver coinage to 37,934,523 escudos.

The Decree of the Provisional Government of May 22, 1911, established a new monetary system. The unit is the gold *escudo*, of 100 *centavos*, which is equivalent to the 1-milreis gold piece, and is worth normally about 4s. 5½*d.* (but the rate varies; average for 1915, 3s. 0½*d.*); 1,000 escudos are called a *conto*. Gold coins are 2, 5, and 10-escudo pieces; silver coins are 1-escudo (0·835 fine) and 50, 20, and 10-centavos pieces; there are bronze and nickel coins of 4, 2, 1, and ½-centavo. The gold coins and the silver escudos are ·900 fine; the other silver coins are ·835 fine. The English sovereign and half sovereign are legal tender for 4½ and 2½ escudos respectively.

On January 1st, 1912, the legal time for Portugal was placed in accordance with the Greenwich meridian.

The metric system of weights and measures is the legal standard. The chief old measures still in use are:—

The <i>Libra</i>	.	.	.	=	1·012	lb. avoirdupois.
„ <i>Almude</i>	{	of Lisbon	=	3·7	imperial gallons.	
„ <i>Alqueire</i>		„ Oporto	=	5·6	„ „	
„ <i>Moio</i>	.	.	.	=	0·36	„ bushel.
„ <i>Moio</i>	.	.	.	=	2·78	„ quarters.

## Diplomatic Representatives.

### 1. OF PORTUGAL IN GREAT BRITAIN.

*Envoy and Minister.*—Senhor Manoel Teixeira Gomes (appointed October 10, 1911).

*First Secretary.*—Pedro de Tovar.

*Third Secretary.*—João A. de Bianchi.

*Naval Attaché.*—Captain-Lieut. João Manuel de Carvalho.

*Military Attaché.*—Captain Frederico A. Ferreira de Simas.

*Commercial Attaché & Consul-General in London.*—Demetrio Cinatti.

There are Consular representatives at Cardiff, Newcastle, Liverpool, and Consular agents at Cork, Dublin, Dundee, Leith, Glasgow, Hull, Southampton.

### 2. OF GREAT BRITAIN IN PORTUGAL.

*Envoy and Minister.*—Hon. Sir Lancelot D. Carnegie, K.C.M.G., M.V.O., appointed September 30, 1913.

*First Secretary.*—William Seeds.

*Naval Attaché.*—Commander Fitzmaurice Acton, R.N.

*Military Attaché.*—Captain J. C. H. Grant.

*Consul at Lisbon.*—P. A. Somers Cocks, C.M.G.

There are Consular representatives at Lisbon, Belem, Faro, Setubal, Figueira, Leixões, Oporto, &c.; Funchal (Madeira), St. Michael's (Azores), St. Vincent (Cape Verde).

*Consul* to Portuguese Possessions in West Africa south of the Gulf of Guinea.—H. Hall Hall, residing at Loanda.

*Consul-General* at Lourenço Marques.—E. MacDonnell.

There are Consuls or Vice-Consuls at Bissau (Guinea), Chinde, Inham-bane, Mozambique, Tete, Quilimane, Lobito, and São Thomé, Consul at Marmagao (Goa), Vice-Consul at Macao (China).

### Dependencies.

The colonial possessions of Portugal, situated in Africa and Asia, are as follows:—

Colonial Possessions	Area : English sq. miles	Popula- tion	Colonial Possessions	Area : English sq. miles	Popula- tion
Possession in Africa:			Possessions in Asia:		
Cape Verde Islands			In India—Goa (1910)	1,469	515,772
(1912) . . . . .	1,480	149,793	Damão, Diu (1910) .	169	32,700
Guinea . . . . .	13,940	820,000	Timor (1915) . . .	7,330	377,815
Príncipe and St.			China: Macao, &c.		
Thomas' Islands			(1910) . . . . .	4	74,866
(1914) . . . . .	360	58,907			
Angola . . . . .	484,800	1,119,000			
Mozambique . . .	293,400	3,120,000	Total, Asia . . . .	8,972	1,001,153
Total Africa . .	793,980	8,265,701	Total, Colonies . .	802,952	9,266,854

On August 15, 1914, partial autonomy was granted by the Home Government to all Portuguese colonies, giving each the right to establish its own code of laws for civil and financial Government.

Portuguese India consists of **Gôa**, containing the capital, Panjin, on the Malabar coast; Damão, on the coast about 100 miles north of Bombay; and Diu, a small island about 140 miles west of Damão. In 1915 there were 142 schools with 9,546 pupils (6,066 boys and 3,480 girls). In Gôa there are 501 salt works employing 1,968 men, the annual production amounting to about 12,200 tons. In Damão there are 11 salt works, and in Diu 5. In 1906 deposits of manganese were discovered near Mormugão and about 6 concerns with about 20 mines are at work. The military force consists of not less than 1,082 men (786 natives). The Mormugão railway (51 miles) connects this port with the lines of British India. The estimated revenue of Gôa, &c., in 1916-17 was 1,060,398 escudos; expenditure, 1,423,475 escudos. The trade is largely transit. In 1914 the imports by sea and land amounted to 2,802,100 escudos, the exports to 898,016 escudos. Chief exports are: coco-nuts, fish (fresh and salted), spices, caju-nuts, salt, and copra. There are in Portuguese India 18 telegraph offices and 167 miles of telegraph line.

**Macao**, in China, situated on an island of the same name at the mouth of the Canton River, forms with the two small adjacent islands of Taipa and Colôane, a province, the city being divided into two wards, one inhabited by Chinese and the other by non-Chinese, each having its own administrator.

bique, each with its own Governor. Lourenço Marques (population 13,154 in 1912) is the capital of the Province. There is a Government Council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and a Provincial Council with the attributions of an administrative and account tribunal. In each district there is a District Council. The existing organisation of the province is that which was established by decree of May 23, 1907, with some modifications. The Manica and Sofala region is administered by the Mozambique Company, which has a royal charter granting sovereign rights for 50 years from 1891. Under the Company's administration the country on the Zambezi has become settled, there is convenient transport by river, and facilities are granted for securing titles and working mines. The Nyasa Company, with a royal charter, administers the region between the Rovuma, Lake Nyasa, and the Lurio. The military force of the Colony varies between 2,250 men (1,379 natives) and 3,904 men (2,468 natives). For 1913-14 the estimated revenue was 5,878,598 escudos; expenditure, 5,853,416 escudos.

The chief products of the Colony are sugar, coco-nuts, bees-wax, and mining products. Important gold-bearing reefs have been discovered on the Upper Zambezi, and extensive coal deposits in the Tete region.

The principal ports are Mozambique (population, 1910, 472 Europeans, 895 Asiatics, and about 361,367 natives), Ibo, Quilimane, Chinde (population 1,690, of whom 218 European), Beira (population, 3,420, of whom 738 white), Inhambane (population, 3,330, of whom 100 European and 250 Asiatic), and Lourenço Marques (9,849, of whom 4,691 European).

The trade registered at the following ports in 1914 is given below:—

	Imports	Exports	Re-exports	Transit	Total
	Escudos	Escudos	Escudos	Escudos	Escudos
Lourenço Marques	4,604,442	646,342	3,796,980	17,903,214	26,951,978
Inhambane	583,519	423,275	760	—	1,007,554
Chinde	1,235,675	211,700	575,392	213,038	2,235,805
Quelimane	643,027	376,029	962	—	1,020,018
Mozambique	904,748	377,401	44,296	—	1,326,445
Beira	2,064,597	2,084,794	1,487,354	5,682,158	14,318,903
Ibo	475,243	234,376	28,024	—	737,643
Grand Total	10,511,251	4,353,917	8,923,868	23,798,410	47,597,346

The chief articles imported into the colony are cottons, iron-work, spirits, beer, and wine. The exports are mainly rubber, various ores, wax, and ivory. The ports are visited regularly by the steamers of the German East Africa line, and on the Zambezi and Shiré rivers there are plying 21 small steamers of, in all, 1,125 tons, and 103 barges of 3,676 tons. The Zambezi is navigable for stern-wheelers as far as Tete. At the port of Lourenço Marques there entered in 1915 546 vessels and cleared 545 vessels. The former discharged 200,245 tons of merchandise, the latter 341,917 tons; the port of Beira by 501 vessels of 1,460,882 tons.

The Delagoa Bay railway has a length of 57 miles in the colony, and is continued for 290 miles to Pretoria. The commercial relations and transit of goods by this railway between the Portuguese and British possessions are regulated by the agreement signed April 1, 1909. A new line from Lourenço Marques to the Swaziland border is under construction, 44 miles, being open for traffic, including the Umbeluzi branch. The Gaza railway,

from Chai-Chai to Manjacaze has 32 miles open for traffic, and the line from Mutamba to Inharrime 25 miles. The Beira railway has a length of 204 miles in the colony, and is continued from the British frontier to Bulawayo.

The Government has been working on a definite plan, and the finished scheme for the Province south of parallel 22, the southern boundary of the Mozambique Co.'s territories, embraces the following lines: Moamba to Xinavane, 55 miles (completed); Xinavane via Chissane to Chai-Chais 70 miles (not yet begun); Chai-Chai via Manjacasse to Chigomo, 51 mile, (completed); Chigomo via Jinagui to Inharrime, 51 miles, projected; Inharrime to Mutamba, 40 miles (completed); Mutamba to Inhambane, 15 miles (under construction). Activities north of the Mozambique Co. are represented by two lines of penetration, one from the port of Quelimane, which will tap what is said to be the richest region on the whole coast and whose interior terminal will connect with the existing railway in British Nyassaland, and the other from the port of Mozambique, capital of the district of that name and formerly capital of the Province.

Beira is connected by telegraph with Salisbury in Mashonaland, and Lourenço Marques with the Transvaal system. Quilimane has telegraphic communication with Chiromo. In 1912 there were 2,959 miles of telegraph line.

The Portuguese coinage is little used; the official value of the escudo is 4s. 5d., or 4·5 escudos to the £. At Mozambique the currency is chiefly British-Indian rupees, on which an import duty of 10 per cent. is levied. At Lourenço Marques English gold and silver coins are chiefly used.

## ROME, SEE AND CHURCH OF.

FOR many ages until Pius IX.'s reign, with some comparatively short breaks, the Popes or Roman Pontiffs bore temporal sway over a territory stretching across Mid-Italy from sea to sea and comprising an area of some 16,000 square miles, with a population finally of some 3,125,000 souls. Of this dominion the whole has been incorporated with the Italian Kingdom. Furthermore, by an Italian law dated May 13, 1871, there was guaranteed to His Holiness and his successors for ever, besides possession of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire or 129,000*l.*, which allowance (whose arrears would in 1915 amount to 145,125,000 lire, or 5,805,000*l.*, without interest) still remains unclaimed and unpaid.

*Supreme Pontiff.*—**Benedict XV.** (*Giacomo della Chiesa*), born at Genoa, November 21, 1854; Archbishop of Bologna, December 18, 1907; Cardinal, May 25, 1914; elected Supreme Pontiff, as successor of Pius X., September 3, 1914; crowned, September 6 following.

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar; and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body; the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds of the votes in his favour he is declared elected.

Reckoning the validly chosen Roman Pontiffs as 257 in number, there have been altogether 105 Popes who were Roman, 100 Italian other than Roman, and 52 Transalpine, or (save from Sicily or Sardinia) Transmarine. From the accession of Innocent IX., 232nd in the usual list of Roman Pontiffs, to Benedict XV., 260th, the Popes (all Italian) have been as follows:—

Name and Family of Pontiff	Year of Election	Name and Family of Pontiff	Year of Election
Innocent IX. ( <i>Faccinetti</i> ).	1591	Innocent XIII. ( <i>Conti</i> ) .	1721
Clement VIII. ( <i>Aldobrandini</i> ) .	1592	Benedict XIII. ( <i>Orsini</i> ) .	1724
Leo XI. ( <i>Medici</i> ) .	1605	Clement XII. ( <i>Corsini</i> ) .	1730
Paul V. ( <i>Borghese</i> ) .	1605	Benedict XIV. ( <i>Lambertini</i> ) .	1740
Gregory XV. ( <i>Ludovisi</i> ) .	1621	Clement XIII. ( <i>Rezzonico</i> ) .	1758
Urban VIII. ( <i>Barberini</i> ) .	1623	Clement XIV. ( <i>Ganganelli</i> ) .	1769
Innocent X. ( <i>Pamfili</i> ) .	1644	Pius VI. ( <i>Braschi</i> ) .	1775
Alexander VII. ( <i>Chigi</i> ) .	1655	Pius VII. ( <i>Chiaramonti</i> ) .	1800
Clement IX. ( <i>Rospigliosi</i> ) .	1667	Leo XII. ( <i>della Genga</i> ) .	1823
Clement X. ( <i>Altieri</i> ) .	1670	Pius VIII. ( <i>Castiglioni</i> ) .	1829
Innocent XI. ( <i>Odescalchi</i> ) .	1676	Gregory XVI. ( <i>Cappellari</i> ) .	1831
Alexander VIII. ( <i>Ottoboni</i> ) .	1689	Pius IX. ( <i>Mastai-Ferretti</i> ) .	1846
Innocent XII. ( <i>Pignatelli</i> ) .	1691	Leo XIII. ( <i>Pecci</i> ) .	1878
Clement XI. ( <i>Albani</i> ) .	1700	Pius X. ( <i>Sarto</i> ) .	1903
		Benedict XV. ( <i>della Chiesa</i> ) .	1914

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be, by divine right, the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, namely, 6 Cardinal-Bishops (holders of the suburbicary sees), 50 Cardinal-Priests, and 14 Cardinal-Deacons, but hardly ever comprising the full number. In May, 1917, the Sacred College consisted of 5 Cardinal-Bishops, 53 Cardinal-Priests, and 7 Cardinal-Deacons.<sup>1</sup> The following list gives the names, dates, and offices of these 65 Cardinals:—

Name	Office or Dignity	Nationality	Year of Birth	Year of Creation
<i>Cardinal-Bishops:—</i>				
Vincenzo Vannutelli	Bishop of Palestrina, Arch-priest of the Patriarchal Liberian Basilica, Datary of His Holiness.	Italian	1836	1889
Francesco di Paola Cassetta	Bishop of Frascati, Librarian of Holy Roman Church, Prefect Congreg. Council.	"	1841	1899
Gaetano de Lai	Bishop of Sabina.	"	1853	1907
Antonio Vico	Bishop of Porto and Santa Rufina.	"	1847	1915
Gennaro Granito Pignatelli di Belmonte	Bishop of Albano.	"	1851	1915
<i>Cardinal-Priests:—</i>				
José Sebastião Neto	Former Patriarch of Lisbon.	Portuguese	1841	1884
James Gibbons	Archbishop of Baltimore.	American.	1834	1886
Michael Logue	" Armagh.	Irish	1840	1893
Andrea Ferrari	Archbishop of Milan.	Italian	1850	1894
Giuseppe Prisco	Archbishop of Naples.	"	1836	1896
José María Martín de Herrera y de la Iglesia	Archbishop of Santiago de Compostela.	Spanish	1835	1897
Giuseppe Francica-Nava di Bontifé	Archbishop of Catania.	Sicilian	1846	1899
Agostino Richelmy	" Turin.	Italian	1850	1899
Sebastiano Martinelli	Prefect of the Congregation of Rites.	"	1848	1901
Leo von Skrbenschky	Archbishop of Olmütz.	Austrian	1863	1901
Giulio Boschi	" Ferrara.	Italian	1838	1901
Bartolomeo Bacilieri	Bishop of Verona.	"	1835	1901
Rafael Merry del Val	Secretary of the Congr. of the Holy Office, Archpriest of the Vatican Basilica.	Spanish	1865	1903
Joaquim Arcoverde de Albuquerque Cavalcanti	Archbishop of Rio de Janeiro.	Brazilian	1850	1905
Ottavio Cagiano de Azevedo	Prefect of the Congregation for the Affairs of Religious.	Italian	1845	1905
Aristide Rinaldini	"	"	1841	1907
Pietro Maffi	Archbishop of Pisa.	"	1858	1907
Alessandro Lualdi	" Palermo.	"	1858	1907
Désiré Mercier	" Mechlin.	Belgian	1851	1907
Pietro Gasparri	Cambrlengo of Holy Roman Church, Pontifical Secretary of State.	Italian	1852	1907
Louis Henri Lugin	Archbishop of Reims.	French	1842	1907

<sup>1</sup> The terms Cardinal-Priest and Cardinal-Deacon have for centuries ceased to imply severally the particular orders of priest or deacon. Nowadays in the Sacred College a presbyteral title is freely given to one in episcopal or diaconal orders, and a diaconry to a priest or even to a simple clerk.

Name	Office or Dignity	Nationality	Year of Birth	Year of Creation
<i>Cardinal-Priests—cont.</i>				
Paulin Pierre Andrieu	Archbishop of Bordeaux	French	1849	1907
Antonio Mendes Bello	Patriarch of Lisbon	Portuguese	1842	1911
José Maria Cos y Machó	Archbishop of Valladolid	Spanish	1828	1911
John Mary Farley	Archbishop of New York	American	1842	1911

Though primarily belonging to the local Roman Church, the Cardinals, drawn from every nation of Christendom, are now regarded as Princes of the Church at large. Originally they were simply the parish rectors of Rome, or the deacons of Roman deaneries. In 1586 their number was finally settled by Sixtus V. at seventy. The Cardinals compose the Pope's Senate or

Council and the various Sacred Congregations, govern the Church while the Apostolic See is vacant, and elect the deceased Pontiff's successor. They received the distinction of the red hat under Innocent IV., during the first General Council of Lyons, in 1246; and the title of Eminence from Urban VIII., in 1630.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now eleven Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Index, Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Studies. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains three tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature, and the Sacred Roman Rota; and, lastly, various offices, as the Apostolic Chancery, the Apostolic Datary, the Apostolic Chamber, the Secretariate of State, etc.

The States wherewith the Holy See maintains diplomatic relations are Austria-Hungary, Bavaria, Belgium, the Netherlands, Portugal, Prussia, Russia, Spain, and the United Kingdom (1914), together with most of the American Republics, except the United States and Mexico.

Within the British Empire the present number of Roman Catholic residential sees is 207, viz., 38 archbishoprics and 109 bishoprics, besides 49 apostolic vicariates (mostly held by Bishops of titular sees), and 11 apostolic prefectures: while the Roman Catholic population subject to King George V. is estimated at 13,300,842 souls, of whom 5,902,506 are in Europe; 2,307,245 in Asia; 557,667 in Africa; 3,314,483 in British America; and 1,218,941 in Australasia. Throughout the world the Roman Catholic population is reckoned at 301,505,940 souls, of whom 294,470,744 are of the Latin Rite (*Catholic Directory*, London).

*British Envoy Extraordinary and Minister Plenipotentiary.*—Count de Salis, K.C.M.G., C.V.O. (Appointed December 2, 1916.)

*Secretary to the British Mission.*—H. W. Gaisford.

## RUMANIA.

(ROMÂNIA)

### Reigning King.

**Ferdinand I.** King of Rumania, born August 24, 1865, nephew of the late King Carol, whom he succeeded on October 11, 1914. Married, January 10, 1893, to Princess Marie, daughter of the Duke of Saxe-Coburg and Gotha, born October 29, 1875.

*Children of the King*.—(1) Carol, born October 15, 1893, Crown Prince; (2) Elisabeth, born October 11, 1894; (3) Marie, born January 8, 1900; (4) Nicholas, born August 18, 1903; (5) Ileana, born January 5, 1909.

The King has, in addition to revenues from certain Crown lands, an annual allowance of 2,500,000 lei, or 100,000*l.* The heir to the crown has an annual donation of 300,000 lei (12,000*l.*).

The union of the two Principalities of Wallachia and Moldavia was publicly proclaimed at Bucharest and Jassy on Dec. 23, 1861, the present name being given to the united provinces. The first ruler of Rumania was Colonel Cuza, who had been elected 'Hospodar,' or Lord, of Wallachia and of Moldavia in 1859, and who assumed the government under the title of Prince Alexandru Joan I. A revolution which broke out in February 1866 forced Prince Alexandru Joan to abdicate, and led to the election of Prince Carol I. The representatives of the people, assembled at Bucharest, proclaimed Rumania's independence from Turkey, May 21, 1877, which was confirmed by Art. 43 of the Congress of Berlin, signed July 13, 1878. King Carol I. reigned as Prince from 1866 to 1881, and as King from 1881 to 1914.

### Constitution and Government.

The Constitution now in force in Rumania was voted by a Constituent Assembly, elected by universal suffrage, in the summer of 1866. It has twice been modified—viz., in 1879, and again in 1884. The Senate consists of 120 members, elected for 8 years, including 2 for the Universities, and 8 bishops. The heir to the crown is also a Senator. The Chamber of Deputies consists of 183 members, elected for 4 years. A Senator must be 40 years of age, and a Deputy 25. Members of either House must be Rumanians by birth or naturalisation, in full enjoyment of civil and political rights, and domiciled in the country. For the Senate an assured income of 9,400 lei (376*l.*) is required. All citizens of full age, paying taxes, are electors, and are divided into three Electoral Colleges. For the Chamber of Deputies, electors who are in possession of property bringing in 50*l.* or upwards per annum vote in the first College. Those having their domicile and residence in an urban commune, and paying direct taxes to the State of 20 lei or upwards annually, or being persons exercising the liberal professions, retired officers, or State pensioners, or who have been through the primary course of education, vote in the second College. The third College is composed of those who, paying any tax, however small, to the State, belong to neither of the other colleges; those of them who can read and write and have an income of 300 lei (12*l.*) from rural land, vote directly, as do also the village priests and schoolmasters, the rest vote indirectly. For each

election every fifty indirect electors choose a delegate, and the delegates vote along with the direct electors of the Colleges. For the Senate there are only two Colleges. The first consists of those electors having property yielding annually at least 80*l.*; the second, of those persons whose income from property is from 32*l.* to 80*l.* per annum. Both Senators and Deputies receive 20 lei for each day of actual attendance, besides free railway passes. The King has a suspensive veto over all laws passed by the Chamber of Deputies and the Senate. The executive is vested in a council of eight ministers, the President of which is Prime Minister, and may or may not have a special department.

In 1916 the Austro-Germans succeeded in occupying a large portion of Rumania. Bucharest having fallen on December 6, 1916, the Government is now established at Jassy.

Senate (1914): Conservatives, 33; Liberals, 82; Independents, 2.

Chamber of Deputies (1914): Liberals 141, Conservatives 19, Conservative Democrats 18, 4 Independents.

The Cabinet (appointed January 5, 1917) is composed as follows:—

*Prime Minister and Minister of Foreign Affairs.*—J. J. C. Bratiano.

*Minister of War.*—Vintila Bratiano.

*Minister of Finance.*—Victor Antonesco.

*Minister of the Interior.*—A. Constantinescu.

*Minister of Public Instruction.*—J. G. Duca.

*Minister of Agriculture.*—G. Marzesco.

*Minister of Public Works.*—C. Istrati.

*Minister of Justice.*—Mishu Cantacuzino.

*Minister of Commerce and Industry.*—D. Greceanu.

*Ministers without portfolio.*—M. Pherkyde, E. Costinesco and Tache Junesco.

#### LOCAL GOVERNMENT.

For purposes of local government Wallachia is divided into seventeen, Moldavia into thirteen, and the Dobruja into four districts, each of which has a prefect, a receiver of taxes, and a civil tribunal. In Rumania there are (1912) 372 arrondissements (plăși) and 2,664 communes, 72 urban and 2,592 rural. In the rural communes there are 8,487 villages, and 1,048 hamlets. The appellations 'urban' and 'rural' do not depend on the number of inhabitants, but are given by law.

#### Area and Population.

Constantza . . . . .	2,670	209,571	141,056
Toulteha . . . . .	3,330	170,859	126,752
Durostor . . . . .	2,969	273,090	—
Caliacra . . . . .	—	—	—
Total . . . . .	53,489	7,508,009	5,956,690

The four historic divisions of the country were populated (1912) as follows:—Moldavia, 2,145,464; Grand Wallachia (Muntenia), 3,298,394; Oltenia, 1,413,897; Dobrudja, 381,306.

By the Treaty of Bucharest (August 7, 1913) between Bulgaria and Rumania, the former ceded to the latter 2,969 sq. miles of territory, with a population of 273,090, mostly Turks. The new land has been formed into two departments, Durostor and Caliacra.

Before the treaty the area of Rumania was 50,720 sq. miles; it is now 53,489 sq. miles. The population of the 1912 census was 7,234,919; after the war it is 7,508,009.

The density varied from 38 inhabitants per square mile in Toulteha to 243 per square mile in Ilfov, the average for the whole country having been 117 per square mile. With respect to nationality the population of Rumania in 1899 was classified as follows:—Rumanians, 5,489,296 (92·5 per cent.); subjects of foreign States, 182,875 (3·1 per cent.); foreign Jews, 5,859 (0·1 per cent.); Jews under Rumanian protection, 256,588 (4·3 per cent.); others under Rumanian protection. Of foreigners, the Austro-Hungarians numbered 104,108; Turks, 22,989; Greeks, 20,057. Among Rumanians there are racial differences of which the census returns take no account. In Central Moldavia there are thousands of Magyar descent (Changaï and Szeklers); the communes along the Danube have many inhabitants of Bulgarian and Serbian origin; scattered over the country are hordes of Gipsies most of whom have settled in Rumanian villages. In Dobrudja the foreign element is strong, Turkish, Tartar, Bulgar, Russian, and German. Rumanians are spread extensively in the neighbouring countries—Transylvania, Hungary, Bukovina, Bessarabia, Serbia, Bulgaria, Macedonia; their total number probably is about 12 millions.

The number of births, deaths, and marriages, with surplus of births over deaths, was as follows for three years:—

Years	Births	Deaths	Marriages	Surplus of Births over Deaths
1912	314,090	165,616	62,400	148,474
1913	309,626	191,689	67,430	117,936
1914	327,345	182,949	66,326	144,396

Not included in the births and deaths in 1914 are the still-born, 8,784. The illegitimate births in 1913 were about 7·9 per cent. of the total number. In 1909 there were 2,651 divorces; in 1910, 2,847; in 1911, 3,029; in 1912, 2,998; in 1913, 3,217.

The principal towns are (population 1914):—Bucharest, the capital and seat of Government, 345,628 (on January 6, 1917, 308,987—119,958 males and 189,029 females); Jassy, 76,120; Galatz, 72,512; Braila, 65,911; Ploësti, 57,376; Craiova, 51,877; Botosani, 32,874; Buzeu, 29,483; Constantza, 27,662; Berlad, 25,367; Focsani, 25,287.

### Religion, Instruction, Justice, &c.

Of the total population of Rumania in 1900, 5,408,743 belonged to the Orthodox Church, 168,176 were Catholics or Protestants, 16,598 were Armenians, 269,015 were Jews, and 43,470 were Mahometans. The government of the Orthodox Church rests with two archbishops, the first of them styled the Primate of Rumania, and the second the Archbishop of Moldavia. There are, besides, six bishops of the National Church, and a Roman Catholic archbishop and bishop.<sup>1</sup> Only the clergy of the National Orthodox Church are recognised and paid by the State. In 1903 there were 6,666 churches, 168 monasteries for either sex, and 11 mosques.

Education is free and compulsory 'wherever there are schools,' and it is improving from year to year. In 1909, according to a special census return, 60·16 per cent. of the population over 7 years of age could neither read nor write; in 1909, 43·12 per cent., and in 1910, 41 per cent. of the army recruits could neither read nor write. Following figures are statistics of public primary schools:—

	Schools		Teachers		Pupils		School population (7—14 years)	
	1909-10	1912-13	1909-10	1912-13	1909-10	1912-13	1909-10	1912-13
Rural primary	4,096	4,666	6,460	6,826	504,297	531,684	827,883	852,178
Urban „	379	370	1,324	1,414	80,656	84,936	110,573	118,284
Total	5,074	5,056	7,780	8,240	584,953	616,570	938,456	995,457

The secondary schools in 1906-07<sup>2</sup> were, for boys, 20 lyceums, 28 gymnasiums and 4 seminaries, these 47 institutions having 873 teachers and 14,016 pupils; for girls 10 high schools with 161 teachers and 1,615 pupils; 5 normal schools for men with 80 teachers and 1,136 students, and 2 for

<sup>1</sup> In Hungary there is a Uniate metropolitan with 3 suffragans, all of the Graeco-Rumanian rite.

<sup>2</sup> Latest available figures.

women with 34 teachers and 283 students; 45 professional schools for boys with 209 teachers and 2,235 students, and 28 for girls with 283 teachers; 12 commercial schools with 109 teachers and 1,431 pupils; 17 agricultural schools with 26 teachers and 462 pupils; 6 schools of domestic economy for girls with 17 teachers and 118 pupils; total pupils at boys' schools 19,280; at girls' schools 6,016. There are 2 universities with faculties in law, philosophy, science and medicine, and theology, at Bucharest (120 professors and 3,422 students) and Jassy (60 professors and 534 students). In 1907-8 there were 122 high schools for boys and 46 for girls.

Justice is administered by a court of cassation, 5 appeal courts, 34 tribunals, and 266 justices of the peace. Assistance is given to the sick in 168 hospitals and *hospices* (departmental, communal, rural, and private).

### Finance.

The following table shows the estimated revenue and expenditure for years ending March 31 (old style):—

—	1912-13	1913-14	1914-15	1915-16	1916-17 <sup>1</sup>
	£	£	£	£	£
Revenue	20,225,877	21,452,242	22,709,120	25,796,880	25,828,772
Expenditure	20,225,877	21,451,221	24,009,316	29,464,640	25,828,772

<sup>1</sup> Estimates.

For the year 1915-16 the budget estimates (in lei or francs) were:—

REVENUE.	Lei	EXPENDITURE.	Lei
Direct taxes . . . . .	50,185,000	Ministries:—	
Indirect taxes . . . . .	107,950,000	War . . . . .	98,122,472
Registration and Stamps . . . . .	39,900,000	Finance . . . . .	232,042,172
State monopolies . . . . .	87,600,000	Worship and Public In-	
Public Services . . . . .	153,552,000	struction . . . . .	58,929,752
State Domains . . . . .	33,806,000	Interior . . . . .	60,247,181
Subventions . . . . .	22,184,000	Public Works . . . . .	111,675,000
Ministries:—		Justice . . . . .	14,965,806
Finance . . . . .	76,756,400	Agriculture and Domains	12,595,186
Interior . . . . .	9,557,000	Commerce and Industry .	5,156,896
Justice . . . . .	3,234,000	Foreign Affairs . . . . .	3,417,394
Foreign Affairs . . . . .	120,000	Council of Ministers . . .	73,030
Domains . . . . .	105,500	Supplementary credits .	3,008,559
War . . . . .	558,000		
Public Works . . . . .	37,000		
Worship and Instruction .	7,120,000		
Commerce and Industry .	1,568,000		
Total . . . . .	600,232,900	Total . . . . .	600,232,900
	(24,009,316l.)		(24,009,316l.)

The public debt of Rumania amounted on September 30, 1915, to 73,615,440l.

### Defence.

Military service in Rumania is compulsory and universal from the age of 21 to 46. The young men from 19 to 21 years of age receive a certain amount of preliminary training in their homes. At 21 they enter the ranks, serving for 2 years in the infantry, and 3 years in the other arms, followed by 5, or 4, years in the reserve of the first line. The men then pass to the second line, or reserve force, for 10 years, after which they are transferred to the territorial force at the age of 38, and remain in it 4 years, thus completing 21 years' service. Young men exempted from service in the ranks,

and those surplus to the annual contingent, are posted to a supplementary reserve, in which they will, in future, receive a certain amount of instruction.

The Rumanian field army consists of 5 army corps and 2 cavalry divisions. Army corps are composed of 2 divisions, and a reserve division, and to each is attached a brigade of cavalry of 2 regiments. A regular division consists of 2 brigades, each of 2 regiments of 3 battalions, a battalion of chasseurs (13 battalions in all), an artillery brigade of 2 regiments (12 batteries) and 3 howitzer batteries, 3 squadrons of cavalry, and a company of pioneers. A cavalry division consists of 2 brigades of 2 regiments each (24 squadrons) and 2 batteries of horse artillery. There are altogether 40 infantry regiments of 3 battalions, 9 rifle battalions, 20 cavalry regiments, 20 regiments of field artillery each of 6 batteries, 5 howitzer divisions, 3 horse artillery batteries, 22 companies of fortress artillery, 7 engineer battalions, and a railway battalion. Batteries have 4 guns each. The strength of the field army of 5 army corps and 2 cavalry divisions would amount to about 290,000 men.

The second line, or reserve, troops at present consist of 40 battalions, and 9 batteries.

The peace establishment of the Rumanian army in 1914 was 5,749 officers, 124,389 men, 28,585 horses, 808 guns and 570 machine guns.

The force mobilised in connection with the war 1914-16 amounted to a total of 600,000.

The Rumanian infantry is armed with the Mannlicher magazine rifle, calibre .256. The cavalry carry the Mannlicher carbine. The horse and field batteries are armed with the Krupp Q.F. gun of 75 mm. (1903).

The war budget of Rumania for 1915-16 amounted to 3,944,500*l*.

At Galatz on the Danube, at the mouth of the Sereth, are 3 lines of fortifications, and at Namoloasa on the Sereth are 2 lines. Again at Focsani to the north-west, near the Sereth, are extensive works in 3 lines. All these fortifications are in the nature of entrenched camps, and are armed with numerous Krupp and Gruson guns. Around Bucharest are 18 forts and many batteries.

Rumania has in the navy the *Elisabeta*, launched at Elswick in 1887, a protected cruiser of 1,320 tons displacement and 4,900 horse-power, 3½-inch armour at the belt, 4 6-inch and 8 machine guns; the *Mircea*, training ship, a composite brig of 350 tons; 7 gunboats; 6 coast-guard vessels; a screw despatch vessel (240 tons); 6 first-class and 2 second-class torpedo-boats. On October 4, 1907, twelve vessels for naval police were launched at Galatz, with eight vedettes. A floating dock was purchased in Scotland. There are four river monitors, lightly armoured, of 600 tons each. It has been proposed to order 4 destroyers and 12 torpedo boats. At Galatz there is a marine arsenal.

## Production and Industry.

According to an estimate by Dr. Colesco, the distribution of the soil of Rumania with respect to agriculture in 1914 was as follows :—

	Acres		Acres
Ploughed lands . . . .	13,074,922	Water . . . . .	2,018,250
Fallow lands . . . . .	1,299,382	Other lands . . . . .	5,591,842
Vineyards and orchards . .	468,670	Annexed territories . . .	1,931,500
Meadows . . . . .	1,436,960		
Pastures . . . . .	2,948,472	Total . . . . .	<u>34,475,750</u>
Forests (less clearings) . .	5,705,750		

Of the cultivable land (arable, meadow, plantation, and orchard land) the distribution with respect to ownership is as follows:—

Size of Properties	Proprietors	Area	Per cent. of area
Acres	Number	Acres	
24·7 and under	1,015,302	8,199,647	41·66
Over 27·4 " " 123·5	36,318	1,719,104	8·73
" 123·5 " " 247	2,381	408,676	2·08
" 247 " " "	4,471	9,354,364	47·53
Total	1,058,172	19,681,791	100·00

In 1915 and 1916 the chief agricultural crops were as follows:—

Crop	Area cultivated		Production	
	1915	1916	1915	1916
	Acres	Acres	Tons	Tons
Wheat . . .	4,760,822	4,843,587	2,443,000	1,800,000
Rye . . .	189,032	199,611	74,000	50,000
Barley . . .	1,387,250	1,453,732	632,000	650,000
Oats . . .	1,077,407	1,068,096	434,000	300,000
Maize . . .	5,207,204	5,055,998	2,500,000	1,600,000

The forests of Rumania have an aggregate area of 6,935,120 acres, of which 2,712,582 are State owned and 4,222,539 acres are privately owned. The principal forests are oak (713,430 acres), beech, oak, &c., (692,620 acres), beech (543,540 acres), pine and fir (311,120 acres), larch, maple, elm, willow, walnut.

In April 1916 Rumania had 1,218,563 horses, 3,984,749 cattle, 7,810,809 sheep, 300,609 goats, and 1,382,184 swine.

Coal and petroleum are worked and the latter is now exported in considerable quantities. Petroleum springs, both government and private, are worked at Prahova, Dambovitza, Bacau, and Buzau. The total output reached in 1900, 250,000 metric tons; in 1912, 1,806,942; in 1913, 1,885,384; in 1914, 1,783,957; in 1915, 1,673,145. In 1914, 654,024 metric tons of petroleum were exported, and in 1915, 429,087 tons. Of the total in 1915, 154,688 metric tons went to Germany; 33,568 tons to Bulgaria; and 255,899 tons to Austria-Hungary.

### Commerce.

The values of the imports into and exports from Rumania, exclusive of gold and silver (in sterling) were:—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1908	16,562,600	15,157,900	1911	22,789,801	27,608,816
1909	14,728,902	18,602,265	1912	25,516,220	25,684,148
1910	16,888,623	24,660,195	1913	23,600,504	26,828,212

A Treaty of Commerce and Navigation providing for the most favoured nation treatment between Rumania and Great Britain was signed at Bucharest on October 31, 1905.

Imports and exports are estimated in accordance with values settled by a Commission appointed from time to time.

The import duties amounted in 1912 to 2,910,099*l.*; in 1913 to 2,916,242*l.*

In 1912 and 1918 the chief imports and exports were as follows (in pounds sterling):—

Imports			Exports		
Merchandise	1912	1913	Merchandise	1912	1913
	£	£		£	£
Metals and manufactures	6,283,908	6,722,981	Grain	19,460,459	17,936,490
Vegetable textiles and manuf.	4,189,642	2,596,079	Petroleum	2,649,954	5,259,233
Ready-made clothing	1,305,370	868,436	Beans and oil seeds	1,069,271	1,364,942
Wool, hair & manuf.	2,176,422	1,322,778	Wood	976,893	948,710
Machinery	2,614,443	2,302,129	Animals	159,844	115,964
Vegetables, seed, &c.	257,383	372,432	Food-stuffs	550,304	449,826
Hides, &c.	944,078	868,652	Hides and skins	137,122	130,138
Trees, timber and manuf.	856,757	921,054	Wool and hair	79,204	117,947
Silks and manuf.	841,424	645,903			
Rubber, gutta-percha, &c.	368,320	372,443			

In two years the trade was mainly distributed as follows:—

	Imports		Exports	
	1912	1913	1912	1913
	£	£	£	£
United Kingdom	3,520,016	2,229,508	1,721,632	1,793,613
Austria-Hungary	5,552,972	5,527,680	3,789,987	3,834,329
Belgium	806,013	659,711	6,119,963	7,281,116
Germany	9,617,401	9,512,765	1,701,457	2,096,302
France	1,562,547	1,365,431	1,997,915	2,541,034
Turkey	593,083	610,239	1,034,752	1,474,105
Italy	1,482,991	875,160	4,842,642	2,812,307

Total trade between Rumania and United Kingdom for five years (Board of Trade Returns):—

	1912	1913	1914	1915	1916
Imports from Rumania to U. Kingdom	3,250,415	2,087,265	3,205,282	5,276	—
Exports to Rumania from U. Kingdom	2,933,159	1,947,198	1,935,258	492,378	45,628

### Shipping and Communications.

In 1915 the merchant navy of Rumania consisted of 757 vessels of 238,748 tons, including of 133 steamers of 40,949 tons.

The European Commission of the Danube, called into being in 1856, consisted before the war of 8 delegates, one representing each of the following powers: Austria-Hungary, France, Germany, Great Britain, Italy, Rumania, Russia, and Turkey. It has its seat at Galatz. Since November 24, 1904, it has existed, or will exist, for successive periods of 3 years unless denounced by one of the contracting powers a year before the conclusion of any such period. By the operations of the Commission the Danube below Braila and along the Sulina branch has been deepened and corrected, so that at Sulina the depth has been increased from 9 ft. to 24 ft., and of the Sulina branch the minimum depth has been increased from 8 ft. to 18½ ft., while by canalisation and other works the navigation has been shortened from 45½ to 33½ nautical miles. The income of the Commission is derived entirely from taxes levied on shipping leaving the river.

General shipping (1913): entered, 32,499 vessels of 10,253,223 tons; cleared, 32,306 vessels of 10,176,835 tons; (1914) entered, 31,727 vessels of 9,504,866 tons; cleared, 31,333 vessels of 9,299,976 tons.

In 1914 Rumania had 2,382 miles of railway, of which 2,299 miles belonged to the State. The State has the working of all the lines, and has, besides, under the general railway direction, a commercial navigation service on the Danube and Black Sea.

Within Rumania there are 1,806,580 miles of national roads.

In 1913-14 there were 3,087 post-offices, through which there passed 41,059,000 letters, 46,646,000 post-cards, and 93,921,000 newspapers, samples, &c. In 1913-14 there were 5,618 miles of telegraph lines, and 15,690 miles of wire, on which 4,863,126 messages were forwarded. The number of offices was 3,143. In 1913-14 there were 7 urban telephone systems with 1,004 miles of line and 24,605 miles of wire, and 7,966 interurban systems with 24,168 miles of line and 45,378 miles of wire. On the urban systems during the year there were 20,894,338 conversations, and on the inter-urban 1,444,227.

### Money, Weights, and Measures.

The National Bank of Rumania, with capital and reserves of 39,402,565 lei, had, on December 31, 1916, gold amounting to 573,860,000 lei, and its notes in circulation were of the value of 1,357,000,000 lei. Other public credit institutions are Savings Bank, a Deposit and Consignment Bank, an Agricultural Loan Bank, 1,849 Popular Banks, a Rural *Crédit Foncier*, 2 Urban *Crédit Fonciers* (at Bucharest and Yassi), an Agricultural Bank, and a *Cassa Rurala*, an institution whose purpose is to buy properties and sell them in lots to peasants. There are also three private banking institutions.

In 1911 the following coins were in circulation:—gold, to the value of 10,725,000 lei; silver coins, 5 lei, to the value of 23,660,409 lei; 2 lei to the value of 16,098,710 lei; 1 lei, to the value of 17,734,465 lei; 7½ lei, to the value of 7,745,490; total, 65,269,074 lei. There were also nickel coins in circulation to the value of 10,500,000 lei, and copper coins to the value of 995,000 lei.

The decimal system was introduced into Rumania in 1876, the unit of the monetary system being the *leu*, equivalent to the franc. The gold *leu* is the monetary unit. Silver is legal tender up to 50 lei only. Gold coins are 20-, 10-, and 5-lei pieces. Nickel is coined in 5-, 10-, and 20-centime (bani) pieces.

The metric system has been introduced, but Turkish weights and measures are, to some extent, in use by the people.

### Diplomatic and Consular Representatives.

#### 1. OF RUMANIA IN GREAT BRITAIN

*Envoy and Minister*.—Nicolas Misu (appointed December 18, 1912).

*First Secretaries*.—Michel B. Boeresco, Prince Antoine Bibesco, and Captain Matila Costiesco-Ghyka.

*Chancellor*.—Marcu Beza.

*Commercial Attaché*.—G. Boncesco.

*Consul-General in London*.—Sir Albert Rollit, Kt.

*Vice-Consul*.—D. Gologan.

#### 2. OF GREAT BRITAIN IN RUMANIA.

*Envoy and Minister*.—Sir G. H. Barclay, K.C.S.I., K.C.M.G., C.V.O. (1912).

*First Secretary*.—W. F. A. Rattigan.

*Military Attaché*.—Lt.-Col. C. B. Thomson, R.E.

*Naval Attaché*.—Commander W. F. Sells, R.N.

*Consul-General at Galatz and Danube Commissioner*.—Major J. G. Baldwin, C.B.

There are Vice-Consuls at Bucharest, Braila, Constanza, Sulina and Galatz.

## RUSSIA.

Early in March, 1917, the Russian Duma carried through a *coup d'état*, as a result of which the Emperor Nicholas abdicated. A Provisional Government was set up, and this body issued the following appeal on March 16 :—

Citizens, the Provisional Executive Committee of the Duma, with the aid and support of the garrison of the capital and its inhabitants, has now triumphed over the noxious forces of the old régime in such a measure as to enable it to proceed to the more stable organization of the executive power. With this object the Provisional Committee has appointed as Ministers of the first National Cabinet men whose past political and public activity assures them the confidence of the country.

The new Cabinet will adopt the following principles as the bases of its policy :—

I.—An immediate general amnesty for all political and religious offences, including terrorist acts, military revolts, and agrarian crimes. II.—Freedom of speech, of the Press, of association and labour organization, and the freedom to strike, with an extension of these liberties to officials and troops in so far as military and technical conditions permit. III.—The abolition of all social, religious and national restrictions. IV.—Immediate preparations for the summoning of a constituent assembly, which, with universal suffrage as a basis, shall establish the Governmental régime and the Constitution of the country. V.—The substitution for the police of a national militia, with elective heads and subject to the self-government bodies. VI.—Communal elections to be carried out on the basis of universal suffrage. VII.—The troops that have taken part in the revolutionary movement shall not be disarmed, but they are not to leave Petrograd. VIII.—While severe military discipline must be maintained on active service, all restrictions upon soldiers in the enjoyment of social rights granted to other citizens are to be abolished.

The Provisional Government wishes to add that it has no intention of taking advantage of the existence of war conditions to delay the realization of the above-mentioned measures of reform.

The following is a list of the members of the new Cabinet<sup>1</sup> :—

*Prime Minister and Minister of the Interior.*—Prince George Lvoff.

*Minister of Foreign Affairs.*—M. Paul Miliukoff.

*Minister of War and Marine.*—M. Alexander Guchkoff.

*Minister of Finance.*—M. Michael Tereshchenko.

*Minister of Education.*—M. Alexander Manuiloff.

*Minister of Agriculture.*—M. Andrew Shingareff.

*Minister of Railways.*—M. Nicholas Nekrasoff.

*Minister of Commerce and Industry.*—M. Alexander Kouvaloff.

*Minister of Justice.*—M. Alexander Kerensky.

*Minister of Labour.*—J. Plekhanoff.

*Procurator of the Holy Synod.*—M. Vladimir Lvoff.

*Comptroller-General.*—M. Ivan Godneff.

*Minister for the Affairs of Finland.*—M. Feodor Roditcheff.

The Provisional Government has been recognized by the United Kingdom, the United States, France, Italy, Japan, Belgium, Portugal, Serbia, Rumania, Norway, Denmark, and Sweden.

Before abdicating the Tsar appointed his brother, the Grand Duke Michael, his successor. But the Grand Duke did not accept the crown,

<sup>1</sup> The Cabinet was reorganized on May 16, 1917. For new cabinet see "Additions and Corrections."

leaving the decision as to the form of government, monarchy or republic, in the hands of the Assembly to be elected.

The late royal family of Russia descended, in the female line, from Michael Romanof, elected Tsar in 1613, after the extinction of the House of Rurik; and in the male line from the Duke Karl Friedrich of Holstein-Gottorp, born in 1700, scion of a younger branch of the princely family of Oldenburg. The union of his daughter Anne with Duke Karl Friedrich of Holstein-Gottorp formed part of the great reform projects of Peter I., intended to bring Russia into closer contact with the Western States of Europe. Peter I. was succeeded by his second wife, Catherine, the daughter of a Livonian peasant, and she by Peter II., the grandson of Peter, with whom the male line of the Romanofs terminated, in the year 1730. The reign of the next three sovereigns of Russia, Anne, Ivan VI., and Elizabeth, of the female line of Romanof, formed a transition period, which came to an end with the accession of Peter III., of the house of Holstein-Gottorp. All the subsequent emperors, without exception, connected themselves by marriage with German families. The wife and successor of Peter III., Catherine II., daughter of the Prince of Anhalt Zerbst, general in the Prussian army, left the crown to her only son, Paul, who became the father of two emperors, Alexander I. and Nicholas, and the grandfather of a third, Alexander II. All these sovereigns married German princesses, creating intimate family alliances, among others, with the reigning houses of Württemberg, Baden, and Prussia.

The following have been the Tsars and Emperors of Russia, from the time of election of Michael Romanof. Tsar Peter I. was the first ruler who adopted in the year 1721, the title of Emperor.

<i>House of Romanof—Male Line.</i>		Ivan VI.	1740
Michael . . . . .	1613	Elizabeth . . . . .	1741
Alexis . . . . .	1645	<i>House of Romanof-Holstein.</i>	
Feodor . . . . .	1676	Peter III. . . . .	1762
Ivan and Peter I. . . . .	1682	Catherine II. . . . .	1762
Peter I. . . . .	1689	Paul . . . . .	1796
Catherine I. . . . .	1725	Alexander I. . . . .	1801
Peter II. . . . .	1727	Nicholas I. . . . .	1825
<i>House of Romanof—Female Line.</i>		Alexander II. . . . .	1855
Anne . . . . .	1730	Alexander III. . . . .	1881
		Nicholas II. . . . .	1894

## Constitution and Government.

The Constitution of Russia will be determined by a Constituent Assembly elected for the purpose.

### LOCAL GOVERNMENT.

The Empire is divided into governments and provinces (*oblast*), the subdivisions of which are districts or circuits (*uyezd* in the governments and *okrug* in the provinces). There are 78 governments (50 in European Russia proper, 9 in Poland, 8 in Finland, 7 in Caucasus, 4 in Siberia); 21 provinces (1 in European Russia, 5 in Caucasus, 9 in Central Asia, 6 in Siberia) and 2 circuits, those of Sukhum and Zakataly in Caucasus.

In European Russia the government of the parish, in so far as the lands of the peasantry are concerned, and part of the local administration, is entrusted to the people. For this purpose the whole country is divided into 17,075 cantons (*volosts* among the Russian population, *gminas* in Poland, *stanitsas* in Cossack Lands, *ulus* in territories peopled by natives, &c.), which

are presided over by an elder (*volostnoi starshina* in the *volosta*), elected at the cantonal assemblies, which are composed of the delegates of the village communities in the proportion of one man to every ten houses. The village communities elect an elder (*starosta*) or executive officer of a commune, and also a tax-collector. All these officers are elected at communal assemblies ('*Mir*') by the peasants, and from among themselves. The communal assemblies are constituted by all the householders in the village, who discuss and decide all communal affairs. These communal assemblies are held as business requires. The canton assemblies decide the same class of affairs as do the communal assemblies, but concerning each its respective canton.

The administration of the economic affairs of the district and province are, to some extent, in the hands of *zemstvos*, or the district and provincial assemblies (law of January 1, 1864), composed of representatives elected by the peasantry, the householders in the towns, and the landed proprietors. Their executive power is entrusted to provincial and district '*Upravas*.'

The towns and cities have municipal institutions of their own, organized on nearly the same principles as the *zemstvos*. The institutions of the *zemstvo* are in force in 34 provinces (361 districts) of European Russia.

*Finland*<sup>1</sup>.—The Grand-duchy of Finland, ceded to the Emperor of Russia by the treaty of Fredrikshamn, September 17, 1809, has preserved, by special grant of Alexander I. (renewed by his successors), the Swedish Constitution, dating from the year 1772, reformed in 1789, slightly modified in 1869 and 1882, and reformed in 1906. The decrees issued in the years 1899–1903 were all abolished by the Imperial Ukase of November 4, 1905, which gave authority for the reform of the Legislative body. The national parliament, which formerly consisted of four estates, the nobles, the clergy, the burghers, and the peasants, now consists of one Chamber of 200 members chosen by direct and proportional election, in which all who are entitled to vote have an equal vote. The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached his or her 24th year. There are 16 electoral districts with a representation proportioned to the population, a re-arrangement being required every 10 years. Each district is divided into voting circuits. The voting system, devised with a view to proportional representation, provides for the formation of voters' associations which prepare three-name lists of candidates, the votes for whom are in a falling scale according to the order in which the voter has placed them. There may, within limits, be compacts between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any candidate he pleases. Every citizen entitled to vote is eligible to the Diet, the members of which receive 1,400 marks (56*l.*) for each session of about 90 days. The Diet lasts for 3 years unless sooner dissolved. At the elections in July, 1916, the following parties were returned:—Social Democrats, 103; Old Finns, 33; Young Finns, 22; Swedes, 21; Agrarians, 19; Christian Workers, 1. Of the total number of members 24 or 12 per cent. are women.

*Poland*.—Poland, which had a Constitution of its own from 1815 to 1830, and a separate government till 1864, was deprived at the latter date of the last remnant of its administrative independence. Finally, by ukase of the Emperor, dated Feb. 23, 1868, the government of Poland was absolutely incorporated with that of Russia, and the use of Polish language in public places and for public purposes (railways, signboards, wills, &c.), was prohibited. The whole of Poland is now (May, 1917) in Austro-German

<sup>1</sup> For further details on Finland, see end of *Russia*.

occupation. In November, 1916, the Central Empires appointed a provisional Council of State for Poland as the first step towards an independent monarchy. The Russian Provisional Government has promised the restoration of the Pole in its ethnical borders as an autonom state.

### Area and Population.

#### I. PROGRESS AND PRESENT CONDITION.

Russia comprises one-seventh of the land-surface of the globe. Its area, without internal waters, is, since the treaty of Portsmouth, 8,417,118 English square miles (19,155,587·7 square versts).

Until 1897 there have been but various enumerations of the population called *revisions*. On January 28 (February 9), 1897, a census was taken over the whole of the country (with the exception of the Grand-duchy of Finland).

The rapidity of growth of the population of the country (its acquisition being included in the figures of population) is seen from the following :—

Year	Population	Year	Population
1722 ... ..	14,000,000	1859 ... ..	74,000,000
1796 ... ..	36,000,000	1897 ... ..	129,209,297
1815 ... ..	45,000,000	1914 ... ..	178,378,800
1835 ... ..	60,000,000	1915 .. ..	182,182,600

The population on January 1, 1915, was estimated as follows by the Central Statistical Committee on the basis of the census of 1897 and the yearly increase of the population :—

European Russia . . . . .	131,796,800
Poland . . . . .	12,247,600
Caucasus . . . . .	13,229,100
Siberia . . . . .	10,377,900
Central Asian Provinces . . . . .	11,254,100
Finland . . . . .	3,277,100

Total . . . . . 182,182,600

The following table shows the area and population according to the last issue of the Russian Central Statistical Committee (1915) :

Governments and Provinces	Area : English square miles	Population on January 1, 1916	Density per sq. mile	Governments and Provinces	Area : English square miles	Population on January 1, 1915	Density per sq. mile
1. <i>European Russia—</i>	(1)	(2)		1. <i>European Russia—</i>	(1)	(2)

## II. MOVEMENT OF THE POPULATION.

The movement of population in European Russia, exclusive of Finland, is seen from the following statement for 1910, 1911, and 1912 :—

—	1910	1911	1912
<b>Births</b> . . . . .	5,233,711	5,265,665	5,238,186
<b>Deaths</b> . . . . .	3,598,249	3,222,275	3,185,962
<b>Increase</b> . . . . .	1,635,462	2,043,390	2,052,224

The births and deaths rates in European Russia for five years and per 1,000 inhabitants are seen from the following statements :—

—	1908	1909	1910	1911	1912
Births . . . .	44.1	43.8	44.1	43.7	42.7
Deaths . . . .	27.7	28.9	30.0	26.7	26.0
Increase . . . .	16.4	14.9	14.1	17.0	16.7

The movement of population from and into Russia in five years was as follows :—

	From Russia.			Into Russia.		
	Russians	Foreigners	Total	Russians	Foreigners	Total
1909	272,521	299,467	571,988	213,542	370,776	584,318
1910	366,441	353,159	719,600	292,080	426,967	719,077
1911	403,915	383,860	787,775	307,891	470,721	778,612
1912	462,500	422,200	884,700	367,000	492,400	859,400
1913	529,000	421,000	950,000	404,000	516,000	920,000

The Russians, especially Jews and Poles, contributed a large part to the flow of emigrants into the United States. The number of immigrants from Russia into the United States during the years 1873 to 1910 was 2,527,457 (839,364 from 1873 to 1900). The emigration for the last ten years was as follows :—

1904 . . .	145,141	1909 . . .	120,460
1905 . . .	184,897	1910 . . .	186,792
1906 . . .	215,665	1911 . . .	158,721
1907 . . .	258,943	1912 . . .	162,395
1908 . . .	156,711	1913 . . .	291,040

### III. PRINCIPAL TOWNS.

The great majority of the population of Russia being agriculturists, they dwell in villages. The number of towns and villages in Russia (exclusive of Finland), grouped according to population, is given as follows :—

Towns with population	Number	Villages with population	Number
Over 100,000 . . .	35	1,000—3,000 . . .	17,724
50,000—100,000 . . .	71	100—1,000 . . .	185,157
20,000— 50,000 . . .	118	Under 100 . . .	521,706
10,000— 20,000 . . .	315		
3,000— 10,000 . . .	3,032	Towns and villages .	728,157

In European Russia there is an average of one town or village to every 4.7 sq. miles, the average varying from 1 to every 0.43 sq. mile in Courland to 1 for every 148 sq. miles in the government of Archangel. In Poland there is 1 for every 1.33 sq. miles ; in the Caucasus 1 for every 9 sq. miles. In Asiatic Russia the average varies between 1 to 14 miles in Samarcand, and 1 to every 2,760 sq. miles in the province of Yakutsk. It will thus be understood that the distinction between the population of towns and of country on January 1,

# AREA AND POPULATION

1233

1914, given in the following table, and based on the census of 1897, and the yearly increase of the population, is not to be closely pressed:—

Population of	In Towns	In the Country	Males	Females
European Russia . . . .	18,596,800	110,267,500	63,756,500	65,107,800
Poland . . . . .	3,021,300	9,226,300	6,149,200	6,098,400
Caucasus . . . . .	1,878,000	11,043,700	6,762,600	6,159,100
Siberia . . . . .	1,193,600	8,807,100	5,146,100	4,854,600
Central Asia . . . . .	1,607,900	9,495,600	5,925,900	5,177,600
Total . . . . .	26,297,600	148,840,200	87,740,300	87,397,500

The following are the populations of the chief towns of governments or provinces, and of the other towns having more than 30,000 inhabitants:—

<i>European Russia proper</i> (chiefly in 1913)—			
* Petrograd (15)	2,318,645	* Simbirsk . . . . .	70,500
* Moscow (15)	1,817,100	Chelyabinsk (10)	70,472
Odessa (12)	631,040	* Yekaterinburg (10)	70,000
* Kiev . . . . .	610,190	* Novochoerkask . . . .	69,820
* Riga . . . . .	569,100	Cronstadt (11)	68,273
* Kharkov . . . . .	558,360	* Taganrog . . . . .	68,091
* Saratov . . . . .	235,500	* Grodno . . . . .	64,100

## Religion.

The established religion of the country is the Græco-Russian, officially called the Orthodox Faith. It has its own independent synod, but maintains the relations of a sister Church with the four Orthodox patriarchates of Constantinople, Alexandria, Antioch, and Jerusalem. The Holy Synod, the board of government of the Russian Church, was established in 1721; to it is committed the superintendence of the religious affairs of the Empire. It is composed of the three metropolitans (St. Petersburg, Moscow, and Kiev), the archbishop of Georgia (Caucasus), and several bishops sitting in turn.

Since the revolution of March, 1917, all religions may be freely professed in the Empire. It is estimated that there are more than 12,000,000 dissenters in Great Russia alone. The affairs of the Roman Catholic Church are entrusted to a Collegium, and those of the Lutheran Church to a Consistory, both settled at Petrograd. Roman Catholics are most numerous in the former Polish provinces, Lutherans in those of the Baltic, and Mohammedans in Eastern and Southern Russia, while the Jews are almost entirely settled in the towns and larger villages of the western and south-western provinces.

There are no trustworthy figures as to the numbers of adherents of different creeds—many dissenters being inscribed under the head of Greek Orthodox. The numbers, however, according to census returns of 1897, published in 1905, are given as follows:—

Orthodox Greek & United Church	87,123,604	Anglicans	4,183
Dissidents	2,204,596	Other Christians	3,952
Armenian Gregorians	1,179,241	Karaims	12,894
Armenian Catholic	38,840	Jews	5,215,805
Roman Catholic	11,467,994	Mohammedans	13,906,972
Lutheran	3,572,653	Buddhists	433,863
Reformed	85,400	Other non-Christians	285,321
Baptists	38,139		
Mennonites	66,564	Total	125,640,021

Russia is divided into 66 bishoprics (*eparchiya*), which were under 3 metropolitans, 14 archbishops, and 50 bishops; the latter had under them 37 vicars; all of them are of the monastic clergy. The management of Church affairs is in the hands of 62 "consistoria." For Roman Catholics there is an Archbishop of Warsaw and another of Mohilev, each with six suffragan bishoprics. Of the suffragans of Mohilev one is of the Graeco-Ruthenian rite, of which rite there is another bishop immediately subject to Rome.

The expenditure of the Synod in the budget of 1916 was 53,965,767 roubles. The expenditure for other churches is about 1,500,000 roubles.

### Instruction.

Most of the schools are under the Ministry of Public Instruction, and the country is divided into 15 educational districts (Petrograd, Moscow, Kazan, Orenburg, Kharkov, Odessa, Kiev, Vilna, Warsaw, Riga, Caucasus, Turkestan, West Siberia, East Siberia, and Amur). However, many special schools are under separate Ministries.

There are universities at Petrograd (7,442 students), Moscow (9,892), Kharkov (3,216), Kiev (4,919), Kazan (2,027), Odessa (2,058), Yuriev or Dorpat (2,255), Tomsk (902), Warsaw (2,450), and Saratov (534). Total number of students, 39,027, (January 1, 1914). A Popular University bearing the name of General Alphonse *Shaniavsky*, who has given the funds necessary for its creation, has existed at Moscow since autumn, 1908. In 1916 a Women's University was created at Petrograd with the power of conferring the degree of Doctor. Finland has a university at Helsingfors, with 3,478 students on January 1, 1916 (see *Finland*). Nearly 4,000 students in Russia are either supported by bursaries or dispensed from paying fees.

Besides the universities there are a number of institutions for special education—theological, medical, legal, technical, and Oriental languages—distributed among the larger towns of the State.

The nature and number of the middle schools, and the number of pupils attending them are as follows (exclusive of Finland):—

Middle Schools on January 1, 1914.	No.	Pupils.	Middle Schools on January 1, 1914.	No.	Pupils.
Gymnasias	441	147,751	Girls' gymnasias	873	311,637
Progymnasias	29	4,359	Girls' progymnasias	92	11,940
Realschools	284	80,800	Cadet corps	29	29,646
Normal schools (Teachers' Institutes)	33	1,249	Gymnasias of Empress Marie (1912)	35	17,166
Normal seminaries and practical schools (Teachers' Seminaries)	122	10,190	Institutes of Empress Marie (1912)	34	9,562
			Seminaries (1913)	57	22,311

The nature and numbers of the special schools, middle and primary, and the number of pupils attending them are as follows (exclusive of Finland):—

Special Schools in 1910-11	Number	Pupils	Special Schools in 1910-11	Number	Pupils
Theological . . . . .	470	77,786	Fine Arts . . . . .	75	10,503
Pedagogical . . . . .	323	21,742	Topographical . . . . .	8	612
Medical . . . . .	72	9,112	Strange Languages . . . . .	66	532
Military . . . . .	32	12,079	Professional . . . . .	48	2,739
Nautical . . . . .	30	1,180	Various . . . . .	50	2,275
Forestry and Agriculture . . . . .	123	6,519			
Technical . . . . .	627	40,299	Total . . . . .	2,107	223,205
Commercial and Industrial . . . . .	178	37,827			

The expenses for the middle schools are contributed by the State Exchequer, by fees and by donations of the *zemstvos*, the municipalities, and so on. The Cossack schools are maintained by the separate *voiskos*, which, moreover, maintain a number of their pupils in the governmental schools.

According to the Census of January 18 (31), 1911, concerning the elementary schools, the numbers of schools, teachers, and pupils in the Russian Empire were in this day as follows:—

—	Schools	Teachers	Pupils
Ministry of Public Instruction . . . . .	59,682	130,019	4,186,078
Holy Synod . . . . .	37,922	66,525	1,793,429
Other ministries and various foundations . . . . .	2,691	6,729	201,003
Total . . . . .	100,295	203,273	6,180,510

According to the last issue (1914) of the 'Year Book of Russia,' published by the Central Statistical Committee, the numbers of all kinds of schools and of children attending them, on January 1, 1912, were as follows: <sup>1</sup>

—	Number of schools	Students or pupils attending the schools				
		High schools	Middle schools	Special schools <sup>2</sup>	Primary schools	Total
European Russia . . . . .	95,381	58,370	373,746	196,279	5,523,143	6,151,538
Poland . . . . .	7,022	4,674	23,376	19,022	291,931	339,003
Ciscaucasia . . . . .	2,635	—	8,896	3,571	165,410	177,877
Transcaucasia . . . . .	2,548	188	12,735	4,451	127,657	145,081
Siberia . . . . .	6,245	2,520	21,205	9,299	308,247	341,271
Central Asia . . . . .	8,693	—	11,773	4,416	95,785	111,974
Total . . . . .	122,524	65,752	451,731	237,038	6,512,173	7,266,694

<sup>1</sup> Exclusive of the cities of Petrograd, Kronstadt, and Baku, the governments of Warsaw and Tiflis, and the province of Kamchatka.

<sup>2</sup> Middle and primary.

To the total number of 7,266,694 students or pupils must be added: 206,961 pupils of private schools, lay or religious of Christian creeds; 958

pupils of schools for blind, and deaf and dumb, 329,585 pupils of religious schools of non-Christian creeds, and 233,911 not classed in the above categories. Total number of persons attending the schools of the Russian Empire (exclusive of Finland) : 8,038,109.

Number of pupils attending the schools per 1,000 inhabitants of both sexes :—

	Males	Females	Of both sexes
European Russia . . . . .	75·3	36·5	54·6
Poland . . . . .	60·0	31·9	44·9
Ciscaucasia . . . . .	56·1	27·1	41·9
Transcaucasia . . . . .	42·4	15·3	29·8
Siberia . . . . .	46·7	24·9	36·1
Central Asia . . . . .	28·1	15·2	21·9
Total . . . . .	67·9	34·3	49·9

From the figures furnished by the Statistical Annual for 1913 it is evident that elementary education in the Empire is yet but poorly developed. Thus, out of every 100 persons up to nine years of age there were in that year only 27 able to read and write.

Poland, 41 per cent. ; European Russia proper, 30 ; Caucasus, 17 ; Siberia, 16 ; Central Asia, 6.

The less illiterate provinces of European Russia are :—Esthonia, 20·1 illiterates per 100 of population ; Livonia, 22·3 ; Courland, 29·1 ; Petrograd, 44·9.

### Justice and Crime.

The administration of justice was reformed by law of November 1864, which instituted assize courts with juries ; elective justices of peace with functions similar to those of English magistrates ; assemblies of justices of peace, before which appeals from judgments of individual magistrates might be brought ; appeal courts for re-hearing cases not tried by jury. Above all these courts was the Court of Cassation, which formed part of the Senate.

The appeal courts are fourteen : 11 in European Russia and Caucasus (at Petrograd, Moscow, Kharkov, Odessa, Kazan, Saratov, Kiev, Novocheer-kask, Vilna, Warsaw, and Tiflis), and 3 in Asiatic Russia (at Tashkent, Irkutsk, and Omsk). There are 104 assize courts : 88 in European Russia and 16 in Asiatic Russia.

The following table gives the number of persons judged, acquitted and condemned by normal tribunal, for each of the three last years :

	Judged	Acquitted	Condemned
1909	135,008	52,028	81,270
1910	142,881	54,327	88,478
1911	145,490	52,463	92,981

The prison population on January 1 of each of the last six years was as follows :—

Years	Number of prisoners	Years	Number of prisoners
1908	160,025	1911	174,733
1909	180,206	1912	185,695
1910	169,439	1913	190,067

## Finance.

## I. STATE FINANCE.

The following table gives the total actual *ordinary* and *extraordinary* revenue and expenditure for each of the five years :—

Year	Ordinary		Balance	Extraordinary	
	Revenue	Expenditure		Revenue	Expenditure
	Roubles	Roubles	Roubles	Roubles	Roubles
1910	2,780,986,991	2,473,157,193	+ 307,829,798	24,090,628	123,503,043
1911	2,951,782,684	2,535,995,753	+ 415,786,931	2,567,906	309,694,698
1912	3,105,916,930	2,721,763,595	+ 384,153,335	1,812,932	449,296,921
1913	3,417,359,530	3,094,248,094	+ 323,111,436	13,845,256	288,665,314
1914	2,898,098,000	2,927,099,000	- 29,001,000	38,606,955	—

The actual *ordinary* and *extraordinary* revenue and expenditure for 1914, given in the last Report of the State's Control, the estimated revenue and expenditure for 1916, according to the budget estimates voted by the Duma and the Council of the Empire and sanctioned by the Emperor, February 5 (18), and the project of the Budget for 1917 presented to the Parliament by the Minister of Finance, are as follows :—

Revenue	Actual 1914	Estimated 1916	Proposed 1917
<b>A. ORDINARY.</b>	<b>Roubles</b>	<b>Roubles</b>	<b>Roubles</b>
<b>I. Direct Taxes</b>	<b>280,557,000</b>	<b>359,674,376</b>	<b>566,056,948</b>

The fluctuations of the Russian national debt are seen from the following :—

January 1	Roubles	January 1	Roubles
1862 . . . . .	1,376,420,117	1913 . . . . .	8,858,053,846
1882 . . . . .	4,356,638,149	1914 . . . . .	9,888,309,698
1902 . . . . .	6,430,651,061	1915 . . . . .	10,473,571,655
1911 . . . . .	9,030,206,245	1916 . . . . .	18,876,730,811
1912 . . . . .	8,957,875,209	1917 . . . . .	25,220,936,895

The payments of interest and capital for the State and railway debts in the budget estimates for 1914 and in the project of the budget for 1915, 1916 and 1917 appear as follows :—

	Roubles		Roubles
1914 . . . . .	402,107,570	1916 . . . . .	652,778,602
1915 . . . . .	439,706,598	1917 . . . . .	669,410,005

## Defence.

### I. FRONTIER.

The more important fortresses and forts are divided into three classes as follows :—In the first class are Warsaw, Novogeorgievsk, and Brest-Litovsk in the Warsaw district, and Kovna in the Vilna district. The second class consists of Kronstadt and Sveaborg in the Petrograd and Finland district; Ivangorod in the Warsaw district; Kerch in the Odessa district; Libau in the Vilna district; and Vladivostok in the Amur district. In the third class are Viborg in the Finland district; Ossovets and Ust-Dvinsk in the Vilna district; Sevastopol and Ochakov in the Odessa district; and Kars and Batum in the Caucasus district. There are also forty-six places unclassified, many of them being mere fortified posts.

### II. ARMY.

Military service in Russia is universal and compulsory. Service begins at the age of 20 and extends to completion of the 43rd year. Owing to the extent of the Empire, there are 3 armies in Russia, known as the army of European Russia, the army of the Caucasus, and the Asiatic army. These armies are practically distinct from each other, and the terms of service in each are slightly different.

Speaking generally, service in the first line, or active army, is for 3 years in the infantry, field, and foot, artillery, and for 4 years in the other arms. The soldier is then transferred to the reserve (*Zapas*), in which he serves for 15 or 14 years, undergoing during this period 2 trainings of 6 weeks each. Having completed 18 years in the first line and its reserve, the soldier passes to the 'Opolchénie.' Service in the Opolchénie is for 5 years, that is to the completion of the 43rd year of the soldier's age.

The Cossacks, occupying the S.E. portion of European Russia, hold their lands by military tenure, and are liable to service for life. The Cossack troops are almost entirely mounted; they provide their own horses and equipment. The young Cossacks from the age of 19 are trained for two years at their homes. They then enter the 'first category' regiment of their district, in which they remain for four years. These regiments are permanently embodied and may be employed in any part of the Empire. The men then pass to the 'second category' regiment for another four years, and to the 'third category' regiment for a similar period. The men of the second category regiments live at their homes but retain their equipment

and horses; in the third category the men have their equipment but no horses; they are called out for three weeks' training every year. Finally there is a period of five years in the reserve, which fills casualties in time of war. Besides this, every Cossack up to any age can be called out in time of emergency to assist in the national defence.

The Opolchénié, or territorial army, is divided into 2 classes, or 'bans.' The first ban includes not only the trained men who have passed through the first line and reserve, but the young men surplus to the annual contingent, and all are liable to embodiment in the active army in time of war. This part of the Opolchénié therefore serves the purpose of a supplementary reserve. But provision is also said to have been made for the formation of a large number of units, which are to be organised in 40 divisions, each consisting of 16 battalions, 2 batteries, and a cavalry regiment of 4 squadrons; these are for home defence. The second ban of the Opolchénié is the levy *en masse*, containing all those exempted from actual service, whether as students, only sons, &c., or as not quite up to the physical standards of the army, and also the older classes of the surplus men who have all had a certain amount of training.

There is a modified system of one year volunteers in Russia, which furnishes the majority of the officers required for the reserve troops on mobilisation.

A Russian division consists of 2 brigades of 2 regiments of 4 battalions. To each division is attached an artillery brigade of 6 or 8 batteries, with its ammunition columns, an engineer battalion and 2 or 3 sotnias (squadrons) of Cossacks. The normal army corps consists of 2 divisions, a howitzer division, a sapper battalion, and, in the case of several army corps, a cavalry division. A cavalry division ordinarily consists of 2 brigades of 2 regiments (one brigade of uhlans and hussars, the other of dragoons and Cossacks), and 2 batteries of horse artillery. Field batteries have 8 guns each, horse artillery batteries have 6 guns each. The fighting strength of an army corps may be taken as 36,000 men, without a cavalry division; and 40,000, if a cavalry division is included. In European Russia, including Finland, rifles are organised in regiments of 2 battalions, and form permanent brigades of 4 regiments (8 battalions). These rifle brigades have their own artillery (3 batteries), and they are not included in army corps; they are considered special troops, and are supplied with a better stamp of recruits than the line.

The field army of European Russia consists of 27 army corps, viz.:—the Guard and Grenadier Corps, and 25 line army corps. The cavalry comprises 2 guard divisions and a guard brigade, 15 line divisions, 2 'mixed' divisions (half dragoons and half Cossacks), a Don Cossack division, and 3 independent cavalry brigades. Of the 20 cavalry divisions, 15 are permanently attached to army corps, and 4 are formed into two cavalry corps. The second mixed division and the separate brigades are independent. All told, the army in Europe comprises 1,038 battalions, 642 squadrons, and 497 batteries. There are three aerial battalions and 11 independent companies, besides a special instructional section.

The field army in the Caucasus consists of 3 army corps, each of 2 divisions (one division is of Caucasian grenadiers); and 4 cavalry divisions, 1 of line cavalry (dragoons) and 3 divisions of Caucasian Cossacks (Kutan and Terek); a brigade of Cossack (Kuban) infantry of 6 battalions, and 2 brigades of Caucasian rifles, each of 4 battalions. The second rifle brigade is recruited from Christian natives of the Caucasus.

In the Asiatic army the men are Russians, with the exception of a few Turkoman irregular horse (jigits). In Western and Central Asia there are 5 rifle brigades, each of 4 battalions, in peace, and 8 in war. There is also a Turkestan Cossack Division, and a Transcasian Cossack brigade.

The 5 brigades mobilise as the first and second Turkestan Army Corps. Each army corps has a Turkestan artillery brigade, one of 6 and one of 9 batteries.

But the largest part of the Asiatic army is in East Siberia, which now possesses a strong and complete army of its own. Since the Russo-Japanese war the East Siberian forces have been increased and reorganised. There are 11 divisions of Siberian rifles, each with a corresponding artillery brigade of 4 batteries of 8 guns. Mounted troops are supplied by the Trans-Baikal, Amur, and Ussuri Cossacks, and the Primorsk Dragoons, who collectively furnish 36 sotnias and squadrons in peace, and over 90 in war; also 2 Cossack H.A. batteries, expanding to 4 in war. The whole would mobilise as 5 Siberian army corps (instead of 3, as formerly), and from 2 to 4 Cossack cavalry divisions.

The troops of the Russian Empire are so far territorialised that each corps draws its recruits from a particular district, and is as a rule permanently quartered in the same garrisons. But in European Russia the bulk of the army is stationed west of a line drawn north and south through Moscow, consequently recruits and reservists have in the majority of cases to travel long distances to join their corps. Moreover, a number of recruits from 'Great Russia' are sent to corps outside. All this makes mobilisation a slower and more difficult process than in Germany or France. The peace strength of the armies of Russia is upwards of 1,300,000 of all ranks. The field armies of European Russia and the Caucasus, with the first category reserve divisions, and the second category regiments of the Don and Caucasian Cossacks, may amount to 6,000,000 or 7,000,000 men.

The Russian infantry is armed with the '3 line' rifle, model 1891. It is a magazine arm, calibre .299in., muzzle velocity 2,035 f.s., sighted to 3,000 paces. The magazine holds 5 cartridges. The cavalry and Cossacks have a similar rifle, 2½ inches shorter in barrel, but taking the same cartridge. The Russian artillery is armed with a Q.F. shielded gun, model 1902, firing a shell of 13½lb. with a muzzle velocity of 1950 f.s.

The military budget of Russia for 1916 amounted (War and Navy) to 773,026,055 roubles ordinary expenditure, and 10,897,230 roubles extraordinary. Total 783,923,285 roubles.

### III. NAVY.

The Russian Navy is subject to special conditions such as do not affect the navies of other Powers. Owing to the geographical situation of the Empire, and the widely separated seas which wash its coasts, Russia is obliged to maintain four distinct fleets or flotillas, each with its own organisation. These are: the Baltic Fleet, the Black Sea Fleet, the Pacific Fleet, and the Caspian Flotilla. Of these the most important in regard to Western relations is the Baltic Fleet. The chief base of the Baltic Fleet is Kronstadt, which is heavily fortified, as are Reval, Ust-Dvinsk, Viborg, Sveaborg, and other Baltic ports. The Gulf of Finland is usually blocked by ice from November to April, whereby the operations of the fleet are impeded, but a new ice-free port at Libau, in Courland, was made ready for the fleet. This port was taken by the Germans in the summer of 1915. During the summer Archangel has been the supply base for the Russian army for materials of all kinds coming from Europe and America, and the railway has now been completed to the new ice-free port on the Murman coast, where a base has been created. Considerable progress has lately been made in the construction of ice-breaking vessels, and Reval can no longer be considered altogether ice-bound throughout the winter.

In the Black Sea, Sebastopol, headquarters of the Euxine fleet, has been strongly fortified; Nikolaiev, Kinburn, and Ochakov have received

important defensive works; Kerch and Yenikale have been made very strong, and Azov, Poti, and Batum have been strengthened. There is a flotilla also in the Caspian Sea, which ensures the communications of the Trans-Caspian railway between Baku and Krasnovodsk.

State dockyards are at Nevsky, New Admiralty and Galernyi Ostrov, Petrograd; Kronstadt, Libau, Reval, Sevastopol, Nikolaiev, and Vladivostok. Semi-private yards exist at the Baltic works (Petrograd), Izhora, Abo, and Nikolaiev.

The total number of officers and men is about 53,500.

The naval budget of Russia for 1914 amounted to 246,111,003 roubles, or 26,251,840% of ordinary expenditure.

The Russian Fleet, though inferior in numbers to the German fleet, proved universally successful in operations in the Baltic Sea. In August, 1915, Admiral Kanin in command, by his action in the Gulf of Riga threatened the left wing of Hindenburg's army and thus barred the road to Petrograd. The fleet was trained by the late Admiral von Essen to a high standard of professional attainment, and officers and men gained much from their experience in the course of the war. Vice-Admiral Nevenin was afterwards in command. In the Black Sea control went to the Turks as soon as the battle cruiser Goeben arrived, but on her receiving injuries, passed to the Russians, and without Russian sea power Trebizond would have remained in Turkish hands. Only occasionally did Turkish ships appear, and the other cruiser transferred from Germany, the Breslau, made one or two raids. The Russian Fleet both in the Baltic and Black Sea warmly supported the Revolution.

The following is a statement for 1917 of the strength of the Russian Fleet, including ships building and provided for, but excluding training ships and transports. The Caspian flotilla, consisting of a few small gunboats and steamships, is also excluded :—

	Baltic Fleet	Black Sea Fleet	Pacific Fleet	Total
Dreadnoughts . . . . .	4	3	—	7
Pre-Dreadnoughts . . . . .	4	7	—	11
Armoured cruisers . . . . .	3	—	—	3
Protected „ . . . . .	12	3	1	16
Destroyers . . . . .	25 ?	30	6	131
Submarines . . . . .	22	11	8	41

The battle-cruisers are not included in the above summary, their completion not having been recorded.

The following table gives the armour-clad fleet and principal cruisers of the Baltic and the Black Sea fleets :—

#### BALTIC FLEET.

Date of Launch	Name	Displacement	Horse-power	Speed	Officers and Men	Main armament

### Production and Industry.

Cultivated area of Russia, excluding Finland, Poland, the governments of Kholm, Courland, Kovno, Vilna, Grodno, Volhynia and Podolia, Yelisevetspol, the province Batum, Yakutsk and Kamchatka was, for cereals, 237,274,000 acres in 1914 and 231,574,000 acres in 1915; and for potatoes, 8,006,000 acres in 1914 and 7,514,000 acres in 1915.

*Crops.*—The cereal crops and potatoes gathered in the 71 governments and provinces of the country for the last two years and for the period 1910-1914 (average yield) are seen from the following, in millions of pounds:

—	1910-1914	1914	1915
Wheat (Winter) . . . . .	350.9	347.4	440.3
„ (Summer) . . . . .	869.2	950.9	933.4
Rye (Winter) . . . . .	1,125.7	1,112.3	1,384.0
„ (Summer) . . . . .	30.0	36.8	27.0
Oats . . . . .	781.0	729.3	795.3
Barley . . . . .	573.2	528.6	570.4
Various . . . . .	375.7	328.1	375.9
Total Crops . . . . .	4,105.7	4,033.4	4,526.3
Potatoes . . . . .	1,311.9	1,350.5	1,375.7

Tobacco production for five years:

—	1910	1911	1912	1913	1914
Number of plantations . . . . .	307,244	365,634	317,604	295,409	281,397
Acres under tobacco . . . . .	180,482	200,346	177,712	154,311	184,594
Annual yield in 1,000 pounds . . . . .	5,400	7,717	7,371	6,464	6,225

Number of horses, cattle, &c., in 1914 in thousands:—

—	Horses	Horned Cattle	Sheep and goats	Pigs
European Russia proper . . . . .	22,529	32,704	37,240	11,581
Poland . . . . .	1,098	2,014	565	452
Caucasus . . . . .	2,092	5,779	12,555	1,349
Siberia . . . . .	4,840	6,541	5,745	1,428
Central Asia . . . . .	4,414	5,014	16,168	185
Total . . . . .	34,973	52,052	72,273	14,995

The cotton production of Central Asia and Caucasus during the last four years is shown in the following table, in thousands of pounds:—

—	1912-13	1913-14	1914-15	1915-16
Central Asia . . . . .	11,483	12,664	13,906	18,400
Transcaucasia . . . . .	1,572	1,581	1,681	1,600
Total . . . . .	13,055	14,245	15,587	20,000

## II. FORESTS.

Of the total area of the country under forest, only that of European Russia proper, the Kingdom of Poland and the Caucasus can be estimated with any degree of certitude. In European Russia forests cover a territory of 474 millions of acres; in Finland, 50·5 millions; in Poland, 6·7 millions; in the Caucasus, 18·7 millions, reaching a total for the regions named of 550 millions of acres, 39 per cent. of total area. In the two Ural mountain provinces, forests cover 70 per cent. of total area; in the two northern provinces, 68 per cent.; in Finland, 63 per cent.; in the four lake provinces, 57 per cent.

The State forests are distributed as follows (January 1, 1914):—

	Total area 1,000 acres	Area in exploitation 1,000 acres
European Russia and Poland . . . . .	288,496·3	229,258·7
Caucasus . . . . .	13,202·0	8,309·5
Siberia and Central Asia . . . . .	637,282·3	274,959·3
Total . . . . .	938,981·6	512,527·5

The revenues and expenses of the State forests during six years are given in the following table (in 1,000 roubles):—

Years	Revenue	Expenses	Net profit	Years	Revenue	Expenses	Net profit
1912	84,588	30,004	54,862	1915	70,057	39,499	30,558
1913	92,376	34,587	58,125	1916	95,890	38,915	56,975
1914	72,039	41,213	61,928	1917	111,206	41,592	69,614

## III. MINING AND METALS.

The soil of Russia is rich in ores of all kinds, and mining industry is steadily increasing. The statistics during five years are given in the following table:—

Year	Gold <sup>1</sup>	Plati- num <sup>2</sup>	Silver <sup>3</sup>	Lead	Zinc	Cop- per	Pig Iron	Iron and Steel <sup>4</sup>	Coal	Naph- tha	Salt
	Kilogrammes			Metric Tons			Thousands of metric tons				
1911	58,711	5,766	15,512	1,238	12,212	26,112	3,589	2,887	28,414	9,152	2,013
1912	58,470	5,520	18,018	1,699	11,708	33,531	4,198	3,727	30,910	9,260	1,906
1913	60,847	4,898	—	—	—	33,695	4,636	4,039	—	9,193	—
1914	66,448	4,881	—	—	—	32,235	4,326	3,916	—	9,014	—
1915	48,095	3,374	—	—	—	25,996	3,684	3,265	—	9,360	—

<sup>1</sup> Unrefined (schlich gold); on the average it produces about 88 per cent. fine gold.

<sup>2</sup> Crude.

<sup>3</sup> Unrefined silver extracted from argentiferous lead ores; on the average it produces about 92 per cent. fine silver.

<sup>4</sup> Rolled of all kinds.

The following table gives the production of pig-iron in the different regions of Russia for five years, in thousands of pounds<sup>1</sup>:—

—	1911	1912	1913	1914	1915
South Russia . . . . .	147,747	173,379	189,700	166,200	167,500
Ural and Siberia . . . . .	44,867	50,589	55,800	52,400	50,800
Central Russia . . . . .	5,223	8,289	11,800	10,500	7,000
N. & N.W. Russia . . . . .	77	63	—	—	—
Poland . . . . .	21,161	23,945	—	—	—
Total . . . . .	219,075	256,265	257,300	249,100	224,800

<sup>1</sup> 1,000 pounds = 16·121 tons.

The quantities of iron and steel worked in the above-mentioned regions of Russia for five years, in thousands of pouds, were :—

—	1911	1912	1913	1914	1915
South Russia . . . . .	112,742	128,062	141,040	143,990	125,650
Ural . . . . .	37,172	39,442	40,810	40,600	40,270
Central Russia . . . . .	9,425	9,686	11,900	11,900	11,180
Volga Region . . . . .	7,560	10,353	10,070	10,140	9,270
N. & Baltic Region . . . . .	13,183	15,360	16,440	15,820	12,970
Poland . . . . .	22,619	24,637	—	—	—
Total . . . . .	202,702	227,540	220,260	222,450	199,340

The following table gives the output of coal in the different coalfields of Russia, for five years, in thousands of pouds.

—	1911	1912	1913	1914	1915
South Russia . . . . .	1,209,710	1,255,740	1,542,790	1,713,100	1,624,310
Poland . . . . .	360,400	392,900	426,310	236,000	—
Ural . . . . .	41,800	47,500	73,460	88,600	—
Central Russia . . . . .	10,860	12,600	18,340	18,560	—
Caucasus . . . . .	3,380	5,170	4,280	4,080	—
Russia in Asia . . . . .	99,293	100,000	—	—	—
Total . . . . .	1,725,443	1,813,910	2,066,180	2,060,340	—

Production of the oil fields for five years, in millions of pouds (1000 pouds = 16 tons) :—

—	1911	1912	1913	1914	1915
Baku district . . . . .	461	469	462	418	446
Grozny . . . . .	75	65	74	98	83
Cheleken . . . . .	12	12	13	11	11
Maikop . . . . .	8	9	5	4	8
Ferghana . . . . .	3	4	1	2	2
Uralsk (Emba) . . . . .	—	1	7	17	17
Total . . . . .	559	560	562	550	572

Salt production in Russian Empire for five years, in thousands of pouds :—

—	1908	1909	1910	1911	1912
Rock salt . . . . .	31,243	32,745	32,156	34,488	32,760
From salt marshes . . . . .	57,041	75,832	64,737	57,866	49,040
From brine by evaporation . . . . .	26,474	30,361	20,362	31,086	32,880
Total . . . . .	114,758	138,938	126,255	122,940	114,680 <sup>1</sup>

<sup>1</sup> Total production in 1913, 121,700 thousands of pouds.

The number of persons engaged in the making and working of metals was 530,165 in 1910.

#### IV. MANUFACTURES.

According to the last statistics published by the Department of Industry of the Ministry of Finance, the number of all kinds of industrial establishments under the inspectors of manufactories, in European Russia (excluding

Poland) and Caucasus, was, on January 1, 1915, 14,046, employing 1,960,86 workpeople.

Alcohol production of the last five years (ending June 30):—

—	1911-12	1912-13	1913-14	1914-15	1915-16
Number of distilleries	2,916	2,974	3,026	2,406	803
Production of alcohol in 1,000 gallons	121,088	133,230	140,812	60,812	11,970

Sugar production of the last five years (ending June 30):—

—	1911-12	1912-13	1913-14	1914-15 <sup>1</sup>	1915-16 <sup>1</sup>
Number of sugar works	282	287	293	242	237
Area under beetroot, in acres	1,923,913	1,851,206	2,126,380	1,888,136	1,675,942
Sugar production, in 1,000 pounds	121,340	86,823	103,827	106,110	90,824

<sup>1</sup> Excluding Poland.

In the flax-spinning industry the number of spindles at work increased from 416,274 spindles in 1913-14 to 406,500 in 1914-15. The quantity of raw flax treated rose from 4,995,590 pounds (1,000 pounds = 16 tons) in 1913-14 to 5,926,600 in 1914-15. The quantity of yarn spun increased from 3,132,998 pounds in 1913-14 to 3,848,500 in 1914-15, whilst the quantity of linen thread manufactured was 265,600 pounds in 1913-14 and 241,700 pounds in 1914-15. The number of looms at work decreased from 15,957 in 1912-13 to 14,948 in 1913-14 and 14,592 in 1914-15. Of the 14,592 at work in 1914-15, power looms numbered 14,329 and hand looms numbered 263.

The share capital of various financial, manufacturing, industrial, steamship and other enterprises in operation in Russia, numbering 1411, was estimated, in 1905, at 2,156,986,021 roubles. (Nearly 20 per cent. represented the capital of foreign companies.)

## V. FISHERIES.

Russia ranks third among the fish and deep-sea food-producing countries of the world. The total yield of fish amounted in 1914 to about 996,500,000 pounds (as against 1,292,500 in 1913). This is, however, by no means sufficient for the population of the vast Empire. The shortage is made up by imports of all kinds of low-priced fish, especially cod-fish and herrings (in 1913, 35,051,000 roubles of fish imported, against 7,393,000 roubles of fish and caviar exported).

According to official data the yield of fish in European Russia dropped from 1,587,600,000 pounds in 1893 to 1,044,000,000 pounds in 1907, and amounted to 1,581,228,000 in 1911.

Fisheries in 1911:

	European Russia	Asiatic Russia	Total
Production in 1,000 pounds	35,671	8,252	43,923
Value in 1,000 roubles	85,231	11,924	97,155
Persons occupied	263,000	33,200	296,200

**Commerce.**

The trade is carried on chiefly through the European frontier, through the Black Sea frontier of the Caucasus, and with Finland. The custom duties levied at these three frontiers form 90 per cent. of all custom duties.

The following table gives the exports and imports of Russia for the last six years in the trade with Europe, Asia, and Finland (bullion not included, nor the external trade of Finland) in millions of roubles:—

Years	Imports	Exports	Years	Imports	Exports
1911 .	1,161·7	1,591·4	1914 .	1,098·0	956·1
1912 .	1,171·8	1,518·9	1915 .	1,114·0	897·2
1913 .	1,374·0	1,520·1	1916 .	1,153·0	402·0

The exports and imports from and to the different frontiers for the last five years are given in the following table, in millions of roubles:—

—	1912	1913	1914	1915	1916
	Millions of roubles	Millions of roubles	Millions of roubles	Millions of roubles	Millions of roubles
<b>Exports:—</b>					
Through European frontier .	1,267·8	1,232·8	706·1	181·3	261·0
Through Black Sea frontier of Caucasus . . . . .	110·6	132·9	104·3	—	—
Trade with Finland . . . . .	49·6	55·3	55·7	132·6	209·0
Through Asiatic frontier . .	90·8	90·2	90·0	83·3	105·0
<b>Total . . . . .</b>	<b>1,518·8</b>	<b>1,520·2</b>	<b>956·1</b>	<b>397·2</b>	<b>575·0</b>

Animals . . . . .	32,985	12,918	5
Gutta percha . . . . .	5,405	5,168	1,907
Cottons . . . . .	2,563	1,265	907
Metallic goods . . . . .	4,746	2,830	2,043
Woollens . . . . .	1,721	1,718	790
Various . . . . .	16,020	11,051	8,460
Manufactured goods . . . . .	30,455	22,032	14,127

Sugar was, in addition, exported across the Asiatic frontier (in 1,000 roubles): in 1913, 20,450 ; in 1914, 18,337 ; and in 1915, 21,310 ; and cottons (in 1,000 roubles): in 1913, 40,854 ; in 1914, 34,022, and in 1915, 27,489.

The principal imports across the three above-mentioned frontiers, grouped according to a new customs tariff of March 1 (14), 1906 :—

Imports	1913	1914	1915
1. Articles of food and animals	1,000 roubles	1,000 roubles	1,000 roubles
Cereal crops . . . . .	15,579	10,404	434
Rice . . . . .	6,045	3,766	94
Fruits, vegetables, and nuts . . . . .	22,983	15,277	5,340
Coffee . . . . .	8,999	5,600	8,757
Tea . . . . .	30,696	32,094	34,767
Tobacco . . . . .	1,465	1,322	1,015
Spirits and wines . . . . .	19,948	12,590	3,638
Fish . . . . .	35,044	23,821	6,710
Animals . . . . .	3,105	2,412	870
Various . . . . .	22,243	15,998	14,823
Total . . . . .	166,107	123,284	76,448
2. Animal products			
Leather, hides, and skins . . . . .	57,092	41,177	44,435
Various . . . . .	33,959	24,649	7,181
Total . . . . .	91,051	65,826	51,616
3. Timber and wooden goods . . . . .	49,873	33,639	17,195
4. Ceramic . . . . .	31,766	20,442	5,427
5. Fuel, asphalt, gum, and resin			
Coal and coke . . . . .	86,905	52,512	14,873
Caoutchouc and gutta-percha . . . . .	42,280	29,963	32,241
Various . . . . .	13,568	8,950	5,544
Total . . . . .	142,753	91,425	52,658
6. Chemicals and colours			
Chemicals . . . . .	27,572	24,233	35,685
Colours . . . . .	14,649	10,180	5,115
Various . . . . .	17,194	12,205	13,319
Total . . . . .	59,415	46,558	54,119
7. Ores, metals, and metal-goods			
Raw metals . . . . .	52,735	55,049	73,827
Metal goods . . . . .	13,158	11,172	9,094
Machinery . . . . .	163,727	125,861	45,414
Various . . . . .	109,443	87,567	106,947
Total . . . . .	339,063	279,649	235,282
8. Paper and paper goods . . . . .	40,609	34,172	47,418
9. Textile			
Raw cotton . . . . .	100,098	88,506	42,700
Raw Silk . . . . .	27,258	19,774	11,946
Raw Wool . . . . .	53,116	39,801	7,265
Cotton yarn . . . . .	9,769	6,913	2,864
Wool yarn . . . . .	18,950	13,305	1,222
Cotton and other textile goods . . . . .	50,132	45,970	43,348
Various . . . . .	24,085	17,501	15,541
Total . . . . .	283,408	231,770	124,886
10. Clothes . . . . .	16,494	12,333	9,089
Grand Total . . . . .	1,220,539	939,098	674,138

Besides, rice was imported from Persia (in 1,000 roubles) : in 1913, 7,038 ;

in 1914, 9,100; in 1915, 14,416. Raw cotton was imported across the Asiatic frontier (in 1,000 roubles): in 1913, 13,943; in 1914, 15,431, and in 1915, 59,003.

The imports from and the exports to the different countries across the above-mentioned three frontiers for the last three years are seen from the following tables:—

Imports from	1913	1914	1915
	1,000 roubles	1,000 roubles	1,000 roubles
Germany . . . . .	642,756	417,797	23,698
United Kingdom . . . . .	170,352	167,358	227,770
United States . . . . .	74,171	77,018	151,021
France . . . . .	56,015	42,929	28,795
Austria-Hungary . . . . .	34,683	23,482	1,429
Finland . . . . .	50,964	53,722	91,759
China . . . . .	15,260	18,284	22,384
Italy . . . . .	16,711	15,001	8,187
Netherlands . . . . .	21,389	19,425	8,257
Egypt . . . . .	5,929	7,526	168
East Indies . . . . .	29,997	24,476	7,479
Norway . . . . .	9,770	6,697	5,943
Belgium . . . . .	8,605	5,475	576
Turkey . . . . .	16,938	9,500	596
Denmark . . . . .	12,818	7,317	7,174
Switzerland . . . . .	5,240	3,592	3,898
Sweden . . . . .	16,125	11,074	54,240
Other countries . . . . .	32,609	19,307	30,764
Total . . . . .	1,220,539	939,098	674,138

The chief imports were: from Germany, machinery and woollens; from United Kingdom machinery and coal; from United States and Egypt, raw cotton.

Exports to	1913	1914	1915
	1,000 roubles	1,000 roubles	1,000 roubles
Germany . . . . .	452,572	248,805	—
United Kingdom . . . . .	267,009	188,462	150,458
Netherlands . . . . .	177,411	94,696	2
France . . . . .	100,874	55,696	16,580
Italy . . . . .	73,761	40,575	183
Finland . . . . .	55,284	55,730	132,630
Belgium . . . . .	64,663	49,189	—
Austria-Hungary . . . . .	65,295	38,908	—
Denmark . . . . .	36,425	17,876	412
Turkey . . . . .	34,436	14,607	—
Rumania . . . . .	21,692	12,736	3,320
Norway . . . . .	6,696	5,046	440
Spain . . . . .	8,925	6,781	—
Sweden . . . . .	11,422	6,354	4,579
United States . . . . .	14,145	8,703	3,274
Egypt . . . . .	8,671	4,157	—
Other countries . . . . .	21,667	17,843	2,010
Total . . . . .	1,420,949	866,104	313,888

The chief exports were: to Germany, cereals, eggs, timber and flax; to United Kingdom, cereals, timber, eggs and flax; to Netherlands, cereals and timber; to France and Belgium, cereals and flax.

The quantities of cereals (in 1,000 pounds) exported from Russia to different countries of Europe in 1914 and 1915 appear as follows:—

	United Kingdom		Germany		Netherlands		France	
	1914	1915	1914	1915	1914	1915	1914	1915
Wheat . . .	19,153	1,799	11,715	—	30,795	—	18,634	7,986
Rye . . .	539	—	6,794	—	7,819	—	—	—
Barley . . .	9,552	—	82,203	—	17,589	—	597	—
Oats . . .	2,914	—	1,298	—	4,733	—	5,019	—
Maize . . .	1,513	—	777	—	3,039	—	2,470	—
Other cereals . .	1,267	—	26,580	—	2,452	—	415	192
Total . . .	34,938	1,799	129,367	—	66,427	—	27,135	8,178

The chief articles of import from Russia into the United Kingdom and of export (domestic produce and manufactures) from the United Kingdom to Russia in two years were, according to the Board of Trade returns:—

Imports	1914		1915		Exports		1914	1915
	£						£	
Wheat . . .	2,825,714		464,149		Iron . . .		910,510	874,565
Oats . . .	328,124		—		Coal . . .		2,174,757	47,524
Barley . . .	1,859,567		2,987		Machinery . .		3,647,527	1,984,587
Eggs . . .	2,914,085		1,749,822		Tin . . .		341,572	273,051
Flax and tow . .	2,424,867		3,688,725		Lead . . .		165,415	279,348
Wool . . .	7,417,125		4,706,637		Woolen yarn .		180,178	36,715
Butter . . .	3,382,411		637,102		New ships . .		359,596	454,000
Bacon . . .	433,167		32,031		Cotton yarn .		117,888	87,567

Total trade between Russia and the United Kingdom in thousands of pounds for 5 years (Board of Trade Returns):—

	1912	1913	1914	1915	1916
Imports from Russia into U. Kingdom . . .	40,538	40,270	28,092	21,424	18,305
Exports to Russia from U. Kingdom . . .	13,737	18,102	14,441	13,432	24,990

## Shipping and Navigation.

The registered mercantile marine of Russia on January 1, 1914, was as follows:—

	Steamers		Automobile boats		Sailing Vessels		Total	
	Number	Tons	Number	Tons	Number	Tons	Number	Tons
White Sea . . .	80	13,644	8	330	415	23,043	503	37,017

## Internal Communications.

### I. RIVERS AND CANALS.

In European Russia (exclusive of Finland) there are 153,782 miles of rivers, canals and lakes, 20,670 miles being navigable for steamers, 7,482 for small sailing vessels, 88,739 for rafts. In Asiatic Russia there are 86,422 miles of rivers, canals, and lakes, 21,421 miles being navigable for steamers, 8,678 for small sailing vessels, 33,224 for rafts.

The following tables give the results of the census of river fleet of European Russia in 1900, compared with those of 1890 and 1895, and the provisional data of the census of 1906, as regard the number of vessels.

Number of vessels and their crew :—

—	1890		1895		1900		1906
	Number	Crew	Number	Crew	Number	Crew	Number
Steamers	1,824	25,814	2,539	32,689	3,295	40,603	3,696
Other vessels	20,125	90,356	20,580	95,608	22,859	98,269	22,980
Total .	21,949	116,170	23,119	128,297	26,154	138,872	26,676

The horse-power of the river steam fleet in 1890 was 103,206 ; in 1895, 129,759 ; in 1900, 165,004. The tonnage of vessels not provided with steam power :—In 1890, was 6,468,835 tons ; in 1895, 8,495,215 ; in 1900, 10,869,583 ; in 1906, 13,000,000.

The naphtha flotilla of the Caspian Sea numbers 57 steamers and 263 sailing vessels, which have transported above 30,000,000 cwt. of naphtha.

### II. RAILWAYS.

The railway-net open for traffic on January 1, 1913, had a length of 46,573 miles, of which 35,987 miles were in European Russia, 10,586 miles in Asiatic Russia. The length of the lines belonging to and worked by the Government is 33,928 miles ; that of the lines belonging to public companies is 11,149 miles ; short local lines, 1,496.

Lines in construction : Amur Railway, 1,974 versts ; Kherson-Merefa, 542 ; Rovno-Grishino, 853 ; Petrozavodsk-Sorotsk, 356 ; Sorotsk-Kandalaksha, 371 ; Kandalaksha-Kola, 260 ; Petrograd-Rybinsk, 560 ; other less important lines, 648 (January, 1917). The projected railways for construction between 1917 and 1922 comprise a total of 20,779 miles.

The progress of the railways of Russia (exclusive of Finland) for ten years (in English miles) is seen from the following table :—

Years	European Russia	Asiatic Russia	Total	Years	European Russia	Asiatic Russia	Total
1903	31,299	5,153	36,452	1908	34,108	10,472	44,595
1904	31,735	6,372	38,107	1909	34,465	10,485	44,950
1905	32,108	7,478	39,586	1910	34,581	10,497	45,078
1906	32,743	8,005	40,748	1911	35,447	10,578	46,025
1907	33,048	8,128	41,176	1912	35,987	10,586	46,753

Gross receipts, number of passengers, and weight of goods carried for two years :—

	Passengers		Goods		Gross receipts	
	1911	1912	1911	1912	1913	1914
	1,000 persons	1,000 persons	million pounds	million pounds	1,000 roubles	1,000 roubles
State railways . . . .	161,577	172,871	9,571	10,280	826,315	772,486
Public companies . . .	42,535	45,740	3,124	3,668	341,908	342,158
Short local lines . . .	14,679	15,023	175	179	8,197	7,493
Total . . . . .	218,791	233,634	12,870	14,127	1,176,420	1,122,132

The number of men employed on the Russian railways was 825,315 in 1906, 836,034 in 1907, 844,218 in 1908, and 797,926 in 1909.

The cost of construction of the railways of Russia, without Finland, was estimated in 1909 at 6,723,780,998 roubles.

### III. POSTS, TELEGRAPHS, AND TELEPHONES.

The following are the postal and telegraphic statistics for five years :—

#### INTERNAL AND EXTERNAL COMMUNICATIONS.

	Letters and postcards	Book post, periodicals and parcels	Letters with money and postal orders
1909 . . . . .	1,209,656,000	610,926,000	41,828,000
1910 . . . . .	1,351,956,000	677,553,000	46,055,000
1911 . . . . .	1,463,258,000	718,047,000	47,670,000
1912 . . . . .	1,613,500,000	747,500,000	51,400,000
1913 . . . . .	1,797,100,000	810,300,000	56,500,000

	Telegraphs		
	Lines	Wire	Telegrams Carried
	Miles	Miles	Number
1907 . . . . .	106,238	415,897	161,657,738
1908 . . . . .	119,117	415,004	163,363,094
1909 . . . . .	120,865	425,969	181,748,546
1910 . . . . .	126,483	453,530	—
1911 . . . . .	134,036	476,177	—

### Money and Credit.

By an Imperial decree, dated January 3 (15), 1897, it was ordered that the State Bank should accept paper money and exchange it for gold money. The growth of the paper currency and the fluctuations of the guarantee fund on January 1 (14), of five years are represented as follows in millions of roubles :—

	1912	1913	1914	1915	1916
Paper currency . . .	1,460·0	1,000·0	1,775·0	2,947·0	5,617·0
Guarantee fund (in gold) . .	1,436·2	1,555·5	1,695·0	1,738·0	2,260·0

*The Bank of Russia* acts in a double capacity—of State Bank and of commercial bank. It has 134 branches and 791 treasuries. The situation of the bank on April 14, 1916, March 29, 1915, and on March 7, 1914, was as follows (in thousands of roubles) :—

—	March 21, 1917	April 14, 1916	March 29, 1915
Notes in reserve . . . . .	1,000 roubles 102,600	1,000 roubles 88,742	1,000 roubles 61,723

Sums advanced in 1,000 roubles . . . . .	146,082	114,290	876,851

## Diplomatic and Consular Representatives.

### 1. OF RUSSIA IN GREAT BRITAIN.

*Ambassador.*—Vacant.

*Counsellor and Chargé d'Affaires ad interim.*—E. Sabline.

*Second Secretaries.*—G. Wolkoff, L. Zarine, M. Gruenman, and Baron C. Wrangel.

*Honorary Attaché.*—G. Wilenkine.

*Attaché.*—G. de Ciehanowiecki.

*Military Attaché.*—Lieut.-General N. Yermoloff, K.C.B., K.C.V.O.

*Naval Attaché.*—Rear-Admiral N. Wolkoff, C.B.

*Commercial Attaché.*—M. Ostrogradsky.

*Consul-General.*—Baron de Heyking.

Russia has consuls at Belfast, Hull, Liverpool, Newcastle, and Plymouth; and vice-consuls at many other towns.

### 2. OF GREAT BRITAIN IN RUSSIA.

*Ambassador.*—Right Hon. Sir George Buchanan, G.C.B., G.C.M.G., G.C.V.O., C.B.; appointed 1910.

*Councillor.*—Hon. F. O. Lindley.

*Secretaries.*—H. J. Bruce, M.V.O., Sir R. Sommerville Head, Bart., C. F. J. Ramsden and Hon. H. W. Brooks.

*Military Attachés.*—Lt.-Col. A. W. Fortescue Knox and Major J. M. Blair.

*Naval Attaché.*—Commr. H. G. Grenfell, R.N.

*Hon. Attaché.*—Hon. Guy E. Colebrooke.

*Consul at Petrograd.*—A. W. W. Woodhouse.

There are also British Consuls-General (C.G.), Consuls (C.), or Vice-Consuls at Abo, Archangel, Baku, Batûm (C.), Berdiansk, Fredrickshamn, Cronstadt, Helsingfors, Kiev (C.), Kerch, Libau, Mariupol, Moscow (C.), Narva, Nicolaiev, Novorossiisk, Odessa (C.G.), Pernau, Poti, Revel, Riga, Rostov, Sebastopol, Taganrog, Theodosia, Warsaw (C.), Windau and other towns.

## FINLAND.

The Government of Finland and her relations to the Empire have been described under the heading of Local Government, and its area and population are given with the area and population of the Russian provinces. Of the total area 10·83 per cent. is under lakes. In 1890 the postal administration of Finland was subjected to the Russian Ministry of Interior.

### Population.

Years	In Towns	In Country	Total	Men	Women
1911	470,792	2,684,432	3,155,224	1,567,711	1,587,513
1912	484,410	2,711,961	3,196,371	1,589,069	1,607,302
1913	497,914	2,734,081	3,231,995	1,607,610	1,624,385
1914	504,337	2,765,064	3,269,401	1,626,856	1,642,545

In 1911 the population consisted of 2,571,145 Finns, 338,961 Swedes, 7,339 Russians, 1,794 Germans, 1,659 Laps, etc.

Of the total population there were at end of 1914 :—Lutherans, 3,207,783 ; Greek Orthodox and raskolniks, 55,204 ; Roman Catholics, 482 ; Baptists, etc., 5,932.

The chief towns, with population, of Finland are (1911) :—Helsingfors (with Sveaborg), 170,452 ; Åbo, 53,926 ; Tammerfors, 45,213 ; Viborg, 29,329 ; Uleåborg, 21,605 ; Björneborg, 17,571 ; Nicolaistad (Wasa), 24,430 ; Kuopio, 17,587.

The movement of the population for three years was as follows :—

Years	Marriages	Births	Deaths	Excess of Births
1912	18,653	92,275	51,645	40,630
1913	18,923	87,250	51,876	35,374
1914	18,381	87,577	50,690	36,887

The births and deaths are exclusive of still births, numbering, in 1914, 2,305 or 2·56 per cent. of total births.

Emigration, 1909, 19,144 ; 1910, 19,007 ; 1911, 9,372 ; 1912, 10,727 ; 1913, 20,057 ; 1914, 6,474 ; 1915, 4,041.

### Instruction.

In 1916 Finland had 1 university, with 3,478 students (866 women) ; in 1916, 1 technical high school, 589 students (29 women) ; 2 commercial high schools with 189 students ; 1915, 72 lyceums (26 State), 16,277 pupils (5,236 girls) ; 17 continuation classes for boys and girls, 681 pupils ; 32 elementary schools for boys and girls, 2,972 pupils ; 25 girls' schools, 5,402 pupils ; 36 preliminary schools, 1,912 pupils ; in the country 8 popular high schools with 1,686 pupils ; in the country 3,250 primary schools (of higher grade) with 150,833 pupils ; and primary schools (of lower grade) with 72,157 pupils ; in 38 towns, primary schools with 1,410 teachers and 42,272 pupils ; 8 training colleges for primary (popular) school teachers, with 1,089 pupils ; 7 for preliminary schools with 250 pupils. There are besides 6 navigation schools, with 89 pupils ; 19 commercial schools with 1,472 pupils 27 primary trade schools, with 812 pupils ; 23 higher trade schools, with 1,398 pupils ; 12 technical schools, with 801 pupils ; 111 schools for arts and crafts ("slöjd"), with 3,177 pupils ; 70 agricultural, 6 dairy schools, 42 cattle-managers' schools, and 31 horticultural schools with together 3,011 pupils ; 5 forester schools with 173 pupils. The school age in the primary schools is from 7 to 15 years.

In 1915 there were published 274 newspapers and reviews in Finnish, 103 in Swedish, 7 in Swedish and Finnish, 2 in German, 3 in Russian, 1 in English and 1 in French.

### Pauperism and Crime.

The number of paupers in 1914 supported by the towns and the village communities was 95,408 (2·92 per cent. of the population) ; and the total cost was 8,325,680 marks.

The prison population, at the end of 1914, was 2,994 men and 494 women, while the number of sentences pronounced, in the first instance, for crimes was 27,446, and for subjects of contention 41,950.

### Finance.

The receipts for 1915 were 194,207,122 marks, ordinary, and 2,121,505 marks, extraordinary revenue, 3 568,040 marks being taken from the funds ;

and expenditure 161,365,101 marks, ordinary, and 37,532,550 marks, extraordinary expenditure, 597,160 marks being disposed for the funds. Of the revenue, 6,808,317 marks came from direct taxes; 46,295,710 marks from indirect taxes; 97,176,273 marks from the railways, forests, domains, and other properties of the State, and 73,926,812 marks, other revenues. The chief items of expenditure are: government, 3,275,906 marks; justice and prisons, 5,965,342 marks; military affairs, 16,164,999 marks; civil administration, 14,976,823 marks; religion and education, 18,555,035 marks; communications, 60,497,942 marks; public debt, 8,029,563 marks; commerce and industries, 6,804,113 marks; agriculture, 7,147,450 marks; pensions and grants, 5,665,800 marks, &c.

On January 1, 1916, the public liabilities of the Grand Duchy, contracted entirely for railways, amounted to 169,368,117 marks.

### Industry.

The land was divided in 1910 into 284,188 farms, and the landed property was distributed as follows:—Less than 3 hectares cultivated, number of farms, 143,933;  $\frac{1}{4}$  hectares, farms 88,398;  $\frac{1}{2}$  hectares, farms 37,749;  $\frac{3}{4}$  hectares, farms 13,209; over 100 hectares, farms 899.

The crop of 1914 was in hectolitres:—Wheat, 69,211; rye, 3,978,946; barley, 1,521,039; oats, 6,897,155; potatoes, 6,602,533; flax and hemp, 979 tons.

Of domestic animals Finland had in the country at the end of 1914:—Horses, 3 years of age, 294,264; horned cattle, 2 years of age, 1,167,112.

The crown forests cover January, 1915, 12,546,087 hectares. Their maintenance cost (1914) 3,033,313 marks, and the income derived from them was 15,214,272 marks. In 1914 there were 157 saw mills with water motors and 578 steam and 288 motor mills. They give occupation to 26,099 workers.

The annual produce of pig-iron and iron, in metric tons, for three years was:—

Years	Ore	Pig-iron	Bar Iron
1912	2,507	10,034	29,020
1913	5,328	8,963	28,425
1914	3,749	9,931	26,956

Finland had in 1914, 5,024 large manufactures, employing an aggregate of 106,097 workers, and yielding an aggregate product (inclusive of flour mills) of 702,105,800 marks. The chief were:—

—	No. of Establishments	No. of Workers	Production
			Marks
Iron and mechanical works . . . . .	284	16,308	78,017,900
Textiles . . . . .	145	15,555	76,521,300
Wood industries . . . . .	756	81,371	149,455,300
Distilleries and breweries . . . . .	78	1,141	9,206,700
Paper . . . . .	134	12,496	101,477,400
Leather . . . . .	85	2,956	30,041,700
Chemicals . . . . .	40	988	4,685,300
Graphic arts . . . . .	152	3,300	12,983,700
Tobacco . . . . .	21	5,289	26,587,500
Electricity, gas and water . . . . .	96	1,401	11,470,500

The total number of steam engines was in 1914, 1,835; horse-power 136,031; 3,422 electric engines; and 358 other engines.

**Commerce.**

The exterior trade of Finland appears as follows, in thousands of marks (francs) :—

—	1913		1914		1915	
	Imports from	Exports to	Imports from	Exports to	Imports from	Exports to
Russia .	140,198	113,301	145,097	125,457	384,997	204,172
Sweden and Norway .	28,094	18,326	41,787	25,889	163,920	62,020
Denmark .	29,853	11,916	17,616	7,323	12,399	—
Germany .	202,535	52,151	118,378	20,937	6,944	—
Gt. Britain	60,660	108,565	33,619	67,499	4,894	270
Spain .	2,692	12,180	1,491	5,671	385	—
France .	7,113	38,528	3,486	14,013	1,820	—
Various .	24,789	49,832	18,620	18,391	4,050	—
Total .	495,434 (18,578,725 <i>l.</i> )	404,799 (15,179,963 <i>l.</i> )	380,164 (15,206,560 <i>l.</i> )	285,180 (11,407,200 <i>l.</i> )	578,409 (23,136,860 <i>l.</i> )	266,462 (10,658,480 <i>l.</i> )

The chief articles of export are : timber (36,309,000 marks in 1915, butter (36,861,000), paper, paper mass, and cardboard (93,452,000), iron and iron goods, textiles, leather, hides, tar, pitch and fish.

The chief imports were : cereals (148,775,000 marks), coffee and chichory (29,284,000), sugar (46,588,000), iron and ironware (37,475,000), cotton (26,323,000), cottons (5,390,000), machinery (18,962,000), chemicals, leather ware, tobacco, colours, oils, leather and hides.

**Shipping and Navigation.**

Number of vessels entered and cleared in 1914 :—

	Entered		Cleared	
	No.	Tons	No.	Tons
Finnish . . .	5,691	923,223	5,911	934,764
Russian . . .	741	237,978	690	230,198
Foreign . . .	1,967	1,191,081	1,937	1,161,255
Total . . .	8,399	2,352,282	8,538	2,326,217

The Finnish commercial navy numbered on January 1, 1915, 3,257 sailing vessels of 380,134 tons, and 564 steamers, 79,172 tons ; total, 3,821 vessels of 459,306 tons.

**Internal Communications.**

For internal communications Finland has a remarkable system of lakes connected with each other and with the Gulf of Finland by canals. The number of vessels which passed along the canals in 1914 was 46,221 ; the receipts from vessels, 787,286 marks ; and expenditure, 1,007,469 marks.

In 1914 there were 2,506 miles of railways, all but 217 miles belonging to the State. The traffic upon the State's railways in 1914 was 19,495,346 passengers and 4,419,000 tons of goods. The total cost of the State railways to the end of 1914 was 458,451,000 marks. The total revenue of the same

in 1914 was 58,524,886 marks, and the total expenditure (1914) 41,981,890 marks.

Finland had 2,445 post-offices in 1915, and revenue and expenses were respectively 8,042,162, and 7,960,110 marks; united letters and post-cards, 56,880,298; samples and printed packets, 6,192,751; newspapers, 85,638,555.

The 415 savings-banks had on December 31, 1914, 361,662 depositors, with aggregate deposits of 315,256,000 marks (12,610,240*l.*).

### Money, Weights, &c.

The *markka* of 100 *penni* is of the value of a franc, 9½*d.* The standard is gold, and the *markka*, though not coined in gold, is the unit.

Gold coins are 20 and 10-*markka* pieces. They contain .2903225 grammes of fine gold to the *markka*.

Silver coins are 2, 1, ½, and ¼-*markka* pieces.

Copper coins are 10, 5, and 1-*penni* pieces.

The paper currency is exchangeable at par against gold.

The metric system of weights and measures is universally employed in Finland.

## RUSSIAN DEPENDENCIES IN ASIA.

The following two States in Central Asia are under the suzerainty of Russia:—

### **BOKHARA.**

A Russian vassal State in Central Asia, lying between N. latitude 41° 30' and 36° 40', and between E. longitude 61° 40' and 73°, bounded on the north by the Russian provinces of Syr-Daria and Samarkand, on the east by the province of Ferghana, on the south by Afghanistan, and on the south-west by the Russian Trans-Caspian province and the Khanat of Khiva.

The reigning sovereign is SAYID-MIR-ALIM KHAN, son of the late Amir Sayid Abdul Ahad; born January 3, 1880, succeeded his father on January 6th, 1911. The heir is his son, Sayid Mir Ibrahim, born December 27, 1903.

The modern State of Bokhara was founded by the Usbeks in the fifteenth century, after the power of the Golden Horde had been crushed by Tamerlane. The dynasty of Manguts, to which the present ruler belongs, dates from the

end of the 18th century. Mir Muzaffar-ed-din in 1866 proclaimed a holy war against the Russians, who thereupon invaded his dominions, and forced him to sign a treaty ceding the territory now forming the Russian district of Syr Daria, to consent to the demand for a war indemnity, and to permit Russian trade. In 1873 a further treaty was signed, in virtue of which no foreigner was to be admitted to Bokhara without a Russian passport, and the State became practically a Russian dependency. In April, 1917, the Amir promised to grant a democratic constitution.

*Amirs of Bokhara.*—Sayid Ameer Hyder, 1799–1826 ; Mir Hussein, 1826 ; Mir Omir, 1826–27 ; Mir Nasrulla, 1827–60 ; Muzaffer-ed-din, 1860–85 ; Amir Sayid Abdul Ahad, 1885–1911.

Area 83,000 square miles, population about 1,250,000. Chief towns—Bokhara, about 75,000 ; Karshi, 25,000 ; Khuzar, Shahr-i-Zabz, Hissar, 10,000 ; Charjui, Karakul, Kermine.

The religion is Mahomedan. The Amir is stated to have given 20,000 roubles for the foundation of a school.

The Amir has 11,000 troops, of which 4,000 are quartered in the city. A proportion of the troops are armed with Russian rifles and have been taught the Russian drill.

Bokhara produces corn, fruit, silk, tobacco, cotton, and hemp ; and breeds goats, sheep, horses, and camels. Gold, salt, alum, and sulphur are the chief minerals found in the country.

The yearly imports of green tea, mostly from India, are said to amount to 1,125 tons. The imports from India also include indigo, Dacca muslins, drugs, shawls, and kincobs. Bokhara exports raw silk to India, the quantity exported in one year being estimated at 34 tons. By the treaty of 1873 all merchandise belonging to Russian traders, whether imported or exported, pays a duty of 2½ per cent. *ad valorem*. No other tax or import duty can be levied on Russian goods, which are also exempt from all transit duty. The Ameer has forbidden the import of spirituous liquors except for the use of the Russian Embassy.

The Russian Trans-Caspian Railway now runs through Bokhara from Charjui, on the Oxus, to a station within a few miles of the capital, and thence to Tashkent ; the distance from Charjui to the Russian frontier station of Katty Kurghan being about 186 miles. There is steam navigation on the Oxus.

There is a telegraph line from Tashkent to Bokhara, the capital.

Russian paper roubles are current everywhere. The Bokhara silver tenga is valued at 5*d*.

There is a Russian Political Agent at Bokhara.

#### KHIVA.

A Russian vassal State in Central Asia, lying between N. latitude 43° 40' and 40°, and E. longitude 57° and 62° 20'. Bounded on the north by the Aral Sea, on the east by the river Oxus, on the south and west by the Russian Trans-Caspian province.

**SAYID ASFENDIAR KHAN** succeeded his father in 1910 as reigning sovereign; born about 1871. The heir-apparent, accepted by Russia, is **Nasyr Tyouara**, son of Asfendiar.

Russian relations with the Khanate of Khiva—an Usbeg State, founded, like that of Bokhara, on the ruins of Tamerlane's Central Asian Empire—date from the beginning of the 18th century, when, according to Russian writers, the Khivan Khans first acknowledged the Tsar's supremacy. In 1872, on the pretext that the Khivans had aided the rebellious Kirghiz, an expedition advanced to the capital, bombarded the fortifications, and compelled the Khan to sign a treaty which puts the Khanate under Russian control. A war indemnity of about 274,000*l.* was also exacted. This heavy obligation, still being liquidated by yearly instalments, has frequently involved the Khan in disputes with his subjects, and Russian troops have more than once crossed the frontier to afford him aid and support. In April, 1917, the Khan promised to grant a democratic constitution.

The Khans of Khiva have been Mohamed Rahim Khan, 1806-25; Alla Kuli Khan, 1825-42; Rahim Kuli Khan, 1842-45; Mohamed Arnin Khan, 1845-55; Abdulla Khan, 1855-56; Kutlugh Murad Khan, 1856; Seyia Mohamed Khan, 1856-65; Seyid Mohamed Rahim Khan, 1865.

Area, 24,000 square miles; population estimated at 646,000, including 400,000 nomad Turcomans. Chief towns—Khiva, 4,000-5,000; New Urgenj, 3,000; Hazar Asp, and Kungrad.

The religion is Mahomedan. Army, about 2,000 men.

The chief commercial products are cotton and silk.

## SALVADOR.

(REPUBLICA DEL SALVADOR.)

**Constitution and Government.**—In 1839 the Central American Federation, which had comprised the States of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica, was dissolved, and Salvador became an independent Republic. The Constitution, proclaimed in 1824 under the Federation, and modified in 1859, 1864, 1871, 1872, 1880, 1883, and 1886, vests the legislative power in a Congress of 42 Deputies, 3 for each department. The election is for one year, and by universal suffrage. The executive is in the hands of a President, whose tenure of office is limited to four years.

*President of the Republic.*—Carlos Meléndez. Term of office, from March 1, 1915, to March 1, 1919.

*Vice-President.*—Dr. Alfonso Quiñonez.

The administrative affairs of the Republic are carried on, under the President, by a ministry of four members, having charge of the departments of:—The Exterior, Justice, Worship, and Instruction; War and Marine; Interior and Government; Finance, Public Work, and Beneficence.

**Area and Population.**—The area of the Republic is estimated at 13,176 English square miles, divided into 14 departments. Population (1 Jan., 1915), 1,267,762. Aboriginal and mixed races constitute the bulk of the population, Ladinos or Mestizos being returned as numbering 772,200, and Indians 234,648. The capital is San Salvador, with 66,800 inhabitants. Other towns are Santa Ana, population 48,120; San Miguel, 24,768; Nueva San Salvador, 18,770; San Vicente, 17,832; Sonsonate, 17,016.

The number of births in 1915 was 51,058; the number of deaths 34,447; the number of marriages, 3,886. Of the births in 1915, 26,140 were males, and 24,918 were females. Of the deaths, 19,072 were males and 18,375 females.

**Religion, Instruction and Justice.**—The dominant religion is Roman Catholicism. There is an archbishop in San Salvador and a bishop at Santa Ana and San Miguel respectively. Education is free and obligatory. There are in Salvador, in 1915, 881 primary schools, with 1,371 teachers and 46,744 enrolled pupils. There are also 27 higher schools (including 3 normal and 3 technical schools) with 675 pupils in 1915, and a National University with faculties of jurisprudence, medicine, pharmacy, dentistry, and engineering.

Justice is administered by the Supreme Court of Justice, one court of third instance (in the capital) and several courts of first and second instance, besides a number of minor courts. All judges of second and third instance are elected by the National Assembly for a term of 2 years, while the judges of first instance are appointed by the Supreme Court for a similar period. In 1915, 2,383 crimes of all kinds were committed in the Republic.

**Finance.**—Revenue and expenditure for five years:—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Revenue . . . .	1,033,429	1,098,730	993,900	850,114	908,325
Expenditure . . .	1,176,855	1,294,312	1,206,817	1,058,219	916,704

The total outstanding debt on December 31, 1915, was 27,560,287 silver dollars.

**Defence.**—The army may be divided into three parts: (1) available force, 78 officers, 512 petty officers, and 15,554 men; (2) forces that can be made available at short notice, 49 officers, 356 petty officers, and 11,176 men; (3) reserve force, 251 officers, 1,743 petty officers, and 15,554 men. Total, 378 officers, 2,611 petty officers, and 82,881 men. In case of war, military service is compulsory from 18 to 50 years of age. There is one custom-house cruiser.

**Production and Commerce.**—The population of Salvador is largely engaged in agriculture. The chief produce is coffee, under which there are about 166,039 acres, with some 95,000,000 trees. The estimated crop for 1915-6 was 75,000,000 pounds. Other agricultural products are cheese, cacao, rubber, tobacco, sugar. The Government is encouraging cotton-growing by bounties on exports. Efforts are made towards wheat cultivation. Tree planting is also encouraged. In 1908 there were 284,013 head of cattle, 74,336 horses, 21,457 sheep and 422,980 pigs. The mineral wealth of the Republic includes gold, silver, copper, iron, mercury. Mining operations are growing in importance. Operations are carried on by Salvadorian, United States, and British companies.

The imports subject to duty and the exports have been as follows in five years (in pounds sterling):—

—	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . . . .	1,022,700	1,397,000	1,234,709	1,005,841	800,483
Exports . . . . .	1,949,000	2,050,000	1,882,222	2,162,292	2,117,774

The trade is chiefly with the United States, the United Kingdom, and France. The chief imports in 1915 were cottons, hardware, flour, silk goods and yarn. The chief exports in 1915 were coffee, 65,113,017 pounds, valued at 20,495,851 silver dollars; indigo, balsam, 249,538 dollars; tobacco, 38,183 dollars; sugar, 527,884. Of the total coffee exported, 20 per cent. went to the United States; 14 per cent. to Norway; 13 per cent. to Holland; 12 per cent. to France; and 4 per cent. to Great Britain.

Total trade between Salvador and the U.K. (Board of Trade Returns) for 5 years:—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Salvador into U. K. . . . .	73,616	115,694	109,489	134,661	175,807
Exports to Salvador from U. K. . . . .	427,318	327,861	270,911	191,437	340,905

**Shipping and Communications.**—In 1915, 454 steamers entered at the ports of the Republic, with a tonnage of 605,544.

A railway connects the port of Acajutla with Santa Ana and La Ceiba; with this system San Salvador, the capital, is connected—a distance of 65 miles. Another line connects the Port of La Union with the chief city in the eastern part of the Republic, viz, San Miguel (40 miles), which has recently continued to the river Lempa, a distance of 43 miles from San Miguel. Another railway connects the capital with Santa Tecla. Total length of railway open (1915), 204 miles, all of narrow gauge. A steam or electric tramway line is to connect La Libertad and Nueva San Salvador. There are over 2,000 miles of good road in the Republic.

In 1915 there were 117 post offices which received 2,164,484 pieces of mail matter and despatched 3,426,970 pieces. In 1915 there were 215 telegraph offices and 2,406 miles of telegraph wire, over which passed 1,376,501 telegrams. There are 186 telephone stations and 2,181 miles of telephone line. A wireless station is in operation at Las Lomas de Candelaria.

## Money, Weights, and Measures.

### MONEY.

There are 3 banks of issue, the Banco Salvadoreño (paid-up capital, 3,000,000 pesos silver), Banco Occidental (paid-up capital, 900,000 pesos silver), and Banco Agricola Commercial (paid-up capital, 1,300,000 pesos silver). On December 31, 1915, they had notes in circulation to the value of 7,903,034 dollars.

The *Dollar*, of 100 *centavos*, nominal value 4s., real value about 19d.

In August, 1897, a law was passed adopting the gold standard. The import of debased silver coin is prohibited. In October, 1899, the Salvador mint, formerly the property of a company, was transferred to the Government.

In 1911, the Government of Salvador contracted with the four banks of San Salvador for the coinage abroad and the introduction of silver pieces of 5, 10, and 25 centavos, aggregating 300,000 pesos. These coins are 0·835 fine. Those of 5 centavos were to weigh 125 centigrams each; those of 10 centavos, 250 centigrams; and those of 25 centavos, 625 centigrams.

The fractional currency in circulation in Salvador now consists of silver 25 and 10 centavos, and nickel 5, 3, and 1 centavos.

### WEIGHTS AND MEASURES.

<i>Libra</i> . . .	= 1·043 lb. av.	<i>Arroba</i> . . .	= 25·35 lb. av.
<i>Quintal</i> . . .	= 104·3 lb. av.	<i>Fanega</i> . . .	= 1·5745 bushel.

In 1885 the metric system of weights and measures was introduced.

## Diplomatic Representatives.

### 1. OF SALVADOR IN GREAT BRITAIN.

*Chargé d'Affaires and Consul-General*.—Dr. Arturo R. Avila. Appointed May 9, 1912.

There are consular agents at London, Liverpool, Glasgow, Southampton, Newport, Brighton and Birmingham.

### 2. OF GREAT BRITAIN IN SALVADOR.

*Minister and Consul-General*.—C. Alban Young, M.V.O. Appointed September 18, 1913.

Vice-Consul at San Salvador and La Union.

## SANTO DOMINGO.

(REPÚBLICA DOMINICANA.)

**Constitution and Government.**—The Republic of Santo Domingo, founded in 1844, is governed under a Constitution bearing date November 18, 1844, re-proclaimed, with changes, at various dates in 1879, 1880, 1881, 1887, 1896, and 1908. By the Constitution of 1908 the legislative power of the Republic is vested in a National Congress, consisting of a Senate of 12 senators and a Chamber of Deputies of 24 members. These representatives are remunerated at the rate of 480*l.* per annum each. Each province is represented by one senator and (in practice) by two deputies. Senators are elected for six years, one-third retiring every two years, and deputies for a period of four years, one-half retiring every two years. But the powers of the National Congress only embrace the general affairs of the Republic.

*President of the Republic.*—Dr. Francisco Henriquez y Carvajal. Elected July 25, 1916. Term of office, 6 years.

The country is at present being administered to a certain extent by the United States, who landed troops in May, 1916, for the preservation of order. On December 1, 1916, the United States, as a temporary measure, appointed an American Governor.

The President is chosen by an electoral college for the term of six years, and receives a salary of 9,600 dollars per annum. There is no Vice-President. In case of death or disability of the President, Congress designates a person to take charge of the executive office.

The executive of the Republic is vested in a Cabinet composed of the President and seven Ministers, who are the heads of the departments of the Interior and Police, Finance and Commerce, Justice and Public Instruction, War and Marine, Agriculture and Immigration, Foreign Affairs, and Public Works and Communications.

The Republic is divided into twelve provinces. Each province is administered by a governor appointed by the President of the Republic, and they have all the same political, administrative, and judicial rights and powers. The various communes, cantons, and sections are presided over by prefects or magistrates appointed by the governors. The communes have municipal corporations elected by the inhabitants.

**Area and Population.**—The area of Santo Domingo, which embraces the eastern portion of the island of Quisqueya or Santo Domingo—the western division forming the Republic of *Haiti*—is estimated at 18,045 English square miles, with a population estimated (in 1913) at 708,000 inhabitants, but it is doubtful whether the population exceeds 600,000.

The population contains some creoles of Spanish descent, but is mainly composed of a mixed race of European, African and Indian blood; there are, however, many Turks and Syrians, especially in Santo Domingo city, where the dry goods trade is mainly in their hands. The language used by the populace is Spanish, but on the Samaná Peninsula there are a few hundred farmers, descended from American negro immigrants of 1823, who speak corrupt English. The Haitian patois is spoken to a considerable extent,

along the frontier. The capital, Santo Domingo, founded 1496 by Bartolomeo Colombo, brother of the discoverer, on the left bank of the river Ozama, was destroyed in 1547 by a hurricane, and subsequently rebuilt on the right bank of the same river. It had in 1912 22,000 inhabitants; Santiago, 12,000, and Puerto Plata and San Pedro de Macoris, 10,000 each; La Vega, about 8,000; Samaná, Sanchez, Azua, Monte Christy, San Francisco de Macoris and Moca have from 4,000 to 5,000 each.

**Religion and Instruction.**—The religion of the State is Roman Catholic, other forms of religion being permitted. There is a Catholic archbishopric with one suffragan see, viz., Porto Rico, now belonging to the United States. The Archbishop has been appointed Apostolic Delegate to both these countries (Santo Domingo and Porto Rico) and to Cuba.

Primary instruction is gratuitous and nominally obligatory, being supported by the communes and by central aid. The public or state schools are primary, superior, technical schools, and normal schools. The Professional Institute was formed into a University by Presidential decree on November 29, 1914. In 1914 there were 518 schools in the Republic (617 in 1913) with 16,124 pupils (18,564 in 1913).

**Justice.**—The chief judicial power resides in the Supreme Court of Justice, which consists of a president and 6 justices chosen by Congress, and 1 (Procurador Fiscal General) appointed by the executive; all these appointments are only for 4 years, but may be prolonged indefinitely. The territory of the Republic is divided into 12 judicial districts, each having its own civil and criminal tribunal and court of first instance, and these districts are subdivided into communes, each with a local justice (alcalde), a secretary and bailiff (alguacil). There are two appeal courts, one at Santiago de los Caballeros, and the other at Santo Domingo City.

**Finance.**—The revenue is derived chiefly from customs. There are, besides, alcohol and stamp taxes, and considerable receipts from wharf-dues, posts and telegraphs, and civil registration. The receipts and disbursements for 6 years were in United States dollars:—

—	Revenue	Expenditure	—	Revenue	Expenditure
	Dollars	Dollars		Dollars	Dollars
1910 . .	4,250,514	4,645,287	1913 . .	5,140,584	3,172,042
1911 . .	4,621,841	4,805,877	1914 . .	4,357,123	5,325,856
1912 . .	4,824,304	5,845,994	1915 <sup>1</sup> . .	4,468,000	4,406,567

<sup>1</sup> Estimates.

Customs collections for the calendar year 1914 were 3,015,332 dollars (620,4397.), for 1915, 3,882,048 dollars (798,7757.).

Under the Convention signed on the part of the United States and Dominican Governments, an American citizen is General Receiver of Customs with authority to deposit a minimum of 100,000 dollars each month towards interest (5 per cent.) and Sinking Fund, in trust for all the national creditors. In addition half the Customs Receipts in excess of 3,000,000 dollars is applied to the same end.

Under the Convention a loan of 20,000,000 dollars was authorised at

5 per cent. with the above provisions for interest and Sinking Fund. Only about 14,000,000 dollars was issued, the balance being kept to pay certain disputed liabilities and to provide a fund for Public Works. Interest on the whole has been paid since 1908 and a large sum towards amortisation. During 1915, 593,588 dollars (122,137*l.*) was available for the Sinking Fund, in addition to the excess interest for the year. About 500,000 dollars is withdrawn annually for Public Works. On January 1, 1916, the Sinking Fund amounted to about 3,700,000 dollars, and there were about 3,000,000 dollars of unissued bonds available for Public Works.

A further loan of 1,500,000 dollars at 6 per cent. was floated in March, 1913, redeemable by monthly instalments of 30,000 dollars from Customs Receipts. This loan has no connection with the original loan, and is in the nature of a second mortgage upon the Customs Receipts. After the United States intervention in May, 1916, United States officials took charge of the collection and disbursement of all government funds. Some such arrangement as the Convention of 1907—only affecting every branch of government finance—appears to be foreshadowed.

**Defence.**—The regular army provided for by law consists of one regiment of infantry, about 700 men, and one battery of artillery, about 90 men, the greater part of the force being usually kept at Santo Domingo, but Puerto Plata and Santiago are also military posts. The Rural Guard is provided for in the budget to the extent of 906 officers and men, but only about half that number have been embodied and equipped. There is also a force on the Haitian frontier under the direction of American officers, and dependent on the Receivership of Customs, but paid from the Dominican budget.

The navy consists of one gunboat. For the Customs service one fair-sized and two very small motor cutters are used.

**Production and Industry.**—Agriculture is the principal source of wealth. Of the total area, about 15,500 square miles is cultivable. Tobacco is grown in the western part and cacao in the eastern. Sugar-growing is a flourishing industry; production of sugar in 1914-15, 752,887 bags (of 310 pounds each); in 1915-16, 877,769 bags, and 1916-17, 1,033,000 bags; shipments in 1915, 102,800,551 kilos., to the value of 7,671,383 dollars. Cocoa was exported in 1915 to the extent of 20,223,023 kilos., valued at 4,863,754 dollars. The exports of tobacco leaf in 1915 amounted to 6,235,409 kilos., value 972,896 dollars. The tobacco crop has suffered much through the war, as in the past Germany was practically the exclusive buyer of the crop. Cotton exported in 1915 was 141,623 kilos., valued at 60,600 dollars. Coffee shows marked improvements in quality and a small increase in the quantity shipped in 1915 (2,468,435 kilos., valued at 458,431 dollars). The forest area of the Republic is 9,500,000 acres. No mining is carried on in the Republic with the exception of one copper mine.

**Commerce.**—The total imports into and exports from the Dominican Republic for 5 years were valued as follows in pounds sterling:—

—	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports .	1,429,971	1,690,925	1,854,455	1,345,801	1,823,708
Exports .	2,264,383	2,548,405	2,094,189	2,117,757	3,041,812

The foreign trade for 2 years was distributed as follows :—

Country	Imports				Exports			
	1914		1915		1914		1915	
	£	Per cent.	£	Per cent.	£	Per cent.	£	Per cent.
United States . . . . .	890,469	66·17	1,472,252	80·73	1,714,512	80·96	2,408,854	79·19

Other countries . . . . .	57,692	4·28	78,818	4·32	120,218	5·68	522,768 <sup>1</sup>	17·18
Total . . . . .	1,345,801	—	1,823,703	—	2,117,757	—	3,041,812	—

<sup>1</sup> Principally Canada.

In 1915 the chief imports were : cotton goods, 1,913,143 dollars ; iron and steel manufactures, 1,200,810 dollars ; provisions, 2,712,714 dollars, manufactured vegetable fibres (bags, sacks, &c.), 360,000 dollars ; chemical products and drugs, 200,509 dollars ; leather and manufactures, 296,799 dollars ; agriculture implements, 77,238 dollars. The bulk of the sugar and cacao are shipped for order to the U.S.A., and a large part is transhipped to Europe and Canada, the latter taking a large proportion of the sugar.

**Shipping and Communications.**—In 1915, 750 vessels of 517,671 tons entered, and 708 vessels of 500,007 tons cleared in the foreign trade of the Republic.

The interior is not well supplied with roads, though good roads are in course of construction between the principal northern cities and in the south from the ports to the neighbouring agricultural districts. There are 24 kilometres (15 miles) of the road from Santiago toward Monte Christy opened for traffic, and about 2 kilometres of the road is macadamised. From Monte Christy toward Santiago, about 45 kilometres (28 miles) of the road has been finished with bridges and culverts.

There are two railway lines in the Republic : (1) Samaná-Santiago line, belonging to an English company, runs from Sanchez on the Bay of Samaná to La Vega (73 miles) ; it has two branch lines (under the same management, but different ownership) from La Jina to San Francisco de Macoris (8½ miles), and from Las Cabullas to Salcedo (8 miles) ; this last is being extended to Moca in order to join the other system ; (2) a Government line, the Central Dominican railway, runs from Puerto Plata to Santiago and Moca (60 miles). Total length of line (1912) 150 miles. There are, besides, about 250 miles of private lines on the large estates.

Number of post-offices (1915), 87 ; total pieces of mail handled (1914) : foreign, 886,089 ; internal, 1,535,335 ; foreign parcel post, 9,474 pieces. Number of telephone offices (1915), 60 ; all the stations are now telephone though they only serve the purposes of a telegraph system.

The telegraph, in the hands of a French Telegraphic Company, is in operation between Santo Domingo, Puerto Plata, and Santiago, from Santiago to Monte Christy, and along the railway from Sanchez to La Vega ; total length, 352 miles. Several other inland lines are in project. Total length of telephone lines, 719 miles. Submarine cables belonging to the same French

Company connect in the north Puerto Plata with New York and Puerto Rico, and in the south Santo Domingo with Puerto Rico and Curacao.

Two small wireless stations are in existence at Santo Domingo and La Romana (a new port in the province of Seybo, declared open to foreign commerce in August, 1912) which can communicate with Porto Rico. There is another small station at San Pedro de Macoris which is only used for local transmission.

**Money, Weights, and Measures.**—On July 1st, 1897, the United States gold dollar was adopted as the standard of value. A small amount of debased silver coin circulates as small change at the ratio of 5 to 1.

In 1912 the National Bank of Santo Domingo was established with a paid up capital of 500,000 dollars. The Royal Bank of Canada has branches at Santo Domingo City, San Pedro de Macoris, Santiago and Sanchez.

The metric system was adopted on August 1, 1913. The old Spanish standards are occasionally used in local transactions.

## Diplomatic and Consular Representatives.

### 1. OF SANTO DOMINGO IN GREAT BRITAIN.

*Consul-General.*—Rafael Brache. Appointed December 11, 1914.

*Consul.*—Octavio Ventura.

*Vice-Consul.*—Albert M. Ventura.

There are consular representatives at Cardiff, Southampton, Grimsby, Liverpool, Birmingham, Glasgow, Leeds, Manchester, Nottingham.

### 2. OF GREAT BRITAIN IN SANTO DOMINGO.

*Minister.*—Stephen Leech (resident in Havana).

*Vice-Consul and Chargé d'Affaires in Santo Domingo.*—G. A. Fisher.

*Vice-Consul at Santo Domingo.*—H. H. Gosling.

There is also a Vice-Consul at San Pedro de Macoris, Sanchez, and Puerto Plata.

## SERBIA.

(KRALJEVINA SRBIJA.)

### Reigning King.

**Peter I.**, born June 29 (O.S.), 1844, son of Alexander Kara-Georgevitch; married, July 30 (O.S.), 1883, to Princess Zorka, daughter of Prince Nikolas of Montenegro; widower March 4 (O.S.), 1890; ascended the throne, June 2 (O.S.), 1903.

*Children of the King*:—(1) Princess Helene, born October 23 (O.S.), 1884. (2) Prince George, born August 27 (O.S.), 1887; on March 27 (N.S.), 1909, Prince George renounced his right of succession to the throne to which Prince Alexander will succeed. (3) Prince Alexander, now heir apparent, born December 4 (O.S.), 1888.

*Brother of the King*:—Prince Arsène, born April 4, 1859; married, April 15, 1892, to Aurora Demidoff (divorced in 1896); offspring: Prince Paul, born April 15, 1893.

The founder of the dynasty was Kara-George (*i.e.* Black George) Petrovitch who, in 1804, was proclaimed Commander-in-Chief in Serbia, but was murdered in 1817, leaving two sons—Alexis, born 1801, and Alexander, born 1806. In 1842 Alexander was chosen reigning Prince by the Skupshchina, and the title was confirmed by the Porte, but the dignity was not hereditary. In 1858 Alexander had to abdicate and was banished, and in 1885 he died in exile. King Peter is thus the third of his house who have ruled in Serbia. He succeeded to the throne on the murder of King Alexander of the Obrenovitch dynasty; was elected King by the Skupshchina June 2 (O.S.), and assumed royal rights and duties June 12 (O.S.), 1903. The Crown Prince is now Prince-Regent.

The independence of Serbia from Turkey was established by article 34 of the Treaty of Berlin, signed July 13, 1878, and was solemnly proclaimed by Prince (afterwards King) Milan at his capital, August 22, 1878. The King's civil list amounts to 1,200,000 dinars.

On July 28, 1914, Austria-Hungary declared war on Serbia, but it was not until October 6, 1915, that Serbia was invaded by a combined Austro-German-Bulgarian offensive. On November 28, 1915, the main military operations came to an end, leading to an Austro-Bulgarian occupation of the country.

The Serbian Government has been established in Corfu.

### Constitution and Government.

The Constitution voted by the Great National Assembly, January 2, 1889 (December 22, 1888, old style), continued in force till May, 1894, when it was repealed, and the constitution of July, 1869, revived. On the 6/19 April, 1901, a new Constitution was granted by King Alexander, entailing the succession to the throne of Serbia upon his direct descendants of either sex. On June 15, 1903, after the murder of King Alexander, the Constitution of 1901 was abolished, and that of 1889 was revived. The executive power is vested in the King, assisted by a council of eight Ministers, who are, individually and collectively, responsible to the King and the National Assembly. The legislative authority is exercised by the King, in conjunction with the National Assembly, or 'Narodna Skupshchina.' The State Council consists of members appointed partly by the King, and partly by the Assembly. It decides complaints of injury to private rights resulting from Royal and Ministerial decrees, questions of administrative competence and obligations,

matters relative to departmental and communal surtaxes and loans, and the transfer of their real property, the expropriation of private property for public purposes, the final settlement of debts due to the State, and which cannot be collected, the outpayment of extraordinary sums sanctioned by the Budget, and exceptional admissions to the privilege of Serbian citizenship. This body is always sitting. The National Assembly is composed of 166 deputies elected by the people. Every male Serbian (with the exception of officers and soldiers under the colours) 21 years of age, paying 15 dinars in direct taxes, is entitled to vote; Serbians 30 years of age, paying 30 dinars in direct taxes, are eligible to the Assembly provided they reside permanently in Serbia. Government employees, except ministers, State councillors, judges, engineers, professors (of middle-schools and universities), and Communal Mayors are not eligible. The Assembly meets each year on October 14, and elections take place every fourth year on September 21. The deputies receive travelling expenses and a salary of 15 dinars (12s.) a day.

The parties in the Skupshtina (1912):—142 Radicals and Progressives; 22 Nationalists; 2 Socialists.

The Cabinet reconstituted on December 6, 1914, is composed as follows:—

*Prime Minister and Minister for Foreign Affairs.*—N. P. Pašitch.

*Minister of Finance.*—Dr. M. Ninchitch.

*Minister of the Interior.*—M. Liouba Jovanovitch.

*Minister of War.*—General Tertitch.

*Minister of Public Instruction.*—M. Davidovitch.

*Minister of Commerce, Agriculture and Industry.*—M. Voislav Murinkovitch.

*Minister of Public Works.*—M. Drashkovitch.

*Minister of Justice.*—M. Djuritchich.

Counties, districts, and municipalities have their own administrative assemblies. For administrative purposes, Serbia is divided into 17 provinces or counties—(*okrug*) 81, districts (*srez*), 1,483 communes, which include 3,223 villages and 84 towns or cities (1910).

### Area and Population.

Departments	Area sq. m.	Population, 1910		Total 1910.	Total 1911 (Estimated)	Pop. per sq. m.

Belgrade City .	5	51,112	38,764	89,876	92,288	15,563
<b>Total</b>	<b>18,650</b>	<b>1,503,511</b>	<b>1,408,190</b>	<b>2,911,701</b>	<b>2,957,207</b>	<b>156</b>

As a result of the Treaty of Bucarest (25th July, 1913), Serbia obtained 1,795 sq. miles of Salonica ; 3,473 sq. miles of Monaster (Bitolj), and 9,973 sq. miles of Kossovo ; making a total of 15,241 sq. miles of new territory, which is made up of the following departments :—

Department	Popula- tion	Department	Popula- tion	Department	Popula- tion
Novi Bazar . .	133,401	Skoplyé . .	153,293	Tetovo . . .	157,248
Pristina . .	239,386	Debar . . .	82,476	Prizren . . .	227,425
Plevlyé . .	62,601	Kavadar . .	97,763	Štip <sup>1</sup> . . .	—
Kumanovo . .	166,939	Bitolj . . .	315,759	Total . . .	1,636,291

<sup>1</sup> No figures available.

The area of Serbia is thus 33,891 sq. miles, and the population (2,911,701 in Old Serbia and 1,636,291 in New Serbia) is 4,547,992. With Štip the total will be slightly larger.

In 1910, 382,882 lived in towns, and 2,528,819 lived in the country ; 2,890,602 were Serbian subjects, and 21,086 were foreigners, of whom 5,518 were Hungarian, 6,060 Turkish, and 6,605 Austrian subjects ; 2,778,706 speak Serbian, 32,556 Serbian and Rumanian, 7,494 German, 2,151 Albanian, and 1,956 Hungarian, other languages in use being Greek, Bulgarian, Turkish, Bohemian, &c. Of the Jews, 2,636 spoke Serbian or other Slav languages, 462 German, 40 Hungarian and 1,544 Spanish, other languages 1,047 (5,729). Of the Gipsies, 27,846 could speak Serbian, 4,709 Rumanian, 181 Turkish, and 13,412 Gipsy. Of the whole population in 1900, 2,093,947 were dependent on agriculture ; 6,440 on other primary production, 166,599 on the industries, 109,998 on commerce, and 116,566 on public offices or liberal professions.

The principal towns (1911) are : Belgrade (Beograd) (the capital) with 90,890 inhabitants ; Nish, 24,949 ; Kragouyévatz, 18,452 ; Leskovatz, 14,266 ; Pozarévatz, 13,411 ; Vranýé, 11,439 ; Piro, 10,737. In the new territories, Monastir (Bitolj), 59,856 ; Uskub (Skoplyé), 47,384 ; Prizren, 21,244 ; Novi Bazar, 13,434.

#### MOVEMENT OF POPULATION.

Year	Marriages	Births	Deaths	Surplus
1910	29,932	112,235	64,450	47,785
1911	30,420	107,219	64,369	42,850
1912	13,289	114,257	63,358	50,899

#### Religion.

The State religion of Serbia is Greek-Orthodox. According to the census of 1910 there were of the total population in the old territory :—Greek-Orthodox, 2,881,220 ; Roman Catholics, 8,435 ; Protestants, 799 ; Jews, 5,997 ; Mohammedan Turks and Gipsies, 14,435 ; other religions, 915. In the new territories are a large number of Roman Catholics ; there are Roman Catholic bishops in Prizren and Skoplyé. In May, 1914, Serbia concluded a concordat with Rome. Under the concordat a Roman Catholic Archbishopric of Belgrade is to be established, with jurisdiction over Roman Catholics within the old frontiers of Serbia. At Uskub a bishop-suffragan

will be appointed with jurisdiction in the territories acquired by the war. There is thus direct communication between Serbia and the Roman See.

The Church is governed by the Synod of five Bishops, the Archbishop of Belgrade as Metropolitan of Serbia being president, but all the ecclesiastical officials are under the control of the Minister of Education and Public Worship. There is unrestricted liberty of conscience. In 1910 there were 771 churches and chapels, and 51 monasteries; the clergy numbered 1,043, and the monks, 77. The property of the churches was valued (1910) at 18,701,114 dinars, and of the monasteries at 8,435,083 dinars; the revenue of the churches was 728,216 dinars, and of the monasteries, 300,302 dinars; the expenditure of the churches, 611,032 dinars, and of the monasteries, 250,156 dinars.

### Instruction.

Elementary education in Serbia is compulsory, and, in all the primary schools under the Ministry of Education, it is free. Of the total population in 1900, 428,433 (16·99 per cent.) could read and write. In 1910 there were 1,328 elementary schools with 2,549 teachers and 145,670 pupils (115,369 boys and 30,201 girls). There were, of a higher grade, 20 secondary schools with 354 teachers and 8,858 pupils; 1 theological school with 23 teachers and 344 students; 4 normal schools with 62 teachers and 585 students; 4 special schools with 41 teachers and 399 pupils; 3 superior schools for girls with 70 teachers and 1,291 pupils. Belgrade University, founded in 1838, had 98 professors and 934 students. For 1912 the expenditure on the elementary schools was 4,228,002 dinars; on the secondary schools, 2,455,454; on the theological school, 267,049 dinars; on the University, 710,671 dinars.

The Government has a Military Academy. There are several private schools, elementary and other, and an orphanage supported by voluntary contributions.

For elementary schools the State pays the teachers' salaries, and the municipalities provide for all other expenditure. The cost of the other public schools is borne entirely by the State.

### Justice, Crime, and Pauperism.

The judges are appointed by the king and are irremovable. There are 27 courts of first instance in Serbia, a court of appeal, a court of cassation, and a tribunal of commerce.

There is no pauperism in Serbia in the sense in which it is understood in the West; the poorest have some sort of freehold property. There are a few poor people in Belgrade, but neither their poverty nor their number has necessitated an institution like a workhouse. There is a free town hospital.

### Finance.

State receipts and expenditure for 6 years as follows :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1909	4,205,222	4,153,254	1912	5,118,000	4,708,240
1910	4,668,246	4,474,461	1913	5,230,600	5,230,600
1911	4,805,458	4,803,262	1914	8,572,840	8,572,840

On January 1, 1914, the public debt of Serbia amounted to 14,352,600*l.*; debt charge in 1914, 1,838,998*l.*

### Defence.

In Serbia military service is compulsory and universal. Liability is from 18 to 50 years of age, but recruits join at 21, and complete their military service at 45. The National Army has three 'bans.' The first is the active army and its reserve, constituting the first line. The second 'ban' consists of reserve troops. The third is the territorial army. There is also the *levée en masse*, which contains all those who have passed through the National Army, and all other males between 18 and 55. Continuous service for the infantry is for 1½ year only; for artillery and cavalry 2 years. Service in the reserve is for 9½ or 8 years (to complete 10 years in the first 'Ban'). After this the Serbian soldier passes successively to the Second 'Ban,' in which he remains 6 years, and to the Third 'Ban' for 8 years.

The Kingdom of Serbia is divided into 5 divisional areas, each supplying a division of the active army of 2 infantry brigades of 2 regiments of 4 battalions, a field artillery regiment of 9 batteries of 4 guns, and a regiment of divisional cavalry. The latter resemble our yeomanry, and are not embodied in time of peace. There is also a cavalry division of four regular regiments recruited in the whole country. The units of the Second 'Ban' exist in peace as cadres only. In war it will provide 15 regiments, each of 3 battalions, 5 regiments of divisional cavalry, and some engineers. In war, the field army, consisting of 5 regular divisions, a cavalry division of 4 regiments and 2 horse batteries, one regiment of mountain artillery, one of howitzers, and of five reserve divisions reaches a total strength of about 175,000. The reservists of the First and Second 'Bans' not required to form first line and reserve troops, and therefore available to make good losses in the field, would amount to some 95,000 men.

The Third 'Ban' has at present no organisation, but it is hoped that, if necessary, 15 regiments, and a few squadrons, may be formed for home defence.

The Serbian infantry is armed with the Mauser rifle, model 99, calibre 7 mm. The field gun is a quick firer on the Schneider-Canet system.

### Production and Industry.

Serbia is an agricultural country, where almost every peasant cultivates his own freehold. The holdings vary in size from 10 to 30 acres mostly. Of the total area (11,930,740 acres), 4,607,520 acres were cultivated in 1904, and 3,818,620 acres were under woods and forests. The country produces wheat, barley, oats, maize, rye and beetroots. Plum marmalade and also fresh plums are exported in large quantities, spirits are distilled in large quantities from plums, and various fruits are grown. Silk culture employs a large number of persons (31,522 in 1910) and the export of cocoons was (in 1910) valued at 35,224*l*.

On December 31, 1910, there were in Serbia 152,617 horses; 957,918 head of cattle; 3,808,815 sheep; 863,544 pigs; and 627,427 goats.

The State forests have an area, 1910, of 1,375,000 acres; parish forests, 1,625,000; church and monastery, 42,500; private, 750,000. The forests consist largely of beech, oak, and fir, but are less profitable than, with proper management, they might be. Cask staves are exported to Austria and France in great quantities.

Serbia has considerable mineral resources, including coal and lignite, worked by Government, by Belgian companies, and by private enterprise. In 1911 the output of the various sorts was valued at 15,413,945 dinars. The production of copper ore amounted to 7,023 metric tons, value 8,165,731 dinars, and of coal to 235,058 metric tons, value 3,775,776 dinars. In addi-

tion to this 422 kilogrammes of gold were mined, estimated value 1,433,603 dinars; and 1,693 waggon loads of cement produced, value 759,841 dinars.

Of Serbian industries, flour milling is one of the most important; in 1911 there were 17 large flour mills in the country; brewing and distilling are extensively carried on; sugar works and a celluloid factory are in German hands; weaving, tanning, bootmaking, pottery, and iron-working are also carried on. Carpet weaving is one of the oldest industries in Serbia. The product is manufactured principally at Pirot, in south-eastern Serbia, and the carpets are named after that place. The chief characteristics of these carpets are that they are made of pure wool, dyed with natural colours by local dyers, who pride themselves that the process of dyeing and colour mixing is a secret transmitted by father to son and is known only to the inhabitants of Pirot. Meat packing is also becoming important.

### Commerce.

The following table shows the value (25 dinars=£1) of the imports and exports of Serbia for five years:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1907 . . .	2,823,300	3,259,650	1910 . . .	3,387,826	3,935,921
1908 . . .	3,025,420	3,019,960	1911 . . .	4,617,017	4,676,664
1909 . . .	2,941,000	3,719,000	1912 . . .	4,243,741	3,368,863

The following table shows the chief imports and exports in two years:—

Imports	1911	1912	Exports	1911	1912
	£	£		£	£
Cotton tissues . . .	380,004	331,086	Prunes . . .	636,658	70,560
Cotton yarn . . .	242,484	313,548	Maize . . .	557,940	205,822
Hides . . .	211,009	302,223	Wheat . . .	613,264	710,832
Woollen tissues . . .	72,779	57,204	Poultry . . .	142,868	150,047
Paper . . .	96,988	87,354	Barley . . .	115,112	87,448
Common salt . . .	177,508	82,708	Meat . . .	627,103	611,195
Silk . . .	61,025	70,029	Raw hides . . .	127,282	203,268
Machinery . . .	223,331	248,855	Animals . . .	205,782	87,203
Iron bars . . .	103,860	86,094	Cordage . . .	32,911	31,226
Wines . . .	31,320	31,770	Fruits, fresh . . .	79,362	7,592

The following table shows the value of the trade with different countries for two years:—

Countries	Imports from		Exports to	
	1911	1912	1911	1912
	£	£	£	£
Austria-Hungary . . .	1,831,492	306,371	1,873,847	1,443,029
Belgium . . .	80,314	36,544	237,089	287,123
France . . .	221,788	148,506	148,270	119,101
Germany . . .	1,209,998	1,244,672	1,116,811	731,151
Italy . . .	187,627	149,244	168,810	151,408
Bulgaria . . .	26,910	31,170	108,140	63,557
Roumania . . .	59,421	86,866	237,027	231,083
Turkey . . .	147,206	109,341	462,580	287,590
United Kingdom . . .	367,637	340,420	3,150	640

The treaty of June, 1893, provides for 'the most favoured nation' treatment in commerce and navigation between the United Kingdom and Serbia. A new treaty, signed February 17, 1907 (for 10 years), provides for tariff

reductions and for 'most favoured nation' treatment as regards commercial travellers, the acquisition and possession of property, and other matters.

Total trade between Serbia and the United Kingdom for 5 years (Board of Trade Returns) —

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Serbia into United Kingdom	1,715	8,340	25,103	5,785	5,170
Exports to Serbia from United Kingdom	316,498	37,606	93,289	799,039	1,075

### Communications.

Serbia has two principal railway lines, Belgrade-Nish-Vranjé, and Nish-Caribrod; also several secondary branches, making a total (December 31, 1913) of 974 miles. The Treaty of London (May 30, 1913) guaranteed to Serbia the right of access to the Adriatic by means of the railway which it might build through Albania. Serbia's outlet to the Aegean is by means of the railway to Salonika. In May, 1914, a convention was signed between Greece and Serbia by which the latter country obtained on a fifty years' lease a piece of ground on the railhead at the Port of Salonika to use for importing without control anything that she required. This railway, which runs through Greek territory for only 37 miles, is a single line.

Of highways there are 3,495 miles, many of them in a ruinous condition. Of rivers only those bordering on Serbia are navigable, viz. Danube, 198 miles; Save, 90 miles; and Drina, 106 miles. The navigation on the Danube and Save is in the hands of the Serbian Steamboat Company, and several foreign companies, Austrian, Hungarian, Rumanian, and Russian.

There were 2,729 miles of telegraph line and 6,421 miles of wire, with 211 State telegraph offices, at the end of 1912. In 1912, 2,004,038 messages were transmitted.

In 1912 there were 2,129 urban telephone systems with 502 miles of line and 4,912 miles of wire, and 52 inter-urban systems with 1,823 miles of line, and 6,944 miles of wire. Total number of conversations in 1912: urban, 5,803,389; inter-urban, 238,962.

There were 1,556 post-offices in 1912. In 1912 the letters transmitted were: internal, 66,468,768; international, 9,300,656. The post and telegraph receipts for 1912 amounted to 4,330,741 dinars (francs), and expenditure to 3,038,789 dinars.

### Money and Credit.

The principal bank is the National Bank of Serbia in Belgrade, with the nominal capital of 20,000,000 dinars, of which 10,000,000 has been paid up. Its note circulation, December 31, 1913, amounted to 103,199,317 dinars. The Export Bank, with agencies abroad, assists in the exportation of Serbian produce. The Uprawa Fondowa or Mortgage Bank, the only large State institution of the kind in Serbia, makes advances to a large amount for agricultural operations.

### Money, Weights, and Measures.

Serbia accepted, by the law of June 20, 1875, the French decimal system for its moneys, weights, and measures. The Serbian dinar is equal to one franc. In circulation are gold coins of 10 and 20 dinars (milan d'or); silver coins of 5, 2, 1, and 0·5 dinar; bronze of 2, and nickel of 20, 10, and 5 paras.

The decimal weights and measures (kilogram, metre, &c.) have been in practical use since the commencement of 1883.

## Diplomatic and Consular Representatives.

### 1. OF SERBIA IN GREAT BRITAIN.

*Minister Plenipotentiary*.—Jovan Jovanovitch, G. C. V. O., appointed July, 1916.

*Secretaries*.—Milan Gavrilovitch and Voislav Antonievitch.

*Military Attaché*.—Colonel M. Nicolaivitch, C.B.

There are Consular representatives in Manchester, Bristol, Bradford, and Glasgow.

### 2. OF GREAT BRITAIN IN SERBIA.

*Envoy Extraordinary and Minister Plenipotentiary*.—Sir Charles Louis des Graz, K. C. M. G., appointed October 1, 1913. *Secretary*.—E. A. Keeling.

## Statistical and other Books of Reference concerning Serbia.

## SIAM.

(SAYAM, OR MUANG-THAI.)

### Reigning King.

**Chowfa Maha Vajiravudh**, born January 1, 1881, eldest son of the late King Chulalongkorn I., succeeded to the throne on the death of his father, October 23, 1910, and was crowned on December 2, 1911. The royal dignity is nominally hereditary, but does not descend always from the father to the eldest son, each sovereign being invested with the privilege of nominating his own successor. On November 24, 1910, it was officially announced that until the new King has male issue, the succession will pass presumptively through the line of the Queen Mother's sons. Therefore, Prince Chowfa Chakrapongse Poowanarth, born March 3, 1881, is the Heir Presumptive.

### Government.

The executive power is exercised by the King advised by a Cabinet consisting of the heads of the various departments of the Government: Foreign Affairs, Interior, Justice, Finance, Public Instruction, Public Works, War, Marine, Local Government, &c. Many of the portfolios are held by the King's half-brothers and uncles. The law of May 8, 1874, constituting a Council of State, has now been superseded by the Royal Decree of January 10, 1895, creating a Legislative Council. The latter is composed of the Ministers of State (Senabodi) and others, not less than 12 in number, appointed by the Crown. The total membership is now 40. In the preamble of the Royal Decree it is stated that the object of this body is to revise, amend, and complete the legislation of the kingdom. It is to meet at least once a week, and it may appoint committees of 3 or 4 members, with the addition of competent outsiders who must not outnumber the members. An important article gives the Legislative Council power to promulgate laws without the Royal assent in the event of any temporary disability of the Crown. At other times the Royal signature is indispensable. This Council has shown considerable legislative activity.

The Siamese dominions are divided into 17 provinces (Monthons), of which 16 have each a Lord Lieutenant, deriving authority direct from the King, and having under him subordinate governors over the various parts of his district. Several of the tributary districts are administered by their own chiefs; but of late years centralisation has greatly increased. Commissioners, chosen by the King, are now regularly sent from Bangkok to all of these tributary provinces, both to those in the north, as Chiangmai, and those in the south, as Singora, and others, with very full powers. The Monthon of Bangkok is under the control of the Minister of Local Government. The 17 provinces are subdivided into 78 muangs, 409 ampurs, and 5,042 tambons.

### Area and Population.

Siam is called by its inhabitants Thai, or Muang-Thai, which means 'free,' or 'the kingdom of the free.' The word Siam is probably identical with Shan, applied in Burma to the Lao race, as well as to the Shan proper and the Siamese.

The limits of the Kingdom of Siam have varied much at different periods of its history, most of the border lands being occupied by tribes more or less independent. The boundary between Burma and N.W. Siam was delimited in 1891. By the Anglo-French Convention of April, 1904, the agreement of 1896 was confirmed, and its provisions more clearly defined, the terri-

tories to the west of the Menam and the Gulf of Siam being recognised as in the British sphere, and those to the east in the French. In 1904, the Luang Prabang territory to the west of the Mekong was acknowledged by Siam to belong to France, and the provinces of Maluprey and Barsak (west of the Mekong) were also transferred to French rule, so that an area of about 7,800 square miles passed from Siamese possession. On March 23, 1907, a new boundary in this region was accepted by Siam whereby the provinces of Battambang, Siem Reap, and Sisophon are ceded to France, while the strip of coast to the south with the port of Krat returns to Siam. At the same time a rectification of the boundary was made in the Luang Prabang region, whereby a tract of the Laos country was restored to Siam. It was agreed also that four ports on the Mekong are to be held by France on perpetual lease. By these arrangements the territory of Cambodia is increased by about 7,000 square miles. The treaty also provides for the future jurisdiction of the Siamese courts over all French Asiatic subjects and protégés in Siam, under certain conditions.

A treaty for a modification of British extra-territorial rights in Siam and for the cession of the Siamese tributary States of Kelantan, Trengganu and Keda to Great Britain was signed at Bangkok on March 10, 1909. The three states have an area of about 15,000 square miles, and a population estimated at over 600,000, of whom about 300,000 are in Kelantan.

The area of Siam is now about 195,000 square miles, about 45,000 being in the Malay Peninsula. The first detailed census in Siam was taken in 1905, but included only 12 of the provinces or Monthons. The first census of the whole country was taken in 1909. For 1911-12 the population of the country was given as follows:—

Monthon.	Population (1911-12).	Monthon	Population (1911-12).
1. Krung Tep (Bangkok)	931,171	10. Prachinburi	325,271
2. Krung Kao	518,165	11. Pittanulok	219,856
3. Chantaburi	136,463	12. Bayab	1,223,761
4. Chumphon	166,402	13. Petchabun	77,077
5. Nakorn Chaisi	287,631	14. Puket	230,037
6. Nakorn Rachasima	502,218	15. Rajaburi	426,825
7. Nakorn Sawan	257,668	16. Isarn	1,455,497
8. Nakorn Sritamarat	478,266	17. Udorn	666,405
9. Pattani	276,695		
		Total	8,266,408

Of the total, 4,122,168 are males, and 4,144,240 females. The estimated population for 1916 was 8,636,000.

In 1913-14 the immigrants numbered 70,162 (64,422 males and 5,740 females), and the emigrants 62,088 (55,803 men and 6,285 women).

The town of Bangkok includes 628,675 inhabitants. The population of the island of Puket is put at 179,600.

In recent years the results of Western civilisation have to a considerable extent been introduced. Much excellent work has been done by a General Adviser of American nationality, and with the assistance of a British Judicial Adviser, a French Legislative Adviser and Legal Advisers of various nationalities important progress has been made in the administration of justice in the native courts and in the International Court in which British and French advisers assist in the trial of cases brought by Siamese against subjects of Treaty Powers and *vice versa*. The Penal Code has been completed, and came into force on September 21, 1908; work on other codes is being proceeded with. The Consular Courts exercise jurisdiction over their nationals, subject, in the case of Great Britain, France, and Denmark, to the Treaty

modifications. A great improvement has taken place in the metropolitan police force under the superintendence of several English police officers lent by the Government of India. The police administration of the Provinces is entrusted to the Provincial Gendarmerie, a force which includes a body of Danish instructors.

### Religion and Instruction.

The prevailing religion is Buddhism, and in the country districts education is chiefly in the hands of the priests, of whose services the Government intend to make more effective use. All public schools are now, however, under the control of a Department of Education; and in Bangkok a number of normal and technical schools have been established, all with English headmasters or assistants. In 1911-12 there were 6,972 Buddhist temples, with a total of 173,560 priests.

The Siamese language is now firmly established as the official language over the whole country. The Minister of Public Instruction and Ecclesiastical Affairs has also under his charge several Government hospitals, which have been established by the King, besides a public museum, and all the royal monasteries in the capital. There is also a Pasteur Institute.

Schools are either Government schools, local schools or private schools. In each province there is a Commissioner of Education. The number of public schools in Siam for the fiscal year 1915 was 394, as compared with 313 for 1914; the staff of teachers increased from 998 in 1914 to 1,037 in 1915, and the enrolment from 21,599 to 25,486. These figures refer to Government schools only, while the totals for all educational institutions were 4,137 schools, 122,799 pupils, and 5,505 teachers for 1914. In 1916 the number of schools were as follows:—Government schools—primary 269, secondary 105, special 20; local schools—primary 3,665, secondary 18; private schools—primary 129, secondary 12. Besides the activities of the Siamese Government, the benevolent institutions of the American, English, and French missionaries also provide educational facilities for a large number of children. Further, in the Buddhist temples of Siam 36,230 monks assisted in teaching 160,171 resident novices and children and 49,680 non-resident pupils during 1914.

A University at Bangkok (with 8 faculties:—medicine, law, engineering, agriculture, commerce, pedagogy, and political science) is in process of organisation.

### Finance.

Revenue and Expenditure for three years:—

	1914-15	1915-16 <sup>1</sup>	1916-17 <sup>1</sup>
	£	£	£
Revenue ... ..	5,684,897	5,381,615	5,549,348
Expenditure against Revenue ...	5,041,200	5,405,523	5,549,348
Extraordinary Expenditure against Capital Account <sup>2</sup> ... ..	931,138	1,114,724	1,418,062

<sup>1</sup> Estimates.

<sup>2</sup> Including Expenditure from Loans.

The principal sources of revenue in 1914-15 were: customs duties, 546,093*l.*; excise, 484,760*l.*; land revenue and capitation taxes, 1,235,085*l.*; railways, 447,777*l.*; posts, telegraphs and telephones, 98,124*l.*; state lands and forests, 258,077*l.*; lottery and gambling, 515,696*l.*; opium, 1,245,392*l.*; other sources, 853,893*l.*

On March 31, 1917, the total national debt amounted to 6,830,200L., made up as follows:—3,130,000L. owing to the Government of the Federated Malay States (loan of 4,750,000L. borrowed in 1909), 3,700,200L. out of the 1905 debt (1,000,000L.); and the 1907 debt (3,000,000L.). All these loans were made for, and spent on, works of public utility.

A British officer occupies the position of Financial Adviser, and there are numerous other British officers holding high positions under the Government, more especially in the Finance and Audit, Revenue, Forests, Survey, Police, Justice, Customs, Mining, Mint, and Education departments. There are also several Europeans of other nationalities in various Departments. The financial position of the kingdom is extremely favourable, the revenue is steadily increasing, and the expenditure is less than the revenue, and well under control. Some revenue is derived from gambling, for the abolition of which measures are being taken throughout the country. There remain now to be abolished only the gambling houses in the Capital. The suppression of these awaits the consent of the Treaty Powers to a revision of the existing Customs Tariff, whereby it is hoped to make up the loss in revenue occasioned by the extinction of the lottery farm. Without waiting for this consent, however, the Government abolished the lottery farms in 1916.

### Defence.

Universal liability to military service on the European model is now in force in all the provinces including Bangkok; the terms are, from 18 to 20 in the active army, from 20 to 25 in the reserve, and from 25 to 35 in the second reserve. The legal exemptions are, however, rather numerous, and personal service is not enforced in the case of the uncivilised tribes. The army is organised in ten divisions, each consisting in peace time of 2 regiments of infantry of one battalion, 1 cavalry regiment of 2 squadrons, 2 four-gun batteries and a battalion of engineers. In war the division expands to consist of 2 regiments each of 3 battalions, 1 cavalry regiment of 3 squadrons, 3 batteries and the engineer battalion. The infantry are armed with a special pattern of Mauser, the artillery with 7.5 cm. Krupp guns. Considerable reliance is placed upon the force of marine infantry mentioned below. The peace strength is about 12,000 men.

The navy consists nominally of 21 vessels, all of small size and no fighting value. The largest is the royal yacht *Maha Chakreri*, of 3,000 tons, which is now too old for service, and is to be replaced by a new yacht now being built in Japan. The rest are very small gun-boats. There are 5,000 men available for service afloat, besides a reserve of 20,000. A destroyer and four torpedo boats, obtained from Japan, were added to the Siamese navy in August, 1908, and a second destroyer, also built in Japan, was added in June, 1912.

The marine infantry, recruited from the inhabitants of the maritime provinces, between 18 and 40 years of age, numbers 15,000 in six shifts, besides a 1st and 2nd reserve of 3,000 and 2,000 respectively.

At the mouth of the Ménam River are the Paknam forts. The bar prevents ships of more than 13 feet draught from ascending to Bangkok. The naval arsenal dock has recently been reconstructed.

The military and naval budget for 1915-16 amounted to 1,378,460L.

### Production and Industry.

Forced labour is still exacted from the rural population, but recent enactments have made calls for it far less frequent, and a poll-tax, varying in amount in the different districts, is levied on all adult males with the exception of Government officials. The cost of labour is probably higher than in

any other Oriental country. Chinese coolies do the chief part of both skilled and unskilled labour in the south, especially in the mills and in mining; while in the north forest work is confined almost entirely to Laos, Burmese, Karens, and Khans.

To the north of Bangkok, large tracts of land, formerly lying waste, have been opened up by an Irrigation Company, which has connected by a canal the Menam and Bangpakong rivers, and has constructed numbers of smaller canals. The chief produce of the country is rice (5,180,600 acres in 1915-16; 5,096,000 acres in 1914-15), which forms the national food and the staple article of export. For the Siamese Year (Buddhist Era) 2458 (April 1, 1915, to March 31, 1916), the rice export amounted to 1,118,213 tons, valued at 6,746,330*l*. In Siam there are 48 large rice mills, of which 1 is British, 1 German, 4 Siamese and 42 Chinese (11 of these Chinese firms being nominally British, *i.e.* from Hong Kong or the Straits Settlements). Other produce is pepper, salt, dried fish, cattle, and sesame; while, for local consumption only, hemp, tobacco, cotton (953 tons of cotton, valued at 12,416*l*), were exported during the year 2458), and coffee are grown. Fruits are abundant, including the durian, mangosteen, and mango.

According to Siamese official statistics the number of all domestic animals in the Kingdom on January 1, 1916, was 4,567,527, as compared with 4,494,102 on the corresponding date in 1915. The live stock in January, 1916, consisted of 5,333 elephants, 105,078 horses and ponies, 2,336,936 cows, oxen, and calves, and 2,120,180 buffaloes.

Much of Upper Siam is dense forest, and the cutting of teak is an important industry, almost entirely in British hands. Siam teak wood is mainly produced in the north of Siam, the dry logs being floated by river to Bangkok during the rainy months of the year. The floating season from April to December, 1913, was satisfactory, 99,046 logs having passed the duty station at Paknampho on their way to Bangkok, against 80,081 for the season of the preceding fiscal year. In 1915-16 the exports amounted to 47,872 tons, valued at 377,836*l*. The forests are under the control of an English conservator, aided by several English officers. The export of rubber is now negligible, but planting of rubber trees is proceeding in the Malay Peninsula.

Gold is found in many of the provinces, and concessions have been granted to mining companies. The small mineral resources of Siam are extensive and varied, including tin, wolfram, coal and iron, zinc, manganese, antimony, probably quicksilver. Tin mining on a considerable scale is pursued on the island of Tongkah (or Junk Ceylon) and also in the northern portion of the province of Puket at Renong on the mainland, and the ore is found in other parts of the Siamese portion of the Malay Peninsula, where also wolfram is now being extracted in considerable quantity.

### Commerce.

Imports and exports for five years :—

	1911-12	1912-13	1913-14	1914-15	1915-16
	£	£	£	£	£
Imports . . . . .	5,542,563	5,754,634	6,962,334	6,008,978	5,803,850
Exports . . . . .	6,413,641	6,166,863	8,858,921	7,782,797	8,151,940

Nearly the whole of the trade is in the hands of foreigners, and in recent years many Chinese have settled in the country. The foreign trade of Siam centres in Bangkok, the capital.

For two years the distribution of Siamese trade by principal countries was as follows:—

Imports from	1914-15	1915-16	Exports to	1914-15	1915-16
	£	£		£	£
United Kingdom . . . . .	1,057,668	994,380	Singapore . . . . .	3,519,667	4,086,705
Singapore . . . . .	1,127,216	1,265,263	Hong Kong . . . . .	2,108,344	2,395,769
Hong Kong . . . . .	1,157,093	1,139,800	United Kingdom . . . . .	1,038,111	819,622
India . . . . .	716,836	701,638	Germany . . . . .	202,495	2
China . . . . .	662,417	688,069	India . . . . .	202,193	280,070
Germany . . . . .	241,117	12,220	Netherlands . . . . .	171,607	150,136
United States . . . . .	215,614	236,150	Dutch East Indies . . . . .	131,127	60,603
Netherlands Indies . . . . .	202,897	232,496	Ceylon . . . . .	66,933	58,616
Japan . . . . .	142,157	153,815	Denmark . . . . .	55,370	278
Belgium . . . . .	86,098	910	Belgium . . . . .	54,135	12,477
France . . . . .	58,645	47,503	Japan . . . . .	46,123	1,161
Holland . . . . .	81,800	71,291	France . . . . .	36,404	24,416
Indo-China . . . . .	67,506	55,057	United States . . . . .	27,450	21,573
Italy . . . . .	54,480	49,416	Egypt . . . . .	21,209	21,906
Denmark . . . . .	42,380	55,585	South Africa . . . . .	19,489	7,422
Switzerland . . . . .	27,649	27,020	Italy . . . . .	18,357	66,573
Austria-Hungary . . . . .	14,410	11,454	China . . . . .	16,404	49,318
Australia . . . . .	12,642	20,110	Burma . . . . .	4,739	14,389
Burma . . . . .	16,483	41,504	Cuba . . . . .	—	34,305

The principal imports in 1915-16 were : cotton goods, 982,496*l.*; food, stuffs, 954,155*l.*; oils, 330,389*l.*; raw metal, manufactures and machinery, 451,898*l.* The principal exports were rice, 6,746,330*l.*; and teak, 377,836*l.*

Into Northern Siam from Burma in 1914-15 the imports (chiefly treasure, cottons, silk, apparel, hardware, and jewellery) amounted to 389,380*l.* in value, and the exports from Northern Siam to Burma (chiefly treasure, teak, cattle, elephants, and silks) to 286,435*l.* There is a considerable trade on the northern frontiers with the British Shan states and Yunnan, carried on by hawkers.

Total trade between Siam and United Kingdom for 5 years (Board of Trade Returns):—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Siam into U. Kingdom . . . . .	322,737	516,187	814,319	1,618,490	1,126,162
Exports to Siam from U. Kingdom . . . . .	1,046,080	1,352,424	1,012,868	876,925	1,298,909

### Shipping and Communications.

In 1914-15, 898 vessels of 805,638 tons (142 of 200,038 tons British) entered and 896 vessels of 802,255 tons (142 of 197,688 tons British) cleared from the port of Bangkok. In 1915-16, the number of vessels entering was 862 of 729,210 tons, of which 347 of 291,130 tons were Norwegian, and 266 of 243,444 tons were British vessels. In 1909 a Siamese Company instituted a regular service between Bangkok, Hong Kong, and the Southern China Ports, in competition with the North German Lloyd Orient Line.

There were, at the end of March, 1916, 1,210 miles of State and private railways made up as follows:—(1) Northern Line, 520 miles; (2) Southern Line, 425 miles; (3) private lines, 65 miles. The Northern Line is a normal-gauge railway system comprising the line from Bangkok to Korat (with a branch running North which has now reached Nakawn Lampang) and a line from Bangkok to Patiew. The Southern Line is likewise a State railway,

but of metre gauge, and runs from Bangkok down the Malay Peninsula, and will, when completed, connect Bangkok with Singapore and Penang, to Tungssawng, whence branch lines go to Singora, Nakawa Saitammarat and Trang (on the West Coast of the Peninsula), respectively. Private lines include those (worked by companies) from Bangkok to Paknam at the mouth of the Menam, and from Bangkok to Tachin and Meklong on the coast to the west of the Menam, together with a tramway connecting the Northern Line (northern branch) with Phrabat.

In 1914-15, there were 285 post offices, of which 31 were admitted for inland and 4 for the foreign money order service. The inland mail matter received at the different offices for delivery were (1914-15) 1,130,506 letters, 161,863 post cards, 1,301,118 pieces of printed matter. For foreign countries the returns were: letters, 249,444, post cards, 21,112, printed matter, 105,586 pieces. The number of articles received from foreign countries was 691,535, and 10,179 parcels.

There were (1915-16) 78 telegraph offices. Number of inland telegrams 230,631, of foreign telegrams, 103,794. Length of line, 4,351 miles; length of wire, 6,147 miles.

There were (1914-15) two telephone exchanges, and 794 instruments were installed at the premises of subscribers.

Two wireless stations on the Telefunken system have been erected, one at Bangkok and one at Senggora. They are both under the control of the Siamese naval authorities.

### Money, Weights, and Measures.

In Bangkok there are branches of the Hong Kong and Shanghai Bank, the Chartered Bank of India, and the Banque de l'Indo-Chine; all of these issue notes; bank-note issue is in nowise regulated by the Siamese Government. There is also a branch of the Chartered Bank of India, Australia and China at Puket. A native bank, with a German manager for its Foreign Department, has recently been established under Royal Charter and with the name of the Commercial Bank of Siam, Limited. The Government in 1902 began to issue currency notes (5, 10, 20, 100 and 1,000 ticals) which have driven the bank notes out of circulation. At the end of 1903 there was 267,623*l.* worth of currency notes in circulation; on March 31, 1914, it was 2,208,277*l.*; on March 31, 1915, 2,418,100*l.*; and on March 31, 1916, 3,083,136*l.*

In 1914 the Siamese Treasury Savings Bank was opened with 634 depositors, By March 31, 1915, the number was 1,380, with a total deposit of 28,892*l.*

The unit of the monetary system is the silver tical (officially called baht), weighing 15 grams '900 fine. Its value (formerly varying with the price of silver) has, by the Gold Standard Act of 1903, been fixed at 1*s.* 6½*d.* or 13 ticals = 1*l.*, the gold value of the tical being equal to that of 55·8 centigrams of pure gold. There will be a 10 tical gold piece or *Dos* weighing 6·2 grams '900 fine and thus containing 5·58 grams of pure gold. In addition to the tical, the following coins are now actually in use:—(silver) the *salung* = ½-tical; the 2-*salung* piece = ¼ tical; (nickel) the 10-*Satang* piece, = 1/100 of a tical; the 5-*Satang* piece, = 1/200 of a tical; and (bronze) the *Satang*, = 1/100 of a tical. The *Salung* is of silver '800 fine.

The measures of weight are:—1 *Tical* = 15 grams or approximately 53 oz.; 4 *Ticals* = 1 *Tamlung*, (60 grams or 2·1 oz.); 20 *Tamlungs* = 1 *Chang* (1·2 kilograms or 2 lbs. 10·3 oz.); and 50 *Chang* = 1 *Hap* (60 kilograms or slightly over 132½ lbs.)

The measures of length are:—1 *Niu* = '83 inches; 12 *Niu* = 1 *Kcup* (10

inches); 2 *Keup* = 1 *Sok* (20 inches); 4 *Sok* = 1 *Wa* (80 inches): 20 *Wa* = 1 *Sen* (133 feet); 400 *Sen* = 1 *Yot* (10 miles, roughly).

## Diplomatic and Consular Representatives.

### 1. OF SIAM IN GREAT BRITAIN.

*Envoy and Minister*.—Phya Sudham Maitri (appointed July 19, 1912).

*Counsellor of Legation*.—W. J. Archer, C.M.G.

*First Secretary*.—Phra Sanpakitch Preecha.

*Secretary-Interpreter*.—Lewis C. Bateman.

*Attachés*.—Nai Tiem and Nai Sirm Bunnag.

*Military Attaché*.—Major Prince Amoradhat.

### 2. OF GREAT BRITAIN IN SIAM.

*Envoy Extraordinary and Minister Plenipotentiary*.—Herbert Dering, M.V.O. (appointed March 20, 1915).

*First Secretary of Legation and Consul-General at Bangkok*.—T. H. Lyle, C.M.G.

There are consular representatives at Chiangmai, Senggora, and Nakawn-Lampang and Puket.

## SPAIN.

(ESPAÑA.)

## Reigning Sovereign.

**Alphonso XIII.**, son of the late King Alphonso XII. and Maria Christina, daughter of the late Karl Ferdinand, Archduke of Austria; born after his father's death, May 17, 1886, succeeding by his birth, being a male, his eldest sister; married, May 31, 1906, to Princess Victoria Eugénie, daughter of the late Prince Henry of Battenberg and Princess Beatrice (daughter of the late Queen Victoria) of Great Britain and Ireland.

*Children of the King.*—(1) Prince *Alfonso*, born May 10, 1907; (2) Prince *Jaime*, born June 23, 1908; (3) Princess *Beatriz*, born June 22, 1909; (4) Princess *Maria Cristina*, born December 12, 1911; (5) Prince *Juan*, born June 20, 1913; (6) Prince *Gonzalo*, born October 24, 1914.

*Sisters of the King.*—I. *Maria-de-las-Mercedes*, Queen till the birth of her brother, born September 11, 1880; married February 14, 1901, to Prince Carlos of Bourbon, son of the Count of Caserta; died October 17, 1904; offspring, Alfonso, born November 30, 1901; Isabel, born October 16, 1904, II. *Maria Teresa*, born November 12, 1882; married January 12, 1906, to Prince Ferdinand of Bavaria; died September 23, 1912; offspring, Luis Alfonso, born December 12, 1906; José Eugenio, born March 26, 1909; *Maria de las Mercedes*, born October 3, 1911; *Pilar*, born September 15, 1912.

*Aunts of the King.*—I. Infanta *Isabel*, born December 20, 1851; married, May 13, 1868, to Gaetan, Count de Girgenti; widow, November 26, 1871. II. Infanta *Maria-de-la-Paz*, born June 23, 1862; married, April 2, 1883, to Prince Ludwig, eldest son of the late Prince Adalbert of Bavaria; offspring, Fernando Maria, born May 10, 1884; married January 12, 1906, the Infanta Maria Teresa (*see above*), married again, October 1, 1914, Luisa de Silva y Fernández de Henestrosa (Duchess of Talavera de la Reina); Adalberto Alfonso, born June 3, 1886; Maria del Pilar, born March 13, 1891. III. Infanta *Eulalia*, born February 12, 1864; married to Prince Antoine, son of Prince Antoine d'Orléans, Duc de Montpensier, March 6, 1886; the marriage was dissolved July, 1900; offspring, Alfonso Maria, born November 12, 1886; married July 15, 1909, Princess Beatrice of Saxe-Coburg Gotha; Luis Fernando Maria, born November 5, 1888. (All sisters of the late King.)

The King, Alfonso XIII., has a civil list, fixed by the Cortes, 1886, of 7,000,000 pesetas, or 280,000*l.*, exclusive of allowances to members of the royal family. The annual grant to the Queen is fixed at 450,000 pesetas (18,000*l.*), and, should the King predecease her, 250,000 pesetas (10,000*l.*) during widowhood. The annual grant to the mother of the King was fixed at 250,000 pesetas. To the Prince of Asturias, heir to the throne, 500,000 pesetas have been assigned, and to the Infante Don Jaime and Infanta Doña Beatriz, 150,000 pesetas each. The Infantas, the King's aunts, receive 550,000 pesetas.

The following is a list of the sovereigns and rulers of Spain, with dates of their accession, since the foundation of the Spanish Monarchy by the union of the crowns of Aragon and Castile:—

<i>House of Aragon.</i>		<i>House of Bonaparte.</i>	
Fernando V., 'The Catholic'	1479	Joseph Bonaparte . . .	1808
<i>House of Habsburg.</i>		<i>House of Bourbon.</i>	
Cárlos I. . . . .	1516	Fernando VII., restored . .	1814
Felipe II. . . . .	1556	Isabel II. . . . .	1833
Felipe III. . . . .	1598	Provisional Government . .	1868
Felipe IV. . . . .	1621	Marshal Serrano, Regent . .	1869
Cárlos II. . . . .	1665	<i>House of Savoy.</i>

Cárlos IV. . . . .	1788	Maria ( <i>pro tem.</i> ) . . . .	1886
Fernando VII. . . . .	1808	Alfonso XIII. . . . .	1886

## Government and Constitution.

### I. CENTRAL GOVERNMENT.

The present Constitution of Spain, drawn up by the Government and laid before a Cortes Constituyentes, elected for its ratification, March 27, 1876, was proclaimed June 30, 1876. It enacts that Spain shall be a constitutional monarchy, the executive resting in the King, and the power to make laws 'in the Cortes with the King.' The Cortes are composed of a Senate and Congress, equal in authority. There are three classes of senators—first, senators by their own right, or *Senadores por derecho propio*; secondly, life senators nominated by the Crown—these two categories not to exceed 180; and thirdly, 180 senators, elected by the Corporations of State—that is, the communal and provincial States, the church, the universities, academies, &c.—and by the largest payers of contributions. Senators in their own right are the sons, if any, of the King and of the immediate heir to the throne, who have attained their majority; Grandees who are so in their own right and who can prove an annual *renta* of 60,000 pesetas, or 2,400*l.*; captain-generals of the army; admirals of the navy; the *Patriarca de las Indias*, (the 'Patriarch of West Indies'), *i.e.*, the Primate of Spain (the Cardinal-Archbishop of Toledo) and the archbishops; the presidents of the Council of State, of the Supreme Tribunal, of the Tribunal of Cuentas del Reino, and of the Supreme Council of War and of the Navy after two years of office. The elective senators must be renewed by one-half every five years, and by totality every time the Monarch dissolves that part of the Cortes. The Congress is formed by deputies 'named in the electoral Juntas in the form the law determines,' in the proportion of one to every 50,000 souls of the population. According to a law of August 8, 1907, voting is compulsory for all males over the age of 25; with a few unimportant exceptions. This law further enacts that all such voters must be registered on the voting list, possess full civil rights, and must have been residents of a Municipal district for at least 2 years. Members of Congress must be 25 years of age; they are re-eligible indefinitely, the elections being for five years. Deputies to the number of 98 are elected by *scrutin de liste* in 28 large districts in which minorities may be duly represented. There are in all 412 deputies. The deputies cannot take State office, pensions, and salaries; but the ministers and State officials of a salary higher than 12,500 pesetas are exempted from this law. Neither senators nor deputies are paid for their services. Both Congress and Senate meet every

year. The Monarch has the power of convoking them, suspending them, or dissolving them; but in the latter case a new Cortes must sit within three months. The Monarch appoints the president and vice-presidents of the Senate from members of the Senate only; the Congress elects its own officials. The Monarch and each of the legislative chambers can take the initiative in the laws. The Congress has the right of impeaching the ministers before the Senate.

State of the parties in the Senate (elected April, 1916):—Liberals, 177; Conservatives, 133; Regionalists, 7; Democrats, 5; Carlists, 4; Reformists, 2; Republicans, 1; Independents, 14.

State of parties in the Congress (elected April, 1916):—Liberals, 221; Conservatives, 112; Republicans, 19; Reformists, 14; Regionalists, 14; Carlists, 9; Independents, 8.

The Constitution of June 30, 1876, further enacts that the Monarch is inviolable, but his ministers are responsible, and that all his decrees must be countersigned by one of them. The Cortes must approve his marriage before he can contract it, and the King cannot marry any one excluded by law from the succession to the crown. Should the lines of the legitimate descendants of the late Alphonso XII. become extinct, the succession shall be in this order—first, to his sisters; next to his aunt and her legitimate descendants; and next to those of his uncles, the brothers of Fernando VII., 'unless they have been excluded.' If all the lines become extinct, 'the nation will elect its Monarch.'

The executive is vested, under the Monarch, in a Council of Ministers, constituted (April 19, 1917) as follows:—

*President of the Council.*—García Prieto (Marquis de Alhucinas).

*Minister of Foreign Affairs.*—Juan Alcarado.

*Minister of Justice and Worship.*—Ruis Valarino.

*Minister of War.*—General Aguilera.

*Minister of Marine.*—Admiral Augusto Miranda.

*Minister of Finance.*—Santiago Alba.

*Minister of the Interior.*—Julio Burell.

*Minister of Public Instruction.*—Jose Franco Rodriguez.

*Minister of Public Works.*—Duke of Almodora del Valle.

## II. LOCAL GOVERNMENT.

The various provinces and communes of Spain are governed by the provincial and municipal laws. Every commune has its own elected *Ayuntamiento*, consisting of from five to fifty *Regidores*, or *Concejales*, and presided over by the *Alcalde*, at whose side stand, in the larger towns, several *Tenientes Alcaldes*. The entire municipal government, with power of taxation, is vested in the *Ayuntamientos*. Half the members are elected every two years, and they appoint the *Alcalde* (in towns having more than 6,000 souls the Government has power to appoint the *Alcalde*), the executive functionary, from their own body. In Madrid and Barcelona he is appointed by the King. Members cannot be re-elected until after two years. Each province of Spain has its own Assembly, the *Diputación Provincial*, the members of which are elected by the constituencies. The *Diputaciones Provinciales* meet in annual session, and are permanently represented by the *Comision Provincial*, a committee appointed every year. The Constitution of 1876 secures to the *Diputaciones Provinciales* and the *Ayuntamientos* the government and administration of the respective provinces and communes. Neither the national executive nor the Cortes have the right to interfere in the established municipal and provincial admini-

stration except in the case of the action of the *Diputaciones Provinciales* and *Ayuntamientos* going beyond the locally limited sphere to the injury of general and permanent interests. In the Basque provinces self-government has been almost abolished since the last civil war, and they are ruled as the rest of Spain. Notwithstanding the provisions of the Constitution pressure is too frequently brought to bear upon the local elections by the Central Government.

### Area and Population.

Continental Spain has an area of 190,050 square miles, but including the Balearic and Canary Islands and the Spanish possessions on the north and west coast of Africa, the total area is 194,783 square miles. The growth of the population has been as follows :—

Census year	Population	Increase	Rate of annual increase
1857	15,464,340	—	—
1860	15,655,467	191,127	0·44
1877	16,631,869	976,402	0·37
1887	17,560,352	928,483	0·56
1897	18,121,472	561,120	0·32
1900	18,607,674	486,202	0·89
1910	19,950,817	1,343,143	0·72

### Area and population of the forty-nine provinces :—

Province	Area in square miles	Estimated Population, Dec. 31, 1914	Pop. per sq. mile	Province	Area in square miles	Estimated Population, Dec. 31, 1914	Pop. per sq. mile

Huesca . . .	5,848	249,095	41·8	Zaragoza . . .	6,726	465,778	66·6
Jaén . . .	5,203	550,351	98·8				
Leon . . .	5,936	397,624	66·6				
Lérida . . .	4,690	289,531	60·4	Total . . .	194,788	20,500,287	105·2

For the population of each of the provinces according to the 1910 Census see STATESMAN'S YEAR BOOK, 1914, p. 1300.

The population of Ceuta (23,907) is included in that of Cádiz. Besides Ceuta, Spain has, on the African Coast, the Alhucema isles (pop. 406), the Chafarinas (736), Melilla (39,852), Peñon de la Gomera (400), Rio de Oro (495), and Nador (2,740). The North African possessions are no longer used as convict stations, the centuries old "Presidios" having been suppressed by a recent Decree and the prisoners brought back to the Peninsula. The Basques in the North, numbering some 400,000, differ in race and language from the rest of Spain; there are 50,000 gipsies, and a small number of Jews.

The following were the populations of the principal towns (Census 1910), viz. :—

Town	Pop.	Town	Pop.	Town	Pop.
Madrid . . .	599,807	Palma . . .	67,544	Coruña . . .	47,984
Barcelona . .	587,411	Cádiz . . .	67,174	Linares . . .	37,039
Valencia . . .	233,348	Córdoba . .	66,831	Badajoz . . .	35,039
Sevilla . . .	158,287	Santander .	65,046	Alcoy . . .	33,896
Málaga . . .	136,365	S. Cruz (Canaries).	63,004	Vitoria . . .	32,893
Murcia . . .	123,057	Las Palmas .	62,886	Castellon . .	32,309
Zaragoza . .	111,704	Jerez . . .	62,628	Burgos . . .	31,489
Cartagena . .	102,542	Alicante . .	55,300	Salamanca . .	29,830
Bilbao . . .	93,536	Gijon . . .	55,248	Pamplona . .	29,472
Granada . . .	80,511	Oviedo . . .	53,269	Jaén . . .	29,217
Valladolid . .	71,066	San Sebastian	49,008	Huelva . . .	29,072
Lorca . . .	70,807	Almeria . .	48,407		

The movement of population in 5 years was as follows :—

Years	Marriages	Births	Deaths	Surplus of births
1911	142,119	625,172	463,678	161,494
1912	142,897	637,901	426,269	211,632
1913	137,736	618,082	450,003	168,079
1914	132,451	609,188	451,098	158,090
1915	127,870	614,704	452,450	162,254

Emigration figures for 4 years as follows :—

Year	Male	Female	Total	Year	Male	Female	Total
1912	139,999	54,444	194,443	1914	45,279	21,317	66,596
1913	105,864	45,136	151,000	1915	36,420	13,939	50,359

Emigration from Spain is chiefly to Argentina, Cuba, Brazil, Uruguay, and Mexico.

### Religion.

The national Church of Spain is the Roman Catholic, and the whole population of the kingdom adhere to that faith, except about 30,000, Protestants (about 7,000), Jews (about 4,000), Rationalists, etc. Within the Peninsula, apart from Portugal, there are 9 metropolitan sees and 47 suffragan sees, the chief being Toledo. The Constitution requires the nation to support the clergy and the buildings, &c., of the Church, and for this purpose the State expends annually about 41,000,000 pesetas. Efforts are being made for a reduction of the Church estimates. The relations between Church and State, are regulated by the Concordat of May 6, 1851, and although it is laid down in

this that only the orders of San Vicente de Paul, and Felipe Neri, with one other to be subsequently named, should be permitted in Spain, many other orders have been allowed to establish themselves. The third order referred to above, has never been named, and the conditions of this Concordat have never been rigidly adhered to. A law known as the "Padlock Bill" was passed in December, 1910, prohibiting the establishment of any more religious houses, without the consent of the Government. This law lapsed on December 31, 1912, but its effect was prolonged by an order from the Pope to the Spanish Bishops. This temporary measure will be replaced by a definite arrangement which is at present being negotiated with Rome. Liberty of worship is now allowed to Protestants and all other religious bodies. The communities of the religious orders are numerous and influential in Spain. Many of them have schools, and about 5,200 of their members are engaged in teaching boys of the upper and middle classes, while, within many of their establishments, industries of all kinds are carried on. The number of religious houses in Spain is about 3,672, of which 754 are for men and 2,918 for women. Of those for men, 428 are devoted to education, 39 to charity, and 287 to the training of priests. The total number of monks is about 8,377 (including 1,294 foreigners). The orders for women comprise 1,268 for education, 856 for charity, and 794 for a contemplative life. The number of nuns is about 33,078 (including 2,418 foreign women). In 1915 there were in Spain 67 cathedrals, 18,049 parish churches, 17,541 chapels and sanctuaries, and 37,376 priests.

### Instruction.

The latest census returns show that a large proportion of the inhabitants are illiterate. In 1860 19·97 per cent. of the population could read and write; 4·50 per cent. could read only; and 75·52 per cent. could neither read nor write. In 1910, 38·59 per cent. could read and write, 1·77 per cent. could read only, and 59·35 per cent. could neither read nor write.

By a law of 1857 an elaborate system of primary education was ordained: education was to be compulsory, there was to be a primary school for every 500 inhabitants, and instruction was to be on a rigidly uniform plan. This system has not been rigidly enforced, but various improvements have been effected, especially by a law of June 9, 1909, which made education obligatory. The country is divided into eleven educational districts, with the universities as centres. The public and primary schools are since 1902 supported by Government, the total sum spent in 1915 and 1916 respectively being 40,240,660 pesetas. Most of the children are educated free. The Royal Decree of July 1, 1902, regulates all schools, whether belonging to corporations or private persons, whether self-supporting or in receipt of Government or municipal subventions. It requires schools to be authorised by Government authority, and provides for their periodical inspection, for the enforcement of rules respecting sanitation and discipline, and for the appointment of properly qualified teachers.

There are 26,108 public schools, and 5,669 private schools, the total number of pupils being 2,604,308. Secondary education is conducted in 'institutions,' or middle-class schools, there must be at least one of them in every province. There are at present 59 institutions with 48,750 pupils. These institutions prepare for the universities, of which there are eleven, attended by 20,507 students. The universities are at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, and Zaragoza. Each university has two or more

of the faculties of philosophy and letters, law, sciences, medicine, and pharmacy. There are, besides, a medical faculty at Cádiz in connection with the University of Seville. Government also supports various special schools. In 1915 and 1916 the total sum expended on education and the fine arts was 74,355,989 pesetas.

Since 1902 the Government has sent scholars, teachers, and professors to foreign countries to study. Since 1910 there has existed a Board of Scientific Research (*Junta para ampliación de estudios*), which connects the work done abroad with the organisation of new laboratories in Spain, and publishes sets of books which show the results obtained. Since 1910 this Board has started the foundation of Halls of Residence for students where an important educational and a certain amount of scientific work is done. The total expenditure of this Board is 800,000 pesetas per annum.

### Justice and Crime.

Justice is administered by *Tribunales* and *Juzgados* (Tribunals and Courts), which conjointly form the *Poder Judicial* (Judicial Power). Judges and Magistrates cannot be removed, suspended or transferred except as set forth by law.

The Judicature is composed of:—1 *Tribunal Supremo* (Supreme High Court); 15 *Audiencias Territoriales* (Divisional High Courts); 34 *Audiencias Provinciales* (Provincial High Courts); 498 *Juzgados de Primera Instancia* (Courts of First Instance); and 9,317 *Juzgados Municipales* (District Court, or Court of Lowest Jurisdiction held by Justices of the Peace).

The *Tribunal Supremo* consists of a President, three Courts of Justice and one for administrative purposes; it is empowered with disciplinary faculties; is Court of Cassation in civil and criminal trials; decides in first and second instance disputes arising between private individuals and the State; and hears criminal causes against Princes of the Royal Family, Cabinet Ministers, and Presidents of the Senate and Congress.

The *Audiencias Territoriales* have power to try in second instance sentences passed by judges in civil matters, and in first instance all criminal trials of the province.

The *Audiencias Provinciales* are Courts competent to try and pass sentence in first instance on all cases filed for delinquency. In the most important ones evidence is taken by a jury composed of twelve lay judges.

The *Juzgados de Primera Instancia* are presided over by one Judge acting in civil matters as Judge of First Instance, and in criminal matters as *Jefe de Instrucción* (examining Magistrate).

The *Juzgados Municipales* are constituted of a Judge and two Deputy Judges. This Court is competent to try small civil cases not exceeding 500 pesetas (£20) in value, and petty offences.

### Old Age Pensions.

By a law dated February 27th, 1908, the "Instituto Nacional de Prevision" was created for the purpose of granting Old Age Pensions, and administering a system of social insurance. The funds of the Institution are made up of an endowment, annual State subsidy, and private and public donations. The maximum annual pension obtainable is 1,500 pesetas (£60). The number of old-age pensions granted up to January 1, 1916, was 57,276.

**Finance.**

Revenue and expenditure for five years :—

—	1912	1913	1914	1915	1916
	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas
Revenue . . . . .	1,131,435	1,505,228	1,408,638	1,916,528	1,280,536
Expenditure . . . . .	1,162,853	1,519,228	1,527,448	1,948,958	1,465,044

The estimates for 1917 have not been definitely approved, but Parliament has voted the following credits on expenditures for the time being.

REVENUE		EXPENDITURE	
	Pesetas		Pesetas
Direct taxes on land, trade, mines, Government salaries, registration, &c. . . . .	490,608,068	Civil list . . . . .	9,050,000

'Pagarés' of the Ministry of the Colonies . . . . .	100,000,000
	9,365,072,616

**Defence.****ARMY.**

Military service in Spain is compulsory. The total term of service is for 18 years. The law in force (1912) divides this period into the following :— 1 year, recruits in deposit ("*Reclutas en Caja*"); 3 years, active army (1st standing); 5 years, active army (2nd standing); 6 years, reserve; and 3 years, territorial reserve. There is at present no organisation for the 'territorial reserve.'

In January, 1916, a central general staff of the army was appointed. The country is divided up into 8 territorial districts, each under a 'Captain-General.' The 1st to 6th inclusive each furnish to the field army 2 divisions, the remaining two, 1 division. A division consists of 2 infantry brigades, each consisting of 2 regiments of 3 battalions, but the third battalion is only a cadre in peace time, 1 regiment of cavalry, 1 regiment of field artillery of 6 batteries. The regiments of engineers have no fixed distribution. They consist of 6 regiments of sappers, 1 of telegraphy and 1 of railways; all of which are irregularly distributed among the different army corps. There are also 3 independent brigades of chasseurs, each of 6 battalions, 4 regiments of mountain artillery, making 16 batteries, and 1 regiment of horse artillery of 6 batteries, and a railway regiment of 8 active and 8 dépôt companies. Batteries have 4 guns. There is 1 permanent cavalry division of 2 brigades, and there are 3 permanent cavalry brigades. The Aeronautical Service consists of headquarters at Guadalupe, a balloon section, an aeronautic section and a dépôt. The peace establishment for the year 1917 has been fixed at 128,358 men of all ranks, and the total strength of the field army would probably be about 300,000 combatants.

For the units of the second line, or reserve troops, there are at present 116 battalion cadres, 14 squadron cadres, and 14 battery cadres. The second line troops are apparently intended to provide 7 divisions of about 13,000 combatants each. Total about 90,000.

There are also the Guardia Civil and the Carabineros. The former is a constabulary, and the latter a military police used as Customs guard on frontier. Both are recruited from the army and under military discipline. The total strength of the Guardia Civil is somewhat less than 20,000 (2,000 mounted), and of the Carabineros nearly 15,000 (500 mounted).

Outside the Spanish peninsula, there are the 3 military commands of Melilla, Ceuta and Larache on the coast of Morocco, also the Balearic Islands and the Canary Islands, each of which forms a military district. The troops in the Balearic and Canary Islands are mostly recruited from the islanders. In Africa the troops are Spanish, and are always on a war footing. A Commissioner-General is invested with supreme military command in the Spanish zone. The corps of occupation recently consisted of 11 regiments of infantry of 3 battalions, and 12 battalions of chasseurs (all battalions have 6 companies), 3 regiments of cavalry of 6 squadrons and 1 group of 3 squadrons, 2 regiments of field batteries, and 2 groups of batteries, 2 regiments of engineers, 1 group of 3 companies of sappers, and a section of telegraphy, 3 squadrons of aeroplanes for each separate command, situated at Zeluan (Melilla), Tetuan and Arcila (Larache), and the necessary subsidiary services. A native battalion of infantry and squadron of cavalry have been raised at Melilla, and 4 companies of native infantry and a "mixed" company (horse and foot) have been raised to perform the duties of military police. A total of about 70,000 men in Africa.

The Spanish infantry is armed with the Mauser rifle, model 1893. Calibre .275. The cavalry have the Mauser carbine. The field artillery gun is a Schneider Canet 14½ pr. of 19106.

Spain possesses one dirigible, the 'España,' of the Clement-Bayard type. A corps of aviators has recently been created. The military school of aeronautics is at Cuatro Vientos, 5½ miles from Madrid. More than 25 aeroplanes are in service. Purchases of aeroplanes were made in 1915 in the United States; the number is unobtainable in official circles, as great secrecy is being observed in regard to them. The following wireless stations, Telefunken system, have been erected and are in charge of the military. Central station

at Carabanchel, range 540 miles ; Barcelona, range 430 miles ; Melilla, Ceuta, Tetuan, Bilbao, Valencia, range 320 miles ; Almeria, Larache, range 220 miles ; also at Mahon (Balears) and Coruña.

The peace establishment of the Spanish army including Guardia Civil and Carabineros amounts to 12,044 officers and 162,233 men. The budget for 1916 was 6,585,623/.

Spain has several fortresses which guard the frontiers and the coast. On the Western Pyrenees, Oyarzun and Pamplona. On the central Pyrenees, Jaca ; and on the eastern Pyrenees, Gerona. On the Portuguese side, Badajoz (an old fortification). And finally on the coast, Ferrol, Cádiz, Cartagena, Mahon (Balearic Islands) and Ceuta (Africa).

There are 7 destroyers and 24 modern torpedo boats, and a number of gunboats.

A new programme was projected, to consist of 3 Dreadnoughts, 2 scouts, 8 destroyers, various torpedo boats, and submarines. But in view of the European War this programme was altered (November, 1914), so as to give preference to submarines and light cruisers in place of Dreadnoughts. Thus for the next six years the programme (approved in February, 1915) is as follows :— 4 cruisers, 6 destroyers, 28 submarines, 3 gunboats, 18 coast defence vessels, and the acquisition of submarine mines, besides repair docks and works at Ferrol, Cadiz, and Cartagena, at a total cost of 11,000,000/.

In February, 1915, the keel was laid of a new cruiser, now in course of construction, to be named *Reina Victoria Eugenia*. Displacement: 5,590 tons ; speed : 24 knots.

The Spanish dockyard at Ferrol is now worked by a British syndicate, employing Spanish workmen.

A naval wireless telegraphic station, Telefunken system, with a range of 300 miles, is situated at San Fernando (Cadiz). There are also wireless stations at Cartagena and Ferrol.

For 1917 the strength of the navy has been fixed at 10,051 sailors and 4,000 marines. Total number of officers in active service in the navy, including all departmental corps: 1,582. Reserve. 141.

### Production and Industry.

Of the soil of Spain 88.45 per cent. is classed as productive; of this 35.5 per cent. is devoted to agriculture and gardens, 2.5 vineyards, 2.9 olive culture, 25.3 natural grass, 22.2 fruits.

The soil is subdivided among a very large number of proprietors. Of 3,426,083 recorded assessments to the property tax, there are 624,920 properties which pay from 1 to 10 reales; 511,666 from 10 to 20 reales; 642,377 from 20 to 40 reales; 788,184 from 40 to 100 reales; 416,546 from 100 to 200 reales; 165,202 from 200 to 500 reales; while the rest, to the number of 279,188, are larger estates, charged from 500 to 10,000 reales and upwards. The subdivision of the soil is partly the work of recent years, for in 1800 the number of farms amounted only to 677,520, in the hands of 273,760 proprietors and 403,760 farmers.

The area under the principal crops and the yield (for 3 years) were as follows:—

	Area.			Yield.		
	1914	1915	1916	1914	1915	1916

In 1916, 3,210,595 acres under vines (3,169,119 acres in 1915) produced 8,726,139,253 pounds of grapes (3,945,321,774 pounds in 1915), yielding ordinary red and white wines to the extent of 514,713,474 gallons (267,141,921 gallons in 1915). Sherry, malaga, and generous wines were exported. 3,617,377 acres (1914) under olives yielded 1,157,802 tons of olives and 203,610 tons of oil. Other products are esparto, flax, hemp, pulse; oranges and hazel nuts are largely exported, and Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried in in Valencia, Murcia, and other provinces. There are 34 (cane) sugar factories in Spain. The total production resulting from the 1915 harvest was 5,011,812 kgs., or 11,046,034 lbs., only 14 of those mentioned contributing

to the output. In 1914, when 21 factories were working, the production amounted to 6,847,328 kgs., or 15,091,510 lbs. of sugar.

The number of farm animals in 1915 was estimated as follows:—Horses, 512,453; mules, 950,836; asses, 826,204; cows, 2,926,170; sheep, 15,994,608; goats, 3,216,682; pigs, 2,883,081; camels (Canary Islands), 4,778.

Spain is rich in minerals. Iron is abundant in the provinces of Vizcaya, Santander, Oviedo, Navarra, Huelva, and Seville; copper in the provinces of Seville, Córdoba, and Huelva; coal is found in Oviedo, Leon, Gerona, Valencia, and Córdoba; zinc in Santander, Murcia, Guipúzcoa, and Vizcaya; cobalt in Oviedo; lead in Murcia, Jaen, and Almería; manganese in Oviedo, Huelva, and Seville; quicksilver in Ciudad Real and Oviedo; silver in Guadalajara; sulphate of soda in Burgos; salt in Guadalajara; sulphur in Murcia and Almería; phosphorus in Cáceres and Huelva. Platinum is reported to have been discovered in Spain in 1915.

In 1915 workers employed in connection with the mining industries were as follows: 116,368 men, 2,034 women, and 18,319 boys and girls under 18. The total value of the mineral output in 1915 was 254,010,162 pesetas at the pit mouth, there being 1,841 productive mining concessions covering a superficies of 263,196 hectares. Mining accidents caused 243 deaths. The quantities and values of the more important minerals in 1915 were as follows:—

Minerals	Metric tons	Value, Pesetas	Minerals	Metric tons	Value, Pesetas
Anthracite . . .	222,621	4,752,598	Coal . . .	4,135,919	94,588,603
Asphalt . . .	4,521	53,378	Lignite . . .	328,213	3,569,637
Mercury . . .	20,717	4,098,996	Manganese . . .	14,328	274,841
Sulphur . . .	28,937	206,187	Silver . . .	210	109,957
Zinc . . .	51,922	6,127,703	Lead . . .	285,266	66,557

Tin . . .	102	140,848	lead . . .	2,934	213,975
Phosphorite . . .	9,050	149,165	Salt . . .	305,035	1,740,207
Iron . . .	5,617,39	35,601,403	Wolfram . . .	511	218,321
Iron pyrites . . .	730,568	8,272,892			

Spain has considerable manufactures of cotton goods, principally in Catalonia. In 1910 there were 742 undertakings employing about 68,300 looms, with 2,614,500 spindles; in woollen manufactures there are 8,800 looms with 662,000 spindles. There are in Spain about 144 paper mills (likewise in Catalonia) making writing, printing, packing and cigarette paper. There are 34 glass-making factories. Corks are manufactured to a large extent; in 1913, 46,320 tons, of a value of 1,970,420*l.*; in 1914, 51,089 tons, of a value of 1,815,577*l.*

In the Spanish fisheries the total number of boats employed was in 1915 about 16,700, of which 755 are steamers; fishermen, 88,539; and the value caught about 67,000,000 pesetas, representing a total weight of 125,000 tons. The most important catches are those of sardines, tunny fish, and cod. In Spain there are 1,347 factories, with 30,961 workmen, for the preparation of sardines and fish-preserves. The value of their output in 1914 was 27,387,985 pesetas.

### Commerce.

Imports and exports in pounds sterling:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1911	39,668,000	38,479,000	1914	42,015,356	35,237,738
1912	38,510,431	39,186,949	1915	48,260,492	50,331,267
1913	47,178,266	39,908,988	1916	51,258,715	56,336,128

The following table shows the various classes of imports and exports for two years:—

Description	1915		1916	
	Imports	Exports	Imports	Exports
	£	£	£	£
Stone, minerals, glassware and pottery . . . . .	3,327,779	3,727,033	3,667,111	4,536,992

Other countries . . . . .	466,880	412,238	278,083	332,804

The customs receipts and post dues in 1913 amounted to 9,334,370*l*. ; in 1914, 7,854,493*l*. ; in 1915, 5,339,147*l*. ; in 1916, 6,001,733*l*.

There is no formal treaty providing for "most favoured nation treatment" between Great Britain and Spain, but, under an Act passed by the Spanish Cortes in 1894, imports from the United Kingdom into Spain are subject to the minimum tariff, and British merchants have all the advantages conceded to those of any European State. Under notes exchanged on December, 28, 1894, there is an understanding that commercial relations between the two countries will continue on this basis, subject to six months' notice on either side.

The special commercial treaty with Portugal was denounced on Septem-

ber 30, 1912, all franchises suppressed, and ordinary tariff rates will be henceforth applied to Portuguese exportations to Spain.

The quantities and value of wine imported into the United Kingdom from Spain were as follows in each of the last five years: (Board of Trade) returns:—

—	1911	1912	1913	1914	1915
Quantities (gallons)	3,172,281	2,926,553	3,133,131	2,860,920	3,293,328
Value (£)	481,513	424,576	448,154	408,912	446,886

Besides wine, the following were the leading imports from Spain into the United Kingdom in the two years:—

—	1914	1915	—	1914	1915
	£	£		£	£
Iron ore . . . . .	3,149,577	4,572,381	Oranges . . . . .	1,855,270	2,449,767
Silver ore . . . . .	78,000	61,449	Raisins . . . . .	412,319	489,415
Pyrites . . . . .	1,025,172	1,325,780	Esparto, &c. . . . .	191,096	169,152
Copper ore, &c. . . . .	17,603	15,897	Onions . . . . .	925,504	1,042,011
Quicksilver . . . . .	221,737	389,624	Cork . . . . .	233,309	113,305
Lead . . . . .	1,729,718	2,158,770			

The chief British exports to Spain in 1915 were linen yarn and linens, of the value of 119,542*l.*; iron, wrought and unwrought, 508,362*l.*; coal, 1,641,332*l.*; manures, 879,025*l.*; cotton goods, 218,890*l.*; woollen goods, 98,092*l.*; wool, 35,070*l.*; new ships and boats, 2,353*l.*

Total trade between Spain and the United Kingdom in thousands of pounds for 5 years:—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Spain into U. Kingdom . . . . .	14,552	14,394	14,114	18,864	25,921
Exports to Spain from U. Kingdom . . . . .	6,887	7,851	6,378	6,190	8,524

### Shipping and Navigation.

The merchant navy of the Kingdom contained on January 1, 1916, 603 steamers of 816,747 tons net, and 240 sailing vessels of 31,101 tons net.

Bilbao and Barcelona are the chief maritime centres.

The shipping entered and cleared at Spanish ports in two years was as follows:—

—	1915		1916	
	No.	Tons	No.	Tons
Entered:				
With cargoes . . . . .	8,634	8,120,151	6,450	6,233,085
In ballast . . . . .	7,443	6,713,791	6,563	4,704,614
Total . . . . .	16,077	14,833,942	13,013	10,937,699
Cleared:				
With cargoes . . . . .	13,748	12,619,883	14,905	12,769,031
In ballast . . . . .	1,399	1,923,186	1,260	1,808,699
Total . . . . .	15,147	14,543,069	16,165	14,067,780

Of the vessels entered in 1916, 8,495 vessels of 6,021,182 tons (entered) and 10,863 vessels of 7,852,829 tons (cleared) were Spanish; and in 1916, 10,427 vessels of 7,823,584 tons (entered) and 10,029 vessels of 7,889,882 tons (cleared) were Spanish. Shipping under the British flag formed 39·3 per cent. of the whole.

### Internal Communications.

The total length of the railways in Spain in 1914 was 15,091 kilometres (9,377 miles), of which 11,483 kilometres (7,135 miles) are of normal gauge (1·67 metres, or 5·48 feet), and 3,596 kilometres (2,235 miles) are of varying gauges, chiefly 1 metre (3·28 feet). The remaining 12 kilometres (7 miles) are cogwheel and funicular lines. In 1914, 57,898,995 passengers were carried on the different lines, and 28,968,386 tons of goods transported. In 1914-1915 the following lines were opened: Medina de Risco-Palanquinos (57 miles); Alicante-Denia (57 miles); Torre del Mar (Málaga), 5 miles. The whole of the Spanish railways belong to private companies, but nearly all have obtained guarantees or subventions from the Government. The most important companies are those in the North, with 3,861 kilometres (2,399 miles); Madrid-Saragossa-Alicante (system Antigua and Catalana), 3,364 kilometres (2,090 miles); Andaluces, 1,083 kilometres (673 miles); Madrid-Caceres-Portugal and West, 777 kilometres (483 miles); South of Spain, 361 kilometres (224 miles); La Robla to Valmaseda and Luchana (narrow gauge), 312 kilometres (194 miles); and Medina-Zamora-Orense and Vigo, 299 kilometres (186 miles). The official gauge of the principal Spanish railways has hitherto, for strategical reasons, been purposely kept different from that of France, and in consequence of this passengers are obliged to change trains at the frontier stations. The attempt made in 1882 to remedy this state of affairs was not successful. In January, 1914, however, a scheme was ordered to be drawn up for the construction of a standard-gauge railway with a double track from Madrid to the French frontier.

The Post Office carried in 1915, in the inland service, 197,425,248 letters and post-cards, and 131,538,457 printed papers and samples; in the international service, 9,771,661 letters and post-cards, and 7,353,408 printed papers and samples. There were 6,952 post-offices. Receipts, 36,557,963 pesetas; expenses, 20,840,617 pesetas.

The length of lines of telegraphs in Spain in 1914 was 61,812 miles; the total number of interior messages sent and received was 11,497,784. International messages sent 839,806, received 924,805, transit 250,475. The number of telegraph offices was 2,132.

In 1914 there were 97 urban telephone systems and 188 interurban circuits; the total number of telephone stations was 34,203.

The "Compañía Nacional de Telegrafía sin Hilos" holds the Government concession for the Public Service with ships, and between the Peninsula and the Canary Islands, and the International Service with England, Italy, Austria and Germany. They have 10 wireless stations of the Marconi system: one at Aranjuez equipped with two sets: one with 430 miles range for communication with the shore stations, and another with 1,000 miles range designed to carry out international commercial service with England and other countries. Three stations situated at Cadiz, Tenerife, and Melanara (Las Palmas), equipped with two sets each: one of 860 miles range to carry out the service between Spain and the Canary Islands, and another of 250 miles range for ship and shore traffic. Two stations, one at Barcelona and another at Vigo, with two sets each: one of 600 miles range to carry out international commercial service with England, Italy, and Austria, respectively, and another of

250 miles range for ship and shore traffic. One station at Soller (Majorca) with 500 miles range to carry out international service and ship and shore traffic. Finally, three stations with a range of 400 miles to communicate with ships at sea and with the central station at Aranjuez, which are installed respectively at Santander, Cabo de Palos, and Cabo Finiſterre.

A royal decree ordains that all Spanish merchant vessels carrying passengers or mails, or subsidised by the Government, must be fitted with wireless telegraphy.

### Money and Credit.

The note issue of the Bank of Spain is regulated by law of May 13, 1902.

On February 24, 1917, the position of the Bank was as follows:—

	1,000 Pesetas.		1,000 Pesetas.
Cash in hand		Property.	14,261
{ gold . . . . .	1,318,226	Capital and reserve . . . . .	176,600
{ silver . . . . .	747,889	Notes in circulation . . . . .	2,338,334
{ bronze . . . . .	3,415	Deposits and Accounts current . . . . .	770,714
Portfolio . . . . .	995,436	Discounts . . . . .	336,980
Public Treasury . . . . .	106,015		
Advances to Treasury . . . . .	150,000		

Savings bank deposits in Spain, December 31, 1915, 529,371,957 pesetas, distributed over 836,523 accounts. Post Office Savings Banks, which were created under the law of June 4, 1909, were opened on March 12, 1916. There are at present 734 offices in operation.

The nominal value of the money coined in Spain from 1868 to 1907 was : gold, 920,613,935 pesetas ; silver, 1,330,589,807 pesetas. In 1905-07 no gold was coined ; in 1906-07, no silver was coined. No coinage was struck during the years 1908 and 1909. In 1910, money coined to the value of 1,976,180 pesetas in 50 centime pieces (silver) to replace money retired from circulation. In 1911, 286,843 pesetas of 50 centime pieces were coined, as well as 60,286 pesetas of bronze centime pieces. In 1913, 1,429,149 pieces of 1 centime and 1,639,500 pieces of 2 centimes were coined. In 1914, 1915 and 1916 no new coins were struck.

### Money, Weights, and Measures.

The *Peseta* of 100 *Centesimos* is of the value of a franc,  $9\frac{1}{2}d.$ , or 27 to 28 pesetas to the pound sterling, but the actual value is about  $9d.$

Gold coins in use are 25, 20, 10, and 5-peseta pieces. Silver coins are 5-peseta, 2-peseta, 1-peseta, and 50-centime pieces.

Both gold and silver coins are of the same weight and fineness as the corresponding French coins. Under a law of July 29, 1908, the Government is withdrawing from circulation the spurious 5-peseta pieces which had become common. Gold coinage is not in general circulation.

Theoretically, there is a double standard of value, gold and silver, the ratio being  $15\frac{1}{2}$  to 1. But of silver coins only the 5-peseta piece is legal tender, and the coinage of this is restricted.

On January 1, 1859, the metric system of weights and measures was introduced in Spain. But, besides these, the old weights and measures are still largely used. They are :—The *Quintal* = 220·4 lbs. avoirdupois ; the *Libra* = 1·014 lbs. avoirdupois ; the *Arroba*, for wine =  $3\frac{1}{2}$  imperial gallons ; for oil =  $2\frac{1}{4}$  imperial gallons ; the *Square Vara* = 1·09 vara = 1 yard ; the *Fanega* =  $1\frac{1}{2}$  imperial bushel.

## Diplomatic and Consular Representatives.

### 1. OF SPAIN IN GREAT BRITAIN.

*Ambassador.*—Alfonso Merry del Val y Zulueta (appointed March 16, 1913).

*Counsellor.*—Antonio Benitez y Fernández.

*Second Secretary.*—Domingo de las Barcenas.

*Attachés.*—Señor Conde de Eril, Señor Don F. Lopez Roberts, Señor Don Fernando Valdes Ibarguien, Marquis de Mós and Señor Don Pedro de Zulueta.

*Military Attaché.*—Lieut.-Colonel Julio Vicens.

*Consul-General in London.*—José Congosto (appointed February 6, 1913).

There are Consular representatives at Cardiff, Glasgow, Liverpool, Newcastle, and Southampton; and Consular agents in all the principal towns.

### 2. OF GREAT BRITAIN IN SPAIN.

*Ambassador.*—The Rt. Hon. Sir Arthur Hardinge, G.C.M.G., K.C.B. (appointed October, 1913).

*Counsellor.*—J. C. T. Vaughan, M.V.O.

*Secretaries.*—Percy Loraine, J. E. Hope-Vere, and H. Stopford Birch.

*Military Attachés.*—Major Joscelyne Grant and Captain Vischer.

*Consul-General* (at Barcelona).—C. S. Smith.

There are Consular representatives at Bilbao, Cadiz, Coruña, Madrid, Seville, Malaga, Almeria, Valencia, and other places.

## Colonies.

The area and population of the colonial possessions of Spain are approximately as follows:—

Colonial Possessions	Area: English square miles	Population
Possessions in Africa:		
Rio de Oro and Adrar . . . . .	73,000	12,000
Spanish Guinea . . . . .	12,000	200,000
Fernando Po, Annobon, Corisco, Great Elobey, Little Elobey . . . . .	814	23,844
Total, Africa . . . . .	85,814	235,844

For administrative purposes the Canary Islands are considered part of Spain. Rio de Oro and Adrar, stretching southwards along the Sahara coast from the south-western frontier of Morocco, are under the governorship of the Canary Islands, with a sub-governor resident at Rio de Oro. The capital of this colony is Villa Cisneros (lat. 23° 46' 55" N., long. 18° 11' 13" west of Paris). There is no town called Rio de Oro, the name being applied to the arm of the sea and the colony generally.

The Spanish territory on the Gulf of Guinea, extends from the Muni to the Campo river and the German Kamerun, its eastern boundary being on the meridian of 11° 20' E. of Greenwich. The capital is Santa Isabel, in the Island of Fernando Po, which has an area of 1,185 square miles. The principal mountain is known as the Pico de Santa Isabel, or Clarence Peak (10,190 feet). The island is considered one of the most fertile spots on the West Coast of Africa. The other possessions of Spain in the Gulf of Guinea comprise the Islands of Annobon (6½ square miles), Little

Elobey (35 acres), Great Elobey ( $\frac{1}{2}$  square mile) and Corisco ( $5\frac{1}{2}$  square miles), and the district of Río Muni on the mainland (9,264 square miles), the principal town of which is Bata. The coast region is low and marshy and contains vast forests. The vegetation is luxuriant and at places along the coast there are Spanish, French, and English factories. But there are no harbours and the rivers are all inaccessible to vessels. The population of Fernando Po is believed to be about 17,000, of whom about 12,000 are aborigines of the island and about 5,000 contracted labourers from Liberia, Sierra Leone, the Gold Coast, Southern Nigeria, and the Río Muni. The labourers from the British colonies number about 600 or 700. There are about 250 to 300 Europeans in the island, about 30 of these being British. The population of Little Elobey is about 150. Great Elobey is covered with bush and is almost uninhabited. It is believed that Corisco and Annobon each contain about 1,400 inhabitants, while the population of the Río Muni territory is estimated at 130 whites and 89,000 natives. All the colonies are under the control of a Governor-General, resident at Santa Isabel. A Sub-Governor is appointed to the district of Bata and another to the district of Elobey, which includes the Islands of Corisco and Annobon. The aborigines of Fernando Po are called Bubiis. Those of Elobey and Corisco are mostly of the Benga tribe, but like the people of Annobon they take the names of their respective islands. In Bata the Pamwes are the principal tribe. There are Catholic and American Presbyterian missions at work among the natives. Spain has given to France the right of pre-emption in case of the sale of any of these African colonies or the adjacent islands.

For the position of Spain in Morocco see under Morocco.

## SWEDEN.

(SVERIGE.)

### Reigning King.

**Gustaf V.**, born June 16, 1858. Succeeded to the throne on the death of his father, Oscar II., December 8, 1907. Married, Sept. 20, 1881, to Princess Victoria, born August 7, 1862, daughter of Friedrich, Grand Duke of Baden.

#### *Children of the King.*

I. The Crown Prince *Gustaf Adolf*, Duke of Skåne, born Nov. 11, 1882, married, June 15, 1905, to Princess Margaret Victoria, born January 15, 1882, daughter of Prince Arthur, Duke of Connaught: offspring, Prince Gustaf Adolf, born April 22, 1906; Prince Sigvard, born June 7, 1907; Princess Ingrid, born March 28, 1910; Prince Bertil, born Feb. 28, 1912; Prince Carl Johan, born Oct. 31, 1916.

II. Prince Wilhelm, Duke of Södermanland, born June 17, 1884, married, May 3, 1908, to Grand Duchess Maria Pavlovna, born April 19, 1890, daughter of Grand Duke Paul Alexandrovitch of Russia, divorced March 17, 1914. Issue, Prince Lennart, born May 8, 1909.

III. Prince Eric, Duke of Västmanland, born April 20, 1889.

#### *Brothers of the King.*

I. Prince *Oscar* Bernadotte, Count of Wisborg, born Nov. 15, 1859. Renounced his succession to the throne and married, March 15, 1888, Ebba Munck of Fulkila, born Oct. 24, 1858.

II. Prince *Carl*, Duke of Västergötland, born Feb. 27, 1861. Married August 27, 1897, to Princess Ingeborg, born Aug. 2, 1878, daughter of King Frederik of Denmark. Issue, Princess Margaretha, born June 25, 1899; Princess Märtha, born March 28, 1901; Princess Astrid, born Nov. 17, 1905; and Prince Carl, born Jan. 10, 1911.

III. Prince *Eugen*, Duke of Närke, born Aug. 1, 1865.

King Gustaf V. is the fifth sovereign of the House of Ponte Corvo and great-grandson of Marshal Bernadotte, Prince of Ponte Corvo, who was elected heir-apparent of the crown of Sweden by the Parliament of the Kingdom, Aug. 21, 1810, and ascended the throne Feb. 5, 1818, under the name of Carl XIV. Johan. He was succeeded at his death, March 8, 1844, by his only son Oscar. The latter died July 8, 1859, and was succeeded by his eldest son Carl XV., at whose premature death without male children, the crown fell to his next surviving brother, the late King.

The royal family of Sweden have a civil list of 1,345,000 kronor, or 74,064*l.* The sovereign, besides, has an annuity of 300,000 kronor, or 16,520*l.*, voted to King Carl XIV. Johan and his successors on the throne of Sweden.

As to the dissolution of the Union with Norway, see under *Norway*.

The following is a list of the kings and queens of Sweden, with the dates of their accession, from the accession of the House of Vasa:—

<i>House of Vasa.</i>		<i>House of Hesse.</i>	
Gustaf I. . . . .	1521	Fredrik I. . . . .	1720
Eric XIV. . . . .	1560	<i>House of Holstein-Gottorp.</i>	
Johan III. . . . .	1568	Adolf Fredrik . . . . .	1751
Sigismund . . . . .	1592	Gustaf III. . . . .	1771
Carl IX. . . . .	1599	Gustaf IV. Adolf. . . . .	1792
Gustaf II. Adolf . . . . .	1611	Carl XIII. . . . .	1809
Christina . . . . .	1632	<i>House of Ponte Corvo.</i>	
<i>House of Pfaltz.</i>		Carl XIV. Johan. . . . .	1818
Carl X. . . . .	1654	Oscar I. . . . .	1844
Carl XI. . . . .	1660	Carl XV. . . . .	1859
Carl XII. . . . .	1697	Oscar II. . . . .	1872
Ulrika Eleonora . . . . .	1718	Gustaf V. . . . .	1907

### Constitution and Government.

The fundamental laws of the Kingdom of Sweden are:—1. The Constitution or *Regerings-formen* of June 6, 1809; 2. The amended regulations for the formation of the Diet of June 22, 1866 (modified under an act passed in 1909); 3. The law of royal succession of September 26, 1810; and 4. The law on the liberty of the press of July 16, 1812. The King must be a member of the Lutheran Church. His Constitutional power is exercised in conjunction with the Council of State or (in legislation) in concert with the Diet, and every new law must have the assent of the crown. The right of imposing taxes is, however, vested in the Diet. This Diet, or Parliament of the realm, consists of two Chambers, both elected by the people. The First Chamber consists of 150 members. The election of the members takes place by the 'Landstings,' or provincial representations, 25 in number, and the municipal corporations of the towns, not already represented in the 'Landstings,' Stockholm, Göteborg, Malmö, Norrköping and Gävle. The Constituencies are arranged in 6 groups, in one of which an election takes place in September every year. The manner of the election is proportional and regulated by a special election law. All members of the First Chamber must be above 35 years of age, and must have possessed for at least three years previous to the election either real property to the taxed value of 50,000 kronor, or 2,777*l.*, or an annual income of 3,000 kronor, or 166*l.* They are elected for the term of six years. The Second Chamber consists of 230 members elected for 3 years by universal suffrage, every Swede over 24 years of age, and not under any legal disability, having the right to vote. The country is divided into 56 constituencies, in each of which one member is elected for every 230th part of the population of the Kingdom it contains, the number to be elected in each constituency being ascertained prior to every 3-year period. The method of election is proportional, and the voter may (or may not) indicate on the ballot paper the party to which the candidates he votes for belong. On the voting paper the names of the candidates must appear in vertical succession, and these names may not exceed in number the number to be elected by more than 2. In the counting of votes, papers with the indication of party are grouped according to parties and the order of candidates within each group determined; papers with no party indication are counted separately in a 'free group.' The places to be given to the different groups of voting papers are decided according to the d'Hondt

rule. Representatives and their substitutes are chosen in the same election. The members of both Chambers obtain salaries, free of income tax, for their services, at the rate of 1,200 kronor, or 66*l.*, for each session of four months, or, in the case of an extra session, 10 kronor (11*s.*) a day, besides travelling expenses. The salaries and travelling expenses of the deputies are paid out of the public purse.

The executive power is in the hands of the King, who acts under the advice of a Council of State, the head of which is the Minister of State. The Ministry, appointed March 30, 1917, is composed as follows :—

*Minister of State (Premier).*—Carl Swartz.

*Minister for Foreign Affairs.*—Admiral Lindman.

*Minister of Justice.*—S. J. Stenberg.

*Minister of the Interior.*—H. O. F. von Sydow.

*Minister of Finance.*—M. Carlsson.

*Minister of Marine.*—Commodore Ericson.

*Minister of Education and Ecclesiastical Affairs.*—M. Hammarström.

*Minister of Agriculture.*—M. Dahlberg.

*Minister of War.*—Col. Åkerman.

*Ministers without Portfolio.*—M. Falk and M. Ericson.

All the members of the Council of State are responsible for the acts of the Government.

The second chamber, elected Sept, 1914 : 86 Conservatives, 87 Socialists, and 57 Liberals. The upper chamber (116 elected every year) : 90 Conservatives, 44 Liberals, and 16 Socialists.

The provincial administration is entrusted in Stockholm to a High Governor, and in each of the 24 governments to a prefect, who is nominated by the King. As executive officers of the prefects there are 117 bailiffs (Kronofogdar) and 518 sub-officers (Länsmän). The right of the people to regulate their own local affairs is based on the communal laws of March 21, 1862. Each rural parish, and each town, forms a commune or municipality in which all who pay the local taxes are voters, forming the communal assembly. The communal assembly in the country, and an elected town council in the towns, decide on all questions of administration, police and communal economy. Ecclesiastical affairs and questions relating to primary schools are dealt with by the parish assemblies, presided over by the pastor of the parish. Each government has a county council (Landsting) which regulates the internal affairs of the government. The council meets annually for a few days in September under a president appointed by the King from among its members. The members are elected by the towns and provincial districts. Towns having a population of at least 1-150th of the total population of the realm and towns already separated from the 'Landstings,' and where the number of inhabitants is not fallen below that which caused their separation, are administered separately by their municipal councils: these towns are Stockholm, Göteborg, Malmö, Norrköping, and Gävle. As in elections for the Diet, so in the communal elections of municipal representatives, of members of the 'Landstings,' &c., the method of election is proportional. Women possessing the right to the communal vote are also eligible to communal positions, except to be members of the 'Landstings.'

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

The first census took place in 1749, and it was repeated at first every third year, and subsequently, after 1775, every fifth year. At present,

a general census is taken every ten years, besides which there are annual enumerations of the people.

The area and population of Sweden, according to the census taken on December 31, 1910, and estimate for December 31, 1916, are as follows:—

Governments (Län)	Area : English square miles	Population Dec. 31, 1910	Population Dec. 31, 1916	Pop. per square mile 1916
Stockholm (city)	53	342,323	408,792	7,713.0
Stockholm (rural district)	2,987	229,181	225,731	75.6
Uppsala	2,051	128,171	132,716	64.7
Södermanland	2,629	178,568	185,537	70.6
Östergötland	4,265	294,179	301,482	70.7
Jönköping	4,447	214,454	221,370	49.8
Kronoberg	3,825	157,965	156,478	40.9
Kalmar	4,454	228,129	228,202	51.2

Lakes Vänern, Vättern, Mälaren, Hjälmaren	3,512	—	—	—
Total	173,035	5,522,403	5,757,566	33.3

In 1916 there were 2,817,950 males and 2,939,616 females.

The growth of the population has been as follows:—

Year	Population	Increase per ct. per annum	Year	Population	Increase per ct. per annum
1840	3,138,887	—	1900	5,136,441	0.71
1880	4,565,668	0.95	1910	5,522,403	0.72

With the exception of (1910) 25,290 Finns, 7,138 Lapps, and some thousands others, the Swedish population is entirely of the Scandinavian branch of the Aryan family.

On December 31, 1910, there were 21,708 foreigners in Sweden, including subjects of Russia and Finland 8,438, Norway 4,537, the German Empire 3,400, Denmark 2,900, the United States 816, the United Kingdom 288, other states 1329.

The population was divided as follows in 1910:—

—	Male	Female	—	Male	Female
Unmarried	1,690,313	1,686,141	Widowed	105,170	221,816
Married	900,340	910,345	Divorced	2,906	5,872

## MOVEMENT OF THE POPULATION.

1. *Births, Deaths, and Marriages.*

Year	Total living Births	Of which Illegitimate	Stillborn	Marriages	Deaths exclusive of Stillborn	Surplus of Births over Deaths
1912	132,868	20,359	3,322	33,149	79,241	53,627

## II. PRINCIPAL TOWNS.

In 1860 the town population numbered only 434,519, in 1900 1,103,951, and in 1915 1,555,136, showing an increase of from 11 per cent. of the whole population of Sweden (in 1860) to 27 per cent. (in 1915).

Towns over 10,000 inhabitants at the beginning of 1917 :—

Stockholm . . .	408,792	Linköping . . .	25,629	Uddevalla . . .	13,581

Uppsala . . .	27,976	Södertälje . . .	14,000	Härnösand . . .	10,025

## Religion and Instruction.

The mass of the population adhere to the Lutheran Protestant Church, recognised as the State religion. There are 12 bishoprics (Uppsala being the metropolitan see), and 2,573 parishes at the beginning of 1917. At the census of 1910, the number of 'Evangelical Lutherans' was returned at 5,497,689, the Protestant Dissenters, Baptists, and Methodists, numbering 13,715. Of other creeds, there were 3,070 Roman Catholics (under a Vicar Apostolic resident at Stockholm), 6,112 Jews, and 817 others. No civil disabilities attach to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

The Kingdom has two universities, at Uppsala and Lund, the former having 2,347 and the latter 1,277 students in the autumn of 1915. There are also a State faculty of medicine in Stockholm (409 students) and private universities in Stockholm (philosophical and law faculties with 657 students and 49 auditors) and Göteborg (philosophical faculty, with 247 students). In Stockholm there is also an academy of commerce with 157 students. In 1915 there were 77 public secondary schools, with 24,828 pupils; 48 people's high schools, 2,704 pupils; 15 normal schools for

elementary school teachers, 1,953 pupils; 2 high and 7 elementary technical schools, about 3,335 pupils; 45 navigation schools, 344 pupils; military schools, agricultural schools, veterinary and other special schools; besides institutions and schools for deaf mutes and the blind. Public elementary instruction is gratuitous and compulsory, and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated. In 1914 there were 15,773 elementary schools, with 23,495 teachers and 813,433 pupils. In 1914 the expenditure on elementary education was 50,645,795 kronor, of which 13,476,454 kronor came from the State. Among the recruits (Beväring) of 1912 only 0·16 per cent. were unlettered, only 0·31 per cent. unable to write.

### Justice and Crime.

The administration of justice is entirely independent of the Government. Two functionaries, the Justitie-Kansler, or Chancellor of Justice, and the Justitie-Ombudsman, or Attorney-General, exercise a control over the administration. The former, appointed by the King, acts also as a counsel for the Crown; while the latter, who is appointed by the Diet, has to extend a general supervision over all the courts of law. The Kingdom, which possesses one Supreme Court of Judicature, is divided (beginning of 1917) into 3 high court districts and 212 district courts divisions, of which 91 are urban districts and 121 country districts.

In town these district courts (or courts of first instance) are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—peasant proprietors—the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. In Sweden trial by jury only exists for affairs of the press.

In 1912, 2,548 men and 294 women were sentenced for serious crimes; at the end of 1915 there were 1,522 hard-labour prisoners.

### Pauperism.

Each commune is bound to assist children under 15 years of age, if their circumstances require it, and all who from age or disease are unable to support themselves. In other cases the communal poor board decides what course to take. Each commune and each town (which may be divided) constitutes a poor district, and in each is a board of public assistance. In 1914 these districts possessed workhouses and similar establishments to the number of 2,007, capable of lodging 65,380 people. There were besides 2,051 smaller cottages for the poor, assigned as dwellings for 7,400 paupers.

The total of those in receipt of relief was in 1914 251,850, of which 144,849 belonged to country parishes and 107,001 to towns and urban districts. Recipients of relief amounted relatively to the mean population to 3·54 per cent. in the country, 6·72 in towns, and 4·43 on the average for the whole kingdom. A revision of the poor law ordinances now in force may be expected in the near future.

### Finance.

Revenue and Expenditure for six years are shown as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1912	16,246,861	10,753,948	1915	21,379,116	21,379,116
1913	16,856,672	11,262,204	1916	22,067,009	22,067,009
1914	13,237,613	11,969,904	1917	24,833,061	24,833,061

<sup>1</sup> Estimates.

<sup>1</sup> During 1914 all the independent tobacco industries in Sweden, together with the so-called tobacco trust, were consolidated into one regie and taken over by the Government.

The value of the land and house property of Sweden is thus returned for 1916 :—

		Kronor
Taxed : Agricultural land in the country . . . . .		3,396,964,940
"          "          in the towns . . . . .		79,778,100
Other real estate in the country . . . . .		1,440,976,200
"          "          in the towns . . . . .		3,787,818,350
Total . . . . .		8,714,537,590
Untaxed : National { In the country . . . . .		351,019,300
{ In the towns . . . . .		270,446,900
Belonging to { In the country . . . . .		248,777,550
commonalties, { In the towns . . . . .		546,400,360
academies, &c. )		
Total . . . . .		1,416,644,110
Grand total . . . . .		10,131,181,700

The expenditure for the Church is chiefly defrayed by the parishes and out of the revenue of landed estates belonging to the Church, and the amounts do not appear in the budget estimates. The expenses for public instruction are in great part defrayed by the parishes.

On January 1, 1916, the public liabilities of the Kingdom, contracted entirely for productive purposes (railways, &c.), were as follows :—

		Kronor			Kronor
Funded loan of 1880 with 3½ int.		62,327,826	Funded loan of 1906 with 3½ int.		43,200,000
" " 1886 " 3½ "		55,053,333	" " 1907 " 4 "		46,800,000
" " 1887 " 3½ "		84,819,920	" " 1908 " 4 "		54,480,000
" " 1888 " 3 "		24,191,111	" " 1911 " 4 "		72,000,000
" " 1890 " 3½ "		24,983,556	" " 1913 " 4½ "		72,000,000
" " 1894 " 3 "		17,503,200	" " 1914 " 5 "		151,177,000
" " 1899 " 3½ "		31,752,720			
" " 1900 " 3½ "		36,320,000	Total . . . . .		812,608,666
" " 1904 " 3½ "		36,000,000			(45,144,914)¹.

All the loans are paid off gradually by means of sinking funds. The debt amounts to 142 kronor per head of the population (at the end of 1910 it was only 96 kronor per inhabitant); but as the receipts from business undertakings and outstanding loans exceed the whole interest, the charge per head is nominal. The total assets of the State on January 1, 1916, amounted to 2,193,000,000 kronor : thus the financial situation of the State shows a surplus of assets of 1,380,000,000 kronor.

The income of the communes in 1914 was 218,381,537 kronor, and the expenditure 237,185,574 kronor. Their assets amounted to 991,918,594 kronor, and their debts to 665,161,591 kronor. The revenue of the provincial representative bodies (landsting) was 16,052,782 kronor, and expenditure 18,661,443 kronor; their assets 55,597,730 kronor, and debts 25,227,309 kronor.

## Defence.

### ARMY.

The military forces are recruited on the principle of universal service, but aided by a voluntarily enlisted *personnel* which forms the permanent cadres for training purposes.

¹ These bonds may be redeemed by the National Debt Board at six months' notice. Out of this loan, the amount of 85,656,360 kronor was sold between 1887 and 1914.

Liability to service commences at the age of 20, and lasts till the end of the 42nd year. The men belong to the first 'uppbåd' of the active army or Beväring for 11 years; then for 4 years to the second 'uppbåd'; and finally for 8 years to the Landstorm. The initial period of training is 250 days for the infantry. It is 281 days for cavalry, horse and field artillery, and heavy field artillery, and 295 days for garrison artillery and engineers. The infantry is called up for exercise 4 times, 3 in the first period of their service, for 30 days each time, and later for 15 days. The cavalry and artillery have 3 trainings, 2 of 42 days and 1 of 25 days.

The field army is likely to consist, in the first instance, of 6 divisions, each of 2 brigades of 2 regiments (12 battalions), with a regiment of cavalry (4 squadrons), a regiment of field artillery (11 batteries of 4 guns each), a company of engineers, a pontoon train, a telegraph detachment, a supply company, a bearer company, ammunition column and train. There would be also a cavalry division of 4 regiments and the horse artillery division (16 squadrons and 3 batteries). The total would amount to about 100,000 combatants. The first 'uppbåd' of the Beväring would be able (as far as numbers go) to furnish a nearly equal number of reserve troops, while the second "uppbåd" would provide a sufficient reserve to make good the losses on field service, but it is not known at present what is to be the organisation of the considerable reserves which will be available.

The table below shows the peace establishment in 1915:—

Troops	Officers	Non-Com. Officers	Rank and File		Total
			Cadres (Voluntary Enlistment)	Conscript (Contingent on the Repeti- tion exercise, 1913)	
Army-Staff, &c. . . . .	62	68	—	—	130
Infantry, 28 regiments (82 battalions) . . . . .	1293	79	11,300	45,000	60,672
Cavalry, 8 regiments (50 squadrons) . . . . .	273	38	3,840	2,500	6,651
Field Artillery, 6 regiments and 1 corps (69 batteries) and 3 Horse Artillery batteries . . . . .	451	145	3,120	5,500	9,216
Position Artillery, 1 regiment and 1 bat- tery (7 batteries) . . . . .					
Garrison Artillery, 1 regiment (10 com- panies) . . . . .					
Engineers, 4 corps (16 companies) . . . . .	128	42	475	1,700	2,345
Train and Medical Service, 6 corps and 1 company (19 companies) . . . . .	90	42	642	3,160	3,874
Intendance . . . . .	—	200	100	650	850
<b>Total Peace establishment . . . . .</b>	<b>2,297</b>	<b>614</b>	<b>22,477</b>	<b>58,450</b>	<b>83,838</b>

The total number of horses was 10,479.

The total numbers on the rolls amount to about 485,000.

The strength of the reserve of officers and voluntarily enlisted men amounts to about 26,250, that of the Beväring to about 275,000.

The Landstorm is supposed to amount to about 170,000 of all ranks.

The Swedish infantry are armed with the Mauser rifle (calibre 6.5 mm.); the horse and field artillery have the Krupp 7.5 cm. Q.F. gun. The military budget for 1917 amounted to 112,234,500 kronor for the army, 45,230,200 kronor for the navy, and 15,024,965 kronor as special expenditure for defence.

NAVY.

The following is a list of the principal ships:—

Laid down	Name	Displacement tons	Maximum armour		Armament	Torpedo tubes	Indicated horse power	Maximum speed knots
			On belt	On guns				
1884	Svea . . . . .	3,300	11½	7½	1 8·2-in. ; 7 6-in. .	1	4,750	16
1889	Göta . . . . .	3,390						
1891	Thule . . . . .	3,300						
1895	Oden . . . . .	3,300

1900	Vasa . . . . .	3,750	7	7½	2 8·2-in. ; 6 6-in. .	2	5,500	17
	Tapperheten . . . . .	3,750	7	7½	2 8·2-in. ; 6 6-in. .	2	5,500	17
1901	Manligheten . . . . .	3,750	7	7½	2 8·2-in. ; 6 6-in. .	2	5,500	17
1904	Oscar II. . . . .	4,660	6	7½	2 8·2-in. ; 8 6-in. .	2	9,000	18
1904	Fylgia . . . . .	4,810	4	5	8 6-in. . . . .	2	12,400	22
1912	Sverige . . . . .	7,100	8	8	4 11-in. ; 8 6-in. .	2	20,000	22·5
1915	Gustaf V. . . . .	7,100	8	8	4 11 in. ; 8 6-in. .	2	20,000	22·5
	Drottning Wilhelmina . . . . .	7,100	8	8	4 11 in. ; 8 6-in. .	2	20,000	22·5

There are 8 destroyers, 5 old torpedo-gunboats, 33 torpedo boats, and 14 submarines.

The personnel of the Royal Navy is divided into three classes, viz. : 1. The Active List ; 2. The Reserve ; 3. The *Beröring*. On the active list are 4 flag-officers, 8 commodores, 19 captains, 19 commanders, 101 lieutenant-commanders, 104 lieutenants, 51 sub-lieutenants, 681 warrant officers, and 4,000 petty officers and men, while about 310 commissioned officers belong to the Reserve.

On the active list of the Royal Coast Artillery are 1 general, 2 colonels, 3 lieutenant-colonels, 7 majors, 82 captains, 38 lieutenants, 20 sub-lieutenants, 182 warrant officers, and 1,288 petty officers and men.

The new programme of construction awaits the termination of the war. The Swedish navy, though small, is highly efficient, and will doubtless try to profit by the experience of the present contest.

## Production and Industry.

### I. AGRICULTURE.

Sweden has always been an agricultural country. In 1751 only 9·5 per cent. of the population depended for a livelihood on the various industries and commerce ; in 1840 the percentage had risen to 10·75, in 1870 it had advanced to 19·6, in 1900 to 38·8, and in 1910 to 45·8 per cent., so that to-day the population of Sweden is about equally divided in the pursuit of agriculture on the one hand and commerce and industries on the other.

The number of farms in cultivation in 1911 was 359,871 ; of these there were of 2 hectares and under, 88,967 ; 2 to 20 hectares, 230,477 ; 20 to 100 hectares, 33,189 ; above 100, 3,163. Of the total land area of Sweden 9·1 per cent. is under cultivation, 3·3 per cent. under natural meadows, and 54·2 per cent. under forests, the products of which form a staple export.

The following table shows the area and yield of the chief crops for 3 years :—

Crop	Acreage (hectares)			Produce (tons)		
	1914	1915	1916	1914	1915	1916
Wheat . . .	272,525	302,900	310,835	230,575	249,572	244,362
Rye . . .	982,275	976,650	923,685	701,054	587,618	582,433
Barley . . .	441,000	435,625	426,337	265,518	310,349	318,339
Oats . . .	1,959,100	1,993,675	1,977,147	762,871	1,325,392	1,851,194
Mixed corn .	414,500	460,150	472,235	195,742	363,270	365,107
Leguminous crops <sup>1</sup>	83,050	80,500	78,950	28,137	46,360	46,811
Potatoes . .	380,300	386,700	377,507	1,726,285	2,144,783	1,496,104
Roots <sup>2</sup> . . .	262,250	266,925	272,057	3,346,606	2,515,013	3,084,808
Hay <sup>3</sup> . . .	3,036,425	3,020,900	3,127,755	3,545,443	3,346,671	5,039,826

<sup>1</sup> Peas, beans, and vetches.

<sup>2</sup> Sugar-beet and fodder-roots.

<sup>3</sup> And fodder plants.

The value of all crops was estimated in 1914 at 1,134 million kronor, in 1915 at 1,329 and in 1916 at 1,484 million kronor. On June 1, 1916, the live stock was as follows: Horses, 701,099; head of cattle, 2,913,159; sheep and lambs, 1,198,469; pigs, 1,065,396.

## II. MINES AND MINERALS.

Mining has been from time immemorial the leading industry of Sweden, which was the biggest producer of iron in Europe until the use of coal for the manufacture of pig-iron revolutionized that industry. The lack of fossil fuel is the reason why at present mining in Lappland merely concerns itself with the raw products, though experiments made in recent years have carried the problem of electric production of iron ore a good step forward. The mining of ore from the ore-fields of central Sweden has become one of the biggest export industries of the country. There were raised in the year 1915, throughout the Kingdom, 6,883,300 tons of iron ore. The pig-iron produced amounted in 1913 to 730,257 tons, in 1914 to 639,718 tons, in 1915 to 760,701 tons; the bar iron to 516,561 tons in 1913, 441,060 tons in 1914, 537,922 tons in 1915. Of iron ore in 1913 6,439,750 tons, in 1914, 4,787,314 tons, in 1915, 5,994,000 tons were exported; of pig-iron, 208,013 in 1913, 175,400 in 1914, 302,000 in 1915. There were also raised in 1915 221 tons of gold ore, 2,671 tons of silver and lead ore, 10,549 tons of copper ore, 55,937 tons of zinc ore, 7,607 tons of manganese ore, and 76,324 tons of sulphur pyrites. The gold produced amounted to 37,349 kilograms, the silver to 753.7, the lead to 1,917,678, the copper to 4,561,584, the zinc to 8,588,384. There are not inconsiderable veins of coal in the southern parts of Sweden, giving 412,261 tons of coal in 1915. In 1915 there were 46,863 persons (4,413 young people under 18) engaged in mining.

## III. INDUSTRIES.

The industries of Sweden are spread fairly well over the whole country. The mining of iron ore has reached its highest perfection north of the Polar circle, and the most important sawmills are located along the shores of the Gulf of Bothnia. The production of iron and steel has taken place in central Sweden since the earliest times in Swedish history; pig iron is produced chiefly in Sandviken, Domnarvet, Uddeholm, and Fagersta. Cream separators, lighthouse apparatus, telephone supplies, motors, and many kinds of electrical machinery are among the highly specialised products of the metallurgical industries. The porcelain factories of Rörstrand and Gustavsberg and the glass factories of Kosta and Rejmyre produce wares that have achieved a high reputation in the markets of the world. Innumerable

factories for the production of finished products are scattered all over the countryside. Of the workmen employed in the industries of Sweden, those who reside in the country exceed in number the workmen who live in towns.

The timber and wood-work industries of Sweden are of great importance. The public forests (mostly on crown-lands), have an area of 8,147,672 hectares (not including settlement and crown-farm forests amounting in 1915 to an area of 626,843), and yielded, in 1915, 5,378,789 cubic metres of timber. In 1914 there were in Sweden 1,101 saw mills and planing mills with 42,173 workpeople who turned out sawn or planed timber to the value of 196,178,605 kronor; 443 factories for joinery and furniture with 10,450 workpeople, the output for the year being valued at 30,825,084 kronor; 119 factories for wood-pulp with 12,266 workpeople, output 106,536,372 kronor; and 68 paper and pasteboard mills with 11,175 workpeople, output 66,364,315 kronor. The extent of some other Swedish industries in 1914 is shown in the following table:—

Branch of industry	Factories	Workpeople	Value of output
			Kronor
Bar-iron and steel works . . . . .	121	21,728	125,784,695
Iron and steel-goods factories . . . . .	310	13,804	51,299,738
Mechanical workshops . . . . .	622	41,739	195,477,617
Wharfs and dock-yards . . . . .	29	7,068	24,125,242
Metal-goods factories <sup>1</sup> . . . . .	141	5,549	34,303,896
Stone-quarries and -dressing works . . . . .	268	12,593	16,076,026
Brick works . . . . .	251	8,891	15,946,419
Floor and grain mills . . . . .	688	2,888	130,628,009
Spirit factories . . . . .	132	901	33,891,494
Malt-liquor breweries . . . . .	372	5,916	46,498,242
Tobacco factories . . . . .	84	4,680	28,764,966
Dairies . . . . .	1,263	3,850	80,563,044
Margarine factories . . . . .	23	656	28,457,543
Cotton-spinning and -weaving works . . . . .	62	13,258	60,845,975
Wool-spinning and -weaving works . . . . .	121	11,323	63,649,807
Tanneries . . . . .	128	1,879	36,330,073
Shoe factories . . . . .	87	8,301	49,092,265
Match factories . . . . .	17	7,343	19,832,115
Other chemical industry works . . . . .	107	2,597	22,174,888
Electric-power works . . . . .	238	1,888	30,474,715

<sup>1</sup> Manufacture of metals other than iron.

In 1914, 265,873 men, 52,425 women, 34,186 boys, and 12,361 girls (under 18 years of age) were employed in factories.

### Commerce.

The total customs-duties levied in 1911 amounted to 61,075,460 kronor, in 1912 to 65,218,399 kronor, in 1913 to 70,549,758 kronor, in 1914 to 59,942,241 kronor, and in 1915 to 56,157,242 kronor.

The treaty of peace and commerce between England and Sweden of 1654 provides for the "most favoured nation" treatment between the two countries, and that of 1826 provides for similar treatment between the United Kingdom on the one hand, and Sweden and Norway on the other.

The imports and exports of Sweden, unwrought gold and silver and coin not included, have been as follows (18'16 kronor = £1) —

—	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . . . .	38,020,306	43,110,900	46,615,505	40,024,964	62,913,269
Exports . . . . .	36,538,325	41,876,069	45,008,097	42,530,566	72,487,024

The following were the values of the leading imports and exports for two years, unwrought gold and silver and coin not included :—

	Imports 1914	Exports 1914	Imports 1915	Exports 1915
	Kronor	Kronor	Kronor	Kronor
Textile manufactures . . . . .	53,923,890	9,864,326	62,772,523	37,745,233
Corn and flour . . . . .	51,611,601	6,416,744	133,187,548	906,339
Colonial wares . . . . .	50,780,416	1,697,978	61,381,180	19,112,605
Raw textile material and yarn . . . . .	67,534,283	10,612,476	180,310,543	104,111,342
Minerals, of imports mostly coal . . . . .	125,999,727	71,245,208	196,086,559	105,899,685
Metal goods, machinery, &c. . . . .	89,717,849	92,210,652	83,470,748	156,085,097
Live animals and animal food . . . . .	21,242,573	115,988,521	37,892,277	182,874,374
Hair, hides and other animal products . . . . .	38,305,721	24,816,020	67,859,567	28,341,875
Metals, raw and partly wrought . . . . .	47,711,121	71,430,185	84,747,799	136,940,244
Timber, wrought and unwrought . . . . .	12,097,449	174,968,260	8,485,318	235,597,883
Wood pulp, paper and paper manufactures . . . . .	4,786,682	137,623,511	5,888,492	164,129,024
Other articles . . . . .	160,139,561	55,451,192	220,422,411	145,521,198
Total . . . . .	726,907,873 (10,027,967.1)	772,355,073 (42,530,566.1)	1,142,504,965 (62,913,269.1)	1,316,364,399 (72,487,026.1)

Prior to 1914 the values of imports and exports were calculated according to average prices in Swedish port, exclusive of Customs duties. For most of these average prices merchants were consulted by the Board of Trade (Kommers-Kollegium). Since Jan. 1, 1914, returns as to value must be given by the importers and exporters themselves for all goods (the so-called declared value). Imports are recorded as from the country of consignment, and exports as to the country of ultimate destination.

A new Swedish tariff law came into effect December 1, 1911. It provides for a single tariff instead of the maximum and minimum tariffs till then in effect, and authorises the Government to retaliate for discrimination against Swedish products by imposing surtaxes up to 100 per cent. of duty on dutiable goods, and up to the full value of the goods in the case of articles admitted free of duty under the tariff.

A national Swedish trade-mark was introduced (1911) by Sveriges Allmänna Handelsförening (General Commercial Association of Sweden). The upper half of the mark shows the three royal Swedish crowns, on a light-blue ground, and the words "Svensk Tillverkning" (Swedish manufacture) are shown on a light-yellow ground below.

The following table shows the value of the trade with the principal countries with which Sweden deals :—

Country.	Imports from (1912)	Exports to (1912)	Imports from (1913)	Exports to (1913)	Imports from (1914)	Exports to (1914)
	Kronor	Kronor	Kronor	Kronor	Kronor	Kronor

Packing paper	790,776	1,118,411	New ships	534,700	—
Wood pulp	2,707,051	3,092,748	Tin	204,072	301,879

Total trade between Sweden and U.K. (in thousands of pounds) for 5 years (Board of Trade returns) :—

	1912	1913	1914	1915	1916
Imports from Sweden to U.K.	13,236	14,212	14,124	19,801	20,596
Exports to Sweden from U.K.	7,137	8,220	7,768	6,278	6,561

### Shipping and Navigation.

The Swedish mercantile marine engaged both in the home and foreign trade on January 1, 1915, was as follows :—

January 1, 1915	Sailing		Steam and Motor		Total	
	No.	Gross Tonnage	No.	Gross Tonnage	No.	Gross Tonnage
20-500 tons	1,471	144,356	778	129,798	2,249	274,154
500-1,000 "	29	21,936	154	111,591	183	133,527
1,000-2,000 "	8	9,760	266	381,906	274	391,666
Above 2,000 tons	1	2,094	138	446,277	139	448,338
Total	1,509	178,146	1,336	1,069,539	2,845	1,247,685

On January 1, 1917 Sweden had 2,801 ships of a total tonnage of 1,128,435.

The port of Göteborg had the largest shipping in the beginning of 1915—namely, 302 vessels of 227,081 tons; and next to it came Stockholm, possessing 305 vessels of a total burthen of 194,359 tons.

Vessels entered from and cleared for foreign countries, with cargoes and in ballast, in 1914, as follows :—

1914	With Cargoes		In Ballast		Total	
	No.	Net Tonnage	No.	Net Tonnage	No.	Net Tonnage
Entered :						
Swedish	10,711	5,475,778	6,346	964,734	17,057	6,440,512

Total cleared	28,455	11,022,435	5,951	1,546,562	34,406	12,568,997
Total entered & cleared 1914	51,395	21,199,738	17,315	3,915,085	68,710	25,114,823

### Internal Communications.

In 1914 129,712 ships and boats passed through the canals of Sweden.

At the end of 1915 the total length of railways in Sweden was 9,228 miles, of which 3,044 miles belonged to the State. The receipts of the State railways in 1915 were 118 million kronor, and expenses 90·6 million kronor. The total cost of construction for the State railways to the end of 1915 was 652,307,000 kronor, and for private railways in 1914 598,346,000 kronor. The total number of passengers on the State railways in 1915 was 26,800,000; weight of goods 16,850,000 tons; private railways in 1915, 30,202,000 tons of goods, and 43,368,000 passengers.

The length of the telegraph lines at the end of 1915 was 40,821 miles, 19,121 miles of which belonged to the railways. The State telephone lines had a length of 226,689 miles, the private telephone lines a length of 117,879 miles. There were 3,075 telegraph offices. The number of messages sent in sent in the year 1915 was 7,005,108, including 1,525,339 in transit. In 1915 there were 271,797 instruments employed in the telephone service, including 86,529 private telephones.

The Swedish Post Office carried 513,941,000 letters, post-cards, journals, &c., in the year 1915. The number of post-offices at the end of the year was 3,938. The total receipts of the Post Office in 1915 amounted to 29,614,040 kronor, and the total expenditure to 24,572,257 kronor, leaving a surplus of 5,041,783 kronor.

### Money and Credit.

The Riksbank, or National Bank of Sweden, belongs entirely to the State and is managed by directors elected for three years by the Diet, except one, the president, who is designated by the King. It is a bank of exchange to regulate financial relations with foreign countries; it accepts deposits of money, and on sufficient security it lends money for purposes in which there is no speculative element. The Bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and its assets in current accounts at home and abroad; but its actual circulation is kept far within this limit.

The following table gives statistics of the National Bank, and private banks (joint-stock banks included) in Sweden for January 1, 1916 (18·16 kronor = 1l.). There are 14 conjointly responsible private banks and 52 joint-stock banks (beginning of 1916). Since December 31, 1903, only the Riksbank has the right to issue notes:—

Assets	The Riksbank	Other Banks	Total

The savings-banks statistics (exclusive of Post Office) are as follows :—

—	1912	1913	1914	1915
Number of depositors at end of year	1,664,163	1,717,694	1,755,009	1,807,498
Deposits at end of year, kronor	901,237,925	952,605,043	985,689,261	1,065,445,871
Capital and reserve fund, ditto.	76,173,613	80,389,720	84,493,443	87,843,652

At the end of 1915 the Post Office Savings Bank had 582,829 depositors and 47,856,089 kronor of deposits.

The Private and Joint-Stock Banks also act as Savings Banks. Their statistics of depositors and deposits are as follows :—

—	1912	1913	1914	1915
Number of depositors at end of year	920,950	986,342	1,045,308	1,126,056
Deposits at end of year, kronor	329,853,735	349,420,213	371,557,265	425,274,744

## Money, Weights, and Measures.

By a treaty signed May 27, 1873, with additional treaty of October 16, 1875, Sweden, Norway, and Denmark adopted the same monetary system.

The Swedish Krona, of 100 öre, is of the value of 1s. 1½d., or about 18 kronor to the pound sterling.

The gold 20-kronor piece weighs 8·960572 grammes, .900 fine, containing 8·0645 grammes of fine gold, and the silver krona weighs 7·5 grammes, .800 fine, containing 6 grammes of fine silver. Bronze coins were issued in December, 1916.

The standard of value is gold. National Bank notes for 1, 5, 10, 50, 100, and 1000 kronor are legal means of payment, and the Bank is bound to exchange them for gold on presentation. The 1 kronor notes were issued in September, 1914.

No gold coins were made at the Swedish mint during 1915, but 9,304,841 silver and bronze coins, with a nominal value of 1,999,772 kronor were issued in 1916.

The metric system of weights and measures is obligatory.

## Diplomatic Representatives.

### 1. OF SWEDEN IN GREAT BRITAIN.

*Envoy Extraordinary and Minister Plenipotentiary.*—Count H. Wrangel, G.C.V.O. (appointed May 10, 1906).

*Councillor.*—W. Boström, M.V.O.

*Second Secretary.*—E. K. F. Liljewalch.

*Military Attaché.*—Major E. Mossberg.

*Commercial Attaché.*—E. G. Sahlin.

*Chancellor.*—J. Stille.

*Consul-General in London.*—Daniel Danielsson.

There are Consular representatives at the following places:—Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Dundee, Glasgow, Hartlepool, Hull, Leith, Liverpool, Manchester, Newcastle, Southampton, and many other places.

### 2. OF GREAT BRITAIN IN SWEDEN.

*Envoy and Minister.*—Sir Esme W. Howard, K.C.M.G., C.V.O. (April 15, 1913).

*Secretaries.*—R. H. Clive and Sir C. A. F. Kennard.

*Naval Attaché.*—Captain M. W. W. P. Consett, R.N.

*Military Attaché.*—Lt.-Col. E. T. Eardley-Russel, M.V.O., R.A.

*Consul at Stockholm.*—W. A. Churchill.

There are also Consular representatives at Gothenburg, Borgholm, Gälle, Kalmar, Söderhamn, Visby, Varberg, &c.

## SWITZERLAND.

(SCHWEIZ.—SUISSE.—SVIZZERA.)

### Constitution and Government.

#### I. CENTRAL.

ON August 1, 1291, the men of Uri, Schwyz, and Lower Unterwalden entered into a defensive League. In 1353 the League included eight members, and in 1513 thirteen. Various allied and subject territories were acquired either by single cantons or by several in common, and in 1648 the League became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution and out of the lands formerly allied or subject increased the number of cantons to nineteen. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia, and Russia, and the Federal Pact which had been drawn up at Zürich, and which included three new cantons, was accepted by the Congress of Vienna. The Pact remained in force till 1848, when a new constitution, prepared without foreign interference, was accepted by general consent. This, in turn, was, on May 29, 1874, superseded by the constitution which is now in force.

The constitution of the Swiss Confederation may be revised either in the ordinary forms of Federal legislation with compulsory *referendum*, or by direct popular vote, a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand (called the *popular initiative*) of 50,000 citizens with the right to vote. The Federal Government is supreme in matters of peace, war, and treaties; it regulates the army, the railway, postal and telegraph systems, the coining of money, the issue and repayment of bank notes, and the weights and measures of the Republic. It legislates on matters of civil capacity, copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidise, besides the Polytechnic School at Zürich, a Federal University and other higher educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests, and the construction of railways.

The supreme legislative and executive authority are vested in a parliament of two chambers, a 'Ständerath,' or State Council, and a 'Nationalrath,' or National Council. The first is composed of forty-four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. Their remuneration depends on the wealth and liberality of the cantons, the average being about 20 francs (16s.) per day; representatives from the canton of Geneva receive 30 francs (25s.), from Uri and from Unterwalden 15 francs (12s. 6d.) per day. The mode of their election and the term of membership depend

entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land; Appenzell into Ausser Rhoden and Inner Rhoden; and Unterwald into Obwald and Nidwald. Each of these parts of cantons sends one member to the State Council, so that there are two members to the divided as well as to the undivided cantons. The 'Nationalrath' consists of 189 representatives of the Swiss people, chosen in direct election, at the rate of one deputy for every 20,000 souls. The members are paid from Federal funds at the rate of 20 francs for each day on which they are present, with travelling expenses, at the rate of 20 centimes (2*d.*) per kilometre, to and from the capital. Members employed on commissions receive additional pay at the same rate. On the basis of the general census 1910, the cantons are represented in the National Council as follows:—

Canton	Number of Representatives	Canton	Number of Representatives
Zürich (Zurich)	25	Appenzell—Exterior and Interior	4
Bern (Berne)	32	St. Gallen (St. Gall)	15
Luzern (Lucerne)	8	Graubunden (Grisons)	6
Uri	1	Aargau (Argovie)	12
Schwyz	3	Thurgau (Thurgovie)	7
Unterwald—Upper and Lower	2	Ticino (Tessin)	8
Glarus (Glaris)	2	Vaud (Waadt)	16
Zug (Zoug)	1	Valais (Wallis)	6
Fribourg (Freiburg)	7	Neuchâtel (Neuenburg)	7
Solothurn (Soleure)	6	Genève (Genf)	8
Basel (Bâle)—town and country	11	Total	189
Schaffhausen (Schaffhouse)	2		

A general election of representatives takes place by ballot every three years. Every citizen of the Republic who has entered on his twenty-first year is entitled to a vote; and any voter, not a clergyman, may be elected a deputy. Both chambers united are called the 'Bundes-Versammlung,' or Federal Assembly, and as such represent the supreme Government of the Republic. The first step towards legislative action may be taken by means of the *popular initiative*, and laws passed by the Federal Assembly may be vetoed by the popular voice. Whenever a petition demanding the revision or annulment of a measure passed by the Legislature is presented by 30,000 citizens, or the alteration is demanded by eight cantons, the law in question must be submitted to the direct vote of the nation. For the decision of the question submitted a majority both of the cantons and of the voters is required. This principle, called the *referendum*, is frequently acted on. The chief executive authority is deputed to a 'Bundesrath,' or Federal Council, consisting of seven members, elected for three years by the Federal Assembly. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. It is only through this executive body that legislative measures are introduced in the deliberative councils, and its members are present at and take part in their proceedings, but

do not vote. Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Confederation and the Vice-President of the Federal Council are the first magistrates of the Confederation. Both are elected by the Federal Assembly in joint session of the National and State councils for the term of one year, January 1 to December 31, and are not re-eligible to the same offices till after the expiration of another year. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

*President of the Confederation* for 1917.—Edmund *Schulthess* (Aargau). Born, 1868.

*Vice-President of the Federal Council* for 1917.—Felix Ludwig *Calonder* (Graubünden). Born, 1863.

The seven members of the Federal Council—each of whom has a salary of 480*l.* per annum, while the President has 540*l.*—act as ministers, or chiefs of the seven administrative departments of the Republic. These departments are :—1. Foreign Affairs. 2. Interior. 3. Justice and Police. 4. Military. 5. Finance and Customs. 6. Agriculture and Industry (*Economie publique*). 7. Posts and Railways. The city of Bern is the seat of the Federal Council and the central administrative authorities.

## II. LOCAL GOVERNMENT.

Each of the cantons and demi-cantons of Switzerland is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; each has its local government, different in its organisation in most instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons, the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the *Landsgemeinden*, exist in Appenzell, Glarus, Unterwald, and Uri. In all the larger cantons, there is a body chosen by universal suffrage, called the *Grosse Rath*, which exercises all the functions of the *Landsgemeinden*. In all the cantonal constitutions, however, except that of Freiburg and those of the cantons which have a *Landsgemeinde*, the *referendum* has a place. This principle is most fully developed in Zurich, where all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revision of the constitution, must be submitted to the popular vote. In many of the cantons, the *popular initiative* has also been introduced. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow-citizens, or receive a merely nominal salary. In each canton there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungstatthalter*) representing the canton. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, *maire* or *syndic*, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

## Area and Population.

### I. PROGRESS AND PRESENT CONDITION.

Area and population, December 1, 1910, and estimated population at the middle of 1915. The cantons are given in the official order, and the year of the entrances of each into the league or confederation is stated :—

Canton	Area : sq. miles	Population		Pop. per square mile, 1910
		Dec. 1, 1910	July 1, 1915	
Zürich (Zurich) (1351)	666	500,679	538,340	751.7
Bern (Berne) (1353)	2,657	612,744	665,090	241.9
Luzern (Lucerne) (1332)	579	166,782	172,870	288.0
Uri (1291)	415	22,055	22,850	53.1
Schwyz (1291)	351	58,347	59,340	166.2
Obwalden (Unterwalden-le-Haut) (1291)	183	17,118	17,740	93.5
Nidwalden (Unterwalden-le-Bas) (1291)	112	13,796	14,010	123.1
Glarus (Glaris) (1352)	267	33,211	33,610	124.3
Zug (Zoug) (1352)	92	28,013	29,090	304.5
Fribourg (Freiburg) (1481)	644	139,200	143,650	216.1
Solothurn (Soleure) (1481)	302	116,728	122,740	386.5
Basel-Stadt (Bâle-V.) (1501)	14	135,546	141,930	9,681.9
Basel-Land (Bâle-C.) (1501)	163	76,241	78,930	467.7
Schaffhausen (Schaffhouse) (1501)	114	45,943	47,970	403.0
Appenzell A.-Rh. (Ext.) (1513)	101	57,723	59,100	572.0
Appenzell I.-Rh. (Int.) (1513)	61	14,631	14,910	239.8
St. Gallen (St. Gall) (1803)	779	301,141	305,070	385.0
Graubünden (Grisons) (1803)	2,773	118,262	120,520	42.6
Aargau (Argovie) (1803)	542	229,850	238,030	424.0
Thurgau (Thurgovie) (1803)	381	131,055	140,870	351.8
Ticino (Tessin) (1803)	1,088	158,556	161,790	145.7
Vaud (Waadt) (1803)	1,244	315,128	323,940	253.5
Valais (Wallis) (1815)	2,027	129,579	131,140	63.9
Neuchâtel (Neuenburg) (1815)	312	132,184	133,390	423.6
Genève (Genf) (1815)	108	154,159	163,280	1,427.3
Total	15,976	3,741,971	3,880,500	234.8

The German language is spoken by the majority of inhabitants in 19 of the 25 cantons, the French in five (Fribourg, Vaud, Valais, Neuchâtel and Genève), the Italian in one (Ticino). In 1910, 2,594,298 spoke German, 793,264 French, 302,578 Italian, 40,122 Romansch, and 23,031 other languages.

The number of foreigners resident in Switzerland in 1910 was 552,011, of whom 219,530 were Germans, 63,695 French, 202,809 Italians, 4,118 English, 37,641 Austrians, 2,363 Hungarians, and 8,457 Russians.

For the preliminary results of the Swiss Federal census of 1911 regarding Swiss factory enterprises. *see* THE STATESMAN'S YEAR-BOOK for 1916, p. 1389.

## II. MOVEMENT OF POPULATION.

Years	Total Births	Stillbirths	Marriages	Deaths and Stillbirths	Surplus of Births over Deaths
1910	96,669	8,154	27,346	59,678	36,991
1911	94,185	2,865	27,809	62,484	31,701
1912	95,171	2,975	27,843	57,077	38,094
1918	92,608	2,846	26,841	58,273	34,336
1914	90,128	3,798	32,245	56,427	33,701

In 1914 the illegitimate births numbered 4,556, or 5·1 per cent. The number of divorces was 1,616.

The number of emigrants in five years was:—In 1912, 5,871; in 1913, 6,191; in 1914, 3,869; in 1915, 1,976 (1,547 to the United States, 156 to Argentina, and 12 to Canada); in 1916, 1,464.

### III. PRINCIPAL TOWNS.

In 1916 the estimated population of the principal towns was as follows (the figures in brackets being the census population of 1910):—Zürich, 200,200 (189,088); Basel, 137,000 (131,914); Geneva, 131,500 (125,520); Bern, 96,900 (85,264); Lausanne, 67,500 (63,926); St. Gallen, 71,400 (75,482); Chaux-de-Fonds, 37,900 (37,656); Luzern, 41,600 (39,152); Biel, 24,500 (23,583); Winterthur, 26,000 (25,066); Neuchâtel, 23,700 (23,505).

### Religion.

There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The order of Jesuits and its affiliated societies cannot be received in any part of Switzerland; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action is dangerous to the State, or interferes with the peace of different creeds. The foundation of new convents or religious orders is forbidden.

According to the census of December 1, 1910, the number of Protestants amounted to 2,107,814, of Roman Catholics to 1,593,538, and of Jews to 18,462. Protestants are in a majority in 12 of the cantons, and Catholics in 10. Of the more populous cantons, Zürich, Bern, Vaud, Neuchâtel, and Basel (town and land) are mainly Protestant, while Luzern, Fribourg, Ticino, Valais and the Forest Cantons are mainly Catholic. The Roman Catholic priests are much more numerous than the Protestant clergy, the former comprising more than 6,000 regular and secular priests. They are under five bishops, viz., of Basel and Lugano (resident at Solothurn), Chur, St. Gallen, Lausanne and Geneva (resident at Freiburg), and Sitten (Sion), all of them immediately subject to the Holy See. The government of the Protestant Church, Calvinistic in doctrine and Presbyterian in form, is under the supervision of the magistrates of the various cantons, to whom is also entrusted, in the Protestant districts, the superintendence of public instruction.

### Instruction.

In the educational administration of Switzerland there is no centralization. Before the year 1848 most of the cantons had organized a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory (the school age varying in the different cantons), and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In the north-eastern cantons, where the inhabitants are mostly Protestant, the proportion of the school-attending children to the whole population is as one to five; while in the half-Protestant and half-Roman Catholic cantons it is as one to seven; and in the entirely Roman Catholic cantons as one to nine. The compulsory law has

hitherto not always been enforced in the Roman Catholic cantons, but is rigidly carried out in those where the Protestants form the majority of inhabitants. In every district there are primary schools, and secondary schools for youths of from twelve to fifteen. Of the contingent for military service in 1912, 0·6 per thousand could not read.

The following are the statistics of the various classes of educational institutions for 1912:—4,396 primary schools with 12,324 teachers (7,410 men and 4,914 women), and 543,216 pupils (272,420 boys and 270,796 girls); the secondary schools had 23,618 boys and 21,254 girls with 1,662 men and 427 women teachers; the middle schools had 19,892 boys and 9,233 girls with 1,838 men and 274 women teachers. In 1912 there were also 177 commercial schools, 402 technical schools, schools for the instruction of girls in domestic economy and other subjects; agricultural schools with 1,036 pupils; schools for horticulture, for viticulture, for arboriculture, and for dairy management. In 1914, 12 institutions for the blind had 368 inmates; 15 for the deaf and dumb had 824; 28 for the feeble-minded had 1,552. In the 37 reformatories of Switzerland in 1914, there were 1,582 children under instruction. In 1914 the expenditure of the State on primary education was 2,357,528 francs.

There are seven universities in Switzerland. These universities are organised on the model of those of Germany, governed by a rector and a senate, and divided into four 'faculties' of theology, jurisprudence, philosophy, and medicine. There is a Polytechnic School, maintained by the Federal Government, at Zürich, with a teaching staff of 252 and 1,376 matriculated students, in 1914. The academy of Neuchâtel was transformed into a university in May, 1909, but without the faculty of medicine. The following table shows the year of foundation of each university, the number of teaching staff and of matriculated students in the various branches of study in each of the seven universities in the summer of 1915:—

	Theology	Law	Medicine	Philosophy	Total	Teaching Staff
Basel (1460)	76	83	322	484	965	134
Zürich (1832)	38	368	733	596	1,735	175
Bern (1834)	48	543	725	626	1,942	174
Geneva (1559 <sup>1</sup> & 1873 <sup>2</sup> )	14	119	517	313	1,963	151
Lausanne (1537 <sup>1</sup> & 1896 <sup>2</sup> )	13	118	236	475	822	122
Fribourg (1889)	155	67	—	149	371	78
Neuchâtel (1866 <sup>1</sup> & 1909) <sup>2</sup>	11	76	—	118	205	63

<sup>1</sup> As an Academy.

<sup>2</sup> As a University.

These numbers are exclusive of 'hearers,' but inclusive of over 1,100 women students.

In 1915 there were 5,798 libraries with 9,385,000 volumes.

## Justice and Crime.

The 'Bundes-Gericht,' or Federal Tribunal, which sits at Lausanne, consists of 24 members, with 9 supplementary judges, appointed by the Federal Assembly for six years and are eligible for re-election; the President and Vice-President, as such, for two years and cannot be re-elected.

The President has a salary of 16,000 francs a year, and the other members 15,000 francs. The Tribunal has three sections, to each of which is assigned the trial of suits in accordance with regulations framed by the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons; between cantons and cantons; between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 3,000 francs; between parties who refer their case to it, the value in dispute being at least 3,000 francs; and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a Court of Appeal against decisions of other Federal authorities, and of cantonal authorities applying Federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into four chambers: the Chamber of Accusation, the Criminal Chamber (Cour d'Assises), the Federal Penal Court, and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid ten francs a day when serving.

Each canton has its own judicial system for ordinary civil and criminal trials.

On December 31, 1914, the prison population (condemned) of Switzerland consisted of 4,539, of whom 564 were women.

Capital punishment exists in Appenzell-I.-Rh., Obwalden, Uri, Schwyz, Zug, St. Gallen, Luzern, Wallis, Schaffhausen, and Freiburg.

### Social Insurance.

The Swiss Federal Insurance Law (insurance against illness and accident), as passed by both Chambers on June 13, 1911, was accepted by the electors of the Republic with a small majority. The total number of votes cast was 523,731, of which 285,037 were for and 238,694 against the measure.

All Swiss citizens are entitled to insurance against illness, and foreigners also may be admitted to the benefits of the law. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled under the act to declare obligatory insurance for certain classes or, in general, to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees.

Insurance against accident is compulsory for all officials, employees, and workmen of all the factories, trades, &c., which are under the Federal liability law. Every person above the age of 14 can insure voluntarily at the Federal insurance administration (or at any insurance corporation).

### Finance.

The entire net proceeds of the Federal alcohol monopoly (225,907*l.* in 1917) are divided among the cantons, and they have to expend one-tenth of the amount received in combating alcoholism in its causes and effects. Of the proceeds of the tax for exemption from military service, levied through the cantons, one-half goes to the Confederation and the other to the cantons.

Revenue and expenditure for six years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1911	3,921,764	3,931,842	1914	3,132,428	4,033,753
1912	4,033,544	4,087,320	1915	3,105,054	3,907,114
1913	3,998,284	4,212,424	1916 <sup>1</sup>	6,088,704	7,551,773

<sup>1</sup> Estimates.

The following table gives the budget estimates for 1917 :—

Source of Revenue	Francs	Branch of Expenditure	Francs
Capital invested . . . . .	9,205,845	Debt, Total Charge . . . . .	40,607,250
General administration . . . . .	111,700	General administration . . . . .	1,547,550
Departments :—		Departments :—	
Political . . . . .	598,000	Political . . . . .	2,071,175
Interior . . . . .	9,950	Interior . . . . .	12,155,753
Justice and Police . . . . .	570,000	Justice and Police . . . . .	1,749,360
Military . . . . .	1,453,500	Military . . . . .	37,009,774
Finance and Customs . . . . .	64,483,170	Finance and Customs . . . . .	9,594,490
Commerce, Industry, and Agriculture . . . . .	1,881,600	Commerce, Industry, and Agriculture . . . . .	14,245,361
Posts and Railways . . . . .	88,689,700	Posts and Railways . . . . .	93,408,351
Miscellaneous . . . . .	2,568,535	Miscellaneous . . . . .	3,652,436
Total . . . . .	169,872,000 (8,794,880 <i>l.</i> )	Total . . . . .	216,042,000 (8,641,680 <i>l.</i> )

Switzerland has issued mobilization loans as follows :—(1) 1914, 30 million francs at 5 per cent. at 99; (2), 1914, 50 million francs at 5 per cent. at 100; (3) 1915, 15 million dollars at 5 per cent. in the United States; (4) 1915, 100 million francs at  $4\frac{1}{2}$  per cent. at 96 $\frac{1}{2}$ ; (5) 1916, 100 million francs at  $4\frac{1}{2}$  per cent. at 97 $\frac{1}{2}$ ; (6) 1916, 100 million francs at  $4\frac{1}{2}$  per cent. at 97; (7) 1917, 100 million francs at  $4\frac{1}{2}$  per cent. at 96.

The public debt of the Confederation amounted, on January 1, 1917, to 23,064,000*l.*, mostly at 3 $\frac{1}{2}$  per cent. The floating debt (January 1, 1917) was 8,900,000*l.*

On 1 January, 1916, the 'Federal Fortune,' or State property, was: real property, 3,790,288*l.*; stock, &c., 832,937*l.*; works producing interest, 2,505,418*l.*; stores not producing interest, 1,006,828*l.*; various debts, 321,401*l.*; inventory, 2,512,163*l.*; Swiss National Bank, 152,001*l.*; special funds, 4,817,310*l.*; war mobilization, 11,671,105*l.*; fund for purchasing foodstuffs, 2,547,253*l.*; total (including minor items), 33,161,648*l.*

### Defence.

There are fortifications on the south frontier for the defence of the St. Gothard pass; others have been constructed at St. Maurice and Martigny in the Rhone Valley.

Switzerland depends for defence upon a *national militia*. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 20th to the end of the 48th year. The first 12 years are spent in the first line, called the 'Auszug,' or 'Elite'; the next 8 in the Landwehr; and the remaining 8 in the Landsturm. For cavalry, however, service is 11 years in the Auszug, and 12 in the Landwehr. The Landsturm only includes men who have undergone some training. The unarmed Landsturm comprises all other males between 20 and 50 whose services can be made available for non-combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 65 days for infantry, engineers, and foot artillery, 75 days for field artillery, and 90 days for cavalry. The subsequent trainings, called 'repetition courses,' are 11 days *annually*; but after going through seven courses (8 in the case of the cavalry) further

attendance is excused for all under the rank of sergeant. The Landwehr men are only called out once for training, also for 11 days.

The country is divided into 6 divisional districts. The field army, formed of the *Auszug*, is to consist of 6 divisions, 3 cavalry brigades, and 3 mountain brigades. A division consists of 3 brigades each of 2 regiments consisting of 2 or 3 battalions, 1 cyclist company, 1 machine gun detachment, 12 batteries of field artillery, 2 howitzer batteries, 2 squadrons of cavalry, and 1 battalion of sappers. A cavalry brigade consists of 2 regiments. A mountain brigade consists of 2 or 3 battalions, 2 mountain batteries, and 1 company of sappers. Altogether there are 106 battalions, 72 field batteries, 12 howitzer batteries, 9 mountain batteries, and 8 cavalry regiments (each of 3 squadrons), besides 12 squadrons of divisional cavalry (guides). There is a staff organisation on paper for three army corps. There are the usual departmental troops, pontoon and railway corps, telegraph troops, &c. The total number of combatants in the field army may be taken at 140,000.

There are also *separate* forces, mostly Landwehr, for manning the fortifications which close the St. Gothard Pass and the Rhone Valley to a possible invader from the south. They amount to about 21,000 men. The Landwehr is organised in 56 battalions and 36 squadrons. Altogether Switzerland can mobilise nearly 200,000 men (combatants), irrespective of the organised Landsturm, who may amount to another 60,000.

The administration of the Swiss army is partly in the hands of the Cantonal authorities, who promote officers up to the rank of captain. But the Federal Government is concerned with all general questions, and makes all the higher appointments.

The Swiss infantry are armed with the Swiss repeating rifle. The field artillery is armed with a Q. F. shielded Krupp 7.5 cm. calibre. The 'position' artillery has batteries of 8.4 and 12 cm. guns.

The total expenditure on the army now amounts to 1,772,000*L.*, a sum relatively large, being nearly one-third of the total Federal budget.

### Production and Industry.

The soil of the country is very equally divided among the population, it being estimated that there are nearly 300,000 peasant proprietors.

Of the total area 28.4 per cent. is unproductive; of the productive area 35.8 per cent. is under grass and meadows, 29 per cent. under forest, 18.7 per cent. under fruit, 16.4 per cent. under crops and gardens. Rye, oats, and potatoes are the chief crops, but the bulk of food crops consumed in the country is imported.

The chief agricultural industries are the manufacture of cheese and condensed milk. Wine is produced in five of the cantons, tobacco in three. In 1916 (last census) there were in Switzerland, 136,613 horses, 1,615,645 cattle, 171,635 sheep, 544,021 pigs, 358,093 goats.

The Swiss Confederation has the right of supervision over the police of the forests, and of framing regulations for their maintenance. The entire forest area of Switzerland is 3,290 square miles, or 2,105,214 acres in extent (comprising 91,587 acres of cantonal forest, 1,403,772 acres belonging to municipalities and other corporations, and 609,855 acres of private forests). The district over which the Federal supervision extends lies to the south and east of a tolerably straight line from the eastern end of the Lake of Geneva to the northern end of the Lake of Constance. It comprises about 1,119,270 acres, and the Federal forest laws apply to all cantonal, communal, and municipal forests within this area, those belonging to private persons being exempt, except when from their position they are necessary for protection against climatic influences. In 1876 it was enacted that this forest area should never

be reduced; servitudes over it, such as rights of way, of gathering firewood, &c., should be bought up; public forests should be surveyed, and new wood planted where required, subventions for the purpose being sanctioned. In the year 1915, 16,169,520 trees (chiefly coniferous) were planted. The free forest districts comprise 1,477 square miles.

There were, in 1915, 212 establishments for pisciculture, which produced fry of various species to the number of 128,857,000.

Switzerland though in the main an agricultural country, has a strong tendency to manufacturing industry. There are 5 salt-mining districts; that at Bex (Vaud) belongs to the Canton, but is worked by a private company; that at Schweizerhalle (Basel) is worked by the Glenck family; those at Rheinfelden, Ryburg, and Kaiserangst (Aargau) are worked by a joint-stock company, in virtue of a concession from the Canton. The output of salt of all kinds in 1915 reached 630,473 quintals (720,043 in 1914). In 1915 there were 8,216 factories in Switzerland (8,098 in 1914). The number of persons employed (1911) was 328,841 (211,077 males and 117,764 females); the motive machinery had 515,859 horse-power. In 1915, 126 breweries produced 2,130,107 hectolitres (47,335,711 gallons) of beer.

On January 1, 1914, there were 1,859 Swiss embroidery establishments operating 8,090 embroidery machines.

### Commerce.

The special commerce, including precious metals, was as follows in five years :—

	1911	1912	1913	1914	1915
	£	£	£	£	£
Imports . . .	72,094,359	79,164,024	76,792,651	59,136,339	67,201,208
Exports . . .	50,292,374	51,304,664	58,055,964	47,475,480	66,802,248

The following table (in thousands of francs) shows the value of special commerce in 1914 and 1915 :—

Merchandise	Imports		Exports	
	1914	1915	1914	1915
	1000 Francs	1000 Francs	1000 Francs	1000 Francs
Cereals . . . . .	207,559	274,631	4,587	13,215
Fruits and vegetables . . . . .	44,624	32,183	4,960	10,059
Colonial produce . . . . .	98,802	127,244	56,191	92,334
Animal food substances . . . . .	68,759	50,961	119,700	127,105
Tobacco . . . . .	18,857	16,731	3,620	4,785
Beverages . . . . .	43,493	40,138	2,118	3,154
Animals, living . . . . .	31,945	10,106	11,597	8,002
Hides and skins . . . . .	35,305	32,647	47,060	59,073
Timber . . . . .	27,384	15,930	7,044	24,471
Cotton goods . . . . .	86,947	149,994	213,632	310,719
Linen, hemp, &c., goods . . . . .	15,671	10,828	3,418	2,845
Silk goods . . . . .	158,209	274,404	258,644	350,722
Woollen goods . . . . .	53,779	58,788	21,077	24,736
Clothing, ready made . . . . .	37,839	20,868	19,986	25,737
Mineral substances . . . . .	111,609	135,535	12,340	14,642
Iron work . . . . .	76,301	87,120	28,440	70,649
Copper work . . . . .	20,385	26,476	6,844	40,546
Machinery . . . . .	34,592	25,354	74,974	89,105
Clocks . . . . .	4,407	8,563	120,813	136,607
Chemicals . . . . .	3,824	60,184	19,088	31,668
Groase, oils, &c. . . . .	22,577	36,077	1,584	1,942
Total incl. other merchandise	1,478,408	1,680,030	1,186,887	1,670,056

In Switzerland, for the majority of imports, the values are fixed by a commission on Exports nominated by the Customs department. Up to 1891 a single value was fixed for each class of goods, but the Commission now takes into account the difference of prices in different countries of origin. For values of exports declarations are, in general, considered sufficient. Returns show the net weight, though the gross weight also is declared. It is sought to record as the country of origin the country of production, and as the country of destination that where the goods are to be consumed. When exact information is not available, the most distant known points of transit are recorded. In accordance with this system, Swiss returns show, as far as can be ascertained, the trade between the Confederation and Great Britain, though, since direct commercial intercourse is impossible, the name of Switzerland does not occur in the trade returns of the United Kingdom. The treaty of 1855 provides for the most favoured nation treatment in respect of commerce, residence and other matters affecting Swiss and British interests.

The customs duties amounted in 1913, to 85,142,151 francs; in 1914, to 65,080,410 francs; in 1915, to 54,803,829 francs; in 1916, to 60,096,993 francs.

The following table, in thousands of francs, shows the distribution of the special trade of Switzerland (including bullion but not coin) among the principal countries. Much of the trade with the frontier countries is really of the nature of transit trade:—

	Imports		Exports	
	1914	1915	1914	1915
	1,000 Francs	1,000 Francs	1,000 Francs	1,000 Francs
Germany . . . . .	481,078	418,234	274,491	457,319
France . . . . .	220,717	189,017	115,243	220,493
Italy . . . . .	194,035	258,761	82,831	89,486
Austria-Hungary . . . . .	102,901	65,698	67,172	156,574
United Kingdom . . . . .	76,181	112,035	234,191	355,124
United States . . . . .	107,779	324,435	121,894	107,162
Russia . . . . .	53,531	8,435	41,498	29,265

Total trade between Switzerland and the United Kingdom (in thousands of pounds) for five years (Board of Trade returns) —

	1912	1913	1914	1915	1916
Imports from Switzerland into U.K. . .	10,927	11,070	10,064	15,251	15,507
Exports to Switzerland from U.K. . .	4,025	4,212	2,298	3,601	4,579

### Internal Communications.

In 1916 the State railways of Switzerland had a length of 3,537 miles. There are also 34 miles of foreign railways within the Confederation. The cost of construction of the railways up to the end of 1915 was 2,290,461,396 francs (91,618,455*l.*). The receipts from traffic of all the Swiss railways amounted to 236,856,000 francs (9,474,000*l.*), of which 100,615,000 francs (4,024,600*l.*) was for passenger traffic. The traffic on the Swiss waters in 1916 was carried on by 170 boats or barges belonging to 22 companies.

In 1916 there were in Switzerland 2,099 post-offices and 1,979 letter-boxes. By the internal service there were forwarded 226,363,815 letters, 73,567,398 post-cards, 47,575,313 packets of printed matter, 1,555,318 samples, 234,913,138 newspapers, and 7,544,182 registered parcels, &c. In the international service there were forwarded 21,678,189 letters, 13,722,540 post-cards, 7,377,098 packets of printed matter, 1,155,154 samples, 10,474,997 newspapers, and 2,304,628 registered parcels, &c. Internal post-office orders were sent to the value of 1,014,675,702 francs (40,587,028*l.*). Receipts,

1916, 62,096,447 francs (2,483,857*l.*); expenditure, 63,686,623 francs (2,547,464*l.*).

Switzerland has a very complete system of telegraphs, consisting (1916) of 2,112 miles of line with 17,441 miles of wire. There were transmitted 1,854,971 inland telegrams, 3,220,604 international, and 189,582 in transit through Switzerland. Number of offices, 2,400. There were 527 telephone systems with 12,041 miles of line and 272,327 miles of wire; conversations, 83,242,030. The telegraph and telephone receipts in 1916 amounted to 27,712,419 francs (1,108,496*l.*); the expenditure to 21,504,389 francs (860,175*l.*).

### Money and Credit.

On December 31, 1916, the coin in circulation in Switzerland was as follows:—10,880,000 gold coins of the nominal value of 202,600,000 francs; 53,376,000 silver coins of the nominal value of 57,300,000 francs; 142,500,000 nickel coins of the nominal value of 13,800,000 francs; and 100,500,000 copper coins of the nominal value of 1,330,000 francs; total, 312,256,000 coins of the nominal value of 285,660,000 francs.

There were in Switzerland in 1915, 1,047 savings banks of all kinds, with 2,025,491 depositors having to their credit 61,643,239*l.*

Banks of issue are subject to Federal inspection. The new National Bank, with headquarters divided between Bern and Zurich, opened its doors on June 20, 1907. It has the exclusive right to issue banknotes in Switzerland. On March 24, 1917, the condition of the bank was as follows:—

	£		£
Bullion (gold and silver) .	15,811,392	Other assets . . . . .	438,052
Bills . . . . .	8,031,672	Notes in circulation . . .	19,884,508
Advances against securities .	714,756	Current & deposit accounts .	5,846,396
Securities . . . . .	296,396	Other securities . . . . .	550,028

### Money, Weights, and Measures.

The *Franc* of 10 *Batzen*, and 100 *Rappen* or *Centimes*.

Average rate of exchange, 25·22½ francs = £1 sterling.

The 20-franc piece is ·900 fine, the 5-franc silver piece is ·900 fine, the silver 2-franc, franc, and half-franc are ·835 fine. Switzerland belongs to the Latin Monetary Union; but since Italy is exonerated from taking back its exported fractional coin in case of the dissolution of the Union, the importation into Switzerland of 2 franc, 1 franc, and ½ franc pieces is prohibited by decree of February 21, 1899, on pain of confiscation. By a Convention of November 15, 1902, with the other States within the Union, Switzerland may coin, exceptionally, 12,000,000 francs in fractional silver pieces, but the issues must be spread over at least 6 years.

Before the war 50-franc National Bank notes were the smallest paper currency, but in consequence of the war, notes of lesser denominations have been issued, viz., 20-franc notes (by law of July 30, 1914), 5-franc notes (August 3, 1914), and 25-franc notes (Sept. 9, 1914).

The *Centner*, of 50 *Kilogrammes* and 100 *Pfund* = 110 lbs. avoirdupois. The *Quintal* = 100 *Kilogrammes* = 220 lbs. avoirdupois. The *Arpent* (Land) = 8·9ths of an acre.

The *Pfund*, or pound, chief unit of weight, is legally divided into decimal *Grammes*, but the people generally prefer the use of the old halves and quarters, named *Halbpfund*, and *Viertelpfund*.

## Diplomatic and Consular Representatives.

### 1. OF SWITZERLAND IN GREAT BRITAIN.

*Envoy and Minister.*—M. Gaston Carlin, appointed December 9, 1902.

*Counsellor.*—Ch. Paravicini.

*Attaché.*—John I. Gignoux.

*Honorary Attachés.*—Gustave de Geer and Werner Iten.

*Chancellor.*—Theo Ritter.

*Consul in Liverpool.*—George G. Weiss.

### 2. OF GREAT BRITAIN IN SWITZERLAND.

*Envoy Extraordinary and Minister Plenipotentiary.*—Sir Horace Rumbold, Bart, M. V. O., appointed August 30, 1916.

*Secretaries.*—Heron C. Goodhart and R. L. Craigie.

*Military Attaché.*—Colonel H. P. Picot (temporary).

*Commercial Attaché.*—Sir H. Austin Lee, K. C. M. G., C. B. (also at Paris)

*Honorary Attaché.*—Sir A. E. H. Naylor-Leyland, Bart.

*Consul-Generalat Zürich.*—G. B. Beak (Acting).

There are Consuls at Bern, Geneva, Lausanne, Lucerne, Davos, and St. Moritz; Vice-Consuls at Zürich, Montreaux, Bâle, St. Gall, Lugano, and Neuchâtel.

## TURKEY

(MEMALIK I OSMANIE—OTTOMAN EMPIRE.)

### Reigning Sultan.

**Mohammed V.**, born November 3, 1844 (21 Shawal 1260), son of Sultan Abdul Medjid; succeeded to the throne on the deposition of his elder brother, Sultan Abdul Hamid II., April 27, 1909.

### *Children of the Sultan.*

I. *Zia-Ed-din* Effendi, born August 25, 1873. Offspring:—Prince *Nazim* Effendi, born December 30, 1910. II. *Eunver-Hilmi* Effendi, born March 2, 1888. Offspring:—Prince *Mohammed* Effendi, born December, 1914.

### *Brothers and Sisters of the Sultan.*

Besides the deposed Sultan, Abdul Hamid, there are two surviving sisters and one brother of the reigning Sultan.

I. *Senihé* Sultana, born November 21, 1851; married the late Mahmud Pasha, son of Halil Pasha, in 1877; widow, 1903.

II. *Medihé* Sultana, born July 30, 1857; married (1) 1879, to Nedjib Pasha; widow, 1885; (2) April 30, 1886, to Ferid Pasha.

III. *Wahid-Ed-din* Effendi (Heir Apparent), born January 12, 1861. Offspring: Princess *Ulvia* Sultana, born Sept. 12, 1892; married August 10, 1916, to Ismail Hakkî Bey; and Princess *Salihâ* Sultana, born April 1, 1894.

The present sovereign of Turkey is the thirty-sixth, in male descent, of the house of Othman, the founder of the Empire, and the twenty-ninth Sultan since the conquest of Constantinople. By the law of succession obeyed in the reigning family, the crown is inherited according to seniority by the male descendants of Othman, sprung from the Imperial Harem. All children born in the Harem, whether offspring of free women or of slaves, are legitimate and of equal lineage. A Council presided over by the heir apparent and comprising several State dignitaries, the Grand Vizier, the Sheykh-ul-Islam, and others, was instituted in January, 1914, to regulate all matters relating to the Imperial family, including the Damads or persons married to Imperial princesses, under the theoretical supervision of the Sultan.

It has not been the custom of the Sultans of Turkey for some centuries to contract regular marriages. The inmates of the Harem come, by purchase or free will, mostly from districts beyond the limits of the empire, the majority from Circassia. From among these inmates the Sultan designates a certain number, nowadays very limited, to be called *Kadin*, or full wives. The title is only given after a child has been born to the Sultan. Ladies of inferior standing on whom the Sultan has looked with favour are called *Ikbal*, and girls in course of training in the Harem are called *Odalik*. The superintendent of the Harem, always an aged Lady of the Palace, and bearing the title of 'Haznadar-Kadin,' has to keep up intercourse with the outer world through the Guard of Eunuchs.

The following is a list of the names, with date of accession, of the thirty-

four sovereigns who have ruled Turkey since the foundation of the empire and of the reigning house :—

*House of Othman.*

Othman . . . . .	1299	Murad IV., 'The Intrepid' . . . . .	1623
Orkhan . . . . .	1326	Ibrahim . . . . .	1640
Murad I. . . . .	1359	Mohammed IV. . . . .	1648
Bayezid I., 'The Thunder-bolt' . . . . .	1389	Suleiman II. . . . .	1687
Interregnum . . . . .	1402	Ahmed II. . . . .	1691
Mohammed I. . . . .	1413	Mustafa II. . . . .	1695
Murad II. . . . .	1421	Ahmed III. . . . .	1703
Mohammed II., Conqueror of Constantinople . . . . .	1451	Mahmud I. . . . .	1730
Bayezid II. . . . .	1481	Othman III. . . . .	1754
Selim I. . . . .	1512	Mustafa III. . . . .	1757
Suleiman I., 'The Magnificent' . . . . .	1520	Abdul Hamid I. . . . .	1773
Selim II. . . . .	1566	Selim III. . . . .	1789
Murad III. . . . .	1574	Mustafa IV. . . . .	1807
Mohammed III. . . . .	1595	Mahmud II. . . . .	1808
Ahmed I. . . . .	1603	Abdul-Medjid . . . . .	1839
Mustafa I. . . . .	1617	Abdul-Aziz . . . . .	1861
Othman II. . . . .	1618	Murad V. (May 30) . . . . .	1876
		Abdul-Hamid II. (Aug. 31) . . . . .	1876
		Mohammed V. (April 27) . . . . .	1909

The civil list of the Sultan is variously reported at from one to two millions sterling. To the Imperial family belong a great number of crown domains, the income from which contributes to the revenue.

### Constitution and Government.

Forms of constitution, after the model of the West European States, were drawn up at various periods by successive Ottoman Governments, the first of them embodied in the 'Hatti-Humáyoun' of Sultan Abdul Medjid, proclaimed November 3, 1839, and the most recent in a decree of Sultan Abdul-Hamid II., of November 1876. The latter provided for the security of personal liberty and property; for the administration of justice by irremovable judges; the abolition of torture, the freedom of the Press, and the equality of all Ottoman subjects. Islam was declared to be the religion of the State, but freedom of worship was secured to all creeds, and all persons, irrespective of religion, were declared eligible to public office. Parliament should consist of two Houses, a Chamber of Deputies and a Senate. Senators should be at least 40 years of age, and would be appointed by the Sultan from among those who have rendered distinguished service to the State. For the election of deputies one electoral delegate has to be chosen for every 600 electors, and these electoral delegates choose one deputy for every 6,000 electors. Electors must be Ottoman subjects of at least 25 years of age, without distinction of race or creed, while delegates must be at least 30 years of age. Civil or military officials may offer themselves for election, but must immediately resign their posts on being returned. This constitution became for all practical purposes a dead letter in 1878, and Abdul-Hamid II. proceeded to build up an autocracy more complete than that of his predecessors, but in 1908 the prevailing discontent, especially in the army, caused by corruption and misgovernment compelled him to issue an Imperial decree for the convocation of a new Parliament, and constitutional government was restored

July 23, 1908. The Constitution now theoretically in force is that of 1876, somewhat modified in its details by legislation subsequent to 1908.

In January, 1912, the first Turkish Parliament under the restored Constitution was dissolved. Its successor was dissolved, after a short session, in August, 1912. A new Parliament, even more subservient than its predecessors to the Committee of Union and Progress, which, except for a short interlude of six months in 1912-13, has been the chief power in Turkish political life since 1908, was convened in May, 1914, and adjourned (on March 3, 1915) to September 28, 1915. The periods when Parliament has not been sitting have been most prolific in legislation, owing to the practice of promulgating "provisional" laws on the responsibility of the executive, thanks to a liberal interpretation of the Article in the Constitution sanctioning urgent measures in moments of emergency between Sessions.

The present Turkish Government came to power on January 24, 1913, after a *coup d'état*. The Cabinet, appointed February 4, 1917, consists of the following members:—

*Grand Vizier and Minister of the Interior*.—Talat Pasha.

*Minister of Foreign Affairs*.—Ahmed Nessimi Bey.

*Minister of Justice and President of the Council of State*.—Halil Bey.

*Minister of War*.—General of Brigade Enver Pasha.

*Minister of Marine*.—Djemal Pasha.

*Minister of Public Instruction and Minister of Posts and Telegraphs*.—Shukri Bey.

*Minister of Finance*.—Djaved Bey.

*Minister of Public Works*.—Ali Muncif Bey.

*Minister of Mines, Forests, Agriculture, and Commerce*.—Shereef Bey.

*Sheikh-ul-Islam and Minister of Pious Foundations*.—Mussa Kiazim Effendi.

Subjects of Western Powers resident in Turkey enjoyed extra territorial privileges from time immemorial, under treaties called Capitulations. The greatest single change introduced in 1914 was the abolition by a decree of the Sultan of these Capitulations (September 9, 1914). It had long been felt that these privileges needed revision, especially in so far as they exempted foreigners from the fiscal burdens of Ottoman subjects, but their abolition by an unilateral act gave rise to an unanimous protest of the Powers, and no Power had, at any rate publicly, assented to it up to November, 1914. This step, which included the suppression of foreign Post Offices and that of the International Board of Health, was taken in September, after the outbreak of the European War, and the condition of Europe made the protest of the Powers academic rather than effective for the time being.

#### LOCAL GOVERNMENT.

The whole of the empire is divided into Vilayets, or governments, these subdivided into Sanjaks, or minor provinces, these into Kazas, or districts, with occasional subdivision into Nahiés, or sub-districts. A Vali, or governor-general, representing the Sultan, and assisted by a provincial council, is placed at the head of each Vilayet. The minor provinces, districts, &c., are subjected to interior authorities (Mutesarrifs, Kaimmakams and Mudirs) under the superintendence of the Vali. The division of the country into Vilayets has been frequently modified of late for political reasons. For similar reasons several of the Sanjaks of the empire are governed by Mutesarrifs reporting direct to the Ministry of the Interior. The tendency has been to increase the number of these so-called 'independent' Sanjaks by

detaching ordinary Sanjaks from the Vilayets to which they have heretofore belonged. All subjects, however humble their origin, are eligible to, and may fill, the highest offices in the State.

The whole system of provincial administration has been the subject of a great deal of experimental legislation since 1908. A new and comprehensive 'Law on Vilayets,' having for its main ostensible purpose to decentralise authority, was promulgated by the executive in March, 1913. Some account of the main lines of this measure was given in the STATESMAN'S YEAR BOOK for 1914 (p. 1346), but it has been of little practical effect, and the various schemes for reforming the administration of the Asiatic provinces, including that of dividing the Empire into Inspectorates-General and placing the two comprising the Armenian provinces under European Inspectors-General, have completely broken down owing to the reflex action of events in Europe. Two Inspectors-General, a Norwegian and a Dutchman, were actually appointed in 1914, but one of them never even reached his post, and by October, 1914, they were both on indefinite leave of absence. A British Inspector-General was also appointed to the Ministry of the Interior early in 1914. His functions were terminated by the outbreak of war with Turkey.

### Area and Population.

The Ottoman Empire is made up of (1) Turkey in Europe, (2) Turkey in Asia (Anatolia, Arabia, Syria, Palestine, Mesopotamia, and Kurdistan), and (3) certain Islands in the Mediterranean, as regards which, however, see below. Since the conclusion of the 1st Balkan war (November, 1913), which commenced in October, 1912, the Turkish possessions in Europe have been considerably lessened, Turkey in Europe being in part divided among the Allied States (Bulgaria, Servia, Montenegro, and Greece), and in part created into an independent state of Albania. The Aegean Islands are in possession of Greece and Italy, but no definite arrangement with regard to their destiny has yet been made. Cyprus and Egypt, which until recently were under the suzerainty of the Sultan, were, the one, annexed to the British Empire and the other declared a British Protectorate in November, 1914, and January, 1915, respectively. The total area of Turkey's present dominions may be estimated at about 710,224 square miles, and its total population at about 21,273,900.

Vilayets <sup>1</sup>	Area Sq. Miles	Population	Population per Sq. Mile
Europe:—			
Constantinople . . . . .	1,505	1,203,000	790

<b>Grand Total . . . . .</b>	<b>710,224</b>	<b>21,273,900</b>	<b>30</b>

<sup>1</sup> This table does not take account of the most recent administrative changes, by which several Sanjaks have been detached from the Vilayets named in it and made "Independent" (see p. 1347); nor of the erection in 1914 of the Nejd, including the coast district of El-Hassa into a so-called Vilayet as the result of a political arrangement with the real ruler Abdul-Aziz Bin Saud, who was formally appointed Vali.

In the small European territory now remaining under Turkish rule Moslems preponderate. Other races represented are Greeks, Bulgarians, Armenians, Gipsies, Jews. In Asiatic Turkey there is a large Turkish element, with some four million Arabs, besides Greeks, Syrians, Kurds, Circassians, Armenians, Jews, and numerous other races.

The population of the chief towns is approximately as follows :—

Constantinople . . . . .	1,000,000	Medineh . . . . .	40,000
Adrianople (Edirneh) . . . . .	83,000	Homs . . . . .	70,000
Smyrna (Ismir) . . . . .	375,000	Hama . . . . .	60,000
Bagdad <sup>1</sup> . . . . .	225,000	Konia . . . . .	45,000
Damascus . . . . .	250,000	Sivâs (Sebasteia) . . . . .	65,000
Aleppo . . . . .	250,000	Jerusalem . . . . .	85,000
Beirût . . . . .	150,000	Jaffa . . . . .	45,000

Mosûl . . . . .	80,000	Bitlis . . . . .	40,000
Mecca . . . . .	80,000	Trebizond <sup>3</sup> . . . . .	55,000
Basra <sup>2</sup> . . . . .	80,000	Diarbekr . . . . .	38,000

<sup>1</sup> Occupied by Great Britain on March 11, 1917.

<sup>2</sup> " " Great Britain on November 22, 1914.

<sup>3</sup> " " Russia on February 16, and April 17, 1916, respectively.

The Lebanon was governed by a Mutesarrif (Christian) appointed by the Porte after consultation with the Great Powers, and has a special constitution dating from 1861. It has been modified in detail on the appointment of successive Mutesarrifs. The latest modifications are those effected by a Protocol signed at Constantinople on December 23, 1912. The privileges of the Lebanon were, however, abolished in November, 1916, at the same time as Turkey denounced the Paris Treaty of 1856 and the Berlin Treaty of 1878.

Early in November, 1916, the Grand Sherif Hussain assumed the title and office of King at the request of the Ulema and notables of Mecca, approved by the unanimous vote of the people, and has been recognised as King of Hejas by the Allied Governments. His Highness has established his authority and has entered into close relations with other important neighbouring Chieftains, who have approved the step he has taken. (See 'Additions and Corrections' to this volume.)

### Religion.

Mahommedanism is the established State religion. The Sultan as Caliph is Supreme Head. The chief ecclesiastical dignitary is the Sheikh-ul-Islam, but his functions are judicial and legal rather than spiritual. He is a member of the Cabinet.

Mahommedans form the vast majority of the population in Asiatic Turkey, but only one-half of the population in the provinces which constituted European Turkey before the Balkan War of 1912-13. Recognised by the Turkish Government are a number of non-Mahommedan native communities or "millet," namely: 1. Latins or Catholics, who use the Roman Liturgy, consisting of the descendants of the Genoese and Venetian settlers in the Empire, and other native Catholics of the Latin rite; 2. Orthodox Greeks under various separately recognised Patriarchs, of whom the principal is the Œcumenical Patriarch at Constantinople; 3. Armenians, under their Patriarch at Constantinople, but under the supreme spiritual control of a Catholicos at Echmiadzin, in the Russian Caucasus. In 1903, the old dignity of Catholicos of Sis, in Cilicia, was restored and a new appointment made. There still remains in abeyance the seat of the Catholicos of Akhtamar (Van), an ancient dignity; 4. Armenian Catholics, under a Patriarch at Constantinople; 5. Chaldean Catholics, under a Patriarch at Mosul; 6. Protestants, consisting of converts chiefly among the Armenians; 7. Nestorians, or Assyrian Christians, under the Patriarch Mar Shimun of Kochannes; 8. Syrian Catholics, under a Patriarch at Mardin; 9. Syrian Jacobites, under a Patriarch at Mardin or Diarbekir; 10. Melchites, under a Patriarch at Damascus; 11. Jews; 12. Bulgarian Catholics; and 13. Maronites, chiefly in the Lebanon, who are, however, only semi-officially recognised as an independent community. These religious denominations are invested with the privilege of possessing their own ecclesiastical rule. The spiritual heads of the recognised communities possess in varying degrees civil functions, which in some cases, and more especially in that of the Greek Patriarch, are of considerable importance.

In Constantinople about half the settled inhabitants are Mussulman, the other half being made up mostly of Orthodox Greeks, Armenians, Roman Catholics, Armenian and other Uniates, and Jews. There is, besides, a very large foreign population of various professions. In the Islands of the Ægean Sea the population is mostly Christian. In various parts of Asiatic Turkey the estimates are: Asia Minor, Mussulmans, 7,179,900; Armenians, 576,200; other Christians, 972,300; Jews, &c., 184,600; Armenia, Mussulmans, 1,795,800; Armenians, 480,700; other

Christians, 165,200 ; Jews, &c., 30,700 ; Aleppo, Mussulmans, 792,500 ; Armenians, 49,000 ; other Christians, 134,300 ; Jews, &c., 20,000 ; Beyrût, Mussulmans, 230,200 ; Armenians, 6,100 ; other Christians, 160,400 ; Jews, &c., 136,900 ; Lebanon, Mussulmans, 30,400 ; Christians, 319,300 ; Jews, &c., 49,800. A priesthood in the strict sense of the term cannot be said to exist in Mahommedan Turkey. The Ulema, however, or persons connected in one way or another with the official ministrations of Islam, form a separate class. The principal charges in connection with mosques, theological schools, &c., are to a large extent hereditary.

The number of mosques in the Turkish Empire is 2,120, of which 379 are in Constantinople. The number of the clergy is 11,600. Connected with the mosques are 1,780 elementary schools, where education is supplied gratis. The temporalities of the Church are controlled by the Ministry of Pious Foundations or Evkaf which has a separate Budget of its own. The department of the Sheikh-ul-Islam, however, and the whole semi-religious, semi-legal organisation subordinate to him are not provided for in this Budget, but in that of the State. The revenue of the Evkaf is principally derived from charges on and reversionary interests in real property which has at one time or another been made the subject of consecration to religious or benevolent purposes, and which is known as Vakuf. A very large proportion of the urban property of the Empire is of this description, and though it can be for practical purposes owned, alienated, and within certain limits transmitted by inheritance as if it were the property of the holder, the ultimate ownership theoretically resides in God, and the pious foundation, to the use of which it was consecrated, retains in it a perpetual interest, represented by annual rents and rights of reversion in certain cases.

### Instruction.

In Turkey, elementary education is nominally obligatory for all children of both sexes. The most recent enactment on the subject is a Provisional Law of October 6, 1913. Under this law all children from 7 to 16 are to receive primary instruction, which may, however, be given in State schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The State schools are under the direct control of the Ministry of Public Instruction, which also provides for the inspection of schools maintained by the non-Moslem communities, &c. Besides these there survive a large number of Medressés or theological seminaries, connected with religious foundations. There are middle-class schools for boys from 11 to 16 years of age. In Aleppo there are 710 Moslem, 250 Christian, and 30 Jewish schools, with respectively, 19,000, 8,000, and 2,000 pupils. Besides the ordinary instruction, in a few schools French is taught and, in fewer, English. The schools of various descriptions within the empire number about 36,230, and contain about 1,331,200 pupils, or one to twenty-four of population. Training schools for teachers also exist, but the general level of efficiency of the State schools is low. There are a large number of foreign schools, mostly conducted by French, English and American missionaries.

The university, which was nominally founded at Constantinople in 1900, has been reorganised since the change of *régime* in 1908. It now comprises 5 Faculties, viz., Arts, Theology, Law, Medicine, and Science. The Faculty of Medicine is installed, together with the Military Medical School, in a modern building which occupies an imposing site on the Scutari shore of the Bosphorus. There are numerous special schools belonging to the State or to the recognized communities, e.g., an Imperial art school, a Great

National School (Greek) of old foundation with 400 students, and a Greek theological seminary with 80 students.

### Justice.

Turkey being essentially a Moslem State the laws of the Empire rest in principle on the basis of all *Shari* Moslem law, i.e., the Korân, the Hadith or traditions of Muhammad, and the reported sayings and actions of his immediate successors, all of which are considered binding upon the sovereign as upon all Moslems. This religious law called as a whole the *Sheri* law, has to some extent been codified, as in the *Mejelle* or Civil Code which was drawn up in 1869—1876, and embodies the prescriptions of the religious law in regard to certain specified matters, like sale, &c. The bulk of modern legislation, however, has no such connection with the *Sheri* law, but consists of statutes enacted by successive Sultans in virtue of their absolute authority, or later by way of sanction to measures adopted by Parliament. Much of this statute law, including the great Codes of Criminal and Commercial Law and the Codes of Procedure, dates from the 30 or 40 years following the *Hatt-i-Sherif* of 1839. The Codes just mentioned were based almost entirely on French models, and, though not a little modified by subsequent measures, they still remain in force in all their main lines. The enactment of laws and regulations on European models has continued since the middle of the nineteenth century, and received an enormous impetus with the renewal of the Constitution in 1908, since which date a very great number of new laws and regulations of every kind have been enacted. Corresponding (though only roughly, because the *Mejelle*, for instance, is applied by the lay courts also), to the double variety of law there is a double system of law courts. The lay courts, called in Turkish *Nizamié*, date like the Codes from the middle period of the nineteenth century and are modeled closely on the French system. Dealing as they do with all criminal, commercial, and ordinary civil business they are now of preponderating importance, but side by side with them there continue to exist the religious or *Sheri* Courts which take cognisance of certain specified matters, notably those relating to the title to certain categories of real property, and all matters relating to the personal status of Moslems.

Experiments have been made in connection with the judicial system of the Empire. The most notable of these has been the institution of *juges de paix* by a law promulgated in April, 1913, and that of "Single-judge" Courts of first instance to replace the ordinary Courts on the French model in the Vilayet of Adrianople. The latter measure, which was enacted in October, 1913, was a tentative one, which, if successful, it was proposed to extend later to other provinces.

In February, 1917, a law was enacted placing all the courts, civil and religious, under the jurisdiction of the Ministry of Justice.

### Finance.

The revenue is derived from tithes, land and property taxes, Customs, sheep and cattle tax, monopolies, and other sources; the largest portions of the expenditure are for military purposes and for debt charges.

No regular Budget existed before the restoration of the Constitution in 1908. Since that year a Budget and a Finance Law have been voted, or enacted by the executive in the absence of Parliament, each year. Under normal circumstances the receipts of the Treasury, including revenues collected by the Public Debt Administration, may be put roughly at from 25 to 30 millions of Turkish pounds. There has been a deficit each year, the exact amount of which is difficult to determine owing to the existence of

extraordinary Budgets for special purposes, adjustments in the course of the financial year, &c. It may be put at any figure from 3 to 8 millions of Turkish pounds in a normal year. Loans and special surtaxes have been resorted to in the endeavour to secure equilibrium.

The ordinary Estimates for 3 years ending March 31, are shown as follows:—

	1915-16	1916-17	1917-18
	£T	£T	£T
Revenue . . . . .	25,996,010	22,961,680	25,584,155
Expenditure . . . . .	35,657,540	62,039,236	53,014,551
Deficit . . . . .	9,661,530	39,077,556	27,430,396

The total war expenditure of Turkey to March 31, 1917 is placed at 132,000,000.£T.

For the civil and religious administrations 21 per cent. of the general expenditures has been allotted. The ordinary expenditure for military establishments constitutes 28 per cent. of the budget. This corresponds to the ordinary annual appropriations under this heading, and is in no way related to the extraordinary credits and expenditures caused by the state of war.

The Ottoman Government, when unable to meet its liabilities, made an arrangement with its creditors, confirmed by the Iradé of December 8/20, 1881, supplemented and modified by that of September 1, 1903. A Council of Administration at Constantinople was appointed, and to it were handed over for distribution among the bondholders the funds derived from the excise duties, from the Bulgarian, Eastern Rumelian, and Cyprus tribute, and from the tax on Persian tobacco. The net revenue in 1913-14 available for the service of the debt was £T5,382,472, compared with £T4,536,605 in 1912-13.

The condition of the Turkish debt was as follows in April, 1914:—

	£T
Secured on Egyptian tribute . . . . .	17,981,106
Unified and Lottery Bonds secured on ceded revenues . . . . .	47,936,721
Other funded debt (including 1914 Loan of £T22,000,000) . . . . .	85,738,180
Total . . . . .	151,656,007

Of the total debt, France holds 62 per cent. and Germany 29 per cent.

The amount borrowed by Turkey from the re-establishment of the Constitution down to the present date is £T52,488,326, of which £T47,540,012 were required to meet deficits (due to pre-Constitution borrowing) and £T7,948,304 for railways.

Since the beginning of the war Turkey has received advances from the Central Powers amounting to £T79,000,000, repayable not later than eleven years after the war.

The machinery of the Public Debt has been utilised in order to give greater security to foreign capital in connection with various loans subsequent to 1881, so that the Council collects and administers on behalf of the Government a large revenue independently of that derived from the 'ceded revenues' affected to the service of the older debt.

## Defence.

### I. FORTRESSES.

The principal fortress in European Turkey is the entrenched camp of Adrianople. Constantinople is defended by the lines of Chatalja. The Bosphorus and Dardanelles are strongly fortified, and although the great bulk of the armament is composed of guns out of date, the recent importation of German material and defensive measures due to the entrance of Turkey into the European War have considerably enhanced the strength of these localities. The entrance to Smyrna is defended by a fort which, like those of the Bosphorus and Dardanelles, is of an obsolete type, and the important position of Erzerum, in Armenia, is surrounded by forts, on which, however, little modern work has been carried out.

### II. ARMY.

According to the new Law of Service introduced by the War Minister, Enver Pasha, at the commencement of the year 1914, it was enacted for the first time that every male Ottoman subject was liable to military service, and that even where an exoneration tax would be accepted, this did not free the individual from military training, but only from a portion of the full term. This law had no opportunity of full discussion, but on the general mobilisation, commenced in August, the provisions were stringently carried out, in so far that every man within the military age, Moslem or Christian, was called upon for service. Inasmuch as the previous laws gave numerous exemptions, and were in especial applied only partially in the case of Christians, it naturally followed that a mass of untrained men presented themselves. These untrained men were divided into 3 general groups: (1) Moslem, whose training was at once commenced; (2) Christian, who were only partially taken for combatant work and were mainly employed on transport and fatigue work, and (3) certain Moslems and Christians who, to provide funds, were allowed to pay a high exoneration tax. By these means the army *cadres*, which had been seriously depleted by the Balkan war, were very sensibly filled, and a certain sum was at the same time gathered in to defray the cost of mobilisation.

In February, 1917 a law was passed providing for universal military service between the ages of 20 and 45. The colour service was laid down at 2 years in the infantry and 3 in the other branches, with the remainder up to the age of 40 in the reserve ('*ihlial*'). From 40 to 45 the service continued in the 'Mustahfiz' or Territorial Army. This new arrangement abolished the old 'Redif' formations of long standing, which were unsatisfactory organisations through want of artillery, cavalry and departmental services. The 'Redif' *cadres* were reorganised as recruiting centres throughout the Empire.

On February 14, 1916, the Turkish Chamber passed a bill to extend military service to the age of 50 and to exact a payment from all those who are excused.

As the existing active ('Nizam') peace organisation, after the loss of territory resulting from the Balkan War, had been little cut down, the great bulk of the trained men on mobilisation were required to complete these and the remainder were, as their training progressed, formed into depot or reserve battalions in the recruiting districts, and affiliated, for refilling wastage, to existing peace organisations.

The 'Tribal' or irregular Kurdish Cavalry, after being suppressed and again organised, has now been formed much as before, and is being employed in the present war operations.

As a result of the loss of territory in the Balkan War, the army inspection areas were re-allotted. The first covered Turkey in Europe and Western Anatolia, the second Syria, the third Kurdistan and Eastern Anatolia, and the fourth Mesopotamia. Five army corps are located in the first inspection, two in the second, three in the third, and two in the fourth. These numbers, with the VII. (Yemen) Corps and 2 independent divisions of Hejaz and Assir, make a total of 13 army corps of 38 divisions, each corps having 3 divisions, except those in Mesopotamia and the seventh, which have each only two. Thus, notwithstanding the loss of Epirus, Macedonia and Tripoli, there is only a net decrease of 5 divisions. On the other hand, as before explained, there are now no 'Redif' divisions.

Divisions normally have 3 line regiments and 6 to 9 field or mountain batteries, each line regiment consisting of three battalions; thus the division has nine battalions. The artillery, where armed with quick-firing guns, is organised in 4-gun batteries, and where armed with old pattern guns in 6-gun batteries. An army corps consists of 2 or 3 divisions, as before explained, a cavalry brigade or single regiment, 3 howitzer batteries, where available, an engineer battalion, transport battalion, and telegraph company. There are now only 25 regiments of cavalry of 5 squadrons each; besides these, there are the regiments of irregular Kurdish cavalry mentioned above.

The peace strength of the Turkish army, according to the latest project, should have been about 210,000 men; the mobilisation produced roughly field armies totalling some 750,000, with another 150,000 to 200,000 in training. These numbers may be increased as men below 20 years of age are added, but they include the 19 year men who were taken before their time.

*The Gendarmerie.*—The extent of the Turkish Empire, its many subject races and turbulent elements, have necessitated the formation of large forces of Gendarmerie, amounting altogether to about 60,000 men, of whom 16,000 to 17,000 are mounted. The bulk of these have now been taken for army duties and replaced by Territorial or 'Mustahfiz' levies. The Gendarmerie is recruited partly from the reserve of the 'Nizam,' and partly by direct enlistment.

*The Lebanon Militia.*—A local gendarmerie, consisting of 2 battalions and 1 squadron.

The War Minister is responsible for the administration and efficiency of the army. Under him there is a Chief of the General Staff at the head of a General Staff Department of 4 sections, and a 'Musteshar,' who fulfils the purposes of a permanent Under Secretary. The General Staff is now largely permeated with officers from the German Military Mission, including a large number of additional officers who arrived after the mobilisation.

The arsenals and factories of war material are the department of the Director-General of Military Factories, an official whose duties and responsibilities correspond to those of our Master-General of the Ordnance, and who, though subordinate to the Minister of War, presents a separate and independent budget to Parliament.

The estimates for 'ordinary' military expenditure in the 1914-15 budget were approximately 5,300,000*l.* for the Ministry of War, 390,000*l.* for the Ordnance Department, and 1,980,000*l.* for Gendarmerie. These figures, however, give no indication of the total amounts expended on military services, which include large sums chargeable to a second 'extraordinary' budget, besides an enormous special expenditure incurred in consequence of the recent wars. The actual outlay in connection with the Italian and Balkan wars has been estimated at some 30 millions of pounds. These figures have, of

course, been subsequently largely added to by the recent mobilisation and entrance of Turkey into the European conflict.

The Turkish infantry have the 7·65 mm. Mauser magazine rifle, model 1890. Since the war, however, there has been a great shortage of these weapons, and many of the troops have only the converted Martini.

The field artillery after the losses of the war was only left with some 110 Q.F. field and horse batteries of Krupp 7·5 cm. batteries. The mountain artillery was similarly only left with some 22 batteries of Krupp guns of the same calibre, but 27 Schneider Q.F. batteries have since been received. Consequently the army is exceedingly short of artillery, the lack being partly made up by the employment of the old pattern field gun. Several batteries of Q.F. Skoda 10·5 cm. howitzers have been received from Austria since the mobilisation, and it is possible that further additional material has now been imported. Some of the old pattern 12 cm. howitzers are still being used, and there are some mobile batteries of 15 cm.

In 1909 a German Military Mission, under the auspices of Field Marshal von der Goltz, was invited to reorganise the Turkish Army, and superintend its instruction and training. It consisted of about 20 officers who contracted to serve for three years with the Turkish Army. In 1913 it was decided to extend and amplify this scheme, and a German general was invited to become the Director of the Mission with a proposal to increase the number of German officers to about 40. The mission under Marshal Liman v. Sanders arrived in January, 1914, and immediately assumed a prominent position in the direction of military affairs. Executive functions, both regimentally and on the Staff, were conferred upon its members, and the influence of the German direction was seen in the progress of the mobilisation which was decided upon in August. The subsequent large augmentation of the mission, the arrivals of German soldiers and sailors for the Ottoman services, with military stores, material and money, obtained a predominance for the German element, which finally resulted in Turkey throwing in her lot with the Central European Alliance and having to distribute her available forces on several frontiers and theatres of operation.

### III. NAVY.

For the navy of Turkey the crews are raised in the same manner as the land forces, partly by conscription, and partly by voluntary enlistment. The time of service in the navy is twelve years, *i.e.*, three in the active service and nine in the reserve.

Three successive British Naval Missions were entrusted with the reorganisation of the Navy in 1908 and the following years. The last was recalled by the British Government in September, 1914, owing to the anomalous situation arising out of the transfer from Germany of the battle-cruiser *Goeben* (renamed *Sultan Yavuz Selim*) and the light cruiser *Breslau* (renamed *Medilich*) to the Turkish Government and the practical supersession of the British Mission under Rear-Admiral (now Vice-Admiral) Sir A. Limpus, K.C.B., by German officers. Between 1908 and 1914 the number of officers in the navy was largely reduced in order to make it more in proportion with the actual needs of the ships. Some progress was made in the training of officers and men. A fairly considerable naval programme was elaborated. A comprehensive scheme for the creation of docks and arsenals at Constantinople and Ismid by means of a concession to a British combine, the main elements in which were the firms of Armstrong and Vickers Maxim, was adopted early in 1914. All these schemes were brought to a standstill by the outbreak of war between Great Britain and Turkey. The realisation of the naval programme received a severe blow before that event owing to the embargo laid by the

British Government on the Dreadnoughts *Sultan Osman* and *Reschadié* (late *Rio de Janeiro*) in British yards at the beginning of August, 1914. The Ottoman Navy is now under command of the German Admiral Souchon.

The principal ships of the Navy in May, 1916, including the transferred German ships, were as follows :—

Launched	Name	Displacement	Armour		Main Armament	Torpedo Tubes	Horse-power	Maximum speed
			Belt	Guns				
Battleships.								
1893	Torgut Reis . . .	Tons 9,876	Inch 16	Inch 12	6 old 11in. . . .	—	10,000	Knots 16
1911	Yavaz Selim . . . (battle-cruiser)	22,640	7½	8	10 11in. ; 12 6in. . .	4	70,000	27
Cruisers.								
1911	Medillich . . .	4,500	—	4	12 4·1in. . . .	3	33,000	27
1903	Hamidlich . . .	3,800	—	—	2 6in., 8 4·7in. . .	—	12,500	22

Besides the above there were 7 gunboats (1913-15); 9 destroyers (1908-1910); 7 torpedo boats (1901-6); 5 composite armed vessels (1914) designed for preventive work; and a number of armed motor boats. There were also available for naval purposes the Sultan's yacht *Ertogrul* (1905); 4 mine-layers; 2 fleet-tenders (one of them a German refugee); 2 hospital ships (one of them a German refugee); 2 colliers (German refugees); 1 Ammunition Transport (German refugee); and fifteen troop-transports, besides a considerable number of ordinary merchant vessels, German and other, held in readiness to serve in the same capacity. Of these several have been sunk. Except for a successful attack by a destroyer on the *Goliath*, at the Dardanelles, the Turkish navy took an inconsiderable part in the Dardanelles operations. In the Black Sea, so long as the *Goeben* (*Sultan Yavaz Selim*) was capable of action, Turkey had the ascendancy. But for a long time now she has been powerless to protect her coal supply from Anatolia, or to attack except by submarines. Recent reports are to the effect that the *Yavaz Selim* has again been refitted and prepared for sea.

### Production and Industry.

*Agriculture.*—Land in Turkey is held under 3 different forms of tenure—namely, 1st, as 'Miri,' or Crown lands; 2nd, as 'Vakuf,' or pious foundations; and 3rd, as 'Mülk,' or freehold property. The first description, the 'miri,' or Crown lands, which form the largest portion of the territory of the Sultan, are held direct from the Crown. The Government grants the right to cultivate an unoccupied tract on the payment of certain fees, but continues to enjoy rights of seignior over the land in question. The second form of tenure, the 'Vakuf,' comprises property dedicated for religious or charitable purposes (see under Religion and Education), and is the subject of a complicated and difficult system of law. The third form of tenure, the 'mülk,' or freehold property, does not exist to a great extent. Some house property in the towns and of the land in the neighbourhood of villages is 'mülk.' The law also recognises two other categories of land—i.e., land set aside for the general use of the whole community or section of it (*metruké*) and "dead" or unutilised land (*mevat*). The whole law of Real Property is in urgent need of reform and modernisation. A commencement in this direction was made

by a series of Provisional Laws promulgated in 1913. In the absence of Parliament they were put into force by executive decree. This new landed property code provides for a general survey and revaluation of all landed property in the Empire, together with a readjustment of taxes; for corporations to hold real estate in the name of the corporation; for the mortgaging of property as security for debts; for the suppression of *guedik* (guild) property; and for the extension of the right of inheritance.

A large portion of the State revenue is derived from tithes on agricultural produce. The system of levying this is burdensome and oppressive, the general practice being to farm it out to contractors. Experiments have been made in the direction of commuting the tithe to a fixed money payment.

Agriculture is most primitive. The soil for the most part is very fertile; the principal products are tobacco, cereals of all kinds, cotton, figs, nuts, almonds, grapes, olives, all varieties of fruits. Coffee, madder, opium, gums are largely exported. In Asiatic Turkey, 16,567,775 acres are under cultivation as follows:—13,689,474 acres under cereals; fruit and vegetables, 473,085 acres; industrial products (cotton, flax, etc.), 779,982 acres; and vines, 1,213,530 acres. Flour-milling in Smyrna is being improved and extended. Coffee is grown in the Hodeida region; opium is an important crop in Konia. Tobacco is grown both in European and Asiatic Turkey. The cotton industry is reviving. Between 1870 and 1905 there was no cotton raised in Turkey worthy of mention. In the Cilician plain in 1912, 115,000 bales were raised, as against 80,000 in 1911; in the Smyrna district 35,000 bales, as against 40,000 in 1911; in Macedonia, 3,000 bales, as against 7,000 in 1911; in the Aleppo district 15,000 bales, as against 12,000 in 1911; in Armenia, 2,500 bales. The estimated total cotton out-put of Turkey in 1912 was about 200,000 bales.

The forest laws of the empire are based on those of France, but restrictive regulations are not enforced, and the country is being rapidly deprived of its timber. About 21 million acres are under forest, of which 3½ million acres are in European Turkey. The forests consist of pine, fir, larch, oak, cedar and other timber trees. Extensive mulberry plantations have been founded both in European and Asiatic Turkey, and about 250,000 plants are annually distributed to the peasants.

Turkey in 1913 had 2,397,348 horned cattle, 163,691 buffaloes, and 30,942 pigs.

In Palestine an interesting feature in agricultural development is the establishment of Jewish and German colonies; of the former, near Jaffa, there were (December 31, 1913) 45 with a total population of about 15,000, cultivating 120,000 acres, the chief produce being cereals, cotton, and various fruits. These colonies consisted mainly of Russian Jews, some being maintained by private enterprise, others by the Chovawé-Zion Association, and others again (originally founded by Baron E. de Rothschild) by the Jewish Colonisation Association. The colonies possess entire administrative autonomy, each being governed by a *Waad* or Council, elected annually by the general assembly of the inhabitants. The franchise is enjoyed by men and women who own registered holdings and by tax-paying residents (other than land-owners) who have lived in the colony for two years. The Council is assisted by a Valuation Committee, an Education Committee, a Committee of Public Security, and an Arbitration Committee (for settling disputes between colonists). The Council, among other things, controls the quality of the bread that is sold. Each colony has one or more schools, a synagogue, public library, town hall, hospital, pharmacy and public baths. There are two agricultural schools at Mikweh-Israel and Petach-Tikwah. The Hebrew High School in Jaffa has 80 teachers and 750 pupils. The Jewish Agricul-

tural Experiment Station at Athlit and Zichron-Jacob carries on agricultural and botanical research work. Hebrew is the language of the schools as well as of ordinary everyday intercourse. Exports of oranges from Jaffa in 1913, 1,608,500 boxes, valued at 326,000*l*. The 4 German colonies in the Jaffa region are also mainly agricultural. In Mesopotamia a comprehensive survey was made by Sir William Willcocks shortly after the change of *régime* in 1908 with a view to the irrigation of huge tracts of land which have lain waste for centuries, but which bear clear evidence of having been artificially irrigated in ancient times. Sir W. Willcocks projected a vast scheme, the first portion of which has been in course of execution by the firm of Sir J. Jackson, Ltd. The realisation of the scheme has been much hampered by lack of funds, but one section was completed by the inauguration of the Hindîé Barrage in December, 1913.

*Mining.*—The Turkish provinces, especially those in Asia, are rich in minerals, which are little worked. Chrome ore is exported from Turkish ports, mostly from Europe and the Marmora; there are 3 chrome mines near Mersina worked by primitive methods; the Government silver mines at Bulgan Maden, Konia, produce annually about 2,600 kilos of silver and 400 tons of silver-lead; zinc is found at Karasu on the Black Sea and in Aidin; manganese ore in Konia and Aidin; antimony ore, 308 tons; copper ore is found in the Armenian Taurus, at Tereboli, near Trebizond, at Arghana Maden, near Diarbekr, said to be one of the largest and most productive mines in the world; borax from 6,000 to 8,000 tons exported annually from the Marmora; meerschaum at Eskishehr; chrome at Mersina; emery at Smyrna, in Aidin, Konia, Adana, and the Archipelago; asphalt in Syria, and on the Euphrates; coal and lignite (400,000 tons annually) at Heraclea on the Black Sea and in the Smyrna district; petroleum in the Middle Tigris valley and various isolated places in Asia Minor, also on the north coast of the Sea of Marmora. The salt mines at Salif in the Yemen yield a large output. There are salt works also at Aleppo, Erzeroum, Samos, and other places. Both gold and silver are found in the Smyrna sanjak; gold and silver and argentiferous lead at Bulghar Maden (Konia); mercury near Smyrna and at Sisma near Konia; kaolin in the island of Rhodes; arsenic in Aidin; iron in Aleppo and in Kossaro (not worked), in Adana (output 40,000 tons a year). Many of these minerals are scarcely worked. Near Brussa quarries of lithographic stone are now extensively worked. There is a good deal of brass-turning and beating of copper into utensils for household purposes.

*Fisheries.*—The fisheries of Turkey are important; the fisheries of the Bosphorus alone represent a value of upwards of 250,000*l*., though the fishery methods are antiquated. The coast of the Mediterranean produces excellent sponges, the Red Sea mother-of-pearl, and the Persian Gulf pearls.

*Manufactures.*—Industries in Turkey are mostly quite primitive. There is a tendency to start factories on a small scale, but the supply of labour seems likely to prove a difficulty. A glass factory on the Golden Horn, belonging to the Civil List Department, has been leased and is now being worked under British management. It employs 250 hands, and turns out about 2,000*l*. worth of glass bottles, etc., per month. There is one other glass factory working in Constantinople at Pasha Bagtche, on the Bosphorus. It employs 350 hands, and produces about 3,000*l*. worth of glass monthly. An Ottoman company has been formed, under British management, to manufacture soap. The works are on the Golden Horn, and produce about 50 tons of soap per month.

The Turkish Government cloth mills at Kara Mursal and Ismid have been equipped with new machinery, and manufacture the khaki woollen cloth

required by the army. At Panderma there is a woollen yarn spinning mill belonging to the Oriental Carpet Manufacturers' Company, which produces 2,750,000 lbs. annually, and employs 140 hands. At Smyrna a weaving mill has been opened, with a producing capacity of 500,000 metres (about 546,000 yards), which was to be increased last year to 1,200,000 metres (about 1,312,000 yards). It will employ 300 to 400 hands.

### Commerce.

In 1675 the commercial and other privileges called Capitulations enjoyed by several foreign nations were extended to the English. Numerous treaties were subsequently concluded with the Powers, including a group of Commercial Treaties signed in and about 1861, which though denounced at a later period still to a large extent govern commercial relations under the form of a *modus vivendi*. The old system of duty was *ad valorem*. The rate was increased from 8 to 11 per cent. in 1907 for a period of seven years and with the consent of the Powers. On the suppression of the capitulations in 1914 it was again increased first to 15 per cent and then to 30 per cent. without the consent of the Powers. But in March, 1916, a new tariff was adopted by the Turkish Parliament substituting for the old *ad valorem* duties duties on quantity of goods.

The total trade of Turkey in various years ending March 13 has been as follows (£T1 of 100 piastres = 18 shillings, or £T10 = 9L., or 10L. = £T11):—

Years	Imports	Exports	Years	Imports	Exports
	£T	£T		£T	£T
1900-01	22,046,880	14,032,265	1911-12	45,009,130	24,719,130
1909-10	31,432,231	18,439,071	1912-13	43,551,035	23,921,326
1910-11	42,555,980	22,079,710	1913-14	40,809,680	21,436,120

Turkish trade for 2 years was distributed among the principal countries as follows:—

Country	Imports		Exports	
	1911-12	1913-14	1911-12	1913-14
	£T	£T	£T	£T
United Kingdom . . .	9,945,910	8,128,690	5,977,030	4,660,460
Austria-Hungary . . .	6,838,110	6,146,720	3,460,650	2,231,150
France . . . . .	3,939,060	3,591,850	4,683,570	4,289,420
Germany . . . . .	5,162,680	4,688,740	1,514,480	1,227,160
Russia . . . . .	3,040,650	3,516,620	949,270	831,040
Bulgaria . . . . .	1,462,100	270,100	684,410	251,060
Rumania . . . . .	1,228,740	1,937,250	607,340	626,850
Greece . . . . .	284,560	137,180	438,500	243,830
Italy . . . . .	2,457,410	2,699,000	553,580	927,260
Netherlands . . . .	815,800	622,810	417,920	388,660
Egypt . . . . .	996,910	1,431,210	1,696,570	1,943,320
United States . . . .	1,225,720	1,980,490	1,525,490	1,378,660
Total of all countries .	45,009,130	40,809,680	24,719,130	21,436,120

The value of the commercial intercourse between the whole of the Turkish Empire in Europe and Asia and Great Britain during the last five years, according to the Board of Trade Returns, is shown in the following table:—

—	1912	1913	1914	1915	1916
Imports into U. K. from Turkey . . . . .	£ 6,424,300	£ 5,441,222	£ 4,223,279	£ 1,177,707	£ 861,028
Exports of British produce to Turkey . . . . .	£ 8,115,552	£ 7,761,646	£ 5,893,660	£ 421,656 <sup>1</sup>	£ 426,118

<sup>1</sup> Exported to ports and places in territory formerly Turkish, but now occupied by other Powers.

The principal imports from Turkey into the United Kingdom and exports to Turkey from the United Kingdom (according to Board of Trade Returns) in two years were:—

Imports from Turkey	1914	1915	Exports to Turkey	1914	1915
	£	£		£	£
Barley . . . . .	284,416	156,766	Coal, coke . . . . .	361,207	14,922
Raisins . . . . .	503,280	127,014	Cotton yarn . . . . .	271,558	12,224
Angora goats' hair . . . . .	559,103	—	Cottons . . . . .	3,124,425	115,557
Wool . . . . .	124,806	36,719	Woollens . . . . .	391,809	20,035
Woollen goods . . . . .	161,364	1,800	Iron goods . . . . .	157,778	61,933
Opium . . . . .	368,633	262,293	Machinery . . . . .	281,882	23,527

### Shipping and Navigation.

The mercantile navy of the Turkish Empire in 1911 consisted of 120 steamers of 66,878 tons, and 963 sailing vessels of 205,641 tons.

At Constantinople in 1914 there entered and cleared 14,761 vessels of an aggregate tonnage of 11,933,349 tons. This number comprised, in the foreign trade, 5,333 visits of sailing vessels of, in the aggregate, 171,945 tons, 2,117 steamers of 2,791,578 tons sailing regularly, and 7,311 steamers of 8,969,826 tons not sailing regularly. The liners of several navigation companies visit Constantinople (Russian, Austrian, Italian, Turkish, French, Greek, Rumanian and Egyptian, the last-named under the British flag). Of the total tonnage entered in 1914, 2,007 ships of 3,898,178 tons were British, 1,159 ships of 1,472,712 tons were Greek, 566 ships of 1,127,313 tons were Austro-Hungarian, 704 ships of 798,878 tons were Italian, 675 ships of 1,069,615 tons were Russian, 429 ships of 454,958 tons were French, 7,794 ships of 1,080,607 tons were Turkish, and 303 ships of 586,401 tons were German.

### Internal Communications.

The length of railway line in European and Asiatic Turkey on November 1, 1914, not including the most recently opened sections of the Bagdad Railway, was as follows:—

# MONEY, WEIGHTS, AND MEASURES OF TURKEY 1361

	Miles open		Miles open
European—		Alasheir-Afion-Karahissar .	156
Salonica-Monastir <sup>1</sup> . . .	136	Smyrna-Aidin . . .	320
Constantinople-Salonica <sup>1</sup> . .	317	Konia-Eregli-Persian Gulf <sup>1</sup> .	125
Oriental Railways . . .	593	Mersina-Adana . . .	42
		Beirût-Damascus . . .	96
Total European . . .	1,046	Rayak-Aleppo <sup>1</sup> . . .	295
		Damascus-Medina . . .	812
Asiatic—		Jaffa-Jerusalem . . .	54
Haidar-Pasha-Angora <sup>1</sup> . . .	358	Haifa-Deraa . . .	105
Eski-Shehir-Konia <sup>1</sup> . . .	283		
Mudania-Brussa . . .	25	Total Asiatic . . .	2,836
Smyrna-Cassaba <sup>1</sup> . . .	165		

<sup>1</sup> These railways have a kilometric guarantee. The guarantees paid by the Debt Council amounted to £T528,918 in 1911; £T420,141 in 1912; £T341,388 in 1913; £T288,042 in 1914.

The German concession of the Bagdad Railway was intended to extend the Anatolian line from Konia to Adana, Mosul, Bagdad, and Basra, with many branch lines. It has been constructed continuously as far as Kara Bunar in Cilicia. Further on the following sections have been completed: Dorak to Bagtché on the Adana side of the Taurus Mountains; Radjun via Muslimié to Jerablus on the Euphrates with branch from Muslimié to Aleppo; Jerablus to El-Abiad in the direction of Nisibin (the Euphrates being spanned by a wooden bridge); and Bagdad to Samara, a stretch of about 80 kilometres. A branch line has also been completed from Alexandretta to Toprak Kalé on the Dorak-Adana-Bagtché section. Of the distance from Konia to Bagdad, 1,509 miles, 1,117 miles (with gaps) are already working. Total railway mileage in Turkey in 1916, 3,720 miles.

In Asiatic Turkey the Turkish Government controls 1,116 miles or 31 per cent. of the total railway mileage; German influence extends over 1,327 miles or 36·8 per cent. of the total; French influence over 760 miles or 21 per cent. of the total; Belgian influence over 25 miles or 0·7 per cent. of the total; and English influence over 378 miles or 10·5 per cent. of the total.

Electric tramways are working in Constantinople, Smyrna, Damascus, and Beyrouth.

There are 1,814 Turkish post-offices in the Empire. In the year 1912-13 the inland service transmitted 21,594,000 letters and 1,875,000 post-cards, and 13,695,000 samples and printed papers; the international service transmitted 13,708,000 letters and 2,653,000 post-cards, and 3,803,000 samples and printed papers. A parcel-post system has been introduced into Turkey, and works fairly well.

Foreign post-offices have ceased to exist since Oct. 1, 1914.

The length of telegraph lines in Turkey is about 28,890 miles, and the length of wire about 49,200 miles; there are 1,017 telegraph offices; messages in the year 1911-12, 9,987,120.

## Money, Weights, and Measures of Turkey.

In January, 1917, the Turkish Government issued a Charter for a new National Bank, to be styled the Ottoman National Credit Bank (Osmanli Itibar milli Bancassi). Its capital is 4 million Turkish pounds (3,600,000*l.*). After the expiration of the privileges of the Imperial Ottoman Bank (1925) the new institute is to become the State Bank with the right to issue bank-notes.

The Imperial Ottoman Bank, with a capital of £T10,000,000, had, on Nov. 30, 1910, a note circulation of £T941,250, and cash on hand amounting to £T3,586,834. The bank's note issue consisted up to 1914 of notes of £T5 and upwards, secured on a gold reserve of not less than one-third of the value of the issue. In order to relieve the financial situation created by the outbreak of the European War in August, 1914, notes were made forced currency for an indefinite period, and a new issue of Ottoman Bank notes of £T1, secured in the same manner, was authorised.

On April 17, 1916, an order was issued reforming the currency. A gold standard, with the piastre as the unit, is henceforth to be general all over Turkey, and the piastre equals 40 para. The piastres, as well as the half piastre (20 para), quarter piastre (10 para) and eighth piastre (5 para) pieces are to be of nickel. Silver coins are 2, 5, 10, and 20 piastres; and gold coins 25, 50, 100, 250, and 500 piastres. Silver is legal tender up to 300 piastres, and nickel up to 50 piastres.

The gold 100-piastre piece (which is equivalent to £T1) weighs 7·216 grammes, ·916 fine, and thus contains 6·6147 grammes of fine gold. The silver 20-piastre piece weighs 24·055 grammes, ·830 fine, and therefore contains 19·965 grammes of fine silver. £T11 equals £10 approximately.

Weights and measures are as follows:--

The <i>Oke</i> , of 400 drams . . . . .	= 2·8326 lbs. avoirdupois.
„ <i>Kilch</i> . . . . .	= 0·9120 imperial bushel.
44 <i>Okes</i> = 1 <i>Canlar</i> or <i>Kintal</i> . . . . .	= 125 lbs. avoirdupois.
39·44 <i>Okes</i> . . . . .	= 1 cwt.
180 <i>Okes</i> = 1 <i>Cheke</i> . . . . .	= 511·380 pounds.
1 <i>Kile</i> = 20 <i>Okes</i> . . . . .	= 0·36 imperial quarter.
816 <i>Kilchs</i> . . . . .	= 100 imperial quarters.
The <i>Endazé</i> (cloth measure) . . . . .	= 27 inches.
„ <i>Arshin</i> (land measure) . . . . .	= 30 inches.
„ <i>Donum</i> (land measure) . . . . .	= 1,098·765 square yards.

The kile is the chief measure for grain, the lower measures being definite weights rather than measures. 100 kiles are equal to 12·128 British imperial quarters, or 35·266 hectolitres.

In 1889 the metric system of weights was made obligatory for cereals; metric weights were decreed obligatory in January 1892, but the decree is not yet enforced.

On March 1, 1917, the Gregorian calendar was introduced into Turkey, to be used side by side with the Hegira calendar.

### Diplomatic and Consular Representatives.

Owing to the rupture of relations followed by the outbreak of war between Great Britain and Turkey at the beginning of November, 1914, there is no diplomatic or consular representation of either country in the other. The last British Ambassador in Turkey was the Rt. Hon. Sir Louis Mallet, K.C.M.G., C.B. The last Turkish Ambassador in London was His Highness Tevfik Pasha, G.C.V.O. British interests in Turkey are placed under the protection of the United States Government. Turkish interests in the British Empire are placed under the protection of the United States Government.

## URUGUAY.

(REPÚBLICA ORIENTAL DEL URUGUAY.)

### Constitution and Government. "

THE Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Rio de la Plata, and subsequently a province of Brazil, declared its independence August 25, 1825, which was recognised by the Treaty of Montevideo, signed August 27, 1828. The Constitution of the Republic was sworn July 18, 1830. The legislative power is in a Parliament of two Houses, the Senate and the Chamber of Representatives, which meet in annual session, extending from February 15 to July 15. In the interval of the session, a permanent committee of two senators and five members of the Lower House assumes the control of the executive power. The representatives are chosen for three years, in the proportion of 1 to every 12,000 inhabitants of male adults who can read and write. The senators are chosen by an Electoral College, whose members are directly elected by the people; there is one senator for each department, chosen for six years, one-third retiring every two years. There are 90 representatives and 19 senators.

The executive is given by the Constitution to the President of the Republic, elected for the term of four years.

*President of the Republic.*—Dr. Feliciano Viera; elected March 1, 1915.

The President is assisted in his executive functions by a council of ministers divided into seven departments, namely, those of the Interior and Worship; Foreign Affairs; Finance; War and Marine; Justice and Public Instruction; Industry and Communications; and Public Works.

### Area and Population.

The following table shows the area and the estimated population of the departments on December 31, 1915:—

Departments	Area, square miles	Population Dec. 1915	Pop. per square mile Dec. 1915
Artigas . . . . .	4,394	36,743	8.3
Canelones . . . . .	1,834	109,648	59.7
Cerro-Largo . . . . .	5,763	55,084	9.5
Colonia . . . . .	2,193	77,669	35.4
Durazno . . . . .	5,525	52,804	9.5
Flores . . . . .	1,744	22,079	12.6
Florida . . . . .	4,673	58,538	12.5
Maldonado . . . . .	1,587	38,059	23.9
Minas . . . . .	4,819	64,392	13.3
Montevideo . . . . .	256	368,620	1,489.9
Paysandú . . . . .	5,115	63,343	12.3
Rio Negro . . . . .	3,269	34,986	10.7
Rivera . . . . .	3,793	44,030	11.6
Rocha . . . . .	4,280	44,344	10.3
Salto . . . . .	4,865	68,922	14.1
San José . . . . .	2,688	58,257	21.6
Soriano . . . . .	3,560	52,743	14.8
Tacuarembó . . . . .	8,112	57,686	7.1
Treinta y Tres . . . . .	3,682	38,214	10.3
<b>Total . . . . .</b>	<b>72,153</b>	<b>1,346,161</b>	<b>18.6</b>

In 1914 the Uruguayan and Brazilian Boundary Commissions drew up the documents respecting three islands belonging to Uruguay, to be called Socorro, Jacinto, and Denis.

The results\* of the census of October, 1908, showed a population of 1,042,686 (530,508 males and 512,178 females). Of this total, 181,222 were foreigners, 62,357 being Italian, 54,885 Spanish, 27,789 Brazilian, 18,600 Argentine, 8,341 French, 1,324 British, 1,406 Swiss, 1,112 German, and 5,408 of other nationalities.

The population of Montevideo City on January 31, 1917, was 376,163. Of the other cities, Paysandu had 20,953 inhabitants; Salto, 19,788; Mercedes, 15,667.

Births, deaths, and marriages for three years. The births and deaths are exclusive of still-births.

Years	Living-Births	Still-Births	Marriages	Deaths	Surplus of Births over Deaths
1913	40,315	1,463	7,330	15,374	24,941
1914	38,571	1,283	6,073	15,350	23,221
1915	38,046	1,248	5,758	16,602	21,444

Of the living births in 1914, 8,093, or 21.0 per cent., were illegitimate. Divorces: 139 in 1913; 134 in 1914, and 122 in 1915.

For five years the arrivals and departures by sea at Montevideo were:—

—	1911	1912	1913	1914	1915
Immigrants . .	141,224	248,085	261,148	264,232	212,286
Emigrants . .	123,934	222,157	232,644	251,098	203,233

Of the immigrants landing in Montevideo in 1915, 6,564 were Spanish; 2,757 Italian; 3,990 Brazilian; 1,069 French; 810 German; and 1,120 English.

### Religion and Instruction.

The Roman Catholic was the State religion, but in December, 1916, a decree was passed abolishing the State religion. There is complete toleration. The Archbishop of Montevideo has 2 suffragan bishops. The 1908 census showed 430,095 Catholics, 12,232 Protestants, and 45,470 unspecified.

Primary education is obligatory. In 1915 there were 1,000 public schools with 97,393 enrolled pupils (93,821 Uruguayans and 3,572 foreigners). There were also 201 private schools with 19,198 pupils.

There is at Montevideo a university, with faculties of law, social sciences, medicine, mathematics, commerce, agriculture, and veterinary science. There are also a preparatory school and other establishments for secondary and higher education with 2,591 pupils. There are normal schools for males and for females, and a school of arts and trades supported by the State where 185 pupils receive instruction gratuitously. At the military college, with 8 professors, there are 46 pupils. There are also many

religious seminaries throughout the Republic with a considerable number of pupils.

For the relief of poverty there are a charity hospital, an hospital for the insane, an isolation hospital, an asylum for beggars, an orphan asylum, and 3 infant schools.

### Justice.

In 1907 the judicial system was reformed. A High Court of Justice was established consisting of 5 judges elected by the General Assembly of the Chambers, the President to be chosen annually by the members of the Court from amongst themselves. This court has original jurisdiction in constitutional, international, and admiralty cases, and will hear appeals in cases in which the decision has been modified or altered in other appeal courts, of which there are 2 each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 2 for commercial cases, 1 for Government, 2 for criminal cases, 1 correctional court, and 3 for criminal investigation. Each departmental capital has a departmental court, and each of the 214 judicial sections into which the Republic is divided has a justice of peace court; further, each section is divided into districts, in which deputy judges (alcaldes) try cases involving small amounts.

In September 1907 the death penalty was abolished, penal servitude for a period of 30 to 40 years being put in its place.

### Finance.

The receipts and expenditure for recent years are stated as follows:—

—	Receipts	Expenditure	—	Receipts	Expenditure
	£	£		£	£
1911-12	7,511,352	6,902,625	1914-15	7,621,082	7,868,928
1912-13	8,019,387	7,980,309	1915-16 <sup>1</sup>	5,915,600	5,895,462
1913-14	7,368,156	7,351,856	1916-17 <sup>1</sup>	6,266,261	6,281,205

<sup>1</sup> Estimates.

The estimates of revenue and expenditure for 1916-17 were (4·7 dollars = £1):—

Revenue	Dollars	Expenditure	Dollars
Customs . . . .	12,250,000	Legislature . . . .	718,382
Property tax . . . .	4,160,000	Presidency . . . .	69,244
Trade licences . . . .	1,600,000	Ministry Foreign Affairs . .	511,735
Factory and tobacco taxes .	1,200,000	„ Interior . . . .	3,299,417
Stamped paper and stamps	900,000	„ Finance . . . .	2,142,394
Surtaxes on imports and		„ Industries . . . .	876,652
exports . . . .	620,000	„ Public Works . . . .	1,824,586
Other receipts . . . .	8,721,428	„ War and Marine . .	5,187,850
		Public instruction . . . .	3,323,410
		Justice . . . .	389,640
		National obligations . . . .	11,688,356
Total . . . .	29,451,428	Total . . . .	29,521,666

The amount of the public debt of Uruguay on January 1, 1916, is officially given as 147,559,589 dollars (29,511,917*l.*). Of the total 24,346,302 dollars ranks as internal, 121,077,787 dollars as foreign, and 2,135,500 dollars as international. The service of the public debt in 1915 was 6,147,144 dollars (1,229,429*l.*); for redemptions, 790,367 dollars (158,073*l.*); for railway guarantees, 918,704 dollars, and some other minor sums, making a total of 7,776,947 dollars (1,555,389*l.*).

### Defence.

The army of Uruguay consists of a small standing army, and the National Guard. Service in the standing army is voluntary, lasting from 2 to 5 years, with re-engagement up to the age of 44. It consists of 17 line battalions, 4 rifle companies, 16 cavalry regiments, 3 field artillery regiments of 3 batteries each, a fortress artillery company and machine gun company, and 1 bearer company with a peace strength of 10,400 officers and men, and a nominal war strength of 50,000.

The National Guard is a militia, service in which is compulsory. It is divided into three classes, or 'bans.' The first 'ban,' or 'mobile' national guard contains all the young men fit for military duty between the ages of 17 and 30, and forms a more or less organised force of 15,000 to 20,000 men. It would take the field with the standing army. The second ban, consisting of men fit for service between 30 and 45, is the 'departmental,' or provincial, national guard. Its units do not move out of their own departments, but the men can be drafted to make good the losses of the mobile units in time of war. The third ban, containing all the men between 19 and 45, is the 'territorial' force, and is only liable to garrison duty in its own districts. The total strength of the National Guard (all three bans) is, nominally, about 100,000 men and 120 guns.

There is also a police force, with an establishment of 5,000.

The infantry of the active army is armed with the Mauser rifle, the field batteries have either Schneider or Krupp 7.5 cm. guns. The National Guard is mainly armed with the Remington rifle and old de Bange guns.

The fleet consists of an armoured cruiser *Montevideo*, the yacht *18 de Julio*, and the *Uruguay*, 1,400 tons, speed 23 knots, launched at Kiel in 1910.

### Production and Industry.

In Uruguay the agricultural industries are extending. The principal crops and their yield for two years were as follows:—

	Area		Yield	
	1914-1915	1915-1916	1914-1915	1915-1916
	Acres	Acres	Cwts.	Cwts.
Wheat . . . . .	792,405	960,725	1,957,102	5,370,866
Barley . . . . .	5,282	9,810	17,236	50,252
Oats . . . . .	82,872	106,295	270,914	662,766
Linseed . . . . .	102,307	44,657	298,774	198,484
Maize . . . . .	796,252	—	5,782,164	—

In 1908 there were within the Republic 8,192,602 head of cattle, 566,307 horses, 26,286,296 sheep, 17,671 mules, 19,951 goats, and 180,099 pigs. In 1917 the total number of cattle was 7,942,212.

Wine is produced chiefly in the departments of Montevideo, Canelones,

Salto, Colonia, and Paysandú. In 1915 there were 2,334 properties (2,538 in 1914), of 15,627 acres (15,257 in 1914), producing 43,255,447 lbs. of grapes (60,713,705 lbs. in 1914), and 2,531,546 gallons of wine (3,626,249 in 1914). Tobacco and olives are also cultivated.

In the northern departments several gold mines are worked, and silver, copper, lead, magnesium, and lignite coal are found. The supply of electricity for light, power, and traction is a State monopoly (Bill passed October 20, 1912).

### Commerce.

The special trade (merchandise only) was as follows (4·7 dollars 1L.):—

—	1910-11	1911-12	1912-13	1913-14	1914-15
	£	£	£	£	£
Imports . .	9,584,729	10,506,383	10,520,000	7,446,975	6,995,928
Exports . .	9,017,17	10,851,063	13,520,000	10,463,761	14,658,134

In 1914-15 the customs receipts amounted to 2,359,834L.; in 1913-14 to 3,049,108L.

The principal imports and exports for 1915 were (in thousands of gold pesos) as follows:—

Imports	1915	Exports	1915
General stores (foodstuffs, beverages, cigars and tobacco, etc.)	12,171	Wool . . . . .	20,089
Raw materials and machinery for industries . . . . .	6,605	Hides . . . . .	16,663
Livestock . . . . .	5,018	Meat and Extracts . . . . .	30,334
Hardware, marine goods, etc. . . . .	4,439	Livestock . . . . .	1,089
Dry goods . . . . .	4,126	Sand . . . . .	539
Building materials . . . . .	1,218	Cereals . . . . .	696
		Animal Fat . . . . .	1,540

The imports and exports for 1915 were distributed as follows (in gold pesos):—

From or to	Imports 1915	Exports 1915	From or to	Imports 1915	Exports 1915
Great Britain . .	6,851,113	13,206,910	Belgium . . . . .	194,066	—
Argentina . . . .	7,373,843	8,941,349	United States . .	7,270,986	11,746,726
France . . . . .	1,635,143	17,687,200	Brazil . . . . .	4,864,680	1,053,936
Germany . . . . .	749,375	—	Italy . . . . .	2,535,450	14,943,003

Total trade between Uruguay and the U.K. for 5 years (Board of Trade Returns):—

—	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Uruguay into U.K.	2,366,977	2,748,819	2,803,059	4,331,288	4,015,129
Exports to Uruguay from U.K. .	2,917,021	2,916,422	1,663,643	1,496,789	1,899,181

### Shipping and Communications.

In 1916 Uruguay had 41 steamers of a total net tonnage of 35,980 tons. The following table shows the vessels entered and cleared at the ports of Uruguay for 3 years :—

Year	Entered				Cleared			
	Steamers		Sailing Vessels		Steamers		Sailing Vessels	
	No.	Tonnage	No.	Tonnage	No.	Tonnage	No.	Tonnage
1913 .	8,197	10,647,111	6,887	1,310,343	7,993	10,526,830	6,843	1,313,970
1914 .	8,754	11,062,519	4,898	928,558	8,665	11,122,477	4,852	912,884
1915 .	7,838	8,437,517	3,087	618,744	7,843	8,440,542	3,062	643,431

There were besides, in 1915, 10,925 barques of 9,056,261 tons that entered and 10,905 barques of 9,083,973 tons that cleared all the ports. The port of Montevideo is visited by the steamers of 20 different companies, of which 12 are British, 2 German, 3 French, 2 Italian, and 1 Spanish.

The National roads of Uruguay have a total length of 2,240 miles, and there are about 3,100 miles of departmental roads. River transport is also very extensive.

At the end of 1915 the railway system of Uruguay open for traffic had a total length of 1,597 miles of standard gauge, of which 1,060 miles are under State guarantee. There are 170 miles of tramway in operation; the tramway lines of Montevideo have been electrified.

The telegraph lines in operation have a total length of 4,850 miles; in 1915, 55 offices through which 1,047,000 telegrams passed. Two telephone companies have 16,518 miles of wire. The Government will take over the whole of the postal services as soon as arrangements have been completed.

In 1915 there were 995 post offices. The correspondence movement comprised 99,897,838 letters, packets, &c.

### Money and Credit.

The Bank of the Republic has a nominal capital, raised in December, 1914, to 25,000,000 dollars, and a paid-up capital on December 31, 1914, of 12,749,995 dollars. This bank has the exclusive right to issue notes. The president and directors are appointed by the Government. On Oct. 31, 1915, notes to the value of 22,651,850 dollars were in circulation, and its stock of gold amounted to 17,389,782 dollars.

The principal banks in Montevideo, in addition to the Bank of the Republic, are the four British banks, viz., the London and River Plate Bank, the London and Brazilian, the British Bank of South America, and the Anglo-South American Bank; there are also the German Transatlantic Bank, the Spanish Bank, and the French and the Italian Banks. The Uruguayan Commercial and the Popular Banks enjoy excellent financial reputations, and there are also various land and mortgage banking institutions.

In 1912 the Government created a National Insurance Bank (Banco de Seguros del Estado) with a monopoly of insurance business of all kinds. No new insurance companies may now be established. The Insurance Bank opened its doors on March 1, 1912. The business of the bank is divided

into the following departments: Fire insurance; automobile insurance; workmen's accident insurance; hail insurance; life insurance; animal insurance; marine insurance; and insurance for window panes and mirrors. The bank's percentage of all the fire insurance written in the Republic was 23·33 per cent. in 1912; 35·71 per cent. in 1913 and 34·70 per cent. in 1914.

### Money, Weights, and Measures.

There is no Uruguayan gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso nacional*, weighing 1·697 grammes, ·917 fine. The law of June 23, 1862, authorised the coinage of the *doblon*, or 10-peso gold piece, but, as yet, only foreign gold is in circulation.

The silver *peso* or *dollar* weighs 25 grammes, ·900 fine. Other silver pieces are half, fifth, and tenth of a peso. Nickel coins are 5, 2, and 1 centesimo pieces. The metric system of weights and measures has been officially adopted. The chief denominations of the old system are as follows:—

The <i>Quintal</i>	=	101·40 lbs	avoirdupois.
„ <i>Arroba</i>	=	25·35	„ „
„ <i>Fanega</i>	=	30	gallons.
„ <i>Lineal league</i>	=	5·64	English yards.
„ <i>Cuadra</i> of land	=	·73	hectare = 1·8 English acre.
„ <i>Square league</i>	=	10½	English square miles.

### Diplomatic and Consular Representatives.

#### 1. OF URUGUAY IN GREAT BRITAIN.

*Envoy and Minister*.—Pedro Cossio (appointed December 6, 1916).

*First Secretary*.—Juan Gadea.

*Second Secretary*.—Carlos de Santiago.

*Naval Attaché*.—Lt. Eduardo M. Saez.

*Consul-General*.—Don José Barboza Teiras.

#### 2. OF GREAT BRITAIN IN URUGUAY.

*Envoy Extraordinary, Minister Plenipotentiary and Consul General*.—A. Mitchell Innes. Appointed August 1, 1913.

*Vice-Consuls*.—Major de S. Dobree, R.M.A., and Harry C. Ricardo.

There are also Vice-Consuls at Fray Bentos, Maldonado, Paysandú, and Salto.

## VENEZUELA.

(ESTADOS UNIDOS DE VENEZUELA.)

### Constitution and Government.

THE Republic of Venezuela was formed in 1830 by secession from the other members of the Republic of Colombia. The Constitution in force is that of June 13, 1914. Legislative authority is vested in a Congress of 2 chambers, the Senate and the Chamber of Deputies. The former consists of 40 members elected for 3 years, 2 for each State, Venezuelans by birth and over 30 years of age. The latter is constituted as follows: Each State chooses by direct election for 3 years one deputy, a Venezuelan by birth and over 21 years of age, for every 35,000 inhabitants, and one more for an excess of 15,000. A State with fewer than 35,000 of population will have one deputy. The Federal District and the Territories which have, or may reach, the population fixed by law will also elect deputies.

The executive power is exercised by the President of the Republic in conjunction with the Cabinet Ministers through whom he acts. The President is elected by Congress for 7 years, must be a Venezuelan by birth and over 30 years of age; by the new Constitution (1914) there is no restriction as to re-election. Failing the President, temporarily, the President can nominate any member of the Cabinet to act in his place.

*President of the Republic.*—General Juan Vicente Gómez, elected May 3, 1915, for the period 1915 to 1922.

The President-Elect has not yet taken office, retaining his post of Commander-in-Chief. Accordingly the Provisional President, Dr. V. Marquez Bustillos, elected April 19, 1914, continues to act as head of the State.

The Cabinet consists of 7 Ministers: the Ministers of the Interior, of Foreign Affairs, of Finance and Public Credit, of War and Marine, of Fomento, of Public Works, and of Public Instruction. The seat of the General Powers of the Nation is at the City of Caracas, but, when any unforeseen circumstance requires, the Executive Power may fix its residence at any other point of the Federal District.

The States are autonomous and politically equal. Each has a Legislative Assembly, whose members are chosen in accordance with their respective Constitutions. Each State has a President and a general Secretary. The States are divided into districts and municipalities. Each district has a municipal council, and each municipio a communal junta. The Federal District and the Territories are administered by the President of the Republic through Governors, who in turn appoint secretaries.

### Area and Population.

Venezuela has an area of about 398,594 square miles. According to the census of 1891, the latest taken in Venezuela, the population was 2,323,527. Official estimates for June 30, 1915, place it at 2,816,484, the density for the entire country being 7 persons to the square mile. But the official figures have been very much questioned and it is said that 2½ millions is nearer

actuality. It is now divided into a Federal District, 20 States and 2 Territories, as follows :—

State	Capital	State	Capital
Apure . . . . .	San Fernando de Apure	Nueva Esparta . . . . .	La Asuncion
Aragua . . . . .	La Victoria	Portuguesa . . . . .	Guanore
Anzoategui . . . . .	Barcelona	Sucre . . . . .	Cumona
Bolívar . . . . .	Cuidad Boliva	Táchira . . . . .	San Christobal
Carabobo . . . . .	Valencia	Trujillo . . . . .	Trujillo
Cojedes . . . . .	San Carlos	Yaracuy . . . . .	San Felipe
Falcón . . . . .	Coro	Zamora . . . . .	Barinos
Guárico . . . . .	Calabozo	Zulia . . . . .	Maracaibo
Lara . . . . .	Barquisimeto	Ter. Amazonas . . . . .	Tucapita
Monagas . . . . .	Maturin	„ Delta-Amacuro . . . . .	San Fernando de Atapabo
Mérida . . . . .	Mérida	Federal District . . . . .	Caracas
Miranda . . . . .	Ocumare		

On August 31, 1914, the estimated population of the States named was as follows :—Mérida, 108,105 ; Táchira, 124,596 ; Trujillo, 177,855 ; and Zulia, 182,614.

Some of the more important cities with their population according to the census of 1891, are: Mérida (State of Mérida), 13,366 ; Rubio (Táchira), 12,229 ; San Christobal (Táchira), 16,797 ; Betijoque (Trujillo), 10,159 ; Bocono (Trujillo), 13,233 ; Trujillo (Trujillo), 10,481 ; Valera (Trujillo), 5,473 ; and Maracaibo (Zulia), 34,740.

The movement of population, according to official statistics, is shown as follows :—

Year	Marriages	Births	Deaths	Immigrants	Emigrants
1912	9,365	75,892	65,729	9,672	7,991
1913	9,963	76,588	52,847	11,617	10,708
1914	7,492	75,817	51,697	10,610	9,742

In 1914 in Caracas, the death rate was 38·47 per 1000, and the birth rate 34·99. Both in Caracas and Puerto Cabello the deaths exceed the births.

### Religion and Instruction.

The Roman Catholic is the State religion, but there is toleration of all others. The Archbishop of Caracas has 5 suffragan bishops.

Instruction is given both in public and private schools, and teaching is entirely free. But under a new scheme introduced in 1915, all pupils whether of elementary, professional or high schools, must pass the requisite State examination. The State also prescribes the courses of study for all grades of schools. Great stress is laid on practical instruction, and accordingly in 1915, the Government established practical courses in medicine, and began to build laboratories for all grades of schools. Elementary instruction is free, and from the age of 7 to the completion of the primary grade, compulsory. In 1911 the reorganisation of primary education was undertaken. The new system aims especially at the creation of large school buildings and schools in villages. The elementary schools supported by the Government number (December 31, 1912) 1,408 with 45,515 pupils, secondary schools 102, 58 for boys, 38 for girls, and 6 mixed. In Caracas there are 2 normal schools, one for females, and another for males. To each is annexed an elementary school

with first and second grade pupils. At Caracas is the central University (it has been closed since October, 1912), and in Mérida is the University of Los Andes. Superior instruction is divided into schools, viz.: Philosophy and Letters; Physical, Mathematical, and Natural Sciences; Medical Science; Political Science; and Ecclesiastical Science. These schools can be established separately or can unite to form Universities. There are at present in activity, the University of Los Andes, eight schools of Political Science and of Ecclesiastical Science, and in Caracas Schools of Medical Science and of Ecclesiastical Science, besides private schools of Political Science. Steps are being taken for the establishment of other schools and institutes for superior instruction. The University Faculties have teaching members (professors), ordinary members (doctors), and honorary members. The Government supports also the following Institutes for special instruction: a School of Plastic Arts, another of Music and Elocution, two of Arts and Trades (one for men and the other for women), and three of Commerce.

### Justice.

Federal judicial authority resides in the Court (which is also Court of Cassation) and in various tribunals and courts established by special laws. The Federal Procurator-General is appointed for 3 years.

The States have each a Supreme Court with 3 members called respectively President, Relator, and Chancellor. Each State has also a superior court, courts of first instance, district courts, and municipal courts. The States' judicial officers hold their posts for 3 years. In the Territories there are civil and criminal judges of first instance, and also judges in the municipios.

### Finance.

The revenue and expenditure for five years were as follows:—

—	1912-13	1913-14	1914-15	1915-16 <sup>1</sup>	1916-17 <sup>1</sup>
	£	£	£	£	£
Revenue . .	2,802,570	2,696,598	2,196,876	1,583,780	1,767,200
Expenditure .	2,660,233	2,891,079	1,937,160	1,568,096	1,767,200

<sup>1</sup> Estimates.

The following table shows (in bolivars) the principal items of the budget for the fiscal year ended June 30, 1917:—

Items	Revenue	Items	Expenditure
	Bolivars		Bolivars
Customs . . . . .	10,700,000	Department of Interior . .	9,236,643
30 per cent. surtax . . .	3,210,000	Department of Foreign Affairs . .	1,129,245
Tax of 25 per cent. on import duties . . . .	2,675,000	Department of Finance . .	14,930,175
Transit tax . . . . .	300,000	Department of War and Navy . . . . .	9,640,346
Liquor tax . . . . .	4,000,000	Department of Internal Development . .	3,036,490
Cigarettes and matches .	8,930,000	Department of Public Works . . . . .	3,175,400
Salt revenue . . . . .	5,500,000	Department of Public Instruction . . . .	2,699,568
Taken from Treasury balances . . . . .	5,960,000	Extraordinary . . . . .	432,188
Total (including other receipts . . . . .)	44,180,000 (1,767,200L.)	Total . . . . .	44,180,000 (1,767,200L.)

The foreign debt of Venezuela began with its assumption of its share of the old Colombian debt in 1834, amounting to 1,888,396*l.*, and 906,480*l.* arrears of interest; total, 2,794,826*l.* An arrangement was made in 1881, when new consolidated bonds were issued to the amount of 2,750,000*l.* for the conversion of the external debt. In August, 1904, the outstanding amount of this debt with arrears of interest, and of the 5 per cent. loan of 1896 with arrears of interest was 5,618,725*l.* In 1905 this debt was converted into the 3 per cent. diplomatic debt of 5,229,700*l.*, of which at the end of 1916 the outstanding amount was 3,674,260*l.* The total public debt at the end of December, 1915, was made up of 111,283,078 bolivars external debt, and 50,147,493 bolivars internal debt, making a total of 161,430,571 bolivars (6,393,289*l.*).

### Defence.

The active army consists of infantry, 20 battalions, each of 400 men; artillery, 8 batteries, each of 200 men, and 1 naval battalion. The naval force contains one battalion distributed among the vessels of the navy, which consists of an unarmoured cruiser (acquired in September, 1912), 3 gunboats, a transport, a tug, a torpedo boat, and several coastguard vessels.

### Production and Industry.

The surface of Venezuela is naturally divided into 3 distinct zones—the agricultural, the pastoral, and the forest zone. In the first are grown coffee, cocoa, sugar-cane, maize, cotton, beans, &c.; the second affords runs for cattle; and in the third tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonga beans, copaiba, vanilla, growing wild, are worked by the inhabitants. The area under coffee is estimated at from 180,000 to 200,000 acres. The coffee plantations number about 33,000, and those of cocoa 5,000. There are about 11,000 sugar plantations, which flourished formerly, but have suffered from various causes, the latest blow having been the establishment of a Government monopoly in rum. The annual production of sugar is about 3,000 tons. The new sugar centrals being established, three on the lake of Maracaibo and one on the lake of Valencia, will largely increase this total.

One-fifth of the population is engaged in agriculture. The live stock in Venezuela is estimated as follows:—2,004,257 oxen, 176,668 sheep, 1,667,272 goats, 191,079 horses, 89,186 mules, 312,810 asses, 1,618,214 pigs. A new census of stock has been ordered. In the agricultural and cattle industries about 60,000 labourers are employed.

Venezuela is rich in metals and other minerals. The principal mining industry is the production of gold near Ciudad Bolívar, and in the last 14½ years the output has totaled 13,515 kilos. In 1915, 57,283 ozs. troy were exported (17,387 ozs. in 1914). The copper mines at Aroa on the Bolívar railway have been re-opened (by an English Syndicate). Coal is worked at Coro in Falcon State and at Naricual. Salt mines in various States have been leased by the Government to a company at a yearly rent of 4,000,000 bolivars. Petroleum is found in many places and exclusive exploring concessions were given to 3 English Syndicates of late and to an American Company in 1911. Asphalt from Lake Bermúdez is exported to the United States. Round the island of Margarita and neighbouring islets off the north coast of Venezuela pearl fishing is carried

Venezuela has few industries, all manufactured materials required being imported, even the sacking necessary for the export of Venezuelan produce. Salt and matches are Government monopolies; the latter is farmed by an English Company.

### Commerce.

The value of the imports into and exports from Venezuela in the last 5 years was :—

—	1911-12	1912-13	1913-14	1914-15	1915-16
	£	£	£	£	£
Imports . . . . .	3,774,665	4,220,784	3,524,414	2,335,063	3,542,318
Exports . . . . .	4,654,996	5,183,585	5,555,714	4,103,988	4,993,746

Principal domestic exports in 1914-15 and 1915-16 were :—

—	1914-15	1915-16	—	1914-15	1915-16
	Bolivars	Bolivars		Bolivars	Bolivars
Coffee . . . . .	51,462,733	64,947,259	Hides . . . . .	8,460,274	10,163,054
Cocoa . . . . .	21,375,613	23,573,879	Cattle . . . . .	1,489,714	1,272,244
Balata & rubber . . . . .	3,489,930	4,046,468	Gold . . . . .	5,791,293	7,044,801

The distribution of the commerce in 1914-15 and 1915-16 was mainly as follows :—

	Imports		Exports	
	1914-15	1915-16	1914-15	1915-16
	£	£	£	£
United States . . . . .	1,346,402	2,169,671	2,488,834	2,668,967
United Kingdom and Colonies . . . . .	423,262	788,339	331,580	307,934
Netherlands and Colonies . . . . .	196,838	102,722	366,150	698,514
Italy . . . . .	110,214	92,347	114,855	79,109
France and Colonies . . . . .	90,226	197,090	474,996	818,118
Spain and Colonies . . . . .	89,576	180,665	213,406	326,740

Total trade between Venezuela and the United Kingdom (according to the Board of Trade returns) for 5 years :—

	1912	1913	1914	1915	1916
	£	£	£	£	£
Imports from Venezuela to U. Kingdom	667,761	560,180	219,968	334,844	171,838
Exports to Venezuela from U. Kingdom	979,636	825,674	672,213	506,827	944,300

### Shipping and Communications.

The number of vessels which entered ports of Venezuela in 1912-13 was 1,322 of an aggregate tonnage of 1,397,932 tons (British vessels, 142 of 218,014 tons). The number cleared was 1,552 vessels of 1,427,608 tons (British 92 of 169,206 tons). The ports of the Republic are visited regularly by the vessels of American, British, Dutch, French, German, Italian, and Spanish steamship companies. Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government.

Venezuela had in 1912, 8 steamers of 2,046 tons, and 15 sailing vessels of 2,432 tons.

The roads of the country are primitive and (away from the rivers and railways) traffic is carried on by means of pack animals and small mule-carts. A new road is being constructed in the western part of the country from Uraca, the present terminus of the Tachira Railroad, southward of the mountains of San Cristobal. Another is to run from Caracas to San Cristobal (683 miles).

In Venezuela there are 12 lines of railway (5 national and 7 foreign—the latter including 4 British and 1 German) with a total length of (January 1st, 1916) 533 miles. In 1912 the railway receipts amounted to 12,934,562 bolivars (2,312,876 from passengers, and 10,671,686 from other traffic). In Caracas electric tramways are worked by an English Company.

There are about 11,160 miles of navigable water in Venezuela. The Orinoco Steamboat Company has a virtual monopoly of the navigation of the river and its tributaries and the Lake of Maracaibo.

The telegraph system has (1915) a network of 5,443 miles; 211 telegraph offices. An English company supplies telephonic communication in most parts of the settled country. Length of telephone lines in the Republic (December, 1914) 12,511 miles. There are 296 post-offices (1915).

### Money, Weights, and Measures.

The Bank of Venezuela (capital 12,000,000 bolivars) had on June 30, 1915, a reserve fund of 1,140,371 United States gold dollars; cash holdings of 3,864,727 dollars. The Bank of Caracas has a capital of 6,000,000 bolivars, with reserve amounting (June 30, 1915) to 246,102 dollars; the Bank of Maracaibo has a capital of 1,250,000 bolivars, and had on June 30, 1915, a reserve fund of 14,028 dollars.

The new Venezuelan banking law (1913) provides for the free establishment of banks in Venezuela, which shall have power to emit notes to bearer convertible on presentation. None have been established yet.

The official monetary unit is the *Bolivar*, which corresponds to the franc. It is divided into 100 centimos. The face value of £1 is 25·25 bolivars, but exchange rises, when exports decrease, to about 26 bolivars.

The bank notes in circulation are as follows (the figures in brackets showing their values): 1,000 bolivars (£39 11s. 8d.); 500 bolivars (£19 15s. 10d.); 400 bolivars (£15 16s. 8d.); 100 bolivars (£3 19s. 2d.); 50 bolivars (£1 19s. 7d.); 20 bolivars (15s. 10d.); and 10 bolivars (7s. 11d.)

Gold coins are the old Spanish *onza* (80 bolivars) and 20 bolivars. Silver coins are 5-bolivar pieces, commonly called *fuerte* (3s. 11½d.); 2½ bolivars (1s. 11¾d.); 2 bolivars (1s. 7d.); 1 bolivar (9¾d.); ½-bolivar, called a *real* (4¾d.); and ¼ bolivar, called a *medio* (2¼d.). Nickel coins are 0·125 bolivar, commonly called a *cuartillo* or a *locha* (1¼d.), and 0·05 bolivar, called a *centavo* (½d.).

A decree of May 18, 1912, provided that the official system of weights and measures shall be the metric system.

## Diplomatic and Consular Representatives.

### 1. OF VENEZUELA IN GREAT BRITAIN.

*Envoy Extraordinary and Minister*.—Dr. Don José Ignacio de Cardenas, appointed July, 1914.

*Secretaries*.—Dr. Pedro Cesar Dominici and Dr. G. Sanchez.

*Consul in London* (Honorary).—Senor Pablo Heyden.

There are Consular representatives at Cardiff, Liverpool, Manchester, Glasgow, Newport, and Southampton.

### 2. OF GREAT BRITAIN IN VENEZUELA.

*Envoy Extraordinary and Minister*.—H. H. D. Beaumont, appointed May 1st, 1916.

*Vice-Consul at Caracas*.—T. Hor Rees.

*Consul at Bolivar*.—A. C. Hart.

There are Vice-Consuls at La Guaira, Maracaibo, Puerto Cabello, Guiria, and a Consular-Agent at San Felix.

## The Paper You Need

THE next few years will undoubtedly prove the most critical and the most interesting in the history of the world. They will witness the closing phase of the Great War; the peace settlement; the era of reconstruction and readjustment. They will witness also a determined effort on the part of thinkers in every country to remould human and national relationships to some permanent semblance of decency, order, and justice. It will be a period of startling changes and revolutionary transitions—a new Refor-

mation in the world's social and political life.

For the reader who desires an authoritative record and interpretation of this mighty epoch, "The Nation" is indispensable. It is the most vigorous of the weekly critical journals, and many of the foremost writers of Great Britain contribute regularly to its pages.

While its chief concern is with political and social affairs, it deals no less competently and brilliantly with literature, art, music, the drama, and finance.

## THE NATION

SATURDAYS. 6d.

Office: 10, Adelphi Terrace, W.C. 2

# THE ECONOMIST.

(ESTABLISHED 1843.)

Weekly Commercial Times, Bankers' Gazette,  
and Railway Monitor.

A POLITICAL, LITERARY, FINANCIAL, AND GENERAL NEWSPAPER

Price 8d. By Post, 8½d. Annual Subscription for the  
United Kingdom, £2. Colonies and Abroad, £2 4s.

A recognised authority on all Financial and Commercial subjects. In addition to a large high-class general circulation, the **ECONOMIST** is subscribed to by Banking Houses, Chambers of Commerce, Mercantile Firms, and Railway, Insurance, and other Companies throughout the United Kingdom, the Colonies, and Abroad; and, as its columns from week to week show, it is the recognised organ for the announcements of some of the most important trades in the Kingdom.

Published every Saturday in Time for the Morning Mails.

Offices: GRANVILLE HOUSE, ARUNDEL STREET, STRAND, W.C. 2.  
and of all Booksellers and Newsagents.

SECOND IMPRESSION. 8vo. 7s. 6d.

With Portraits and other Illustrations.

## **THE NEW PACIFIC** *British Policy and German Aims*

BY

C. BRUNSDON FLETCHER.

With a Preface by VISCOUNT BRYCE,  
and a Foreword by

The Rt. Hon. W. M. HUGHES,  
Prime Minister of Australia.

LONDON: MACMILLAN & CO., LTD.

# The Spectator

A WEEKLY REVIEW OF  
POLITICS, LITERATURE, THEOLOGY, AND ART.

Established 1828.

EVERY SATURDAY, Price 6d. Inland Postage,  $\frac{1}{2}$ d. ;  
Foreign Postage, 1d.

THE *Spectator*, which circulates throughout the educated classes in the United Kingdom, the Empire, and America, has the following among other features :—

The news of the week is compressed into an animated narrative, and thus readers of the paper are insured against missing the true bearing and the essential details of current events.

The leading articles deal in an independent and unconventional spirit with the chief matters of political, economic, and general interest.

Other articles treat of literary, theological, social, and artistic questions, and discuss interesting and curious aspects of natural history and country life.

Books of special interest and importance are dealt with in the long reviews, while the shorter notices give in a compressed form the judgment of equally competent critics on contemporary literature.

In the weekly review of novels, readers of fiction may find a useful guide for making out their lists for the circulating libraries.

The *Spectator* contains a List of all Books published during the week (not under one shilling in price), with the names of the publishers and the prices attached ; a feature which will greatly increase its value to book-sellers, librarians, literary institutions, and private persons.

LONDON: MACMILLAN AND CO., LTD.

# The Man of Affairs

requires among his Reference Books a good, reliable Atlas—one that can be depended on at every turn. Such an Atlas is the **ROYAL ATLAS**. The Geographical Information contained in the latest Edition is Accurate and Reliable, and of the very latest so that the Man of Affairs may consult it with perfect confidence and rely upon it absolutely.

## The Royal Atlas

contains many unique features that are not to be found in other atlases. Its **60 full-page Maps** are magnificently printed on thick plate paper in colours and in a special manner that increases the beauty and clearness of the maps.

A **special index** is given to each map, which by an unique arrangement enhances its usefulness and makes the location of any place easy and rapid.

A **general index** of the principal places is also given at the end of the volume.

Superbly bound in half morocco.

**Price - - £4 4s. net.**

*Every Man of Affairs should have this Atlas at his elbow for everyday consultation.*

**London: MACMILLAN & CO., Ltd.**

## Macmillan's New and Recent BOOKS ON ECONOMICS, &c.

### SECOND THOUGHTS OF AN ECON- OMIST.

By the late WILLIAM SMART, D.Phil., LL.D.  
With a Biographical sketch by THOMAS JONES, M.A. Extra  
crown 8vo. 5s. net.

### ECONOMICS. An Introduction for the General Reader.

By HENRY CLAY, M.A. Crown 8vo. 3s. 6d. net.

*The Journal of Education.*—"Mr. Clay has produced a first-rate book, well planned and well written—an introduction on the subject that can be heartily recommended. The book ought to be on every teacher's shelf. Not only does it throw light on many of the problems of the day, but it is eminently suggestive for essay subjects. Mr. Clay has covered all the ground thoroughly, and his illustrations are attractive by reason of their freshness."

### DICTIONARY OF POLITICAL ECON- OMY.

Edited by Sir R. H. INGLIS PALGRAVE, F.R.S.  
In 3 vols. Vol. I. A—E. Fourth Impression, with Cor-  
rections. Medium 8vo. 21s. net. Previously published  
Vols. II. and III. 21s. net each. Appendix to Vol. III.  
Separately. Sewed. 2s. 6d. net.

### MODERN EUROPE, 1789–1914. By

SYDNEY HERBERT. Crown 8vo. 2s. 6d. net.

The object of this book is to describe the main lines of development pursued in European politics since the beginning of the French Revolution in 1789. It is of great interest to the reader who wishes to understand the causes which have helped to produce the present world-convulsion.

LONDON : MACMILLAN AND CO., LTD.

# KING'S NEW BOOKS.

## CENTRAL EUROPE.

By FRIDRICH NAUMANN, Member of the Reichstag. Translated from the German into English by Mrs. C. M. MEREEDITH. With an Introduction by W. J. ASHLEY, M.A., Professor of Commerce, and Dean of the Faculty of Commerce in the University of Birmingham. Demy 8vo. Cloth. 7s. 6d. net. *Inland Postage, 6d.*

One of the objects of the "Middle Europe" scheme appears to be the arrangement, if possible, of mutual preferences between the States of Central Europe, and, at the same time, the retention of all the advantages of the Most-Favoured Nation treatment for their exports to other countries. Professor Ashley, in his Introduction to this book, says: "More than a year ago, long before an Economic Conference at Paris was contemplated, some of the best brains amongst the economists of Germany were at work devising the formula which should keep alive the Most-Favoured Nation Clause for Germany's benefit while getting rid of it wherever it stood in the way of an allied Central Europe."

## EDUCATION REFORM.

Report of the Education Reform Council, with Introduction by Dr. WILLIAM GARNETT; the Reports of Investigating Committees upon Administration; University and Higher Technical Education; Curricula and Methods for Secondary, Continuation, and Elementary Schools; the Training of Women; the Supply, Training, and Position of Teachers; the Examinations for Secondary School Certificates; the Training of Character; Research in Education; Health and Medical Service in Schools; Lists of Council and Committees, Memoranda, and all official information. Demy 8vo. Cloth. 5s. net. *Inland Postage, 6d.*

## TRADE FALLACIES.

A Criticism of Existing Methods and Suggestions for a Reform towards National Prosperity. By ARTHUR KITSON, author of "The Money Problem," &c., &c. With a Preface by FRANCIS STOPFORD, Editor of "Land and Water." Crown 8vo. Cloth. 5s. net. *Inland Postage, 4d.*

CONTENTS.—Chap. I. The Psychological Factor. II. The Financial Factor. III. Capturing German Trade. IV. Britain's Banking System. V. The London Gold Market. VI. War and the Bankers. VII. The Gold Fetish. VIII. Inadequacy of our Banks. IX. Towards a Better Banking System. X. Treasury Notes. XI. German Trade Methods. XII. New Steps in Economic Reform. XIII. Labour, Capital, and the State. XIV. Property and the State. XV. The Coming Trade War. XVI. State Control of Industries. XVII. Psychology of the Workshop.

## BRITISH INCOMES AND PROPERTY.

The Application of Official Statistics to Economic Problems. By J. C. STAMP, D.Sc. (Econ.), F.R.S., Cobden Prizeman of the University of London. With Illustrative Charts. Demy 8vo. Cloth. 12s. 6d. net. *Inland Postage, 7d.*

*The Times*—"Has made the way clear for future students . . . in regard to many matters which have in the past deceived even the very elect . . . This volume . . . is of great value . . . Explains many points which taxpayers need to be informed about . . . Has furnished future inquirers with information which will save them from errors into which some of the ablest and most careful men have occasionally fallen in the past . . . The chapter on the National Capital is an excellent criticism of the various attempts that have been made . . . an excellent compendium . . ."

## SPUN YARNS OF A NAVAL OFFICER.

By ALBERT R. WONHAM, Captain, Royal Navy. Demy 8vo. Clkth. 12 Illustrative Plates. 10s. 6d. net. *Inland Postage, 6d.* A volume dedicated to Admiral Sir John Jellicoe, and entertaining to all admirers of the British Navy.
